The death of that prince exposed Athanasius to a second persecution; and the feeble Constantius, the sovereign of the East, soon became the secret accomplice of the Eusebians. Ninety bishops of that sect or faction assembled at Antioch, under the specious pretence of dedicating the cathedral. They composed an ambiguous creed, which is faintly tinged with the colours of Semi-Arianism, and twenty-five canons, which still regulate the discipline of the orthodox Greeks.[112](#) It was decided, with some appearance of equity, that a bishop, deprived by a synod, should not resume his episcopal functions, till he had been absolved by the judgment of an equal synod; the law was immediately applied to the case of Athanasius, the council of Antioch pronounced, or rather confirmed, his degradation: a stranger, named Gregory, was seated on his throne; and Philagrius,[113](#) the prefect of Egypt, was instructed to support the new primate with the civil and military powers of the province. Oppressed by the conspiracy of the Asiatic prelates Athanasius withdrew from Alexandria, and passed three[114](#) years as an exile and a suppliant on the holy threshold of the Vatican.[115](#) By the assiduous study of the Latin language, he soon qualified himself to negotiate with the Western clergy; his decent flattery swayed and directed the haughty Julius: the Roman Pontiff was persuaded to consider his appeal as the peculiar interest of the Apostolic see; and his innocence was unanimously declared in a council of fifty bishops of Italy.[116](#) At the end of three years, the primate was summoned to the court of Milan by the emperor Constans, who, in the indulgence of unlawful pleasures, still professed a lively regard for the orthodox faith. The cause of truth and justice was promoted by the influence of gold,[117](#) and the ministers of Constans advised their sovereign to require the convocation of an ecclesiastical assembly, which might act as the representatives of the Catholic church. Ninety-four bishops of the West, seventy-six bishops of the East, encountered each other at Sardica on the verge of the two empires, but in the dominions of the protector of Athanasius. Their debates soon

degenerated into hostile altercations; the Asiatics, apprehensive for their personal safety, retired to Philippopolis in Thrace; and the rival synods reciprocally hurled their spiritual thunders against their enemies, whom they piously condemned as the enemies of the true God. Their decrees were published and ratified in their respective provinces; and Athanasius, who in the West was revered as a saint, was exposed as a criminal to the abhorrence of the East.¹¹⁸ The council of Sardica reveals the first symptoms of discord and schism between the Greek and Latin churches, which were separated by the accidental difference of faith and the permanent distinction of language.

During the second exile in the West, Athanasius was frequently admitted to the Imperial presence: at Capua, Lodi, Milan, Verona, Padua, Aquileia, and Treves. The bishop of the diocese usually assisted at these interviews; the master of the offices stood before the veil or curtain of the sacred apartment; and the uniform moderation of the primate might be attested by these respectable witnesses, to whose evidence he solemnly appeals.¹¹⁹ Prudence would undoubtedly suggest the mild and respectful tone that became a subject and a bishop. In these familiar conferences with the sovereign of the West, Athanasius might lament the error of Constantius; but he boldly arraigned the guilt of his eunuchs and his Arian prelates; deplored the distress and danger of the Catholic church; and excited Constantius to emulate the zeal and glory of his father. The emperor declared his resolution of employing the troops and treasures of Europe in the orthodox cause; and signified, by a concise and peremptory epistle to his brother Constantius, that, unless he consented to the immediate restoration of Athanasius, he himself, with a fleet and army, would seat the archbishop on the throne of Alexandria.¹²⁰ But this religious war, so horrible to nature, was prevented by the timely compliance of Constantius; and the emperor of the East condescended to solicit a reconciliation with a subject whom he had injured. Athanasius waited with decent pride, till he had received three successive epistles full of the strongest assurances of the protection, the favour, and the esteem of his sovereign; who invited him to resume his episcopal seat, and who added the humiliating precaution of engaging his principal ministers to attest the sincerity of his intentions. They were manifested in a still more public manner by the strict orders which were despatched into Egypt to recall the adherents of Athanasius, to restore their privileges, to proclaim their innocence, and to erase from the public registers the illegal proceedings which had been obtained during the prevalence of the Eusebian faction. After every satisfaction and security had been given, which justice or even delicacy could require, the primate proceeded, by slow journeys, through the provinces of Thrace, Asia, and Syria; and his progress was marked by the abject homage of the oriental bishops, who excited his contempt without deceiving his penetration.¹²¹ At Antioch he saw the emperor Constantius; sustained, with modest firmness, the embraces and protestations of his master, and eluded the proposal of allowing the Arians a single church at Alexandria, by claiming, in the other cities of the empire, a similar toleration for his own party; a reply which might have appeared just and moderate in the mouth of an independent prince. The

entrance of the archbishop into his capital was a triumphal procession; absence and persecution had endeared him to the Alexandrians; his authority, which he exercised with rigour, was more firmly established; and his fame was diffused from Æthiopia to Britain, over the whole extent of the Christian world.[122](#)

But the subject who has reduced his prince to the necessity of dissembling can never expect a sincere and lasting forgiveness; and the tragic fate of Constans soon deprived Athanasius of a powerful and generous protector. The civil war between the assassin and the only surviving brother of Constans, which afflicted the empire above three years, secured an interval of repose to the Catholic church; and the two contending parties were desirous to conciliate the friendship of a bishop who, by the weight of his personal authority, might determine the fluctuating resolutions of an important province. He gave audience to the ambassadors of the tyrant, with whom he was afterwards accused of holding a secret correspondence;[123](#) and the emperor Constantius repeatedly assured his dearest father, the most reverend Athanasius, that, notwithstanding the malicious rumours which were circulated by their common enemies, he had inherited the sentiments, as well as the throne, of his deceased brother.[124](#) Gratitude and humanity would have disposed the primate of Egypt to deplore the untimely fate of Constans, and to abhor the guilt of Magnentius; but, as he clearly understood that the apprehensions of Constantius were his only safeguard, the fervour of his prayers for the success of the righteous cause might perhaps be somewhat abated. The ruin of Athanasius was no longer contrived by the obscure malice of a few bigoted or angry bishops, who abused the authority of a credulous monarch. The monarch himself avowed the resolution, which he had so long suppressed, of avenging his private injuries;[125](#) and the first winter after his victory, which he passed at Arles, was employed against an enemy more odious to him than the vanquished tyrant of Gaul.

If the emperor had capriciously decreed the death of the most eminent and virtuous citizen of the republic, the cruel order would have been executed without hesitation, by the ministers of open violence or of specious injustice. The caution, the delay, the difficulty with which he proceeded in the condemnation and punishment of a popular bishop, discovered to the world that the privileges of the church had already revived a sense of order and freedom in the Roman government. The sentence which was pronounced in the synod of Tyre, and subscribed by a large majority of the Eastern bishops, had never been expressly repealed; and, as Athanasius had been once degraded from his episcopal dignity by the judgment of his brethren, every subsequent act might be considered as irregular, and even criminal. But the memory of the firm and effectual support which the primate of Egypt had derived from the attachment of the Western church engaged Constantius to suspend the execution of the sentence, till he had obtained the concurrence of the Latin bishops. Two years were consumed in ecclesiastical negotiations; and the important cause between the emperor and one of

his subjects was solemnly debated, first in the synod of Arles, and afterwards in the great council of Milan,[126](#) which consisted of above three hundred bishops. Their integrity was gradually undermined by the arguments of the Arians, the dexterity of the eunuchs, and the pressing solicitations of a prince, who gratified his revenge at the expense of his dignity, and exposed his own passions, whilst he influenced those of the clergy. Corruption, the most infallible symptom of constitutional liberty, was successfully practised: honours, gifts, and immunities were offered and accepted as the price of an episcopal vote;[127](#) and the condemnation of the Alexandrian primate was artfully represented as the only measure which could restore the peace and union of the Catholic church. The friends of Athanasius were not, however, wanting to their leader, or to their cause. With a manly spirit, which the sanctity of their character rendered less dangerous, they maintained in public debate, and in private conference with the emperor, the eternal obligation of religion and justice. They declared that neither the hope of his favour nor the fear of his displeasure should prevail on them to join in the condemnation of an absent, an innocent, a respectable brother.[128](#) They affirmed, with apparent reason, that the illegal and obsolete decrees of the council of Tyre had long since been tacitly abolished by the Imperial edicts, the honourable re-establishment of the archbishop of Alexandria, and the silence or recantation of his most clamorous adversaries. They alleged that his innocence had been attested by the unanimous bishops of Egypt, and had been acknowledged, in the councils of Rome and Sardica,[129](#) by the impartial judgment of the Latin church. They deplored the hard condition of Athanasius, who, after enjoying so many years his seat, his reputation, and the seeming confidence of his sovereign, was again called upon to confute the most groundless and extravagant accusations. Their language was specious; their conduct was honourable: but in this long and obstinate contest, which fixed the eyes of the whole empire on a single bishop, the ecclesiastical factions were prepared to sacrifice truth and justice to the more interesting object of defending, or removing, the intrepid champion of the Nicene faith. The Arians still thought it prudent to disguise, in ambiguous language, their real sentiments and designs; but the orthodox bishops, armed with the favour of the people and the decrees of a general council, insisted on every occasion, and particularly at Milan, that their adversaries should purge themselves from the suspicion of heresy, before they presumed to arraign the conduct of the great Athanasius.[130](#)

But the voice of reason (if reason was indeed on the side of Athanasius) was silenced by the clamours of a factious or venal majority; and the councils of Arles and Milan were not dissolved, till the archbishop of Alexandria had been solemnly condemned and deposed by the judgment of the Western, as well as of the Eastern, church. The bishops who had opposed, were required to subscribe, the sentence; and to unite in religious communion with the suspected leaders of the adverse party. A formulary of consent was transmitted by the messengers of state to the absent bishops: and all those who refused to submit their private opinion to the public and inspired wisdom of the

councils of Arles and Milan were immediately banished by the emperor, who affected to execute the decrees of the Catholic church. Among those prelates who led the honourable band of confessors and exiles, Liberius of Rome, Osius of Cordova, Paulinus of Treves, Dionysius of Milan, Eusebius of Vercellæ, Lucifer of Cagliari, and Hilary of Poitiers may deserve to be particularly distinguished. The eminent station of Liberius, who governed the capital of the empire; the personal merit and long experience of the venerable Osius, who was revered as the favourite of the great Constantine, and the father of the Nicene faith; placed those prelates at the head of the Latin church: and their example, either of submission or resistance, would probably be imitated by the episcopal crowd. But the repeated attempts of the emperor to seduce or to intimidate the bishops of Rome and Cordova were for some time ineffectual. The Spaniard declared himself ready to suffer under Constantius, as he had suffered threescore years before under his grandfather Maximian. The Roman, in the presence of his sovereign, asserted the innocence of Athanasius, and his own freedom. When he was banished to Berœa in Thrace, he sent back a large sum which had been offered for the accommodation of his journey; and insulted the court of Milan by the haughty remark that the emperor and his eunuchs might want that gold to pay their soldiers and their bishops.^{[131](#)} The resolution of Liberius and Osius was at length subdued by the hardships of exile and confinement. The Roman pontiff purchased his return by some criminal compliances; and afterwards expiated his guilt by a seasonable repentance. Persuasion and violence were employed to extort the reluctant signature of the decrepit bishop of Cordova, whose strength was broken, and whose faculties were perhaps impaired, by the weight of an hundred years; and the insolent triumph of the Arians provoked some of the orthodox party to treat with inhuman severity the character, or rather the memory, of an unfortunate old man, to whose former services Christianity itself was so deeply indebted.^{[132](#)}

The fall of Liberius and Osius reflected a brighter lustre on the firmness of those bishops who still adhered, with unshaken fidelity, to the cause of Athanasius and religious truth. The ingenious malice of their enemies had deprived them of the benefit of mutual comfort and advice, separated those illustrious exiles into distant provinces, and carefully selected the most inhospitable spots of a great empire.^{[133](#)} Yet they soon experienced that the deserts of Libya and the most barbarous tracts of Cappadocia were less inhospitable than the residence of those cities in which an Arian bishop could satiate, without restraint, the exquisite rancour of theological hatred.^{[134](#)} Their consolation was derived from the consciousness of rectitude and independence, from the applause, the visits, the letters, and the liberal alms of their adherents,^{[135](#)} and from the satisfaction which they soon enjoyed of observing the intestine divisions of the adversaries of the Nicene faith. Such was the nice and capricious taste of the emperor Constantius, and so easily was he offended by the slightest deviation from his imaginary standard of Christian truth, that he persecuted, with equal zeal, those who defended the *consubstantiality*, those who asserted the *similar substance*, and those

who denied the *likeness*, of the Son of God. Three bishops, degraded and banished for those adverse opinions, might possibly meet in the same place of exile; and, according to the difference of their temper, might either pity or insult the blind enthusiasm of their antagonists, whose present sufferings would never be compensated by future happiness.

The disgrace and exile of the orthodox bishops of the West were designed as so many preparatory steps to the ruin of Athanasius himself.¹³⁶ Six and twenty months had elapsed, during which the Imperial court secretly laboured, by the most insidious arts, to remove him from Alexandria, and to withdraw the allowance which supplied his popular liberality. But, when the primate of Egypt, deserted and proscribed by the Latin church, was left destitute of any foreign support, Constantius despatched two of his secretaries with a verbal commission to announce and execute the order of his banishment. As the justice of the sentence was publicly avowed by the whole party, the only motive which could restrain Constantius from giving his messengers the sanction of a written mandate must be imputed to his doubt of the event; and to a sense of the danger to which he might expose the second city, and the most fertile province, of the empire if the people should persist in the resolution of defending, by force of arms, the innocence of their spiritual father. Such extreme caution afforded Athanasius a specious pretence respectfully to dispute the truth of an order, which he could not reconcile either with the equity, or with the former declarations, of his gracious master. The civil powers of Egypt found themselves inadequate to the task of persuading or compelling the primate to abdicate his episcopal throne; and they were obliged to conclude a treaty with the popular leaders of Alexandria, by which it was stipulated that all proceedings and hostilities should be suspended till the emperor's pleasure had been more distinctly ascertained. By this seeming moderation, the Catholics were deceived into a false and fatal security; while the legions of the Upper Egypt and of Libya advanced, by secret orders and hasty marches, to besiege, or rather to surprise, a capital habituated to sedition and inflamed by religious zeal.¹³⁷ The position of Alexandria, between the sea and the lake Mareotis, facilitated the approach and landing of the troops; who were introduced into the heart of the city, before any effectual measures could be taken either to shut the gates or to occupy the important posts of defence. At the hour of midnight, twenty-three days after the signature of the treaty, Syrianus, duke of Egypt, at the head of five thousand soldiers, armed and prepared for an assault, unexpectedly invested the church of St. Theonas, where the archbishop, with a party of his clergy and people, performed their nocturnal devotions. The doors of the sacred edifice yielded to the impetuosity of the attack, which was accompanied with every horrid circumstance of tumult and bloodshed; but, as the bodies of the slain and the fragments of military weapons remained the next day an unexceptionable evidence in the possession of the Catholics, the enterprise of Syrianus may be considered as a successful irruption, rather than as an absolute conquest. The other churches of the city were profaned by similar outrages; and, during at least four months, Alexandria was exposed to the insults of a licentious army, stimulated by the

ecclesiastics of an hostile faction. Many of the faithful were killed; who may deserve the name of martyrs, if their deaths were neither provoked nor revenged; bishops and presbyters were treated with cruel ignominy; consecrated virgins were stripped naked, scourged, and violated; the houses of wealthy citizens were plundered; and, under the mask of religious zeal, lust, avarice, and private resentment were gratified with impunity, and even with applause. The Pagans of Alexandria, who still formed a numerous and discontented party, were easily persuaded to desert a bishop whom they feared and esteemed. The hopes of some peculiar favours, and the apprehension of being involved in the general penalties of rebellion, engaged them to promise their support to the destined successor of Athanasius, the famous George of Cappadocia. The usurper, after receiving the consecration of an Arian synod, was placed on the episcopal throne by the arms of Sebastian, who had been appointed Count of Egypt for the execution of that important design. In the use, as well as in the acquisition, of power, the tyrant George disregarded the laws of religion, of justice, and of humanity; and the same scenes of violence and scandal which had been exhibited in the capital were repeated in more than ninety episcopal cities of Egypt. Encouraged by success, Constantius ventured to approve the conduct of his ministers. By a public and passionate epistle, the emperor congratulates the deliverance of Alexandria from a popular tyrant, who deluded his blind votaries by the magic of his eloquence; expatiates on the virtues and piety of the most reverend George, the elected bishop; and aspires, as the patron and benefactor of the city, to surpass the fame of Alexander himself. But he solemnly declares his unalterable resolution to pursue with fire and sword the seditious adherents of the wicked Athanasius, who, by flying from justice, has confessed his guilt, and escaped the ignominious death which he had so often deserved.[138](#)

Athanasius had indeed escaped from the most imminent dangers; and the adventures of that extraordinary man deserve and fix our attention. On the memorable night when the church of St. Theonas was invested by the troops of Syrianus, the archbishop, seated on his throne, expected, with calm and intrepid dignity, the approach of death. While the public devotion was interrupted by shouts of rage and cries of terror, he animated his trembling congregation to express their religious confidence, by chanting one of the psalms of David, which celebrates the triumph of the God of Israel over the haughty and impious tyrant of Egypt. The doors were at length burst open; a cloud of arrows was discharged among the people; the soldiers, with drawn swords, rushed forwards into the sanctuary; and the dreadful gleam of their armour was reflected by the holy luminaries which burnt round the altar.[139](#) Athanasius still rejected the pious importunity of the Monks and Presbyters, who were attached to his person; and nobly refused to desert his episcopal station, till he had dismissed in safety the last of the congregation. The darkness and tumult of the night favoured the retreat of the archbishop; and, though he was oppressed by the waves of an agitated multitude, though he was thrown to the ground, and left without sense or motion, he still recovered his undaunted courage, and eluded the eager search of the soldiers, who

were instructed by their Arian guides that the head of Athanasius would be the most acceptable present to the emperor. From that moment the primate of Egypt disappeared from the eyes of his enemies, and remained above six years concealed in impenetrable obscurity.[140](#)

The despotic power of his implacable enemy filled the whole extent of the Roman world; and the exasperated monarch had endeavoured, by a very pressing epistle to the Christian princes of Æthiopia, to exclude Athanasius from the most remote and sequestered regions of the earth. Counts, prefects, tribunes, whole armies, were successively employed to pursue a bishop and a fugitive; the vigilance of the civil and military powers were excited by the Imperial edicts; liberal rewards were promised to the man who should produce Athanasius, either alive or dead; and the most severe penalties were denounced against those who should dare to protect the public enemy.[141](#) But the deserts of Thebais were now peopled by a race of wild yet submissive fanatics, who preferred the commands of their abbot to the laws of their sovereign. The numerous disciples of Anthony and Pachomius received the fugitive primate as their father, admired the patience and humility with which he conformed to their strictest institutions, collected every word which dropt from his lips as the genuine effusions of inspired wisdom; and persuaded themselves that their prayers, their fasts, and their vigils were less meritorious than the zeal which they expressed, and the dangers which they braved, in the defence of truth and innocence.[142](#) The monasteries of Egypt were seated in lonely and desolate places, on the summit of mountains, or in the islands of the Nile; and the sacred horn or trumpet of Tabenne was the well-known signal which assembled several thousand robust and determined Monks, who, for the most part, had been the peasants of the adjacent country. When their dark retreats were invaded by a military force, which it was impossible to resist, they silently stretched out their necks to the executioner, and supported their national character that tortures could never wrest from an Egyptian the confession of a secret which he was resolved not to disclose.[143](#) The archbishop of Alexandria, for whose safety they eagerly devoted their lives, was lost among a uniform and well-disciplined multitude; and on the nearer approach of danger, he was swiftly removed, by their officious hands, from one place of concealment to another, till he reached the formidable deserts, which the gloomy and credulous temper of superstition had peopled with demons and savage monsters. The retirement of Athanasius, which ended only with the life of Constantius, was spent, for the most part, in the society of the Monks, who faithfully served him as guards, as secretaries, and as messengers; but the importance of maintaining a more intimate connection with the Catholic party tempted him, whenever the diligence of the pursuit was abated, to emerge from the desert, to introduce himself into Alexandria, and to trust his person to the discretion of his friends and adherents. His various adventures might have furnished the subject of a very entertaining romance. He was once secreted in a dry cistern, which he had scarcely left before he was betrayed by the treachery of a female slave;[144](#) and he was

once concealed in a still more extraordinary asylum, the house of a virgin, only twenty years of age, and who was celebrated in the whole city for her exquisite beauty. At the hour of midnight, as she related the story many years afterwards, she was surprised by the appearance of the archbishop in a loose undress, who, advancing with hasty steps, conjured her to afford him the protection which he had been directed by a celestial vision to seek under her hospitable roof. The pious maid accepted and preserved the sacred pledge which was entrusted to her prudence and courage. Without imparting the secret to any one, she instantly conducted Athanasius into her most secret chamber, and watched over his safety with the tenderness of a friend and the assiduity of a servant. As long as the danger continued, she regularly supplied him with books and provisions, washed his feet, managed his correspondence, and dexterously concealed from the eye of suspicion this familiar and solitary intercourse between a saint whose character required the most unblemished chastity and a female whose charms might excite the most dangerous emotions.¹⁴⁵ During the six years of persecution and exile, Athanasius repeated his visits to his fair and faithful companion; and the formal declaration that he saw the councils of Rimini and Seleucia¹⁴⁶ forces us to believe that he was secretly present at the time and place of their convocation. The advantage of personally negotiating with his friends, and of observing and improving the divisions of his enemies, might justify, in a prudent statesman, so bold and dangerous an enterprise; and Alexandria was connected by trade and navigation with every seaport of the Mediterranean. From the depth of his inaccessible retreat, the intrepid primate waged an incessant and offensive war against the protector of the Arians; and his seasonable writings, which were diligently circulated and eagerly perused, contributed to unite and animate the orthodox party. In his public apologies, which he addressed to the emperor himself, he sometimes affected the praise of moderation; whilst at the same time, in secret and vehement invectives, he exposed Constantius as a weak and wicked prince, the executioner of his family, the tyrant of the republic, and the antichrist of the church. In the height of his prosperity, the victorious monarch, who had chastised the rashness of Gallus, and suppressed the revolt of Sylvanus, who had taken the diadem from the head of Vetricius, and vanquished in the field the legions of Magnentius, received from an invisible hand a wound which he could neither heal nor revenge; and the son of Constantine was the first of the Christian princes who experienced the strength of those principles which, in the cause of religion, could resist the most violent exertions of the civil power.¹⁴⁷

The persecution of Athanasius and of so many respectable bishops, who suffered for the truth of their opinions, or at least for the integrity of their conscience, was a just subject of indignation and discontent to all Christians, except those who were blindly devoted to the Arian faction. The people regretted the loss of their faithful pastors, whose banishment was usually followed by the intrusion of a stranger¹⁴⁸ into the episcopal chair; and loudly complained that the right of election was violated, and that they were condemned to obey a mercenary usurper, whose person was unknown, and whose principles were suspected. The Catholics might prove to the world that they

were not involved in the guilt and heresy of their ecclesiastical governor, by publicly testifying their dissent, or by totally separating themselves from his communion. The first of these methods was invented at Antioch, and practised with such success that it was soon diffused over the Christian world. The doxology or sacred hymn, which celebrates the *glory* of the Trinity, is susceptible of very nice, but material, inflections; and the substance of an orthodox, or an heretical, creed may be expressed by the difference of a disjunctive, or a copulative, particle. Alternate responses, and a more regular psalmody,[149](#) were introduced into the public service by Flavianus and Diodorus, two devout and active laymen, who were attached to the Nicene faith. Under their conduct, a swarm of Monks issued from the adjacent desert, bands of well-disciplined singers were stationed in the cathedral of Antioch, the Glory to the Father, and the Son, and the Holy Ghost,[150](#) was triumphantly chanted by a full chorus of voices; and the Catholics insulted, by the purity of their doctrine, the Arian prelate who had usurped the throne of the venerable Eustathius. The same zeal which inspired their songs prompted the more scrupulous members of the orthodox party to form separate assemblies, which were governed by the presbyters, till the death of their exiled bishop allowed the election and consecration of a new episcopal pastor.[151](#) The revolutions of the court multiplied the number of pretenders; and the same city was often disputed, under the reign of Constantius, by two, or three, or even four bishops, who exercised their spiritual jurisdiction over their respective followers, and alternately lost and regained the temporal possessions of the church. The abuse of Christianity introduced into the Roman government new causes of tyranny and sedition; the bands of civil society were torn asunder by the fury of religious factions; and the obscure citizen, who might calmly have surveyed the elevation and fall of successive emperors, imagined and experienced that his own life and fortune were connected with the interests of a popular ecclesiastic. The example of the two capitals, Rome and Constantinople, may serve to represent the state of the empire, and the temper of mankind, under the reign of the sons of Constantine.

I. The Roman pontiff, as long as he maintained his station and his principles, was guarded by the warm attachment of a great people; and could reject with scorn the prayers, the menaces, and the oblations of an heretical prince. When the eunuchs had secretly pronounced the exile of Liberius, the well-grounded apprehension of a tumult engaged them to use the utmost precautions in the execution of the sentence. The capital was invested on every side, and the prefect was commanded to seize the person of the bishop, either by stratagem or by open force. The order was obeyed; and Liberius, with the greatest difficulty, at the hour of midnight, was swiftly conveyed beyond the reach of the Roman people, before their consternation was turned into rage. As soon as they were informed of his banishment into Thrace, a general assembly was convened, and the clergy of Rome bound themselves, by a public and solemn oath, never to desert their bishop, never to acknowledge the usurper Felix; who, by the influence of the eunuchs, had been irregularly chosen and consecrated within the walls

of a profane palace. At the end of two years, their pious obstinacy subsisted entire and unshaken; and, when Constantius visited Rome, he was assailed by the importunate solicitations of a people, who had preserved, as the last remnant of their ancient freedom, the right of treating their sovereign with familiar insolence. The wives of many of the senators and most honourable citizens, after pressing their husbands to intercede in favour of Liberius, were advised to undertake a commission, which, in their hands, would be less dangerous and might prove more successful. The emperor received with politeness these female deputies, whose wealth and dignity were displayed in the magnificence of their dress and ornaments: he admired their inflexible resolution of following their beloved pastor to the most distant regions of the earth, and consented that the two bishops, Liberius and Felix, should govern in peace their respective congregations. But the ideas of toleration were so repugnant to the practice, and even to the sentiments, of those times that, when the answer of Constantius was publicly read in the Circus of Rome, so reasonable a project of accommodation was rejected with contempt and ridicule. The eager vehemence which animated the spectators in the decisive moment of a horse-race was now directed towards a different object; and the Circus resounded with the shout of thousands, who repeatedly exclaimed, "One God, One Christ, One Bishop." The zeal of the Roman people in the cause of Liberius was not confined to words alone; and the dangerous and bloody sedition which they excited soon after the departure of Constantius determined that prince to accept the submission of the exiled prelate, and to restore him to the undivided dominion of the capital. After some ineffectual resistance, his rival was expelled from the city by the permission of the emperor, and the power of the opposite faction; the adherents of Felix were inhumanly murdered in the streets, in the public places, in the baths, and even in the churches; and the face of Rome, upon the return of a Christian bishop, renewed the horrid image of the massacres of Marius and the proscriptions of Sylla.[152](#)

II. Notwithstanding the rapid increase of Christians under the reign of the Flavian family, Rome, Alexandria, and the other great cities of the empire still contained a strong and powerful faction of Infidels, who envied the prosperity, and who ridiculed, even on their theatres, the theological disputes, of the church. Constantinople alone enjoyed the advantage of being born and educated in the bosom of the faith. The capital of the East had never been polluted by the worship of idols; and the whole body of the people had deeply imbibed the opinions, the virtues, and the passions, which distinguished the Christians of that age from the rest of mankind. After the death of Alexander, the episcopal throne was disputed by Paul and Macedonius. By their zeal and abilities they both deserved the eminent station to which they aspired; and, if the moral character of Macedonius was less exceptionable, his competitor had the advantage of a prior election and a more orthodox doctrine. His firm attachment to the Nicene creed, which has given Paul a place in the calendar among saints and martyrs, exposed him to the resentment of the Arians. In the space of fourteen years he was five times driven from the throne; to which he was more frequently restored by the

violence of the people than by the permission of the prince; and the power of Macedonius could be secured only by the death of his rival. The unfortunate Paul was dragged in chains from the sandy deserts of Mesopotamia to the most desolate places of Mount Taurus,¹⁵³ confined in a dark and narrow dungeon, left six days without food, and at length strangled, by the order of Philip, one of the principal ministers of the emperor Constantius.¹⁵⁴ The first blood which stained the new capital was spilt in this ecclesiastical contest; and many persons were slain on both sides, in the furious and obstinate seditions of the people. The commission of enforcing a sentence of banishment against Paul had been entrusted to Hermogenes, the master-general of the cavalry; but the execution of it was fatal to himself. The Catholics rose in the defence of their bishop; the palace of Hermogenes was consumed; the first military officer of the empire was dragged by the heels through the streets of Constantinople, and, after he expired, his lifeless corpse was exposed to their wanton insults.¹⁵⁵ The fate of Hermogenes instructed Philip, the Prætorian prefect, to act with more precaution on a similar occasion. In the most gentle and honourable terms, he required the attendance of Paul in the baths of Zeuxippus, which had a private communication with the palace and the sea. A vessel, which lay ready at the garden-stairs, immediately hoisted sail; and, while the people were still ignorant of the meditated sacrilege, their bishop was already embarked on his voyage to Thessalonica. They soon beheld, with surprise and indignation, the gates of the palace thrown open, and the usurper Macedonius seated by the side of the prefect on a lofty chariot, which was surrounded by troops of guards with drawn swords. The military procession advanced towards the cathedral; the Arians and the Catholics eagerly rushed to occupy that important post; and three thousand one hundred and fifty persons lost their lives in the confusion of the tumult. Macedonius, who was supported by a regular force, obtained a decisive victory; but his reign was disturbed by clamour and sedition; and the causes which appeared the least connected with the subject of dispute were sufficient to nourish and to kindle the flame of civil discord. As the chapel in which the body of the great Constantine had been deposited was in a ruinous condition, the bishops transported those venerable remains into the church of St. Acacius. This prudent and even pious measure was represented as a wicked profanation by the whole party which adhered to the Homoousian doctrine. The factions immediately flew to arms, the consecrated ground was used as their field of battle; and one of the ecclesiastical historians has observed, as a real fact, not as a figure of rhetoric, that the well before the church overflowed with a stream of blood, which filled the porticoes and the adjacent courts. The writer who should impute these tumults solely to a religious principle would betray a very imperfect knowledge of human nature; yet it must be confessed that the motive which misled the sincerity of zeal, and the pretence which disguised the licentiousness of passion, suppressed the remorse which, in another cause, would have succeeded to the rage of the Christians of Constantinople.¹⁵⁶

The cruel and arbitrary disposition of Constantius, which did not always require the provocations of guilt and resistance, was justly exasperated by the tumults of his

capital and the criminal behaviour of a faction, which opposed the authority and religion of their sovereign. The ordinary punishments of death, exile, and confiscation were inflicted with partial rigour; and the Greeks still revere the holy memory of two clerks, a reader and a sub-deacon, who were accused of the murder of Hermogenes, and beheaded at the gates of Constantinople. By an edict of Constantius against the Catholics, which has not been judged worthy of a place in the Theodosian Code, those who refused to communicate with the Arian bishops, and particularly with Macedonius, were deprived of the immunities of ecclesiastics and of the rights of Christians; they were compelled to relinquish the possession of the churches; and were strictly prohibited from holding their assemblies within the walls of the city. The execution of this unjust law, in the provinces of Thrace and Asia Minor, was committed to the zeal of Macedonius; the civil and military powers were directed to obey his commands; and the cruelties exercised by this semi-Arian tyrant in the support of the *Homoiousion*, exceeded the commission, and disgraced the reign, of Constantius. The sacraments of the church were administered to the reluctant victims, who denied the vocation, and abhorred the principles, of Macedonius. The rites of baptism were conferred on women and children, who, for that purpose, had been torn from the arms of their friends and parents; the mouths of the communicants were held open, by a wooden engine, while the consecrated bread was forced down their throat; the breasts of tender virgins were either burnt with red-hot egg-shells or inhumanly compressed between sharp and heavy boards.¹⁵⁷ The Novatians of Constantinople and the adjacent country, by their firm attachment to the Homoousian standard, deserved to be confounded with the Catholics themselves. Macedonius was informed that a large district of Paphlagonia¹⁵⁸ was almost entirely inhabited by those sectaries. He resolved either to convert or to extirpate them; and, as he distrusted, on this occasion, the efficacy of an ecclesiastical mission, he commanded a body of four thousand legionaries to march against the rebels, and to reduce the territory of Mantinium under his spiritual dominion. The Novatian peasants, animated by despair and religious fury, boldly encountered the invaders of their country; and, though many of the Paphlagonians were slain, the Roman legions were vanquished by an irregular multitude, armed only with scythes and axes; and, except a few who escaped by an ignominious flight, four thousand soldiers were left dead on the field of battle. The successor of Constantius has expressed, in a concise but lively manner, some of the theological calamities which afflicted the empire, and more especially the East, in the reign of a prince who was the slave of his own passions and of those of his eunuchs. “Many were imprisoned, and persecuted, and driven into exile. Whole troops of those who were styled heretics were massacred, particularly at Cyzicus, and at Samosata. In Paphlagonia, Bithynia, Galatia, and in many other provinces, towns and villages were laid waste and utterly destroyed.”¹⁵⁹

While the flames of the Arian controversy consumed the vitals of the empire, the African provinces were infested by their peculiar enemies the savage fanatics, who,

under the name of *Circumcellions*, formed the strength and scandal of the Donatist party.¹⁶⁰ The severe execution of the laws of Constantine had excited a spirit of discontent and resistance; the strenuous efforts of his son Constans to restore the unity of the church exasperated the sentiments of mutual hatred which had first occasioned the separation; and the methods of force and corruption employed by the two Imperial commissioners, Paul and Macarius, furnished the schismatics with a specious contrast between the maxims of the apostles and the conduct of their pretended successors.¹⁶¹ The peasants who inhabited the villages of Numidia and Mauritania were a ferocious race, who had been imperfectly reduced under the authority of the Roman laws; who were imperfectly converted to the Christian faith; but who were actuated by a blind and furious enthusiasm in the cause of their Donatist teachers. They indignantly supported the exile of their bishops, the demolition of their churches, and the interruption of their secret assemblies. The violence of the officers of justice, who were usually sustained by a military guard, was sometimes repelled with equal violence; and the blood of some popular ecclesiastics, which had been shed in the quarrel, inflamed their rude followers with an eager desire of revenging the death of these holy martyrs. By their own cruelty and rashness, the ministers of persecution sometimes provoked their fate; and the guilt of an accidental tumult precipitated the criminals into despair and rebellion. Driven from their native villages, the Donatist peasants assembled in formidable gangs on the edge of the Gætulian desert; and readily exchanged the habits of labour for a life of idleness and rapine, which was consecrated by the name of religion and faintly condemned by the doctors of the sect. The leaders of the *Circumcellions* assumed the title of captains of the saints; their principal weapon, as they were indifferently provided with swords and spears, was a huge and weighty club, which they termed an *Israelite*; and the well-known sound of “Praise be to God,” which they used as their cry of war, diffused consternation over the unarmed provinces of Africa. At first their depredations were coloured by the plea of necessity; but they soon exceeded the measure of subsistence, indulged without control their intemperance and avarice, burnt the villages which they had pillaged, and reigned the licentious tyrants of the open country. The occupations of husbandry, and the administration of justice, were interrupted; and, as the *Circumcellions* pretended to restore the primitive equality of mankind and to reform the abuses of civil society, they opened a secure asylum for the slaves and debtors, who flocked in crowds to their holy standard. When they were not resisted, they usually contented themselves with plunder, but the slightest opposition provoked them to acts of violence and murder; and some Catholic priests, who had imprudently signalled their zeal, were tortured by the fanatics with the most refined and wanton barbarity. The spirit of the *Circumcellions* was not always exerted against their defenceless enemies; they engaged, and sometimes defeated, the troops of the province; and in the bloody action of Bagai, they attacked in the open field, but with unsuccessful valour, an advanced guard of the Imperial cavalry. The Donatists who were taken in arms received, and they soon deserved, the same treatment which might have been shewn to the wild beasts of the desert. The captives died, without a murmur, either by the sword, the axe,

or the fire; and the measures of retaliation were multiplied in a rapid proportion, which aggravated the horrors of rebellion, and excluded the hope of mutual forgiveness. In the beginning of the present century, the example of the Circumcellions has been renewed in the persecution, the boldness, the crimes, and the enthusiasm of the Camisards; and, if the fanatics of Languedoc surpassed those of Numidia by their military achievements, the Africans maintained their fierce independence with more resolution and perseverance.[162](#)

Such disorders are the natural effects of religious tyranny; but the rage of the Donatists was inflamed by a frenzy of a very extraordinary kind; and which, if it really prevailed among them in so extravagant a degree, cannot surely be paralleled in any country or in any age. Many of these fanatics were possessed with the horror of life, and the desire of martyrdom; and they deemed it of little moment by what means, or by what hands, they perished, if their conduct was sanctified by the intention of devoting themselves to the glory of the true faith and the hope of eternal happiness.[163](#)

Sometimes they rudely disturbed the festivals and profaned the temples of paganism, with the design of exciting the most zealous of the idolaters to revenge the insulted honour of their gods. They sometimes forced their way into the courts of justice, and compelled the affrighted judge to give orders for their immediate execution. They frequently stopped travellers on the public highways, and obliged them to inflict the stroke of martyrdom, by the promise of a reward, if they consented, and by the threat of instant death, if they refused to grant so very singular a favour. When they were disappointed of every other resource, they announced the day on which, in the presence of their friends and brethren, they should cast themselves headlong from some lofty rock; and many precipices were shewn, which had acquired fame by the number of religious suicides. In the actions of these desperate enthusiasts, who were admired by one party as the martyrs of God, and abhorred by the other as the victims of Satan, an impartial philosopher may discover the influence and the last abuse of that inflexible spirit, which was originally derived from the character and principles of the Jewish nation.

The simple narrative of the intestine divisions, which distracted the peace, and dishonoured the triumph, of the church, will confirm the remark of a pagan historian, and justify the complaint of a venerable bishop. The experience of Ammianus had convinced him that the enmity of the Christians towards each other surpassed the fury of savage beasts against man;[164](#) and Gregory Nazianzen most pathetically laments that the kingdom of heaven was converted, by discord, into the image of chaos, of a nocturnal tempest, and of hell itself.[165](#) The fierce and partial writers of the times, ascribing *all* virtue to themselves, and imputing *all* guilt to their adversaries, have painted the battle of the angels and dæmons. Our calmer reason will reject such pure and perfect monsters of vice or sanctity, and will impute an equal, or at least an indiscriminate, measure of good and evil to the hostile sectaries, who assumed and

bestowed the appellations of orthodox and heretics. They had been educated in the same religion, and the same civil society. Their hopes and fears in the present, or in a future, life were balanced in the same proportion. On either side, the error might be innocent, the faith sincere, the practice meritorious or corrupt. Their passions were excited by similar objects; and they might alternately abuse the favour of the court or of the people. The metaphysical opinions of the Athanasians and the Arians could not influence their moral character; and they were alike actuated by the intolerant spirit which has been extracted from the pure and simple maxims of the gospel.

A modern writer, who, with a just confidence, has prefixed to his own history the honourable epithets of political and philosophical,[166](#) accuses the timid prudence of Montesquieu for neglecting to enumerate, among the causes of the decline of the empire, a law of Constantine, by which the exercise of the pagan worship was absolutely suppressed, and a considerable part of his subjects was left destitute of priests, of temples, and of any public religion. The zeal of the philosophic historian for the rights of mankind has induced him to acquiesce in the ambiguous testimony of those ecclesiastics, who have too lightly ascribed to their favourite hero the *merit* of a general persecution.[167](#) Instead of alleging this imaginary law, which would have blazed in the front of the Imperial codes, we may safely appeal to the original epistle which Constantine addressed to the followers of the ancient religion; at a time when he no longer disguised his conversion nor dreaded the rivals of his throne. He invites and exhorts, in the most pressing terms, the subjects of the Roman empire to imitate the example of their master; but he declares that those who still refuse to open their eyes to the celestial light may freely enjoy their temples and their fancied gods. A report that the ceremonies of paganism were suppressed is formally contradicted by the emperor himself, who wisely assigns, as the principle of his moderation, the invincible force of habit, of prejudice, and of superstition.[168](#) Without violating the sanctity of his promise, without alarming the fears of the pagans, the artful monarch advanced, by slow and cautious steps, to undermine the irregular and decayed fabric of Polytheism. The partial acts of severity which he occasionally exercised, though they were secretly prompted by a Christian zeal, were coloured by the fairest pretences of justice and the public good; and, while Constantine designed to ruin the foundations, he seemed to reform the abuses, of the ancient religion. After the example of the wisest of his predecessors, he condemned, under the most rigorous penalties, the occult and impious arts of divination; which excited the vain hopes, and sometimes the criminal attempts, of those who were discontented with their present condition. An ignominious silence was imposed on the oracles, which had been publicly convicted of fraud and falsehood; the effeminate priests of the Nile were abolished; and Constantine discharged the duties of a Roman censor, when he gave orders for the demolition of several temples of Phœnicia, in which every mode of prostitution was devoutly practised in the face of day, and to the honour of Venus.[169](#) The Imperial city of Constantinople was, in some measure, raised at the expense, and was adorned with the spoils, of the opulent temples of Greece and Asia; the sacred property was confiscated;

the statues of gods and heroes were transported, with rude familiarity, among a people who considered them as objects, not of adoration, but of curiosity: the gold and silver were restored to circulation; and the magistrates, the bishops, and the eunuchs improved the fortunate occasion of gratifying at once their zeal, their avarice, and their resentment. But these depredations were confined to a small part of the Roman world; and the provinces had been long since accustomed to endure the same sacrilegious rapine, from the tyranny of princes and proconsuls, who could not be suspected of any design to subvert the established religion.[170](#)

The sons of Constantine trod in the footsteps of their father, with more zeal and with less discretion. The pretences of rapine and oppression were insensibly multiplied;[171](#) every indulgence was shewn to the illegal behaviour of the Christians; every doubt was explained to the disadvantage of paganism; and the demolition of the temples was celebrated as one of the auspicious events of the reign of Constans and Constantius.[172](#) The name of Constantius is prefixed to a concise law, which might have superseded the necessity of any future prohibitions. “It is our pleasure that in all places, and in all cities, the temples be immediately shut, and carefully guarded, that none may have the power of offending. It is likewise our pleasure that all our subjects should abstain from sacrifices. If any one should be guilty of such an act, let him feel the sword of vengeance, and, after his execution, let his property be confiscated to the public use. We denounce the same penalties against the governors of the provinces, if they neglect to punish the criminals.”[173](#) But there is the strongest reason to believe that this formidable edict was either composed without being published, or was published without being executed. The evidence of facts, and the monuments which are still extant of brass and marble, continue to prove the public exercise of the pagan worship during the whole reign of the sons of Constantine. In the East, as well as in the West, in cities, as well as in the country, a great number of temples were respected, or at least were spared; and the devout multitude still enjoyed the luxury of sacrifices, of festivals, and of processions, by the permission, or by the connivance, of the civil government. About four years after the supposed date of his bloody edict, Constantius visited the temples of Rome; and the decency of his behaviour is recommended by a pagan orator as an example worthy of the imitation of succeeding princes. “That emperor,” says Symmachus, “suffered the privileges of the vestal virgins to remain inviolate; he bestowed the sacerdotal dignities on the nobles of Rome, granted the customary allowance to defray the expenses of the public rites and sacrifices: and, though he had embraced a different religion, he never attempted to deprive the empire of the sacred worship of antiquity.”[174](#) The senate still presumed to consecrate, by solemn decrees, the *divine* memory of their sovereigns; and Constantine himself was associated, after his death, to those gods whom he had renounced and insulted during his life. The title, the ensigns, the prerogatives of sovereign pontiff, which had been instituted by Numa, and assumed by Augustus, were accepted, without hesitation, by seven Christian emperors; who were invested with a more absolute authority over the

religion which they had deserted than over that which they professed.[175](#)

The divisions of Christianity suspended the ruin of *paganism*;[176](#) and the holy war against the infidels was less vigorously prosecuted by princes and bishops who were more immediately alarmed by the guilt and danger of domestic rebellion. The extirpation of *idolatry*[177](#) might have been justified by the established principles of intolerance: but the hostile sects, which alternately reigned in the Imperial court, were mutually apprehensive of alienating, and perhaps exasperating, the minds of a powerful, though declining, faction. Every motive of authority and fashion, of interest and reason, now militated on the side of Christianity; but two or three generations elapsed before their victorious influence was universally felt. The religion which had so long and so lately been established in the Roman empire was still revered by a numerous people, less attached indeed to speculative opinion than to ancient custom. The honours of the state and army were indifferently bestowed on all the subjects of Constantine and Constantius; and a considerable portion of knowledge and wealth and valour was still engaged in the service of Polytheism. The superstition of the senator and of the peasant, of the poet and the philosopher, was derived from very different causes, but they met with equal devotion in the temples of the gods. Their zeal was insensibly provoked by the insulting triumph of a proscribed sect; and their hopes were revived by the well-grounded confidence that the presumptive heir of the empire, a young and valiant hero, who had delivered Gaul from the arms of the Barbarians, had secretly embraced the religion of his ancestors.

APPENDIX

ADDITIONAL NOTES BY THE EDITOR

1. THE RESCRIPT OF ANTONINUS CONCERNING THE CHRISTIANS — (P. 30)

The authenticity of this edict has not yet been finally determined. It has come down to us in three forms: (1) in Eusebius, H.E. iv. 13, (2) in Rufinus, H.E. iv. 13, which is merely a free rendering of the Greek text in Eusebius, and does not rest on a Latin original, (3) in a fourteenth century MS. of Justin. Harnack, who has thoroughly discussed the whole question (in his *Texte u. Untersuch.* xiii. 4), has shown satisfactorily that the version in Justin is not independent, but is taken from Eusebius with certain “tendenziös” changes. The most striking difference between the Justin version and the Eusebian (Rufinus) is in the title; in the former the edict is attributed to Titus, in the latter to Marcus. But the context in Eusebius shows that he regarded the edict as issuing from Titus; and so it would seem, as Harnack suggests, that he found

the incorrect title in his source and did not venture to omit or alter it, while he assumed it to be wrong. But in any case, the title is a clumsy forgery, for Marcus is described as Ἀρ••νιος (he did not possess the true title Ἀρ••ενιακ•ς so early as 161), and the name of Lucius Verus his colleague does not appear. In regard to the authenticity of the rescript as Eusebius gives it, Harnack points out that he had a Greek, not a Latin (as in other cases, iv. 9; vii. 13; viii. 17), copy before him, and that this cannot have been the original. The comparison between the behaviour of Christians and pagans to the advantage of the former is clearly a Christian interpolation. Harnack attempts to restore the original Greek form of the rescript, in whose authenticity he believes (though he owns that certainty cannot be attained). The rescript was an answer to a petition of the κοιν•ν of Asia, and Harnack thinks that the copy used by Eusebius was preserved (and interpolated) in Christian circles.

The difference between the rescripts of Hadrian and Antoninus was that the former protected the Christians against calumnious accusation; the latter against the accusation of atheism in general.

2. EXILE OF MARCELLUS AND EUSEBIUS, BISHOPS OF ROME — (P. 77)

Most interesting traces of the early Bishops of Rome have been found in the Catacombs. We owe them to the activity of Bishop Damasus in subterranean Rome. The subject can be studied in English, in the “Roman Sotteranea” of Messrs. Northcote and Brownlow (2 vols.), an excellent compilation from the researches of the Cavaliere di Rossi, the greatest authority of this century on Christian Rome.

Marcellus and Marcellinus *were* “different persons.” Marcellinus is mentioned in the inscription of the Deacon Severus found in the Catacomb of St. Callixtus (*op. cit.* i. 350). Both Marcellus and Marcellinus were buried not in this cemetery but in that of St. Priscilla (*ib.* 304).

Eusebius, the successor of Marcellus, was like him severe to the “Lapsed,” and like him banished. This is shown by the following inscription, found in the Catacomb of St. Callixtus, — the fellow of that relating to Marcellus quoted in Gibbon’s note (p. 77).

Heraclius vetuit lapsos peccata dolere;
Eusebius miseros docuit sua crimina flere.
scinditur in partes populus gliscente furore;
seditio caedes bellum discordia lites;
extemplo pariter pulsi feritate tyranni,
integra cum rector servaret foedera pacis,
pertulit exilium domino sub iudice laetus,
litore Trinacrio mundum vitamque reliquit.

The author of these epitaphs had a limited vocabulary. But they throw light on the divisions in the Roman Church at the time, and on the interference of Maxentius, in the interests of order, — which won for him in later times the name of a persecutor.

3. PERSECUTIONS OF THE CHRISTIANS IN THE FIRST AND SECOND CENTURIES, A.D. — (C. XVI.)

A considerable literature has sprung up in recent years regarding the attitude of the Roman government to Christianity from Nero to Marcus Aurelius (Th. Keim, *Rom und das Christenthum*, ed. Ziegler, 1881; K. J. Neumann, *der römische Staat und die allgemeine Kirche*, vol. i. 1890; Th. Mommsen, *der Religionsfrevel nach römischem Recht*, in Sybel's *Hist. Zeitschrift*, 1890; Professor Ramsay's *The Church in the Roman Empire*, 1893; may be mentioned). A thorough and instructive discussion of the whole question will be found in Mr. E. G. Hardy's *Christianity and the Roman Government*, 1894. A summary of some of his results will illustrate the sixteenth chapter of Gibbon.

From a review of the practical policy of the Roman state towards foreign cults Mr. Hardy concludes that they were tolerated in so far as they did not (1) injure the national religion, (2) encourage gross immoralities, (3) seem likely to lead to political disaffection (p. 35-6). Various considerations led to the toleration of Judaism, and Mr. Hardy points out that its toleration would by no means logically lead to that of Christianity, a religion "claiming to overstep all limits of nationality" (p. 37). The contact between the state and the Christians at Rome in 64 a.d., on the occasion of the conflagration, was accidental. The charge of incendiarism broke down at the trials, but it was converted into a charge of *odium generis humani* (a brief summary of the antisocialism and other characteristics of Christianity). It was for this that they were punished; and Suetonius does not bring their punishment into connection with the fire, which was the occasion, not the ground, of their condemnation (Ner. 16: *adfecti suppliciis Christiani genus hominum superstitionis nouæ ac maleficæ*). Mr. Hardy seems to have quite made out his point that in the Neronian persecution the Christians were condemned as Christians, not on any special charge.

This charge *odium generis humani*, for the use of which the Neronian episode set a precedent, did not come under *maiestas* of the formula of any regular *quæstio*. According to Mommsen, whose view in this respect Mr. Hardy accepts, it was a matter for police regulation, to be dealt with by virtue of the *coercitio* vested in magistrates. In Rome, such cases would come under the jurisdiction of the prefect of the city (Tac. Ann. vi. 11); and the provincial governor was empowered to deal with them by his instructions to maintain the peace and tranquillity of his province, "which he will find no difficulty in effecting, if he be careful *ut malis hominibus provincia careat cosque*

conquirat” (e.g., *sacrilegi, latrones, &c.*). Mr. Ramsay holds that a new principle was introduced into the State policy towards Christians between 65 and 95 a.d., namely that whereas under Nero they were attacked by charges of special and definite crimes (incendiarism), under the Flavians Christianity itself became a punishable offence. But if Mr. Hardy is right as to the Neronian persecution, this change in attitude would disappear. “As soon as the Christians were once convicted of an *odium generis humani*, they were potentially outlaws and brigands and could be treated by the police administration as such, whether in Rome or the provinces” (p. 82). That the distinction between Judaism and Christianity had been clearly recognised in the East as early as 70 a.d., is proved by the speech of Titus in Sulpicius Severus, ii. 30 (taken from a lost book of Tacitus, as we may with some confidence assume); one of the advantages of the destruction of Jerusalem will be, that prince is reported to say, the extirpation of the Jewish and the Christian religion. We need not infer, as Mr. Hardy points out, that Titus had special designs against the Christians: “the persecution of the Christians was a standing one like that of brigands” (Mommson).

“With Roman citizens,” however, “of standing and importance a more definite charge was necessary, and this we find from Dio Cassius was primarily ἡθεοτης, i.e., not so much *sacrilegium* as a refusal to worship the national gods of the state” (p. 88). This was applied in the case of Flavius Clemens, cousin of Domitian, who was executed, and his wife Domitilla, who was banished, 95 a.d. The reign of Domitian introduced no new principle, but a very convenient test — e.g., the observance of the imperial cult — for discovering whether a person suspected of the crime of Christianity (a crime, that is, in the eyes of the police administration, not of the law) was justly suspected.

Nor does the Bithynian persecution introduce (according to Mr. Hardy) any new principle. The letter of Trajan to Pliny is described (p. 117) as “the decision of a practical statesman who declined on the one hand to be led into severe repressive measures against a body which was only remotely and theoretically dangerous to the state, while he, on the other, refused to give up on humanitarian grounds the claim of the state to absolute obedience on the part of all its subjects.” It is in no sense an edict of proscription or of toleration, but it is “an index of the imperial policy” (p. 122).¹ As to Hadrian’s rescript to Minucius Fundanus (whose genuineness is by no means above suspicion), Mr. Hardy considers (143) that it “was intended, as indeed it naturally would be, for the special circumstances of Asia: it does not in any way, as I interpret it, rescind the decision of Trajan that the *nomen* was a crime, but to avoid any miscarriage of justice . . . it lays down more stringent conditions for the proof of punishable crime.” Under M. Antoninus and his successor things remained theoretically the same. In the reign of the former there were some persecutions, — Ptolemæus and Lucius were executed at Rome (Justin Apol. ii. 2) and (according to M. Waddington’s date) Polycarp at Smyrna. The remarkable point in the persecutions of Aurelius is that they take place in the western as well as the eastern provinces, and not so much their extent or the number of victims (p. 147). In general tenor these

conclusions agree with the view of Mommsen and Ramsay that there were no *laws* against the Christians. I cannot see that this has been made out, for the second century at least, though it may be true of the Flavian period. It does not appear that the explicit statement of Sulpicius Severus in ii. 29, *post etiam datis legibus religio vetabatur* (referring to the whole period after Nero), is definitely disproved. Some of Mr. W. T. Arnold's criticisms (Eng. Hist. Review, 1895, p. 546 *sqq.*) are very much to the point.

Gibbon's general view of the slight extent of the early persecutions, resting as it does on the strong testimony of Origen (c. Cels. 3, 8), is commonly admitted. Compare Hardy, p. 131: "There seems good reason to suppose that this state of things — a general indulgence and toleration on the part of the emperors, occasionally interrupted by violent manifestations of popular feeling, which provincial governors had either not the will or not the strength to resist — continued throughout the second century: that the Christians were still punished for the name, but that the initiative in the way of searching them out was not taken by the governors, while accusers had to come forward in their own name; and finally, that the number of victims was on the whole a comparatively small one." It must at the same time be remembered that it was the policy of the Apologists (on whose evidence our knowledge is largely based) "to accentuate and in a measure to exaggerate the indulgent attitude of the government, especially in the period preceding their own, or at any rate to omit anything unfavourable to their own cause" (p. 132).

Two important documents give a notion of the proceedings adopted in the trials of Christians in the second century: (1) the Acts of Martyrs of Scili in Numidia, in 181 a. d. (ed. Usener, 1881, and Robinson in Texts and Studies, vol. i.), and (2) the Acts of Apollonius, tried at Rome in the first years of Commodus (Armenian version of a lost Greek original, discovered by Mr. Conybeare, who has given a translation in his Acts and Monuments of Early Christianity). The credit of these documents as trustworthy rests chiefly on the circumstance that miracles are conspicuously absent. Mr. Hardy gives an account of them in an Appendix. Cp. Mommsen, *Der Process des Christen Apollonios*, in the *Sitzungsberichte* of the Berlin Academy, xxvii. 1894.

B. Aubé has written several books dealing with the subject of the persecutions of the Christians: *Les persecutions de l'église jusqu'à la fin des Antonins*; *Les Chrétiens dans l'empire romain*; *L'église et l'état dans le 2^{em} moitié du 3^{me} siècle*.

On Nero's persecution also see C. F. Arnold, *Die neronische Christenverfolgung*, and an article by Hilgenfeld in his *Zeitschrift*, vol. xxxiii. p. 216 *sqq.*

On church and state from Decius to Diocletian: Görres, *Jahrb. für protest. Theologie*, xvi. 1890, p. 454 *sqq.*

On Diocletian's persecution: Mason's *The Persecution of D.*, 1876; Hunziker, *Zur Reg. u. Christenverfolgung des K. Diokletian und s. Nachfolger*, in Büdinger's *Untersuch. zur römischen Kaisergeschichte*; papers of F. Görres in Hilgenfeld's *Zeitsch. f. wiss. Theol.*, xxxiii. p. 314 *sqq.* (cp. 469 *sqq.*). I. Belser, *Zur Diokl. Christenverfolgung*, 1891. Cp. also Schwarze, *Unters. über die äussere Entwicklung der afrik. Kirche*, 1892.

On church and state in fourth century: A. de Broglie, *L'église et l'empire romain au quatrième siècle*. Some other works have been mentioned in the footnotes.

An important memoir has been published as a supplement to the *Acta Sincera* of Ruinart by E. Le Blant: *Les actes des martyrs*, in *Mém. of the National Institute of France* (*Acad. d. Belles lettres*, t. xxx., 1883, p. 57-347). Le Blant is too anxious to rescue apocryphal lives, and overdoes his criticism of technical terms of Roman procedure. But he has done good work here (as well as in his essay, *Sur les bases juridiques des poursuites dirigées contre les martyrs*, in *Comptes rendus of Académie des Inscriptions*, N.S., ii. 1866), and any one studying martyrological *Acta* will do ill to neglect this memoir.

4. AUGUSTEUM AND FORUM OF CONSTANTINE — (P. 104-106) 1

The chief thoroughfare in the new city of Constantine led from the Golden Gate (in the wall of Constantine, not to be confused with the later Golden Gate in the wall of Theodosius ii.) eastward (passing through the Forum Bovis, the Forum Amastrianorum, and the Forum Tauri) to the Golden Milestone in the Augusteum. Before it reached the Augusteum it passed through the Forum of Constantine in which stood the Pillar of Constantine (and the Churches of S. Constantine and S. Mary of the Forum). In the Augusteum (which we might translate Place Impériale) it came to an end, in front of the Senate house (Σεν•τον) and west wall of the Palace. The Augusteum was bounded on the north by St. Sophia; on the east, by Senate house and palace buildings; on the south, by the Palace (the great entrance gate, known as the Chalkê, was here) and the north side of the Hippodrome, beside which were the Baths of Zeuxippus. There was no public way between the east side of the Hippodrome and the Palace. According to Labarte, the Augusteum was enclosed by a wall, with gates, on the west side, running from south-west of St. Sophia to a point between the Palace and the Hippodrome; so that the entrance to the Hippodrome and the Zeuxippus would have been outside the Augusteum. The street connecting the Augusteum with the Forum of Constantine was called Middle St., — Μ•ση. The Chalkoprateia, and the Church of the Theotokos (Mother of God) in Chalkoprateia, were not in the Augusteum where Labarte places them, but west of St. Sophia, to the right of the Mese (as Mordtmann has shown, *Esquisse Top.* § 6, p. 4, and also Bieliaiev, cp. *Byz. Zeitsch.* ii. p. 138; but probably close to the Mese, cp. Krasnoseljev, in the *Annual*

Hist.-Phil. Publication of the Odessa University, iv. (Byz. section, 2) p. 309 *sqq.*). A plan of the Augusteum and adjoining buildings will appear in vol. vii., to illustrate the Nika riots under Justinian.

The chief guides to the topography of Constantinople used by Gibbon were Ducange's folio, Constantinopolis Christiana, and the little 32mo of Petrus Gyllius, de Constantinopoleos topographia, libri iv., 1632; both still of great value. The prolix work in 2 vols. of Skarlatos D. Byzantios (Ἡ Κωνσταντινο•πολις, Athens, 1851) is unscientific and must be used with great caution. The reconstruction of the Imperial Palace, involving a theory of the topography of the Augusteum and adjacent buildings, was undertaken by Jules Labarte (Le Palais impérial de Constantinople et ses abords, 1861) whose scholarly book marked a new departure and is of permanent value. The diligent Greek antiquarian A. G. Paspatis succeeded in establishing several valuable identifications in his Βυζαντενάϊ Μελ•ται (Constantinople, 1877), but his τὸ Βυζαντινὸν Ἄν•κτορα (1885; in English: The Great Palace of Constantinople, translated by Mr. Metcalfe, 1893) is a retrorgression compared with Labarte (see above, vol. i. Introd. p. lxxviii.-lxxix.). The problems of the Palace have been critically and thoroughly dealt with by D. Th. Bieliaiev in his Obzor glavnykh chastei bolshago dvortsa Vizantiiskikh tsarei (Part 1 of Byzantina), 1891, where it is shown that we must retain the main line of Labarte's reconstruction, but that in most of the details we must be content for the present to confess our ignorance.

In 1892 Dr. Mordtmann's Esquisse topographique de Constantinople appeared. It is not well arranged, but it is an important contribution to the subject; and his map has been an indispensable guide in the preparation of the plan in this volume. He clearly recognises the true position of the Hebdomon on the Propontis; and I may observe that I had already pointed out (in 1889) that the received view which placed it near Blachernae must be wrong (Later Roman Empire, vol. ii. p. 556). The most recent work on Constantinople is: Constantinople, 2 vols., by E. A. Grosvenor, Professor of History at Robert College, Constantinople.

It is impossible to notice all the smaller contributions to the subject, but I must specially refer to some valuable articles of the late G. S. Destunis in the Zhurnal Min. Narodnago Prosviescheniia in 1882-1883.

5. THE NEW MONARCHY — (C. XVII.)

All the main points in the new absolute monarchy, founded by Diocletian and organised by Constantine, have been brought out in the brilliant description of Gibbon (ch. xvii.): the new organisation of the provinces; the hierarchical administration; the separation of civil from military functions; the abolition of the distinction between Italy and the Provinces; the loss of her unique position by Rome, which is closely

connected with the clearly pronounced tendency of the Empire to part into an eastern and a western half. Anticipations of some of these results we have seen in the history of the third century. The formal oligarchy of Emperor and Senate, in which the Senate had been gradually becoming more and more a silent partner, formally ceases; the distinction between senatorial and imperial provinces vanishes, there are no senatorial provinces; and the *aerarium*, which had many years before lost its importance, is no longer a state treasury but merely a municipal chest. Externally the change from the Principate to undisguised monarchy is indicated by the assumption of oriental state by the emperor (here Aurelian had pointed the way). The thorough-going reformation of the military system, which was not fully understood till Mommsen's recent investigation, demands a note to itself; and the new division of provinces another. To distinguish between the work of Diocletian and that of Constantine is in many cases impossible, and Gibbon did not attempt it; it will be seen however in the two following appendices that some distinctions can be established. To Diocletian was due the separation of the civil and military authority (Lactant., de Mort. P., 7; Euseb., de Mart. Pal., 13). The dioceses and prefectures are an instructive, and I think we may say, typical instance of the relation between the work of the two great emperors. We know beyond question that the dioceses were instituted by Diocletian (Lact., *ib.*), but it has been disputed whether the prefectures were due to him or (so Zosimus) to Constantine. The latter view seems the more probable; but the quadruple division of the Empire between Diocletian, Maximian and the two Cæsars (implying four prefects; there is distinct evidence that the Cæsar Constantius had a prefect) was the suggestion and anticipation of the three (sometimes four; after 395 a.d. four) prefectures. Constantine abandoned the artificial, adoptive system of Diocletian for a dynastic principle, but he retained the geographical side of that system and stereotyped it in the prefectures.

A few words may be said here on (a) the new ceremonial, (b) the imperial titles, and (c) the consistorium.

(a) For the adoration see Godefroy on Cod. Theod., vol. ii. p. 83. Those who approached the Emperor bent the knee, and drew the edge of his purple robe to their lips. The Emperor wore a robe of silk, embroidered with gold, and adorned with gems (introduced by Aurelian); or the purple cloak of the military commander (first worn in Rome by Septimius Severus, and since then an imperial *insigne*). He also wore the diadem (perhaps first worn by Aurelian, see Victor, Epit. 35, 5; but the novelty is also ascribed to Diocletian, and to Constantine). Constantine introduced the gold band round the head, which was called *nimbus* (cp. Eckhel, Doct. Num., 8, 79). The emperor is officially called *deus*, and the cult of the imperial majesty, which at an early time had made its way in the camp, is further developed; and, when a new Emperor is proclaimed, his bust crowned with laurel is carried round in procession in the provinces. See Schiller, ii. p. 33, 34.

(b) The style of imperial titles which was usual in the latter part of the Principate was

maintained until the time of Gratian. It was Imperator Cæsar pius (felix or) invictus Augustus pontifex Maximus — icus [Sarmaticus, &c.] maximus trib. pot. [ii. &c.] consul [ii. &c.] imperator [ii. &c.] pater patriae proconsul. [The order of imperator and consul is variable. The only change made was the substitution of maximus victor ac triumphator for invictus. Gratian dropped the title pontifex maximus, and the other titles were at the same time abandoned in favour of a shorter formula,

Dominus noster {pius felix semper Augustus invictissimus princeps, &c.

The chief reminiscence of the republican constitution of the principate, so carefully contrived by Augustus, was the practice of numbering the years of a reign by the formula *trib. pot.*, which appears as late as Theodosius ii. (on coins, Eckhel, 8, 182). Dominus, which (like deus) Aurelian had only used in the dative case, is from Constantine forward the ordinary official title of the Emperor (equivalent of “His Majesty”). Schiller, ii. 31-33.

(c) The consilium, which had been organised by Hadrian, is superseded in the new monarchy by a council called *consistorium* (the name first occurs in an inscription of 353 a.d., C.I.L. 6, 1739), which assembled at fixed times in the Emperor’s presence. The chief of the Hadrianic consilium was the prætorian prefect; but, as that officer has been diverted to new administrative functions and as the provincial administration and palace offices are kept carefully apart, his position in the council is inherited by the quæstor sacri pal. who presides over the consistorium. It is however unlikely that the quæstor had this position at first under Diocletian and Constantine; for he does not belong to the class of illustres till after Valentinian I. It has been conjectured (by Mommsen) that the president of the council was at first entitled *præpositus* and afterwards developed into the quæstor, and that he had a deputy, the *vicarius a sacris consiliis*, who developed into the *magister officiorum* (Schiller, ii. 66). The members of the council (entitled at first *a consiliis sacris*, afterwards *comites consistoriani*) were divided into two classes with a difference of stipend: *ducenarii* (200,000 sesterces), *sexagenarii* (60,000 sesterces), and mainly consisted of jurists. The functions of the council were properly confined to judicature, but they also assisted the Emperor in legislation. The two finance ministers belonged to the council, and in later times prætorian prefects and masters of soldiers were sometimes invited by the Emperor, but did not belong to the consistory ex officio. See on the subject, E. Cuq, Le conseil des empereurs d’Auguste à Dioclétien.

6. DIOCESSES AND PROVINCES — (P. 126 sqq.)

Diocletian made considerable modifications in the provincial divisions of the Empire, and distributed all the provinces under twelve large Dioceses. Three changes in his diocesan arrangement were made in the course of the fourth century, and by 400 a.d.

we find thirteen Dioceses. (a) Egypt, which was at first part of the Diocese of the East, was promoted to be a separate Diocese towards the end of the fourth century. (b) *Diœcesis Moesiarum* was broken up into *Diœcesis Daciae* and *Diœcesis Macedoniae*. (c) On the other hand, *Diœcesis Galliarum* and *Diœcesis Viennensis* were combined to form a single Diocese of Gaul. In the case of this change we find an interesting example of the survival of nomenclatures which had ceased to be appropriate. The south of Gaul was at first divided into five provinces (*Novempopuli*, *Aquitania*, *Narbonensis*, *Viennensis*, *Alpes Maritimae*). But when these became seven by the subdivision of *Aquitania* and *Narbonensis* the Diocese (*Viennensis*) still continued to be known as *Quinque Provinciae* as well as by the amended title *Septem Provinciae*. But this was not all. When Northern Gaul, the original *Diœcesis Galliarum*, was added to the sphere of the governor of the *Diœcesis Viennensis*, the whole united Diocese was known not only as the Diocese of the Gauls but as the *Septem Provinciae*; while the old name *Quinque Provinciae* was appropriated to the seven southern provinces, which, though they were no longer a separate Diocese, preserved a fragment of their former integrity by having financial officers (*rationales*) to themselves.

(1) A record of the new organisation as it existed in 297 a.d. has been preserved in the List of Verona (*Laterculus Veronensis*), published with a valuable commentary by Mommsen in the *Abhandl.* of the Berlin Acad., 1862, p. 489 *sqq.*, and reprinted by Seeck in his edition of the *Notitia Dignitatum*.¹ (2) Our next list is (incomplete) in the *Breviarium* of Festus (above, vol. i. App. 1), dating from 369 a.d., just before the foundation of the new Britannic province *Valentia*. (3) This defective list is supplemented by another, dating from much the same time, of the *eastern* provinces of the Empire (dioceses of *Illyricum*, *Thrace*, *Pontus*, *Asia*, *East*, *Egypt*), which is preserved in the *Laterculus* of Polemius Silvius, drawn up in 449 a.d. The list of Polemius with a complete critical apparatus is edited by Mommsen in *Chron. Minora*, i. p. 511-551 (also printed in Seeck's *Notit. Dign.*). Mommsen has shown that Polemius is up to date in regard to the western provinces, but that for the eastern he practically reproduces a list dating from about the middle of the fourth century, with one or two blunders, and only adding the new provinces of *Arcadia* and *Honorias*, which bearing the names of the sons of Theodosius were more likely than other new provinces to be known of in the west. (4) A list of the Gallic provinces in Ammianus (writing between 383 and 390 a.d.), xv. 11, 7 *sqq.*, who clearly used an official *laterculus*. Mommsen, *Chron. Min.* i. p. 552 *sqq.* Ammianus also enumerates the provinces of *Egypt*, xxii. 16, 1. (5) *Notitia Galliarum*, between 190 and 413 a.d., edited by Mommsen, *ib.*, 552-612; printed in Seeck, *op. cit.*; the provinces are the same as in the *Not. Dign.* (6) *Notitia Dignitatum*: first years of the fifth century. Panciroli's commentary, used by Gibbon, has been completely superseded by that of Böcking (2 vols., 1839-53), which is absolutely indispensable to the student; but Böcking's text has been superseded by that of O. Seeck, 1876. For a good account of work and history of the Codex, with its curious pictures, see Hodgkin, *Italy and her Invaders*, i. 594 *sqq.* For date cp. above, p. 112, n. 73. From the fact that the twentieth legion does

not appear in the Not., it has been argued that the date is a.d. 402 — at the moment when this legion was recalled from Britain and had not yet been enrolled among the Italian forces (Hodgkin, *ib.* p. 717). (7) The Laterculus of Polemius Silvius: for the western provinces, a.d. 449, see above. I have arranged the data of these successive documents in parallel columns.

THE HISTORY OF THE DECLINE AND FALL OF THE ROMAN EMPIRE

CHAPTER XXII

Julian is declared Emperor by the Legions of Gaul — His March and Success — The Death of Constantius — Civil Administration of Julian

While the Romans languished under the ignominious tyranny of eunuchs and bishops, the praises of Julian were repeated with transport in every part of the empire, except in the palace of Constantius. The Barbarians of Germany had felt, and still dreaded, the arms of the young Cæsar; his soldiers were the companions of his victory; the grateful provincials enjoyed the blessings of his reign; but the favourites who had opposed his elevation were offended by his virtues; and they justly considered the friend of the people as the enemy of the court. As long as the fame of Julian was doubtful, the buffoons of the palace, who were skilled in the language of satire, tried the efficacy of those arts which they had so often practised with success. They easily discovered that his simplicity was not exempt from affectation: the ridiculous epithets of an hairy savage, of an ape invested with the purple, were applied to the dress and person of the philosophic warrior; and his modest despatches were stigmatised as the vain and elaborate fictions of a loquacious Greek, a speculative soldier, who had studied the art of war amidst the groves of the academy.¹ The voice of malicious folly was at length silenced by the shouts of victory; the conqueror of the Franks and Alemanni could no longer be painted as an object of contempt; and the monarch himself was meanly ambitious of stealing from his lieutenant the honourable reward of his labours. In the letters crowned with laurel, which, according to ancient custom, were addressed to the provinces, the name of Julian was omitted. “Constantius had made his dispositions in person; *he* had signalised his valour in the foremost ranks; *his* military conduct had secured the victory; and the captive king of the Barbarians was presented to *him* on the field of battle,” from which he was at that time distant about forty days’ journey.² So extravagant a fable was incapable, however, of deceiving the public credulity, or even of satisfying the pride of the emperor himself. Secretly conscious that the applause and favour of the Romans accompanied the rising fortunes of Julian, his discontented mind was prepared to receive the subtle poison of those artful sycophants who coloured their mischievous designs with the fairest appearances of truth and candour.³ Instead of depreciating the merits of Julian, they acknowledged, and even exaggerated, his popular fame, superior talents, and important services. But they darkly insinuated that the virtues of the Cæsar might instantly be converted into the most dangerous crimes, if the inconstant multitude should prefer their inclinations to their duty; or if the

general of a victorious army should be tempted from his allegiance by the hopes of revenge and independent greatness. The personal fears of Constantius were interpreted by his council as a laudable anxiety for the public safety; whilst in private, and perhaps in his own breast, he disguised, under the less odious appellation of fear, the sentiments of hatred and envy, which he had secretly conceived for the inimitable virtues of Julian.

The apparent tranquillity of Gaul and the imminent danger of the Eastern provinces offered a specious pretence for the design which was artfully concerted by the Imperial ministers. They resolved to disarm the Cæsar; to recall those faithful troops who guarded his person and dignity; and to employ in a distant war against the Persian monarch the hardy veterans who had vanquished, on the banks of the Rhine, the fiercest nations of Germany. While Julian used the laborious hours of his winter quarters at Paris in the administration of power, which, in his hands, was the exercise of virtue, he was surprised by the hasty arrival of a tribune and a notary, with positive orders from the emperor, which *they* were directed to execute, and *he* was commanded not to oppose. Constantius signified his pleasure, that four entire legions, the Celtæ, and Petulants, the Heruli, and the Batavians,⁴ should be separated from the standard of Julian, under which they had acquired their fame and discipline; that in each of the remaining bands three hundred of the bravest youths should be selected;⁵ and that this numerous detachment, the strength of the Gallic army, should instantly begin their march, and exert their utmost diligence to arrive, before the opening of the campaign, on the frontiers of Persia.⁶ The Cæsar foresaw, and lamented, the consequences of this fatal mandate. Most of the auxiliaries, who engaged their voluntary service, had stipulated that they should never be obliged to pass the Alps. The public faith of Rome and the personal honour of Julian had been pledged for the observance of this condition. Such an act of treachery and oppression would destroy the confidence, and excite the resentment, of the independent warriors of Germany, who considered truth as the noblest of their virtues, and freedom as the most valuable of their possessions. The legionaries, who enjoyed the title and privileges of Romans, were enlisted for the general defence of the republic; but those mercenary troops heard with cold indifference the antiquated names of the Republic and of Rome. Attached, either from birth or long habit, to the climate and manners of Gaul, they loved and admired Julian; they despised, and perhaps hated, the emperor; they dreaded the laborious march, the Persian arrows, and the burning deserts of Asia. They claimed as their own the country which they had saved; and excused their want of spirit by pleading the sacred and more immediate duty of protecting their families and friends. The apprehensions of the Gauls were derived from the knowledge of the impending and inevitable danger. As soon as the provinces were exhausted of their military strength, the Germans would violate a treaty which had been imposed on their fears; and, notwithstanding the abilities and valour of Julian, the general of a nominal army, to whom the public calamities would be imputed, must find himself, after a vain resistance, either a prisoner in the camp of the Barbarians or a criminal in the palace of Constantius. If

Julian complied with the orders which he had received, he subscribed his own destruction, and that of a people who deserved his affection. But a positive refusal was an act of rebellion and a declaration of war. The inexorable jealousy of the emperor, the peremptory, and perhaps insidious, nature of his commands, left not any room for a fair apology or candid interpretation; and the dependent station of the Cæsar scarcely allowed him to pause or to deliberate. Solitude increased the perplexity of Julian; he could no longer apply to the faithful counsels of Sallust, who had been removed from his office by the judicious malice of the eunuchs: he could not even enforce his representations by the concurrence of the ministers, who would have been afraid or ashamed to approve the ruin of Gaul. The moment had been chosen, when Lupicinus,⁷ the general of the cavalry, was despatched into Britain, to repulse the inroads of the Scots and Picts; and Florentius was occupied at Vienna by the assessment of the tribute. The latter, a crafty and corrupt statesman, declining to assume a responsible part on this dangerous occasion, eluded the pressing and repeated invitations of Julian, who represented to him that in every important measure, the presence of the prefect was indispensable in the council of the prince. In the meanwhile the Cæsar was oppressed by the rude and importunate solicitations of the Imperial messengers, who presumed to suggest that, if he expected the return of his ministers, he would charge himself with the guilt of the delay, and reserve for them the merit of the execution. Unable to resist, unwilling to comply, Julian expressed, in the most serious terms, his wish, and even his intention, of resigning the purple, which he could not preserve with honour, but which he could not abdicate with safety.

After a painful conflict, Julian was compelled to acknowledge that obedience was the virtue of the most eminent subject, and that the sovereign alone was entitled to judge of the public welfare. He issued the necessary orders for carrying into execution the commands of Constantius; a part of the troops began their march for the Alps; and the detachments from the several garrisons moved towards their respective places of assembly. They advanced with difficulty through the trembling and affrighted crowds of provincials; who attempted to excite their pity by silent despair or loud lamentations; while the wives of the soldiers, holding their infants in their arms, accused the desertion of their husbands, in the mixed language of grief, of tenderness, and of indignation. This scene of general distress afflicted the humanity of the Cæsar; he granted a sufficient number of post-waggon to transport the wives and families of the soldiers,⁸ endeavoured to alleviate the hardships which he was constrained to inflict, and increased, by the most laudable arts, his own popularity and the discontent of the exiled troops. The grief of an armed multitude is soon converted into rage; their licentious murmurs, which every hour were communicated from tent to tent with more boldness and effect, prepared their minds for the most daring acts of sedition; and by the connivance of their tribunes, a seasonable libel was secretly dispersed, which painted in lively colours the disgrace of the Cæsar, the oppression of the Gallic army, and the feeble vices of the tyrant of Asia. The servants of Constantius were astonished and alarmed by the progress of this dangerous spirit. They pressed the Cæsar to hasten

the departure of the troops: but they imprudently rejected the honest and judicious advice of Julian; who proposed that they should not march through Paris, and suggested the danger and temptation of a last interview.

As soon as the approach of the troops was announced, the Cæsar went out to meet them, and ascended his tribunal, which had been erected in a plain before the gates of the city. After distinguishing the officers and soldiers who by their rank or merit deserved a peculiar attention, Julian addressed himself in a studied oration to the surrounding multitude: he celebrated their exploits with grateful applause: encouraged them to accept, with alacrity, the honour of serving under the eyes of a powerful and liberal monarch; and admonished them that the commands of Augustus required an instant and cheerful obedience. The soldiers, who were apprehensive of offending their general by an indecent clamour, or of belying their sentiments by false and venal acclamations, maintained an obstinate silence, and, after a short pause, were dismissed to their quarters. The principal officers were entertained by the Cæsar, who professed, in the warmest language of friendship, his desire and his inability to reward, according to their deserts, the brave companions of his victories. They retired from the feast, full of grief and perplexity; and lamented the hardship of their fate, which tore them from their beloved general and their native country. The only expedient which could prevent their separation was boldly agitated and approved; the popular resentment was insensibly moulded into a regular conspiracy; their just reasons of complaint were heightened by passion, and their passions were inflamed by wine; as, on the eve of their departure, the troops were indulged in licentious festivity. At the hour of midnight, the impetuous multitude, with swords and bows^{8a} and torches in their hands, rushed into the suburbs; encompassed the palace;⁹ and, careless of future dangers, pronounced the fatal and irrevocable words, Julian Augustus! The prince, whose anxious suspense was interrupted by their disorderly acclamations, secured the doors against their intrusion; and, as long as it was in his power, secluded his person and dignity from the accidents of a nocturnal tumult. At the dawn of day, the soldiers, whose zeal was irritated by opposition, forcibly entered the palace, seized, with respectful violence, the object of their choice, guarded Julian with drawn swords through the streets of Paris, placed him on the tribunal, and with repeated shouts saluted him as their emperor. Prudence as well as loyalty inculcated the propriety of resisting their treasonable designs and of preparing for his oppressed virtue the excuse of violence. Addressing himself by turns to the multitude and to individuals, he sometimes implored their mercy, and sometimes expressed his indignation; conjured them not to sully the fame of their immortal victories; and ventured to promise that, if they would immediately return to their allegiance, he would undertake to obtain from the emperor, not only a free and gracious pardon, but even the revocation of the orders which had excited their resentment. But the soldiers, who were conscious of their guilt, chose rather to depend on the gratitude of Julian than on the clemency of the emperor. Their zeal was insensibly turned into impatience, and their impatience into rage. The inflexible Cæsar sustained, till the third hour of the day, their prayers, their reproaches,

and their menaces; nor did he yield, till he had been repeatedly assured that, if he wished to live, he must consent to reign. He was exalted on a shield in the presence, and amidst the unanimous acclamations, of the troops; a rich military collar, which was offered by chance, supplied the want of a diadem;[10](#) the ceremony was concluded by the promise of a moderate donative;[11](#) and the new emperor, overwhelmed with real or affected grief, retired into the most secret recesses of his apartment.[12](#)

The grief of Julian could proceed only from his innocence; but his innocence must appear extremely doubtful[13](#) in the eyes of those who have learned to suspect the motives and the professions of princes. His lively and active mind was susceptible of the various impressions of hope and fear, of gratitude and revenge, of duty and of ambition, of the love of fame and of the fear of reproach. But it is impossible for us to calculate the respective weight and operation of these sentiments; or to ascertain the principles of action, which might escape the observation, while they guided or rather impelled the steps, of Julian himself. The discontent of the troops was produced by the malice of his enemies; their tumult was the natural effect of interest and of passion; and, if Julian had tried to conceal a deep design under the appearances of chance, he must have employed the most consummate artifice without necessity, and probably without success. He solemnly declares, in the presence of Jupiter, of the Sun, of Mars, of Minerva, and of all the other deities, that, till the close of the evening which preceded his elevation, he was utterly ignorant of the designs of the soldiers;[14](#) and it may seem ungenerous to distrust the honour of a hero and the truth of a philosopher. Yet the superstitious confidence that Constantius was the enemy, and that he himself was the favourite, of the gods might prompt him to desire, to solicit, and even to hasten the auspicious moment of his reign, which was predestined to restore the ancient religion of mankind. When Julian had received the intelligence of the conspiracy, he resigned himself to a short slumber; and afterwards related to his friends that he had seen the Genius of the empire waiting with some impatience at his door, pressing for admittance, and reproaching his want of spirit and ambition.[15](#) Astonished and perplexed, he addressed his prayers to the great Jupiter; who immediately signified, by a clear and manifest omen, that he should submit to the will of heaven and of the army. The conduct which disclaims the ordinary maxims of reason excites our suspicion and eludes our inquiry. Whenever the spirit of fanaticism, at once so credulous and so crafty, has insinuated itself into a noble mind, it insensibly corrodes the vital principles of virtue and veracity.

To moderate the zeal of his party, to protect the persons of his enemies,[16](#) to defeat and to despise the secret enterprises which were formed against his life and dignity, were the cares which employed the first days of the reign of the new emperor. Although he was firmly resolved to maintain the station which he had assumed, he was still desirous of saving his country from the calamities of civil war, of declining a contest with the superior forces of Constantius, and of preserving his own character

from the reproach of perfidy and ingratitude. Adorned with the ensigns of military and Imperial pomp, Julian showed himself in the field of Mars to the soldiers, who glowed with ardent enthusiasm in the cause of their pupil, their leader, and their friend. He recapitulated their victories, lamented their sufferings, applauded their resolution, animated their hopes, and checked their impetuosity; nor did he dismiss the assembly, till he had obtained a solemn promise from the troops that, if the emperor of the East would subscribe an equitable treaty, they would renounce any views of conquest, and satisfy themselves with the tranquil possession of the Gallic provinces. On this foundation he composed, in his own name, and in that of the army, a specious and moderate epistle,[17](#) which was delivered to Pentadius, his master of the offices, and to his chamberlain Eutherius; two ambassadors whom he appointed to receive the answer, and observe the dispositions, of Constantius. This epistle is inscribed with the modest appellation of Cæsar; but Julian solicits in a peremptory, though respectful, manner the confirmation of the title of Augustus. He acknowledges the irregularity of his own election, while he justifies, in some measure, the resentment and violence of the troops which had extorted his reluctant consent. He allows the supremacy of his brother Constantius; and engages to send him an annual present of Spanish horses, to recruit his army with a select number of Barbarian youths, and to accept from his choice a Prætorian prefect of approved discretion and fidelity. But he reserves for himself the nomination of his other civil and military officers, with the troops, the revenue, and the sovereignty of the provinces beyond the Alps. He admonishes the emperor to consult the dictates of justice; to distrust the arts of those venal flatterers who subsist only by the discord of princes; and to embrace the offer of a fair and honourable treaty, equally advantageous to the republic and to the house of Constantine. In this negotiation Julian claimed no more than he already possessed. The delegated authority which he had long exercised over the provinces of Gaul, Spain, and Britain was still obeyed under a name more independent and august. The soldiers and the people rejoiced in a revolution which was not stained even with the blood of the guilty. Florentius was a fugitive; Lupicinus a prisoner. The persons who were disaffected to the new government were disarmed and secured; and the vacant offices were distributed, according to the recommendation of merit, by a prince who despised the intrigues of the palace and the clamours of the soldiers.[18](#)

The negotiations of peace were accompanied and supported by the most vigorous preparations for war. The army, which Julian held in readiness for immediate action, was recruited and augmented by the disorders of the times. The cruel persecution of the faction of Magnentius had filled Gaul with numerous bands of outlaws and robbers. They cheerfully accepted the offer of a general pardon from a prince whom they could trust, submitted to the restraints of military discipline, and retained only their implacable hatred to the person and government of Constantius.[19](#) As soon as the season of the year permitted Julian to take the field, he appeared at the head of his legions; threw a bridge over the Rhine in the neighbourhood of Cleves; and prepared to chastise the perfidy of the Attuarii, a tribe of Franks, who presumed that they might

ravage, with impunity, the frontiers of a divided empire. The difficulty, as well as glory, of this enterprise consisted in a laborious march; and Julian had conquered, as soon as he could penetrate into, a country which former princes had considered as inaccessible. After he had given peace to the Barbarians, the emperor carefully visited the fortifications along the Rhine from Cleves to Basil; surveyed, with peculiar attention, the territories which he had recovered from the hands of the Alemanni, passed through Besançon,[20](#) which had severely suffered from their fury, and fixed his head-quarters at Vienna for the ensuing winter. The barrier of Gaul was improved and strengthened with additional fortifications; and Julian entertained some hopes that the Germans, whom he had so often vanquished, might, in his absence, be restrained by the terror of his name. Vadomair[21](#) was the only prince of the Alemanni whom he esteemed or feared; and, while the subtle Barbarian affected to observe the faith of treaties, the progress of his arms threatened the state with an unseasonable and dangerous war. The policy of Julian condescended to surprise the prince of the Alemanni by his own arts; and Vadomair, who in the character of a friend had incautiously accepted an invitation from the Roman governors, was seized in the midst of the entertainment, and sent away prisoner into the heart of Spain. Before the Barbarians were recovered from their amazement, the emperor appeared in arms on the banks of the Rhine, and, once more crossing the river, renewed the deep impressions of terror and respect which had been already made by four preceding expeditions.[22](#)

The ambassadors of Julian had been instructed to execute, with the utmost diligence, their important commission. But, in their passage through Italy and Illyricum, they were detained by the tedious and affected delays of the provincial governors; they were conducted by slow journeys from Constantinople to Cæsarea in Cappadocia; and, when at length they were admitted to the presence of Constantius, they found that he had already conceived, from the despatches of his own officers, the most unfavourable opinion of the conduct of Julian and of the Gallic army. The letters were heard with impatience; the trembling messengers were dismissed with indignation and contempt; and the looks, the gestures, the furious language of the monarch expressed the disorder of his soul. The domestic connection, which might have reconciled the brother and the husband of Helena, was recently dissolved by the death of that princess, whose pregnancy had been several times fruitless, and was at last fatal to herself.[23](#) The empress Eusebia had preserved, to the last moment of her life, the warm and even jealous affection which she had conceived for Julian; and her mild influence might have moderated the resentment of a prince who, since her death, was abandoned to his own passions and to the arts of his eunuchs. But the terror of a foreign invasion obliged him to suspend the punishment of a private enemy; he continued his march towards the confines of Persia, and thought it sufficient to signify the conditions which might entitle Julian and his guilty followers to the clemency of their offended sovereign. He required that the presumptuous Cæsar should expressly renounce the

appellation and rank of Augustus, which he had accepted from the rebels; that he should descend to his former station of a limited and dependent minister; that he should vest the powers of the state and army in the hands of those officers who were appointed by the Imperial court; and that he should trust his safety to the assurances of pardon, which were announced by Epictetus, a Gallic bishop, and one of the Arian favourites of Constantius. Several months were ineffectually consumed in a treaty which was negotiated at the distance of three thousand miles between Paris and Antioch; and, as soon as Julian perceived that his moderate and respectful behaviour served only to irritate the pride of an implacable adversary, he boldly resolved to commit his life and fortune to the chance of a civil war. He gave a public and military audience to the quæstor Leonas: the haughty epistle of Constantius was read to the attentive multitude; and Julian protested, with the most flattering deference, that he was ready to resign the title of Augustus, if he could obtain the consent of those whom he acknowledged as the authors of his elevation. The faint proposal was impetuously silenced; and the acclamations of “Julian Augustus, continue to reign, by the authority of the army, of the people, of the republic, which you have saved,” thundered at once from every part of the field, and terrified the pale ambassador of Constantius. A part of the letter was afterwards read, in which the emperor arraigned the ingratitude of Julian, whom he had invested with the honours of the purple; whom he had educated with so much care and tenderness; whom he had preserved in his infancy, when he was left a helpless orphan. “An orphan!” interrupted Julian, who justified his cause by indulging his passions; “does the assassin of my family reproach me that I was left an orphan? He urges me to revenge those injuries which I have long studied to forget.” The assembly was dismissed; and Leonas, who, with some difficulty, had been protected from the popular fury, was sent back to his master, with an epistle, in which Julian expressed, in a strain of the most vehement eloquence, the sentiments of contempt, of hatred, and of resentment, which had been suppressed and embittered by the dissimulation of twenty years. After this message, which might be considered as a signal of irreconcilable war, Julian, who some weeks before had celebrated the Christian festival of the Epiphany,[24](#) made a public declaration that he committed the care of his safety to the immortal gods; and thus publicly renounced the religion, as well as the friendship, of Constantius.[25](#)

The situation of Julian required a vigorous and immediate resolution. He had discovered from intercepted letters that his adversary, sacrificing the interest of the state to that of the monarch, had again excited the Barbarians to invade the provinces of the West. The position of two magazines, one of them collected on the banks of the lake of Constance, the other formed at the foot of the Cottian Alps, seemed to indicate the march of two armies; and the size of those magazines, each of which consisted of six hundred thousand quarters of wheat, or rather flour,[26](#) was a threatening evidence of the strength and numbers of the enemy, who prepared to surround him. But the Imperial legions were still in their distant quarters of Asia; the Danube was feebly guarded; and, if Julian could occupy by a sudden incursion the important provinces of

Illyricum, he might expect that a people of soldiers would resort to his standard, and that the rich mines of gold and silver would contribute to the expenses of the civil war. He proposed this bold enterprise to the assembly of the soldiers; inspired them with a just confidence in their general and in themselves; and exhorted them to maintain their reputation, of being terrible to the enemy, moderate to their fellow-citizens, and obedient to their officers. His spirited discourse was received with the loudest acclamations, and the same troops which had taken up arms against Constantius, when he summoned them to leave Gaul, now declared with alacrity, that they would follow Julian to the farthest extremities of Europe or Asia. The oath of fidelity was administered; and the soldiers, clashing their shields, and pointing their drawn swords to their throats, devoted themselves, with horrid imprecations, to the service of a leader whom they celebrated as the deliverer of Gaul and the conqueror of the Germans.²⁷ This solemn engagement, which seemed to be dictated by affection rather than by duty, was singly opposed by Nebridius, who had been admitted to the office of Prætorian prefect. That faithful minister, alone and unassisted, asserted the rights of Constantius in the midst of an armed and angry multitude, to whose fury he had almost fallen an honourable, but useless, sacrifice. After losing one of his hands by the stroke of a sword, he embraced the knees of the prince whom he had offended. Julian covered the prefect with his Imperial mantle, and, protecting him from the zeal of his followers, dismissed him to his own house, with less respect than was perhaps due to the virtue of an enemy.²⁸ The high office of Nebridius was bestowed on Sallust; and the provinces of Gaul, which were now delivered from the intolerable oppression of taxes, enjoyed the mild and equitable administration of the friend of Julian, who was permitted to practise those virtues which he had instilled into the mind of his pupil.²⁹

The hopes of Julian depended much less on the number of his troops than on the celerity of his motions. In the execution of a daring enterprise, he availed himself of every precaution, as far as prudence could suggest; and, where prudence could no longer accompany his steps, he trusted the event to valour and to fortune. In the neighbourhood of Basil he assembled and divided his army.³⁰ One body, which consisted of ten thousand men, was directed, under the command of Nevitta, general of the cavalry, to advance through the midland parts of Rhætia and Noricum. A similar division of troops, under the orders of Jovius and Jovinus, prepared to follow the oblique course of the highways, through the Alps and the northern confines of Italy. The instructions to the generals were conceived with energy and precision: to hasten their march in close and compact columns, which, according to the disposition of the ground, might readily be changed into any order of battle; to secure themselves against the surprises of the night by strong posts and vigilant guards; to prevent resistance by their unexpected arrival; to elude examination by their sudden departure; to spread the opinion of their strength and the terror of his name; and to join their sovereign under the walls of Sirmium. For himself, Julian had reserved a more difficult and extraordinary part. He selected three thousand brave and active volunteers, resolved,

like their leader, to cast behind them every hope of a retreat: at the head of this faithful band, he fearlessly plunged into the recesses of the Marcian or black forest, which conceals the sources of the Danube;³¹ and, for many days, the fate of Julian was unknown to the world. The secrecy of his march, his diligence and vigour, surmounted every obstacle; he forced his way over mountains and morasses, occupied the bridges or swam the rivers, pursued his direct course,³² without reflecting whether he traversed the territory of the Romans or of the Barbarians, and at length emerged, between Ratisbon and Vienna, at the place where he designed to embark his troops on the Danube. By a well-concerted stratagem, he seized a fleet of light brigantines,³³ as it lay at anchor; secured a supply of coarse provisions sufficient to satisfy the indelicate, but voracious, appetite of a Gallic army; and boldly committed himself to the stream of the Danube. The labours of his mariners, who plied their oars with incessant diligence, and the steady continuance of a favourable wind, carried his fleet above seven hundred miles in eleven days;³⁴ and he had already disembarked his troops at Bononia, only nineteen miles from Sirmium, before his enemies could receive any certain intelligence that he had left the banks of the Rhine. In the course of this long and rapid navigation, the mind of Julian was fixed on the object of his enterprise; and, though he accepted the deputation of some cities, which hastened to claim the merit of an early submission, he passed before the hostile stations, which were placed along the river, without indulging the temptation of signalling an useless and ill-timed valour. The banks of the Danube were crowded on either side with spectators, who gazed on the military pomp, anticipated the importance of the event, and diffused through the adjacent country the fame of a young hero, who advanced with more than mortal speed at the head of the innumerable forces of the West. Lucilian, who, with the rank of general of the cavalry, commanded the military powers of Illyricum, was alarmed and perplexed by the doubtful reports which he could neither reject nor believe. He had taken some slow and irresolute measures for the purpose of collecting his troops; when he was surprised by Dagalaiphus, an active officer, whom Julian, as soon as he landed at Bononia, had pushed forwards with some light infantry. The captive general, uncertain of his life or death, was hastily thrown upon a horse, and conducted to the presence of Julian; who kindly raised him from the ground, and dispelled the terror and amazement which seemed to stupefy his faculties. But Lucilian had no sooner recovered his spirits than he betrayed his want of discretion, by presuming to admonish his conqueror that he had rashly ventured, with a handful of men, to expose his person in the midst of his enemies. "Reserve for your master Constantius these timid remonstrances," replied Julian, with a smile of contempt; "when I gave you my purple to kiss, I received you not as a counsellor, but as a suppliant." Conscious that success alone could justify his attempt, and that boldness only could command success, he instantly advanced, at the head of three thousand soldiers, to attack the strongest and most populous city of the Illyrian provinces. As he entered the long suburb of Sirmium, he was received by the joyful acclamations of the army and people; who, crowned with flowers, and holding lighted tapers in their hands, conducted their acknowledged sovereign to his Imperial

residence. Two days were devoted to the public joy, which was celebrated by the games of the Circus; but, early on the morning of the third day, Julian marched to occupy the narrow pass of Succia, in the defiles of Mount Hæmus; which, almost in the mid-way between Sirmium and Constantinople, separates the provinces of Thrace and Dacia, by an abrupt descent towards the former and a simple declivity on the side of the latter.³⁵ The defence of this important post was entrusted to the brave Nevitta; who, as well as the generals of the Italian division, successfully executed the plan of the march and junction which their master had so ably conceived.³⁶

Julian the Apostate (from a bust in the Capitoline Museum)

The homage which Julian obtained, from the fears or the inclination of the people, extended far beyond the immediate effect of his arms.³⁷ The prefectures of Italy and Illyricum were administered by Taurus and Florentius, who united that important office with the vain honours of the consulship; and, as those magistrates had retired with precipitation to the court of Asia, Julian, who could not always restrain the levity of his temper, stigmatised their flight by adding, in all the Acts of the Year, the epithet of *jugitive* to the names of the two consuls. The provinces which had been deserted by their first magistrates acknowledged the authority of an emperor, who, conciliating the qualities of a soldier with those of a philosopher, was equally admired in the camps of the Danube and in the cities of Greece. From his palace, or, more properly, from his head-quarters of Sirmium and Naissus, he distributed to the principal cities of the empire a laboured apology for his own conduct; published the secret despatches of Constantius; and solicited the judgment of mankind between two competitors, the one of whom had expelled, and the other had invited, the Barbarians.³⁸ Julian, whose mind was deeply wounded by the reproach of ingratitude, aspired to maintain, by argument as well as by arms, the superior merits of his cause; and to excel, not only in the arts of war, but in those of composition. His epistle to the senate and people of Athens³⁹ seems to have been dictated by an elegant enthusiasm; which prompted him to submit his actions and his motives to the degenerate Athenians of his own times, with the same humble deference as if he had been pleading, in the days of Aristides, before the tribunal of the Areopagus. His application to the senate of Rome, which was still permitted to bestow the titles of Imperial power, was agreeable to the forms of the expiring republic. An assembly was summoned by Tertullus, prefect of the city; the epistle of Julian was read; and, as he appeared to be master of Italy, his claims were admitted without a dissenting voice. His oblique censure of the innovations of Constantine, and his passionate invective against the vices of Constantius, were heard with less satisfaction; and the senate, as if Julian had been present, unanimously exclaimed, “Respect, we beseech you, the author of your own fortune.”⁴⁰ An artful expression, which, according to the chance of war, might be differently explained: as a manly reproof of the ingratitude of the usurper, or as a flattering confession that a single act of such benefit to the state ought to atone for all the failings of Constantius.

The intelligence of the march and rapid progress of Julian was speedily transmitted to his rival, who, by the retreat of Sapor, had obtained some respite from the Persian war. Disguising the anguish of his soul under the semblance of contempt, Constantius professed his intention of returning into Europe, and of giving chase to Julian; for he never spoke of this military expedition in any other light than that of a hunting party.⁴¹ In the camp of Hierapolis, in Syria, he communicated this design to his army, slightly mentioned the guilt and rashness of the Cæsar, and ventured to assure them that, if the mutineers of Gaul presumed to meet them in the field, they would be unable to sustain the fire of their eyes and the irresistible weight of their shout of onset. The speech of the emperor was received with military applause, and Theodotus, the president of the council of Hierapolis, requested, with tears of adulation, that *his* city might be adorned with the head of the vanquished rebel.⁴² A chosen detachment was despatched away in post-waggon, to secure, if it were yet possible, the pass of Succ; the recruits, the horses, the arms, and the magazines which had been prepared against Sapor, were appropriated to the service of the civil war; and the domestic victories of Constantius inspired his partisans with the most sanguine assurances of success. The notary Gaudentius had occupied in his name the provinces of Africa; the subsistence of Rome was intercepted; and the distress of Julian was increased by an unexpected event which might have been productive of fatal consequences. Julian had received the submission of two legions and a cohort of archers, who were stationed at Sirmium; but he suspected, with reason, the fidelity of those troops, which had been distinguished by the emperor, and it was thought expedient, under the pretence of the exposed state of the Gallic frontier, to dismiss them from the most important scene of action. They advanced, with reluctance, as far as the confines of Italy; but, as they dreaded the length of the way and the savage fierceness of the Germans, they resolved, by the instigation of one of their tribunes, to halt at Aquileia, and to erect the banners of Constantius on the walls of that impregnable city. The vigilance of Julian perceived at once the extent of the mischief and the necessity of applying an immediate remedy. By his order, Jovinus led back a part of the army into Italy; and the siege of Aquileia was formed with diligence and prosecuted with vigour. But the legionaries, who seemed to have rejected the yoke of discipline, conducted the defence of the place with skill and perseverance; invited the rest of Italy to imitate the example of their courage and loyalty; and threatened the retreat of Julian, if he should be forced to yield to the superior numbers of the arms of the East.⁴³

But the humanity of Julian was preserved from the cruel alternative, which he pathetically laments, of destroying or of being himself destroyed: and the seasonable death of Constantius delivered the Roman empire from the calamities of civil war. The approach of winter could not detain the monarch at Antioch; and his favourites durst not oppose his impatient desire of revenge. A slight fever, which was perhaps occasioned by the agitation of his spirits, was increased by the fatigues of the journey; and Constantius was obliged to halt at the little town of Mopsucrene, twelve miles

beyond Tarsus, where he expired, after a short illness, in the forty-fifth year of his age, and the twenty-fourth of his reign.⁴⁴ His genuine character, which was composed of pride and weakness, of superstition and cruelty, has been fully displayed in the preceding narrative of civil and ecclesiastical events. The long abuse of power rendered him a considerable object in the eyes of his contemporaries; but, as personal merit can alone deserve the notice of posterity, the last of the sons of Constantine may be dismissed from the world with the remark, that he inherited the defects, without the abilities, of his father. Before Constantius expired, he is said to have named Julian for his successor; nor does it seem improbable that his anxious concern for the fate of a young and tender wife, whom he left with child, may have prevailed, in his last moments, over the harsher passions of hatred and revenge. Eusebius, and his guilty associates, made a faint attempt to prolong the reign of the eunuchs by the election of another emperor: but their intrigues were rejected with disdain by an army which now abhorred the thought of civil discord; and two officers of rank were instantly despatched, to assure Julian that every sword in the empire would be drawn for his service. The military designs of that prince, who had formed three different attacks against Thrace, were prevented by this fortunate event. Without shedding the blood of his fellow-citizens, he escaped the dangers of a doubtful conflict and acquired the advantages of a complete victory. Impatient to visit the place of his birth and the new capital of the empire, he advanced from Naissus through the mountains of Hæmus and the cities of Thrace. When he reached Heraclea, at the distance of sixty miles, all Constantinople was poured forth to receive him; and he made his triumphal entry, amidst the dutiful acclamations of the soldiers, the people, and the senate. An innumerable multitude pressed around him with eager respect; and were perhaps disappointed when they beheld the small stature and simple garb of a hero whose unexperienced youth had vanquished the Barbarians of Germany, and who had now traversed, in a successful career, the whole continent of Europe, from the shores of the Atlantic to those of the Bosphorus.⁴⁵ A few days afterwards, when the remains of the deceased emperor were landed in the harbour, the subjects of Julian applauded the real or affected humanity of their sovereign. On foot, without his diadem, and clothed in a mourning habit, he accompanied the funeral as far as the church of the Holy Apostles, where the body was deposited: and, if these marks of respect may be interpreted as a selfish tribute to the birth and dignity of his Imperial kinsman, the tears of Julian professed to the world that he had forgot the injuries, and remembered only the obligations, which he had received from Constantius.⁴⁶ As soon as the legions of Aquileia were assured of the death of the emperor, they opened the gates of the city, and, by the sacrifice of their guilty leaders, obtained an easy pardon from the prudence or lenity of Julian; who, in the thirty-second year of his age, acquired the undisputed possession of the Roman empire.⁴⁷

Philosophy had instructed Julian to compare the advantages of action and retirement; but the elevation of his birth and the accidents of his life never allowed him the freedom of choice. He might perhaps sincerely have preferred the groves of the

academy and the society of Athens; but he was constrained, at first by the will, and afterwards by the injustice, of Constantius, to expose his person and fame to the dangers of Imperial greatness; and to make himself accountable to the world, and to posterity, for the happiness of millions.⁴⁸ Julian recollected with terror the observation of his master Plato,⁴⁹ that the government of our flocks and herds is always committed to beings of a superior species; and that the conduct of nations requires and deserves the celestial powers of the Gods or of the Genii. From this principle he justly concluded that the man who presumes to reign should aspire to the perfection of the divine nature; that he should purify his soul from her mortal and terrestrial part; that he should extinguish his appetites, enlighten his understanding, regulate his passions, and subdue the wild beast which, according to the lively metaphor of Aristotle,⁵⁰ seldom fails to ascend the throne of a despot. The throne of Julian, which the death of Constantius fixed on an independent basis, was the seat of reason, of virtue, and perhaps of vanity. He despised the honours, renounced the pleasures, and discharged with incessant diligence the duties, of his exalted station; and there were few among his subjects who would have consented to relieve him from the weight of the diadem, had they been obliged to submit their time and their actions to the rigorous laws which their philosophic emperor imposed on himself. One of his most intimate friends,⁵¹ who had often shared the frugal simplicity of his table, has remarked that his light and sparing diet (which was usually of the vegetable kind) left his mind and body always free and active for the various and important business of an author, a pontiff, a magistrate, a general, and a prince. In one and the same day, he gave audience to several ambassadors, and wrote, or dictated, a great number of letters to his generals, his civil magistrates, his private friends, and the different cities of his dominions. He listened to the memorials which had been received, considered the subject of the petitions, and signified his intentions more rapidly than they could be taken in shorthand by the diligence of his secretaries. He possessed such flexibility of thought, and such firmness of attention, that he could employ his hand to write, his ear to listen, and his voice to dictate; and pursue at once three several trains of ideas without hesitation and without error. While his ministers reposed, the prince flew with agility from one labour to another, and, after a hasty dinner, retired into his library, till the public business, which he had appointed for the evening, summoned him to interrupt the prosecution of his studies. The supper of the emperor was still less substantial than the former meal; his sleep was never clouded by the fumes of indigestion; and, except in the short interval of a marriage, which was the effect of policy rather than love, the chaste Julian never shared his bed with a female companion.⁵² He was soon awakened by the entrance of fresh secretaries, who had slept the preceding day; and his servants were obliged to wait alternately, while their indefatigable master allowed himself scarcely any other refreshment than the change of occupations. The predecessors of Julian, his uncle, his brother, and his cousin, indulged their puerile taste for the games of the circus, under the specious pretence of complying with the inclinations of the people; and they frequently remained the greatest part of the day, as idle spectators,

and as a part of the splendid spectacle, till the ordinary round of twenty-four races⁵³ was completely finished. On solemn festivals, Julian, who felt and professed an unfashionable dislike to these frivolous amusements, condescended to appear in the circus; and, after bestowing a careless glance on five or six of the races, he hastily withdrew, with the impatience of a philosopher, who considered every moment as lost that was not devoted to the advantage of the public or the improvement of his own mind.⁵⁴ By this avarice of time, he seemed to protract the short duration of his reign; and, if the dates were less securely ascertained, we should refuse to believe that only sixteen months elapsed between the death of Constantius and the departure of his successor for the Persian war. The actions of Julian can only be preserved by the care of the historian; but the portion of his voluminous writings which is still extant remains as a monument of the application, as well as of the genius, of the emperor. The Misopogon, the Cæsars, several of his orations, and his elaborate work against the Christian religion were composed in the long nights of the two winters, the former of which he passed at Constantinople, and the latter at Antioch.

The reformation of the Imperial court was one of the first and most necessary acts of the government of Julian.⁵⁵ Soon after his entrance into the palace of Constantinople, he had occasion for the service of a barber. An officer, magnificently dressed, immediately presented himself. "It is a barber," exclaimed the prince, with affected surprise, "that I want, and not a receiver-general of the finances."⁵⁶ He questioned the man concerning the profits of his employment; and was informed that, besides a large salary and some valuable perquisites, he enjoyed a daily allowance for twenty servants and as many horses. A thousand barbers, a thousand cupbearers, a thousand cooks, were distributed in the several offices of luxury; and the number of eunuchs could be compared only with the insects of a summer's day.⁵⁷ The monarch who resigned to his subjects the superiority of merit and virtue was distinguished by the oppressive magnificence of his dress, his table, his buildings, and his train. The stately palaces erected by Constantine and his sons were decorated with many-coloured marbles and ornaments of massy gold. The most exquisite dainties were procured, to gratify their pride rather than their taste; birds of the most distant climates, fish from the most remote seas, fruits out of their natural season, winter roses, and summer snows.⁵⁸ The domestic crowd of the palace surpassed the expense of the legions; yet the smallest part of this costly multitude was subservient to the use, or even to the splendour, of the throne. The monarch was disgraced, and the people was injured, by the creation and sale of an infinite number of obscure, and even titular, employments; and the most worthless of mankind might purchase the privilege of being maintained, without the necessity of labour, from the public revenue. The waste of an enormous household, the increase of fees and perquisites, which were soon claimed as a lawful debt, and the bribes which they extorted from those who feared their enmity or solicited their favour, suddenly enriched these haughty menials. They abused their fortune, without considering their past, or their future, condition; and their rapine and venality could be

equalled only by the extravagance of their dissipations. Their silken robes were embroidered with gold, their tables were served with delicacy and profusion; the houses which they built for their own use would have covered the farm of an ancient consul; and the most honourable citizens were obliged to dismount from their horses, and respectfully to salute an eunuch whom they met on the public highway. The luxury of the palace excited the contempt and indignation of Julian, who usually slept on the ground, who yielded with reluctance to the indispensable calls of nature, and who placed his vanity, not in emulating, but in despising, the pomp of royalty. By the total extirpation of a mischief which was magnified even beyond its real extent, he was impatient to relieve the distress, and to appease the murmurs, of the people; who support with less uneasiness the weight of taxes, if they are convinced that the fruits of their industry are appropriated to the service of the state. But in the execution of this salutary work Julian is accused of proceeding with too much haste and inconsiderate severity. By a single edict, he reduced the palace of Constantinople to an immense desert, and dismissed with ignominy the whole train of slaves and dependents,[59](#) without providing any just, or at least benevolent, exceptions, for the age, the services, or the poverty of the faithful domestics of the Imperial family. Such indeed was the temper of Julian, who seldom recollected the fundamental maxim of Aristotle that true virtue is placed at an equal distance between the opposite vices. The splendid and effeminate dress of the Asiatics, the curls and paint, the collars and bracelets, which had appeared so ridiculous in the person of Constantine, were consistently rejected by his philosophic successor. But with the fopperies, Julian affected to renounce the decencies, of dress; and seemed to value himself for his neglect of the laws of cleanliness. In a satirical performance, which was designed for the public eye, the emperor descants with pleasure, and even with pride, on the length of his nails, and the inky blackness of his hands; protests that, although the greatest part of his body was covered with hair, the use of the razor was confined to his head alone; and celebrates with visible complacency, the shaggy and *populous*[60](#) beard, which he fondly cherished after the example of the philosophers of Greece. Had Julian consulted the simple dictates of reason, the first magistrate of the Romans would have scorned the affectation of Diogenes as well as that of Darius.

But the work of public reformation would have remained imperfect, if Julian had only corrected the abuses, without punishing the crimes, of his predecessor's reign. "We are now delivered," says he, in a familiar letter to one of his intimate friends, "we are now surprisingly delivered from the voracious jaws of the Hydra."[61](#) I do not mean to apply that epithet to my brother Constantius. He is no more; may the earth lie light on his head! But his artful and cruel favourites studied to deceive and exasperate a prince whose natural mildness cannot be praised without some efforts of adulation. It is not, however, my intention that even those men should be oppressed: they are accused, and they shall enjoy the benefit of a fair and impartial trial." To conduct this inquiry, Julian named six judges of the highest rank in the state and army; and, as he wished to escape the reproach of condemning his personal enemies, he fixed this extraordinary tribunal

at Chalcedon, on the Asiatic side of the Bosphorus; and transferred to the commissioners an absolute power to pronounce and execute their final sentence, without delay and without appeal. The office of president was exercised by the venerable prefect of the East, a *second* Sallust,[62](#) whose virtues conciliated the esteem of Greek sophists and of Christian bishops. He was assisted by the eloquent Mamertinus,[63](#) one of the consuls elect, whose merit is loudly celebrated by the doubtful evidence of his own applause. But the civil wisdom of two magistrates was overbalanced by the ferocious violence of four generals, Nevitta, Agilo, Jovinus, and Arbetio. Arbetio, whom the public would have seen with less surprise at the bar than on the bench, was supposed to possess the secret of the commission; the armed and angry leaders of the Jovian and Herculian bands encompassed the tribunal; and the judges were alternately swayed by the laws of justice, and by the clamours of faction.[64](#)

The chamberlain Eusebius, who had so long abused the favour of Constantius, expiated, by an ignominious death, the insolence, the corruption, and cruelty of his servile reign. The executions of Paul and Apodemius (the former of whom was burnt alive) were accepted as an inadequate atonement by the widows and orphans of so many hundred Romans, whom those legal tyrants had betrayed and murdered. But Justice herself (if we may use the pathetic expression of Ammianus)[65](#) appeared to weep over the fate of Ursulus, the treasurer of the empire; and his blood accused the ingratitude of Julian, whose distress had been seasonably relieved by the intrepid liberality of that honest minister. The rage of the soldiers, whom he had provoked by his indiscretion, was the cause and the excuse of his death; and the emperor, deeply wounded by his own reproaches and those of the public, offered some consolation to the family of Ursulus, by the restitution of his confiscated fortunes. Before the end of the year in which they had been adorned with the ensigns of the prefecture and consulship,[66](#) Taurus and Florentius were reduced to implore the clemency of the inexorable tribunal of Chalcedon. The former was banished to Vercellæ in Italy, and a sentence of death was pronounced against the latter. A wise prince should have rewarded the crime of Taurus: the faithful minister, when he was no longer able to oppose the progress of a rebel, had taken refuge in the court of his benefactor and his lawful sovereign. But the guilt of Florentius justified the severity of the judges; and his escape served to display the magnanimity of Julian; who nobly checked the interested diligence of an informer, and refused to learn what place concealed the wretched fugitive from his just resentment.[67](#) Some months after the tribunal of Chalcedon had been dissolved, the prætorian vicegerent of Africa, the notary Gaudentius, and Artemius,[68](#) duke of Egypt, were executed at Antioch. Artemius had reigned the cruel and corrupt tyrant of a great province; Gaudentius had long practised the arts of calumny against the innocent, the virtuous, and even the person of Julian himself. Yet the circumstances of their trial and condemnation were so unskilfully managed, that these wicked men obtained, in the public opinion, the glory of suffering for the

obstinate loyalty with which they had supported the cause of Constantius. The rest of his servants were protected by a general act of oblivion; and they were left to enjoy with impunity the bribes which they had accepted either to defend the oppressed or to oppress the friendless. This measure, which, on the soundest principles of policy, may deserve our approbation, was executed in a manner which seemed to degrade the majesty of the throne. Julian was tormented by the importunities of a multitude, particularly of Egyptians, who loudly demanded the gifts which they had imprudently or illegally bestowed; he foresaw the endless prosecution of vexatious suits; and he engaged a promise, which ought always to have been sacred, that, if they would repair to Chalcedon, he would meet them in person, to hear and determine their complaints. But, as soon as they were landed, he issued an absolute order, which prohibited the watermen from transporting any Egyptian to Constantinople; and thus detained his disappointed clients on the Asiatic shore, till, their patience and money being utterly exhausted, they were obliged to return with indignant murmurs to their native country.[69](#)

The numerous army of spies, of agents, and informers, enlisted by Constantius to secure the repose of one man and to interrupt that of millions, was immediately disbanded by his generous successor. Julian was slow in his suspicions and gentle in his punishments; and his contempt of treason was the result of judgment, of vanity, and of courage. Conscious of superior merit, he was persuaded that few among his subjects would dare to meet him in the field, to attempt his life, or even to seat themselves on his vacant throne. The philosopher could excuse the hasty sallies of discontent; and the hero could despise the ambitious projects which surpassed the fortune or the abilities of the rash conspirators. A citizen of Ancyra had prepared for his own use a purple garment; and this indiscreet action, which, under the reign of Constantius, would have been considered as a capital offence,[70](#) was reported to Julian by the officious importunity of a private enemy. The monarch, after making some inquiry into the rank and character of his rival, despatched the informer with a present of a pair of purple slippers, to complete the magnificence of his Imperial habit. A more dangerous conspiracy was formed by ten of the domestic guards, who had resolved to assassinate Julian in the field of exercise near Antioch. Their intemperance revealed their guilt; and they were conducted in chains to the presence of their injured sovereign, who, after a lively representation of the wickedness and folly of their enterprise, instead of a death of torture, which they deserved and expected, pronounced a sentence of exile against the two principal offenders. The only instance in which Julian seemed to depart from his accustomed clemency was the execution of a rash youth, who, with a feeble hand, had aspired to seize the reins of empire. But that youth was the son of Marcellus, the general of cavalry, who in the first campaign of the Gallic war had deserted the standard of the Cæsar and the republic. Without appearing to indulge his personal resentment, Julian might easily confound the crime of the son and of the father: but he was reconciled by the distress of Marcellus, and the liberality of the emperor endeavoured to heal the wound which had been inflicted by

the hand of justice.[71](#)

Julian was not insensible of the advantages of freedom.[72](#) From his studies he had imbibed the spirit of ancient sages and heroes; his life and fortunes had depended on the caprice of a tyrant; and, when he ascended the throne, his pride was sometimes mortified by the reflection that the slaves who would not dare to censure his defects were not worthy to applaud his virtues.[73](#) He sincerely abhorred the system of Oriental despotism which Diocletian, Constantine, and the patient habits of fourscore years had established in the empire. A motive of superstition prevented the execution of the design which Julian had frequently meditated, of relieving his head from the weight of a costly diadem:[74](#) but he absolutely refused the title of *Dominus* or *Lord*,[75](#) a word which was grown so familiar to the ears of the Romans that they no longer remembered its servile and humiliating origin. The office, or rather the name, of consul was cherished by a prince who contemplated with reverence the ruins of the republic; and the same behaviour which had been assumed by the prudence of Augustus was adopted by Julian from choice and inclination. On the calends of January, at break of day, the new consuls, Mamertinus and Nevitta, hastened to the palace to salute the emperor. As soon as he was informed of their approach, he leaped from his throne, eagerly advanced to meet them, and compelled the blushing magistrates to receive the demonstrations of his affected humility. From the palace they proceeded to the senate. The emperor, on foot, marched before their litters; and the gazing multitude admired the image of ancient times, or secretly blamed a conduct which, in their eyes, degraded the majesty of the purple.[76](#) But the behaviour of Julian was uniformly supported. During the games of the Circus, he had, imprudently or designedly, performed the manumission of a slave in the presence of the consul. The moment he was reminded that he had trespassed on the jurisdiction of *another* magistrate, he condemned himself to pay a fine of ten pounds of gold; and embraced this public occasion of declaring to the world that he was subject, like the rest of his fellow-citizens, to the laws,[77](#) and even to the forms, of the republic. The spirit of his administration, and his regard for the place of his nativity, induced Julian to confer on the senate of Constantinople, the same honours, privileges, and authority, which were still enjoyed by the senate of ancient Rome.[78](#) A legal fiction was introduced, and gradually established, that one half of the national council had migrated into the East: and the despotic successors of Julian, accepting the title of Senators, acknowledged themselves the members of a respectable body, which was permitted to represent the majesty of the Roman name. From Constantinople, the attention of the monarch was extended to the municipal senates of the provinces. He abolished, by repeated edicts, the unjust and pernicious exemptions which had withdrawn so many idle citizens from the service of their country; and by imposing an equal distribution of public duties he restored the strength, the splendour, or, according to the glowing expression of Libanius,[79](#) the soul of the expiring cities of his empire. The venerable age of Greece excited the most tender compassion in the mind of Julian; which kindled into rapture

when he recollected the gods, the heroes, and the men, superior to heroes and to gods, who had bequeathed to the latest posterity the monuments of their genius or the example of their virtues. He relieved the distress, and restored the beauty, of the cities of Epirus and Peloponnesus.⁸⁰ Athens acknowledged him for her benefactor; Argos, for her deliverer. The pride of Corinth, again rising from her ruins with the honours of a Roman colony, exacted a tribute from the adjacent republics, for the purpose of defraying the games of the Isthmus, which were celebrated in the amphitheatre with the hunting of bears and panthers. From this tribute the cities of Elis, of Delphi, and of Argos, which had inherited from their remote ancestors the sacred office of perpetuating the Olympic, the Pythian, and the Nemean games, claimed a just exemption. The immunity of Elis and Delphi was respected by the Corinthians; but the poverty of Argos tempted the insolence of oppression; and the feeble complaints of its deputies were silenced by the decree of a provincial magistrate, who seems to have consulted only the interest of the capital in which he resided. Seven years after this sentence, Julian⁸¹ allowed the cause to be referred to a superior tribunal; and his eloquence was interposed, most probably with success, in the defence of a city which had been the royal seat of Agamemnon⁸² and had given to Macedonia a race of kings and conquerors.⁸³

The laborious administration of military and civil affairs, which were multiplied in proportion to the extent of the empire, exercised the abilities of Julian; but he frequently assumed the two characters of Orator⁸⁴ and of Judge,⁸⁵ which are almost unknown to the modern sovereigns of Europe. The arts of persuasion, so diligently cultivated by the first Cæsars, were neglected by the military ignorance, and Asiatic pride, of their successors; and, if they condescended to harangue the soldiers, whom they feared, they treated with silent disdain the senators, whom they despised. The assemblies of the senate, which Constantius had avoided, were considered by Julian as the place where he could exhibit, with the most propriety, the maxims of a republican and the talents of a rhetorician. He alternately practised, as in a school of declamation, the several modes of praise, of censure, of exhortation; and his friend Libanius has remarked that the study of Homer taught him to imitate the simple, concise style of Menelaus, the copiousness of Nestor, whose words descended like the flakes of a winter's snow, or the pathetic and forcible eloquence of Ulysses. The functions of a judge, which are sometimes incompatible with those of a prince, were exercised by Julian, not only as a duty, but as an amusement: and, although he might have trusted the integrity and discernment of his Prætorian prefects, he often placed himself by their side on the seat of judgment. The acute penetration of his mind was agreeably occupied in detecting and defeating the chicanery of the advocates, who laboured to disguise the truth of facts and to pervert the sense of the laws. He sometimes forgot the gravity of his station, asked indiscreet or unseasonable questions, and betrayed, by the loudness of his voice and the agitation of his body, the earnest vehemence with which he maintained his opinion against the judges, the advocates, and their clients. But his

knowledge of his own temper prompted him to encourage, and even to solicit, the reproof of his friends and ministers; and, whenever they ventured to oppose the irregular sallies of his passions, the spectators could observe the shame, as well as the gratitude, of their monarch. The decrees of Julian were almost always founded on the principles of justice; and he had the firmness to resist the two most dangerous temptations which assault the tribunal of a sovereign under the specious forms of compassion and equity. He decided the merits of the cause without weighing the circumstances of the parties; and the poor, whom he wished to relieve, were condemned to satisfy the just demands of a noble and wealthy adversary. He carefully distinguished the judge from the legislator;[86](#) and, though he meditated a necessary reformation of the Roman jurisprudence, he pronounced sentence according to the strict and literal interpretation of those laws which the magistrates were bound to execute and the subjects to obey.

The generality of princes, if they were stripped of their purple and cast naked into the world, would immediately sink to the lowest rank of society, without a hope of emerging from their obscurity. But the personal merit of Julian was, in some measure, independent of his fortune. Whatever had been his choice of life, by the force of intrepid courage, lively wit, and intense application, he would have obtained, or at least he would have deserved, the highest honours of his profession; and Julian might have raised himself to the rank of minister, or general, of the state in which he was born a private citizen. If the jealous caprice of power had disappointed his expectations; if he had prudently declined the paths of greatness, the employment of the same talents in studious solitude would have placed, beyond the reach of kings, his present happiness and his immortal fame. When we inspect, with minute or perhaps malevolent attention, the portrait of Julian, something seems wanting to the grace and perfection of the whole figure. His genius was less powerful and sublime than that of Cæsar; nor did he possess the consummate prudence of Augustus. The virtues of Trajan appear more steady and natural, and the philosophy of Marcus is more simple and consistent. Yet Julian sustained adversity with firmness, and prosperity with moderation. After an interval of one hundred and twenty years from the death of Alexander Severus, the Romans beheld an emperor who made no distinction between his duties and his pleasures; who laboured to relieve the distress, and to revive the spirit, of his subjects; and who endeavoured always to connect authority with merit, and happiness with virtue. Even faction, and religious faction, was constrained to acknowledge the superiority of his genius, in peace as well as in war; and to confess, with a sigh, that the apostate Julian was a lover of his country, and that he deserved the empire of the world.[87](#)

The Religion of Julian — Universal Toleration — He attempts to restore and reform the Pagan Worship; to rebuild the Temple of Jerusalem — His artful Persecution of the Christians — Mutual Zeal and Injustice

The character of Apostate has injured the reputation of Julian; and the enthusiasm which clouded his virtues has exaggerated the real and apparent magnitude of his faults. Our partial ignorance may represent him as a philosophic monarch, who studied to protect, with an equal hand, the religious factions of the empire; and to allay the theological fever which had inflamed the minds of the people from the edicts of Diocletian to the exile of Athanasius. A more accurate view of the character and conduct of Julian will remove this favourable prepossession for a prince who did not escape the general contagion of the times. We enjoy the singular advantage of comparing the pictures which have been delineated by his fondest admirers and his implacable enemies. The actions of Julian are faithfully related by a judicious and candid historian, the impartial spectator of his life and death. The unanimous evidence of his contemporaries is confirmed by the public and private declarations of the emperor himself; and his various writings express the uniform tenor of his religious sentiments, which policy would have prompted him to dissemble rather than to affect. A devout and sincere attachment for the gods of Athens and Rome constituted the ruling passion of Julian;¹ the powers of an enlightened understanding were betrayed and corrupted by the influence of superstitious prejudice; and the phantoms which existed only in the mind of the emperor had a real and pernicious effect on the government of the empire. The vehement zeal of the Christians, who despised the worship, and overturned the altars, of those fabulous deities, engaged their votary in a state of irreconcilable hostility with a very numerous party of his subjects; and he was sometimes tempted, by the desire of victory or the shame of a repulse, to violate the laws of prudence, and even of justice. The triumph of the party which he deserted and opposed has fixed a stain of infamy on the name of Julian; and the unsuccessful apostate has been overwhelmed with a torrent of pious invectives, of which the signal was given by the sonorous trumpet² of Gregory Nazianzen.³ The interesting nature of the events which were crowded into the short reign of this active emperor deserves a just and circumstantial narrative. His motives, his counsels, and his actions, as far as they are connected with the history of religion, will be the subject of the present chapter.

The cause of his strange and fatal apostacy may be derived from the early period of his life, when he was left an orphan in the hands of the murderers of his family. The names of Christ and of Constantius, the ideas of slavery and of religion, were soon associated in a youthful imagination, which was susceptible of the most lively impressions. The care of his infancy was entrusted to Eusebius, bishop of Nicomedia,⁴ who was related to him on the side of his mother; and, till Julian reached the twentieth year of his age, he received from his Christian preceptors the education, not of a hero,

but of a saint. The emperor, less jealous of a heavenly than of an earthly crown, contented himself with the imperfect character of a catechumen, while he bestowed the advantages of baptism⁵ on the nephews of Constantine.⁶ They were even admitted to the inferior offices of the ecclesiastical order; and Julian publicly read the Holy Scriptures in the church of Nicomedia. The study of religion, which they assiduously cultivated, appeared to produce the fairest fruits of faith and devotion.⁷ They prayed, they fasted, they distributed alms to the poor, gifts to the clergy, and oblations to the tombs of the martyrs; and the splendid monument of St. Mamas, at Cæsarea, was erected, or at least was undertaken, by the joint labour of Gallus and Julian.⁸ They respectfully conversed with the bishops who were eminent for superior sanctity, and solicited the benediction of the monks and hermits who had introduced into Cappadocia the voluntary hardships of the ascetic life.⁹ As the two princes advanced towards the years of manhood, they discovered, in their religious sentiments, the difference of their characters. The dull and obstinate understanding of Gallus embraced, with implicit zeal, the doctrines of Christianity; which never influenced his conduct or moderated his passions. The mild disposition of the younger brother was less repugnant to the precepts of the gospel; and his active curiosity might have been gratified by a theological system which explains the mysterious essence of the Deity and opens the boundless prospect of invisible and future worlds. But the independent spirit of Julian refused to yield the passive and unresisting obedience which was required, in the name of religion, by the haughty ministers of the church. Their speculative opinions were imposed as positive laws, and guarded by the terrors of eternal punishments; but, while they prescribed the rigid formulary of the thoughts, the words, and the actions of the young prince; whilst they silenced his objections and severely checked the freedom of his inquiries, they secretly provoked his impatient genius to disclaim the authority of his ecclesiastical guides. He was educated in the Lesser Asia, amidst the scandals of the Arian controversy.¹⁰ The fierce contests of the Eastern bishops, the incessant alterations of their creeds, and the profane motives which appeared to actuate their conduct, insensibly strengthened the prejudice of Julian, that they neither understood nor believed the religion for which they so fiercely contended. Instead of listening to the proofs of Christianity with that favourable attention which adds weight to the most respectable evidence, he heard with suspicion, and disputed with obstinacy and acuteness, the doctrines for which he already entertained an invincible aversion. Whenever the young princes were directed to compose declamations on the subject of the prevailing controversies, Julian always declared himself the advocate of Paganism; under the specious excuse that, in the defence of the weaker cause, his learning and ingenuity might be more advantageously exercised and displayed.

As soon as Gallus was invested with the honours of the purple, Julian was permitted to breathe the air of freedom, of literature, and of Paganism.¹¹ The crowd of sophists, who were attracted by the taste and liberality of their royal pupil, had formed a strict

alliance between the learning and the religion of Greece; and the poems of Homer, instead of being admired as the original productions of human genius, were seriously ascribed to the heavenly inspiration of Apollo and the muses. The deities of Olympus, as they are painted by the immortal bard, imprint themselves on the minds which are the least addicted to superstitious credulity. Our familiar knowledge of their names and characters, their forms and attributes, *seems* to bestow on those airy beings a real and substantial existence; and the pleasing enchantment produces an imperfect and momentary assent of the imagination to those fables which are the most repugnant to our reason and experience. In the age of Julian every circumstance contributed to prolong and fortify the illusion; the magnificent temples of Greece and Asia; the works of those artists who had expressed, in painting or in sculpture, the divine conceptions of the poet; the pomp of festivals and sacrifices; the successful arts of divination; the popular traditions of oracles and prodigies; and the ancient practice of two thousand years. The weakness of polytheism was, in some measure, excused by the moderation of its claims; and the devotion of the Pagans was not incompatible with the most licentious scepticism.^{[12](#)} Instead of an indivisible and regular system, which occupies the whole extent of the believing mind, the mythology of the Greeks was composed of a thousand loose and flexible parts, and the servant of the gods was at liberty to define the degree and measure of his religious faith. The creed which Julian adopted for his own use was of the largest dimensions; and, by a strange contradiction, he disdained the salutary yoke of the gospel, whilst he made a voluntary offering of his reason on the altars of Jupiter and Apollo. One of the orations of Julian is consecrated to the honour of Cybele, the mother of the gods, who required from her effeminate priests the bloody sacrifice, so rashly performed by the madness of the Phrygian boy. The pious emperor condescends to relate, without a blush, and without a smile, the voyage of the goddess from the shores of Pergamus to the mouth of the Tiber, and the stupendous miracle, which convinced the senate and people of Rome that the lump of clay which their ambassadors had transported over the seas was endowed with life, and sentiment, and divine power.^{[13](#)} For the truth of this prodigy, he appeals to the public monuments of the city; and censures, with some acrimony, the sickly and affected taste of those men who impertinently derided the sacred traditions of their ancestors.^{[14](#)}

But the devout philosopher, who sincerely embraced and warmly encouraged the superstition of the people, reserved for himself the privilege of a liberal interpretation; and silently withdrew from the foot of the altars into the sanctuary of the temple. The extravagance of the Grecian mythology proclaimed with a clear and audible voice that the pious inquirer, instead of being scandalised or satisfied with the literal sense, should diligently explore the occult wisdom which had been disguised, by the prudence of antiquity, under the mask of folly and of fable.^{[15](#)} The philosophers of the Platonic school,^{[16](#)} Plotinus, Porphyry, and the divine Iamblichus, were admired as the most skilful masters of this allegorical science which laboured to soften and harmonise the deformed features of paganism. Julian himself, who was directed in the mysterious

pursuit by Ædesius, the venerable successor of Iamblichus, aspired to the possession of a treasure which he esteemed, if we may credit his solemn asseverations, far above the empire of the world.¹⁷ It was indeed a treasure which derived its value only from opinion; and every artist who flattered himself that he had extracted the precious ore from the surrounding dross claimed an equal right of stamping the name and figure the most agreeable to his peculiar fancy. The fable of ATys and Cybele had been already explained by Porphyry; but his labours served only to animate the pious industry of Julian, who invented and published his own allegory of that ancient and mystic tale. This freedom of interpretation, which might gratify the pride of the Platonists, exposed the vanity of their art. Without a tedious detail, the modern reader could not form a just idea of the strange allusions, the forced etymologies, the solemn trifling, and the impenetrable obscurity of these sages, who professed to reveal the system of the universe. As the traditions of Pagan mythology were variously related, the sacred interpreters were at liberty to select the most convenient circumstances; and, as they translated an arbitrary cypher, they could extract from *any* fable *any* sense which was adapted to their favourite system of religion and philosophy. The lascivious form of a naked Venus was tortured into the discovery of some moral precept or some physical truth: and the castration of Atys explained the revolution of the sun between the tropics or the separation of the human soul from vice and error.¹⁸

The theological system of Julian appears to have contained the sublime and important principles of natural religion. But, as the faith which is not founded on revelation must remain destitute of any firm assurance, the disciple of Plato imprudently relapsed into the habits of vulgar superstition; and the popular and philosophic notion of the Deity seems to have been confounded in the practice, the writings, and even in the mind of Julian.¹⁹ The pious emperor acknowledged and adored the Eternal Cause of the universe, to whom he ascribed all the perfections of an infinite nature, invisible to the eyes, and inaccessible to the understanding, of feeble mortals. The Supreme God had created, or rather, in the Platonic language, had generated, the gradual succession of dependent spirits, of gods, of dæmons, of heroes, and of men; and every being which derived its existence immediately from the First Cause received the inherent gift of immortality. That so precious an advantage might not be lavished upon unworthy objects, the Creator had entrusted to the skill and power of the inferior gods the office of forming the human body, and of arranging the beautiful harmony of the animal, the vegetable, and the mineral kingdoms. To the conduct of these divine ministers he delegated the temporal government of this lower world; but their imperfect administration is not exempt from discord or error. The earth, and its inhabitants, are divided among them, and the characters of Mars or Minerva, of Mercury or Venus, may be distinctly traced in the laws and manners of their peculiar votaries. As long as our immortal souls are confined in a mortal prison, it is our interest, as well as our duty, to solicit the favour, and to deprecate the wrath, of the powers of heaven; whose pride is gratified by the devotion of mankind; and whose grosser parts may be supposed to derive some nourishment from the fumes of sacrifice.²⁰ The inferior gods

might sometimes condescend to animate the statues, and to inhabit the temples, which were dedicated to their honour. They might occasionally visit the earth, but the heavens were the proper throne and symbol of their glory. The invariable order of the sun, moon, and stars was hastily admitted by Julian as a proof of their *eternal* duration; and their eternity was a sufficient evidence that they were the workmanship, not of an inferior deity, but of the Omnipotent King. In the system of the Platonists, the visible, was a type of the invisible, world. The celestial bodies, as they were informed by a divine spirit, might be considered as the objects the most worthy of religious worship. The Sun, whose genial influence pervades and sustains the universe, justly claimed the adoration of mankind, as the bright representative of the Logos, the lively, the rational, the beneficent image of the intellectual Father.[21](#)

In every age, the absence of genuine inspiration is supplied by the strong illusions of enthusiasm and the mimic arts of imposture. If, in the time of Julian, these arts had been practised only by the Pagan priests, for the support of an expiring cause, some indulgence might perhaps be allowed to the interest and habits of the sacerdotal character. But it may appear a subject of surprise and scandal that the philosophers themselves should have contributed to abuse the superstitious credulity of mankind,[22](#) and that the Grecian mysteries should have been supported by the magic or theurgy of the modern Platonists. They arrogantly pretended to control the order of nature, to explore the secrets of futurity, to command the service of the inferior dæmons, to enjoy the view and conversation of the superior gods, and, by disengaging the soul from her material bands, to re-unite that immortal particle with the Infinite and Divine Spirit.

The devout and fearless curiosity of Julian tempted the philosophers with the hopes of an easy conquest; which, from the situation of their young proselyte, might be productive of the most important consequences.[23](#) Julian imbibed the first rudiments of the Platonic doctrines from the mouth of Ædesius, who had fixed at Pergamus his wandering and persecuted school. But, as the declining strength of that venerable sage was unequal to the ardour, the diligence, the rapid conception of his pupil, two of his most learned disciples, Chrysanthus and Eusebius, supplied, at his own desire, the place of their aged master. These philosophers seem to have prepared and distributed their respective parts; and they artfully contrived, by dark hints and affected disputes, to excite the impatient hopes of the *aspirant*, till they delivered him into the hands of their associate Maximus, the boldest and most skilful master of the Theurgic science. By his hands Julian was secretly initiated at Ephesus, in the twentieth year of his age. His residence at Athens confirmed this unnatural alliance of philosophy and superstition. He obtained the privilege of a solemn initiation into the mysteries of Eleusis, which, amidst the general decay of the Grecian worship, still retained some vestiges of their primeval sanctity; and such was the zeal of Julian that he afterwards invited the Eleusinian pontiff to the court of Gaul, for the sole purpose of

consummating, by mystic rites and sacrifices, the great work of his sanctification. As these ceremonies were performed in the depth of caverns, and in the silence of the night, and as the inviolable secret of the mysteries was preserved by the discretion of the initiated, I shall not presume to describe the horrid sounds and fiery apparitions, which were presented to the senses, or the imagination, of the credulous aspirant,[24](#) till the visions of comfort and knowledge broke upon him in a blaze of celestial light.[25](#) In the caverns of Ephesus and Eleusis,[26](#) the mind of Julian was penetrated with sincere, deep, and unalterable enthusiasm; though he might sometimes exhibit the vicissitudes of pious fraud and hypocrisy, which may be observed, or at least suspected, in the characters of the most conscientious fanatics. From that moment he consecrated his life to the service of the gods; and, while the occupations of war, of government, and of study seemed to claim the whole measure of his time, a stated portion of the hours of the night was invariably reserved for the exercise of private devotion. The temperance which adorned the severe manners of the soldier and the philosopher was connected with some strict and frivolous rules of religious abstinence; and it was in honour of Pan or Mercury, of Hecate or Isis, that Julian, on particular days, denied himself the use of some particular food, which might have been offensive to his tutelar deities. By these voluntary fasts, he prepared his senses and his understanding for the frequent and familiar visits with which he was honoured by the celestial powers. Notwithstanding the modest silence of Julian himself, we may learn from his faithful friend, the orator Libanius, that he lived in a perpetual intercourse with the gods and goddesses; that they descended upon earth, to enjoy the conversation of their favourite hero; that they gently interrupted his slumbers, by touching his hand or his hair; that they warned him of every impending danger, and conducted him, by their infallible wisdom, in every action of his life; and that he had acquired such an intimate knowledge of his heavenly guests, as readily to distinguish the voice of Jupiter from that of Minerva, and the form of Apollo from the figure of Hercules.[27](#) These sleeping or waking visions, the ordinary effects of abstinence and fanaticism, would almost degrade the emperor to the level of an Egyptian monk. But the useless lives of Antony or Pachomius were consumed in these vain occupations. Julian could break from the dream of superstition to arm himself for battle; and, after vanquishing in the field the enemies of Rome, he calmly retired into his tent, to dictate the wise and salutary laws of an empire, or to indulge his genius in the elegant pursuits of literature and philosophy.

The important secret of the apostacy of Julian was entrusted to the fidelity of the *initiated*, with whom he was united by the sacred ties of friendship and religion.[28](#) The pleasing rumour was cautiously circulated among the adherents of the ancient worship; and his future greatness became the object of the hopes, the prayers, and the predictions of the Pagans, in every province of the empire. From the zeal and virtues of their royal proselyte, they fondly expected the cure of every evil and the restoration of every blessing; and, instead of disapproving of the ardour of their pious wishes,

Julian ingenuously confessed that he was ambitious to attain a situation in which he might be useful to his country and to his religion. But this religion was viewed with an hostile eye by the successor of Constantine, whose capricious passions alternately saved and threatened the life of Julian. The arts of magic and divination were strictly prohibited under a despotic government which condescended to fear them; and, if the Pagans were reluctantly indulged in the exercise of their superstition, the rank of Julian would have excepted him from the general toleration. The apostate soon became the presumptive heir of the monarchy, and his death could alone have appeased the just apprehensions of the Christians.²⁹ But the young prince, who aspired to the glory of a hero rather than of a martyr, consulted his safety by dissembling his religion; and the easy temper of polytheism permitted him to join in the public worship of a sect which he inwardly despised. Libanius has considered the hypocrisy of his friend as a subject, not of censure, but of praise. “As the statues of the gods,” says that orator, “which have been defiled with filth, are again placed in a magnificent temple; so the beauty of truth was seated in the mind of Julian, after it had been purified from the errors and follies of his education. His sentiments were changed; but, as it would have been dangerous to have avowed his sentiments, his conduct still continued the same. Very different from the ass in Æsop, who disguised himself with a lion’s hide, our lion was obliged to conceal himself under the skin of an ass; and, while he embraced the dictates of reason, to obey the laws of prudence and necessity.”³⁰ The dissimulation of Julian lasted above ten years, from his secret initiation at Ephesus to the beginning of the civil war; when he declared himself at once the implacable enemy of Christ and of Constantius. This state of constraint might contribute to strengthen his devotion; and, as soon as he had satisfied the obligation of assisting, on solemn festivals, at the assemblies of the Christians, Julian returned, with the impatience of a lover, to burn his free and voluntary incense on the domestic chapels of Jupiter and Mercury. But, as every act of dissimulation must be painful to an ingenuous spirit, the profession of Christianity increased the aversion of Julian for a religion which oppressed the freedom of his mind and compelled him to hold a conduct repugnant to the noblest attributes of human nature, sincerity and courage.

The inclination of Julian might prefer the gods of Homer, and of the Scipios, to the new faith which his uncle had established in the Roman empire; and in which he himself had been sanctified by the sacrament of baptism. But, as a philosopher, it was incumbent on him to justify his dissent from Christianity, which was supported by the number of its converts, by the chain of prophecy, the splendour of miracles, and the weight of evidence. The elaborate work,³¹ which he composed amidst the preparations of the Persian war, contained the substance of those arguments which he had long revolved in his mind. Some fragments have been transcribed and preserved by his adversary, the vehement Cyril of Alexandria;³² and they exhibit a very singular mixture of wit and learning, of sophistry and fanaticism. The elegance of the style, and the rank of the author, recommended his writings to the public attention;³³ and in the

impious list of the enemies of Christianity, the celebrated name of Porphyry was effaced by the superior merit or reputation of Julian. The minds of the faithful were either seduced, or scandalised, or alarmed; and the Pagans, who sometimes presumed to engage in the unequal dispute, derived from the popular work of their Imperial missionary an inexhaustible supply of fallacious objections. But in the assiduous prosecution of these theological studies, the emperor of the Romans imbibed the illiberal prejudices and passions of a polemic divine. He contracted an irrevocable obligation to maintain and propagate his religious opinions; and, whilst he secretly applauded the strength and dexterity with which he wielded the weapons of controversy, he was tempted to distrust the sincerity, or to despise the understandings, of his antagonists, who could obstinately resist the force of reason and eloquence.

The Christians, who beheld with horror and indignation the apostacy of Julian, had much more to fear from his power than from his arguments. The Pagans, who were conscious of his fervent zeal, expected, perhaps with impatience, that the flames of persecution should be immediately kindled against the enemies of the gods; and that the ingenious malice of Julian would invent some cruel refinements of death and torture, which had been unknown to the rude and inexperienced fury of his predecessors. But the hopes, as well as the fears, of the religious factions were apparently disappointed by the prudent humanity of a prince³⁴ who was careful of his own fame, of the public peace, and of the rights of mankind. Instructed by history and reflection, Julian was persuaded that, if the diseases of the body may sometimes be cured by salutary violence, neither steel nor fire can eradicate the erroneous opinions of the mind. The reluctant victim may be dragged to the foot of the altar; but the heart still abhors and disclaims the sacrilegious act of the hand. Religious obstinacy is hardened and exasperated by oppression; and, as soon as the persecution subsides, those who have yielded are restored as penitents, and those who have resisted are honoured as saints and martyrs. If Julian adopted the unsuccessful cruelty of Diocletian and his colleagues, he was sensible that he should stain his memory with the name of tyrant, and add new glories to the Catholic church, which had derived strength and increase from the severity of the pagan magistrates. Actuated by these motives, and apprehensive of disturbing the repose of an unsettled reign, Julian surprised the world by an edict which was not unworthy of a statesman or a philosopher. He extended to all the inhabitants of the Roman world the benefits of a free and equal toleration; and the only hardship which he inflicted on the Christians was to deprive them of the power of tormenting their fellow-subjects, whom they stigmatised with the odious titles of idolaters and heretics. The Pagans received a gracious permission, or rather an express order, to open all their temples;³⁵ and they were at once delivered from the oppressive laws and arbitrary vexations which they had sustained under the reign of Constantine and of his sons. At the same time, the bishops and clergy who had been banished by the Arian monarch were recalled from exile and restored to their respective churches; the Donatists, the Novatians, the Macedonians, the Eunomians, and those who, with a more prosperous fortune, adhered

to the doctrine of the council of Nice. Julian, who understood and derided their theological disputes, invited to the palace the leaders of the hostile sects, that he might enjoy the agreeable spectacle of their furious encounters. The clamour of controversy sometimes provoked the emperor to exclaim, "Hear me! the Franks have heard me, and the Alemanni;" but he soon discovered that he was now engaged with more obstinate and implacable enemies; and, though he exerted the powers of oratory to persuade them to live in concord, or at least in peace, he was perfectly satisfied, before he dismissed them from his presence, that he had nothing to dread from the union of the Christians. The impartial Ammianus has ascribed this affected clemency to the desire of fomenting the intestine divisions of the church; and the insidious design of undermining the foundations of Christianity was inseparably connected with the zeal which Julian professed to restore the ancient religion of the empire.[36](#)

As soon as he ascended the throne, he assumed, according to the custom of his predecessors, the character of supreme pontiff; not only as the most honourable title of Imperial greatness, but as a sacred and important office, the duties of which he was resolved to execute with pious diligence. As the business of the state prevented the emperor from joining every day in the public devotion of his subjects, he dedicated a domestic chapel to his tutelar deity the Sun; his gardens were filled with statues and altars of the gods; and each apartment of the palace displayed the appearance of a magnificent temple. Every morning he saluted the parent of light with a sacrifice; the blood of another victim was shed at the moment when the Sun sunk below the horizon; and the Moon, the Stars, and the Genii of the night received their respective and seasonable honours from the indefatigable devotion of Julian. On solemn festivals, he regularly visited the temple of the god or goddess to whom the day was peculiarly consecrated, and endeavoured to excite the religion of the magistrates and people by the example of his own zeal. Instead of maintaining the lofty state of a monarch, distinguished by the splendour of his purple, and encompassed by the golden shields of his guards, Julian solicited, with respectful eagerness, the meanest offices which contributed to the worship of the gods. Amidst the sacred but licentious crowd of priests, of inferior ministers, and of female dancers, who were dedicated to the service of the temple, it was the business of the emperor to bring the wood, to blow the fire, to handle the knife, to slaughter the victim, and, thrusting his bloody hand into the bowels of the expiring animal, to draw forth the heart or liver, and to read, with the consummate skill of an haruspex, the imaginary signs of future events. The wisest of the Pagans censured this extravagant superstition which affected to despise the restraints of prudence and decency. Under the reign of a prince who practised the rigid maxims of economy the expense of religious worship consumed a very large portion of the revenue; a constant supply of the scarcest and most beautiful birds was transported from distant climates, to bleed on the altars of the gods; an hundred oxen were frequently sacrificed by Julian on one and the same day; and it soon became a popular jest that, if he should return with conquest from the Persian war, the breed of horned cattle must infallibly be extinguished. Yet this expense may appear

inconsiderable, when it is compared with the splendid presents which were offered, either by the hand or by order of the emperor, to all the celebrated places of devotion in the Roman world; and with the sums allotted to repair and decorate the ancient temples, which had suffered the silent decay of time or the recent injuries of Christian rapine. Encouraged by the example, the exhortations, the liberality, of their pious sovereign, the cities and families resumed the practice of their neglected ceremonies. “Every part of the world,” exclaims Libanius with devout transport, “displayed the triumph of religion; and the grateful prospect of flaming altars, bleeding victims, the smoke of incense, and a solemn train of priests and prophets, without fear and without danger. The sound of prayer and of music was heard on the tops of the highest mountains; and the same ox afforded a sacrifice for the gods and a supper for their joyous votaries.”[37](#)

But the genius and power of Julian were unequal to the enterprise of restoring a religion which was destitute of theological principles, of moral precepts, and of ecclesiastical discipline; which rapidly hastened to decay and dissolution, and was not susceptible of any solid or consistent reformation. The jurisdiction of the supreme pontiff, more especially after that office had been united with the Imperial dignity, comprehended the whole extent of the Roman empire. Julian named for his vicars, in the several provinces, the priests and philosophers whom he esteemed the best qualified to coöperate in the execution of his great design; and his pastoral letters,[38](#) if we may use that name, still represent a very curious sketch of his wishes and intentions. He directs that in every city the sacerdotal order should be composed, without any distinction of birth or fortune, of those persons who were the most conspicuous for their love of the gods and of men. “If they are guilty,” continues he, “of any scandalous offence, they should be censured or degraded by the superior pontiff; but, as long as they retain their rank, they are entitled to the respect of the magistrates and people. Their humility may be shown in the plainness of their domestic garb; their dignity, in the pomp of holy vestments. When they are summoned in their turn to officiate before the altar, they ought not, during the appointed number of days, to depart from the precincts of the temple; nor should a single day be suffered to elapse without the prayers and the sacrifice, which they are obliged to offer for the prosperity of the state and of individuals. The exercise of their sacred functions requires an immaculate purity, both of mind and body; and, even when they are dismissed from the temple to the occupations of common life, it is incumbent on them to excel in decency and virtue the rest of their fellow-citizens. The priest of the gods should never be seen in theatres or taverns. His conversation should be chaste, his diet temperate, his friends of honourable reputation; and, if he sometimes visits the Forum or the Palace, he should appear only as the advocate of those who have vainly solicited either justice or mercy. His studies should be suited to the sanctity of his profession. Licentious tales, or comedies, or satires, must be banished from his library; which ought solely to consist of historical and philosophical writings; of history which is founded in truth, and of philosophy which is connected with religion. The impious

opinions of the Epicureans and Sceptics deserve his abhorrence and contempt;[39](#) but he should diligently study the systems of Pythagoras, of Plato, and of the Stoics, which unanimously teach that there *are* gods; that the world is governed by their providence; that their goodness is the source of every temporal blessing; and that they have prepared for the human soul a future state of reward or punishment.” The Imperial pontiff inculcates, in the most persuasive language, the duties of benevolence and hospitality; exhorts his inferior clergy to recommend the universal practice of those virtues; promises to assist their indigence from the public treasury; and declares his resolution of establishing hospitals in every city, where the poor should be received without any invidious distinction of country or of religion. Julian beheld with envy the wise and humane regulations of the church; and he very frankly confesses his intention to deprive the Christians of the applause, as well as advantage, which they had acquired by the exclusive practice of charity and beneficence.[40](#) The same spirit of imitation might dispose the emperor to adopt several ecclesiastical institutions, the use and importance of which were approved by the success of his enemies. But, if these imaginary plans of reformation had been realised, the forced and imperfect copy would have been less beneficial to Paganism than honourable to Christianity.[41](#) The Gentiles, who peaceably followed the customs of their ancestors, were rather surprised than pleased with the introduction of foreign manners; and, in the short period of his reign, Julian had frequent occasions to complain of the want of fervour of his own party.[42](#)

The enthusiasm of Julian prompted him to embrace the friends of Jupiter as his personal friends and brethren; and, though he partially overlooked the merit of Christian constancy, he admired and rewarded the noble perseverance of those Gentiles who had preferred the favour of the gods to that of the emperor.[43](#) If they cultivated the literature, as well as the religion, of the Greeks, they acquired an additional claim to the friendship of Julian, who ranked the Muses in the number of his tutelar deities. In the religion which he had adopted, piety and learning were almost synonymous;[44](#) and a crowd of poets, of rhetoricians, and of philosophers hastened to the Imperial court, to occupy the vacant places of the bishops who had seduced the credulity of Constantius. His successor esteemed the ties of common initiation as far more sacred than those of consanguinity: he chose his favourites among the sages who were deeply skilled in the occult sciences of magic and divination; and every impostor who pretended to reveal the secrets of futurity was assured of enjoying the present hour in honour and affluence.[45](#) Among the philosophers, Maximus obtained the most eminent rank in the friendship of his royal disciple, who communicated, with unreserved confidence, his actions, his sentiments, and his religious designs, during the anxious suspense of the civil war.[46](#) As soon as Julian had taken possession of the palace of Constantinople, he despatched an honourable and pressing invitation to Maximus; who then resided at Sardes in Lydia, with Chrysanthius, the associate of his art and studies. The prudent and superstitious Chrysanthius refused to undertake a

journey which showed itself, according to the rules of divination, with the most threatening and malignant aspect: but his companion, whose fanaticism was of a bolder cast, persisted in his interrogations, till he had extorted from the gods a seeming consent to his own wishes and those of the emperor. The journey of Maximus through the cities of Asia displayed the triumph of philosophic vanity; and the magistrates vied with each other in the honourable reception which they prepared for the friend of their sovereign. Julian was pronouncing an oration before the senate, when he was informed of the arrival of Maximus. The emperor immediately interrupted his discourse, advanced to meet him, and, after a tender embrace, conducted him by the hand into the midst of the assembly; where he publicly acknowledged the benefits which he had derived from the instructions of the philosopher. Maximus,[47](#) who soon acquired the confidence, and influenced the councils, of Julian, was insensibly corrupted by the temptations of a court. His dress became more splendid, his demeanour more lofty, and he was exposed, under a succeeding reign, to a disgraceful inquiry into the means by which the disciple of Plato had accumulated, in the short duration of his favour, a very scandalous proportion of wealth. Of the other philosophers and sophists, who were invited to the Imperial residence by the choice of Julian or by the success of Maximus, few were able to preserve their innocence or their reputation.[48](#) The liberal gifts of money, lands, and houses were insufficient to satiate their rapacious avarice; and the indignation of the people was justly excited by the remembrance of their abject poverty and disinterested professions. The penetration of Julian could not always be deceived: but he was unwilling to despise the characters of those men whose talents deserved his esteem; he desired to escape the double reproach of imprudence and inconstancy; and he was apprehensive of degrading, in the eyes of the profane, the honour of letters and of religion.[49](#)

The favour of Julian was almost equally divided between the Pagans, who had firmly adhered to the worship of their ancestors, and the Christians, who prudently embraced the religion of their sovereign. The acquisition of new proselytes[50](#) gratified the ruling passions of his soul, superstition and vanity; and he was heard to declare with the enthusiasm of a missionary that, if he could render each individual richer than Midas, and every city greater than Babylon, he should not esteem himself the benefactor of mankind, unless, at the same time, he could reclaim his subjects from their impious revolt against the immortal gods.[51](#) A prince, who had studied human nature, and who possessed the treasures of the Roman empire, could adapt his arguments, his promises, and his rewards to every order of Christians;[52](#) and the merit of a seasonable conversion was allowed to supply the defects of a candidate, or even to expiate the guilt of a criminal. As the army is the most forcible engine of absolute power, Julian applied himself, with peculiar diligence, to corrupt the religion of his troops, without whose hearty concurrence every measure must be dangerous and unsuccessful; and the natural temper of soldiers made this conquest as easy as it was important. The legions of Gaul devoted themselves to the faith, as well as to the fortunes, of their victorious

leader; and even before the death of Constantius, he had the satisfaction of announcing to his friends that they assisted with fervent devotion, and voracious appetite, at the sacrifices, which were repeatedly offered in his camp, of whole hecatombs of fat oxen.⁵³ The armies of the East, which had been trained under the standard of the cross, and of Constantius, required a more artful and expensive mode of persuasion. On the days of solemn and public festivals, the emperor received the homage, and rewarded the merits, of the troops. His throne of state was encircled with the military ensigns of Rome and the republic; the holy name of Christ was erased from the *Labarum*; and the symbols of war, of majesty, and of Pagan superstition were so dexterously blended, that the faithful subject incurred the guilt of idolatry, when he respectfully saluted the person or image of his sovereign. The soldiers passed successively in review; and each of them, before he received from the hand of Julian a liberal donative, proportioned to his rank and services, was required to cast a few grains of incense into the flame which burnt upon the altar. Some Christian confessors might resist, and others might repent; but the far greater number, allured by the prospect of gold and awed by the presence of the emperor, contracted the criminal engagement; and their future perseverance in the worship of the gods was enforced by every consideration of duty and of interest. By the frequent repetition of these arts, and at the expense of sums which would have purchased the service of half the nations of Scythia, Julian gradually acquired for his troops the imaginary protection of the gods, and for himself the firm and effectual support of the Roman legions.⁵⁴ It is indeed more than probable that the restoration and encouragement of Paganism revealed a multitude of pretended Christians, who, from motives of temporal advantage, had acquiesced in the religion of the former reign; and who afterwards returned, with the same flexibility of conscience, to the faith which was professed by the successors of Julian.

While the devout monarch incessantly laboured to restore and propagate the religion of his ancestors, he embraced the extraordinary design of rebuilding the temple of Jerusalem. In a public epistle⁵⁵ to the nation or community of the Jews, dispersed through the provinces, he pities their misfortunes, condemns their oppressors, praises their constancy, declares himself their gracious protector, and expresses a pious hope that, after his return from the Persian war, he may be permitted to pay his grateful vows to the Almighty in his holy city of Jerusalem. The blind superstition and abject slavery of those unfortunate exiles must excite the contempt of a philosophic emperor; but they deserved the friendship of Julian by their implacable hatred of the Christian name. The barren synagogue abhorred and envied the fecundity of the rebellious church: the power of the Jews was not equal to their malice; but their gravest rabbis approved the private murder of an apostate;⁵⁶ and their seditious clamours had often awakened the indolence of the Pagan magistrates. Under the reign of Constantine, the Jews became the subjects of their revolted children, nor was it long before they experienced the bitterness of domestic tyranny. The civil immunities which had been granted, or confirmed, by Severus were gradually repealed by the Christian princes;

and a rash tumult excited by the Jews of Palestine⁵⁷ seemed to justify the lucrative modes of oppression, which were invented by the bishops and eunuchs of the court of Constantius. The Jewish patriarch, who was still permitted to exercise a precarious jurisdiction, held his residence at Tiberias;⁵⁸ and the neighbouring cities of Palestine were filled with the remains of a people who fondly adhered to the promised land. But the edict of Hadrian was renewed and enforced; and they viewed from afar the walls of the holy city, which were profaned in their eyes by the triumph of the cross and the devotion of the Christians.⁵⁹

In the midst of a rocky and barren country, the walls of Jerusalem⁶⁰ enclosed the two mountains of Sion and Acra, within an oval figure of about three English miles.⁶¹ Towards the south, the upper town and the fortress of David were erected on the lofty ascent of Mount Sion: on the north side, the buildings of the lower town covered the spacious summit of Mount Acra; and a part of the hill, distinguished by the name of Moriah and levelled by human industry, was crowned with the stately temple of the Jewish nation. After the final destruction of the temple, by the arms of Titus and Hadrian, a ploughshare was drawn over the consecrated ground, as a sign of perpetual interdiction. Sion was deserted; and the vacant space of the lower city was filled with the public and private edifices of the Ælian colony, which spread themselves over the adjacent hill of Calvary. The holy places were polluted with monuments of idolatry; and, either from design or accident, a chapel was dedicated to Venus on the spot which had been sanctified by the death and resurrection of Christ.⁶² Almost three hundred years after those stupendous events, the profane chapel of Venus was demolished by the order of Constantine; and the removal of the earth and stones revealed the holy sepulchre to the eyes of mankind. A magnificent church was erected on that mystic ground, by the first Christian emperor; and the effects of his pious munificence were extended to every spot which had been consecrated by the footsteps of patriarchs, of prophets, and of the Son of God.⁶³

The passionate desire of contemplating the original monuments of their redemption attracted to Jerusalem a successive crowd of pilgrims, from the shores of the Atlantic Ocean and the most distant countries of the East;⁶⁴ and their piety was authorised by the example of the empress Helena, who appears to have united the credulity of age with the warm feelings of a recent conversion. Sages and heroes, who have visited the memorable scenes of ancient wisdom or glory, have confessed the inspiration of the genius of the place;⁶⁵ and the Christian who knelt before the holy sepulchre ascribed his lively faith and his fervent devotion to the more immediate influence of the Divine spirit. The zeal, perhaps the avarice, of the clergy of Jerusalem cherished and multiplied these beneficial visits. They fixed, by unquestionable tradition, the scene of each memorable event. They exhibited the instruments which had been used in the passion of Christ; the nails and the lance that had pierced his hands, his feet, and his side; the crown of thorns that was planted on his head, the pillar at which he was

scourged; and, above all, they shewed the cross on which he suffered, and which was dug out of the earth in the reign of those princes who inserted the symbol of Christianity in the banners of the Roman legions.[66](#) Such miracles as seemed necessary to account for its extraordinary preservation and seasonable discovery were gradually propagated without opposition. The custody of the *true cross*, which on Easter Sunday was solemnly exposed to the people, was entrusted to the bishop of Jerusalem; and he alone might gratify the curious devotion of the pilgrims, by the gift of small pieces, which they enchased in gold or gems, and carried away in triumph to their respective countries. But, as this gainful branch of commerce must soon have been annihilated, it was found convenient to suppose that the marvellous wood possessed a secret power of vegetation; and that its substance, though continually diminished, still remained entire and unimpaired.[67](#) It might perhaps have been expected that the influence of the place, and the belief of a perpetual miracle, should have produced some salutary effects on the morals as well as on the faith of the people. Yet the most respectable of the ecclesiastical writers have been obliged to confess, not only that the streets of Jerusalem were filled with the incessant tumult of business and pleasure,[68](#) but that every species of vice, adultery, theft, idolatry, poisoning, murder, was familiar to the inhabitants of the holy city.[69](#) The wealth and preeminence of the church of Jerusalem excited the ambition of Arian, as well as orthodox, candidates; and the virtues of Cyril, who, since his death, has been honoured with the title of Saint, were displayed in the exercise, rather than in the acquisition, of his episcopal dignity.[70](#)

The vain and ambitious mind of Julian might aspire to restore the ancient glory of the temple of Jerusalem.[71](#) As the Christians were firmly persuaded that a sentence of everlasting destruction had been pronounced against the whole fabric of the Mosaic law, the Imperial sophist would have converted the success of his undertaking into a specious argument against the faith of the prophecy and the truth of revelation.[72](#) He was displeased with the spiritual worship of the synagogue; but he approved the institutions of Moses, who had not disdained to adopt many of the rites and ceremonies of Egypt.[73](#) The local and national deity of the Jews was sincerely adored by a polytheist who desired only to multiply the number of the gods;[74](#) and such was the appetite of Julian for bloody sacrifice that his emulation might be excited by the piety of Solomon, who had offered, at the feast of the dedication, twenty-two thousand oxen and one hundred and twenty thousand sheep.[75](#) These considerations might influence his designs; but the prospect of an immediate and important advantage would not suffer the impatient monarch to expect the remote and uncertain event of the Persian war. He resolved to erect, without delay, on the commanding eminence of Moriah, a stately temple which might eclipse the splendour of the church of the Resurrection on the adjacent hill of Calvary; to establish an order of priests, whose interested zeal would detect the arts, and resist the ambition, of their Christian rivals; and to invite a numerous colony of Jews, whose stern fanaticism would be always

prepared to second, and even to anticipate, the hostile measures of the Pagan government. Among the friends of the emperor (if the names of emperor and of friend are not incompatible) the first place was assigned, by Julian himself, to the virtuous and learned Alypius.⁷⁶ The humanity of Alypius was tempered by severe justice and manly fortitude; and, while he exercised his abilities in the civil administration of Britain, he imitated, in his poetical compositions, the harmony and softness of the odes of Sappho. This minister, to whom Julian communicated, without reserve, his most careless levities and his most serious counsels, received an extraordinary commission to restore, in its pristine beauty, the temple of Jerusalem; and the diligence of Alypius required and obtained the strenuous support of the governor of Palestine. At the call of their great deliverer, the Jews, from all the provinces of the empire, assembled on the holy mountain of their fathers; and their insolent triumph alarmed and exasperated the Christian inhabitants of Jerusalem. The desire of rebuilding the temple has, in every age, been the ruling passion of the children of Israel. In this propitious moment the men forgot their avarice, and the women their delicacy; spades and pickaxes of silver were provided by the vanity of the rich, and the rubbish was transported in mantles of silk and purple. Every purse was opened in liberal contributions, every hand claimed a share in the pious labour; and the commands of a great monarch were executed by the enthusiasm of a whole people.⁷⁷

Yet, on this occasion, the joint efforts of power and enthusiasm were unsuccessful; and the ground of the Jewish temple, which is now covered by a Mahometan mosque,⁷⁸ still continued to exhibit the same edifying spectacle of ruin and desolation. Perhaps the absence and death of the emperor, and the new maxims of a Christian reign, might explain the interruption of an arduous work, which was attempted only in the last six months of the life of Julian.⁷⁹ But the Christians entertained a natural and pious expectation that, in this memorable contest, the honour of religion would be vindicated by some signal miracle. An earthquake, a whirlwind, and a fiery eruption, which overturned and scattered the new foundations of the temple, are attested, with some variations, by contemporary and respectable evidence.⁸⁰ This public event is described by Ambrose,⁸¹ bishop of Milan, in an epistle to the emperor Theodosius, which must provoke the severe animadversion of the Jews; by the eloquent Chrysostom,⁸² who might appeal to the memory of the elder part of his congregation at Antioch; and by Gregory Nazianzen,⁸³ who published his account of the miracle before the expiration of the same year. The last of these writers has boldly declared that this preternatural event was not disputed by the infidels; and his assertion, strange as it may seem, is confirmed by the unexceptionable testimony of Ammianus Marcellinus.⁸⁴ The philosophic soldier, who loved the virtues, without adopting the prejudices, of his master, has recorded, in his judicious and candid history of his own times, the extraordinary obstacles which interrupted the restoration of the temple of Jerusalem. “Whilst Alypius, assisted by the governor of the province, urged with vigour and diligence the execution of the work, horrible balls of fire breaking out near

the foundations with frequent and reiterated attacks, rendered the place, from time to time, inaccessible to the scorched and blasted workmen; and, the victorious element continuing in this manner obstinately and resolutely bent, as it were, to drive them to a distance, the undertaking was abandoned.” Such authority should satisfy a believing, and must astonish an incredulous, mind. Yet a philosopher may still require the original evidence of impartial and intelligent spectators. At this important crisis, any singular accident of nature would assume the appearance, and produce the effects, of a real prodigy. This glorious deliverance would be speedily improved and magnified by the pious art of the clergy of Jerusalem and the active credulity of the Christian world; and, at the distance of twenty years, a Roman historian, careless of theological disputes, might adorn his work with the specious and splendid miracle.[85](#)

The restoration of the Jewish temple was secretly connected with the ruin of the Christian church. Julian still continued to maintain the freedom of religious worship, without distinguishing whether this universal toleration proceeded from his justice or his clemency. He affected to pity the unhappy Christians, who were mistaken in the most important object of their lives; but his pity was degraded by contempt, his contempt was embittered by hatred; and the sentiments of Julian were expressed in a style of sarcastic wit, which inflicts a deep and deadly wound whenever it issues from the mouth of a sovereign. As he was sensible that the Christians gloried in the name of their Redeemer, he countenanced, and perhaps enjoined, the use of the less honourable appellation of Galilæans.[86](#) He declared that, by the folly of the Galilæans, whom he describes as a sect of fanatics, contemptible to men, and odious to the gods, the empire had been reduced to the brink of destruction; and he insinuates in a public edict that a frantic patient might sometimes be cured by salutary violence.[87](#) An ungenerous distinction was admitted into the mind and counsels of Julian, that, according to the difference of their religious sentiments, one part of his subjects deserved his favour and friendship, while the other was entitled only to the common benefits that his justice could not refuse to an obedient people.[88](#) According to a principle, pregnant with mischief and oppression, the emperor transferred to the pontiffs of his own religion the management of the liberal allowances from the public revenue which had been granted to the church by the piety of Constantine and his sons. The proud system of clerical honours and immunities, which had been constructed with so much art and labour, was levelled to the ground; the hopes of testamentary donations were intercepted by the rigour of the laws; and the priests of the Christian sect were confounded with the last and most ignominious class of the people. Such of these regulations as appeared necessary to check the ambition and avarice of the ecclesiastics were soon afterwards imitated by the wisdom of an orthodox prince. The peculiar distinctions which policy has bestowed, or superstition has lavished, on the sacerdotal order *must* be confined to those priests who profess the religion of the state. But the will of the legislator was not exempt from prejudice and passion; and it was the object of the insidious policy of Julian to deprive the Christians of all the temporal

honours and advantages which rendered them respectable in the eyes of the world.[89](#)

A just and severe censure has been inflicted on the law which prohibited the Christians from teaching the arts of grammar and rhetoric.[90](#) The motives alleged by the emperor to justify this partial and oppressive measure might command, during his lifetime, the silence of slaves and the applause of flatterers. Julian abuses the ambiguous meaning of a word which might be indifferently applied to the language and the religion of the Greeks: he contemptuously observes that the men who exalt the merit of implicit faith are unfit to claim or to enjoy the advantages of science; and he vainly contends that, if they refuse to adore the gods of Homer and Demosthenes, they ought to content themselves with expounding Luke and Matthew in the churches of the Galilæans.[91](#) In all the cities of the Roman world, the education of the youth was entrusted to masters of grammar and rhetoric; who were elected by the magistrates, maintained at the public expense, and distinguished by many lucrative and honourable privileges. The edict of Julian appears to have included the physicians, and professors of all the liberal arts; and the emperor, who reserved to himself the approbation of the candidates, was authorised by the laws to corrupt, or to punish, the religious constancy of the most learned of the Christians.[92](#) As soon as the resignation of the more obstinate[93](#) teachers had established the unrivalled dominion of the Pagan sophists, Julian invited the rising generation to resort with freedom to the public schools, in a just confidence that their tender minds would receive the impressions of literature and idolatry. If the greatest part of the Christian youth should be deterred by their own scruples, or by those of their parents, from accepting this dangerous mode of instruction, they must at the same time relinquish the benefits of a liberal education. Julian had reason to expect that, in the space of a few years, the church would relapse into its primeval simplicity, and that the theologians, who possessed an adequate share of the learning and eloquence of the age, would be succeeded by a generation of blind and ignorant fanatics, incapable of defending the truth of their own principles or of exposing the various follies of Polytheism.[94](#)

It was undoubtedly the wish and the design of Julian to deprive the Christians of the advantages of wealth, of knowledge, and of power; but the injustice of excluding them from all offices of trust and profit seems to have been the result of his general policy rather than the immediate consequence of any positive law.[95](#) Superior merit might deserve, and obtain, some extraordinary exceptions; but the greater part of the Christian officers were gradually removed from their employments in the state, the army, and the provinces. The hopes of future candidates were extinguished by the declared partiality of a prince who maliciously reminded them that it was unlawful for a Christian to use the sword either of justice or of war; and who studiously guarded the camp and the tribunals with the ensigns of idolatry. The powers of government were entrusted to the Pagans, who professed an ardent zeal for the religion of their ancestors; and, as the choice of the emperor was often directed by the rules of

divination, the favourites whom he preferred as the most agreeable to the gods did not always obtain the approbation of mankind.⁹⁶ Under the administration of their enemies, the Christians had much to suffer, and more to apprehend. The temper of Julian was averse to cruelty; and the care of his reputation, which was exposed to the eyes of the universe, restrained the philosophic monarch from violating the laws of justice and toleration which he himself had so recently established. But the provincial ministers of his authority were placed in a less conspicuous station. In the exercise of arbitrary power, they consulted the wishes, rather than the commands, of their sovereign; and ventured to exercise a secret and vexatious tyranny against the sectaries, on whom they were not permitted to confer the honours of martyrdom. The emperor, who dissembled as long as possible his knowledge of the injustice that was exercised in his name, expressed his real sense of the conduct of his officers by gentle reproofs and substantial rewards.⁹⁷

The most effectual instrument of oppression with which they were armed was the law that obliged the Christians to make full and ample satisfaction for the temples which they had destroyed under the preceding reign. The zeal of the triumphant church had not always expected the sanction of the public authority; and the bishops, who were secure of impunity, had often marched, at the head of their congregations, to attack and demolish the fortresses of the prince of darkness. The consecrated lands, which had increased the patrimony of the sovereign or of the clergy, were clearly defined, and easily restored. But on these lands, and on the ruins of Pagan superstition, the Christians had frequently erected their own religious edifices: and, as it was necessary to remove the church before the temple could be rebuilt, the justice and piety of the emperor were applauded by one party, while the other deplored and execrated his sacrilegious violence.⁹⁸ After the ground was cleared, the restitution of those stately structures which had been levelled with the dust and of the precious ornaments which had been converted to Christian uses swelled into a very large account of damages and debt. The authors of the injury had neither the ability nor the inclination to discharge this accumulated demand: and the impartial wisdom of a legislator would have been displayed in balancing the adverse claims and complaints, by an equitable and temperate arbitration. But the whole empire, and particularly the East, was thrown into confusion by the rash edicts of Julian; and the Pagan magistrates, inflamed by zeal and revenge, abused the rigorous privilege of the Roman law, which substitutes, in the place of his inadequate property, the person of the insolvent debtor. Under the preceding reign, Mark, bishop of Arethusa,⁹⁹ had laboured in the conversion of his people with arms more effectual than those of persuasion.¹⁰⁰ The magistrates required the full value of a temple which had been destroyed by his intolerant zeal: but, as they were satisfied of his poverty, they desired only to bend his inflexible spirit to the promise of the slightest compensation. They apprehended the aged prelate, they inhumanly scourged him, they tore his beard; and his naked body, anointed with honey, was suspended in a net between heaven and earth, and exposed to the stings of

insects and the rays of a Syrian sun.[101](#) From this lofty station, Mark still persisted to glory in his crime and to insult the impotent rage of his persecutors. He was at length rescued from their hands, and dismissed to enjoy the honour of his divine triumph. The Arians celebrated the virtue of their pious confessor; the Catholics ambitiously claimed his alliance;[102](#) and the Pagans, who might be susceptible of shame or remorse, were deterred from the repetition of such unavailing cruelty.[103](#) Julian spared his life: but, if the bishop of Arethusa had saved the infancy of Julian,[104](#) posterity will condemn the ingratitude, instead of praising the clemency, of the emperor.

At the distance of five miles from Antioch, the Macedonian kings of Syria had consecrated to Apollo one of the most elegant places of devotion in the Pagan world.[105](#) A magnificent temple rose in honour of the god of light; and his colossal figure[106](#) almost filled the capacious sanctuary, which was enriched with gold and gems, and adorned by the skill of the Grecian artists. The deity was represented in a bending attitude, with a golden cup in his hand, pouring out a libation on the earth; as if he supplicated the venerable mother to give to his arms the cold and beautiful Daphne: for the spot was ennobled by fiction; and the fancy of the Syrian poets had transported the amorous tale from the banks of the Peneus to those of the Orontes. The ancient rites of Greece were imitated by the royal colony of Antioch. A stream of prophecy, which rivalled the truth and reputation of the Delphic oracle, flowed from the *Castalian* fountain of Daphne.[107](#) In the adjacent fields a stadium was built by a special privilege,[108](#) which had been purchased from Elis; the Olympic games were celebrated at the expense of the city; and a revenue of thirty thousand pounds sterling was annually applied to the public pleasures.[109](#) The perpetual resort of pilgrims and spectators insensibly formed, in the neighbourhood of the temple, the stately and populous village of Daphne, which emulated the splendour, without acquiring the title, of a provincial city. The temple and the village were deeply bosomed in a thick grove of laurels and cypresses, which reached as far as a circumference of ten miles, and formed in the most sultry summers a cool and impenetrable shade. A thousand streams of the purest water, issuing from every hill, preserved the verdure of the earth and the temperature of the air; the senses were gratified with harmonious sounds and aromatic odours; and the peaceful grove was consecrated to health and joy, to luxury and love. The vigorous youth pursued, like Apollo, the object of his desires; and the blushing maid was warned, by the fate of Daphne, to shun the folly of unseasonable coyness. The soldier and the philosopher wisely avoided the temptation of this sensual paradise;[110](#) where pleasure, assuming the character of religion, imperceptibly dissolved the firmness of manly virtue. But the groves of Daphne continued for many ages to enjoy the veneration of natives and strangers; the privileges of the holy ground were enlarged by the munificence of succeeding emperors; and every generation added new ornaments to the splendour of the temple.[111](#)

When Julian, on the day of the annual festival, hastened to adore the Apollo of

Daphne, his devotion was raised to the highest pitch of eagerness and impatience. His lively imagination anticipated the grateful pomp of victims, of libations, and of incense; a long procession of youths and virgins, clothed in white robes, the symbol of their innocence; and the tumultuous concourse of an innumerable people. But the zeal of Antioch was diverted, since the reign of Christianity, into a different channel. Instead of hecatombs of fat oxen sacrificed by the tribes of a wealthy city to their tutelar deity, the emperor complains that he found only a single goose, provided at the expense of a priest, the pale and solitary inhabitant of this decayed temple.¹¹² The altar was deserted, the oracle had been reduced to silence, and the holy ground was profaned by the introduction of Christian and funereal rites. After Babylas¹¹³ (a bishop of Antioch, who died in prison in the persecution of Decius) had rested near a century in his grave, his body, by the order of the Cæsar Gallus, was transported into the midst of the grove of Daphne. A magnificent church was erected over his remains; a portion of the sacred lands was usurped for the maintenance of the clergy, and for the burial of the Christians of Antioch who were ambitious of lying at the feet of their bishop; and the priests of Apollo retired, with their affrighted and indignant votaries. As soon as another revolution seemed to restore the fortune of Paganism, the church of St. Babylas was demolished, and new buildings were added to the mouldering edifice which had been raised by the piety of Syrian kings. But the first and most serious care of Julian was to deliver his oppressed deity from the odious presence of the dead and living Christians who had so effectually suppressed the voice of fraud or enthusiasm.¹¹⁴ The scene of infection was purified, according to the forms of ancient rituals; the bodies were decently removed; and the ministers of the church were permitted to convey the remains of St. Babylas to their former habitation within the walls of Antioch. The modest behaviour which might have assuaged the jealousy of an hostile government was neglected on this occasion by the zeal of the Christians. The lofty car that transported the relics of Babylas was followed, and accompanied, and received, by an innumerable multitude; who chanted, with thundering acclamations, the Psalms of David the most expressive of their contempt for idols and idolaters. The return of the saint was a triumph; and the triumph was an insult on the religion of the emperor, who exerted his pride to dissemble his resentment. During the night which terminated this indiscreet procession, the temple of Daphne was in flames; the statue of Apollo was consumed; and the walls of the edifice were left a naked and awful monument of ruin. The Christians of Antioch asserted, with religious confidence, that the powerful intercession of St. Babylas had pointed the lightnings of heaven against the devoted roof: but, as Julian was reduced to the alternative of believing either a crime or a miracle, he chose, without hesitation, without evidence, but with some colour of probability, to impute the fire of Daphne to the revenge of the Galilæans.¹¹⁵ Their offence, had it been sufficiently proved, might have justified the retaliation which was immediately executed by the order of Julian, of shutting the doors, and confiscating the wealth, of the cathedral of Antioch. To discover the criminals who were guilty of the tumult, of the fire, or of secreting the riches of the church, several

ecclesiastics were tortured;[116](#) and a presbyter, of the name of Theodoret, was beheaded by the sentence of the Count of the East. But this hasty act was blamed by the emperor; who lamented, with real or affected concern, that the imprudent zeal of his ministers would tarnish his reign with the disgrace of persecution.[117](#)

The zeal of the ministers of Julian was instantly checked by the frown of their sovereign; but, when the father of his country declares himself the leader of a faction, the licence of popular fury cannot easily be restrained nor consistently punished. Julian, in a public composition, applauds the devotion and loyalty of the holy cities of Syria, whose pious inhabitants had destroyed, at the first signal, the sepulchres of the Galilæans; and faintly complains that they had revenged the injuries of the gods with less moderation than he should have recommended.[118](#) This imperfect and reluctant confession may appear to confirm the ecclesiastical narratives: that in the cities of Gaza, Ascalon, Cæsarea, Heliopolis, &c., the Pagans abused, without prudence or remorse, the moment of their prosperity; that the unhappy objects of their cruelty were released from torture only by death; that, as their mangled bodies were dragged through the streets, they were pierced (such was the universal rage) by the spits of cooks and the distaffs of enraged women; and that the entrails of Christian priests and virgins, after they had been tasted by those bloody fanatics, were mixed with barley, and contemptuously thrown to the unclean animals of the city.[119](#) Such scenes of religious madness exhibit the most contemptible and odious picture of human nature; but the massacre of Alexandria attracts still more attention, from the certainty of the fact, the rank of the victims, and the splendour of the capital of Egypt.

George,[120](#) from his parents or his education surnamed the Cappadocian, was born at Epiphania in Cilicia, in a fuller's shop. From this obscure and servile origin he raised himself by the talents of a parasite: and the patrons, whom he assiduously flattered, procured for their worthless dependent a lucrative commission, or contract, to supply the army with bacon. His employment was mean; he rendered it infamous. He accumulated wealth by the basest arts of fraud and corruption; but his malversations were so notorious that George was compelled to escape from the pursuits of justice. After this disgrace, in which he appears to have saved his fortune at the expense of his honour, he embraced, with real or affected zeal, the profession of Arianism. From the love, or the ostentation, of learning, he collected a valuable library of history, rhetoric, philosophy, and theology;[121](#) and the choice of the prevailing faction promoted George of Cappadocia to the throne of Athanasius. The entrance of the new archbishop was that of a Barbarian conqueror; and each moment of his reign was polluted by cruelty and avarice. The Catholics of Alexandria and Egypt were abandoned to a tyrant, qualified, by nature and education, to exercise the office of persecution; but he oppressed with an impartial hand the various inhabitants of his extensive diocese. The primate of Egypt assumed the pomp and insolence of his lofty station; but he still betrayed the vices of his base and servile extraction. The merchants of Alexandria

were impoverished by the unjust, and almost universal, monopoly, which he acquired, of nitre, salt, paper, funerals, &c.; and the spiritual father of a great people condescended to practice the vile and pernicious arts of an informer. The Alexandrians could never forget nor forgive the tax which he suggested on all the houses of the city; under an obsolete claim that the royal founder had conveyed to his successors, the Ptolemies and the Cæsars, the perpetual property of the soil. The Pagans, who had been flattered with the hopes of freedom and toleration, excited his devout avarice; and the rich temples of Alexandria were either pillaged or insulted by the haughty prelate, who exclaimed, in a loud and threatening tone, “How long will these sepulchres be permitted to stand?” Under the reign of Constantius, he was expelled by the fury, or rather by the justice, of the people; and it was not without a violent struggle that the civil and military powers of the state could restore his authority and gratify his revenge. The messenger who proclaimed at Alexandria the accession of Julian announced the downfall of the archbishop. George, with two of his obsequious ministers, Count Diodorus, and Dracontius, master of the mint, were ignominiously dragged in chains to the public prison. At the end of twenty-four days, the prison was forced open by the rage of a superstitious multitude, impatient of the tedious forms of judicial proceedings. The enemies of gods and men expired under their cruel insults; the lifeless bodies of the archbishop and his associates were carried in triumph through the streets on the back of a camel; and the inactivity of the Athanasian party¹²² was esteemed a shining example of evangelical patience. The remains of these guilty wretches were thrown into the sea; and the popular leaders of the tumult declared their resolution to disappoint the devotion of the Christians, and to intercept the future honours of these *martyrs*, who had been punished, like their predecessors, by the enemies of their religion.¹²³ The fears of the Pagans were just, and their precautions ineffectual. The meritorious death of the archbishop obliterated the memory of his life. The rival of Athanasius was dear and sacred to the Arians, and the seeming conversion of those sectaries introduced his worship into the bosom of the Catholic church.¹²⁴ The odious stranger, disguising every circumstance of time and place, assumed the mask of a martyr, a saint, and a Christian hero;¹²⁵ and the infamous George of Cappadocia has been transformed¹²⁶ into the renowned St. George of England, the patron of arms, of chivalry, and of the garter.¹²⁷

About the same time that Julian was informed of the tumult of Alexandria, he received intelligence from Edessa that the proud and wealthy faction of the Arians had insulted the weakness of the Valentinians, and committed such disorders as ought not to be suffered with impunity in a well-regulated state. Without expecting the slow forms of justice, the exasperated prince directed his mandate to the magistrates of Edessa,¹²⁸ by which he confiscated the whole property of the church: the money was distributed among the soldiers; the lands were added to the domain; and this act of oppression was aggravated by the most ungenerous irony. “I shew myself,” says Julian, “the true friend of the Galilæans. Their *admirable* law has promised the kingdom of heaven to

the poor; and they will advance with more diligence in the paths of virtue and salvation, when they are relieved by my assistance from the load of temporal possessions. Take care,” pursued the monarch, in a more serious tone, “take care how you provoke my patience and humanity. If these disorders continue, I will revenge on the magistrates the crimes of the people; and you will have reason to dread, not only confiscation and exile, but fire and the sword.” The tumults of Alexandria were doubtless of a more bloody and dangerous nature: but a Christian bishop had fallen by the hands of the Pagans; and the public epistle of Julian affords a very lively proof of the partial spirit of his administration. His reproaches to the citizens of Alexandria are mingled with expressions of esteem and tenderness; and he laments that on this occasion they should have departed from the gentle and generous manners which attested their Grecian extraction. He gravely censures the offence which they had committed against the laws of justice and humanity; but he recapitulates, with visible complacency, the intolerable provocations which they had so long endured from the impious tyranny of George of Cappadocia. Julian admits the principle that a wise and vigorous government should chastise the insolence of the people: yet, in consideration of their founder Alexander and of Serapis their tutelar deity, he grants a free and gracious pardon to the guilty city, for which he again feels the affection of a brother.[129](#)

After the tumult of Alexandria had subsided, Athanasius, amidst the public acclamations, seated himself on the throne from whence his unworthy competitor had been precipitated; and, as the zeal of the archbishop was tempered with discretion, the exercise of his authority tended not to inflame, but to reconcile, the minds of the people. His pastoral labours were not confined to the narrow limits of Egypt. The state of the Christian world was present to his active and capacious mind; and the age, the merit, the reputation of Athanasius enabled him to assume, in a moment of danger, the office of Ecclesiastical Dictator.[130](#) Three years were not yet elapsed since the majority of the bishops of the West had ignorantly, or reluctantly, subscribed the Confession of Rimini. They repented, they believed, but they dreaded the unseasonable rigour of their orthodox brethren, and, if their pride was stronger than their faith, they might throw themselves into the arms of the Arians, to escape the indignity of a public penance, which must degrade them to the condition of obscure laymen. At the same time, the domestic differences concerning the union and distinction of the divine persons were agitated with some heat among the Catholic doctors; and the progress of this metaphysical controversy seemed to threaten a public and lasting division of the Greek and Latin churches. By the wisdom of a select synod, to which the name and presence of Athanasius gave the authority of a general council, the bishops who had unwarily deviated into error were admitted to the communion of the church, on the easy condition of subscribing the Nicene Creed; without any formal acknowledgment of their past fault or any minute definition of their scholastic opinions. The advice of the primate of Egypt had already prepared the clergy of Gaul and Spain, of Italy and Greece, for the reception of this salutary measure; and,

notwithstanding the opposition of some ardent spirits,[131](#) the fear of the common enemy promoted the peace and harmony of the Christians.[132](#)

The skill and diligence of the primate of Egypt had improved the season of tranquillity, before it was interrupted by the hostile edicts of the emperor.[133](#) Julian, who despised the Christians, honoured Athanasius with his sincere and peculiar hatred. For his sake alone, he introduced an arbitrary distinction, repugnant, at least, to the spirit of his former declarations. He maintained that the Galilæans whom he had recalled from exile were not restored, by that general indulgence, to the possession of their respective churches: and he expressed his astonishment that a criminal, who had been repeatedly condemned by the judgment of the emperors, should dare to insult the majesty of the laws, and insolently usurp the archiepiscopal throne of Alexandria, without expecting the orders of his sovereign. As a punishment for the imaginary offence, he again banished Athanasius from the city: and he was pleased to suppose that this act of justice would be highly agreeable to his pious subjects. The pressing solicitations of the people soon convinced him that the majority of the Alexandrians were Christians; and that the greatest part of the Christians were firmly attached to the cause of their oppressed primate. But the knowledge of their sentiments, instead of persuading him to recall his decree, provoked him to extend to all Egypt the term of the exile of Athanasius. The zeal of the multitude rendered Julian still more inexorable: he was alarmed by the danger of leaving at the head of a tumultuous city a daring and popular leader: and the language of his resentment discovers the opinion which he entertained of the courage and abilities of Athanasius. The execution of the sentence was still delayed, by the caution or negligence of Ecdicius, prefect of Egypt, who was at length awakened from his lethargy by a severe reprimand. “Though you neglect,” says Julian, “to write to me on any other subject, at least it is your duty to inform me of your conduct towards Athanasius, the enemy of the gods. My intentions have been long since communicated to you. I swear by the great Serapis that unless, on the calends of December, Athanasius has departed from Alexandria, nay from Egypt, the officers of your government shall pay a fine of one hundred pounds of gold. You know my temper: I am slow to condemn, but I am still slower to forgive.” This epistle was enforced by a short postscript, written with the emperor’s own hand. “The contempt that is shewn for all the gods fills me with grief and indignation. There is nothing that I should see, nothing that I should hear with more pleasure than the expulsion of Athanasius from all Egypt. The abominable wretch! Under my reign, the baptism of several Grecian ladies of the highest rank has been the effect of his persecutions.”[134](#) The death of Athanasius was not *expressly* commanded; but the prefect of Egypt understood that it was safer for him to exceed, than to neglect, the orders of an irritated master. The archbishop prudently retired to the monasteries of the Desert: eluded, with his usual dexterity, the snares of the enemy; and lived to triumph over the ashes of a prince who, in words of formidable import, had declared his wish that the whole venom of the Galilæan school were contained in the single person of

I have endeavoured faithfully to represent the artful system by which Julian proposed to obtain the effects, without incurring the guilt, or reproach, of persecution. But, if the deadly spirit of fanaticism perverted the heart and understanding of a virtuous prince, it must, at the same time, be confessed, that the *real* sufferings of the Christians were inflamed and magnified by human passions and religious enthusiasm. The meekness and resignation which had distinguished the primitive disciples of the gospel was the object of the applause rather than of the imitation of their successors. The Christians, who had now possessed about forty years the civil and ecclesiastical government of the empire, had contracted the insolent vices of prosperity,[136](#) and the habit of believing that the saints alone were entitled to reign over the earth. As soon as the enmity of Julian deprived the clergy of the privileges which had been conferred by the favour of Constantine, they complained of the most cruel oppression; and the free toleration of idolaters and heretics was a subject of grief and scandal to the orthodox party.[137](#) The acts of violence, which were no longer countenanced by the magistrates, were still committed by the zeal of the people. At Pessinus, the altar of Cybele was overturned almost in the presence of the emperor; and in the city of Cæsarea in Cappadocia, the temple of Fortune, the sole place of worship which had been left to the Pagans, was destroyed by the rage of a popular tumult. On these occasions, a prince who felt for the honour of the gods was not disposed to interrupt the course of justice; and his mind was still more deeply exasperated, when he found that the fanatics, who had deserved and suffered the punishment of incendiaries, were rewarded with the honours of martyrdom.[138](#) The Christian subjects of Julian were assured of the hostile designs of their sovereign; and, to their jealous apprehension, every circumstance of his government might afford some grounds of discontent and suspicion. In the ordinary administration of the laws, the Christians, who formed so large a part of the people, must frequently be condemned: but their indulgent brethren, without examining the merits of the cause, presumed their innocence, allowed their claims, and imputed the severity of their judge to the partial malice of religious persecution.[139](#) These present hardships, intolerable as they might appear, were represented as a slight prelude of the impending calamities. The Christians considered Julian as a cruel and crafty tyrant who suspended the execution of his revenge, till he should return victorious from the Persian war. They expected that, as soon as he had triumphed over the foreign enemies of Rome, he would lay aside the irksome mask of dissimulation; that the amphitheatres would stream with the blood of hermits and bishops; and that the Christians, who still persevered in the profession of the faith, would be deprived of the common benefits of nature and society.[140](#) Every calumny[141](#) that could wound the reputation of the apostate was credulously embraced by the fears and hatred of his adversaries; and their indiscreet clamours provoked the temper of a sovereign whom it was their duty to respect and their interest to flatter. They still protested that prayers and tears were their only weapons against the impious

tyrant, whose head they devoted to the justice of offended Heaven. But they insinuated with sullen resolution, that their submission was no longer the effect of weakness; and that, in the imperfect state of human virtue, the patience which is founded on principle may be exhausted by persecution. It is impossible to determine how far the zeal of Julian would have prevailed over his good sense and humanity: but, if we seriously reflect on the strength and spirit of the church, we shall be convinced that, before the emperor could have extinguished the religion of Christ, he must have involved his country in the horrors of a civil war.[142](#)

CHAPTER XXIV

Residence of Julian at Antioch — His successful Expedition against the Persians — Passage of the Tigris — The Retreat and Death of Julian — Election of Jovian — He saves the Roman Army by a disgraceful Treaty

The philosophical fable which Julian composed under the name of the Cæsars[1](#) is one of the most agreeable and instructive productions of ancient wit.[2](#) During the freedom and equality of the days of the Saturnalia, Romulus prepared a feast for the deities of Olympus, who had adopted him as a worthy associate, and for the Roman princes, who had reigned over his martial people and the vanquished nations of the earth. The immortals were placed in just order on their thrones of state, and the table of the Cæsars was spread below the Moon, in the upper region of the air. The tyrants, who would have disgraced the society of gods and men, were thrown headlong, by the inexorable Nemesis, into the Tartarean abyss. The rest of the Cæsars successively advanced to their seats: and, as they passed, the vices, the defects, the blemishes of their respective characters were maliciously noticed by old Silenus, a laughing moralist, who disguised the wisdom of a philosopher under the mask of a Bacchanal.[3](#) As soon as the feast was ended, the voice of Mercury proclaimed the will of Jupiter, that a celestial crown should be the reward of superior merit. Julius Cæsar, Augustus Trajan, and Marcus Antoninus were selected as the most illustrious candidates; the effeminate Constantine[4](#) was not excluded from this honourable competition, and the great Alexander was invited to dispute the prize of glory with the Roman heroes. Each of the candidates was allowed to display the merit of his own exploits; but, in the judgment of the gods, the modest silence of Marcus pleaded more powerfully than the elaborate orations of his haughty rivals. When the judges of this awful contest proceeded to examine the heart and to scrutinise the springs of action, the superiority of the Imperial Stoic appeared still more decisive and conspicuous.[5](#) Alexander and Cæsar, Augustus, Trajan, and Constantine, acknowledged with a blush that fame or power or pleasure had been the important object of *their* labours: but the gods themselves beheld, with reverence and love, a virtuous mortal, who had practised on

the throne the lessons of philosophy; and who, in a state of human imperfection, had aspired to imitate the moral attributes of the Deity. The value of this agreeable composition (the Cæsars of Julian) is enhanced by the rank of the author. A prince, who delineates with freedom the vices and virtues of his predecessors, subscribes, in every line, the censure or approbation of his own conduct.

In the cool moments of reflection, Julian preferred the useful and benevolent virtues of Antoninus: but his ambitious spirit was inflamed by the glory of Alexander; and he solicited, with equal ardour, the esteem of the wise and the applause of the multitude. In the season of life, when the powers of the mind and body enjoy the most active vigour, the emperor, who was instructed by the experience, and animated by the success, of the German war, resolved to signalise his reign by some more splendid and memorable achievement. The ambassadors of the East, from the continent of India and the isle of Ceylon,⁶ had respectfully saluted the Roman purple.⁷ The nations of the West esteemed and dreaded the personal virtues of Julian, both in peace and war. He despised the trophies of a Gothic victory⁸ and was satisfied that the rapacious Barbarians of the Danube would be restrained from any future violation of the faith of treaties by the terror of his name and the additional fortifications with which he strengthened the Thracian and Illyrian frontiers. The successor of Cyrus and Artaxerxes was the only rival whom he deemed worthy of his arms; and he resolved, by the final conquest of Persia, to chastise the haughty nation which had so long resisted and insulted the majesty of Rome.⁹ As soon as the Persian monarch was informed that the throne of Constantius was filled by a prince of a very different character, he condescended to make some artful, or perhaps sincere, overtures towards a negotiation of peace. But the pride of Sapor was astonished by the firmness of Julian; who sternly declared that he would never consent to hold a peaceful conference among the flames and ruins of the cities of Mesopotamia; and who added, with a smile of contempt, that it was needless to treat by ambassadors, as he himself had determined to visit speedily the court of Persia. The impatience of the emperor urged the diligence of the military preparations. The generals were named; a formidable army was destined for this important service; and Julian, marching from Constantinople through the provinces of Asia Minor, arrived at Antioch about eight months after the death of his predecessor. His ardent desire to march into the heart of Persia was checked by the indispensable duty of regulating the state of the empire; by his zeal to revive the worship of the gods; and by the advice of his wisest friends, who represented the necessity of allowing the salutary interval of winter quarters, to restore the exhausted strength of the legions of Gaul and the discipline and spirit of the Eastern troops. Julian was persuaded to fix, till the ensuing spring, his residence at Antioch, among a people maliciously disposed to deride the haste, and to censure the delays, of their sovereign.¹⁰

If Julian had flattered himself that his personal connection with the capital of the East

would be productive of mutual satisfaction to the prince and people, he made a very false estimate of his own character, and of the manners of Antioch.¹¹ The warmth of the climate disposed the natives to the most intemperate enjoyment of tranquillity and opulence; and the lively licentiousness of the Greeks was blended with the hereditary softness of the Syrians. Fashion was the only law, pleasure the only pursuit, and the splendour of dress and furniture was the only distinction of the citizens of Antioch. The arts of luxury were honoured; the serious and manly virtues were the subject of ridicule; and the contempt for female modesty and reverent^{11a} age announced the universal corruption of the capital of the East. The love of spectacles was the taste, or rather passion, of the Syrians: the most skilful artists were procured from the adjacent cities;¹² a considerable share of the revenue was devoted to the public amusements; and the magnificence of the games of the theatre and circus was considered as the happiness, and as the glory, of Antioch. The rustic manners of a prince who disdained such glory, and was insensible of such happiness, soon disgusted the delicacy of his subjects; and the effeminate Orientals could neither imitate nor admire the severe simplicity which Julian always maintained and sometimes affected. The days of festivity, consecrated by ancient custom to the honour of the gods, were the only occasions in which Julian relaxed his philosophic severity; and those festivals were the only days in which the Syrians of Antioch could reject the allurements of pleasure. The majority of the people supported the glory of the Christian name, which had been first invented by their ancestors;¹³ they contented themselves with disobeying the moral precepts, but they were scrupulously attached to the speculative doctrines, of their religion. The church of Antioch was distracted by heresy and schism; but the Arians and the Athanasians, the followers of Meletius and those of Paulinus,¹⁴ were actuated by the same pious hatred of their common adversary.

The strongest prejudice was entertained against the character of an apostate, the enemy and successor of a prince who had engaged the affections of a very numerous sect; and the removal of St. Babylas excited an implacable opposition to the person of Julian. His subjects complained, with superstitious indignation, that famine had pursued the emperor's steps from Constantinople to Antioch; and the discontent of a hungry people was exasperated by the injudicious attempt to relieve their distress. The inclemency of the season had affected the harvests of Syria; and the price of bread,¹⁵ in the markets of Antioch, had naturally risen in proportion to the scarcity of corn. But the fair and reasonable proportion was soon violated by the rapacious arts of monopoly. In this unequal contest, in which the produce of the land is claimed by one party as his exclusive property; is used by another as a lucrative object of trade; and is required by a third for the daily and necessary support of life; all the profits of the intermediate agents are accumulated on the head of the defenceless consumers. The hardships of their situation were exaggerated and increased by their own impatience and anxiety; and the apprehension of a scarcity gradually produced the appearances of a famine. When the luxurious citizens of Antioch complained of the high price of poultry and

fish, Julian publicly declared that a frugal city ought to be satisfied with a regular supply of wine, oil, and bread; but he acknowledged that it was the duty of a sovereign to provide for the subsistence of his people. With this salutary view, the emperor ventured on a very dangerous and doubtful step, of fixing, by legal authority, the value of corn. He enacted that, in a time of scarcity, it should be sold at a price which had seldom been known in the most plentiful years; and, that his own example might strengthen his laws, he sent into the market four hundred and twenty-two thousand *modii*, or measures, which were drawn by his order from the granaries of Hierapolis, of Chalcis, and even of Egypt. The consequences might have been foreseen, and were soon felt. The Imperial wheat was purchased by the rich merchants; the proprietors of land, or of corn, withheld from the city the accustomed supply; and the small quantities that appeared in the market were secretly sold at an advanced and illegal price. Julian still continued to applaud his own policy, treated the complaints of the people as a vain and ungrateful murmur, and convinced Antioch that he had inherited the obstinacy, though not the cruelty, of his brother Gallus.¹⁶ The remonstrances of the municipal senate served only to exasperate his inflexible mind. He was persuaded, perhaps with truth, that the senators of Antioch who possessed lands, or were concerned in trade, had themselves contributed to the calamities of their country; and he imputed the disrespectful boldness which they assumed to the sense, not of public duty, but of private interest. The whole body, consisting of two hundred of the most noble and wealthy citizens, were sent under a guard from the palace to the prison; and, though they were permitted, before the close of evening, to return to their respective houses,¹⁷ the emperor himself could not obtain the forgiveness which he had so easily granted. The same grievances were still the subject of the same complaints, which were industriously circulated by the wit and levity of the Syrian Greeks. During the licentious days of the Saturnalia, the streets of the city resounded with insolent songs, which derided the laws, the religion, the personal conduct, and even the *beard* of the emperor; and the spirit of Antioch was manifested by the connivance of the magistrates and the applause of the multitude.¹⁸ The disciple of Socrates was too deeply affected by these popular insults; but the monarch, endowed with quick sensibility, and possessed of absolute power, refused his passions the gratification of revenge. A tyrant might have proscribed, without distinction, the lives and fortunes of the citizens of Antioch; and the unwarlike Syrians must have patiently submitted to the lust, the rapaciousness, and the cruelty of the faithful legions of Gaul. A milder sentence might have deprived the capital of the East of its honours and privileges; and the courtiers, perhaps the subjects, of Julian would have applauded an act of justice which asserted the dignity of the supreme magistrate of the republic.¹⁹ But, instead of abusing, or exerting, the authority of the state to revenge his personal injuries, Julian contented himself with an inoffensive mode of retaliation, which it would be in the power of few princes to employ. He had been insulted by satires and libels; in his turn he composed, under the title of the *Enemy of the Beard*, an ironical confession of his own faults, and a severe satire of the licentious and effeminate manners of Antioch. This Imperial reply was publicly exposed before the gates of the palace; and the

Misopogon²⁰ still remains a singular monument of the resentment, the wit, the humanity, and the indiscretion of Julian. Though he affected to laugh, he could not forgive.²¹ His contempt was expressed, and his revenge might be gratified, by the nomination of a governor²² worthy only of such subjects: and the emperor, for ever renouncing the ungrateful city, proclaimed his resolution to pass the ensuing winter at Tarsus in Cilicia.²³

Yet Antioch possessed one citizen, whose genius and virtues might atone, in the opinion of Julian, for the vice and folly of his country. The sophist Libanius was born in the capital of the East; he publicly professed the arts of rhetoric and declamation at Nice, Nicomedia, Constantinople, Athens, and, during the remainder of his life, at Antioch. His school was assiduously frequented by the Grecian youth; his disciples, who sometimes exceeded the number of eighty, celebrated their incomparable master; and the jealousy of his rivals, who persecuted him from one city to another, confirmed the favourable opinion which Libanius ostentatiously displayed of his superior merit. The preceptors of Julian had extorted a rash but solemn assurance that he would never attend the lectures of their adversary: the curiosity of the royal youth was checked and inflamed: he secretly procured the writings of this dangerous sophist, and gradually surpassed, in the perfect imitation of his style, the most laborious of his domestic pupils.²⁴ When Julian ascended the throne, he declared his impatience to embrace and reward the Syrian sophist, who had preserved, in a degenerate age, the Grecian purity of taste, of manners and of religion. The emperor's prepossession was increased and justified by the discreet pride of his favourite. Instead of pressing, with the foremost of the crowd, into the palace of Constantinople, Libanius calmly expected his arrival at Antioch; withdrew from court on the first symptoms of coldness and indifference; required a formal invitation for each visit; and taught his sovereign an important lesson, that he might command the obedience of a subject, but that he must deserve the attachment of a friend. The sophists of every age, despising, or affecting to despise, the accidental distinctions of birth and fortune,²⁵ reserve their esteem for the superior qualities of the mind, with which they themselves are so plentifully endowed. Julian might disdain the acclamations of a venal court, who adored the Imperial purple; but he was deeply flattered by the praise, the admonition, the freedom, and the envy of an independent philosopher, who refused his favours, loved his person, celebrated his fame, and protected his memory. The voluminous writings of Libanius still exist: for the most part, they are the vain and idle compositions of an orator, who cultivated the science of words; the productions of a recluse student, whose mind, regardless of his contemporaries, was incessantly fixed on the Trojan war and the Athenian commonwealth. Yet the sophist of Antioch sometimes descended from this imaginary elevation; he entertained a various and elaborate correspondence;²⁶ he praised the virtues of his own times; he boldly arraigned the abuses of public and private life; and he eloquently pleaded the cause of Antioch against the just resentment of Julian and Theodosius. It is the common calamity of old age,²⁷ to lose whatever might have

rendered it desirable; but Libanius experienced the peculiar misfortune of surviving the religion and the sciences to which he had consecrated his genius. The friend of Julian was an indignant spectator of the triumph of Christianity; and his bigotry, which darkened the prospect of the visible world, did not inspire Libanius with any lively hopes of celestial glory and happiness.[28](#)

The martial impatience of Julian urged him to take the field in the beginning of the spring; and he dismissed, with contempt and reproach, the senate of Antioch, who accompanied the emperor beyond the limits of their own territory, to which he was resolved never to return. After a laborious march of two days,[29](#) he halted on the third at Berœa, or Aleppo, where he had the mortification of finding a senate almost entirely Christian; who received with cold and formal demonstrations of respect the eloquent sermon of the apostle of Paganism. The son of one of the most illustrious citizens of Berœa, who had embraced, either from interest or conscience, the religion of the emperor, was disinherited by his angry parent. The father and the son were invited to the Imperial table. Julian, placing himself between them, attempted, without success, to inculcate the lesson and example of toleration; supported, with affected calmness, the indiscreet zeal of the aged Christian, who seemed to forget the sentiments of nature and the duty of a subject; and at length turning towards the afflicted youth, “Since you have lost a father,” said he, “for my sake, it is incumbent on me to supply his place.”[30](#) The emperor was received in a manner much more agreeable to his wishes at Batnæ,[31](#) a small town pleasantly seated in a grove of cypresses, about twenty miles from the city of Hierapolis. The solemn rites of sacrifice were decently prepared by the inhabitants of Batnæ, who seemed attached to the worship of their tutelar deities, Apollo and Jupiter; but the serious piety of Julian was offended by the tumult of their applause; and he too clearly discerned that the smoke which arose from their altars was the incense of flattery rather than of devotion. The ancient and magnificent temple, which had sanctified, for so many ages, the city of Hierapolis,[32](#) no longer subsisted; and the consecrated wealth, which afforded a liberal maintenance to more than three hundred priests, might hasten its downfall. Yet Julian enjoyed the satisfaction of embracing a philosopher and a friend, whose religious firmness had withstood the pressing and repeated solicitations of Constantius and Gallus, as often as those princes lodged at his house, in their passage through Hierapolis. In the hurry of military preparation, and the careless confidence of a familiar correspondence, the zeal of Julian appears to have been lively and uniform. He had now undertaken an important and difficult war; and the anxiety of the event rendered him still more attentive to observe and register the most trifling presages from which, according to the rules of divination, any knowledge of futurity could be derived.[33](#) He informed Libanius of his progress as far as Hierapolis, by an elegant epistle,[34](#) which displays the facility of his genius and his tender friendship for the sophist of Antioch.

Hierapolis, situate almost on the banks of the Euphrates,[35](#) had been appointed for the

general rendezvous of the Roman troops, who immediately passed the great river on a bridge of boats, which was previously constructed.³⁶ If the inclinations of Julian had been similar to those of his predecessor, he might have wasted the active and important season of the year in the circus of Samosata, or in the churches of Edessa. But, as the warlike emperor, instead of Constantius, had chosen Alexander for his model, he advanced without delay to Carrhæ,³⁷ a very ancient city of Mesopotamia, at the distance of fourscore miles from Hierapolis. The temple of the Moon attracted the devotion of Julian; but the halt of a few days was principally employed in completing the immense preparations of the Persian war. The secret of the expedition had hitherto remained in his own breast; but, as Carrhæ is the point of separation of the two great roads, he could no longer conceal whether it was his design to attack the dominions of Sapor on the side of the Tigris or on that of the Euphrates. The emperor detached an army of thirty thousand men, under the command of his kinsman Procopius, and of Sebastian, who had been duke of Egypt. They were ordered to direct their march towards Nisibis, and to secure the frontier from the desultory incursions of the enemy, before they attempted the passage of the Tigris. Their subsequent operations were left to the discretion of the generals; but Julian expected that, after wasting with fire and sword the fertile districts of Media and Adiabene, they might arrive under the walls of Ctesiphon about the same time that he himself, advancing with equal steps along the banks of the Euphrates, should besiege the capital of the Persian monarchy. The success of this well-concerted plan depended, in a great measure, on the powerful and ready assistance of the king of Armenia, who, without exposing the safety of his own dominions, might detach an army of four thousand horse, and twenty thousand foot, to the assistance of the Romans.³⁸ But the feeble Arsaces Tiranus,³⁹ king of Armenia, had degenerated still more shamefully than his father Chosroes from the manly virtues of the great Tiridates; and, as the pusillanimous monarch was averse to any enterprise of danger and glory, he could disguise his timid indolence by the more decent excuses of religion and gratitude. He expressed a pious attachment to the memory of Constantius, from whose hands he had received in marriage Olympias, the daughter of the prefect Ablavius; and the alliance of a female who had been educated as the destined wife of the emperor Constans exalted the dignity of a Barbarian king.⁴⁰ Tiranus professed the Christian religion; he reigned over a nation of Christians; and he was restrained, by every principle of conscience and interest, from contributing to the victory, which would consummate the ruin of the church. The alienated mind of Tiranus was exasperated by the indiscretion of Julian, who treated the king of Armenia as *his* slave, and as the enemy of the gods. The haughty and threatening style of the Imperial mandates⁴¹ awakened the secret indignation of a prince who, in the humiliating state of dependence, was still conscious of his royal descent from the Arsacides, the lords of the East and the rivals of the Roman power.

The military dispositions of Julian were skilfully contrived to deceive the spies, and to divert the attention, of Sapor. The legions appeared to direct their march towards

Nisibis and the Tigris. On a sudden they wheeled to the right; traversed the level and naked plain of Carrhæ; and reached, on the third day, the banks of the Euphrates, where the strong town of Nicephorium, or Callinicum, had been founded by the Macedonian kings.[42](#) From thence the emperor pursued his march, above ninety miles, along the winding stream of the Euphrates, till, at length, about one month after his departure from Antioch, he discovered the towers of Circesium, the extreme limit of the Roman dominions. The army of Julian, the most numerous that any of the Cæsars had ever led against Persia, consisted of sixty-five thousand effective and well-disciplined soldiers. The veteran bands of cavalry and infantry, of Romans and Barbarians, had been selected from the different provinces; and a just pre-eminence of loyalty and valour was claimed by the hardy Gauls, who guarded the throne and person of their beloved prince. A formidable body of Scythian auxiliaries had been transported from another climate, and almost from another world, to invade a distant country, of whose name and situation they were ignorant. The love of rapine and war allured to the Imperial standard several tribes of Saracens, or roving Arabs, whose service Julian had commanded, while he sternly refused the payment of the accustomed subsidies. The broad channel of the Euphrates[43](#) was crowded by a fleet of eleven hundred ships, destined to attend the motions, and to satisfy the wants, of the Roman army. The military strength of the fleet was composed of fifty armed galleys; and these were accompanied by an equal number of flat-bottomed boats, which might occasionally be connected into the form of temporary bridges. The rest of the ships, partly constructed of timber and partly covered with raw hides, were laden with an almost inexhaustible supply of arms and engines, of utensils and provisions. The vigilant humanity of Julian had embarked a very large magazine of vinegar and biscuit for the use of the soldiers, but he prohibited the indulgence of wine; and rigorously stopped a long string of superfluous camels that attempted to follow the rear of the army. The river Chaboras falls into the Euphrates at Circesium;[44](#) and, as soon as the trumpet gave the signal of march, the Romans passed the little stream which separated two mighty and hostile empires. The custom of ancient discipline required a military oration; and Julian embraced every opportunity of displaying his eloquence. He animated the impatient and attentive legions by the example of the inflexible courage and glorious triumphs of their ancestors. He excited their resentment by a lively picture of the insolence of the Persians; and he exhorted them to imitate his firm resolution, either to extirpate that perfidious nation or to devote his life in the cause of the republic. The eloquence of Julian was enforced by a donative of one hundred and thirty pieces of silver to every soldier; and the bridge of the Chaboras was instantly cut away, to convince the troops that they must place their hopes of safety in the success of their arms. Yet the prudence of the emperor induced him to secure a remote frontier, perpetually exposed to the inroads of the hostile Arabs. A detachment of four thousand men was left at Circesium, which completed, to the number of ten thousand, the regular garrison of that important fortress.[45](#)

From the moment that the Romans entered the enemy's country,[46](#) the country of an active and artful enemy, the order of march was disposed in three columns.[47](#) The strength of the infantry, and consequently of the whole army, was placed in the centre, under the peculiar command of their master-general Victor. On the right, the brave Nevitta led a column of several legions along the banks of the Euphrates, and almost always in sight of the fleet. The left flank of the army was protected by the column of cavalry. Hormisdas and Arinthæus were appointed generals of the horse; and the singular adventures of Hormisdas[48](#) are not undeserving of our notice. He was a Persian prince, of the royal race of the Sassanides, who, in the troubles of the minority of Sapor, had escaped from prison to the hospitable court of the great Constantine. Hormisdas at first excited the compassion, and at length acquired the esteem, of his new masters; his valour and fidelity raised him to the military honours of the Roman service; and, though a Christian, he might indulge the secret satisfaction of convincing his ungrateful country that an oppressed subject may prove the most dangerous enemy. Such was the disposition of the three principal columns. The front and flanks of the army were covered by Lucillianus with a flying detachment of fifteen hundred light-armed soldiers, whose active vigilance observed the most distant signs, and conveyed the earliest notice, of any hostile approach. Dagalaiphus, and Secundinus duke of Osrhoene, conducted the troops of the rear-guard; the baggage, securely, proceeded in the intervals of the columns; and the ranks, from a motive either of use or ostentation, were formed in such open order that the whole line of march extended almost ten miles. The ordinary post of Julian was at the head of the centre column; but, as he preferred the duties of a general to the state of a monarch, he rapidly moved, with a small escort of light cavalry, to the front, the rear, the flanks, wherever his presence could animate or protect the march of the Roman army. The country which they traversed from the Chaboras to the cultivated lands of Assyria may be considered as a part of the desert of Arabia, a dry and barren waste, which could never be improved by the most powerful arts of human industry. Julian marched over the same ground which had been trod above seven hundred years before by the footsteps of the younger Cyrus, and which is described by one of the companions of his expedition, the sage and heroic Xenophon.[49](#) "The country was a plain throughout, as even as the sea, and full of wormwood; and, if any other kind of shrubs or reeds grew there, they had all an aromatic smell; but no trees could be seen. Bustards and ostriches, antelopes and wild asses,[50](#) appeared to be the only inhabitants of the desert; and the fatigues of the march were alleviated by the amusements of the chase." The loose sand of the desert was frequently raised by the wind into clouds of dust: and a great number of the soldiers of Julian, with their tents, were suddenly thrown to the ground by the violence of an unexpected hurricane.

The sandy plains of Mesopotamia were abandoned to the antelopes and wild asses of the desert; but a variety of populous towns and villages were pleasantly situated on the banks of the Euphrates, and in the islands which are occasionally formed by that river.

The city of Annah, or Anatho,[51](#) the actual residence of an Arabian Emir, is composed of two long streets, which enclose, within a natural fortification, a small island in the midst, and two fruitful spots on either side of the Euphrates. The warlike inhabitants of Anatho shewed a disposition to stop the march of a Roman emperor; till they were diverted from such fatal presumption by the mild exhortations of prince Hormisdas and the approaching terrors of the fleet and army. They implored, and experienced, the clemency of Julian, who transplanted the people to an advantageous settlement near Chalcis in Syria, and admitted Pusæus, the governor, to an honourable rank in his service and friendship. But the impregnable fortress of Thilutha could scorn the menace of a siege; and the emperor was obliged to content himself with an insulting promise that, when he had subdued the interior provinces of Persia, Thilutha would no longer refuse to grace the triumph of the conqueror. The inhabitants of the open towns, unable to resist and unwilling to yield, fled with precipitation; and their houses, filled with spoil and provisions, were occupied by the soldiers of Julian, who massacred, without remorse, and without punishment, some defenceless women. During the march, the Surenas, or Persian general, and Malek Rodosaces, the renowned Emir of the tribe of Gassan,[52](#) incessantly hovered round the army: every straggler was intercepted; every detachment was attacked; and the valiant Hormisdas escaped with some difficulty from their hands. But the Barbarians were finally repulsed; the country became every day less favourable to the operations of cavalry; and, when the Romans arrived at Macepracta, they perceived the ruins of the wall which had been constructed by the ancient kings of Assyria to secure their dominions from the incursions of the Medes. These preliminaries of the expedition of Julian appear to have employed about fifteen days; and we may compute near three hundred miles from the fortress of Circesium to the wall of Macepracta.[53](#)

The fertile province of Assyria,⁵⁴ which stretched beyond the Tigris as far as the mountains of Media,⁵⁵ extended about four hundred miles from the ancient wall of Macepracta to the territory of Basra, where the united streams of the Euphrates and Tigris discharge themselves into the Persian Gulf.⁵⁶ The whole country might have claimed the peculiar name of Mesopotamia; as the two rivers which are never more distant than fifty, approach, between Bagdad and Babylon, within twenty-five, miles of each other. A multitude of artificial canals, dug without much labour in a soft and yielding soil, connected the rivers, and intersected the plain of Assyria. The uses of these artificial canals were various and important. They served to discharge the superfluous waters from one river into the other, at the season of their respective inundations. Subdividing themselves into smaller and smaller branches, they refreshed the dry lands, and supplied the deficiency of rain. They facilitated the intercourse of peace and commerce; and, as the dams could be speedily broke down, they armed the despair of the Assyrians with the means of opposing a sudden deluge to the progress of an invading army. To the soil and climate of Assyria Nature had denied some of her choicest gifts, the vine, the olive, and the fig-tree;^{56a} but the food which supports the life of man, and particularly wheat and barley, were produced with inexhaustible fertility; and the husbandman who committed his seed to the earth was frequently rewarded with an increase of two, or even of three, hundred. The face of the country was interspersed with groves of innumerable palm-trees;⁵⁷ and the diligent natives

celebrated, either in verse or prose, the three hundred and sixty uses to which the trunk, the branches, the leaves, the juice, and the fruit were skilfully applied. Several manufactures, especially those of leather and linen, employed the industry of a numerous people, and afforded valuable materials for foreign trade; which appears, however, to have been conducted by the hands of strangers. Babylon had been converted into a royal park; but near the ruins of the ancient capital new cities had successively arisen, and the populousness of the country was displayed in the multitude of towns and villages, which were built of bricks, dried in the sun, and strongly cemented with bitumen, the natural and peculiar production of the Babylonian soil. While the successors of Cyrus reigned over Asia, the province of Assyria alone maintained, during a third part of the year, the luxurious plenty of the table and household of the Great King. Four considerable villages were assigned for the subsistence of his Indian dogs; eight hundred stallions and sixteen thousand mares were constantly kept at the expense of the country, for the royal stables; and, as the daily tribute, which was paid to the satrap, amounted to one English bushel of silver, we may compute the annual revenue of Assyria at more than twelve hundred thousand pounds sterling.[58](#)

The fields of Assyria were devoted by Julian to the calamities of war; and the philosopher retaliated on a guiltless people the acts of rapine and cruelty which had been committed by their haughty master in the Roman provinces. The trembling Assyrians summoned the rivers to their assistance; and completed, with their own hands, the ruin of their country. The roads were rendered impracticable; a flood of waters was poured into the camp; and during several days the troops of Julian were obliged to contend with the most discouraging hardships. But every obstacle was surmounted by the perseverance of the legionaries, who were inured to toil as well as to danger, and who felt themselves animated by the spirit of their leader. The damage was gradually repaired; the waters were restored to their proper channels; whole groves of palm-trees were cut down and placed along the broken parts of the road; and the army passed over the broad and deeper canals on bridges of floating rafts, which were supported by the help of bladders. Two cities of Assyria presumed to resist the arms of a Roman emperor: and they both paid the severe penalty of their rashness. At the distance of fifty miles from the royal residence of Ctesiphon, Perisabor, or Anbar,[59](#) held the second rank in the province; a city, large, populous, and well fortified, surrounded with a double wall, almost encompassed by a branch of the Euphrates, and defended by the valour of a numerous garrison. The exhortations of Hormisdas were repulsed with contempt; and the ears of the Persian prince were wounded by a just reproach that, unmindful of his royal birth, he conducted an army of strangers against his king and country. The Assyrians maintained their loyalty by a skilful, as well as vigorous, defence; till, the lucky stroke of a battering-ram having opened a large breach by shattering one of the angles of the wall, they hastily retired into the fortifications of the interior citadel. The soldiers of Julian rushed impetuously into the town, and, after the full gratification of every military appetite, Perisabor was

reduced to ashes; and the engines which assaulted the citadel were planted on the ruins of the smoking houses. The contest was continued by an incessant and mutual discharge of missile weapons; and the superiority which the Romans might derive from the mechanical powers of their *balistæ* and *catapultæ* was counterbalanced by the advantage of the ground on the side of the besieged. But as soon as an *Helepolis* had been constructed, which could engage on equal terms with the loftiest ramparts, the tremendous aspect of a moving turret, that would leave no hope of resistance or of mercy, terrified the defenders of the citadel into an humble submission; and the place was surrendered only two days after Julian first appeared under the walls of Perisabor. Two thousand five hundred persons of both sexes, the feeble remnant of a flourishing people, were permitted to retire: the plentiful magazines of corn, of arms, and of splendid furniture were partly distributed among the troops, and partly reserved for the public service: the useless stores were destroyed by fire or thrown into the stream of the Euphrates; and the fate of Amida was revenged by the total ruin of Perisabor.

The city, or rather fortress, of Maogamalcha, which was defended by sixteen large towers, a deep ditch, and two strong and solid walls of brick and bitumen, appears to have been constructed at the distance of eleven miles, as the safeguard of the capital of Persia. The emperor, apprehensive of leaving such an important fortress in his rear, immediately formed the siege of Maogamalcha; and the Roman army was distributed, for that purpose, into three divisions. Victor, at the head of the calvary, and of a detachment of heavy-armed foot, was ordered to clear the country as far as the banks of the Tigris and the suburbs of Ctesiphon. The conduct of the attack was assumed by Julian himself, who seemed to place his whole dependence in the military engines which he erected against the walls; while he secretly contrived a more efficacious method of introducing his troops into the heart of the city. Under the direction of Nevitta and Dagalaiphus, the trenches were opened at a considerable distance, and gradually prolonged as far as the edge of the ditch. The ditch was speedily filled with earth; and, by the incessant labour of the troops, a mine was carried under the foundations of the walls, and sustained, at sufficient intervals, by props of timber. Three chosen cohorts, advancing in a single file, silently explored the dark and dangerous passage; till their intrepid leader whispered back the intelligence that he was ready to issue from his confinement into the streets of the hostile city. Julian checked their ardour that he might ensure their success; and immediately diverted the attention of the garrison, by the tumult and clamour of a general assault. The Persians, who from their walls contemptuously beheld the progress of an impotent attack, celebrated, with songs of triumph, the glory of Sapor; and ventured to assure the emperor that he might ascend the starry mansion of Ormusd, before he could hope to take the impregnable city of Maogamalcha. The city was already taken. History has recorded the name of a private soldier, the first who ascended from the mine into a deserted tower. The passage was widened by his companions, who pressed forwards with impatient valour. Fifteen hundred enemies were already in the midst of the city. The astonished garrison abandoned the walls, and their only hope of safety; the gates were instantly burst open;

and the revenge of the soldier, unless it were suspended by lust or avarice, was satiated by an undistinguishing massacre. The governor, who had yielded on a promise of mercy, was burnt alive, a few days afterwards, on a charge of having uttered some disrespectful words against the honour of prince Hormisdas. The fortifications were razed to the ground; and not a vestige was left that the city of Maogamalcha had ever existed. The neighbourhood of the capital of Persia was adorned with three stately palaces, laboriously enriched with every production that could gratify the luxury and pride of an Eastern monarch. The pleasant situation of the gardens along the banks of the Tigris was improved, according to the Persian taste, by the symmetry of flowers, fountains, and shady walks: and spacious parks were enclosed for the reception of the bears, lions, and wild boars, which were maintained at a considerable expense for the pleasure of the royal chase. The park-walls were broke down, the savage game was abandoned to the darts of the soldiers, and the palaces of Sapor were reduced to ashes, by the command of the Roman emperor. Julian, on this occasion, shewed himself ignorant, or careless, of the laws of civility, which the prudence and refinement of polished ages have established between hostile princes. Yet these wanton ravages need not excite in our breasts any vehement emotions of pity or resentment. A simple, naked statue, finished by the hand of a Grecian artist, is of more genuine value, than all these rude and costly monuments of Barbaric labour: and, if we are more deeply affected by the ruin of a palace than by the conflagration of a cottage, our humanity must have formed a very erroneous estimate of the miseries of human life.[60](#)

Julian was an object of terror and hatred to the Persians: and the painters of that nation represented the invader of their country under the emblem of a furious lion, who vomited from his mouth a consuming fire.[61](#) To his friends and soldiers, the philosophic hero appeared in a more amiable light; and his virtues were never more conspicuously displayed than in the last, and most active, period of his life. He practised, without effort, and almost without merit, the habitual qualities of temperance and sobriety. According to the dictates of that artificial wisdom which assumes an absolute dominion over the mind and body, he sternly refused himself the indulgence of the most natural appetites.[62](#) In the warm climate of Assyria, which solicited a luxurious people to the gratification of every sensual desire,[63](#) a youthful conqueror preserved his chastity pure and inviolate: nor was Julian ever tempted, even by a motive of curiosity, to visit his female captives of exquisite beauty,[64](#) who, instead of resisting his power, would have disputed with each other the honour of his embraces. With the same firmness that he resisted the allurements of love, he sustained the hardships of war. When the Romans marched through the flat and flooded country, their sovereign, on foot, at the head of his legions, shared their fatigues, and animated their diligence. In every useful labour, the hand of Julian was prompt and strenuous; and the Imperial purple was wet and dirty, as the coarse garment of the meanest soldier. The two sieges allowed him some remarkable opportunities of signalling his personal valour, which, in the improved state of the military art, can seldom be exerted

by a prudent general. The emperor stood before the citadel of Perisabor, insensible of his extreme danger, and encouraged his troops to burst open the gates of iron, till he was almost overwhelmed under a cloud of missile weapons and huge stones that were directed against his person. As he examined the exterior fortifications of Maogamalcha, two Persians, devoting themselves for their country, suddenly rushed upon him with drawn scimitars: the emperor dexterously received their blows on his uplifted shield; and, with a steady and well-aimed thrust, laid one of his adversaries dead at his feet. The esteem of a prince who possesses the virtues which he approves is the noblest recompense of a deserving subject; and the authority which Julian derived from his personal merit enabled him to revive and enforce the rigour of ancient discipline. He punished with death, or ignominy, the misbehaviour of three troops of horse, who, in a skirmish with the Surenas, had lost their honour, and one of their standards: and he distinguished with *obsidional*⁶⁵ crowns the valour of the foremost soldiers who had ascended into the city of Maogamalcha. After the siege of Perisabor, the firmness of the emperor was exercised by the insolent avarice of the army, who loudly complained that their services were rewarded by a trifling donative of one hundred pieces of silver. His just indignation was expressed in the grave and manly language of a Roman. “Riches are the object of your desires? those riches are in the hands of the Persians; and the spoils of this fruitful country are proposed as the prize of your valour and discipline. Believe me,” added Julian, “the Roman republic, which formerly possessed such immense treasures, is now reduced to want and wretchedness; since our princes have been persuaded, by weak and interested ministers, to purchase with gold the tranquillity of the Barbarians. The revenue is exhausted; the cities are ruined; the provinces are dispeopled. For myself, the only inheritance that I have received from my royal ancestors is a soul incapable of fear; and, as long as I am convinced that every real advantage is seated in the mind, I shall not blush to acknowledge an honourable poverty, which, in the days of ancient virtue, was considered as the glory of Fabricius. That glory, and that virtue, may be your own, if you will listen to the voice of Heaven, and of your leader. But, if you will rashly persist, if you are determined to renew the shameful and mischievous examples of old seditions, proceed. — As it becomes an emperor who has filled the first rank among men, I am prepared to die, standing; and to despise a precarious life, which, every hour, may depend on an accidental fever. If I have been found unworthy of the command, there are now among you (I speak it with pride and pleasure), there are many chiefs, whose merit and experience are equal to the conduct of the most important war. Such has been the temper of my reign that I can retire, without regret, and without apprehension, to the obscurity of a private station.”⁶⁶ The modest resolution of Julian was answered by the unanimous applause and cheerful obedience of the Romans; who declared their confidence of victory, while they fought under the banners of their heroic prince. Their courage was kindled by his frequent and familiar asseverations (for such wishes were the oaths of Julian), “So may I reduce the Persians under the yoke!” “Thus may I restore the strength and splendour of the republic!” The love of fame was the ardent passion of his soul: but it was not before he trampled on

the ruins of Maogamalcha, that he allowed himself to say, “We have now provided some materials for the sophist of Antioch.”[67](#)

The successful valour of Julian had triumphed over all the obstacles that opposed his march to the gates of Ctesiphon. But the reduction, or even the siege, of the capital of Persia was still at a distance: nor can the military conduct of the emperor be clearly apprehended without a knowledge of the country which was the theatre of his bold and skilful operations.[68](#) Twenty miles to the south of Bagdad, and on the eastern bank of the Tigris, the curiosity of travellers has observed some ruins of the palaces of Ctesiphon, which, in the time of Julian, was a great and populous city. The name and glory of the adjacent Seleucia were for ever extinguished; and the only remaining quarter of that Greek colony had resumed, with the Assyrian language and manners, the primitive appellation of Coche. Coche was situate on the western side of the Tigris; but it was naturally considered as a suburb of Ctesiphon, with which we may suppose it to have been connected by a permanent bridge of boats. The united parts contributed to form the common epithet of Al Modain, the cities, which the Orientals have bestowed on the winter residence of the Sassanides; and the whole circumference of the Persian capital was strongly fortified by the waters of the river, by lofty walls, and by impracticable morasses. Near the ruins of Seleucia, the camp of Julian was fixed; and secured, by a ditch and rampart, against the sallies of the numerous and enterprising garrison of Coche. In this fruitful and pleasant country, the Romans were plentifully supplied with water and forage; and several forts which might have embarrassed the motions of the army submitted, after some resistance, to the efforts of their valour. The fleet passed from the Euphrates into an artificial derivation of that river, which pours a copious and navigable stream into the Tigris, at a small distance *below* the great city. If they had followed this royal canal, which bore the name of Nahar-Malcha,[69](#) the intermediate situation of Coche would have separated the fleet and army of Julian; and the rash attempt of steering against the current of the Tigris, and forcing their way through the midst of a hostile capital, must have been attended with the total destruction of the Roman navy. The prudence of the emperor foresaw the danger, and provided the remedy. As he had minutely studied the operations of Trajan in the same country, he soon recollected that his warlike predecessor had dug a new and navigable canal, which, leaving Coche on the right hand, conveyed the waters of the Nahar-Malcha into the river Tigris, at some distance *above* the cities. From the information of the peasants, Julian ascertained the vestiges of this ancient work, which were almost obliterated by design or accident. By the indefatigable labour of the soldiers, a broad and deep channel was speedily prepared for the reception of the Euphrates. A strong dike was constructed to interrupt the ordinary current of the Nahar-Malcha: a flood of waters rushed impetuously into their new bed; and the Roman fleet, steering their triumphant course into the Tigris, derided the vain and ineffectual barriers which the Persians of Ctesiphon had erected to oppose their passage.

As it became necessary to transport the Roman army over the Tigris, another labour

presented itself, of less toil, but of more danger, than the preceding expedition. The stream was broad and rapid; the ascent steep and difficult; and the intrenchments, which had been formed on the ridge of the opposite bank, were lined with a numerous army of heavy cuirassiers, dexterous archers, and huge elephants; who (according to the extravagant hyperbole of Libanius) could trample, with the same ease, a field of corn, or a legion of Romans.⁷⁰ In the presence of such an enemy, the construction of a bridge was impracticable; and the intrepid prince, who instantly seized the only possible expedient, concealed his design, till the moment of execution, from the knowledge of the Barbarians, of his own troops, and even of his generals themselves. Under the specious pretence of examining the state of the magazines, fourscore vessels were gradually unladen;⁷¹ and a select detachment, apparently destined for some secret expedition, was ordered to stand to their arms on the first signal. Julian disguised the silent anxiety of his own mind with smiles of confidence and joy; and amused the hostile nations with the spectacle of military games, which he insultingly celebrated under the walls of Coche. The day was consecrated to pleasure; but, as soon as the hour of supper was past, the emperor summoned the generals to his tent; and acquainted them that he had fixed that night for the passage of the Tigris. They stood in silent and respectful astonishment; but, when the venerable Sallust assumed the privilege of his age and experience, the rest of the chiefs supported with freedom the weight of his prudent remonstrances.⁷² Julian contented himself with observing that conquest and safety depended on the attempt; that, instead of diminishing, the number of their enemies would be increased, by successive reinforcements; and that a longer delay would neither contract the breadth of the stream nor level the height of the bank. The signal was instantly given, and obeyed: the most impatient of the legionaries leaped into five vessels that lay nearest to the bank; and, as they plied their oars with intrepid diligence, they were lost, after a few moments, in the darkness of the night. A flame arose on the opposite side; and Julian, who too clearly understood that his foremost vessels, in attempting to land, had been fired by the enemy, dexterously converted their extreme danger into a presage of victory. “Our fellowsoldiers,” he eagerly exclaimed, “are already masters of the bank; see — they make the appointed signal: let us hasten to emulate and assist their courage.” The united and rapid motion of a great fleet broke the violence of the current, and they reached the eastern shore of the Tigris with sufficient speed to extinguish the flames and rescue their adventurous companions. The difficulties of a steep and lofty ascent were increased by the weight of armour and the darkness of the night. A shower of stones, darts, and fire was incessantly discharged on the heads of the assailants; who, after an arduous struggle, climbed the bank, and stood victorious upon the ramparts. As soon as they possessed a more equal field, Julian, who, with his light infantry, had led the attack,⁷³ darted through the ranks a skilful and experienced eye: his bravest soldiers, according to the precepts of Homer,⁷⁴ were distributed in the front and rear; and all the trumpets of the Imperial army sounded to battle. The Romans, after sending up a military shout, advanced in measured steps to the animating notes of martial music; launched their

formidable javelins; and rushed forwards with drawn swords, to deprive the Barbarians, by a closer onset, of the advantage of their missile weapons. The whole engagement lasted above twelve hours; till the gradual retreat of the Persians was changed into a disorderly flight, of which the shameful example was given by the principal leaders, and the Surenas himself. They were pursued to the gates of Ctesiphon; and the conquerors might have entered the dismayed city,[75](#) if their general, Victor, who was dangerously wounded with an arrow, had not conjured them to desist from a rash attempt, which must be fatal, if it were not successful. On *their* side, the Romans acknowledged the loss of only seventy-five men; while they affirmed that the Barbarians had left on the field of battle two thousand five hundred, or even six thousand, of their bravest soldiers. The spoil was such as might be expected from the riches and luxury of an Oriental camp; large quantities of silver and gold, splendid arms and trappings, and beds and tables of massy silver. The victorious emperor distributed, as the rewards of valour, some honourable gifts, civic and mural and naval crowns; which he, and perhaps he alone, esteemed more precious than the wealth of Asia. A solemn sacrifice was offered to the god of war, but the appearances of the victims threatened the most inauspicious events; and Julian soon discovered, by less ambiguous signs, that he had now reached the term of his prosperity.[76](#)

On the second day after the battle, the domestic guards, the Jovians and Herculians, and the remaining troops, which composed near two-thirds of the whole army, were securely wafted over the Tigris.[77](#) While the Persians beheld from the walls of Ctesiphon the desolation of the adjacent country, Julian cast many an anxious look towards the north, in full expectation that, as he himself had victoriously penetrated to the capital of Sapor, the march and junction of his lieutenants, Sebastian and Procopius, would be executed with the same courage and diligence. His expectations were disappointed by the treachery of the Armenian king, who permitted, and most probably directed, the desertion of his auxiliary troops from the camp of the Romans;[78](#) and by the dissensions of the two generals, who were incapable of forming or executing any plan for the public service. When the emperor had relinquished the hope of this important reinforcement, he condescended to hold a council of war, and approved, after a full debate, the sentiment of those generals who dissuaded the siege of Ctesiphon as a fruitless and pernicious undertaking. It is not easy for us to conceive by what arts of fortification a city thrice besieged and taken by the predecessors of Julian could be rendered impregnable against an army of sixty thousand Romans, commanded by a brave and experienced general, and abundantly supplied with ships, provisions, battering engines, and military stores. But we may rest assured, from the love of glory, and contempt of danger, which formed the character of Julian, that he was not discouraged by any trivial or imaginary obstacles.[79](#) At the very time when he declined the siege of Ctesiphon, he rejected, with obstinacy and disdain, the most flattering offers of a negotiation of peace. Sapor, who had been so long accustomed to the tardy ostentation of Constantius, was surprised by the intrepid diligence of his

successor. As far as the confines of India and Scythia, the satraps of the distant provinces were ordered to assemble their troops, and to march, without delay, to the assistance of their monarch. But their preparations were dilatory, their motions slow; and, before Sapor could lead an army into the field, he received the melancholy intelligence of the devastation of Assyria, the ruin of his palaces, and the slaughter of his bravest troops, who defended the passage of the Tigris. The pride of royalty was humbled in the dust; he took his repasts on the ground; and the disorder of his hair expressed the grief and anxiety of his mind. Perhaps he would not have refused to purchase, with one half of his kingdom, the safety of the remainder: and he would have gladly subscribed himself, in a treaty of peace, the faithful and dependent ally of the Roman conqueror. Under the pretence of private business, a minister of rank and confidence was secretly dispatched to embrace the knees of Hormisdas, and to request, in the language of a suppliant, that he might be introduced into the presence of the emperor. The Sassanian prince, whether he listened to the voice of pride or humanity, whether he consulted the sentiments of his birth or the duties of his situation, was equally inclined to promote a salutary measure, which would terminate the calamities of Persia, and secure the triumph of Rome. He was astonished by the inflexible firmness of a hero, who remembered, most unfortunately for himself and for his country, that Alexander had uniformly rejected the propositions of Darius. But, as Julian was sensible that the hope of a safe and honourable peace might cool the ardour of his troops, he earnestly requested that Hormisdas would privately dismiss the minister of Sapor and conceal this dangerous temptation from the knowledge of the camp.[80](#)

The honour, as well as interest, of Julian forbade him to consume his time under the impregnable walls of Ctesiphon; and, as often as he defied the Barbarians, who defended the city, to meet him on the open plain, they prudently replied that, if he desired to exercise his valour, he might seek the army of the Great King. He felt the insult, and he accepted the advice. Instead of confining his servile march to the banks of the Euphrates and Tigris, he resolved to imitate the adventurous spirit of Alexander, and boldly to advance into the inland provinces, till he forced his rival to contend with him, perhaps in the plains of Arbela, for the empire of Asia. The magnanimity of Julian was applauded and betrayed by the arts of a noble Persian, who, in the cause of his country, had generously submitted to act a part full of danger, of falsehood, and of shame.[81](#) With a train of faithful followers, he deserted to the Imperial camp; exposed, in a specious tale, the injuries which he had sustained; exaggerated the cruelty of Sapor, the discontent of the people, and the weakness of the monarchy; and confidently offered himself as the hostage and guide of the Roman march. The most rational grounds of suspicion were urged, without effect, by the wisdom and experience of Hormisdas; and the credulous Julian, receiving the traitor into his bosom, was persuaded to issue an hasty order, which, in the opinion of mankind, appeared to arraign his prudence, and to endanger his safety. He destroyed, in a single hour, the whole navy, which had been transported above five hundred miles, at so

great expense of toil, of treasure, and of blood. Twelve, or, at the most, twenty-two, small vessels were saved, to accompany, on carriages, the march of the army, and to form occasional bridges for the passage of the rivers. A supply of twenty days' provisions was reserved for the use of the soldiers; and the rest of the magazines, with a fleet of eleven hundred vessels, which rode at anchor in the Tigris, were abandoned to the flames, by the absolute command of the emperor. The Christian bishops, Gregory and Augustin, insult the madness of the apostate, who executed, with his own hands, the sentence of divine justice. Their authority, of less weight, perhaps, in a military question, is confirmed by the cool judgment of an experienced soldier, who was himself spectator of the conflagration, and who could not disapprove the reluctant murmurs of the troops.⁸² Yet there are not wanting some specious and perhaps solid reasons, which might justify the resolution of Julian. The navigation of the Euphrates never ascended above Babylon, nor that of the Tigris above Opis.⁸³ The distance of the last-mentioned city from the Roman camp was not very considerable; and Julian must soon have renounced the vain and impracticable attempt of forcing upwards a great fleet against the stream of a rapid river,⁸⁴ which in several places was embarrassed by natural or artificial cataracts.⁸⁵ The power of sails or oars was insufficient; it became necessary to tow the ships against the current of the river; the strength of twenty thousand soldiers was exhausted in this tedious and servile labour; and, if the Romans continued to march along the banks of the Tigris, they could only expect to return home without achieving any enterprise worthy of the genius or fortune of their leader. If, on the contrary, it was advisable to advance into the inland country, the destruction of the fleet and magazines was the only measure which could save that valuable prize from the hands of the numerous and active troops which might suddenly be poured from the gates of Ctesiphon. Had the arms of Julian been victorious, we should now admire the conduct, as well as the courage, of a hero, who, by depriving his soldiers of the hopes of a retreat, left them only the alternative of death or conquest.⁸⁶

The cumbersome train of artillery and waggons which retards the operations of a modern army were in a great measure unknown in the camps of the Romans.⁸⁷ Yet, in every age, the subsistence of sixty thousand men must have been one of the most important cares of a prudent general; and that subsistence could only be drawn from his own or from the enemy's country. Had it been possible for Julian to maintain a bridge of communication on the Tigris, and to preserve the conquered places of Assyria, a desolated province could not afford any large or regular supplies, in a season of the year when the lands were covered by the inundation of the Euphrates,⁸⁸ and the unwholesome air was darkened with swarms of innumerable insects.⁸⁹ The appearance of the hostile country was far more inviting. The extensive region that lies between the river Tigris and the mountains of Media was filled with villages and towns; and the fertile soil, for the most part, was in a very improved state of cultivation. Julian might expect that a conqueror who possessed the two forcible

instruments of persuasion, steel and gold, would easily procure a plentiful subsistence from the fears or the avarice of the natives. But on the approach of the Romans, this rich and smiling prospect was instantly blasted. Wherever they moved, the inhabitants deserted the open villages, and took shelter in the fortified towns; the cattle was driven away; the grass and ripe corn were consumed with fire; and, as soon as the flames had subsided which interrupted the march of Julian, he beheld the melancholy face of a smoking and naked desert. This desperate but effectual method of defence can only be executed by the enthusiasm of a people who prefer their independence to their property; or by the rigour of an arbitrary government, which consults the public safety without submitting to their inclinations the liberty of choice. On the present occasion, the zeal and obedience of the Persians seconded the commands of Sapor; and the emperor was soon reduced to the scanty stock of provisions, which continually wasted in his hands. Before they were entirely consumed, he might still have reached the wealthy and unwarlike cities of Ecbatana or Susa, by the effort of a well-directed march;[90](#) but he was deprived of this last resource by his ignorance of the roads, and by the perfidy of his guides. The Romans wandered several days in the country to the eastward of Bagdad: the Persian deserter, who had artfully led them into the snare, escaped from their resentment; and his followers, as soon as they were put to the torture, confessed the secret of the conspiracy. The visionary conquests of Hyrcania and India, which had so long amused, now tormented, the mind of Julian. Conscious that his own imprudence was the cause of the public distress, he anxiously balanced the hopes of safety or success, without obtaining a satisfactory answer either from gods or men. At length, as the only practicable measure, he embraced the resolution of directing his steps towards the banks of the Tigris, with the design of saving the army by a hasty march to the confines of Corduene; a fertile and friendly province, which acknowledged the sovereignty of Rome. The desponding troops obeyed the signal of the retreat, only seventy days after they had passed the Chaboras with the sanguine expectation of subverting the throne of Persia.[91](#)

As long as the Romans seemed to advance into the country, their march was observed and insulted from a distance by several bodies of Persian cavalry; who, showing themselves sometimes in loose, and sometimes in closer, order, faintly skirmished with the advanced guards. These detachments were, however, supported by a much greater force; and the heads of the columns were no sooner pointed towards the Tigris than a cloud of dust arose on the plain. The Romans, who now aspired only to the permission of a safe and speedy retreat, endeavoured to persuade themselves that this formidable appearance was occasioned by a troop of wild asses, or perhaps by the approach of some friendly Arabs. They halted, pitched their tents, fortified their camp, passed the whole night in continual alarms; and discovered, at the dawn of day, that they were surrounded by an army of Persians. This army, which might be considered only as the van of the Barbarians, was soon followed by the main body of cuirassiers, archers, and elephants, commanded by Meranes, a general of rank and reputation. He was accompanied by two of the king's sons, and many of the principal satraps; and fame

and expectation exaggerated the strength of the remaining powers, which slowly advanced under the conduct of Sapor himself. As the Romans continued their march, their long array, which was forced to bend, or divide, according to the varieties of the ground, afforded frequent and favourable opportunities to their vigilant enemies. The Persians repeatedly charged with fury; they were repeatedly repulsed with firmness; and the action at Maronga, which almost deserved the name of a battle, was marked by a considerable loss of satraps and elephants, perhaps of equal value in the eyes of their monarch. These splendid advantages were not obtained without an adequate slaughter on the side of the Romans: several officers of distinction were either killed or wounded; and the emperor himself, who, on all occasions of danger, inspired and guided the valour of his troops, was obliged to expose his person and exert his abilities. The weight of offensive and defensive arms, which still constituted the strength and safety of the Romans, disabled them from making any long or effectual pursuit; and, as the horsemen of the East were trained to dart their javelins, and shoot their arrows, at full speed, and in every possible direction,[92](#) the cavalry of Persia was never more formidable than in the moment of a rapid and disorderly flight. But the most certain and irreparable loss of the Romans was that of time. The hardy veterans, accustomed to the cold climate of Gaul and Germany, fainted under the sultry heat of an Assyrian summer: their vigour was exhausted by the incessant repetition of march and combat; and the progress of the army was suspended by the precautions of a slow and dangerous retreat in the presence of an active enemy. Every day, every hour, as the supply diminished, the value and price of subsistence increased in the Roman camp.[93](#) Julian, who always contented himself with such food as a hungry soldier would have disdained, distributed for the use of his troops the provisions of the Imperial household, and whatever could be spared from the sumpter-horses of the tribunes and generals. But this feeble relief served only to aggravate the sense of the public distress; and the Romans began to entertain the most gloomy apprehensions that, before they could reach the frontiers of the empire, they should all perish, either by famine or by the sword of the Barbarians.[94](#)

While Julian struggled with the almost insuperable difficulties of his situation, the silent hours of the night were still devoted to study and contemplation. Whenever he closed his eyes in short and interrupted slumbers, his mind was agitated with painful anxiety; nor can it be thought surprising that the Genius of the empire should once more appear before him, covering with a funeral veil his head and his horn of abundance, and slowly retiring from the Imperial tent. The monarch started from his couch, and stepping forth, to refresh his wearied spirits with the coolness of the midnight air, he beheld a fiery meteor, which shot athwart the sky, and suddenly vanished. Julian was convinced that he had seen the menacing countenance of the god of war;[95](#) the council which he summoned, of Tuscan haruspices,[96](#) unanimously pronounced that he should abstain from action; but, on this occasion, necessity and reason were more prevalent than superstition; and the trumpets sounded at the break of day. The army marched through a hilly country; and the hills had been secretly

occupied by the Persians. Julian led the van, with the skill and attention of a consummate general; he was alarmed by the intelligence that his rear was suddenly attacked. The heat of the weather had tempted him to lay aside his cuirass; but he snatched a shield from one of his attendants, and hastened, with a sufficient reinforcement, to the relief of the rear-guard. A similar danger recalled the intrepid prince to the defence of the front; and, as he galloped between the columns, the centre of the left was attacked, and almost overpowered, by a furious charge of the Persian cavalry and elephants. This huge body was soon defeated, by the well-timed evolution of the light infantry, who aimed their weapons, with dexterity and effect, against the backs of the horsemen and the legs of the elephants. The Barbarians fled; and Julian, who was foremost in every danger, animated the pursuit with his voice and gestures. His trembling guards, scattered and oppressed by the disorderly throng of friends and enemies, reminded their fearless sovereign that he was without armour; and conjured him to decline the fall of the impending ruin. As they exclaimed,⁹⁷ a cloud of darts and arrows was discharged from the flying squadrons; and a javelin, after razing the skin of his arm, transpierced the ribs, and fixed in the inferior part of the liver. Julian attempted to draw the deadly weapon from his side; but his fingers were cut by the sharpness of the steel, and he fell senseless from his horse. His guards flew to his relief; and the wounded emperor was gently raised from the ground, and conveyed out of the tumult of the battle into an adjacent tent. The report of the melancholy event passed from rank to rank; but the grief of the Romans inspired them with invincible valour and the desire of revenge. The bloody and obstinate conflict was maintained by the two armies, till they were separated by the total darkness of the night. The Persians derived some honour from the advantage which they obtained against the left wing, where Anatolius, master of the offices, was slain, and the prefect Sallust very narrowly escaped. But the event of the day was adverse to the Barbarians. They abandoned the field, their two generals, Meranes and Nohordates,⁹⁸ fifty nobles or satraps, and a multitude of their bravest soldiers: and the success of the Romans, if Julian had survived, might have been improved into a decisive and useful victory.

The first words that Julian uttered, after his recovery from the fainting fit into which he had been thrown by loss of blood, were expressive of his martial spirit. He called for his horse and arms, and was impatient to rush into the battle. His remaining strength was exhausted by the painful effort; and the surgeons who examined his wound discovered the symptoms of approaching death. He employed the awful moments with the firm temper of a hero and a sage; the philosophers who had accompanied him in this fatal expedition compared the tent of Julian with the prison of Socrates; and the spectators, whom duty, or friendship, or curiosity had assembled around his couch, listened with respectful grief to the funeral oration of their dying emperor.⁹⁹ “Friends and fellow-soldiers, the seasonable period of my departure is now arrived, and I discharge, with the cheerfulness of a ready debtor, the demands of nature. I have learned from philosophy, how much the soul is more excellent than the body; and that

the separation of the nobler substance should be the subject of joy, rather than of affliction. I have learned from religion, that an early death has often been the reward of piety;[100](#) and I accept, as a favour of the gods, the mortal stroke that secures me from the danger of disgracing a character, which has hitherto been supported by virtue and fortitude. I die without remorse, as I have lived without guilt. I am pleased to reflect on the innocence of my private life; and I can affirm, with confidence, that the supreme authority, that emanation of the Divine Power, has been preserved in my hands pure and immaculate. Detesting the corrupt and destructive maxims of despotism, I have considered the happiness of the people as the end of government. Submitting my actions to the laws of prudence, of justice, and of moderation, I have trusted the event to the care of Providence. Peace was the object of my counsels, as long as peace was consistent with the public welfare; but, when the imperious voice of my country summoned me to arms, I exposed my person to the dangers of war, with the clear foreknowledge (which I had acquired from the art of divination) that I was destined to fall by the sword. I now offer my tribute of gratitude to the Eternal Being, who has not suffered me to perish by the cruelty of a tyrant, by the secret dagger of conspiracy, or by the slow tortures of lingering disease. He has given me, in the midst of an honourable career, a splendid and glorious departure from this world; and I hold it equally absurd, equally base, to solicit, or to decline, the stroke of fate. — Thus much I have attempted to say; but my strength fails me, and I feel the approach of death. — I shall cautiously refrain from any word that may tend to influence your suffrages in the election of an emperor. My choice might be imprudent, or injudicious; and, if it should not be ratified by the consent of the army, it might be fatal to the person whom I should recommend. I shall only, as a good citizen, express my hopes that the Romans may be blessed with the government of a virtuous sovereign.” After this discourse, which Julian pronounced in a firm and gentle tone of voice, he distributed, by a military testament,[101](#) the remains of his private fortune; and, making some inquiry why Anatolius was not present, he understood, from the answer of Sallust, that Anatolius was killed; and bewailed, with amiable inconsistency, the loss of his friend. At the same time he reproved the immoderate grief of the spectators; and conjured them not to disgrace, by unmanly tears, the fate of a prince who in a few moments would be united with heaven, and with the stars.[102](#) The spectators were silent; and Julian entered into a metaphysical argument with the philosophers Priscus and Maximus, on the nature of the soul. The efforts which he made, of mind as well as body, most probably hastened his death. His wound began to bleed with fresh violence; his respiration was embarrassed by the swelling of the veins: he called for a draught of cold water, and, as soon as he had drunk it, expired without pain, about the hour of midnight. Such was the end of that extraordinary man, in the thirty-second year of his age, after a reign of one year and about eight months from the death of Constantius. In his last moments he displayed, perhaps with some ostentation, the love of virtue and of fame which had been the ruling passions of his life.[103](#)

The triumph of Christianity, and the calamities of the empire, may, in some measure,

be ascribed to Julian himself, who had neglected to secure the future execution of his designs by the timely and judicious nomination of an associate and successor. But the royal race of Constantius Chlorus was reduced to his own person; and, if he entertained any serious thoughts of investing with the purple the most worthy among the Romans, he was diverted from his resolution by the difficulty of the choice, the jealousy of power, the fear of ingratitude, and the natural presumption of health, of youth, and of prosperity. His unexpected death left the empire without a master and without an heir, in a state of perplexity and danger, which, in the space of fourscore years, had never been experienced, since the election of Diocletian. In a government which had almost forgotten the distinction of pure and noble blood, the superiority of birth was of little moment; the claims of official rank were accidental and precarious; and the candidates who might aspire to ascend the vacant throne could be supported only by the consciousness of personal merit, or by the hopes of popular favour. But the situation of a famished army, encompassed on all sides by an host of Barbarians, shortened the moments of grief and deliberation. In this scene of terror and distress, the body of the deceased prince, according to his own directions, was decently embalmed; and, at the dawn of day, the generals convened a military senate, at which the commanders of the legions and the officers, both of cavalry and infantry, were invited to assist. Three or four hours of the night had not passed away without some secret cabals; and, when the election of an emperor was proposed, the spirit of faction began to agitate the assembly. Victor and Arinthæus collected the remains of the court of Constantius; the friends of Julian attached themselves to the Gallic chiefs, Dagalaiphus and Nevitta; and the most fatal consequences might be apprehended from the discord of two factions, so opposite in their character and interest, in their maxims of government, and perhaps in their religious principles. The superior virtues of Sallust could alone reconcile their divisions and unite their suffrages; and the venerable prefect would immediately have been declared the successor of Julian, if he himself, with sincere and modest firmness, had not alleged his age and infirmities, so unequal to the weight of the diadem. The generals, who were surprised and perplexed by his refusal, shewed some disposition to adopt the salutary advice of an inferior officer,[104](#) that they should act as they would have acted in the absence of the emperor; that they should exert their abilities to extricate the army from the present distress; and, if they were fortunate enough to reach the confines of Mesopotamia, they should proceed with united and deliberate counsels in the election of a lawful sovereign. While they debated, a few voices saluted Jovian, who was no more than *first*[105](#) of the domestics, with the names of Emperor and Augustus. The tumultuary acclamation was instantly repeated by the guards who surrounded the tent, and passed, in a few minutes, to the extremities of the line. The new prince, astonished with his own fortune, was hastily invested with the Imperial ornaments and received an oath of fidelity from the generals whose favour and protection he so lately solicited. The strongest recommendation of Jovian was the merit of his father, Count Varronian, who enjoyed, in honourable retirement, the fruit of his long services. In the obscure freedom of a private station, the son indulged his taste for wine and women; yet he supported, with credit, the

character of a Christian¹⁰⁶ and a soldier. Without being conspicuous for any of the ambitious qualifications which excite the admiration and envy of mankind, the comely person of Jovian, his cheerful temper, and familiar wit had gained the affection of his fellowsoldiers; and the generals of both parties acquiesced in a popular election, which had not been conducted by the arts of their enemies. The pride of this unexpected elevation was moderated by the just apprehension that the same day might terminate the life and reign of the new emperor. The pressing voice of necessity was obeyed without delay; and the first orders issued by Jovian, a few hours after his predecessor had expired, were to prosecute a march which could alone extricate the Romans from their actual distress.¹⁰⁷

The esteem of an enemy is most sincerely expressed by his fears; and the degree of fear may be accurately measured by the joy with which he celebrates his deliverance. The welcome news of the death of Julian, which a deserter revealed to the camp of Sapor, inspired the desponding monarch with a sudden confidence of victory. He immediately detached the royal cavalry, perhaps the ten thousand *Immortals*,¹⁰⁸ to second and support the pursuit; and discharged the whole weight of his united forces on the rear-guard of the Romans. The rear-guard was thrown into disorder; the renowned legions, which derived their titles from Diocletian and his warlike colleague, were broke and trampled down by the elephants; and three tribunes lost their lives in attempting to stop the flight of their soldiers. The battle was at length restored by the persevering valour of the Romans; the Persians were repulsed with a great slaughter of men and elephants; and the army, after marching and fighting a long summer's day, arrived, in the evening, at Samara on the banks of the Tigris, about one hundred miles above Ctesiphon.¹⁰⁹ On the ensuing day, the Barbarians, instead of harassing the march, attacked the camp of Jovian, which had been seated in a deep and sequestered valley. From the hills, the archers of Persia insulted and annoyed the wearied legionaries; and a body of cavalry, which had penetrated with desperate courage through the Prætorian gate, was cut in pieces, after a doubtful conflict, near the Imperial tent. In the succeeding night, the camp of Carthe was protected by the lofty dikes of the river; and the Roman army, though incessantly exposed to the vexatious pursuit of the Saracens, pitched their tents near the city of Dura,¹¹⁰ four days after the death of Julian. The Tigris was still on their left; their hopes and provisions were almost consumed; and the impatient soldiers, who had fondly persuaded themselves that the frontiers of the empire were not far distant, requested their new sovereign that they might be permitted to hazard the passage of the river. With the assistance of his wisest officers, Jovian endeavoured to check their rashness; by representing that, if they possessed sufficient skill and vigour to stem the torrent of a deep and rapid stream, they would only deliver themselves naked and defenceless to the Barbarians, who had occupied the opposite banks. Yielding at length to their clamorous importunities, he consented, with reluctance, that five hundred Gauls and Germans, accustomed from their infancy to the waters of the Rhine and Danube, should attempt

the bold adventure, which might serve either as an encouragement, or as a warning, for the rest of the army. In the silence of the night, they swam the Tigris, surprised an unguarded post of the enemy, and displayed at the dawn of day the signal of their resolution and fortune. The success of this trial disposed the emperor to listen to the promises of his architects, who proposed to construct a floating bridge of the inflated skins of sheep, oxen, and goats, covered with a floor of earth and fascines.^{[111](#)} Two important days were spent in the ineffectual labour; and the Romans, who already endured the miseries of famine, cast a look of despair on the Tigris, and upon the Barbarians; whose numbers and obstinacy increased with the distress of the Imperial army.^{[112](#)}

In this hopeless situation, the fainting spirits of the Romans were revived by the sound of peace. The transient presumption of Sapor had vanished: he observed, with serious concern, that, in the repetition of doubtful combats, he had lost his most faithful and intrepid nobles, his bravest troops, and the greatest part of his train of elephants: and the experienced monarch feared to provoke the resistance of despair, the vicissitudes of fortune, and the unexhausted powers of the Roman empire; which might soon advance to relieve, or to revenge, the successor of Julian. The Surenas himself, accompanied by another satrap, appeared in the camp of Jovian;^{[113](#)} and declared that the clemency of his sovereign was not averse to signify the conditions on which he would consent to spare and to dismiss the Cæsar with the relics of his captive army. The hopes of safety subdued the firmness of the Romans; the emperor was compelled, by the advice of his council and the cries of the soldiers, to embrace the offer of peace; and the prefect Sallust was immediately sent, with the general Arinthæus, to understand the pleasure of the Great King. The crafty Persian delayed, under various pretences, the conclusion of the agreement; started difficulties, required explanations, suggested expedients, receded from his concessions, increased his demands, and wasted four days in the arts of negotiation, till he had consumed the stock of provisions which yet remained in the camp of the Romans. Had Jovian been capable of executing a bold and prudent measure, he would have continued his march with unremitting diligence; the progress of the treaty would have suspended the attacks of the Barbarians; and, before the expiration of the fourth day, he might have safely reached the fruitful province of Corduene, at the distance only of one hundred miles.^{[114](#)} The irresolute emperor, instead of breaking through the toils of the enemy, expected his fate with patient resignation; and accepted the humiliating conditions of peace, which it was no longer in his power to refuse. The five provinces beyond the Tigris, which had been ceded by the grandfather of Sapor, were restored to the Persian monarchy. He acquired, by a single article, the impregnable city of Nisibis; which had sustained, in three successive sieges, the effort of his arms. Singara, and the castle of the Moors, one of the strongest places of Mesopotamia, were likewise dismembered from the empire. It was considered as an indulgence, that the inhabitants of those fortresses were permitted to retire with their effects; but the conqueror rigorously insisted that the Romans should for ever abandon the king and kingdom of Armenia. A

peace, or rather a long truce, of thirty years was stipulated between the hostile nations; the faith of the treaty was ratified by solemn oaths, and religious ceremonies; and hostages of distinguished rank were reciprocally delivered to secure the performance of the conditions.[115](#)

The sophist of Antioch, who saw with indignation the sceptre of his hero in the feeble hand of a Christian successor, professes to admire the moderation of Sapor, in contenting himself with so small a portion of the Roman empire. If he had stretched as far as the Euphrates the claims of his ambition, he might have been secure, says Libanius, of not meeting with a refusal. If he had fixed, as the boundary of Persia, the Orontes, the Cydnus, the Sangarius, or even the Thracian Bosphorus, flatterers would not have been wanting in the court of Jovian to convince the timid monarch that his remaining provinces would still afford the most ample gratifications of power and luxury.[116](#) Without adopting in its full force this malicious insinuation, we must acknowledge that the conclusion of so ignominious a treaty was facilitated by the private ambition of Jovian. The obscure domestic, exalted to the throne by fortune rather than by merit, was impatient to escape from the hands of the Persians; that he might prevent the designs of Procopius, who commanded the army of Mesopotamia, and establish his doubtful reign over the legions and provinces, which were still ignorant of the hasty and tumultuous choice of the camp beyond the Tigris.[117](#) In the neighbourhood of the same river, at no very considerable distance from the fatal station of Dura,[118](#) the ten thousand Greeks, without generals, or guides, or provisions, were abandoned, above twelve hundred miles from their native country, to the resentment of a victorious monarch. The difference of *their* conduct and success depended much more on their character than on their situation. Instead of tamely resigning themselves to the secret deliberations and private views of a single person, the united councils of the Greeks were inspired by the generous enthusiasm of a popular assembly; where the mind of each citizen is filled with the love of glory, the pride of freedom, and the contempt of death. Conscious of their superiority over the Barbarians in arms and discipline, they disdained to yield, they refused to capitulate; every obstacle was surmounted by their patience, courage, and military skill; and the memorable retreat of the ten thousand exposed and insulted the weakness of the Persian monarchy.[119](#)

As the price of his disgraceful concessions, the emperor might perhaps have stipulated that the camp of the hungry Romans should be plentifully supplied;[120](#) and that they should be permitted to pass the Tigris, on the bridge which was constructed by the hands of the Persians. But, if Jovian presumed to solicit those equitable terms, they were sternly refused by the haughty tyrant of the East; whose clemency had pardoned the invaders of his country. The Saracens sometimes intercepted the stragglers of the march; but the generals and troops of Sapor respected the cessation of arms; and Jovian was suffered to explore the most convenient place for the passage of the river.

The small vessels, which had been saved from the conflagration of the fleet, performed the most essential service. They first conveyed the emperor and his favourites; and afterwards transported, in many successive voyages, a great part of the army. But, as every man was anxious for his personal safety, and apprehensive of being left on the hostile shore, the soldiers, who were too impatient to wait the slow returns of the boats, boldly ventured themselves on light hurdles, or inflated skins; and, drawing after them their horses, attempted, with various success, to swim across the river. Many of these daring adventurers were swallowed by the waves; many others, who were carried along by the violence of the stream, fell an easy prey to the avarice, or cruelty, of the wild Arabs: and the loss which the army sustained in the passage of the Tigris was not inferior to the carnage of a day of battle. As soon as the Romans had landed on the western bank, they were delivered from the hostile pursuit of the Barbarians; but, in a laborious march of two hundred miles over the plains of Mesopotamia, they endured the last extremities of thirst and hunger. They were obliged to traverse a sandy desert, which, in the extent of seventy miles, did not afford a single blade of sweet grass, nor a single spring of fresh water; and the rest of the inhospitable waste was untrod by the footsteps either of friends or enemies. Whenever a small measure of flour could be discovered in the camp, twenty pounds' weight were greedily purchased with ten pieces of gold:[121](#) the beasts of burden were slaughtered and devoured; and the desert was strewn with the arms and baggage of the Roman soldiers, whose tattered garments and meagre countenances displayed their past sufferings and actual misery. A small convoy of provisions advanced to meet the army as far as the castle of Ur; and the supply was the more grateful, since it declared the fidelity of Sebastian and Procopius. At Thilsaphata,[122](#) the emperor most graciously received the generals of Mesopotamia, and the remains of a once flourishing army at length reposed themselves under the walls of Nisibis. The messengers of Jovian had already proclaimed, in the language of flattery, his election, his treaty, and his return; and the new prince had taken the most effectual measures to secure the allegiance of the armies and provinces of Europe; by placing the military command in the hands of those officers who, from motives of interest or inclination, would firmly support the cause of their benefactor.[123](#)

The friends of Julian had confidently announced the success of his expedition. They entertained a fond persuasion that the temples of the gods would be enriched with the spoils of the East; that Persia would be reduced to the humble state of a tributary province, governed by the laws and magistrates of Rome; that the Barbarians would adopt the dress, and manners, and language of their conquerors; and that the youth of Ecbatana and Susa would study the art of rhetoric under Grecian masters.[124](#) The progress of the arms of Julian interrupted his communication with the empire; and, from the moment that he passed the Tigris, his affectionate subjects were ignorant of the fate and fortunes of their prince. Their contemplation of fancied triumphs was disturbed by the melancholy rumour of his death; and they persisted to doubt, after

they could no longer deny, the truth of that fatal event.¹²⁵ The messengers of Jovian promulgated the specious tale of a prudent and necessary peace: the voice of fame, louder and more sincere, revealed the disgrace of the emperor and the conditions of the ignominious treaty. The minds of the people were filled with astonishment and grief, with indignation and terror, when they were informed that the unworthy successor of Julian relinquished the five provinces which had been acquired by the victory of Galerius; and that he shamefully surrendered to the Barbarians the important city of Nisibis, the firmest bulwark of the provinces of the East.¹²⁶ The deep and dangerous question, how far the public faith should be observed, when it becomes incompatible with the public safety, was freely agitated in popular conversation; and some hopes were entertained that the emperor would redeem his pusillanimous behaviour by a splendid act of patriotic perfidy. The inflexible spirit of the Roman senate had always disclaimed the unequal conditions which were extorted from the distress of her captive armies; and, if it were necessary to satisfy the national honour by delivering the guilty general into the hands of the Barbarians, the greatest part of the subjects of Jovian would have cheerfully acquiesced in the precedent of ancient times.¹²⁷

But the emperor, whatever might be the limits of his constitutional authority, was the absolute master of the laws and arms of the state; and the same motives which had forced him to subscribe, now pressed him to execute, the treaty of peace. He was impatient to secure an empire at the expense of a few provinces; and the respectable names of religion and honour concealed the personal fears and the ambition of Jovian. Notwithstanding the dutiful solicitations of the inhabitants, decency, as well as prudence, forbade the emperor to lodge in the palace of Nisibis; but, the next morning after his arrival, Bineses, the ambassador of Persia, entered the place, displayed from the citadel the standard of the Great King, and proclaimed, in his name, the cruel alternative of exile or servitude. The principal citizens of Nisibis, who, till that fatal moment, had confided in the protection of their sovereign, threw themselves at his feet. They conjured him not to abandon, or, at least, not to deliver, a faithful colony to the rage of a Barbarian tyrant, exasperated by the three successive defeats which he had experienced under the walls of Nisibis. They still possessed arms and courage to repel the invaders of their country; they requested only the permission of using them in their own defence; and, as soon as they had asserted their independence, they should implore the favour of being again admitted into the rank of his subjects. Their arguments, their eloquence, their tears, were ineffectual. Jovian alleged, with some confusion, the sanctity of oaths; and, as the reluctance with which he accepted the present of a crown of gold convinced the citizens of their hopeless condition, the advocate Sylvanus was provoked to exclaim, "O Emperor! may you thus be crowned by all the cities of your dominions!" Jovian, who, in a few weeks, had assumed the habits of a prince,¹²⁸ was displeased with freedom, and offended with truth: and, as he reasonably supposed that the discontent of the people might incline them to submit to the Persian government, he published an edict, under pain of death, that they should leave the city within the term of three days. Ammianus has delineated in lively colours

the scene of universal despair, which he seems to have viewed with an eye of compassion.[129](#) The martial youth deserted, with indignant grief, the walls which they had so gloriously defended: the disconsolate mourner dropt a last tear over the tomb of a son or husband, which must soon be profaned by the rude hand of a Barbarian master; and the aged citizen kissed the threshold, and clung to the doors, of the house where he had passed the cheerful and careless hours of infancy. The highways were crowded with a trembling multitude: the distinctions of rank, and sex, and age were lost in the general calamity. Every one strove to bear away some fragment from the wreck of his fortunes; and, as they could not command the immediate service of an adequate number of horses or waggons, they were obliged to leave behind them the greatest part of their valuable effects. The savage insensibility of Jovian appears to have aggravated the hardships of these unhappy fugitives. They were seated, however, in a new-built quarter of Amida; and that rising city, with the reinforcement of a very considerable colony, soon recovered its former splendour, and became the capital of Mesopotamia.[130](#) Similar orders were despatched by the emperor for the evacuation of Singara and the castle of the Moors; and for the restitution of the five provinces beyond the Tigris. Sapor enjoyed the glory and the fruits of his victory; and this ignominious peace has justly been considered as a memorable era in the decline and fall of the Roman empire. The predecessors of Jovian had sometimes relinquished the dominion of distant and unprofitable provinces; but, since the foundation of the city, the genius of Rome, the god Terminus, who guarded the boundaries of the republic, had never retired before the sword of a victorious enemy.[131](#)

After Jovian had performed those engagements which the voice of his people might have tempted him to violate, he hastened away from the scene of his disgrace, and proceeded with his whole court to enjoy the luxury of Antioch.[132](#) Without consulting the dictates of religious zeal, he was prompted, by humanity and gratitude, to bestow the last honours on the remains of his deceased sovereign;[133](#) and Procopius, who sincerely bewailed the loss of his kinsman, was removed from the command of the army, under the decent pretence of conducting the funeral. The corpse of Julian was transported from Nisibis to Tarsus, in a slow march of fifteen days; and, as it passed through the cities of the East, was saluted by the hostile factions, with mournful lamentations and clamorous insults. The Pagans already placed their beloved hero in the rank of those gods whose worship he had restored; while the invectives of the Christians pursued the soul of the apostate to hell, and his body to the grave.[134](#) One party lamented the approaching ruin of their altars; the other celebrated the marvellous deliverance of the church. The Christians applauded, in lofty and ambiguous strains, the stroke of divine vengeance, which had been so long suspended over the guilty head of Julian. They acknowledged[134a](#) that the death of the tyrant, at the instant he expired beyond the Tigris, was *revealed* to the saints of Egypt, Syria and Cappadocia;[135](#) and, instead of suffering him to fall by the Persian darts, their indiscretion ascribed the heroic deed to the obscure hand of some mortal or immortal champion of the faith.[136](#)

Such imprudent declarations were eagerly adopted by the malice, or credulity, of their adversaries;[137](#) who darkly insinuated, or confidently asserted, that the governors of the church had instigated and directed the fanaticism of a domestic assassin.[138](#) Above sixteen years after the death of Julian, the charge was solemnly and vehemently urged, in a public oration, addressed by Libanius to the emperor Theodosius. His suspicions are unsupported by fact or argument; and we can only esteem the generous zeal of the sophist of Antioch for the cold and neglected ashes of his friend.[139](#)

It was an ancient custom in the funerals, as well as in the triumphs, of the Romans, that the voice of praise should be corrected by that of satire and ridicule; and that, in the midst of the splendid pageants, which displayed the glory of the living or of the dead, their imperfections should not be concealed from the eyes of the world.[140](#) This custom was practised in the funeral of Julian. The comedians, who resented his contempt and aversion for the theatre, exhibited, with the applause of a Christian audience, the lively and exaggerated representation of the faults and follies of the deceased emperor. His various character and singular manners afforded an ample scope for pleasantry and ridicule.[141](#) In the exercise of his uncommon talents, he often descended below the majesty of his rank. Alexander was transformed into Diogenes; the philosopher was degraded into a priest. The purity of his virtue was sullied by excessive vanity: his superstition disturbed the peace, and endangered the safety, of a mighty empire; and his irregular sallies were the less entitled to indulgence, as they appear to be the laborious efforts of art, or even of affectation. The remains of Julian were interred at Tarsus in Cilicia; but his stately tomb which arose in that city, on the banks of the cold and limpid Cydnus,[142](#) was displeasing to the faithful friends, who loved and revered the memory of that extraordinary man. The philosopher expressed a very reasonable wish that the disciple of Plato might have reposed amidst the groves of the academy:[143](#) while the soldiers exclaimed in bolder accents that the ashes of Julian should have been mingled with those of Cæsar, in the field of Mars, and among the ancient monuments of Roman virtue.[144](#) The history of princes does not very frequently renew the example of a similar competition.

CHAPTER XXV

The Government and Death of Jovian — Election of Valentinian, who associates his Brother Valens, and makes the final Division of the Eastern and Western Empires — Revolt of Procopius — Civil and Ecclesiastical Administration — Germany — Britain — Ajrica — The East — The Danube — Death of Valentinian — His two Sons, Gratian and Valentinian II., succeed to the Western Empire

The death of Julian had left the public affairs of the empire in a very doubtful and dangerous situation. The Roman army was saved by an inglorious, perhaps a necessary, treaty;¹ and the first moments of peace were consecrated by the pious Jovian to restore the domestic tranquillity of the church and state. The indiscretion of his predecessor, instead of reconciling, had artfully fomented the religious war; and the balance which he affected to preserve between the hostile factions served only to perpetuate the contest, by the vicissitudes of hope and fear, by the rival claims of ancient possession and actual favour. The Christians had forgotten the spirit of the Gospel; and the Pagans had imbibed the spirit of the church. In private families, the sentiments of nature were extinguished by the blind fury of zeal and revenge; the majesty of the laws was violated or abused; the cities of the East were stained with blood; and the most implacable enemies of the Romans were in the bosom of their country. Jovian was educated in the profession of Christianity; and, as he marched from Nisibis to Antioch, the banner of the Cross, the Labarum of Constantine, which was again displayed at the head of the legions, announced to the people the faith of their new emperor. As soon as he ascended the throne, he transmitted a circular epistle to all the governors of provinces: in which he confessed the divine truth, and secured the legal establishment, of the Christian religion. The insidious edicts of Julian were abolished; the ecclesiastical immunities were restored and enlarged; and Jovian condescended to lament that the distress of the times obliged him to diminish the measure of charitable distributions.² The Christians were unanimous in the loud and sincere applause which they bestowed on the pious successor of Julian. But they were still ignorant what creed, or what synod, he would choose for the standard of orthodoxy; and the peace of the church immediately revived those eager disputes which had been suspended during the season of persecution. The episcopal leaders of the contending sects, convinced, from experience, how much their fate would depend on the earliest impressions that were made on the mind of an untutored soldier, hastened to the court of Edessa or Antioch. The highways of the East were crowded with Homoousian, and Arian, and Semi-Arian, and Eunomian bishops, who struggled to outstrip each other in the holy race; the apartments of the palace resounded with their clamours; and the ears of the prince were assaulted, and perhaps astonished, by the singular mixture of metaphysical argument and passionate invective.³ The moderation of Jovian, who recommended concord and charity and referred the disputants to the sentence of a future council, was interpreted as a symptom of indifference; but his attachment to the Nicene creed was at length discovered and declared by the reverence which he expressed for the *celestial*⁴ virtues of the great Athanasius. The intrepid veteran of the faith, at the age of seventy, had issued from his retreat on the first intelligence of the tyrant's death. The acclamations of the people seated him once more on the archiepiscopal throne; and he wisely accepted, or anticipated, the invitation of Jovian. The venerable figure of Athanasius, his calm courage, and insinuating eloquence sustained the reputation which he had already acquired in the courts of four successive princes.⁵ As soon as he had gained the confidence, and secured the faith, of the Christian emperor, he returned in triumph to

his diocese, and continued, with mature counsels and undiminished vigour, to direct, ten years longer,⁶ the ecclesiastical government of Alexandria, Egypt, and the Catholic church. Before his departure from Antioch, he assured Jovian that his orthodox devotion would be rewarded with a long and peaceful reign. Athanasius had reason to hope that he should be allowed either the merit of a successful prediction or the excuse of a grateful, though ineffectual, prayer.⁷

Jovian with a Hunting-Party (from a bas-relief on the Tomb of Jovian)

The slightest force, when it is applied to assist and guide the natural descent of its object, operates with irresistible weight; and Jovian had the good fortune to embrace the religious opinions which were supported by the spirit of the times and the zeal and numbers of the most powerful sect.⁸ Under his reign, Christianity obtained an easy and lasting victory; and, as soon as the smile of royal patronage was withdrawn, the genius of Paganism, which had been fondly raised and cherished by the arts of Julian, sunk irrecoverably in the dust. In many cities, the temples were shut or deserted: the philosophers, who had abused their transient favour, thought it prudent to shave their beards and disguise their profession; and the Christians rejoiced, that they were now in a condition to forgive, or to revenge, the injuries which they had suffered under the preceding reign.⁹ The consternation of the Pagan world was dispelled by a wise and gracious edict of toleration; in which Jovian explicitly declared that, although he should severely punish the sacrilegious rites of magic, his subjects might exercise, with freedom and safety, the ceremonies of the ancient worship. The memory of this law has been preserved by the orator Themistius, who was deputed by the senate of Constantinople to express their loyal devotion for the new emperor. Themistius expatiates on the clemency of the Divine Nature, the facility of human error, the rights

of conscience, and the independence of the mind; and, with some eloquence, inculcates the principles of philosophical toleration; whose aid Superstition herself, in the hour of her distress, is not ashamed to implore. He justly observes that, in the recent changes, both religions had been alternately disgraced by the seeming acquisition of worthless proselytes, of those votaries of the reigning purple who could pass, without a reason and without a blush, from the church to the temple, and from the altars of Jupiter to the sacred table of the Christians.[10](#)

In the space of seven months, the Roman troops, who were now returned to Antioch, had performed a march of fifteen hundred miles; in which they had endured all the hardships of war, of famine, and of climate. Notwithstanding their services, their fatigues, and the approach of winter, the timid and impatient Jovian allowed only, to the men and horses, a respite of six weeks. The emperor could not sustain the indiscreet and malicious raillery of the people of Antioch.[11](#) He was impatient to possess the palace of Constantinople, and to prevent the ambition of some competitor, who might occupy the vacant allegiance of Europe. But he soon received the grateful intelligence that his authority was acknowledged from the Thracian Bosphorus to the Atlantic Ocean. By the first letters which he despatched from the camp of Mesopotamia he had delegated the military command of Gaul and Illyricum to Malarich, a brave and faithful officer of the nation of the Franks, and to his father-in-law, Count Lucillian, who had formerly distinguished his courage and conduct in the defence of Nisibis. Malarich had declined an office to which he thought himself unequal; and Lucillian was massacred at Rheims, in an accidental mutiny of the Batavian cohorts.[12](#) But the moderation of Jovinus, master-general of the cavalry, who forgave the intention of his disgrace, soon appeased the tumult and confirmed the uncertain minds of the soldiers. The oath of fidelity was administered and taken with loyal acclamations; and the deputies of the Western armies[13](#) saluted their new sovereign as he descended from Mount Taurus to the city of Tyana, in Cappadocia. From Tyana he continued his hasty march to Ancyra, capital of the province of Galatia; where Jovian assumed, with his infant son, the name and ensigns of the consulship.[14](#) Dadastana,[15](#) an obscure town, almost at an equal distance between Ancyra and Nice, was marked for the fatal term of his journey and his life. After indulging himself with a plentiful, perhaps an intemperate, supper, he retired to rest; and the next morning the emperor Jovian was found dead in his bed. The cause of this sudden death was variously understood. By some it was ascribed to the consequences of an indigestion, occasioned either by the quantity of the wine, or the quality of the mushrooms, which he had swallowed in the evening. According to others, he was suffocated in his sleep by the vapour of charcoal; which extracted from the walls of the apartment the unwholesome moisture of the fresh plaister.[16](#) But the want of a regular inquiry into the death of a prince, whose reign and person were soon forgotten, appears to have been the only circumstance which countenanced the malicious whispers of poison and domestic guilt.[17](#) The body of Jovian was sent to Constantinople, to be

interred with his predecessors; and the sad procession was met on the road by his wife Charito, the daughter of Count Lucillian; who still wept the recent death of her father, and was hastening to dry her tears in the embraces of an Imperial husband. Her disappointment and grief were embittered by the anxiety of maternal tenderness. Six weeks before the death of Jovian, his infant son had been placed in the curule chair, adorned with the title of *Nobilissimus*, and the vain ensigns of the consulship. Unconscious of his fortune, the royal youth, who, from his grandfather, assumed the name of Varronian, was reminded only by the jealousy of the government that he was the son of an emperor. Sixteen years afterwards he was still alive, but he had already been deprived of an eye; and his afflicted mother expected every hour that the innocent victim would be torn from her arms, to appease with his blood the suspicions of the reigning prince.[18](#)

After the death of Jovian, the throne of the Roman world remained ten days[19](#) without a master. The ministers and generals still continued to meet in council; to exercise their respective functions; to maintain the public order; and peaceably to conduct the army to the city of Nice in Bithynia, which was chosen for the place of the election.[20](#) In a solemn assembly of the civil and military powers of the empire, the diadem was again unanimously offered to the prefect Sallust. He enjoyed the glory of a second refusal; and, when the virtues of the father were alleged in favour of his son, the prefect, with the firmness of a disinterested patriot, declared to the electors that the feeble age of the one and the unexperienced youth of the other were equally incapable of the laborious duties of government. Several candidates were proposed, and, after weighing the objections of character or situation, they were successively rejected; but, as soon as the name of Valentinian was pronounced, the merit of that officer united the suffrages of the whole assembly, and obtained the sincere approbation of Sallust himself. Valentinian[21](#) was the son of Count Gratian,[22](#) a native of Cibalis, in Pannonia, who, from an obscure condition, had raised himself, by matchless strength and dexterity, to the military commands of Africa and Britain; from which he retired with an ample fortune and suspicious integrity. The rank and services of Gratian contributed, however, to smooth the first steps of the promotion of his son; and afforded him an early opportunity of displaying those solid and useful qualifications which raised his character above the ordinary level of his fellow-soldiers. The person of Valentinian was tall, graceful, and majestic. His manly countenance, deeply marked with the impression of sense and spirit, inspired his friends with awe, and his enemies with fear: and, to second the efforts of his undaunted courage, the son of Gratian had inherited the advantages of a strong and healthy constitution. By the habits of chastity and temperance, which restrain the appetites and invigorate the faculties, Valentinian preserved his own, and the public, esteem. The avocations of a military life had diverted his youth from the elegant pursuits of literature; he was ignorant of the Greek language and the arts of rhetoric; but, as the mind of the orator was never disconcerted by timid perplexity, he was able, as often as the occasion prompted him, to deliver his decided sentiments with bold and ready elocution. The laws of martial discipline were

the only laws that he had studied; and he was soon distinguished by the laborious diligence and inflexible severity with which he discharged and enforced the duties of the camp. In the time of Julian he provoked the danger of disgrace by the contempt which he publicly expressed for the reigning religion;[23](#) and it should seem from his subsequent conduct that the indiscreet and unseasonable freedom of Valentinian was the effect of military spirit rather than of Christian zeal. He was pardoned, however, and still employed by a prince who esteemed his merit:[24](#) and in the various events of the Persian war he improved the reputation which he had already acquired on the banks of the Rhine. The celerity and success with which he executed an important commission recommended him to the favour of Jovian, and to the honourable command of the second *school*, or company, of Targetteers, of the domestic guards. In the march from Antioch, he had reached his quarters at Ancyra, when he was unexpectedly summoned without guilt, and without intrigue, to assume, in the forty-third year of his age, the absolute government of the Roman empire.

The invitation of the ministers and generals at Nice was of little moment, unless it were confirmed by the voice of the army. The aged Sallust, who had long observed the irregular fluctuations of popular assemblies, proposed, under pain of death, that none of those persons whose rank in the service might excite a party in their favour should appear in public, on the day of the inauguration. Yet such was the prevalence of ancient superstition that a whole day was voluntarily added to this dangerous interval, because it happened to be the intercalation of the Bissextile.[25](#) At length, when the hour was supposed to be propitious, Valentinian showed himself from a lofty tribunal; the judicious choice was applauded; and the new prince was solemnly invested with the diadem and the purple, amidst the acclamations of the troops, who were disposed in martial order round the tribunal. But, when he stretched forth his hand to address the armed multitude, a busy whisper was accidentally started in the ranks, and insensibly swelled into a loud and imperious clamour, that he should name, without delay, a colleague in the empire. The intrepid calmness of Valentinian obtained silence and commanded respect, and he thus addressed the assembly: “A few minutes since it was in *your* power, fellow-soldiers, to have left me in the obscurity of a private station. Judging, from the testimony of my past life, that I deserved to reign, you have placed me on the throne. It is now *my* duty to consult the safety and interest of the republic. The weight of the universe is undoubtedly too great for the hands of a feeble mortal. I am conscious of the limits of my abilities and the uncertainty of my life; and far from declining, I am anxious to solicit, the assistance of a worthy colleague. But, where discord may be fatal, the choice of a faithful friend requires mature and serious deliberation. That deliberation shall be *my* care. Let *your* conduct be dutiful and consistent. Retire to your quarters; refresh your minds and bodies; and expect the accustomed donative on the accession of a new emperor.”[26](#) The astonished troops, with a mixture of pride, of satisfaction, and of terror, confessed the voice of their master. Their angry clamours subsided into silent reverence; and Valentinian,

encompassed with the eagles of the legions and the various banners of the cavalry and infantry, was conducted, in warlike pomp, to the palace of Nice. As he was sensible, however, of the importance of preventing some rash declaration of the soldiers, he consulted the assembly of the chiefs: and their real sentiments were concisely expressed by the generous freedom of Dagalaiphus. “Most excellent prince,” said that officer, “if you consider only your family, you have a brother; if you love the republic, look round for the most deserving of the Romans.”²⁷ The emperor, who suppressed his displeasure, without altering his intention, slowly proceeded from Nice to Nicomedia and Constantinople. In one of the suburbs of that capital,²⁸ thirty days after his own elevation, he bestowed the title of Augustus on his brother Valens; and, as the boldest patriots were convinced that their opposition, without being serviceable to their country, would be fatal to themselves, the declaration of his absolute will was received with silent submission. Valens was now in the thirty-sixth year of his age; but his abilities had never been exercised in any employment, military or civil; and his character had not inspired the world with any sanguine expectations. He possessed, however, one quality, which recommended him to Valentinian, and preserved the domestic peace of the empire: a devout and grateful attachment to his benefactor, whose superiority of genius, as well as of authority, Valens humbly and cheerfully acknowledged in every action of his life.²⁹

Before Valentinian divided the provinces, he reformed the administration of the empire. All ranks of subjects, who had been injured or oppressed under the reign of Julian, were invited to support their public accusations. The silence of mankind attested the spotless integrity of the prefect Sallust;³⁰ and his own pressing solicitations that he might be permitted to retire from the business of the state were rejected by Valentinian with the most honourable expressions of friendship and esteem. But among the favourites of the late emperor there were many who had abused his credulity or superstition, and who could no longer hope to be protected either by favour or justice.³¹ The greater part of the ministers of the palace and the governors of the provinces were removed from their respective stations; yet the eminent merit of some officers was distinguished from the obnoxious crowd; and, notwithstanding the opposite clamours of zeal and resentment, the whole proceedings of this delicate inquiry appear to have been conducted with a reasonable share of wisdom and moderation.³² The festivity of a new reign received a short and suspicious interruption from the sudden illness of the two princes; but, as soon as their health was restored, they left Constantinople in the beginning of the spring. In the castle or palace of Mediana, only three miles from Naissus, they executed the solemn and final division of the Roman empire.³³ Valentinian bestowed on his brother the rich prefecture of the *East*, from the Lower Danube to the confines of Persia; whilst he reserved for his immediate government the warlike prefectures of *Illyricum*, *Italy*, and *Gaul*, from the extremity of Greece to the Caledonian rampart; and from the rampart of Caledonia to the foot of Mount Atlas. The provincial administration remained on its former basis;

but a double supply of generals and magistrates was required for two councils and two courts: the division was made with a just regard to their peculiar merit and situation, and seven master-generals were soon created, either of the cavalry or infantry. When this important business had been amicably transacted, Valentinian and Valens embraced for the last time. The emperor of the West established his temporary residence at Milan; and the emperor of the East returned to Constantinople, to assume the dominion of fifty provinces, of whose language he was totally ignorant.[34](#)

The tranquillity of the East was soon disturbed by rebellion; and the throne of Valens was threatened by the daring attempts of a rival, whose affinity to the emperor Julian[35](#) was his sole merit, and had been his only crime. Procopius had been hastily promoted from the obscure station of a tribune and a notary to the joint command of the army of Mesopotamia; the public opinion already named him as the successor of a prince who was destitute of natural heirs; and a vain rumour was propagated by his friends, or his enemies, that Julian, before the altar of the Moon, at Carrhæ, had privately invested Procopius with the Imperial purple.[36](#) He endeavoured, by his dutiful and submissive behaviour, to disarm the jealousy of Jovian; resigned, without a contest, his military command; and retired, with his wife and family, to cultivate the ample patrimony which he possessed in the province of Cappadocia. These useful and innocent occupations were interrupted by the appearance of an officer, with a band of soldiers, who, in the name of his new sovereigns, Valentinian and Valens, was despatched to conduct the unfortunate Procopius either to a perpetual prison or an ignominious death. His presence of mind procured him a longer respite and a more splendid fate. Without presuming to dispute the royal mandate, he requested the indulgence of a few moments to embrace his weeping family; and, while the vigilance of his guards was relaxed by a plentiful entertainment, he dexterously escaped to the sea-coast of the Euxine, from whence he passed over to the country of Bosphorus. In that sequestered region he remained many months, exposed to the hardships of exile, of solitude, and of want: his melancholy temper brooding over his misfortunes, and his mind agitated by the just apprehension that, if any accident should discover his name, the faithless Barbarians would violate, without much scruple, the laws of hospitality. In a moment of impatience and despair, Procopius embarked in a merchant vessel, which made sail for Constantinople; and boldly aspired to the rank of a sovereign, because he was not allowed to enjoy the security of a subject. At first he lurked in the villages of Bithynia, continually changing his habitation, and his disguise.[37](#) By degrees he ventured into the capital, trusted his life and fortune to the fidelity of two friends, a senator and an eunuch, and conceived some hopes of success from the intelligence which he obtained of the actual state of public affairs. The body of the people was infected with a spirit of discontent: they regretted the justice and the abilities of Sallust, who had been imprudently dismissed from the prefecture of the East. They despised the character of Valens, which was rude without vigour and feeble without mildness. They dreaded the influence of his father-in-law, the Patrician Petronius, a cruel and rapacious minister, who rigorously exacted all the arrears of

tribute that might remain unpaid since the reign of the emperor Aurelian. The circumstances were propitious to the designs of an usurper. The hostile measures of the Persians required the presence of Valens in Syria; from the Danube to the Euphrates the troops were in motion; and the capital was occasionally filled with the soldiers who passed, or repassed, the Thracian Bosphorus. Two cohorts of Gauls were persuaded to listen to the secret proposals of the conspirators; which were recommended by the promise of a liberal donative; and, as they still revered the memory of Julian, they easily consented to support the hereditary claim of his proscribed kinsman. At the dawn of day they were drawn up near the baths of Anastasia;³⁸ and Procopius, clothed in a purple garment, more suitable to a player than to a monarch, appeared, as if he rose from the dead, in the midst of Constantinople. The soldiers, who were prepared for his reception, saluted their trembling prince with shouts of joy and vows of fidelity. Their numbers were soon increased by a sturdy band of peasants, collected from the adjacent country; and Procopius, shielded by the arms of his adherents, was successively conducted to the tribunal, the senate, and the palace. During the first moments of his tumultuous reign, he was astonished and terrified by the gloomy silence of the people; who were either ignorant of the cause or apprehensive of the event. But his military strength was superior to any actual resistance: the malcontents flocked to the standard of rebellion; the poor were excited by the hopes, and the rich were intimidated by the fear, of a general pillage; and the obstinate credulity of the multitude was once more deceived by the promised advantages of a revolution. The magistrates were seized; the prisons and arsenals broke open; the gates, and the entrance of the harbour, were diligently occupied; and, in a few hours, Procopius became the absolute, though precarious, master of the Imperial city. The usurper improved this unexpected success with some degree of courage and dexterity. He artfully propagated the rumours and opinions the most favourable to his interest; while he deluded the populace by giving audience to the frequent, but imaginary, ambassadors of distant nations. The large bodies of troops stationed in the cities of Thrace and the fortresses of the Lower Danube were gradually involved in the guilt of rebellion: and the Gothic princes consented to supply the sovereign of Constantinople with the formidable strength of several thousand auxiliaries. His generals passed the Bosphorus, and subdued, without an effort, the unarmed but wealthy provinces of Bithynia and Asia. After an honourable defence, the city and island of Cyzicus yielded to his power; the renowned legions of the Jovians and Herculians embraced the cause of the usurper whom they were ordered to crush; and, as the veterans were continually augmented with new levies, he soon appeared at the head of an army whose valour, as well as numbers, were not unequal to the greatness of the contest. The son of Hormisdas,³⁹ a youth of spirit and ability, condescended to draw his sword against the lawful emperor of the East; and the Persian prince was immediately invested with the ancient and extraordinary powers of a Roman Proconsul. The alliance of Faustina, the widow of the emperor Constantius, who entrusted herself and her daughter to the hands of the usurper, added dignity and reputation to his cause. The princess Constantia, who was then about five years of age,

accompanied in a litter the march of the army. She was shewn to the multitude in the arms of her adopted father; and, as often as she passed through the ranks, the tenderness of the soldiers was inflamed into martial fury:[40](#) they recollected the glories of the house of Constantine, and they declared, with loyal acclamation, that they would shed the last drop of their blood in the defence of the royal infant.[41](#)

In the meanwhile, Valentinian was alarmed and perplexed by the doubtful intelligence of the revolt of the East. The difficulties of a German war forced him to confine his immediate care to the safety of his own dominions; and, as every channel of communication was stopt or corrupted, he listened, with doubtful anxiety, to the rumours which were industriously spread, that the defeat and death of Valens had left Procopius sole master of the Eastern provinces. Valens was not dead: but, on the news of the rebellion, which he received at Cæsarea, he basely despaired of his life and fortune; proposed to negotiate with the usurper, and discovered his secret inclination to abdicate the Imperial purple. The timid monarch was saved from disgrace and ruin by the firmness of his ministers, and their abilities soon decided in his favour the event of the civil war. In a season of tranquillity, Sallust had resigned without a murmur; but, as soon as the public safety was attacked, he ambitiously solicited the pre-eminence of toil and danger; and the restoration of that virtuous minister to the prefecture of the East was the first step which indicated the repentance of Valens and satisfied the minds of the people. The reign of Procopius was apparently supported by powerful armies and obedient provinces. But many of the principal officers, military as well as civil, had been urged, either by motives of duty or interest, to withdraw themselves from the guilty scene; or to watch the moment of betraying and deserting the cause of the usurper. Lupicinus advanced, by hasty marches, to bring the legions of Syria to the aid of Valens. Arintheus, who, in strength, beauty, and valour, excelled all the heroes of the age, attacked with a small troop a superior body of the rebels. When he beheld the faces of the soldiers who had served under his banner, he commanded them, with a loud voice, to seize and deliver up their pretended leader; and such was the ascendant of his genius that this extraordinary order was instantly obeyed.[42](#) Arbetio, a respectable veteran of the great Constantine, who had been distinguished by the honours of the consulship, was persuaded to leave his retirement, and once more to conduct an army into the field. In the heat of action, calmly taking off his helmet, he shewed his grey hairs, and venerable countenance; saluted the soldiers of Procopius by the endearing names of children and companions, and exhorted them, no longer to support the desperate cause of a contemptible tyrant; but to follow their old commander, who had so often led them to honour and victory. In the two engagements of Thyatira[43](#) and Nacolia, the unfortunate Procopius was deserted by his troops, who were seduced by the instructions and example of their perfidious officers. After wandering some time among the woods and mountains of Phrygia, he was betrayed by his desponding followers, conducted to the Imperial camp, and immediately beheaded. He suffered the ordinary fate of an unsuccessful usurper; but the acts of cruelty which were exercised by the conqueror, under the forms of legal justice, excited the pity and

indignation of mankind.[44](#)

Such indeed are the common and natural fruits of despotism and rebellion. But the inquisition into the crime of magic, which, under the reign of the two brothers, was so rigorously prosecuted both at Rome and Antioch, was interpreted as the fatal symptom either of the displeasure of heaven or of the depravity of mankind.[45](#) Let us not hesitate to indulge a liberal pride that in the present age the enlightened part of Europe has abolished[46](#) a cruel and odious prejudice, which reigned in every climate of the globe and adhered to every system of religious opinions.[47](#) The nations and the sects of the Roman world admitted with equal credulity and similar abhorrence the reality of that infernal art[48](#) which was able to control the eternal order of the planets and the voluntary operations of the human mind. They dreaded the mysterious power of spells and incantations, of potent herbs, and execrable rites; which could extinguish or recall life, inflame the passions of the soul, blast the works of creation, and extort from the reluctant demons the secrets of futurity. They believed, with the wildest inconsistency, that this preternatural dominion of the air, of earth, and of hell was exercised, from the vilest motives of malice or gain, by some wrinkled hags and itinerant sorcerers, who passed their obscure lives in penury and contempt.[49](#) The arts of magic were equally condemned by the public opinion and by the laws of Rome; but, as they tended to gratify the most imperious passions of the heart of man, they were continually proscribed, and continually practised.[50](#) An imaginary cause is capable of producing the most serious and mischievous effects. The dark predictions of the death of an emperor, or the success of a conspiracy, were calculated only to stimulate the hopes of ambition and to dissolve the ties of fidelity; and the intentional guilt of magic was aggravated by the actual crimes of treason and sacrilege.[51](#) Such vain terrors disturbed the peace of society and the happiness of individuals; and the harmless flame which insensibly melted a waxen image might derive a powerful and pernicious energy from the affrighted fancy of the person whom it was maliciously designed to represent.[52](#) From the infusion of those herbs which were supposed to possess a supernatural influence it was an easy step to the use of more substantial poison; and the folly of mankind sometimes became the instrument, and the mask, of the most atrocious crimes. As soon as the zeal of informers was encouraged by the ministers of Valens and Valentinian, they could not refuse to listen to another charge, too frequently mingled in the scenes of domestic guilt; a charge of a softer and less malignant nature, for which the pious, though excessive, rigour of Constantine had recently decreed the punishment of death.[53](#) This deadly and incoherent mixture of treason and magic, of poison and adultery, afforded infinite gradations of guilt and innocence, of excuse and aggravation, which in these proceedings appear to have been confounded by the angry or corrupt passions of the judges. They easily discovered that the degree of their industry and discernment was estimated, by the Imperial court, according to the number of executions that were furnished from their respective tribunals. It was not without extreme reluctance that they pronounced a sentence of acquittal; but they

eagerly admitted such evidence as was stained with perjury, or procured by torture, to prove the most improbable charges against the most respectable characters. The progress of the inquiry continually opened new subjects of criminal prosecution; the audacious informer, whose falsehood was detected, retired with impunity; but the wretched victim, who discovered his real or pretended accomplices, was seldom permitted to receive the price of his infamy. From the extremity of Italy and Asia, the young and the aged were dragged in chains to the tribunals of Rome and Antioch. Senators, matrons, and philosophers expired in ignominious and cruel tortures. The soldiers, who were appointed to guard the prisons, declared, with a murmur of pity and indignation, that their numbers were insufficient to oppose the flight or resistance of the multitude of captives. The wealthiest families were ruined by fines and confiscations; the most innocent citizens trembled for their safety; and we may form some notion of the magnitude of the evil from the extravagant assertion of an ancient writer that, in the obnoxious provinces, the prisoners, the exiles, and the fugitives formed the greatest part of the inhabitants.[54](#)

When Tacitus describes the deaths of the innocent and illustrious Romans, who were sacrificed to the cruelty of the first Cæsars, the art of the historian, or the merit of the sufferers, excite in our breasts the most lively sensations of terror, of admiration, and of pity. The coarse and undistinguishing pencil of Ammianus has delineated his bloody figures with tedious and disgusting accuracy. But, as our attention is no longer engaged by the contrast of freedom and servitude, of recent greatness and of actual misery, we should turn with horror from the frequent executions which disgraced, both at Rome and Antioch, the reign of the two brothers.[55](#) Valens was of a timid,[56](#) and Valentinian of a choleric, disposition.[57](#) An anxious regard to his personal safety was the ruling principle of the administration of Valens. In the condition of a subject, he had kissed, with trembling awe, the hand of the oppressor; and, when he ascended the throne, he reasonably expected that the same fears which had subdued his own mind would secure the patient submission of his people. The favourites of Valens obtained, by the privilege of rapine and confiscation, the wealth which his economy would have refused.[58](#) They urged, with persuasive eloquence, *that*, in all cases of treason, suspicion is equivalent to proof; *that* the power, supposes the intention, of mischief; *that* the intention is not less criminal than the act; and *that* a subject no longer deserves to live, if his life may threaten the safety, or disturb the repose, of his sovereign. The judgment of Valentinian was sometimes deceived and his confidence abused; but he would have silenced the informers with a contemptuous smile, had they presumed to alarm his fortitude by the sound of danger. They praised his inflexible love of justice; and, in the pursuit of justice, the emperor was easily tempted to consider clemency as a weakness and passion as a virtue. As long as he wrestled with his equals, in the bold competition of an active and ambitious life, Valentinian was seldom injured, and never insulted, with impunity: if his prudence was arraigned, his spirit was applauded; and the proudest and most powerful generals were apprehensive of provoking the

resentment of a fearless soldier. After he became master of the world, he unfortunately forgot that, where no resistance can be made, no courage can be exerted; and, instead of consulting the dictates of reason and magnanimity, he indulged the furious emotions of his temper at a time when they were disgraceful to himself and fatal to the defenceless objects of his displeasure. In the government of his household, or of his empire, slight, or even imaginary, offences, a hasty word, a casual omission, an involuntary delay, were chastised by a sentence of immediate death. The expressions which issued the most readily from the mouth of the emperor of the West were, “Strike off his head”; “Burn him alive”; “Let him be beaten with clubs till he expires”;⁵⁹ and his most favoured ministers soon understood that, by a rash attempt to dispute, or suspend, the execution of his sanguinary commands, they might involve themselves in the guilt and punishment of disobedience. The repeated gratification of this savage justice hardened the mind of Valentinian against pity and remorse; and the sallies of passion were confirmed by the habits of cruelty.⁶⁰ He could behold with calm satisfaction the convulsive agonies of torture and death: he reserved his friendship for those faithful servants whose temper was the most congenial to his own. The merit of Maximin, who had slaughtered the noblest families of Rome, was rewarded with the royal approbation and the prefecture of Gaul. Two fierce and enormous bears, distinguished by the appellations of *Innocence* and *Mica Aurea*, could alone deserve to share the favour of Maximin. The cages of those trusty guards were always placed near the bed-chamber of Valentinian, who frequently amused his eyes with the grateful spectacle of seeing them tear and devour the bleeding limbs of the malefactors who were abandoned to their rage. Their diet and exercises were carefully inspected by the Roman emperor; and, when *Innocence* had earned her discharge by a long course of meritorious service, the faithful animal was again restored to the freedom of her native woods.⁶¹

But in the calmer moments of reflection, when the mind of Valens was not agitated by fear, or that of Valentinian by rage, the tyrant resumed the sentiments, or at least the conduct, of the father of his country. The dispassionate judgment of the Western emperor could clearly perceive, and accurately pursue, his own and the public interest; and the sovereign of the East, who imitated with equal docility the various examples which he received from his elder brother, was sometimes guided by the wisdom and virtue of the prefect Sallust. Both princes invariably retained, in the purple, the chaste and temperate simplicity which had adorned their private life; and, under their reign, the pleasures of the court never cost the people a blush or a sigh. They gradually reformed many of the abuses of the times of Constantius; judiciously adopted and improved the designs of Julian and his successor; and displayed a style and spirit of legislation which might inspire posterity with the most favourable opinion of their character and government. It is not from the master of *Innocence* that we should expect the tender regard for the welfare of his subjects which prompted Valentinian to condemn the exposition of new-born infants;⁶² and to establish fourteen skilful physicians, with stipends and privileges, in the fourteen quarters of Rome. The good

sense of an illiterate soldier founded an useful and liberal institution for the education of youth, and the support of declining science.[63](#) It was his intention that the arts of rhetoric and grammar should be taught in the Greek and Latin languages in the metropolis of every province; and as the size and dignity of the school was usually proportioned to the importance of the city, the academies of Rome and Constantinople claimed a just and singular pre-eminence. The fragments of the literary edicts of Valentinian imperfectly represent the school of Constantinople, which was gradually improved by subsequent regulations. That school consisted of thirty-one professors in different branches of learning. One philosopher, and two lawyers; five sophists and ten grammarians for the Greek, and three orators and ten grammarians for the Latin, tongue; besides seven scribes, or, as they were then styled, antiquarians, whose laborious pens supplied the public library with fair and correct copies of the classic writers. The rule of conduct, which was prescribed to the students, is the more curious, as it affords the first outlines of the form and discipline of a modern university. It was required that they should bring proper certificates from the magistrates of their native province. Their names, professions, and places of abode were regularly entered in a public register. The studious youth were severely prohibited from wasting their time in feasts or in the theatre; and the term of their education was limited to the age of twenty. The prefect of the city was empowered to chastise the idle and refractory, by stripes or expulsion; and he was directed to make an annual report to the master of the offices, that the knowledge and abilities of the scholars might be usefully applied to the public service. The institutions of Valentinian contributed to secure the benefits of peace and plenty; and the cities were guarded by the establishment of the *Defensors*,[64](#) freely elected as the tribunes and advocates of the people, to support their rights and to expose their grievances before the tribunals of the civil magistrates, or even at the foot of the Imperial throne. The finances were diligently administered by two princes, who had been so long accustomed to the rigid economy of a private fortune; but in the receipt and application of the revenue a discerning eye might observe some difference between the government of the East and of the West. Valens was persuaded that royal liberality can be supplied only by public oppression, and his ambition never aspired to secure, by their actual distress, the future strength and prosperity of his people. Instead of increasing the weight of taxes, which, in the space of forty years, had been gradually doubled, he reduced, in the first years of his reign, one-fourth of the tribute of the East.[65](#) Valentinian appears to have been less attentive and less anxious to relieve the burthens of his people. He might reform the abuses of the fiscal administration; but he exacted, without scruple, a very large share of the private property; as he was convinced that the revenues, which supported the luxury of individuals, would be much more advantageously employed for the defence and improvement of the state. The subjects of the East, who enjoyed the present benefit, applauded the indulgence of their prince. The solid, but less splendid, merit of Valentinian was felt and acknowledged by the subsequent generation.[66](#)

But the most honourable circumstance of the character of Valentinian is the firm and temperate impartiality which he uniformly preserved in an age of religious contention. His strong sense, unenlightened, but uncorrupted, by study, declined, with respectful indifference, the subtle questions of theological debate. The government of the *Earth* claimed his vigilance and satisfied his ambition; and, while he remembered that he was the disciple of the church, he never forgot that he was the sovereign of the clergy. Under the reign of an apostate, he had signalised his zeal for the honour of Christianity: he allowed to his subjects the privilege which he had assumed for himself; and they might accept, with gratitude and confidence, the general toleration which was granted by a prince addicted to passion, but incapable of fear or of disguise.⁶⁷ The Pagans, the Jews, and all the various sects which acknowledged the divine authority of Christ were protected by the laws from arbitrary power or popular insult: nor was any mode of worship prohibited by Valentinian, except those secret and criminal practices which abused the name of religion for the dark purposes of vice and disorder. The art of magic, as it was more cruelly punished, was more strictly proscribed; but the emperor admitted a formal distinction to protect the ancient methods of divination, which were approved by the senate and exercised by the Tuscan haruspices. He had condemned, with the consent of the most rational Pagans, the licence of nocturnal sacrifices; but he immediately admitted the petition of Prætextatus, proconsul of Achaia, who represented that the life of the Greeks would become dreary and comfortless, if they were deprived of the invaluable blessing of the Eleusinian mysteries. Philosophy alone can boast (and perhaps it is no more than the boast of philosophy), that her gentle hand is able to eradicate from the human mind the latent and deadly principle of fanaticism. But this truce of twelve years, which was enforced by the wise and vigorous government of Valentinian, by suspending the repetition of mutual injuries, contributed to soften the manners, and abate the prejudices, of the religious factions.

The friend of toleration was unfortunately placed at a distance from the scene of the fiercest controversies. As soon as the Christians of the West had extricated themselves from the snares of the creed of Rimini, they happily relapsed into the slumber of orthodoxy; and the small remains of the Arian party that still subsisted at Sirmium or Milan might be considered rather as objects of contempt than of resentment. But in the provinces of the East, from the Euxine to the extremity of Thebais, the strength and numbers of the hostile factions were more equally balanced; and this equality, instead of recommending the counsels of peace, served only to perpetuate the horrors of religious war. The monks and bishops supported their arguments by invectives; and their invectives were sometimes followed by blows. Athanasius still reigned at Alexandria; the thrones of Constantinople and Antioch were occupied by Arian prelates, and every episcopal vacancy was the occasion of a popular tumult. The Homousians were fortified by the reconciliation of fifty-nine Macedonian, or Semi-Arian, bishops; but their secret reluctance to embrace the divinity of the Holy Ghost clouded the splendour of the triumph: and the declaration of Valens, who, in the first

years of his reign, had imitated the impartial conduct of his brother, was an important victory on the side of Arianism. The two brothers had passed their private life in the condition of catechumens; but the piety of Valens prompted him to solicit the sacrament of baptism, before he exposed his person to the dangers of a Gothic war. He naturally addressed himself to Eudoxus,[68](#) bishop of the Imperial city; and, if the ignorant monarch was instructed by that Arian pastor in the principles of heterodox theology, his misfortune, rather than his guilt, was the inevitable consequence of his erroneous choice. Whatever had been the determination of the emperor, he must have offended a numerous party of his Christian subjects; as the leaders both of the Homoousians and of the Arians believed that, if they were not suffered to reign, they were most cruelly injured and oppressed. After he had taken this decisive step, it was extremely difficult for him to preserve either the virtue or the reputation of impartiality. He never aspired, like Constantius, to the fame of a profound theologian; but, as he had received with simplicity and respect the tenets of Eudoxus, Valens resigned his conscience to the direction of his ecclesiastical guides, and promoted, by the influence of his authority, the re-union of the *Athanasian heretics* to the body of the Catholic church. At first, he pitied their blindness; by degrees he was provoked at their obstinacy; and he insensibly hated those sectaries to whom he was an object of hatred.[69](#) The feeble mind of Valens was always swayed by the persons with whom he familiarly conversed; and the exile or imprisonment of a private citizen are the favours the most readily granted in a despotic court. Such punishments were frequently inflicted on the leaders of the Homoousian party; and the misfortune of fourscore ecclesiastics of Constantinople, who, perhaps accidentally, were burnt on shipboard, was imputed to the cruel and premeditated malice of the emperor and his Arian ministers. In every contest, the Catholics (if we may anticipate that name) were obliged to pay the penalty of their own faults, and of those of their adversaries. In every election, the claims of the Arian candidate obtained the preference; and, if they were opposed by the majority of the people, he was usually supported by the authority of the civil magistrate, or even by the terrors of a military force. The enemies of Athanasius attempted to disturb the last years of his venerable age; and his temporary retreat to his father's sepulchre has been celebrated as a fifth exile. But the zeal of a great people who instantly flew to arms, intimidated the prefect; and the archbishop was permitted to end his life in peace and in glory, after a reign of forty-seven years. The death of Athanasius was the signal of the persecution of Egypt; and the Pagan minister of Valens, who forcibly seated the worthless Lucius on the archiepiscopal throne, purchased the favour of the reigning party by the blood and sufferings of their Christian brethren. The free toleration of the heathen and Jewish worship was bitterly lamented, as a circumstance which aggravated the misery of the Catholics and the guilt of the impious tyrant of the East.[70](#)

The triumph of the orthodox party has left a deep stain of persecution on the memory of Valens; and the character of a prince who derived his virtues, as well as his vices, from a feeble understanding and a pusillanimous temper scarcely deserves the labour

of an apology. Yet candour may discover some reasons to suspect that the ecclesiastical ministers of Valens often exceeded the orders, or even the intentions, of their master; and that the real measure of facts has been very liberally magnified by the vehement declamation and easy credulity of his antagonists.[71](#) 1. The silence of Valentinian may suggest a probable argument, that the partial severities, which were exercised in the name and provinces of his colleague, amounted only to some obscure and inconsiderable deviations from the established system of religious toleration: and the judicious historian, who has praised the equal temper of the elder brother, has not thought himself obliged to contrast the tranquillity of the West with the cruel persecution of the East.[72](#) 2. Whatever credit may be allowed to vague and distant reports, the character, or at least the behaviour, of Valens may be most distinctly seen in his personal transactions with the eloquent Basil, archbishop of Cæsarea, who had succeeded Athanasius in the management of the Trinitarian cause.[73](#) The circumstantial narrative has been composed by the friends and admirers of Basil; and, as soon as we have stripped away a thick coat of rhetoric and miracle, we shall be astonished by the unexpected mildness of the Arian tyrant, who admired the firmness of his character, or was apprehensive, if he employed violence, of a general revolt in the province of Cappadocia. The archbishop, who asserted, with inflexible pride,[74](#) the truth of his opinions and the dignity of his rank, was left in the free possession of his conscience and his throne. The emperor devoutly assisted at the solemn service of the cathedral; and, instead of a sentence of banishment, subscribed the donation of a valuable estate for the use of an hospital which Basil had lately founded in the neighbourhood of Cæsarea.[75](#) 3. I am not able to discover that any law (such as Theodosius afterwards enacted against the Arians) was published by Valens against the Athanasian sectaries; and the edict which excited the most violent clamours may not appear so extremely reprehensible. The emperor had observed that several of his subjects, gratifying their lazy disposition under the pretence of religion, had associated themselves with the monks of Egypt; and he directed the count of the East to drag them from their solitude; and to compel those deserters of society to accept the fair alternative of renouncing their temporal possessions or of discharging the public duties of men and citizens.[76](#) The ministers of Valens seem to have extended the sense of this penal statute, since they claimed a right of enlisting the young and able-bodied monks in the Imperial armies. A detachment of cavalry and infantry, consisting of three thousand men, marched from Alexandria into the adjacent desert of Nitria,[77](#) which was peopled by five thousand monks. The soldiers were conducted by Arian priests; and it is reported that a considerable slaughter was made in the monasteries which disobeyed the commands of their sovereign.[78](#)

The strict regulations which have been framed by the wisdom of modern legislators to restrain the wealth and avarice of the clergy may be originally deduced from the example of the emperor Valentinian. His edict[79](#) addressed to Damasus, bishop of Rome, was publicly read in the churches of the city. He admonished the ecclesiastics

and monks not to frequent the houses of widows and virgins; and menaced their disobedience with the animadversion of the civil judge. The director was no longer permitted to receive any gift, or legacy, or inheritance, from the liberality of his spiritual daughter; every testament contrary to this edict was declared null and void; and the illegal donation was confiscated for the use of the treasury. By a subsequent regulation it should seem that the same provisions were extended to nuns and bishops; and that all persons of the ecclesiastical order were rendered incapable of receiving any testamentary gifts, and strictly confined to the natural and legal rights of inheritance. As the guardian of domestic happiness and virtue, Valentinian applied this severe remedy to the growing evil. In the capital of the empire, the females of noble and opulent houses possessed a very ample share of independent property: and many of those devout females had embraced the doctrines of Christianity, not only with the cold assent of the understanding, but with the warmth of affection, and perhaps with the eagerness of fashion. They sacrificed the pleasures of dress and luxury; and renounced, for the praise of chastity, the soft endearments of conjugal society. Some ecclesiastic, of real or apparent sanctity, was chosen to direct their timorous conscience and to amuse the vacant tenderness of their heart: and the unbounded confidence which they hastily bestowed was often abused by knaves and enthusiasts; who hastened from the extremities of the East to enjoy, on a splendid theatre, the privileges of the monastic profession. By their contempt of the world, they insensibly acquired its most desirable advantages; the lively attachment, perhaps, of a young and beautiful woman, the delicate plenty of an opulent household, and the respectful homage of the slaves, the freedmen, and the clients of a senatorial family. The immense fortunes of the Roman ladies were gradually consumed in lavish alms and expensive pilgrimages; and the artful monk, who had assigned himself the first or possibly the sole place in the testament of his spiritual daughter, still presumed to declare, with the smooth face of hypocrisy, that *he* was only the instrument of charity and the steward of the poor. The lucrative, but disgraceful, trade⁸⁰ which was exercised by the clergy to defraud the expectations of the natural heirs had provoked the indignation of a superstitious age: and two of the most respectable of the Latin fathers very honestly confess that the ignominious edict of Valentinian was just and necessary; and that the Christian priests had deserved to lose a privilege which was still enjoyed by comedians, charioteers, and the ministers of idols. But the wisdom and authority of the legislator are seldom victorious in a contest with the vigilant dexterity of private interest: and Jerom or Ambrose might patiently acquiesce in the justice of an ineffectual or salutary law. If the ecclesiastics were checked in the pursuit of personal emolument, they would exert a more laudable industry to increase the wealth of the church, and dignify their covetousness with the specious names of piety and patriotism.⁸¹

Damasus, bishop of Rome, who was constrained to stigmatise the avarice of his clergy by the publication of the law of Valentinian, had the good sense or the good fortune to engage in his service the zeal and abilities of the learned Jerom; and the grateful saint

has celebrated the merit and purity of a very ambiguous character.⁸² But the splendid vices of the church of Rome, under the reign of Valentinian and Damasus, have been curiously observed by the historian Ammianus, who delivers his impartial sense in these expressive words: “The prefecture of Juventius⁸³ was accompanied with peace and plenty: but the tranquillity of his government was soon disturbed by a bloody sedition of the distracted people. The ardour of Damasus and Ursinus, to seize the episcopal seat, surpassed the ordinary measure of human ambition. They contended with the rage of party; the quarrel was maintained by the wounds and death of their followers; and the prefect, unable to resist or to appease the tumult, was constrained, by superior violence, to retire into the suburbs. Damasus prevailed: the well-disputed victory remained on the side of his faction; one hundred and thirty-seven dead bodies⁸⁴ were found in the *Basilica* of Sicininus,⁸⁵ where the Christians hold their religious assemblies; and it was long before the angry minds of the people resumed their accustomed tranquillity. When I consider the splendour of the capital, I am not astonished that so valuable a prize should inflame the desires of ambitious men, and produce the fiercest and most obstinate contests. The successful candidate is secure that he will be enriched by the offerings of matrons;⁸⁶ that, as soon as his dress is composed with becoming care and elegance, he may proceed, in his chariot, through the streets of Rome;⁸⁷ and that the sumptuousness of the Imperial table will not equal the profuse and delicate entertainments provided by the taste, and at the expense, of the Roman pontiffs. How much more rationally (continues the honest Pagan) would those pontiffs consult their true happiness, if, instead of alleging the greatness of the city as an excuse for their manners, they would imitate the exemplary life of some provincial bishops, whose temperance and sobriety, whose mean apparel and downcast looks, recommended their pure and modest virtue to the Deity and his true worshippers.”⁸⁸ The schism of Damasus and Ursinus was extinguished by the exile of the latter; and the wisdom of the prefect Prætextatus⁸⁹ restored the tranquillity of the city. Prætextatus was a philosophic Pagan, a man of learning, of taste, and politeness; who disguised a reproach in the form of a jest, when he assured Damasus that, if he could obtain the bishopric of Rome, he himself would immediately embrace the Christian religion.⁹⁰ This lively picture of the wealth and luxury of the popes in the fourth century becomes the more curious as it represents the intermediate degree between the humble poverty of the apostolic fisherman and the royal state of a temporal prince whose dominions extend from the confines of Naples to the banks of the Po.

When the suffrage of the generals and of the army committed the sceptre of the Roman empire to the hands of Valentinian, his reputation in arms, his military skill and experience, and his rigid attachment to the forms, as well as spirit, of ancient discipline were the principal motives of their judicious choice. The eagerness of the troops who pressed him to nominate his colleague was justified by the dangerous situation of public affairs; and Valentinian himself was conscious that the abilities of the most

active mind were unequal to the defence of the distant frontiers of an invaded monarchy. As soon as the death of Julian had relieved the Barbarians from the terror of his name, the most sanguine hopes of rapine and conquest excited the nations of the East, and of the North, and of the South. Their inroads were often vexatious, and sometimes formidable; but, during the twelve years of the reign of Valentinian, his firmness and vigilance protected his own dominions; and his powerful genius seemed to inspire and direct the feeble counsels of his brother. Perhaps the method of annals would more forcibly express the urgent and divided cares of the two emperors; but the attention of the reader, likewise, would be distracted by a tedious and desultory narrative. A separate view of the five great theatres of war: I. Germany; II. Britain; III. Africa; IV. The East; and, V. The Danube; will impress a more distinct image of the military state of the empire under the reigns of Valentinian and Valens.

Battle between Romans and Gauls (from a bas-relief)

I. The ambassadors of the Alemanni had been offended by the harsh and haughty behaviour of Ursacius, master of the offices;[91](#) who, by an act of unseasonable parsimony, had diminished the value, as well as the quantity, of the presents to which they were entitled, either from custom or treaty, on the accession of a new emperor. They expressed, and they communicated to their countrymen, their strong sense of the national affront. The irascible minds of the chiefs were exasperated by the suspicion of contempt; and the martial youth crowded to their standard. Before Valentinian could

pass the Alps, the villages of Gaul were in flames; before his general Dagalaiphus could encounter the Alemanni, they had secured the captives and the spoil in the forests of Germany. In the beginning of the ensuing year, the military force of the whole nation, in deep and solid columns, broke through the barrier of the Rhine, during the severity of a Northern winter. Two Roman counts were defeated and mortally wounded; and the standard of the Heruli and Batavians fell into the hands of the conquerors, who displayed, with insulting shouts and menaces, the trophy of their victory. The standard was recovered; but the Batavians had not redeemed the shame of their disgrace and flight in the eyes of their severe judge. It was the opinion of Valentinian that his soldiers must learn to fear their commander, before they could cease to fear the enemy. The troops were solemnly assembled; and the trembling Batavians were enclosed within the circle of the Imperial army. Valentinian then ascended his tribunal; and, as if he disdained to punish cowardice with death, he inflicted a stain of indelible ignominy on the officers whose misconduct and pusillanimity were found to be the first occasion of the defeat. The Batavians were degraded from their rank, stripped of their arms, and condemned to be sold for slaves to the highest bidder. At this tremendous sentence the troops fell prostrate on the ground, deprecated the indignation of their sovereign, and protested that, if he would indulge them in another trial, they would approve themselves not unworthy of the name of Romans, and of his soldiers. Valentinian, with affected reluctance, yielded to their entreaties: the Batavians resumed their arms, and, with their arms, the invincible resolution of wiping away their disgrace in the blood of the Alemanni.⁹² The principal command was declined by Dagalaiphus; and that experienced general, who had represented, perhaps with too much prudence, the extreme difficulties of the undertaking, had the mortification, before the end of the campaign, of seeing his rival Jovinus convert those difficulties into a decisive advantage over the scattered forces of the Barbarians. At the head of a well-disciplined army of cavalry, infantry, and light troops, Jovinus advanced, with cautious and rapid steps, to Scarponna,⁹³ in the territory of Metz, where he surprised a large division of the Alemanni, before they had time to run to their arms: and flushed his soldiers with the confidence of an easy and bloodless victory. Another division, or rather army, of the enemy, after the cruel and wanton devastation of the adjacent country, reposed themselves on the shady banks of the Moselle. Jovinus, who had viewed the ground with the eyes of a general, made his silent approach through a deep and woody vale, till he could distinctly perceive the indolent security of the Germans. Some were bathing their huge limbs in the river; others were combing their long and flaxen hair; others again were swallowing large draughts of rich and delicious wine. On a sudden they heard the sound of the Roman trumpet; they saw the enemy in their camp. Astonishment produced disorder; disorder was followed by flight and dismay; and the confused multitude of the bravest warriors was pierced by the swords and javelins of the legionaries and auxiliaries. The fugitives escaped to the third and most considerable camp, in the Catalaunian plains, near Châlons in Champagne: the straggling detachments were hastily recalled to their standard; and the Barbarian chiefs, alarmed and admonished by the fate of their

companions, prepared to encounter, in a decisive battle, the victorious forces of the lieutenant of Valentinian. The bloody and obstinate conflict lasted a whole summer's day, with equal valour, and with alternate success. The Romans at length prevailed, with the loss of about twelve hundred men. Six thousand of the Alemanni were slain, four thousand were wounded; and the brave Jovinus, after chasing the flying remnant of their host as far as the banks of the Rhine, returned to Paris, to receive the applause of his sovereign and the ensigns of the consulship for the ensuing year.⁹⁴ The triumph of the Romans was indeed sullied by their treatment of the captive king, whom they hung on a gibbet without the knowledge of their indignant general. This disgraceful act of cruelty, which might be imputed to the fury of the troops, was followed by the deliberate murder of Withicab, the son of Vadomair; a German prince, of a weak and sickly constitution, but of a daring and formidable spirit. The domestic assassin was instigated and protected by the Romans;⁹⁵ and the violation of the laws of humanity and justice betrayed their secret apprehension of the weakness of the declining empire. The use of the dagger is seldom adopted in public councils, as long as they retain any confidence in the power of the sword.

While the Alemanni appeared to be humbled by their recent calamities, the pride of Valentinian was mortified by the unexpected surprisal of Moguntiacum, or Mentz, the principal city of the Upper Germany. In the unsuspecting moment of a Christian festival, Rando, a bold and artful chieftain, who had long meditated his attempt, suddenly passed the Rhine; entered the defenceless town, and retired with a multitude of captives of either sex. Valentinian resolved to execute severe vengeance on the whole body of the nation. Count Sebastian, with the bands of Italy and Illyricum, was ordered to invade their country, most probably on the side of Rhætia. The emperor in person, accompanied by his son Gratian, passed the Rhine at the head of a formidable army, which was supported on both flanks by Jovinus and Severus, the two masters-general of the cavalry and infantry of the West. The Alemanni, unable to prevent the devastation of their villages, fixed their camp on a lofty, and almost inaccessible, mountain, in the modern duchy of Wirtemberg, and resolutely expected the approach of the Romans. The life of Valentinian was exposed to imminent danger by the intrepid curiosity with which he persisted to explore some secret and unguarded path. A troop of Barbarians suddenly rose from their ambuscade: and the emperor, who vigorously spurred his horse down a steep and slippery descent, was obliged to leave behind him his armour-bearer, and his helmet, magnificently enriched with gold and precious stones. At the signal of the general assault, the Roman troops encompassed and ascended the mountain of Solicinium on three different sides. Every step which they gained increased their ardour and abated the resistance of the enemy: and, after their united forces had occupied the summit of the hill, they impetuously urged the Barbarians down the northern descent where Count Sebastian was posted to intercept their retreat. After this signal victory, Valentinian returned to his winter quarters at Treves; where he indulged the public joy by the exhibition of splendid and triumphal games.⁹⁶ But the wise monarch, instead of aspiring to the conquest of Germany,

confined his attention to the important and laborious defence of the Gallic frontier, against an enemy whose strength was renewed by a stream of daring volunteers, which incessantly flowed from the most distant tribes of the North.⁹⁷ The banks of the Rhine, from its source to the straits of the ocean, were closely planted with strong castles and convenient towers; new works, and new arms, were invented by the ingenuity of a prince who was skilled in the mechanical arts; and his numerous levies of Roman and Barbarian youth were severely trained in all the exercises of war. The progress of the work, which was sometimes opposed by modest representations, and sometimes by hostile attempts, secured the tranquillity of Gaul during the nine subsequent years of the administration of Valentinian.⁹⁸

That prudent emperor, who diligently practised the wise maxims of Diocletian, was studious to foment and excite the intestine divisions of the tribes of Germany. About the middle of the fourth century, the countries, perhaps of Lusace and Thuringia, on either side of the Elbe were occupied by the vague dominion of the Burgundians; a warlike and numerous people of the Vandal race,⁹⁹ whose obscure name insensibly swelled into a powerful kingdom, and has finally settled on a flourishing province. The most remarkable circumstance in the ancient manners of the Burgundians appears to have been the difference of their civil and ecclesiastical constitution. The appellation of *Hendinos* was given to the king or general, and the title of *Sinistus* to the high priest, of the nation. The person of the priest was sacred, and his dignity perpetual; but the temporal government was held by a very precarious tenure. If the events of war accused the courage or conduct of the king, he was immediately deposed; and the injustice of his subjects made him responsible for the fertility of the earth and the regularity of the seasons, which seemed to fall more properly within the sacerdotal department.¹⁰⁰ The disputed possession of some salt-pits¹⁰¹ engaged the Alemanni and the Burgundians in frequent contests: the latter were easily tempted by the secret solicitations and liberal offers of the emperor; and their fabulous descent from the Roman soldiers who had formerly been left to garrison the fortresses of Drusus was admitted with mutual credulity, as it was conducive to mutual interest.¹⁰² An army of fourscore thousand Burgundians soon appeared on the banks of the Rhine; and impatiently required the support and subsidies which Valentinian had promised: but they were amused with excuses and delays, till at length, after a fruitless expectation, they were compelled to retire. The arms and fortifications of the Gallic frontier checked the fury of their just resentment; and their massacre of the captives served to embitter the hereditary feud of the Burgundians and the Alemanni. The inconstancy of a wise prince may, perhaps, be explained by some alteration of circumstances; and perhaps it was the original design of Valentinian to intimidate rather than to destroy, as the balance of power would have been equally overturned by the extirpation of either of the German nations. Among the princes of the Alemanni, Macrianus, who, with a Roman name, had assumed the arts of a soldier and a statesman, deserved his hatred and esteem. The emperor himself, with a light and unencumbered band, condescended

to pass the Rhine, marched fifty miles into the country, and would infallibly have seized the object of his pursuit, if his judicious measures had not been defeated by the impatience of the troops. Macrianus was afterwards admitted to the honour of a personal conference with the emperor; and the favours which he received fixed him, till the hour of his death, a steady and sincere friend of the republic.[103](#)

The land was covered by the fortifications of Valentinian; but the sea-coast of Gaul and Britain was exposed to the depredations of the Saxons. That celebrated name, in which we have a dear and domestic interest, escaped the notice of Tacitus; and in the maps of Ptolemy it faintly marks the narrow neck of the Cimbric peninsula and three small islands towards the mouth of the Elbe.[104](#) This contracted territory, the present Duchy of Sleswig, or perhaps of Holstein, was incapable of pouring forth the inexhaustible swarms of Saxons who reigned over the ocean, who filled the British island with their language, their laws, and their colonies; and who so long defended the liberty of the North against the arms of Charlemagne.[105](#) The solution of this difficulty is easily derived from the similar manners and loose constitution of the tribes of Germany; which were blended with each other by the slightest accidents of war or friendship. The situation of the native Saxons disposed them to embrace the hazardous professions of fishermen and pirates; and the success of their first adventures would naturally excite the emulation of their bravest countrymen, who were impatient of the gloomy solitude of their woods and mountains. Every tide might float down the Elbe whole fleets of canoes, filled with hardy and intrepid associates, who aspired to behold the unbounded prospect of the ocean and to taste the wealth and luxury of unknown worlds. It should seem probable, however, that the most numerous auxiliaries of the Saxons were furnished by the nations who dwelt along the shores of the Baltic. They possessed arms and ships, the art of navigation, and the habits of naval war; but the difficulty of issuing through the northern columns of Hercules (which during several months of the year are obstructed with ice) confined their skill and courage within the limits of a spacious lake.[106](#) The rumour of the successful armaments which sailed from the mouth of the Elbe would soon provoke them to cross the narrow isthmus of Sleswig and to launch their vessels on the great sea. The various troops of pirates and adventurers who fought under the same standard were insensibly united in a permanent society, at first of rapine, and afterwards of government. A military confederation was gradually moulded into a national body, by the gentle operation of marriage and consanguinity; and the adjacent tribes, who solicited the alliance, accepted the name and laws, of the Saxons. If the fact were not established by the most unquestionable evidence, we should appear to abuse the credulity of our readers by the description of the vessels in which the Saxon pirates ventured to sport in the waves of the German Ocean, the British Channel, and the Bay of Biscay. The keel of their large flat-bottomed boats was framed of light timber, but the sides and upper work consisted only of wicker, with a covering of strong hides.[107](#) In the course of their slow and distant navigations, they must always have been exposed to the danger, and very

frequently to the misfortune, of shipwreck; and the naval annals of the Saxons were undoubtedly filled with the accounts of the losses which they sustained on the coasts of Britain and Gaul. But the daring spirit of the pirates braved the perils, both of the sea and of the shore; their skill was confirmed by the habits of enterprise; the meanest of their mariners was alike capable of handling an oar, of rearing a sail, or of conducting a vessel; and the Saxons rejoiced in the appearance of a tempest, which concealed their design, and dispersed the fleets of the enemy.[108](#) After they had acquired an accurate knowledge of the maritime provinces of the West, they extended the scene of their depredations, and the most sequestered places had no reason to presume on their security. The Saxon boats drew so little water that they could easily proceed fourscore or an hundred miles up the great rivers; their weight was so inconsiderable that they were transported on waggons from one river to another; and the pirates who had entered the mouth of the Seine or of the Rhine, might descend, with the rapid stream of the Rhone, into the Mediterranean. Under the reign of Valentinian, the maritime provinces of Gaul were afflicted by the Saxons: a military count was stationed for the defence of the sea-coast, or Armorican limit; and that officer, who found his strength, or his abilities, unequal to the task, implored the assistance of Severus, master-general of the infantry. The Saxons, surrounded and outnumbered, were forced to relinquish their spoil, and to yield a select band of their tall and robust youth to serve in the Imperial armies. They stipulated only a safe and honourable retreat: and the condition was readily granted by the Roman general; who meditated an act of perfidy,[109](#) imprudent as it was inhuman, while a Saxon remained alive, and in arms, to revenge the fate of his countrymen. The premature eagerness of the infantry, who were secretly posted in a deep valley, betrayed the ambushade; and they would perhaps have fallen the victims of their own treachery, if a large body of cuirassiers, alarmed by the noise of the combat, had not hastily advanced to extricate their companions and to overwhelm the undaunted valour of the Saxons. Some of the prisoners were saved from the edge of the sword, to shed their blood in the amphitheatre; and the orator Symmachus complains that twenty-nine of those desperate savages, by strangling themselves with their own hands, had disappointed the amusement of the public. Yet the polite and philosophic citizens of Rome were impressed with the deepest horror, when they were informed that the Saxons consecrated to the gods the tythe of their *human* spoil; and that they ascertained by lot the objects of the barbarous sacrifice.[110](#)

II. The fabulous colonies of Egyptians and Trojans, of Scandinavians and Spaniards, which flattered the pride, and amused the credulity, of our rude ancestors, have insensibly vanished in the light of science and philosophy.[111](#) The present age is satisfied with the simple and rational opinion that the islands of Great Britain and Ireland were gradually peopled from the adjacent continent of Gaul. From the coast of Kent to the extremity of Caithness and Ulster, the memory of a Celtic origin was distinctly preserved, in the perpetual resemblance of language, of religion, and of manners: and the peculiar characters of the British tribes might be naturally ascribed to

the influence of accidental and local circumstances.¹¹² The Roman province was reduced to the state of civilised and peaceful servitude: the rights of savage freedom were contracted to the narrow limits of Caledonia. The inhabitants of that northern region were divided, as early as the reign of Constantine, between the two great tribes of the Scots and of the Picts,¹¹³ who have since experienced a very different fortune. The power, and almost the memory, of the Picts have been extinguished by their successful rivals; and the Scots, after maintaining for ages the dignity of an independent kingdom, have multiplied, by an equal and voluntary union, the honours of the English name. The hand of nature had contributed to mark the ancient distinction of the Scots and Picts. The former were the men of the hills, and the latter those of the plain. The eastern coast of Caledonia may be considered as a level and fertile country, which, even in a rude state of tillage, was capable of producing a considerable quantity of corn; and the epithet of *cruitnich*, or wheat-eaters, expressed the contempt, or envy, of the carnivorous highlander. The cultivation of the earth might introduce a more accurate separation of property and the habits of a sedentary life; but the love of arms and rapine was still the ruling passion of the Picts; and their warriors, who stripped themselves for a day of battle, were distinguished, in the eyes of the Romans, by the strange fashion of painting their naked bodies with gaudy colours and fantastic figures. The western part of Caledonia irregularly rises into wild and barren hills, which scarcely repay the toil of the husbandman and are most profitably used for the pasture of cattle. The highlanders were condemned to the occupations of shepherds and hunters; and, as they seldom were fixed to any permanent habitation, they acquired the expressive name of Scots, which, in the Celtic tongue, is said to be equivalent to that of *wanderers* or *vagrants*. The inhabitants of a barren land were urged to seek a fresh supply of food in the waters. The deep lakes and bays which intersect their country are plentifully stored with fish; and they gradually ventured to cast their nets in the waves of the ocean. The vicinity of the Hebrides, so profusely scattered along the western coast of Scotland, tempted their curiosity and improved their skill; and they acquired by slow degrees, the art, or rather the habit, of managing their boats in a tempestuous sea and of steering their nocturnal course by the light of the well-known stars. The two bold headlands of Caledonia almost touch the shores of a spacious island, which obtained, from its luxuriant vegetation, the epithet of *Green*; and has preserved, with a slight alteration, the name of Erin, or Ierne, or Ireland. It is *probable* that in some remote period of antiquity the fertile plains of Ulster received a colony of hungry Scots; and that the strangers of the North, who had dared to encounter the arms of the legions, spread their conquests over the savage and unwarlike natives of a solitary island. It is *certain*, that, in the declining age of the Roman empire, Caledonia, Ireland, and the Isle of Man were inhabited by the Scots, and that the kindred tribes, who were often associated in military enterprise, were deeply affected by the various accidents of their mutual fortunes. They long cherished the lively tradition of their common name and origin; and the missionaries of the Isle of Saints, who diffused the light of Christianity over North Britain, established the vain opinion that their Irish countrymen were the natural as well as spiritual fathers of

the Scottish race. The loose and obscure tradition has been preserved by the venerable Bede, who scattered some rays of light over the darkness of the eighth century. On this slight foundation, a huge superstructure of fable was gradually reared, by the bards and the monks; two orders of men who equally abused the privilege of fiction. The Scottish nation, with mistaken pride, adopted their Irish genealogy: and the annals of a long line of imaginary kings have been adorned by the fancy of Boethius and the classic elegance of Buchanan.[114](#)

Six years after the death of Constantine, the destructive inroads of the Scots and Picts required the presence of his youngest son, who reigned in the Western empire. Constans visited his British dominions; but we may form some estimate of the importance of his achievements by the language of panegyric, which celebrates only his triumph over the elements; or, in other words, the good fortune of a safe and easy passage from the port of Boulogne to the harbour of Sandwich.[115](#) The calamities which the afflicted provincials continued to experience, from foreign war and domestic tyranny, were aggravated by the feeble and corrupt administration of the eunuchs of Constantius; and the transient relief which they might obtain from the virtues of Julian was soon lost by the absence and death of their benefactor. The sums of gold and silver which had been painfully collected, or liberally transmitted, for the payment of the troops were intercepted by the avarice of the commanders; discharges, or, at least, exemptions, from the military service were publicly sold; the distress of the soldiers, who were injuriously deprived of their legal and scanty subsistence, provoked them to frequent desertion; the nerves of discipline were relaxed, and the highways were infested with robbers.[116](#) The oppression of the good and the impunity of the wicked equally contributed to diffuse through the island a spirit of discontent and revolt; and every ambitious subject, every desperate exile, might entertain a reasonable hope of subverting the weak and distracted government of Britain. The hostile tribes of the North, who detested the pride and power of the King of the World, suspended their domestic feuds; and the Barbarians of the land and sea, the Scots, the Picts, and the Saxons, spread themselves, with rapid and irresistible fury, from the wall of Antoninus to the shores of Kent. Every production of art and nature, every object of convenience or luxury, which they were incapable of creating by labour or procuring by trade, was accumulated in the rich and fruitful province of Britain.[117](#) A philosopher may deplore the eternal discord of the human race, but he will confess that the desire of spoil is a more rational provocation than the vanity of conquest. From the age of Constantine to that of the Plantagenets, this rapacious spirit continued to instigate the poor and hardy Caledonians: but the same people, whose generous humanity seems to inspire the songs of Ossian, was disgraced by a savage ignorance of the virtues of peace and of the laws of war. Their southern neighbours have felt, and perhaps exaggerated, the cruel depredations of the Scots and Picts:[118](#) and a valiant tribe of Caledonia, the Attacotti,[119](#) the enemies, and afterwards the soldiers, of Valentinian, are accused, by an eye-witness, of delighting in the taste of human flesh. When they

hunted the woods for prey, it is said that they attacked the shepherd rather than his flock; and that they curiously selected the most delicate and brawny parts, both of males and females, which they prepared for their horrid repasts.¹²⁰ If, in the neighbourhood of the commercial and literary town of Glasgow, a race of cannibals has really existed, we may contemplate, in the period of the Scottish history, the opposite extremes of savage and civilised life. Such reflections tend to enlarge the circle of our ideas: and to encourage the pleasing hope that New Zealand may produce, in some future age, the Hume of the Southern Hemisphere.

Every messenger who escaped across the British Channel conveyed the most melancholy and alarming tidings to the ears of Valentinian; and the emperor was soon informed that the two military commanders of the province had been surprised and cut off by the Barbarians. Severus, count of the domestics, was hastily despatched, and as suddenly recalled, by the court of Treves. The representations of Jovinus served only to indicate the greatness of the evil; and after a long and serious consultation, the defence, or rather the recovery, of Britain was entrusted to the abilities of the brave Theodosius. The exploits of that general, the father of a line of emperors, have been celebrated, with peculiar complacency, by the writers of the age; but his real merit deserved their applause; and his nomination was received, by the army and province, as a sure presage of approaching victory. He seized the favourable moment of navigation, and securely landed the numerous and veteran bands of the Heruli and Batavians, the Jovians and the Victors. In his march from Sandwich to London, Theodosius defeated several parties of the Barbarians, released a multitude of captives, and, after distributing to his soldiers a small portion of the spoil, established the fame of disinterested justice by the restitution of the remainder to the rightful proprietors. The citizens of London, who had almost despaired of their safety, threw open their gates; and, as soon as Theodosius had obtained from the court of Treves the important aid of a military lieutenant and a civil governor, he executed, with wisdom and vigour, the laborious task of the deliverance of Britain.¹²¹ The vagrant soldiers were recalled to their standard; an edict of amnesty dispelled the public apprehensions; and his cheerful example alleviated the rigour of martial discipline. The scattered and desultory warfare of the Barbarians, who infested the land and sea, deprived him of the glory of a signal victory; but the prudent spirit and consummate art of the Roman general were displayed in the operations of two campaigns, which successively rescued every part of the province from the hands of a cruel and rapacious enemy. The splendour of the cities and the security of the fortifications were diligently restored by the paternal care of Theodosius: who with a strong hand confined the trembling Caledonians to the northern angle of the island; and perpetuated, by the name and settlement of the new province of *Valentia*, the glories of the reign of Valentinian.¹²² The voice of poetry and panegyric may add, perhaps with some degree of truth, that the unknown regions of Thule were stained with the blood of the Picts; that the oars of Theodosius dashed the waves of the Hyperborean Ocean; and that the distant Orkneys were the scene of his naval victory over the Saxon pirates.¹²³ He left the province

with a fair, as well as splendid, reputation: and was immediately promoted to the rank of master-general of the cavalry, by a prince who could applaud without envy the merit of his servants. In the important station of the upper Danube, the conqueror of Britain checked and defeated the armies of the Alemanni before he was chosen to suppress the revolt of Africa.

III. The prince who refuses to be the judge, instructs his people to consider him as the accomplice, of his ministers. The military command of Africa had been long exercised by Count Romanus, and his abilities were not inadequate to his station: but, as sordid interest was the sole motive of his conduct, he acted, on most occasions, as if he had been the enemy of the province and the friend of the Barbarians of the desert. The three flourishing cities of Oea, Leptis, and Sabrata, which, under the name of Tripoli, had long constituted a federal union,[124](#) were obliged, for the first time, to shut their gates against a hostile invasion; several of their most honourable citizens were surprised and massacred; the villages, and even the suburbs, were pillaged; and the vines and fruit-trees of that rich territory were extirpated by the malicious savages of Getulia. The unhappy provincials implored the protection of Romanus; but they soon found that their military governor was not less cruel and rapacious than the Barbarians. As they were incapable of furnishing the four thousand camels, and the exorbitant present, which he required before he would march to the assistance of Tripoli, his demand was equivalent to a refusal, and he might justly be accused as the author of the public calamity. In the annual assembly of the three cities, they nominated two deputies, to lay at the feet of Valentinian the customary offering of a gold victory; and to accompany this tribute of duty, rather than of gratitude, with their humble complaint that they were ruined by the enemy and betrayed by their governor. If the severity of Valentinian had been rightly directed, it would have fallen on the guilty head of Romanus. But the Count, long exercised in the arts of corruption, had despatched a swift and trusty messenger to secure the venal friendship of Remigius, master of the offices. The wisdom of the Imperial council was deceived by artifice; and their honest indignation was cooled by delay. At length, when the repetition of complaint had been justified by the repetition of public misfortunes, the notary Palladius was sent from the court of Treves, to examine the state of Africa, and the conduct of Romanus. The rigid impartiality of Palladius was easily disarmed: he was tempted to reserve for himself a part of the public treasure which he brought with him for the payment of the troops; and from the moment that he was conscious of his own guilt, he could no longer refuse to attest the innocence and merit of the Count. The charge of the Tripolitans was declared to be false and frivolous; and Palladius himself was sent back from Treves to Africa, with a special commission to discover and prosecute the authors of this impious conspiracy against the representatives of the sovereign. His inquiries were managed with so much dexterity and success that he compelled the citizens of Leptis, who had sustained a recent siege of eight days, to contradict the truth of their own decrees and to censure the behaviour of their own deputies. A bloody sentence was pronounced, without hesitation, by the rash and headstrong cruelty of Valentinian. The

president of Tripoli, who had presumed to pity the distress of the province, was publicly executed at Utica; four distinguished citizens were put to death as the accomplices of the imaginary fraud; and the tongues of two others were cut out by the express order of the emperor. Romanus, elated by impunity and irritated by resistance, was still continued in the military command; till the Africans were provoked by his avarice to join the rebellious standard of Firmus, the Moor.[125](#)

His father Nabal was one of the richest and most powerful of the Moorish princes, who acknowledged the supremacy of Rome. But, as he left, either by his wives or concubines, a very numerous posterity, the wealthy inheritance was eagerly disputed; and Zamma, one of his sons, was slain in a domestic quarrel by his brother Firmus. The implacable zeal with which Romanus prosecuted the legal revenge of this murder could be ascribed only to a motive of avarice, or personal hatred: but, on this occasion, his claims were just; his influence was weighty; and Firmus clearly understood that he must either present his neck to the executioner or appeal from the sentence of the Imperial consistory to his sword and to the people.[126](#) He was received as the deliverer of his country; and, as soon as it appeared that Romanus was formidable only to a submissive province, the tyrant of Africa became the object of universal contempt. The ruin of Cæsarea, which was plundered and burnt by the licentious Barbarians, convinced the refractory cities of the danger of resistance; the power of Firmus was established, at least in the provinces of Mauritania and Numidia; and it seemed to be his only doubt, whether he should assume the diadem of a Moorish king or the purple of a Roman emperor. But the imprudent and unhappy Africans soon discovered that, in this rash insurrection, they had not sufficiently consulted their own strength or the abilities of their leader. Before he could procure any certain intelligence that the emperor of the West had fixed the choice of a general, or that a fleet of transports was collected at the mouth of the Rhone, he was suddenly informed that the great Theodosius, with a small band of veterans, had landed near Igilgilis, or Gigeri, on the African coast; and the timid usurper sunk under the ascendant of virtue and military genius. Though Firmus possessed arms and treasures, his despair of victory immediately reduced him to the use of those arts which, in the same country and in a similar situation, had formerly been practised by the crafty Jugurtha. He attempted to deceive, by an apparent submission, the vigilance of the Roman general; to seduce the fidelity of his troops; and to protract the duration of the war, by successively engaging the independent tribes of Africa to espouse his quarrel or to protect his flight. Theodosius imitated the example, and obtained the success, of his predecessor Metellus. When Firmus, in the character of a suppliant, accused his own rashness and humbly solicited the clemency of the emperor, the lieutenant of Valentinian received and dismissed him with a friendly embrace; but he diligently required the useful and substantial pledges of a sincere repentance; nor could he be persuaded, by the assurances of peace, to suspend, for an instant, the operations of an active war. A dark conspiracy was detected by the penetration of Theodosius; and he satisfied, without much reluctance, the public indignation, which he had secretly excited. Several of the

guilty accomplices of Firmus were abandoned, according to ancient custom, to the tumult of a military execution; many more, by the amputation of both their hands, continued to exhibit an instructive spectacle of horror; the hatred of the rebels was accompanied with fear; and the fear of the Roman soldiers was mingled with respectful admiration. Amidst the boundless plains of Getulia, and the innumerable valleys of Mount Atlas, it was impossible to prevent the escape of Firmus; and, if the usurper could have tired the patience of his antagonist, he would have secured his person in the depth of some remote solitude, and expected the hopes of a future revolution. He was subdued by the perseverance of Theodosius; who had formed an inflexible determination that the war should end only by the death of the tyrant, and that every nation of Africa which presumed to support his cause should be involved in his ruin. At the head of a small body of troops, which seldom exceeded three thousand five hundred men, the Roman general advanced with a steady prudence, devoid of rashness or of fear, into the heart of a country where he was sometimes attacked by armies of twenty thousand Moors. The boldness of his charge dismayed the irregular Barbarians; they were disconcerted by his seasonable and orderly retreats; they were continually baffled by the unknown resources of the military art; and they felt and confessed the just superiority which was assumed by the leader of a civilised nation. When Theodosius entered the extensive dominions of Igmazen, king of the Isafenses, the haughty savage required, in words of defiance, his name and the object of his expedition. "I am," replied the stern and disdainful count, "I am the general of Valentinian, the lord of the world; who has sent me hither to pursue and punish a desperate robber. Deliver him instantly into my hands; and be assured that, if thou dost not obey the commands of my invincible sovereign, thou, and the people over whom thou reignest, shall be utterly extirpated." As soon as Igmazen was satisfied that his enemy had strength and resolution to execute the fatal menace, he consented to purchase a necessary peace by the sacrifice of a guilty fugitive. The guards that were placed to secure the person of Firmus deprived him of the hopes of escape; and the Moorish tyrant, after wine had extinguished the sense of danger, disappointed the insulting triumph of the Romans by strangling himself in the night. His dead body, the only present which Igmazen could offer to the conqueror, was carelessly thrown upon a camel; and Theodosius, leading back his victorious troops to Sitifi, was saluted by the warmest acclamations of joy and loyalty.[127](#)

Africa had been lost by the vices of Romanus; it was restored by the virtues of Theodosius: and our curiosity may be usefully directed to the inquiry of the respective treatment which the two generals received from the Imperial court. The authority of Count Romanus had been suspended by the master-general of the cavalry; and he was committed to safe and honourable custody till the end of the war. His crimes were proved by the most authentic evidence; and the public expected, with some impatience, the decree of severe justice. But the partial and powerful favour of Mellobaudes encouraged him to challenge his legal judges, to obtain repeated delays for the purpose of procuring a crowd of friendly witnesses, and, finally, to cover his

guilty conduct by the additional guilt of fraud and forgery. About the same time, the restorer of Britain and Africa, on a vague suspicion that his name and services were superior to the rank of a subject, was ignominiously beheaded at Carthage. Valentinian no longer reigned; and the death of Theodosius, as well as the impunity of Romanus, may justly be imputed to the arts of the ministers who abused the confidence, and deceived the inexperienced youth, of his sons.[128](#)

If the geographical accuracy of Ammianus had been fortunately bestowed on the British exploits of Theodosius, we should have traced, with eager curiosity, the distinct and domestic footsteps of his march. But the tedious enumeration of the unknown and uninteresting tribes of Africa may be reduced to the general remark that they were all of the swarthy race of the Moors; that they inhabited the back settlements of the Mauritanian and Numidian provinces, the country, as they have since been termed by the Arabs, of dates and of locusts;[129](#) and that, as the Roman power declined in Africa, the boundary of civilised manners and cultivated land was insensibly contracted. Beyond the utmost limits of the Moors, the vast and inhospitable desert of the South extends above a thousand miles to the banks of the Niger. The ancients, who had a very faint and imperfect knowledge of the great peninsula of Africa, were sometimes tempted to believe that the torrid zone must ever remain destitute of inhabitants;[130](#) and they sometimes amused their fancy by filling the vacant space with headless men, or rather monsters;[131](#) with horned and cloven-footed satyrs;[132](#) with fabulous centaurs;[133](#) and with human pygmies, who waged a bold and doubtful warfare against the cranes.[134](#) Carthage would have trembled at the strange intelligence that the countries on either side of the equator were filled with innumerable nations, who differed only in their colour from the ordinary appearance of the human species; and the subjects of the Roman empire might have anxiously expected that the swarms of Barbarians which issued from the North would soon be encountered from the South by new swarms of Barbarians, equally fierce, and equally formidable. These gloomy terrors would indeed have been dispelled by a more intimate acquaintance with the character of their African enemies. The inaction of the negroes does not seem to be the effect either of their virtue or of their pusillanimity. They indulge, like the rest of mankind, their passions and appetites; and the adjacent tribes are engaged in frequent acts of hostility.[135](#) But their rude ignorance has never invented any effectual weapons of defence or of destruction; they appear incapable of forming any extensive plans of government or conquest; and the obvious inferiority of their mental faculties has been discovered and abused by the nations of the temperate zone. Sixty thousand blacks are annually embarked from the coast of Guinea, never to return to their native country; but they are embarked in chains;[136](#) and this constant emigration, which, in the space of two centuries, might have furnished armies to overrun the globe, accuses the guilt of Europe and the weakness of Africa.

IV. The ignominious treaty which saved the army of Jovian had been faithfully

executed on the side of the Romans: and, as they had solemnly renounced the sovereignty and alliance of Armenia and Iberia, those tributary kingdoms were exposed, without protection, to the arms of the Persian monarch.¹³⁷ Sapor entered the Armenian territories at the head of a formidable host of cuirassiers, of archers, and of mercenary foot; but it was the invariable practice of Sapor to mix war and negotiation, and to consider falsehood and perjury as the most powerful instruments of regal policy. He affected to praise the prudent and moderate conduct of the king of Armenia; and the unsuspecting Tiranus was persuaded, by the repeated assurances of insidious friendship, to deliver his person into the hands of a faithless and cruel enemy. In the midst of a splendid entertainment, he was bound in chains of silver, as an honour due to the blood of the Arsacides; and, after a short confinement in the Tower of Oblivion at Ecbatana,¹³⁸ he was released from the miseries of life, either by his own dagger or by that of an assassin. The kingdom of Armenia was reduced to the state of a Persian province; the administration was shared between a distinguished satrap and a favourite eunuch; and Sapor marched, without delay, to subdue the martial spirit of the Iberians. Sauromaces, who reigned in that country by the permission of the emperors, was expelled by a superior force; and, as an insult on the majesty of Rome, the King of kings placed a diadem on the head of his abject vassal Aspacuras. The city of Artogerassa¹³⁹ was the only place of Armenia which presumed to resist the effort of his arms. The treasure deposited in that strong fortress tempted the avarice of Sapor; but the danger of Olmypyias, the wife, or widow, of the Armenian king, excited the public compassion, and animated the desperate valour of her subjects and soldiers. The Persians were surprised and repulsed under the walls of Artogerassa, by a bold and well-concerted sally of the besieged. But the forces of Sapor were continually renewed and increased; the hopeless courage of the garrison was exhausted; the strength of the walls yielded to the assault; and the proud conqueror, after wasting the rebellious city with fire and sword, led away captive an unfortunate queen, who, in a more auspicious hour, had been the destined bride of the son of Constantine.¹⁴⁰ Yet, if Sapor already triumphed in the easy conquest of two dependent kingdoms, he soon felt that a country is unsubdued, as long as the minds of the people are actuated by an hostile and contumacious spirit. The satraps, whom he was obliged to trust, embraced the first opportunity of regaining the affection of their countrymen and of signalling their immortal hatred to the Persian name. Since the conversion of the Armenians and Iberians, those nations considered the Christians as the favourites, and the Magians as the adversaries, of the Supreme Being; the influence of the clergy over a superstitious people was uniformly exerted in the cause of Rome; and, as long as the successors of Constantine disputed with those of Artaxerxes the sovereignty of the intermediate provinces, the religious connection always threw a decisive advantage into the scale of the empire. A numerous and active party acknowledged Para, the son of Tiranus, as the lawful sovereign of Armenia; and his title to the throne was deeply rooted in the hereditary succession of five hundred years. By the unanimous consent of the Iberians, the country was equally divided between the rival princes; and Aspacuras, who owed his diadem to the choice of Sapor, was obliged to declare that his regard for his

children, who were detained as hostages by the tyrant, was the only consideration which prevented him from openly renouncing the alliance of Persia. The emperor Valens, who respected the obligations of the treaty, and who was apprehensive of involving the East in a dangerous war, ventured, with slow and cautious measures, to support the Roman party in the kingdoms of Iberia and Armenia. Twelve legions established the authority of Sauromaces on the banks of the Cyrus. The Euphrates was protected by the valour of Arintheus. A powerful army, under the command of Count Trajan, and of Vadomair, king of the Alemanni, fixed their camp on the confines of Armenia. But they were strictly enjoined not to commit the first hostilities, which might be understood as a breach of the treaty: and such was the implicit obedience of the Roman general that they retreated, with exemplary patience, under a shower of Persian arrows, till they had clearly acquired a just title to an honourable and legitimate victory. Yet these appearances of war insensibly subsided in a vain and tedious negotiation. The contending parties supported their claims by mutual reproaches of perfidy and ambition; and it should seem that the original treaty was expressed in very obscure terms, since they were reduced to the necessity of making their inconclusive appeal to the partial testimony of the generals of the two nations who had assisted at the negotiations.[141](#) The invasion of the Goths and Huns, which soon afterwards shook the foundations of the Roman empire, exposed the provinces of Asia to the arms of Sapor. But the declining age, and perhaps the infirmities, of the monarch suggested new maxims of tranquillity and moderation. His death, which happened in the full maturity of a reign of seventy years, changed in a moment the court and councils of Persia; and their attention was most probably engaged by domestic troubles, and the distant efforts of a Carmanian war.[142](#) The remembrance of ancient injuries was lost in the enjoyment of peace. The kingdoms of Armenia and Iberia were permitted, by the mutual, though tacit, consent of both empires, to resume their doubtful neutrality. In the first years of the reign of Theodosius, a Persian embassy arrived at Constantinople, to excuse the unjustifiable measures of the former reign; and to offer, as the tribute of friendship, or even of respect, a splendid present of gems, of silk, and of Indian elephants.[143](#)

In the general picture of the affairs of the East under the reign of Valens, the adventures of Para form one of the most striking and singular objects. The noble youth, by the persuasion of his mother Olympias, had escaped through the Persian host that besieged Artogerassa, and implored the protection of the emperor of the East. By his timid councils, Para was alternately supported, and recalled, and restored, and betrayed. The hopes of the Armenians were sometimes raised by the presence of their natural sovereign; and the ministers of Valens were satisfied that they preserved the integrity of the public faith, if their vassal was not suffered to assume the diadem and title of King. But they soon repented of their own rashness. They were confounded by the reproaches and threats of the Persian monarch. They found reason to distrust the cruel and inconstant temper of Para himself, who sacrificed, to the slightest suspicions, the lives of his most faithful servants; and held a secret and disgraceful

correspondence with the assassin of his father and the enemy of his country. Under the specious pretence of consulting with the emperor on the subject of their common interest, Para was persuaded to descend from the mountains of Armenia, where his party was in arms, and to trust his independence and safety to the discretion of a perfidious court. The king of Armenia, for such he appeared in his own eyes and in those of his nation, was received with due honours by the governors of the provinces through which he passed; but, when he arrived at Tarsus in Cilicia, his progress was stopped under various pretences; his motions were watched with respectful vigilance; and he gradually discovered that he was a prisoner in the hands of the Romans. Para suppressed his indignation, dissembled his fears, and, after secretly preparing his escape, mounted on horseback with three hundred of his faithful followers. The officer stationed at the door of his apartment immediately communicated his flight to the consular of Cilicia, who overtook him in the suburbs, and endeavoured, without success, to dissuade him from prosecuting his rash and dangerous design. A legion was ordered to pursue the royal fugitive; but the pursuit of infantry could not be very alarming to a body of light cavalry; and upon the first cloud of arrows that was discharged into the air they retreated with precipitation to the gates of Tarsus. After an incessant march of two days and two nights, Para and his Armenians reached the banks of the Euphrates; but the passage of the river, which they were obliged to swim, was attended with some delay and some loss. The country was alarmed; and the two roads, which were only separated by an interval of three miles, had been occupied by a thousand archers on horseback, under the command of a count and a tribune. Para must have yielded to superior force, if the accidental arrival of a friendly traveller had not revealed the danger, and the means of escape. A dark and almost impervious path securely conveyed the Armenian troop through the thicket; and Para had left behind him the count and the tribune, while they patiently expected his approach along the public highways. They returned to the Imperial court to excuse their want of diligence or success: and seriously alleged that the king of Armenia, who was a skilful magician, had transformed himself and his followers, and passed before their eyes under a borrowed shape. After his return to his native kingdom, Para still continued to profess himself the friend and ally of the Romans; but the Romans had injured him too deeply ever to forgive, and the secret sentence of his death was signed in the council of Valens. The execution of the bloody deed was committed to the subtle prudence of Count Trajan; and he had the merit of insinuating himself into the confidence of the credulous prince, that he might find an opportunity of stabbing him to the heart. Para was invited to a Roman banquet, which had been prepared with all the pomp and sensuality of the East: the hall resounded with cheerful music, and the company was already heated with wine; when the count retired for an instant, drew his sword, and gave the signal of the murder. A robust and desperate Barbarian instantly rushed on the king of Armenia; and, though he bravely defended his life with the first weapon that chance offered to his hand, the table of the Imperial general was stained with the royal blood of a guest, and an ally. Such were the weak and wicked maxims of the Roman administration, that, to attain a doubtful object of political interest, the laws of

nations and the sacred rights of hospitality were inhumanly violated in the face of the world.[144](#)

V. During a peaceful interval of thirty years, the Romans secured their frontiers, and the Goths extended their dominions. The victories of the great Hermanric,[145](#) king of the Ostrogoths, and the most noble of the race of the Amali, have been compared, by the enthusiasm of his countrymen, to the exploits of Alexander: with this singular, and almost incredible, difference, that the martial spirit of the Gothic hero, instead of being supported by the vigour of youth, was displayed with glory and success in the extreme period of human life; between the age of fourscore and one hundred and ten years. The independent tribes were persuaded, or compelled, to acknowledge the king of the Ostrogoths as the sovereign of the Gothic nation: the chiefs of the Visigoths, or Thervingi, renounced the royal title, and assumed the more humble appellation of *Judges*;[146](#) and, among those judges, Athanaric, Fritigern, and Alavivus were the most illustrious, by their personal merit, as well as by their vicinity to the Roman provinces. These domestic conquests, which increased the military power of Hermanric, enlarged his ambitious designs. He invaded the adjacent countries of the North; and twelve considerable nations, whose names and limits cannot be accurately defined, successively yielded to the superiority of the Gothic arms.[147](#) The Heruli, who inhabited the marshy lands near the lake Mæotis, were renowned for their strength and agility; and the assistance of their light infantry was eagerly solicited, and highly esteemed, in all the wars of the Barbarians. But the active spirit of the Heruli was subdued by the slow and steady perseverance of the Goths; and, after a bloody action, in which the king was slain, the remains of that warlike tribe became an useful accession to the camp of Hermanric. He then marched against the Venedi; unskilled in the use of arms, and formidable only by their numbers, which filled the wide extent of the plains of modern Poland. The victorious Goths, who were not inferior in numbers, prevailed in the contest, by the decisive advantages of exercise and discipline. After the submission of the Venedi, the conqueror advanced, without resistance, as far as the confines of the *Æstii*;[148](#) an ancient people, whose name is still preserved in the province of Esthonia. Those distant inhabitants of the Baltic coast were supported by the labours of agriculture, enriched by the trade of amber, and consecrated by the peculiar worship of the Mother of the Gods. But the scarcity of iron obliged the *Æstian* warriors to content themselves with wooden clubs; and the reduction of that wealthy country is ascribed to the prudence, rather than to the arms, of Hermanric. His dominions, which extended from the Danube to the Baltic, included the native seats, and the recent acquisitions, of the Goths; and he reigned over the greatest part of Germany and Scythia with the authority of a conqueror, and sometimes with the cruelty of a tyrant. But he reigned over a part of the globe incapable of perpetuating and adorning the glory of its heroes. The name of Hermanric is almost buried in oblivion; his exploits are imperfectly known; and the Romans themselves appeared unconscious of the progress of an aspiring power, which threatened the liberty of the

The Goths had contracted an hereditary attachment for the Imperial house of Constantine, of whose power and liberality they had received so many signal proofs. They respected the public peace; and, if an hostile band sometimes presumed to pass the Roman limit, their irregular conduct was candidly ascribed to the ungovernable spirit of the Barbarian youth. Their contempt for two new and obscure princes, who had been raised to the throne by a popular election, inspired the Goths with bolder hopes; and, while they agitated some design of marching their confederate force under the national standard,[150](#) they were easily tempted to embrace the party of Procopius, and to foment, by their dangerous aid, the civil discord of the Romans. The public treaty might stipulate no more than ten thousand auxiliaries; but the design was so zealously adopted by the chiefs of the Visigoths that the army which passed the Danube amounted to the number of thirty thousand men.[151](#) They marched with the proud confidence that their invincible valour would decide the fate of the Roman empire; and the provinces of Thrace groaned under the weight of the Barbarians, who displayed the insolence of masters and the licentiousness of enemies. But the intemperance which gratified their appetites retarded their progress; and, before the Goths could receive any certain intelligence of the defeat and death of Procopius, they perceived, by the hostile state of the country, that the civil and military powers were resumed by his successful rival. A chain of posts and fortifications, skilfully disposed by Valens, or the generals of Valens, resisted their march, prevented their retreat, and intercepted their subsistence. The fierceness of the Barbarians was tamed and suspended by hunger; they indignantly threw down their arms at the feet of the conqueror, who offered them food and chains; the numerous captives were distributed in all the cities of the East; and the provincials, who were soon familiarised with their savage appearance, ventured, by degrees, to measure their own strength with these formidable adversaries, whose name had so long been the object of their terror. The king of Scythia (and Hermanric alone could deserve so lofty a title) was grieved and exasperated by this national calamity. His ambassadors loudly complained, at the court of Valens, of the infraction of the ancient and solemn alliance which had so long subsisted between the Romans and the Goths. They alleged that they had fulfilled the duty of allies by assisting the kinsman and successor of the emperor Julian; they required the immediate restitution of the noble captives; and they urged a very singular claim, that the Gothic generals, marching in arms and in hostile array, were entitled to the sacred character and privileges of ambassadors. The decent but peremptory refusal of these extravagant demands was signified to the Barbarians by Victor, master-general of the cavalry; who expressed, with force and dignity, the just complaints of the emperor of the East.[152](#) The negotiation was interrupted; and the manly exhortations of Valentinian encouraged his timid brother to vindicate the insulted majesty of the empire.[153](#)

The splendour and magnitude of this Gothic war are celebrated by a contemporary historian;[154](#) but the events scarcely deserve the attention of posterity, except as the preliminary steps of the approaching decline and fall of the empire. Instead of leading the nations of Germany and Scythia to the banks of the Danube, or even to the gates of Constantinople, the aged monarch of the Goths resigned to the brave Athanaric the danger and glory of a defensive war, against an enemy who wielded with a feeble hand the powers of a mighty state. A bridge of boats was established upon the Danube; the presence of Valens animated his troops; and his ignorance of the art of war was compensated by personal bravery and a wise deference to the advice of Victor and Arintheus, his masters-general of the cavalry and infantry. The operations of the campaign were conducted by their skill and experience; but they found it impossible to drive the Visigoths from their strong posts in the mountains: and the devastation of the plains obliged the Romans themselves to repass the Danube on the approach of winter. The incessant rains, which swelled the waters of the river, produced a tacit suspension of arms, and confined the emperor Valens, during the whole course of the ensuing summer, to his camp of Marcianopolis. The third year of the war was more favourable to the Romans and more pernicious to the Goths. The interruption of trade deprived the Barbarians of the objects of luxury which they already confounded with the necessities of life; and the desolation of a very extensive tract of country threatened them with the horrors of famine. Athanaric was provoked, or compelled, to risk a battle, which he lost, in the plains; and the pursuit was rendered more bloody by the cruel precaution of the victorious generals, who had promised a large reward for the head of every Goth that was brought into the Imperial camp. The submission of the Barbarians appeased the resentment of Valens and his council; the emperor listened with satisfaction to the flattering and eloquent remonstrance of the senate of Constantinople, which assumed, for the first time, a share in the public deliberations; and the same generals, Victor and Arintheus, who had successfully directed the conduct of the war, were empowered to regulate the conditions of peace. The freedom of trade, which the Goths had hitherto enjoyed, was restricted to two cities on the Danube; the rashness of their leaders was severely punished by the suppression of their pensions and subsidies; and the exception, which was stipulated in favour of Athanaric alone, was more advantageous than honourable to the Judge of the Visigoths. Athanaric, who, on this occasion, appears to have consulted his private interest, without expecting the orders of his sovereign, supported his own dignity, and that of his tribe, in the personal interview which was proposed by the ministers of Valens. He persisted in his declaration that it was impossible for him, without incurring the guilt of perjury, ever to set his foot on the territory of the empire; and it is more than probable that his regard for the sanctity of an oath was confirmed by the recent and fatal examples of Roman treachery. The Danube, which separated the dominions of the two independent nations, was chosen for the scene of the conference. The emperor of the East and the Judge of the Visigoths, accompanied by an equal number of armed followers, advanced in their respective barges to the middle of the stream. After the ratification of the treaty, and the delivery of hostages, Valens returned in triumph to

Constantinople; and the Goths remained in a state of tranquillity about six years; till they were violently impelled against the Roman empire by an innumerable host of Scythians, who appeared to issue from the frozen regions of the North.[155](#)

The emperor of the West, who had resigned to his brother the command of the Lower Danube, reserved for his immediate care the defence of the Rhætian and Illyrian provinces, which spread so many hundred miles along the greatest of the European rivers. The active policy of Valentinian was continually employed in adding new fortifications to the security of the frontier; but the abuse of this policy provoked the just resentment of the Barbarians. The Quadi complained that the ground for an intended fortress had been marked out on their territories; and their complaints were urged with so much reason and moderation that Equitius, master-general of Illyricum, consented to suspend the prosecution of the work, till he should be more clearly informed of the will of his sovereign. This fair occasion of injuring a rival, and of advancing the fortune of his son, was eagerly embraced by the inhuman Maximin, the prefect, or rather tyrant, of Gaul. The passions of Valentinian were impatient of control; and he credulously listened to the assurances of his favourite that, if the government of Valeria, and the direction of the work, were entrusted to the zeal of his son Marcellinus, the emperor should no longer be importuned with the audacious remonstrances of the Barbarians.[156](#) The subjects of Rome, and the natives of Germany, were insulted by the arrogance of a young and worthless minister, who considered his rapid elevation as the proof and reward of his superior merit. He affected, however, to receive the modest application of Gabinius, king of the Quadi, with some attention and regard; but this artful civility concealed a dark and bloody design, and the credulous prince was persuaded to accept the pressing invitation of Marcellinus. I am at a loss how to vary the narrative of similar crimes; or how to relate that, in the course of the same year, but in remote parts of the empire, the inhospitable table of two Imperial generals was stained with the royal blood of two guests and allies, inhumanly murdered by their order and in their presence. The fate of Gabinius and of Para was the same: but the cruel death of their sovereign was resented in a very different manner by the servile temper of the Armenians and the free and daring spirit of the Germans. The Quadi were much declined from that formidable power which, in the time of Marcus Antoninus, had spread terror to the gates of Rome. But they still possessed arms and courage; their courage was animated by despair, and they obtained the usual reinforcement of the cavalry of their Sarmatian allies. So improvident was the assassin Marcellinus that he chose the moment when the bravest veterans had been drawn away to suppress the revolt of Firmus; and the whole province was exposed, with a very feeble defence, to the rage of the exasperated Barbarians. They invaded Pannonia in the season of harvest; unmercifully destroyed every object of plunder which they could not easily transport; and either disregarded or demolished the empty fortifications. The princess Constantia, the daughter of the emperor Constantius and the grand-daughter of the great Constantine, very narrowly escaped. That royal maid, who had innocently supported the revolt of Procopius, was now the destined wife of

the heir of the Western empire. She traversed the peaceful province with a splendid and unarmed train. Her person was saved from danger, and the republic from disgrace, by the active zeal of Messalla, governor of the provinces. As soon as he was informed that the village, where she stopped only to dine, was almost encompassed by the Barbarians, he hastily placed her in his own chariot, and drove full speed till he reached the gates of Sirmium, which were at the distance of six and twenty miles. Even Sirmium might not have been secure, if the Quadi and Sarmatians had diligently advanced during the general consternation of the magistrates and people. Their delay allowed Probus, the Prætorian prefect, sufficient time to recover his own spirits and to revive the courage of the citizens. He skilfully directed their strenuous efforts to repair and strengthen the decayed fortifications; and procured the seasonable and effectual assistance of a company of archers, to protect the capital of the Illyrian provinces. Disappointed in their attempts against the walls of Sirmium, the indignant Barbarians turned their arms against the master-general of the frontier, to whom they unjustly attributed the murder of their king. Equitius could bring into the field no more than two legions; but they contained the veteran strength of the Mælian and Pannonian bands. The obstinacy with which they disputed the vain honours of rank and precedence was the cause of their destruction; and, while they acted with separate forces and divided councils, they were surprised and slaughtered by the active vigour of the Sarmatian horse. The success of this invasion provoked the emulation of the bordering tribes; and the province of Mæsia would infallibly have been lost, if young Theodosius, the duke, or military commander, of the frontier, had not signalled, in the defeat of the public enemy, an intrepid genius, worthy of his illustrious father, and of his future greatness.[157](#)

The mind of Valentinian, who then resided at Treves, was deeply affected by the calamities of Illyricum; but the lateness of the season suspended the execution of his designs till the ensuing spring. He marched in person, with a considerable part of the forces of Gaul, from the banks of the Moselle: and to the suppliant ambassadors of the Sarmatians, who met him on the way, he returned a doubtful answer that, as soon as he reached the scene of action, he should examine and pronounce. When he arrived at Sirmium, he gave audience to the deputies of the Illyrian provinces; who loudly congratulated their own felicity under the auspicious government of Probus, his Prætorian prefect.[158](#) Valentinian, who was flattered by these demonstrations of their loyalty and gratitude, imprudently asked the deputy of Epirus, a Cynic philosopher of intrepid sincerity,[159](#) whether he was freely sent by the wishes of the province? “With tears and groans am I sent (replied Iphicles) by a reluctant people.” The emperor paused: but the impunity of his ministers established the pernicious maxim that they might oppress his subjects without injuring his service. A strict inquiry into their conduct would have relieved the public discontent. The severe condemnation of the murder of Gabinius was the only measure which could restore the confidence of the Germans and vindicate the honour of the Roman name. But the haughty monarch was incapable of the magnanimity which dares to acknowledge a fault. He forgot the

provocation, remembered only the injury, and advanced into the country of the Quadi with an insatiate thirst of blood and revenge. The extreme devastation and promiscuous massacre of a savage war were justified, in the eyes of the emperor, and perhaps in those of the world, by the cruel equity of retaliation;[160](#) and such was the discipline of the Romans, and the consternation of the enemy, that Valentinian repassed the Danube without the loss of a single man. As he had resolved to complete the destruction of the Quadi by a second campaign, he fixed his winter quarters at Bregetio, on the Danube, near the Hungarian city of Presburg. While the operations of war were suspended by the severity of the weather, the Quadi made an humble attempt to deprecate the wrath of their conqueror; and, at the earnest persuasion of Equitius, their ambassadors were introduced into the Imperial council. They approached the throne with bended bodies and dejected countenances; and, without daring to complain of the murder of their king, they affirmed, with solemn oaths, that the late invasion was the crime of some irregular robbers, which the public council of the nation condemned and abhorred. The answer of the emperor left them but little to hope from his clemency or compassion. He reviled, in the most intemperate language, their baseness, their ingratitude, their insolence. — His eyes, his voice, his colour, his gestures, expressed the violence of his ungoverned fury; and, while his whole frame was agitated with convulsive passion, a large blood-vessel suddenly burst in his body; and Valentinian fell speechless into the arms of his attendants. Their pious care immediately concealed his situation from the crowd; but, in a few minutes, the emperor of the West expired in an agony of pain, retaining his senses till the last, and struggling, without success, to declare his intentions to the generals and ministers who surrounded the royal couch. Valentinian was about fifty-four years of age; and he wanted only one hundred days to accomplish the twelve years of his reign.[161](#)

The polygamy of Valentinian is seriously attested by an ecclesiastical historian.[162](#) “The empress Severa (I relate the fable) admitted into her familiar society the lovely Justina, the daughter of an Italian governor; her admiration of those naked charms which she had often seen in the bath was expressed with such lavish and imprudent praise that the emperor was tempted to introduce a second wife into his bed; and his public edict extended to all the subjects of the empire the same domestic privilege which he had assumed for himself.” But we may be assured, from the evidence of reason as well as history, that the two marriages of Valentinian, with Severa, and with Justina, were *successively* contracted; and that he used the ancient permission of divorce, which was still allowed by the laws, though it was condemned by the church. Severa was the mother of Gratian, who seemed to unite every claim which could entitle him to the undoubted succession of the Western empire. He was the eldest son of a monarch, whose glorious reign had confirmed the free and honourable choice of his fellow-soldiers. Before he had attained the ninth year of his age, the royal youth received from the hands of his indulgent father the purple robe and diadem, with the title of Augustus: the election was solemnly ratified by the consent and applause of the

armies of Gaul;[163](#) and the name of Gratian was added to the names of Valentinian and Valens, in all the legal transactions of the Roman government. By his marriage with the grand-daughter of Constantine, the son of Valentinian acquired all the hereditary rights of the Flavian family; which, in a series of three Imperial generations, were sanctified by time, religion, and the reverence of the people. At the death of his father, the royal youth was in the seventeenth year of his age; and his virtues already justified the favourable opinion of the army and people. But Gratian resided, without apprehension, in the palace of Treves; whilst, at the distance of many hundred miles, Valentinian suddenly expired in the camp of Bregetio. The passions, which had been so long suppressed by the presence of a master, immediately revived in the Imperial council; and the ambitious design of reigning in the name of an infant was artfully executed by Mellobaudes[163a](#) and Equitius, who commanded the attachment of the Illyrian and Italian bands. They contrived the most honourable pretences to remove the popular leaders and the troops of Gaul, who might have asserted the claims of the lawful successor; they suggested the necessity of extinguishing the hopes of foreign and domestic enemies by a bold and decisive measure. The empress Justina, who had been left in a palace about one hundred miles from Bregetio, was respectfully invited to appear in the camp, with the son of the deceased emperor. On the sixth day after the death of Valentinian, the infant prince of the same name, who was only four years old, was shewn in the arms of his mother to the legions; and solemnly invested by military acclamation with the titles and ensigns of supreme power. The impending dangers of a civil war were seasonably prevented by the wise and moderate conduct of the emperor Gratian. He cheerfully accepted the choice of the army; declared that he should always consider the son of Justina as a brother, not as a rival; and advised the empress, with her son Valentinian, to fix their residence at Milan, in the fair and peaceful province of Italy; while he assumed the more arduous command of the countries beyond the Alps. Gratian dissembled his resentment till he could safely punish, or disgrace, the authors of the conspiracy; and, though he uniformly behaved with tenderness and regard to his infant colleague, he gradually confounded, in the administration of the Western empire, the office of a guardian with the authority of a sovereign. The government of the Roman world was exercised in the united names of Valens and his two nephews; but the feeble emperor of the East, who succeeded to the rank of his elder brother, never obtained any weight or influence in the councils of the West.[164](#)

CHAPTER XXVI

Manners of the Pastoral Nations — Progress of the Huns, from China to Europe — Flight of the Goths — They pass the Danube — Gothic war — Defeat and Death of Valens — Gratian invests Theodosius with the Eastern Empire — His Character and Success — Peace and Settlement of the Goths

In the second year of the reign of Valentinian and Valens, on the morning of the twenty-first day of July, the greatest part of the Roman world was shaken by a violent and destructive earthquake. The impression was communicated to the waters; the shores of the Mediterranean were left dry, by the sudden retreat of the sea; great quantities of fish were caught with the hand; large vessels were stranded on the mud; and a curious spectator¹ amused his eye, or rather his fancy, by contemplating the various appearance of valleys and mountains, which had never, since the formation of the globe, been exposed to the sun. But the tide soon returned, with the weight of an immense and irresistible deluge, which was severely felt on the coast of Sicily, of Dalmatia, of Greece, and of Egypt; large boats were transported, and lodged on the roofs of houses, or at the distance of two miles from the shore; the people, with their habitations, were swept away by the waters; and the city of Alexandria annually commemorated the fatal day on which fifty thousand persons had lost their lives in the inundation. This calamity, the report of which was magnified from one province to another, astonished and terrified the subjects of Rome; and their affrighted imagination enlarged the real extent of a momentary evil. They recollected the preceding earthquakes, which had subverted the cities of Palestine and Bithynia; they considered these alarming strokes as the prelude only of still more dreadful calamities, and their fearful vanity was disposed to confound the symptoms of a declining empire and a sinking world.² It was the fashion of the times to attribute every remarkable event to the particular will of the Deity; the alterations of nature were connected, by an invisible chain, with the moral and metaphysical opinions of the human mind; and the most sagacious divines could distinguish, according to the colour of their respective prejudices, that the establishment of heresy tended to produce an earthquake, or that a deluge was the inevitable consequence of the progress of sin and error. Without presuming to discuss the truth or propriety of these lofty speculations, the historian may content himself with an observation, which seems to be justified by experience, that man has much more to fear from the passions of his fellow-creatures than from the convulsions of the elements.³ The mischievous effects of an earthquake or deluge, a hurricane, or the eruption of a volcano, bear a very inconsiderable proportion to the ordinary calamities of war, as they are now moderated by the prudence or humanity of the princes of Europe, who amuse their own leisure, and exercise the courage of their subjects, in the practice of the military art. But the laws and manners of modern nations protect the safety and freedom of the vanquished soldier; and the peaceful citizen has seldom reason to complain that his life, or even his fortune, is exposed to the rage of war. In the disastrous period of the fall of the Roman empire, which may justly be dated from the reign of Valens, the happiness and security of each individual were personally attacked; and the arts and labours of ages were rudely defaced by the Barbarians of Scythia and Germany. The invasion of the Huns precipitated on the provinces of the West the Gothic nation, which advanced, in less than forty years, from the Danube to the Atlantic, and opened a way, by the success of their arms, to the inroads of so many hostile tribes, more savage than themselves. The original principle

of motion was concealed in the remote countries of the North; and the curious observation of the pastoral life of the Scythians,[4](#) or Tartars,[5](#) will illustrate the latent cause of these destructive emigrations.

The different characters that mark the civilised nations of the globe may be ascribed to the use, and the abuse, of reason; which so variously shapes, and so artificially composes, the manners and opinions of an European or a Chinese. But the operation of instinct is more sure and simple than that of reason: it is much easier to ascertain the appetites of a quadruped than the speculations of a philosopher; and the savage tribes of mankind, as they approach nearer to the condition of animals, preserve a stronger resemblance to themselves and to each other. The uniform stability of their manners is the natural consequence of the imperfection of their faculties. Reduced to a similar situation, their wants, their desires, their enjoyments, still continue the same; and the influence of food or climate, which, in a more improved state of society, is suspended or subdued by so many moral causes, most powerfully contributes to form and to maintain the national character of Barbarians. In every age, the immense plains of Scythia or Tartary have been inhabited by vagrant tribes of hunters and shepherds, whose indolence refuses to cultivate the earth, and whose restless spirit disdains the confinement of a sedentary life. In every age, the Scythians and Tartars have been renowned for their invincible courage and rapid conquests. The thrones of Asia have been repeatedly overturned by the shepherds of the North; and their arms have spread terror and devastation over the most fertile and warlike countries of Europe.[6](#) On this occasion, as well as on many others, the sober historian is forcibly awakened from a pleasing vision; and is compelled, with some reluctance, to confess that the pastoral manners which have been adorned with the fairest attributes of peace and innocence are much better adapted to the fierce and cruel habits of a military life. To illustrate this observation, I shall now proceed to consider a nation of shepherds and of warriors, in the three important articles of, I. Their diet; II. Their habitations; and, III. Their exercises. The narratives of antiquity are justified by the experience of modern times;[7](#) and the banks of the Borysthenes, of the Volga, or of the Selinga will indifferently present the same uniform spectacle of similar and native manners.[8](#)

I. The corn, or even the rice, which constitutes the ordinary and wholesome food of a civilised people, can be obtained only by the patient toil of the husbandman. Some of the happy savages who dwell between the tropics are plentifully nourished by the liberality of nature; but in the climates of the North a nation of shepherds is reduced to their flocks and herds. The skilful practitioners of the medical art will determine (if they are able to determine) how far the temper of the human mind may be affected by the use of animal or of vegetable food; and whether the common association of carnivorous and cruel deserves to be considered in any other light than that of an innocent, perhaps a salutary, prejudice of humanity.[9](#) Yet, if it be true that the sentiment of compassion is imperceptibly weakened by the sight and practice of

domestic cruelty, we may observe that the horrid objects which are disguised by the arts of European refinement are exhibited, in their naked and most disgusting simplicity, in the tent of a Tartarian shepherd. The ox or the sheep are slaughtered by the same hand from which they were accustomed to receive their daily food; and the bleeding limbs are served, with very little preparation, on the table of their unfeeling murderer. In the military profession, and especially in the conduct of a numerous army, the exclusive use of animal food appears to be productive of the most solid advantages. Corn is a bulky and perishable commodity; and the large magazines, which are indispensably necessary for the subsistence of our troops, must be slowly transported by the labour of men or horses. But the flocks and herds, which accompany the march of the Tartars, afford a sure and increasing supply of flesh and milk; in the far greater part of the uncultivated waste, the vegetation of the grass is quick and luxuriant; and there are few places so extremely barren that the hardy cattle of the North cannot find some tolerable pasture. The supply is multiplied and prolonged by the undistinguishing appetite and patient abstinence of the Tartars. They indifferently feed on the flesh of those animals that have been killed for the table or have died of disease. Horse-flesh, which in every age and country has been proscribed by the civilised nations of Europe and Asia, they devour with peculiar greediness; and this singular taste facilitates the success of their military operations. The active cavalry of Scythia is always followed, in their most distant and rapid incursions, by an adequate number of spare horses, who may be occasionally used, either to redouble the speed, or to satisfy the hunger, of the Barbarians. Many are the resources of courage and poverty. When the forage round a camp of Tartars is almost consumed, they slaughter the greatest part of their cattle, and preserve the flesh either smoked or dried in the sun. On the sudden emergency of a hasty march, they provide themselves with a sufficient quantity of little balls of cheese, or rather of hard curd, which they occasionally dissolve in water; and this unsubstantial diet will support, for many days, the life, and even the spirits, of the patient warrior. But this extraordinary abstinence, which the Stoic would approve and the hermit might envy, is commonly succeeded by the most voracious indulgence of appetite. The wines of a happier climate are the most grateful present, or the most valuable commodity, that can be offered to the Tartars; and the only example of their industry seems to consist in the art of extracting from mares' milk a fermented liquor, which possesses a very strong power of intoxication. Like the animals of prey, the savages, both of the old and new world, experience the alternate vicissitudes of famine and plenty; and their stomach is enured to sustain, without much inconvenience, the opposite extremes of hunger and of intemperance.

II. In the ages of rustic and martial simplicity, a people of soldiers and husbandmen are dispersed over the face of an extensive and cultivated country, and some time must elapse before the warlike youth of Greece or Italy could be assembled under the same standard, either to defend their own confines or to invade the territories of the adjacent tribes. The progress of manufactures and commerce insensibly collects a large multitude within the walls of a city; but these citizens are no longer soldiers; and the

arts which adorn and improve the state of civil society corrupt the habits of a military life. The pastoral manners of the Scythians seem to unite the different advantages of simplicity and refinement. The individuals of the same tribe are constantly assembled, but they are assembled in a camp; and the native spirit of these dauntless shepherds is animated by mutual support and emulation. The houses of the Tartars are no more than small tents, of an oval form, which afford a cold and dirty habitation for the promiscuous youth of both sexes. The palaces of the rich consist of wooden huts, of such a size that they may be conveniently fixed on large waggons and drawn by a team perhaps of twenty or thirty oxen. The flocks and herds, after grazing all day in the adjacent pastures, retire, on the approach of night, within the protection of the camp. The necessity of preventing the most mischievous confusion, in such a perpetual concourse of men and animals, must gradually introduce, in the distribution, the order, and the guard of the encampment, the rudiments of the military art. As soon as the forage of a certain district is consumed, the tribe, or rather army, of shepherds makes a regular march to some fresh pastures; and thus acquires, in the ordinary occupations of the pastoral life, the practical knowledge of one of the most important and difficult operations of war. The choice of stations is regulated by the difference of the seasons: in the summer, the Tartars advance towards the North, and pitch their tents on the banks of a river, or, at least, in the neighbourhood of a running stream. But in the winter they return to the South, and shelter their camp behind some convenient eminence, against the winds which are chilled in their passage over the bleak and icy regions of Siberia. These manners are admirably adapted to diffuse, among the wandering tribes, the spirit of emigration and conquest. The connection between the people and their territory is of so frail a texture that it may be broken by the slightest accident. The camp, and not the soil, is the native country of the genuine Tartar. Within the precincts of that camp, his family, his companions, his property, are always included; and in the most distant marches he is still surrounded by the objects which are dear, or valuable, or familiar in his eyes. The thirst of rapine, the fear or the resentment of injury, the impatience of servitude, have, in every age, been sufficient causes to urge the tribes of Scythia boldly to advance into some unknown countries, where they might hope to find a more plentiful subsistence or a less formidable enemy. The revolutions of the North have frequently determined the fate of the South; and, in the conflict of hostile nations, the victor and the vanquished have alternately drove and been driven, from the confines of China to those of Germany.¹⁰ These great emigrations, which have been sometimes executed with almost incredible diligence, were rendered more easy by the peculiar nature of the climate. It is well known that the cold of Tartary is much more severe than in the midst of the temperate zone might reasonably be expected: this uncommon rigour is attributed to the height of the plains, which rise, especially towards the East, more than half a mile above the level of the sea; and to the quantity of saltpetre with which the soil is deeply impregnated.¹¹ In the winter-season, the broad and rapid rivers, that discharge their waters into the Euxine, the Caspian, or the Icy Sea, are strongly frozen; the fields are covered with a bed of snow; and the fugitive or victorious tribes may securely traverse, with their families,

their waggons, and their cattle, the smooth and hard surface of an immense plain.

III. The pastoral life, compared with the labours of agriculture and manufactures, is undoubtedly a life of idleness; and, as the most honourable shepherds of the Tartar race devolve on their captives the domestic management of the cattle, their own leisure is seldom disturbed by any servile and assiduous cares. But this leisure, instead of being devoted to the soft enjoyments of love and harmony, is usefully spent in the violent and sanguinary exercise of the chase. The plains of Tartary are filled with a strong and serviceable breed of horses, which are easily trained for the purposes of war and hunting. The Scythians of every age have been celebrated as bold and skilful riders; and constant practice had seated them so firmly on horseback that they were supposed by strangers to perform the ordinary duties of civil life, to eat, to drink, and even to sleep, without dismounting from their steeds. They excel in the dexterous management of the lance; the long Tartar bow is drawn with a nervous arm; and the weighty arrow is directed to its object with unerring aim and irresistible force. These arrows are often pointed against the harmless animals of the desert, which increase and multiply in the absence of their most formidable enemy: the hare, the goat, the roebuck, the fallow-deer, the stag, the elk, and the antelope. The vigour and patience both of the men and horses are continually exercised by the fatigues of the chase; and the plentiful supply of game contributes to the subsistence, and even luxury, of a Tartar camp. But the exploits of the hunters of Scythia are not confined to the destruction of timid or innoxious beasts; they boldly encounter the angry wild boar, when he turns against his pursuers, excite the sluggish courage of the bear, and provoke the fury of the tiger, as he slumbers in the thicket. Where there is danger, there may be glory; and the mode of hunting which opens the fairest field to the exertions of valour may justly be considered as the image and as the school of war. The general hunting-matches, the pride and delight of the Tartar princes, compose an instructive exercise for their numerous cavalry. A circle is drawn, of many miles in circumference, to encompass the game of an extensive district; and the troops that form the circle regularly advance towards a common centre; where the captive animals, surrounded on every side, are abandoned to the darts of the hunters. In this march, which frequently continues many days, the cavalry are obliged to climb the hills, to swim the rivers, and to wind through the valleys, without interrupting the prescribed order of their gradual progress. They acquire the habit of directing their eye, and their steps, to a remote object; of preserving their intervals; of suspending, or accelerating, their pace, according to the motions of the troops on their right and left; and of watching and repeating the signals of their leaders. Their leaders study, in this practical school, the most important lesson of the military art: the prompt and accurate judgment of ground, of distance, and of time. To employ against a human enemy the same patience and valour, the same skill and discipline, is the only alteration which is required in real war; and the amusements of the chase serve as a prelude to the conquest of an empire.[12](#)

The political society of the ancient Germans has the appearance of a voluntary alliance of independent warriors. The tribes of Scythia, distinguished by the modern appellation of *Hords*, assume the form of a numerous and increasing family; which, in the course of successive generations, has been propagated from the same original stock. The meanest and most ignorant of the Tartars preserve, with conscious pride, the inestimable treasure of their genealogy; and, whatever distinctions of rank may have been introduced by the unequal distribution of pastoral wealth, they mutually respect themselves, and each other, as the descendants of the first founder of the tribe. The custom, which still prevails, of adopting the bravest and most faithful of the captives may countenance the very probable suspicion that this extensive consanguinity is, in a great measure, legal and fictitious. But the useful prejudice, which has obtained the sanction of time and opinion, produces the effects of truth; the haughty Barbarians yield a cheerful and voluntary obedience to the head of their blood; and their chief or *mursa*, as the representative of their great father, exercises the authority of a judge, in peace, and of a leader, in war. In the original state of the pastoral world, each of the *mursas* (if we may continue to use a modern appellation) acted as the independent chief of a large and separate family; and the limits of their peculiar territories were gradually fixed by superior force or mutual consent. But the constant operation of various and permanent causes contributed to unite the vagrant Hords into national communities, under the command of a supreme head. The weak were desirous of support, and the strong were ambitious of dominion; the power, which is the result of union, oppressed and collected the divided forces of the adjacent tribes; and, as the vanquished were freely admitted to share the advantages of victory, the most valiant chiefs hastened to range themselves and their followers under the formidable standard of a confederate nation. The most successful of the Tartar princes assumed the military command, to which he was entitled by the superiority either of merit or of power. He was raised to the throne by the acclamations of his equals; and the title of *Khan* expresses, in the language of the North of Asia, the full extent of the regal dignity. The right of hereditary succession was long confined to the blood of the founder of the monarchy; and at this moment all the Khans, who reign from Crimea to the wall of China, are the lineal descendants of the renowned Zingis.¹³ But, as it is the indispensable duty of a Tartar sovereign to lead his warlike subjects into the field, the claims of an infant are often disregarded; and some royal kinsman, distinguished by his age and valour, is entrusted with the sword and sceptre of his predecessor. Two distinct and regular taxes are levied on the tribes, to support the dignity of their national monarch and of their peculiar chiefs; and each of those contributions amounts to the tythe both of their property and of their spoil. A Tartar sovereign enjoys the tenth part of the wealth of his people; and, as his own domestic riches of flocks and herds increase in a much larger proportion, he is able plentifully to maintain the rustic splendour of his court, to reward the most deserving, or the most favoured, of his followers, and to obtain, from the gentle influence of corruption, the obedience which might be sometimes refused to the stern mandates of authority. The manners of his subjects, accustomed, like himself, to blood and rapine, might excuse, in their eyes,

such partial acts of tyranny as would excite the horror of a civilised people; but the power of a despot has never been acknowledged in the deserts of Scythia. The immediate jurisdiction of the Khan is confined within the limits of his own tribe; and the exercise of his royal prerogative has been moderated by the ancient institution of a national council. The Coroultai,[14](#) or Diet, of the Tartars was regularly held in the spring and autumn, in the midst of a plain; where the princes of the reigning family and the chieftains of the respective tribes may conveniently assemble on horseback, with their martial and numerous trains; and the ambitious monarch, who reviewed the strength, must consult the inclination, of an armed people. The rudiments of a feudal government may be discovered in the constitution of the Scythian or Tartar nations; but the perpetual conflict of these hostile nations has sometimes terminated in the establishment of a powerful and despotic empire. The victor, enriched by the tribute, and fortified by the arms, of dependent kings, has spread his conquests over Europe or Asia; the successful shepherds of the North have submitted to the confinement of arts, of laws, and of cities; and the introduction of luxury, after destroying the freedom of the people, has undermined the foundations of the throne.[15](#)

The memory of past events cannot long be preserved, in the frequent and remote emigrations of illiterate Barbarians. The modern Tartars are ignorant of the conquests of their ancestors;[16](#) and our knowledge of the history of the Scythians is derived from their intercourse with the learned and civilised nations of the South, the Greeks, the Persians, and the Chinese. The Greeks, who navigated the Euxine, and planted their colonies along the sea-coast, made the gradual and imperfect discovery of Scythia; from the Danube, and the confines of Thrace, as far as the frozen Mæotis, the seat of eternal winter, and Mount Caucasus, which, in the language of poetry, was described as the utmost boundary of the earth. They celebrated, with simple credulity, the virtues of the pastoral life.[17](#) They entertained a more rational apprehension of the strength and numbers of the warlike Barbarians,[18](#) who contemptuously baffled the immense armament of Darius, the son of Hystaspes.[19](#) The Persian monarchs had extended their western conquests to the banks of the Danube and the limits of European Scythia. The eastern provinces of their empire were exposed to the Scythians of Asia: the wild inhabitants of the plains beyond the Oxus and the Jaxartes, two mighty rivers, which direct their course towards the Caspian Sea. The long and memorable quarrel of Iran and Touran is still the theme of history or romance; the famous, perhaps the fabulous, valour of the Persian heroes, Rustan and Asfendiar, was signalised in the defence of their country against the Afrasiabs of the North;[20](#) and the invincible spirit of the same Barbarians resisted, on the same ground, the victorious arms of Cyrus and Alexander.[21](#) In the eyes of the Greeks and Persians, the real geography of Scythia was bounded, on the East, by the mountains of Imaus, or Caf; and their distant prospect of the extreme and inaccessible parts of Asia was clouded by ignorance or perplexed by fiction. But those inaccessible regions are the ancient residence of a powerful and civilised nation,[22](#) which ascends, by a probable tradition, above forty

centuries;[23](#) and which is able to verify a series of near two thousand years, by the perpetual testimony of accurate and contemporary historians.[24](#) The annals of China[25](#) illustrate the state and revolutions of the pastoral tribes, which may still be distinguished by the vague appellation of Scythians, or Tartars; the vassals, the enemies, and sometimes the conquerors, of a great empire; whose policy has uniformly opposed the blind and impetuous valour of the Barbarians of the North. From the mouth of the Danube to the sea of Japan, the whole longitude of Scythia is about one hundred and ten degrees, which, in that parallel, are equal to more than five thousand miles. The latitude of these extensive deserts cannot be so easily or so accurately measured; but from the fortieth degree, which touches the wall of China, we may securely advance above a thousand miles to the northward, till our progress is stopped by the excessive cold of Siberia. In that dreary climate, instead of the animated picture of a Tartar camp, the smoke which issues from the earth, or rather from the snow, betrays the subterraneous dwellings of the Tongouses and the Samoides: the want of horses and oxen is imperfectly supplied by the use of reindeer and of large dogs; and the conquerors of the earth insensibly degenerate into a race of deformed and diminutive savages, who tremble at the sound of arms.[26](#)

The Huns, who under the reign of Valens threatened the empire of Rome, had been formidable, in a much earlier period, to the empire of China.[27](#) Their ancient, perhaps their original, seat was an extensive, though dry and barren, tract of country, immediately on the north side of the great wall. Their place is at present occupied by the forty-nine Hords or Banners of the Mongous, a pastoral nation, which consists of about two hundred thousand families.[28](#) But the valour of the Huns had extended the narrow limits of their dominions; and their rustic chiefs, who assumed the appellation of *Tanjou*, gradually became the conquerors, and the sovereigns, of a formidable empire. Towards the east, their victorious arms were stopped only by the ocean; and the tribes, which are thinly scattered between the Amoor and the extreme peninsula of Corea, adhered with reluctance to the standard of the Huns. On the west, near the head of the Irtysh and in the valleys of Imaus, they found a more ample space, and more numerous enemies. One of the lieutenants of the Tanjou subdued in a single expedition twenty-six nations; the Igours,[29](#) distinguished above the Tartar race by the use of letters, were in the number of his vassals; and by the strange connection of human events, the flight of one of those vagrant tribes recalled the victorious Parthians from the invasion of Syria.[30](#) On the side of the north, the ocean was assigned as the limit of the power of the Huns. Without enemies to resist their progress or witnesses to contradict their vanity, they might securely achieve a real, or imaginary, conquest of the frozen regions of Siberia. The *Northern Sea* was fixed as the remote boundary of their empire. But the name of that sea, on whose shores the patriot Sovou embraced the life of a shepherd and an exile,[31](#) may be transferred, with much more probability, to the Baikal, a capacious basin, above three hundred miles in length, which disdains the modest appellation of a lake,[32](#) and which actually communicates with the seas of

the North, by the long course of the Angara, the Tonguska, and the Jenissea. The submission of so many distant nations might flatter the pride of the Tanjou; but the valour of the Huns could be rewarded only by the enjoyment of the wealth and luxury of the empire of the South. In the third century before the Christian era, a wall of fifteen hundred miles in length was constructed, to defend the frontiers of China against the inroads of the Huns;³³ but this stupendous work, which holds a conspicuous place in the map of the world, has never contributed to the safety of an unwarlike people. The cavalry of the Tanjou frequently consisted of two or three hundred thousand men, formidable by the matchless dexterity with which they managed their bows and their horses; by their hardy patience in supporting the inclemency of the weather; and by the incredible speed of their march, which was seldom checked by torrents or precipices, by the deepest rivers or by the most lofty mountains. They spread themselves at once over the face of the country; and their rapid impetuosity surprised, astonished, and disconcerted the grave and elaborate tactics of a Chinese army. The emperor Kaoti,³⁴ a soldier of fortune, whose personal merit had raised him to the throne, marched against the Huns with those veteran troops which had been trained in the civil wars of China. But he was soon surrounded by the Barbarians; and after a siege of seven days, the monarch, hopeless of relief, was reduced to purchase his deliverance by an ignominious capitulation. The successors of Kaoti, whose lives were dedicated to the arts of peace or the luxury of the palace, submitted to a more permanent disgrace. They too hastily confessed the insufficiency of arms and fortifications. They were too easily convinced that, while the blazing signals announced on every side the approach of the Huns, the Chinese troops, who slept with the helmet on their head and the cuirass on their back, were destroyed by the incessant labour of ineffectual marches.³⁵ A regular payment of money and silk was stipulated as the condition of a temporary and precarious peace; and the wretched expedient of disguising a real tribute under the names of a gift or a subsidy was practised by the emperors of China, as well as by those of Rome. But there still remained a more disgraceful article of tribute, which violated the sacred feelings of humanity and nature. The hardships of the savage life, which destroy in their infancy the children who are born with a less healthy and robust constitution, introduce a remarkable disproportion between the numbers of the two sexes. The Tartars are an ugly, and even deformed race; and, while they consider their own women as the instruments of domestic labour, their desires, or rather their appetites, are directed to the enjoyment of more elegant beauty. A select band of the fairest maidens of China was annually devoted to the rude embraces of the Huns;³⁶ and the alliance of the haughty Tanjous was secured by their marriage with the genuine, or adopted, daughters of the Imperial family, which vainly attempted to escape the sacrilegious pollution. The situation of these unhappy victims is described in the verses of a Chinese princess, who laments that she had been condemned by her parents to a distant exile, under a Barbarian husband; who complains that sour milk was her only drink, raw flesh her only food, a tent her only palace; and who expresses, in a strain of pathetic simplicity, the natural wish that she were transformed into a bird, to fly back

to her dear country; the object of her tender and perpetual regret.[37](#)

The conquest of China has been twice achieved by the pastoral tribes of the North: the forces of the Huns were not inferior to those of the Moguls, or of the Mantcheoux; and their ambition might entertain the most sanguine hopes of success. But their pride was humbled, and their progress was checked, by the arms and policy of Vouti,[38](#) the fifth emperor of the powerful dynasty of the Han. In his long reign of fifty-four years, the Barbarians of the southern provinces submitted to the laws and manners of China; and the ancient limits of the monarchy were enlarged, from the great river of Kiang to the port of Canton. Instead of confining himself to the timid operations of a defensive war, his lieutenants penetrated many hundred miles into the country of the Huns. In those boundless deserts, where it is impossible to form magazines and difficult to transport a sufficient supply of provisions, the armies of Vouti were repeatedly exposed to intolerable hardships: and, of one hundred and forty thousand soldiers, who marched against the Barbarians, thirty thousand only returned in safety to the feet of their master. These losses, however, were compensated by splendid and decisive success. The Chinese generals improved the superiority which they derived from the temper of their arms, their chariots of war, and the service of their Tartar auxiliaries. The camp of the Tanjou was surprised in the midst of sleep and intemperance; and, though the monarch of the Huns bravely cut his way through the ranks of the enemy, he left above fifteen thousand of his subjects on the field of battle. Yet this signal victory, which was preceded and followed by many bloody engagements, contributed much less to the destruction of the power of the Huns than the effectual policy which was employed to detach the tributary nations from their obedience. Intimidated by the arms, or allured by the promises, of Vouti and his successors, the most considerable tribes, both of the East and of the West, disclaimed the authority of the Tanjou. While some acknowledged themselves the allies or vassals of the empire, they all became the implacable enemies of the Huns: and the numbers of that haughty people, as soon as they were reduced to their native strength, might, perhaps, have been contained within the walls of one of the great and populous cities of China.[39](#) The desertion of his subjects, and the perplexity of a civil war, at length compelled the Tanjou himself to renounce the dignity of an independent sovereign and the freedom of a warlike and high-spirited nation. He was received at Sigan, the capital of the monarchy, by the troops, the Mandarins, and the emperor himself, with all the honours that could adorn and disguise the triumph of Chinese vanity.[40](#) A magnificent palace was prepared for his reception; his place was assigned above all the princes of the royal family; and the patience of the Barbarian king was exhausted by the ceremonies of a banquet, which consisted of eight courses of meat, and of nine solemn pieces of music. But he performed, on his knees, the duty of a respectful homage to the emperor of China; pronounced, in his own name, and in the name of his successors, a perpetual oath of fidelity; and gratefully accepted a seal, which was bestowed as the emblem of his regal dependence. After this humiliating submission, the Tanjous sometimes departed from

their allegiance, and seized the favourable moments of war and rapine; but the monarchy of the Huns gradually declined, till it was broken, by civil dissension, into two hostile and separate kingdoms. One of the princes of the nation was urged, by fear and ambition, to retire towards the south with eight hords, which composed between forty and fifty thousand families. He obtained, with the title of Tanjou, a convenient territory on the verge of the Chinese provinces; and his constant attachment to the service of the empire was secured by weakness and the desire of revenge. From the time of this fatal schism, the Huns of the north continued to languish about fifty years; till they were oppressed on every side by their foreign and domestic enemies. The proud inscription⁴¹ of a column, erected on a lofty mountain, announced to posterity that a Chinese army had marched seven hundred miles into the heart of their country. The Sienpi,⁴² a tribe of Oriental Tartars, retaliated the injuries which they had formerly sustained; and the power of the Tanjous, after a reign of thirteen hundred years, was utterly destroyed before the end of the first century of the Christian era.⁴³

The fate of the vanquished Huns was diversified by the various influence of character and situation.⁴⁴ Above one hundred thousand persons, the poorest, indeed, and the most pusillanimous of the people, were contented to remain in their native country, to renounce their peculiar name and origin, and to mingle with the victorious nation of the Sienpi. Fifty-eight hords, about two hundred thousand men, ambitious of a more honourable servitude, retired towards the south; implored the protection of the emperors of China; and were permitted to inhabit, and to guard, the extreme frontiers of the province of Chansi and the territory of Ortoos. But the most warlike and powerful tribes of the Huns maintained, in their adverse fortune, the undaunted spirit of their ancestors. The Western world was open to their valour; and they resolved, under the conduct of their hereditary chieftains, to discover and subdue some remote country, which was still inaccessible to the arms of the Sienpi and to the laws of China.⁴⁵ The course of their emigration soon carried them beyond the mountains of Imaus, and the limits of the Chinese geography; but we are able to distinguish the two great divisions of these formidable exiles, which directed their march towards the Oxus, and towards the Volga. The first of these colonies established their dominion in the fruitful and extensive plains of Sogdiana, on the eastern side of the Caspian: where they preserved the name of Huns, with the epithet of Euthalites or Nepthalites.⁴⁶ Their manners were softened, and even their features were insensibly improved, by the mildness of the climate and their long residence in a flourishing province⁴⁷ which might still retain a faint impression of the arts of Greece.⁴⁸ The *white* Huns, a name which they derived from the change of their complexions, soon abandoned the pastoral life of Scythia. Gorgo, which, under the appellation of Carizme, has since enjoyed a temporary splendour, was the residence of the king, who exercised a legal authority over an obedient people. Their luxury was maintained by the labour of the Sogdians; and the only vestige of their ancient barbarism was the custom which obliged all the companions, perhaps to the number of twenty, who had shared the liberality of a

wealthy lord, to be buried alive in the same grave.⁴⁹ The vicinity of the Huns to the provinces of Persia involved them in frequent and bloody contests with the power of that monarchy. But they respected, in peace, the faith of treaties; in war, the dictates of humanity; and their memorable victory over Peroses, or Firuz, displayed the moderation, as well as the valour, of the Barbarians. The *second* division of their countrymen,⁵⁰ the Huns, who gradually advanced towards the north-west, were exercised by the hardships of a colder climate and a more laborious march. Necessity compelled them to exchange the silks of China for the furs of Siberia; the imperfect rudiments of civilised life were obliterated; and the native fierceness of the Huns was exasperated by their intercourse with the savage tribes, who were compared, with some propriety, to the wild beasts of the desert. Their independent spirit soon rejected the hereditary succession of the Tanjous; and, while each hord was governed by its peculiar mursa, their tumultuary council directed the public measures of the whole nation. As late as the thirteenth century, their transient residence on the eastern banks of the Volga was attested by the name of Great Hungary.⁵¹ In the winter, they descended with their flocks and herds towards the mouth of that mighty river; and their summer excursions reached as high as the latitude of Saratoff, or perhaps the conflux of the Kama. Such at least were the recent limits of the black Calmucks,⁵² who remained about a century under the protection of Russia; and who have since returned to their native seats on the frontiers of the Chinese empire. The march and the return of those wandering Tartars, whose united camp consists of fifty thousand tents or families, illustrate the distant emigrations of the ancient Huns.⁵³

It is impossible to fill the dark interval of time, which elapsed, after the Huns of the Volga were lost in the eyes of the Chinese, and before they shewed themselves to those of the Romans. There is some reason, however, to apprehend, that the same force which had driven them from their native seats, still continued to impel their march towards the frontiers of Europe. The power of the Sienpi, their implacable enemies, which extended above three thousand miles from east to west,⁵⁴ must have gradually oppressed them by the weight and terror of a formidable neighbourhood; and the flight of the tribes of Scythia would inevitably tend to increase the strength, or to contract the territories, of the Huns. The harsh and obscure appellations of those tribes would offend the ear, without informing the understanding, of the reader; but I cannot suppress the very natural suspicion, *that* the Huns of the north derived a considerable reinforcement from the ruin of the dynasty of the south, which, in the course of the third century, submitted to the dominion of China; *that* the bravest warriors marched away in search of their free and adventurous countrymen; *and* that, as they had been divided by prosperity, they were easily reunited by the common hardships of their adverse fortune.⁵⁵ The Huns, with their flocks and herds, their wives and children, their dependants and allies, were transported to the west of the Volga, and they boldly advanced to invade the country of the Alani, a pastoral people who occupied, or wasted, an extensive tract of the deserts of Scythia. The plains between the Volga and

the Tanais were covered with the tents of the Alani, but their name and manners were diffused over the wide extent of their conquests; and the painted tribes of the Agathyrsi and Geloni were confounded among their vassals. Towards the north, they penetrated into the frozen regions of Siberia, among the savages who were accustomed, in their rage or hunger, to the taste of human flesh; and their southern inroads were pushed as far as the confines of Persia and India. The mixture of Sarmatic and German blood had contributed to improve the features of the Alani, to whiten their swarthy complexions, and to tinge their hair with a yellowish cast, which is seldom found in the Tartar race. They were less deformed in their persons, less brutish in their manners, than the Huns; but they did not yield to those formidable Barbarians in their martial and independent spirit; in the love of freedom, which rejected even the use of domestic slaves; and in the love of arms, which considered war and rapine as the pleasure and the glory of mankind. A naked scymetar, fixed in the ground, was the only object of their religious worship; the scalps of their enemies formed the costly trappings of their horses; and they viewed, with pity and contempt, the pusillanimous warriors, who patiently expected the infirmities of age and the tortures of lingering disease.⁵⁶ On the banks of the Tanais, the military power of the Huns and the Alani encountered each other with equal valour, but with unequal success. The Huns prevailed in the bloody contest: the king of the Alani was slain; and the remains of the vanquished nation were dispersed by the ordinary alternative of flight or submission.⁵⁷ A colony of exiles found a secure refuge in the mountains of Caucasus, between the Euxine and the Caspian; where they still preserve their name and their independence. Another colony advanced, with more intrepid courage, towards the shores of the Baltic; associated themselves with the northern tribes of Germany; and shared the spoil of the Roman provinces of Gaul and Spain. But the greatest part of the nation of the Alani embraced the offers of an honourable and advantageous union; and the Huns, who esteemed the valour of their less fortunate enemies, proceeded, with an increase of numbers and confidence, to invade the limits of the Gothic empire.

The great Hermanric, whose dominions extended from the Baltic to the Euxine, enjoyed, in the full maturity of age and reputation, the fruit of his victories, when he was alarmed by the formidable approach of an host of unknown enemies,⁵⁸ on whom his barbarous subjects might, without injustice, bestow the epithet of Barbarians. The numbers, the strength, the rapid motions, and the implacable cruelty of the Huns were felt and dreaded and magnified by the astonished Goths; who beheld their fields and villages consumed with flames and deluged with indiscriminate slaughter. To these real terrors they added the surprise and abhorrence which were excited by the shrill voice, the uncouth gestures, and the strange deformity of the Huns. These savages of Scythia were compared (and the picture had some resemblance) to the animals who walk very awkwardly on two legs; and to the misshapen figures, the *Termini*, which were often placed on the bridges of antiquity. They were distinguished from the rest of the human species by their broad shoulders, flat noses, and small black eyes, deeply buried in the head; and, as they were almost destitute of beards, they never enjoyed

either the manly graces of youth or the venerable aspect of age.⁵⁹ A fabulous origin was assigned worthy of their form and manners; that the witches of Scythia, who, for their foul and deadly practices, had been driven from society, had copulated in the desert with infernal spirits; and that the Huns were the offspring of this execrable conjunction.⁶⁰ The tale, so full of horror and absurdity, was greedily embraced by the credulous hatred of the Goths; but, while it gratified their hatred, it increased their fear; since the posterity of demons and witches might be supposed to inherit some share of the preternatural powers, as well as of the malignant temper, of their parents. Against these enemies, Hermanric prepared to exert the united forces of the Gothic state; but he soon discovered that his vassal tribes, provoked by oppression, were much more inclined to second, than to repel, the invasion of the Huns. One of the chiefs of the Roxolani⁶¹ had formerly deserted the standard of Hermanric, and the cruel tyrant had condemned the innocent wife of the traitor to be torn asunder by wild horses. The brothers of that unfortunate woman seized the favourable moment of revenge. The aged king of the Goths languished some time after the dangerous wound which he received from their daggers; but the conduct of the war was retarded by his infirmities, and the public councils of the nation were distracted by a spirit of jealousy and discord. His death, which has been imputed to his own despair, left the reins of government in the hands of Withimer, who, with the doubtful aid of some Scythian mercenaries, maintained the unequal contest against the arms of the Huns and the Alani, till he was defeated and slain in a decisive battle. The Ostrogoths submitted to their fate; and the royal race of the Amali will hereafter be found among the subjects of the haughty Attila. But the person of Witheric, the infant king, was saved by the diligence of Alatheus and Saphrax: two warriors of approved valour and fidelity; who, by cautious marches, conducted the independent remains of the nation of the Ostrogoths towards the Danastus, or Dniester, a considerable river, which now separates the Turkish dominions from the empire of Russia. On the banks of the Dniester the prudent Athanaric, more attentive to his own than to the general safety, had fixed the camp of the Visigoths; with the firm resolution of opposing the victorious Barbarians whom he thought it less advisable to provoke. The ordinary speed of the Huns was checked by the weight of baggage, and the encumbrance of captives; but their military skill deceived, and almost destroyed, the army of Athanaric. While the judge of the Visigoths defended the banks of the Dniester, he was encompassed and attacked by a numerous detachment of cavalry, who, by the light of the moon, had passed the river in a fordable place; and it was not without the utmost efforts of courage and conduct that he was able to effect his retreat towards the hilly country. The undaunted general had already formed a new and judicious plan of defensive war; and the strong lines, which he was preparing to construct between the mountains, the Pruth, and the Danube would have secured the extensive and fertile territory that bears the modern name of Walachia from the destructive inroads of the Huns.⁶² But the hopes and measures of the judge of the Visigoths were soon disappointed by the trembling impatience of his dismayed countrymen; who were persuaded by their fears that the interposition of the Danube was the only barrier that

could save them from the rapid pursuit and invincible valour of the Barbarians of Scythia. Under the command of Fritigern and Alavivus,[63](#) the body of the nation hastily advanced to the banks of the great river, and implored the protection of the Roman emperor of the East. Athanaric himself, still anxious to avoid the guilt of perjury, retired with a band of faithful followers into the mountainous country of Caucaland; which appears to have been guarded, and almost concealed, by the impenetrable forests of Transylvania.[64](#)

After Valens had terminated the Gothic war with some appearance of glory and success, he made a progress through his dominions of Asia, and at length fixed his residence in the capital of Syria. The five years[65](#) which he spent at Antioch were employed to watch, from a secure distance, the hostile designs of the Persian monarch; to check the depredations of the Saracens and Isaurians;[66](#) to enforce, by arguments more prevalent than those of reason and eloquence, the belief of the Arian theology; and to satisfy his anxious suspicions by the promiscuous execution of the innocent and the guilty. But the attention of the emperor was most seriously engaged by the important intelligence which he received from the civil and military officers who were entrusted with the defence of the Danube. He was informed that the North was agitated by a furious tempest; that the irruption of the Huns, an unknown and monstrous race of savages, had subverted the power of the Goths; and that the suppliant multitudes of that warlike nation, whose pride was now humbled in the dust, covered a space of many miles along the banks of the river. With outstretched arms and pathetic lamentations, they loudly deplored their past misfortunes and their present danger; acknowledged that their only hope of safety was in the clemency of the Roman government; and most solemnly protested that, if the gracious liberality of the emperor would permit them to cultivate the waste lands of Thrace, they should ever hold themselves bound, by the strongest obligations of duty and gratitude, to obey the laws, and to guard the limits, of the republic. These assurances were confirmed by the ambassadors of the Goths, who impatiently expected, from the mouth of Valens, an answer that must finally determine the fate of their unhappy countrymen. The emperor of the East was no longer guided by the wisdom and authority of his elder brother, whose death happened towards the end of the preceding year: and, as the distressful situation of the Goths required an instant and peremptory decision, he was deprived of the favourite resource of feeble and timid minds; who consider the use of dilatory and ambiguous measures as the most admirable efforts of consummate prudence. As long as the same passions and interests subsist among mankind, the questions of war and peace, of justice and policy, which were debated in the councils of antiquity, will frequently present themselves as the subject of modern deliberation. But the most experienced statesman of Europe has never been summoned to consider the propriety or the danger of admitting or rejecting an innumerable multitude of Barbarians, who are driven by despair and hunger to solicit a settlement on the territories of a civilised nation. When that important proposition, so essentially connected with the public

safety, was referred to the ministers of Valens, they were perplexed and divided; but they soon acquiesced in the flattering sentiment which seemed the most favourable to the pride, the indolence, and the avarice of their sovereign. The slaves, who were decorated with the titles of prefects and generals, dissembled or disregarded the terrors of this national emigration, so extremely different from the partial and accidental colonies which had been received on the extreme limits of the empire. But they applauded the liberality of fortune, which had conducted, from the most distant countries of the globe, a numerous and invincible army of strangers, to defend the throne of Valens; who might now add to the royal treasures the immense sums of gold supplied by the provincials to compensate their annual proportion of recruits. The prayers of the Goths were granted, and their service was accepted by the Imperial court: and orders were immediately despatched to the civil and military governors of the Thracian diocese, to make the necessary preparations for the passage and subsistence of a great people, till a proper and sufficient territory could be allotted for their future residence. The liberality of the emperor was accompanied, however, with two harsh and rigorous conditions, which prudence might justify on the side of the Romans but which distress alone could extort from the indignant Goths. Before they passed the Danube, they were required to deliver their arms; and it was insisted that their children should be taken from them and dispersed through the provinces of Asia, where they might be civilised by the arts of education and serve as hostages to secure the fidelity of their parents.

Arch of Constantine, Rome (from a photograph)

During this suspense of a doubtful and distant negotiation, the impatient Goths made some rash attempts to pass the Danube, without the permission of the government whose protection they had implored. Their motions were strictly observed by the vigilance of the troops which were stationed along the river, and their foremost detachments were defeated with considerable slaughter; yet such were the timid councils of the reign of Valens that the brave officers who had served their country in the execution of their duty were punished by the loss of their employments and narrowly escaped the loss of their heads. The Imperial mandate was at length received for transporting over the Danube the whole body of the Gothic nation;[67](#) but the execution of this order was a task of labour and difficulty. The stream of the Danube, which in those parts is above a mile broad,[68](#) had been swelled by incessant rains; and, in this tumultuous passage, many were swept away and drowned by the rapid violence of the current. A large fleet of vessels, of boats, and of canoes was provided; many days and nights they passed and repassed with indefatigable toil; and the most strenuous diligence was exerted by the officers of Valens that not a single Barbarian, of those who were reserved to subvert the foundations of Rome, should be left on the opposite shore. It was thought expedient that an accurate account should be taken of their numbers; but the persons who were employed soon desisted, with amazement and dismay, from the prosecution of the endless and impracticable task;[69](#) and the principal historian of the age most seriously affirms that the prodigious armies of Darius and Xerxes, which had so long been considered as the fables of vain and credulous antiquity, were now justified, in the eyes of mankind, by the evidence of fact and experience. A probable testimony has fixed the number of the Gothic warriors at two hundred thousand men; and, if we can venture to add the just proportion of women, of children, and of slaves, the whole mass of people which composed this formidable emigration must have amounted to near a million of persons, of both sexes and of all ages. The children of the Goths, those at least of a distinguished rank, were separated from the multitude. They were conducted, without delay, to the distant seats assigned for their residence and education; and, as the numerous train of hostages or captives passed through the cities, their gay and splendid apparel, their robust and martial figure, excited the surprise and envy of the Provincials. But the stipulation, the most offensive to the Goths and the most important to the Romans, was shamefully eluded. The Barbarians, who considered their arms as the ensigns of honour and the pledges of safety, were disposed to offer a price which the lust or avarice of the Imperial officers was easily tempted to accept. To preserve their arms, the haughty warriors consented, with some reluctance, to prostitute their wives or their daughters; the charms of a beauteous maid, or a comely boy, secured the connivance of the inspectors; who sometimes cast an eye of covetousness on the fringed carpets and linen garments of their new allies,[70](#) or who sacrificed their duty to the mean consideration of filling their farms with cattle and their houses with slaves. The Goths, with arms in their hands, were permitted to enter the boats; and, when their strength

was collected on the other side of the river, the immense camp which was spread over the plains and the hills of the Lower Mæsia assumed a threatening and even hostile aspect. The leaders of the Ostrogoths, Alatheus and Saphrax, the guardians of their infant king, appeared soon afterwards on the northern banks of the Danube; and immediately despatched their ambassadors to the court of Antioch, to solicit, with the same professions of allegiance and gratitude, the same favour which had been granted to the suppliant Visigoths. The absolute refusal of Valens suspended their progress, and discovered the repentance, the suspicions, and the fears of the Imperial council.

An undisciplined and unsettled nation of Barbarians required the firmest temper and the most dexterous management. The daily subsistence of near a million of extraordinary subjects could be supplied only by constant and skilful diligence, and might continually be interrupted by mistake or accident. The insolence or the indignation of the Goths, if they conceived themselves to be the objects either of fear or of contempt, might urge them to the most desperate extremities; and the fortune of the state seemed to depend on the prudence, as well as the integrity, of the generals of Valens. At this important crisis, the military government of Thrace was exercised by Lupicinus and Maximus, in whose venal minds the slightest hope of private emolument outweighed every consideration of public advantage; and whose guilt was only alleviated by their incapacity of discerning the pernicious effects of their rash and criminal administration. Instead of obeying the orders of their sovereign and satisfying with decent liberality the demands of the Goths, they levied an ungenerous and oppressive tax on the wants of the hungry Barbarians. The vilest food was sold at an extravagant price; and, in the room of wholesome and substantial provisions, the markets were filled with the flesh of dogs, and of unclean animals, who had died of disease. To obtain the valuable acquisition of a pound of bread, the Goths resigned the possession of an expensive, though serviceable, slave; and a small quantity of meat was greedily purchased with ten pounds of a precious, but useless, metal.⁷¹ When their property was exhausted, they continued this necessary traffic by the sale of their sons and daughters; and notwithstanding the love of freedom, which animated every Gothic breast, they submitted to the humiliating maxim that it was better for their children to be maintained in a servile condition than to perish in a state of wretched and helpless independence. The most lively resentment is excited by the tyranny of pretended benefactors, who sternly exact the debt of gratitude which they have cancelled by subsequent injuries: a spirit of discontent insensibly arose in the camp of the Barbarians, who pleaded, without success, the merit of their patient and dutiful behaviour; and loudly complained of the inhospitable treatment which they had received from their new allies. They beheld around them the wealth and plenty of a fertile province, in the midst of which they suffered the intolerable hardships of artificial famine. But the means of relief, and even of revenge, were in their hands; since the rapaciousness of their tyrants had left, to an injured people, the possession and the use of arms. The clamours of a multitude, untaught to disguise their sentiments, announced the first symptoms of resistance, and alarmed the timid and

guilty minds of Lupicinus and Maximus. Those crafty ministers, who substituted the cunning of temporary expedients to the wise and salutary counsels of general policy, attempted to remove the Goths from their dangerous station on the frontiers of the empire, and to disperse them in separate quarters of cantonment through the interior provinces. As they were conscious how ill they had deserved the respect, or confidence, of the Barbarians, they diligently collected, from every side, a military force, that might urge the tardy and reluctant march of a people who had not yet renounced the title, or the duties, of Roman subjects. But the generals of Valens, while their attention was solely directed to the discontented Visigoths, imprudently disarmed the ships and fortifications which constituted the defence of the Danube. The fatal oversight was observed and improved by Alatheus and Saphrax, who anxiously watched the favourable moment of escaping from the pursuit of the Huns. By the help of such rafts and vessels as could be hastily procured, the leaders of the Ostrogoths transported, without opposition, their king and their army; and boldly fixed an hostile and independent camp on the territories of the empire.[72](#)

Under the name of judges, Alavivus and Fritigern were the leaders of the Visigoths in peace and war; and the authority which they derived from their birth was ratified by the free consent of the nation. In a season of tranquillity, their power might have been equal, as well as their rank; but, as soon as their countrymen were exasperated by hunger and oppression, the superior abilities of Fritigern assumed the military command, which he was qualified to exercise for the public welfare. He restrained the impatient spirit of the Visigoths, till the injuries and the insults of their tyrants should justify their resistance in the opinion of mankind; but he was not disposed to sacrifice any solid advantages for the empty praise of justice and moderation. Sensible of the benefits which would result from the union of the Gothic powers under the same standard, he secretly cultivated the friendship of the Ostrogoths; and, while he professed an implicit obedience to the orders of the Roman generals, he proceeded by slow marches towards Marcianopolis, the capital of the Lower Mæsia, about seventy miles from the banks of the Danube. On that fatal spot, the flames of discord and mutual hatred burst forth into a dreadful conflagration. Lupicinus had invited the Gothic chiefs to a splendid entertainment; and their martial train remained under arms at the entrance of the palace. But the gates of the city were strictly guarded; and the Barbarians were sternly excluded from the use of a plentiful market, to which they asserted their equal claim of subjects and allies. Their humble prayers were rejected with insolence and derision; and, as their patience was now exhausted, the townsmen, the soldiers, and the Goths were soon involved in a conflict of passionate altercation and angry reproaches. A blow was imprudently given; a sword was hastily drawn; and the first blood that was spilt in this accidental quarrel became the signal of a long and destructive war. In the midst of noise and brutal intemperance, Lupicinus was informed, by a secret messenger, that many of his soldiers were slain and despoiled of their arms; and, as he was already inflamed by wine and oppressed by sleep, he issued a rash command that their death should be revenged by the massacre of the guards of

Fritigern and Alavivus. The clamorous shouts and dying groans apprised Fritigern of his extreme danger; and, as he possessed the calm and intrepid spirit of a hero, he saw that he was lost if he allowed a moment of deliberation to the man who had so deeply injured him. "A trifling dispute," said the Gothic leader, with a firm but gentle tone of voice, "appears to have arisen between the two nations; but it may be productive of the most dangerous consequences, unless the tumult is immediately pacified by the assurance of our safety and the authority of our presence." At these words, Fritigern and his companions drew their swords, opened their passage through the unresisting crowd which filled the palace, the streets, and the gates of Marcianopolis, and, mounting their horses, hastily vanished from the eyes of the astonished Romans. The generals of the Goths were saluted by the fierce and joyful acclamations of the camp; war was instantly resolved, and the resolution was executed without delay; the banners of the nation were displayed according to the custom of their ancestors; and the air resounded with the harsh and mournful music of the Barbarian trumpet.⁷³ The weak and guilty Lupicinus, who had dared to provoke, who had neglected to destroy, and who still presumed to despise his formidable enemy, marched against the Goths, at the head of such a military force as could be collected on this sudden emergency. The Barbarians expected his approach about nine miles from Marcianopolis; and on this occasion the talents of the general were found to be of more prevailing efficacy than the weapons and discipline of the troops. The valour of the Goths was so ably directed by the genius of Fritigern that they broke, by a close and vigorous attack, the ranks of the Roman legions. Lupicinus left his arms and standards, his tribunes and his bravest soldiers, on the field of battle; and their useless courage served only to protect the ignominious flight of their leader. "That successful day put an end to the distress of the Barbarians and the security of the Romans: from that day, the Goths, renouncing the precarious condition of strangers and exiles, assumed the character of citizens and masters, claimed an absolute dominion over the possessors of land, and held, in their own right, the northern provinces of the empire, which are bounded by the Danube." Such are the words of the Gothic historian,⁷⁴ who celebrates, with rude eloquence, the glory of his countrymen. But the dominion of the Barbarians was exercised only for the purposes of rapine and destruction. As they had been deprived, by the ministers of the emperor, of the common benefits of nature and the fair intercourse of social life, they retaliated the injustice on the subjects of the empire; and the crimes of Lupicinus were expiated by the ruin of the peaceful husbandmen of Thrace, the conflagration of their villages, and the massacre, or captivity, of their innocent families. The report of the Gothic victory was soon diffused over the adjacent country; and, while it filled the minds of the Romans with terror and dismay, their own hasty prudence contributed to increase the forces of Fritigern and the calamities of the province. Some time before the great emigration, a numerous body of Goths, under the command of Suerid and Colias, had been received into the protection and service of the empire.⁷⁵ They were encamped under the walls of Hadrianople: but the ministers of Valens were anxious to remove them beyond the Hellespont, at a distance from the dangerous temptation which might so easily be communicated by the neighbourhood, and the success, of

their countrymen. The respectful submission with which they yielded to the order of their march might be considered as a proof of their fidelity; and their moderate request of a sufficient allowance of provisions, and of a delay of only two days, was expressed in the most dutiful terms. But the first magistrate of Hadrianople, incensed by some disorders which had been committed at his country-house, refused this indulgence; and arming against them the inhabitants and manufacturers of a populous city, he urged, with hostile threats, their instant departure. The Barbarians stood silent and amazed, till they were exasperated by the insulting clamours, and missile weapons, of the populace: but, when patience or contempt was fatigued, they crushed the undisciplined multitude, inflicted many a shameful wound on the backs of their flying enemies, and despoiled them of the splendid armour⁷⁶ which they were unworthy to bear. The resemblance of their sufferings and their actions soon united this victorious detachment to the nation of the Visigoths; the troops of Colias and Suerid expected the approach of the great Fritigern, ranged themselves under his standard, and signalised their ardour in the siege of Hadrianople. But the resistance of the garrison informed the Barbarians that, in the attack of regular fortifications, the efforts of unskilful courage are seldom effectual. Their general acknowledged his error, raised the siege, declared that “he was at peace with stone walls,”⁷⁷ and revenged his disappointment on the adjacent country. He accepted, with pleasure, the useful reinforcement of hardy workmen, who laboured in the gold mines of Thrace⁷⁸ for the emolument, and under the lash, of an unfeeling master:⁷⁹ and these new associates conducted the Barbarians, through the secret paths, to the most sequestered places, which had been chosen to secure the inhabitants, the cattle, and the magazines of corn. With the assistance of such guides, nothing could remain impervious or inaccessible; resistance was fatal; flight was impracticable; and the patient submission of helpless innocence seldom found mercy from the Barbarian conqueror. In the course of these depredations, a great number of the children of the Goths, who had been sold into captivity, were restored to the embraces of their afflicted parents; but these tender interviews, which might have revived and cherished in their minds some sentiments of humanity, tended only to stimulate their native fierceness by the desire of revenge. They listened, with eager attention, to the complaints of their captive children, who had suffered the most cruel indignities from the lustful or angry passions of their masters; and the same cruelties, the same indignities, were severely retaliated on the sons and daughters of the Romans.⁸⁰

The imprudence of Valens and his ministers had introduced into the heart of the empire a nation of enemies; but the Visigoths might even yet have been reconciled, by the manly confession of past errors and the sincere performance of former engagements. These healing and temperate measures seemed to concur with the timorous disposition of the sovereign of the East; but, on this occasion alone, Valens was brave; and his unseasonable bravery was fatal to himself and to his subjects. He declared his intention of marching from Antioch to Constantinople, to subdue this

dangerous rebellion; and, as he was not ignorant of the difficulties of the enterprise, he solicited the assistance of his nephew, the emperor Gratian, who commanded all the forces of the West. The veteran troops were hastily recalled from the defence of Armenia; that important frontier was abandoned to the discretion of Sapor; and the immediate conduct of the Gothic war was entrusted, during the absence of Valens, to his lieutenants Trajan and Profuturus, two generals who indulged themselves in a very false and favourable opinion of their own abilities. On their arrival in Thrace, they were joined by Richomer, count of the domestics; and the auxiliaries of the West, that marched under his banner, were composed of the Gallic legions, reduced indeed by a spirit of desertion to the vain appearances of strength and numbers. In a council of war, which was influenced by pride rather than by reason, it was resolved to seek and to encounter the Barbarians, who lay encamped in the spacious and fertile meadows near the most southern of the six mouths of the Danube.⁸¹ Their camp was surrounded by the usual fortification of waggons;⁸² and the Barbarians, secure within the vast circle of the enclosure, enjoyed the fruits of their valour and the spoils of the province. In the midst of riotous intemperance, the watchful Fritigern observed the motions, and penetrated the designs, of the Romans. He perceived that the numbers of the enemy were continually increasing; and, as he understood their intention of attacking his rear as soon as the scarcity of forage should oblige him to remove his camp, he recalled to their standard his predatory detachments which covered the adjacent country. As soon as they descried the flaming beacons,⁸³ they obeyed, with incredible speed, the signal of their leader; the camp was filled with the martial crowd of Barbarians; their impatient clamours demanded the battle, and their tumultuous zeal was approved and animated by the spirit of their chiefs. The evening was already far advanced; and the two armies prepared themselves for the approaching combat, which was deferred only till the dawn of day. While the trumpets sounded to arms, the undaunted courage of the Goths was confirmed by the mutual obligation of a solemn oath; and, as they advanced to meet the enemy, the rude songs, which celebrated the glory of their forefathers, were mingled with their fierce and dissonant outcries, and opposed to the artificial harmony of the Roman shout. Some military skill was displayed by Fritigern to gain the advantage of a commanding eminence; but the bloody conflict, which began and ended with the light, was maintained, on either side, by the personal and obstinate efforts of strength, valour, and agility. The legions of Armenia supported their fame in arms; but they were oppressed by the irresistible weight of the hostile multitude; the left wing of the Romans was thrown into disorder, and the field was strewn with their mangled carcasses. This partial defeat was balanced, however, by partial success; and when the two armies, at a late hour of the evening, retreated to their respective camps, neither of them could claim the honours, or the effects, of a decisive victory. The real loss was more severely felt by the Romans, in proportion to the smallness of their numbers; but the Goths were so deeply confounded and dismayed by this vigorous, and perhaps unexpected, resistance that they remained seven days within the circle of their fortifications. Such funeral rites as the circumstances of time and place would admit were piously discharged to some officers of distinguished rank; but the

indiscriminate vulgar was left unburied on the plain. Their flesh was greedily devoured by the birds of prey, who, in that age, enjoyed very frequent and delicious feasts; and several years afterwards the white and naked bones which covered the wide extent of the fields presented to the eyes of Ammianus a dreadful monument of the battle of Salices.[84](#)

The progress of the Goths had been checked by the doubtful event of that bloody day; and the Imperial generals, whose army would have been consumed by the repetition of such a contest, embraced the more rational plan of destroying the Barbarians by the wants and pressure of their own multitudes. They prepared to confine the Visigoths in the narrow angle of land between the Danube, the desert of Scythia, and the mountains of Hæmus, till their strength and spirit should be insensibly wasted by the inevitable operation of famine. The design was prosecuted with some conduct and success; the Barbarians had almost exhausted their own magazines, and the harvests of the country; and the diligence of Saturninus, the master-general of the cavalry, was employed to improve the strength, and to contract the extent, of the Roman fortifications. His labours were interrupted by the alarming intelligence that new swarms of Barbarians had passed the unguarded Danube, either to support the cause, or to imitate the example, of Fritigern. The just apprehension, that he himself might be surrounded, and overwhelmed, by the arms of hostile and unknown nations, compelled Saturninus to relinquish the siege of the Gothic camp: and the indignant Visigoths, breaking from their confinement, satiated their hunger and revenge, by the repeated devastation of the fruitful country, which extends above three hundred miles from the banks of the Danube to the straits of the Hellespont.[85](#) The sagacious Fritigern had successfully appealed to the passions, as well as to the interest, of his Barbarian allies; and the love of rapine and the hatred of Rome seconded, or even prevented, the eloquence of his ambassadors. He cemented a strict and useful alliance with the great body of his countrymen, who obeyed Alatheus and Saphrax as the guardians of their infant king; the long animosity of rival tribes was suspended by the sense of their common interest; the independent part of the nation was associated under one standard; and the chiefs of the Ostrogoths appear to have yielded to the superior genius of the general of the Visigoths. He obtained the formidable aid of the Taifalæ, whose military renown was disgraced and polluted by the public infamy of their domestic manners. Every youth, on his entrance into the world, was united by the ties of honourable friendship, and brutal love, to some warrior of the tribe; nor could he hope to be released from this unnatural connection, till he had approved his manhood by slaying, in single combat, a huge bear, or a wild boar of the forest.[86](#) But the most powerful auxiliaries of the Goths were drawn from the camp of those enemies who had expelled them from their native seats. The loose subordination, and extensive possessions, of the Huns and the Alani delayed the conquests, and distracted the councils, of that victorious people. Several of the hords were allured by the liberal promises of Fritigern; and the rapid cavalry of Scythia added weight and energy to the steady and strenuous efforts of the Gothic infantry. The Sarmatians, who could never forgive the successor of

Valentinian, enjoyed and increased the general confusion; and a seasonable irruption of the Alemanni into the provinces of Gaul engaged the attention, and diverted the forces, of the emperor of the West.[87](#)

One of the most dangerous inconveniences of the introduction of the Barbarians into the army and the palace, was sensibly felt in their correspondence with their hostile countrymen, to whom they imprudently, or maliciously, revealed the weakness of the Roman empire. A soldier, of the life-guards of Gratian, was of the nation of the Alemanni, and of the tribe of the Lentienses, who dwelt beyond the lake of Constance. Some domestic business obliged him to request a leave of absence. In a short visit to his family and friends, he was exposed to their curious inquiries; and the vanity of the loquacious soldier tempted him to display his intimate acquaintance with the secrets of the state and the designs of his master. The intelligence that Gratian was preparing to lead the military force of Gaul and of the West to the assistance of his uncle Valens pointed out to the restless spirit of the Alemanni the moment, and the mode, of a successful invasion. The enterprise of some light detachments, who, in the month of February, passed the Rhine upon the ice, was the prelude of a more important war. The boldest hopes of rapine, perhaps of conquest, outweighed the consideration of timid prudence or national faith. Every forest and every village poured forth a band of hardy adventurers; and the great army of the Alemanni, which, on their approach, was estimated at forty thousand men by the fears of the people, was afterwards magnified to the number of seventy thousand by the vain and credulous flattery of the Imperial court. The legions which had been ordered to march into Pannonia were immediately recalled or detained for the defence of Gaul; the military command was divided between Nanienus and Mellobaudes; and the youthful emperor, though he respected the long experience and sober wisdom of the former, was much more inclined to admire and to follow the martial ardour of his colleague; who was allowed to unite the incompatible characters of count of the domestics and of king of the Franks. His rival Priarius, king of the Alemanni, was guided, or rather impelled, by the same headstrong valour; and, as their troops were animated by the spirit of their leaders, they met, they saw, they encountered, each other, near the town of Argentaria, or Colmar,[88](#) in the plains of Alsace. The glory of the day was justly ascribed to the missile weapons and well-practised evolutions of the Roman soldiers; the Alemanni, who long maintained their ground, were slaughtered with unrelenting fury; five thousand only of the Barbarians escaped to the woods and mountains; and the glorious death of their king on the field of battle saved him from the reproaches of the people, who are always disposed to accuse the justice, or policy, of an unsuccessful war. After this signal victory, which secured the peace of Gaul and asserted the honour of the Roman arms, the emperor Gratian appeared to proceed without delay on his Eastern expedition; but, as he approached the confines of the Alemanni, he suddenly inclined to the left, surprised them by his unexpected passage of the Rhine, and boldly advanced into the heart of their country. The Barbarians opposed to his progress the obstacles of nature and of courage; and still continued to retreat from one hill to another, till they were

satisfied, by repeated trials, of the power and perseverance of their enemies. Their submission was accepted as a proof, not indeed of their sincere repentance, but of their actual distress; and a select number of their brave and robust youth was exacted from the faithless nation, as the most substantial pledge of their future moderation. The subjects of the empire, who had so often experienced that the Alemanni could neither be subdued by arms nor restrained by treaties, might not promise themselves any solid or lasting tranquillity: but they discovered, in the virtues of their young sovereign, the prospect of a long and auspicious reign. When the legions climbed the mountains, and scaled the fortifications, of the Barbarians, the valour of Gratian was distinguished in the foremost ranks; and the gilt and variegated armour of his guards was pierced and shattered by the blows which they had received in their constant attachment to the person of their sovereign. At the age of nineteen, the son of Valentinian seemed to possess the talents of peace and war; and his personal success against the Alemanni was interpreted as a sure presage of his Gothic triumphs.[89](#)

While Gratian deserved and enjoyed the applause of his subjects, the emperor Valens, who, at length, had removed his court and army from Antioch, was received by the people of Constantinople as the author of the public calamity. Before he had reposed himself ten days in the capital, he was urged, by the licentious clamours of the Hippodrome, to march against the Barbarians whom he had invited into his dominions: and the citizens, who are always brave at a distance from any real danger, declared, with confidence, that, if they were supplied with arms, *they* alone would undertake to deliver the province from the ravages of an insulting foe.[90](#) The vain reproaches of an ignorant multitude hastened the downfall of the Roman empire; they provoked the desperate rashness of Valens, who did not find, either in his reputation or in his mind, any motives to support with firmness the public contempt. He was soon persuaded, by the successful achievements of his lieutenants, to despise the power of the Goths, who, by the diligence of Fritigern, were now collected in the neighbourhood of Hadrianople. The march of the Taifalæ had been intercepted by the valiant Frigerid; the king of those licentious Barbarians was slain in battle; and the suppliant captives were sent into distant exile to cultivate the lands of Italy which were assigned for their settlement in the vacant territories of Modena and Parma.[91](#) The exploits of Sebastian,[92](#) who was recently engaged in the service of Valens and promoted to the rank of master-general of the infantry, were still more honourable to himself and useful to the republic. He obtained the permission of selecting three hundred soldiers from each of the legions; and this separate detachment soon acquired the spirit of discipline and the exercise of arms, which were almost forgotten under the reign of Valens. By the vigour and conduct of Sebastian, a large body of the Goths was surprised in their camp: and the immense spoil which was recovered from their hands filled the city of Hadrianople and the adjacent plain. The splendid narratives which the general transmitted of his own exploits alarmed the Imperial court by the appearance of superior merit; and, though he cautiously insisted on the difficulties of the Gothic war, his valour was praised, his advice was rejected; and Valens, who listened with pride

and pleasure to the flattering suggestions of the eunuchs of the palace, was impatient to seize the glory of an easy and assured conquest. His army was strengthened by a numerous reinforcement of veterans; and his march from Constantinople to Hadrianople was conducted with so much military skill that he prevented the activity of the Barbarians, who designed to occupy the intermediate defiles and to intercept either the troops themselves or their convoys of provisions. The camp of Valens, which he pitched under the walls of Hadrianople, was fortified, according to the practice of the Romans, with a ditch and rampart; and a most important council was summoned, to decide the fate of the emperor and of the empire. The party of reason and of delay was strenuously maintained by Victor, who had corrected, by the lessons of experience, the native fierceness of the Sarmatian character; while Sebastian, with the flexible and obsequious eloquence of a courtier, represented every precaution and every measure that implied a doubt of immediate victory as unworthy of the courage and majesty of their invincible monarch. The ruin of Valens was precipitated by the deceitful arts of Fritigern and the prudent admonitions of the emperor of the West. The advantages of negotiating in the midst of war were perfectly understood by the general of the Barbarians; and a Christian ecclesiastic was despatched, as the holy minister of peace, to penetrate, and to perplex, the councils of the enemy. The misfortunes, as well as the provocations, of the Gothic nation were forcibly and truly described by their ambassador; who protested, in the name of Fritigern, that he was still disposed to lay down his arms, or to employ them only in the defence of the empire if he could secure, for his wandering countrymen, a tranquil settlement on the waste lands of Thrace and a sufficient allowance of corn and cattle. But he added, in a whisper of confidential friendship, that the exasperated Barbarians were averse to these reasonable conditions; and that Fritigern was doubtful whether he could accomplish the conclusion of the treaty, unless he found himself supported by the presence and terrors of an Imperial army. About the same time Count Richomer returned from the West, to announce the defeat and submission of the Alemanni; to inform Valens that his nephew advanced by rapid marches at the head of the veteran and victorious legions of Gaul; and to request, in the name of Gratian and of the republic, that every dangerous and decisive measure might be suspended, till the junction of the two emperors should ensure the success of the Gothic war. But the feeble sovereign of the East was actuated only by the fatal illusions of pride and jealousy. He disdained the importunate advice; he rejected the humiliating aid; he secretly compared the ignominious, or at least the inglorious, period of his own reign with the fame of a beardless youth: and Valens rushed into the field, to erect his imaginary trophy, before the diligence of his colleague could usurp any share of the triumphs of the day.

On the ninth of August, a day which has deserved to be marked among the most inauspicious of the Roman Calendar,⁹³ the emperor Valens, leaving, under a strong guard, his baggage and military treasure, marched from Hadrianople to attack the Goths, who were encamped about twelve miles from the city.⁹⁴ By some mistake of the orders, or ignorance of the ground, the right wing, or column of cavalry, arrived in

sight of the enemy, whilst the left was still at a considerable distance; the soldiers were compelled, in the sultry heat of summer, to precipitate their pace; and the line of battle was formed with tedious confusion and irregular delay. The Gothic cavalry had been detached to forage in the adjacent country; and Fritigern still continued to practise his customary arts. He despatched messengers of peace, made proposals, required hostages, and wasted the hours, till the Romans, exposed without shelter to the burning rays of the sun, were exhausted by thirst, hunger, and intolerable fatigue. The emperor was persuaded to send an ambassador to the Gothic camp; the zeal of Richomer, who alone had courage to accept the dangerous commission, was applauded: and the count of the domestics, adorned with the splendid ensigns of his dignity, had proceeded some way in the space between the two armies when he was suddenly recalled by the alarm of battle. The hasty and imprudent attack was made by Bacurius the Iberian, who commanded a body of archers and targetteers; and, as they advanced with rashness, they retreated with loss and disgrace. In the same moment, the flying squadrons of Alatheus and Saphrax, whose return was anxiously expected by the general of the Goths, descended like a whirlwind from the hills, swept across the plain, and added new terrors to the tumultuous, but irresistible, charge of the Barbarian host. The event of the battle of Hadrianople, so fatal to Valens and to the empire, may be described in a few words: the Roman cavalry fled; the infantry was abandoned, surrounded, and cut in pieces. The most skilful evolutions, the firmest courage, are scarcely sufficient to extricate a body of foot, encompassed, on an open plain, by superior numbers of horse; but the troops of Valens, oppressed by the weight of the enemy and their own fears, were crowded into a narrow space, where it was impossible for them to extend their ranks, or even to use, with effect, their swords and javelins. In the midst of tumult, of slaughter, and of dismay, the emperor, deserted by his guards and wounded, as it was supposed, with an arrow, sought protection among the Lancearii and the Mattiarii, who still maintained their ground with some appearance of order and firmness. His faithful generals, Trajan and Victor, who perceived his danger, loudly exclaimed that all was lost unless the person of the emperor could be saved. Some troops, animated by their exhortation, advanced to his relief: they found only a bloody spot, covered with a heap of broken arms and mangled bodies, without being able to discover their unfortunate prince, either among the living or the dead. Their search could not indeed be successful, if there is any truth in the circumstances with which some historians have related the death of the emperor. By the care of his attendants, Valens was removed from the field of battle to a neighbouring cottage, where they attempted to dress his wound and to provide for his future safety. But this humble retreat was instantly surrounded by the enemy; they tried to force the door; they were provoked by a discharge of arrows from the roof, till at length, impatient of delay, they set fire to a pile of dry faggots, and consumed the cottage with the Roman emperor and his train. Valens perished in the flames;[94n](#) and a youth, who dropt from the window, alone escaped, to attest the melancholy tale and to inform the Goths of the inestimable prize which they had lost by their own rashness. A great number of brave and distinguished officers perished in the battle of Hadrianople,

which equalled in the actual loss, and far surpassed in the fatal consequences, the misfortune which Rome had formerly sustained in the field of Cannæ.⁹⁵ Two master-generals of the cavalry and infantry, two great officers of the palace and thirty-five tribunes were found among the slain; and the death of Sebastian might satisfy the world that he was the victim, as well as the author, of the public calamity. Above two-thirds of the Roman army were destroyed; and the darkness of the night was esteemed a very favourable circumstance, as it served to conceal the flight of the multitude and to protect the more orderly retreat of Victor and Richomer, who alone, amidst the general consternation, maintained the advantage of calm courage and regular discipline.⁹⁶

While the impressions of grief and terror were still recent in the minds of men, the most celebrated rhetorician of the age composed the funeral oration of a vanquished army and of an unpopular prince, whose throne was already occupied by a stranger. “There are not wanting,” says the candid Libanius, “those who arraign the prudence of the emperor,^{96a} or who impute the public misfortune to the want of courage and discipline in the troops. For my own part, I reverence the memory of their former exploits: I reverence the glorious death which they bravely received, standing, and fighting in their ranks: I reverence the field of battle, stained with *their* blood and the blood of the Barbarians. Those honourable marks have been already washed away by the rains; but the lofty monuments of their bones, the bones of generals, of centurions, and of valiant warriors, claim a longer period of duration. The king himself fought and fell in the foremost ranks of the battle. His attendants presented him with the fleetest horses of the Imperial stable, that would soon have carried him beyond the pursuit of the enemy. They vainly pressed him to reserve his important life for the future service of the republic. He still declared that he was unworthy to survive so many of the bravest and most faithful of his subjects; and the monarch was nobly buried under a mountain of the slain. Let none, therefore, presume to ascribe the victory of the Barbarians to the fear, the weakness, or the imprudence of the Roman troops. The chiefs and the soldiers were animated by the virtue of their ancestors, whom they equalled in discipline and the arts of war. Their generous emulation was supported by the love of glory, which prompted them to contend at the same time with heat and thirst, with fire and the sword; and cheerfully to embrace an honourable death as their refuge against flight and infamy. The indignation of the gods has been the only cause of the success of our enemies.” The truth of history may disclaim some parts of this panegyric, which cannot strictly be reconciled with the character of Valens or the circumstances of the battle; but the fairest commendation is due to the eloquence, and still more to the generosity, of the sophist of Antioch.⁹⁷

The pride of the Goths was elated by this memorable victory; but their avarice was disappointed by the mortifying discovery that the richest part of the Imperial spoil had been within the walls of Hadrianople. They hastened to possess the reward of their

valour; but they were encountered by the remains of a vanquished army with an intrepid resolution, which was the effect of their despair and the only hope of their safety. The walls of the city and the ramparts of the adjacent camp were lined with military engines, that threw stones of an enormous weight; and astonished the ignorant Barbarians by the noise and velocity, still more than by the real effects, of the discharge. The soldiers, the citizens, the provincials, the domestics of the palace, were united in the danger and in the defence; the furious assault of the Goths was repulsed; their secret arts of treachery and treason were discovered; and, after an obstinate conflict of many hours, they retired to their tents; convinced, by experience, that it would be far more advisable to observe the treaty which their sagacious leader had tacitly stipulated with the fortifications of great and populous cities. After the hasty and impolitic massacre of three hundred deserters, an act of justice extremely useful to the discipline of the Roman armies, the Goths indignantly raised the siege of Hadrianople. The scene of war and tumult was instantly converted into a silent solitude; the multitude suddenly disappeared; the sacred paths of the wood and mountains were marked with the footsteps of the trembling fugitives, who sought a refuge in the distant cities of Illyricum and Macedonia; and the faithful officers of the household and the treasury cautiously proceeded in search of the emperor, of whose death they were still ignorant. The tide of the Gothic inundation rolled from the walls of Hadrianople to the suburbs of Constantinople. The Barbarians were surprised with the splendid appearance of the capital of the East, the height and extent of the walls, the myriads of wealthy and affrighted citizens who crowded the ramparts, and the various prospect of the sea and land. While they gazed with hopeless desire on the inaccessible beauties of Constantinople, a sally was made from one of the gates by a party of Saracens,[98](#) who had been fortunately engaged in the service of Valens. The cavalry of Scythia was forced to yield to the admirable swiftness and spirit of the Arabian horses; their riders were skilled in the evolutions of irregular war; and the Northern Barbarians were astonished, and dismayed, by the inhuman ferocity of the Barbarians of the South. A Gothic soldier was slain by the dagger of an Arab; and the hairy, naked savage, applying his lips to the wound, expressed a horrid delight, while he sucked the blood of his vanquished enemy.[99](#) The army of the Goths, laden with the spoils of the wealthy suburbs and the adjacent territory, slowly moved from the Bosphorus to the mountains which form the western boundary of Thrace. The important pass of Succa was betrayed by the fear, or the misconduct, of Maurus; and the Barbarians, who no longer had any resistance to apprehend from the scattered and vanquished troops of the East, spread themselves over the face of a fertile and cultivated country, as far as the confines of Italy and the Adriatic Sea.[100](#)

The Romans, who so coolly and so concisely mention the acts of *justice* which were exercised by the legions,[101](#) reserve their compassion and their eloquence for their own sufferings, when the provinces were invaded and desolated by the arms of the successful Barbarians. The simple circumstantial narrative (did such a narrative exist)

of the ruin of a single town, of the misfortunes of a single family,[102](#) might exhibit an interesting and instructive picture of human manners; but the tedious repetition of vague and declamatory complaints would fatigue the attention of the most patient reader. The same censure may be applied, though not perhaps in an equal degree, to the profane and the ecclesiastical writers of this unhappy period; that their minds were inflamed by popular and religious animosity; and that the true size and colour of every object is falsified by the exaggerations of their corrupt eloquence. The vehement Jerom[103](#) might justly deplore the calamities inflicted by the Goths and their barbarous allies on his native country of Pannonia and the wide extent of the provinces, from the walls of Constantinople to the foot of the Julian Alps; the rapes, the massacres, the conflagrations; and, above all, the profanation of the churches, that were turned into stables, and the contemptuous treatment of the relics of holy martyrs. But the Saint is surely transported beyond the limits of nature and history, when he affirms “that, in those desert countries, nothing was left except the sky and the earth; that, after the destruction of the cities and the extirpation of the human race, the land was overgrown with thick forests and inextricable brambles; and that the universal desolation, announced by the prophet Zephaniah, was accomplished, in the scarcity of the beasts, the birds, and even of the fish.” These complaints were pronounced about twenty years after the death of Valens; and the Illyrian provinces, which were constantly exposed to the invasion and passage of the Barbarians, still continued, after a calamitous period of ten centuries, to supply new materials for rapine and destruction. Could it even be supposed that a large tract of country had been left without cultivation and without inhabitants, the consequences might not have been so fatal to the inferior productions of animated nature. The useful and feeble animals, which are nourished by the hand of man, might suffer and perish, if they were deprived of his protection; but the beasts of the forest, his enemies, or his victims, would multiply in the free and undisturbed possession of their solitary domain. The various tribes that people the air, or the waters, are still less connected with the fate of the human species; and it is highly probable that the fish of the Danube would have felt more terror and distress from the approach of a voracious pike than from the hostile inroad of a Gothic army.

Whatever may have been the just measure of the calamities of Europe, there was reason to fear that the same calamities would soon extend to the peaceful countries of Asia. The sons of the Goths had been judiciously distributed through the cities of the East; and the arts of education were employed to polish and subdue the native fierceness of their temper. In the space of about twelve years, their numbers had continually increased; and the children, who, in the first emigration, were sent over the Hellespont, had attained, with rapid growth, the strength and spirit of perfect manhood.[104](#) It was impossible to conceal from their knowledge the events of the Gothic war; and, as those daring youths had not studied the language of dissimulation, they betrayed their wish, their desire, perhaps their intention, to emulate the glorious example of their fathers. The danger of the times seemed to justify the jealous

suspensions of the provincials; and these suspicions were admitted as unquestionable evidence that the Goths of Asia had formed a secret and dangerous conspiracy against the public safety. The death of Valens had left the East without a sovereign; and Julius, who filled the important station of master-general of the troops, with a high reputation of diligence and ability, thought it his duty to consult the senate of Constantinople; which he considered, during the vacancy of the throne, as the representative council of the nation. As soon as he had obtained the discretionary power of acting as he should judge most expedient for the good of the republic, he assembled the principal officers; and privately concerted effectual measures for the execution of his bloody design. An order was immediately promulgated that, on a stated day, the Gothic youth should assemble in the capital cities of their respective provinces; and, as a report was industriously circulated that they were summoned to receive a liberal gift of lands and money, the pleasing hope allayed the fury of their resentment and perhaps suspended the motions of the conspiracy. On the appointed day, the unarmed crowd of the Gothic youth was carefully collected in the square, or Forum; the streets and avenues were occupied by the Roman troops; and the roofs of the houses were covered with archers and slingers. At the same hour, in all the cities of the East, the signal was given of indiscriminate slaughter; and the provinces of Asia were delivered, by the cruel prudence of Julius, from a domestic enemy, who, in a few months, might have carried fire and sword from the Hellespont to the Euphrates.¹⁰⁵ The urgent consideration of the public safety may undoubtedly authorise the violation of every positive law. How far that, or any other, consideration may operate to dissolve the natural obligations of humanity and justice is a doctrine of which I still desire to remain ignorant.

The emperor Gratian was far advanced on his march towards the plains of Hadrianople when he was informed, at first by the confused voice of fame, and afterwards by the more accurate reports of Victor and Richomer, that his impatient colleague had been slain in battle, and that twothirds of the Roman army were exterminated by the sword of the victorious Goths. Whatever resentment the rash and jealous vanity of his uncle might deserve, the resentment of a generous mind is easily subdued by the softer emotions of grief and compassion: and even the sense of pity was soon lost in the serious and alarming consideration of the state of the republic. Gratian was too late to assist, he was too weak to revenge, his unfortunate colleague: and the valiant and modest youth felt himself unequal to the support of a sinking world. A formidable tempest of the Barbarians of Germany seemed ready to burst over the provinces of Gaul; and the mind of Gratian was oppressed and distracted by the administration of the Western empire. In this important crisis, the government of the East and the conduct of the Gothic war required the undivided attention of a hero and a statesman. A subject invested with such ample command would not long have preserved his fidelity to a distant benefactor; and the Imperial council embraced the wise and manly resolution of conferring an obligation rather than of yielding to an insult. It was the wish of Gratian to bestow the purple as the reward of virtue; but, at the age of nineteen, it is not easy for a prince, educated in the supreme rank, to understand the

true characters of his ministers and generals. He attempted to weigh, with an impartial hand, their various merits and defects; and, whilst he checked the rash confidence of ambition, he distrusted the cautious wisdom which despaired of the republic. As each moment of delay diminished something of the power and resources of the future sovereign of the East, the situation of the times would not allow a tedious debate. The choice of Gratian was soon declared in favour of an exile, whose father, only three years before, had suffered, under the sanction of *his* authority, an unjust and ignominious death. The great Theodosius, a name celebrated in history and dear to the Catholic church,[106](#) was summoned to the Imperial court, which had gradually retreated from the confines of Thrace to the more secure station of Sirmium. Five months after the death of Valens, the emperor Gratian produced before the assembled troops *his* colleague and *their* master; who, after a modest, perhaps a sincere, resistance, was compelled to accept, amidst the general acclamations, the diadem, the purple, and the equal title of Augustus.[107](#) The provinces of Thrace, Asia, and Egypt, over which Valens had reigned, were resigned to the administration of the new emperor; but, as he was specially entrusted with the conduct of the Gothic war, the Illyrian prefecture was dismembered; and the two great dioceses of Dacia and Macedonia were added to the dominions of the Eastern empire.[108](#)

The same province, and, perhaps, the same city,[109](#) which had given to the throne the virtues of Trajan and the talents of Hadrian, was the original seat of another family of Spaniards, who, in a less fortunate age, possessed, near fourscore years, the declining empire of Rome.[110](#) They emerged from the obscurity of municipal honours by the active spirit of the elder Theodosius, a general whose exploits in Britain and Africa have formed one of the most splendid parts of the annals of Valentinian. The son of that general, who likewise bore the name of Theodosius, was educated, by skilful preceptors, in the liberal studies of youth; but he was instructed in the art of war by the tender care and severe discipline of his father.[111](#) Under the standard of such a leader, young Theodosius sought glory and knowledge, in the most distant scenes of military action; enured his constitution to the difference of seasons and climates; distinguished his valour by sea and land; and observed the various warfare of the Scots, the Saxons, and the Moors. His own merit, and the recommendation of the conqueror of Africa, soon raised him to a separate command; and in the station of Duke of Mæsia, he vanquished an army of Sarmatians; saved the province; deserved the love of the soldiers; and provoked the envy of the court.[112](#) His rising fortunes were soon blasted by the disgrace and execution of his illustrious father; and Theodosius obtained, as a favour, the permission of retiring to a private life in his native province of Spain. He displayed a firm and temperate character in the ease with which he adapted himself to this new situation. His time was almost equally divided between the town and country: the spirit which had animated his public conduct was shewn in the active and affectionate performance of every social duty; and the diligence of the soldier was profitably converted to the improvement of his ample patrimony,[113](#) which lay

between Valladolid and Segovia, in the midst of a fruitful district still famous for a most exquisite breed of sheep.^{[114](#)} From the innocent but humble labours of his farm Theodosius was transported, in less than four months, to the throne of the Eastern empire;^{[115](#)} and the whole period of the history of the world will not perhaps afford a similar example of an elevation, at the same time, so pure and so honourable. The princes who peaceably inherit the sceptre of their fathers claim and enjoy a legal right, the more secure as it is absolutely distinct from the merits of their personal characters. The subjects, who, in a monarchy or a popular estate, acquire the possession of supreme power, may have raised themselves, by the superiority either of genius or virtue, above the heads of their equals; but their virtue is seldom exempt from ambition; and the cause of the successful candidate is frequently stained by the guilt of conspiracy or civil war. Even in those governments which allow the reigning monarch to declare a colleague or a successor, his partial choice, which may be influenced by the blindest passions, is often directed to an unworthy object. But the most suspicious malignity cannot ascribe to Theodosius, in his obscure solitude of Caucha, the arts, the desires, or even the hopes of an ambitious statesman; and the name of the Exile would long since have been forgotten, if his genuine and distinguished virtues had not left a deep impression in the Imperial court. During the season of prosperity, he had been neglected; but, in the public distress, his superior merit was universally felt and acknowledged. What confidence must have been reposed in his integrity, since Gratian could trust that a pious son would forgive, for the sake of the republic, the murder of his father! What expectations must have been formed of his abilities to encourage the hope that a single man could save, and restore, the empire of the East! Theodosius was invested with the purple in the thirty-third year of his age. The vulgar gazed with admiration on the manly beauty of his face, and the graceful majesty of his person, which they were pleased to compare with the pictures and medals of the emperor Trajan; whilst intelligent observers discovered, in the qualities of his heart and understanding, a more important resemblance to the best and greatest of the Roman princes.

It is not without the most sincere regret that I must now take leave of an accurate and faithful guide, who has composed the history of his own times without indulging the prejudices and passions which usually affect the mind of a contemporary. Ammianus Marcellinus, who terminates his useful work with the defeat and death of Valens, recommends the more glorious subject of the ensuing reign to the youthful vigour and eloquence of the rising generation.^{[116](#)} The rising generation was not disposed to accept his advice or to imitate his example;^{[117](#)} and, in the study of the reign of Theodosius, we are reduced to illustrate the partial narrative of Zosimus by the obscure hints of fragments and chronicles, by the figurative style of poetry or panegyric, and by the precarious assistance of the ecclesiastical writers who, in the heat of religious faction, are apt to despise the profane virtues of sincerity and moderation. Conscious of these disadvantages, which will continue to involve a considerable portion of the decline and fall of the Roman empire, I shall proceed with doubtful and timorous

steps. Yet I may boldly pronounce that the battle of Hadrianople was never revenged by any signal or decisive victory of Theodosius over the Barbarians; and the expressive silence of his venal orators may be confirmed by the observation of the condition and circumstances of the times. The fabric of a mighty state, which has been reared by the labours of successive ages, could not be overturned by the misfortune of a single day, if the fatal power of the imagination did not exaggerate the real measure of the calamity. The loss of forty thousand Romans, who fell in the plains of Hadrianople, might have been soon recruited in the populous provinces of the East, which contained so many millions of inhabitants. The courage of a soldier is found to be the cheapest, and most common, quality of human nature; and sufficient skill to encounter an undisciplined foe might have been speedily taught by the care of the surviving centurions. If the Barbarians were mounted on the horses, and equipped with the armour, of their vanquished enemies, the numerous studs of Cappadocia and Spain would have supplied new squadrons of cavalry; the thirty-four arsenals of the empire were plentifully stored with magazines of offensive and defensive arms; and the wealth of Asia might still have yielded an ample fund for the expenses of the war. But the effects which were produced by the battle of Hadrianople on the minds of the Barbarians, and of the Romans, extended the victory of the former, and the defeat of the latter, far beyond the limits of a single day. A Gothic chief was heard to declare, with insolent moderation, that, for his own part, he was fatigued with slaughter; but that he was astonished how a people who fled before him like a flock of sheep could still presume to dispute the possession of their treasures and provinces.¹¹⁸ The same terrors which the name of the Huns had spread among the Gothic tribes were inspired, by the formidable name of the Goths, among the subjects and soldiers of the Roman empire.¹¹⁹ If Theodosius, hastily collecting his scattered forces, had led them into the field to encounter a victorious enemy, his army would have been vanquished by their own fears; and his rashness could not have been excused by the chance of success. But the *great* Theodosius, an epithet which he honourably deserved on this momentous occasion, conducted himself as the firm and faithful guardian of the republic. He fixed his headquarters at Thessalonica, the capital of the Macedonian diocese;¹²⁰ from whence he could watch the irregular motions of the Barbarians, and direct the operations of his lieutenants, from the gates of Constantinople to the shores of the Hadriatic. The fortifications and garrisons of the cities were strengthened; and the troops, among whom a sense of order and discipline was revived, were insensibly emboldened by the confidence of their own safety. From these secure stations, they were encouraged to make frequent sallies on the Barbarians, who infested the adjacent country; and, as they were seldom allowed to engage without some decisive superiority either of ground or of numbers, their enterprises were, for the most part, successful; and they were soon convinced, by their own experience, of the possibility of vanquishing their *invincible* enemies.¹²¹ The detachments of these separate garrisons were gradually united into small armies; the same cautious measures were pursued, according to an extensive and well-concerted plan of operations; the events of

each day added strength and spirit to the Roman arms; and the artful diligence of the emperor, who circulated the most favourable reports of the success of the war, contributed to subdue the pride of the Barbarians and to animate the hopes and courage of his subjects. If, instead of this faint and imperfect outline, we could accurately represent the counsels and actions of Theodosius, in four successive campaigns, there is reason to believe that his consummate skill would deserve the applause of every military reader. The republic had formerly been saved by the delays of Fabius: and, while the splendid trophies of Scipio in the field of Zama attract the eyes of posterity, the camps and marches of the Dictator among the hills of Campania may claim a juster proportion of the solid and independent fame which the general is not compelled to share either with fortune or with his troops. Such was likewise the merit of Theodosius; and the infirmities of his body, which most unseasonably languished under a long and dangerous disease, could not oppress the vigour of his mind or divert his attention from the public service.[122](#)

The deliverance and peace of the Roman provinces[123](#) was the work of prudence rather than of valour: the prudence of Theodosius was seconded by fortune; and the emperor never failed to seize, and to improve, every favourable circumstance. As long as the superior genius of Fritigern preserved the union, and directed the motions, of the Barbarians, their power was not inadequate to the conquest of a great empire. The death of that hero, the predecessor and master of the renowned Alaric, relieved an impatient multitude from the intolerable yoke of discipline and discretion. The Barbarians, who had been restrained by his authority, abandoned themselves to the dictates of their passions; and their passions were seldom uniform or consistent. An army of conquerors was broken into many disorderly bands of savage robbers; and their blind and irregular fury was not less pernicious to themselves than to their enemies.[124](#) Their mischievous disposition was shewn in the destruction of every object which they wanted strength to remove or taste to enjoy; and they often consumed, with improvident rage, the harvests or the granaries, which soon afterwards became necessary for their own subsistence. A spirit of discord arose among the independent tribes and nations, which had been united only by the bands of a loose and voluntary alliance. The troops of the Huns and the Alani would naturally upbraid the flight of the Goths who were not disposed to use with moderation the advantages of their fortune; the ancient jealousy of the Ostrogoths and the Visigoths could not long be suspended; and the haughty chiefs still remembered the insults and injuries which they had reciprocally offered, or sustained, while the nation was seated in the countries beyond the Danube. The progress of domestic faction abated the more diffusive sentiment of national animosity; and the officers of Theodosius were instructed to purchase with liberal gifts and promises the retreat, or service, of the discontented party. The acquisition of Modar, a prince of the royal blood of the Amali, gave a bold and faithful champion to the cause of Rome. The illustrious deserter soon obtained the rank of master-general, with an important command; surprised an army of his countrymen who were immersed in wine and sleep; and, after a cruel slaughter of the

astonished Goths, returned with an immense spoil, and four thousand waggons, to the Imperial camp.[125](#) In the hands of a skilful politician, the most different means may be successfully applied to the same ends: and the peace of the empire, which had been forwarded by the divisions, was accomplished by the reunion of the Gothic nation. Athanaric, who had been a patient spectator of these extraordinary events, was at length driven, by the chance of arms, from the dark recesses of the woods of Caucaland.[126](#) He no longer hesitated to pass the Danube; and a very considerable part of the subjects of Fritigern, who already felt the inconveniences of anarchy, were easily persuaded to acknowledge for their king a Gothic Judge, whose birth they respected and whose abilities they had frequently experienced. But age had chilled the daring spirit of Athanaric; and, instead of leading his people to the field of battle and victory, he wisely listened to the fair proposal of an honourable and advantageous treaty. Theodosius, who was acquainted with the merit and power of his new ally, condescended to meet him at the distance of several miles from Constantinople; and entertained him in the Imperial city, with the confidence of a friend and the magnificence of a monarch. “The Barbarian prince observed, with curious attention, the variety of objects which attracted his notice, and at last broke out into a sincere and passionate exclamation of wonder. I now behold (said he) what I never could believe, the glories of this stupendous capital! and, as he cast his eyes around, he viewed, and he admired, the commanding situation of the city, the strength and beauty of the walls and public edifices, the capacious harbour, crowded with innumerable vessels, the perpetual concourse of distant nations, and the arms and discipline of the troops. Indeed (continued Athanaric), the emperor of the Romans is a god upon earth; and the presumptuous man, who dares to lift his hand against him, is guilty of his own blood.”[127](#) The Gothic king did not long enjoy this splendid and honourable reception; and, as temperance was not the virtue of his nation, it may justly be suspected that his mortal disease was contracted amidst the pleasures of the Imperial banquets. But the policy of Theodosius derived more solid benefit from the death, than he could have expected from the most faithful services, of his ally. The funeral of Athanaric was performed with solemn rites in the capital of the East; a stately monument was erected to his memory; and his whole army, won by the liberal courtesy and decent grief of Theodosius, enlisted under the standard of the Roman empire.[128](#) The submission of so great a body of the Visigoths was productive of the most salutary consequences; and the mixed influence of force, of reason, and of corruption became every day more powerful and more extensive. Each independent chieftain hastened to obtain a separate treaty, from the apprehension that an obstinate delay might expose *him*, alone and unprotected, to the revenge, or justice, of the conqueror. The general, or rather the final, capitulation of the Goths may be dated four years, one month, and twenty-five days after the defeat and death of the emperor Valens.[129](#)

The provinces of the Danube had been already relieved from the oppressive weight of the Gruthungi, or Ostrogoths, by the voluntary retreat of Alatheus and Saphrax; whose

restless spirit had prompted them to seek new scenes of rapine and glory. Their destructive course was pointed towards the West; but we must be satisfied with a very obscure and imperfect knowledge of their various adventures. The Ostrogoths impelled several of the German tribes on the provinces of Gaul; concluded, and soon violated, a treaty with the emperor Gratian; advanced into the unknown countries of the North; and, after an interval of more than four years, returned, with accumulated force, to the banks of the Lower Danube. Their troops were recruited with the fiercest warriors of Germany and Scythia; and the soldiers, or at least the historians, of the empire no longer recognised the name and countenances of their former enemies.[130](#)

The general, who commanded the military and naval powers of the Thracian frontier, soon perceived that his superiority would be disadvantageous to the public service; and that the Barbarians, awed by the presence of his fleet and legions, would probably defer the passage of the river till the approaching winter. The dexterity of the spies whom he sent into the Gothic camp allured the Barbarians into a fatal snare. They were persuaded that, by a bold attempt, they might surprise, in the silence and darkness of the night, the sleeping army of the Romans; and the whole multitude was hastily embarked in a fleet of three thousand canoes.[131](#)

The bravest of the Ostrogoths led the van; the main body consisted of the remainder of their subjects and soldiers; and the women and children securely followed in the rear. One of the nights without a moon had been selected for the execution of their design; and they had almost reached the southern bank of the Danube, in the firm confidence that they should find an easy landing and an unguarded camp. But the progress of the Barbarians was suddenly stopped by an unexpected obstacle: a triple line of vessels, strongly connected with each other, and which formed an impenetrable chain of two miles and a half along the river. While they struggled to force their way in the unequal conflict, their right rank was overwhelmed by the irresistible attack of a fleet of galleys, which were urged down the stream by the united impulse of oars and of the tide. The weight and velocity of those ships of war broke, and sank, and dispersed the rude and feeble canoes of the Barbarians; their valour was ineffectual; and Alatheus, the king, or general, of the Ostrogoths, perished with his bravest troops either by the sword of the Romans or in the waves of the Danube. The last division of this unfortunate fleet might regain the opposite shore; but the distress and disorder of the multitude rendered them alike incapable either of action or counsel; and they soon implored the clemency of the victorious enemy. On this occasion, as well as on many others, it is a difficult task to reconcile the passions and prejudices of the writers of the age of Theodosius. The partial and malignant historian who misrepresents every action of his reign affirms that the emperor did not appear in the field of battle till the Barbarians had been vanquished by the valour and conduct of his lieutenant Promotus.[132](#)

The flattering poet, who celebrated, in the court of Honorius, the glory of the father and of the son, ascribes the victory to the personal prowess of Theodosius; and almost insinuates that the King of the Ostrogoths was slain by the hand of the emperor.[133](#)

The truth of history might perhaps be found in a just medium between these extreme and contradictory assertions.

The original treaty, which fixed the settlement of the Goths, ascertained their privileges and stipulated their obligations, would illustrate the history of Theodosius and his successors. The series of their history has imperfectly preserved the spirit and substance of this singular agreement.¹³⁴ The ravages of war and tyranny had provided many large tracts of fertile but uncultivated land for the use of those Barbarians who might not disdain the practice of agriculture. A numerous colony of the Visigoths was seated in Thrace; the remains of the Ostrogoths were planted in Phrygia and Lydia; their immediate wants were supplied by a distribution of corn and cattle; and their future industry was encouraged by an exemption from tribute,¹³⁵ during a certain term of years. The Barbarians would have deserved to feel the cruel and perfidious policy of the Imperial court, if they had suffered themselves to be dispersed through the provinces. They required, and they obtained, the sole possession of the villages and districts assigned for their residence; they still cherished and propagated their native manners and language; asserted, in the bosom of despotism, the freedom of their domestic government; and acknowledged the sovereignty of the emperor, without submitting to the inferior jurisdiction of the laws and magistrates of Rome. The hereditary chiefs of the tribes and families were still permitted to command their followers in peace and war; but the royal dignity was abolished; and the generals of the Goths were appointed and removed at the pleasure of the emperor. An army of forty thousand Goths was maintained for the perpetual service of the empire of the East; and those haughty troops, who assumed the title of *Fæderati*, or allies, were distinguished by their gold collars, liberal pay, and licentious privileges. Their native courage was improved by the use of arms and the knowledge of discipline; and, while the republic was guarded, or threatened, by the doubtful sword of the Barbarians, the last sparks of the military flame were finally extinguished in the minds of the Romans.¹³⁶ Theodosius had the address to persuade his allies that the conditions of peace which had been extorted from him by prudence and necessity were the voluntary expressions of his sincere friendship for the Gothic nation.¹³⁷ A different mode of vindication or apology was opposed to the complaints of the people; who loudly censured these shameful and dangerous concessions.¹³⁸ The calamities of the war were painted in the most lively colours; and the first symptoms of the return of order, of plenty, and security were diligently exaggerated. The advocates of Theodosius could affirm, with some appearance of truth and reason, that it was impossible to extirpate so many warlike tribes, who were rendered desperate by the loss of their native country; and that the exhausted provinces would be revived by a fresh supply of soldiers and husbandmen. The Barbarians still wore an angry and hostile aspect; but the experience of past times might encourage the hope that they would acquire the habits of industry and obedience; that their manners would be polished by time, education, and the influence of Christianity; and that their prosperity would insensibly blend with the great body of the Roman people.¹³⁹

Notwithstanding these specious arguments and these sanguine expectations, it was apparent to every discerning eye that the Goths would long remain the enemies, and might soon become the conquerors, of the Roman empire. Their rude and insolent behaviour expressed their contempt of the citizens and provincials, whom they insulted with impunity.¹⁴⁰ To the zeal and valour of the Barbarians Theodosius was indebted for the success of his arms; but their assistance was precarious; and they were sometimes seduced by a treacherous and inconstant disposition to abandon his standard at the moment when their service was the most essential. During the civil war against Maximus, a great number of Gothic deserters retired into the morasses of Macedonia, wasted the adjacent provinces, and obliged the intrepid monarch to expose his person, and exert his power, to suppress the rising flame of rebellion.¹⁴¹ The public apprehensions were fortified by the strong suspicion that these tumults were not the effect of accidental passion, but the result of deep and premeditated design. It was generally believed that the Goths had signed the treaty of peace with an hostile and insidious spirit; and that their chiefs had previously bound themselves, by a solemn and secret oath, never to keep faith with the Romans; to maintain the fairest shew of loyalty and friendship, and to watch the favourable moment of rapine, of conquest, and of revenge. But, as the minds of the Barbarians were not insensible to the power of gratitude, several of the Gothic leaders sincerely devoted themselves to the service of the empire, or, at least, of the emperor; the whole nation was insensibly divided into two opposite factions, and much sophistry was employed in conversation and dispute, to compare the obligations of their first and second engagements. The Goths, who considered themselves as the friends of peace, of justice, and of Rome, were directed by the authority of Fravitta, a valiant and honourable youth, distinguished above the rest of his countrymen by the politeness of his manners, the liberality of his sentiments, and the mild virtues of social life. But the more numerous faction adhered to the fierce and faithless Priulf, who inflamed the passions, and asserted the independence, of his warlike followers. On one of the solemn festivals, when the chiefs of both parties were invited to the Imperial table, they were insensibly heated by wine, till they forgot the usual restraints of discretion and respect; and betrayed, in the presence of Theodosius, the fatal secret of their domestic disputes. The emperor, who had been the reluctant witness of this extraordinary controversy, dissembled his fears and resentment, and soon dismissed the tumultuous assembly. Fravitta, alarmed and exasperated by the insolence of his rival, whose departure from the palace might have been the signal of a civil war, boldly followed him; and, drawing his sword, laid Priulf dead at his feet. Their companions flew to arms; and the faithful champion of Rome would have been oppressed by superior numbers, if he had not been protected by the seasonable interposition of the Imperial guards.¹⁴² Such were the scenes of Barbaric rage which disgraced the palace and table of the Roman emperor; and, as the impatient Goths could only be restrained by the firm and temperate character of Theodosius, the public safety seemed to depend on the life and abilities of a single man.¹⁴³

APPENDIX

ADDITIONAL NOTES BY THE EDITOR

1. LEGEND OF THE FINDING OF THE TRUE CROSS — (P. 76)

The legend of the discovery of the Cross by Judas for St. Helena has come down in Syriac, Greek, and Latin versions. See E. Nestle, *Byz. Zeitschrift*, iv. p. 319-345, who makes it probable that the original Helena legend was in Syriac, and prints the oldest Greek version extant from a Sinai MS. of the eighth century copied by Mr. Rendel Harris. (The Greek from later MSS. (1) in J. Gretser's huge treatise, *De Cruce Christi* (1000), ii. 530 *sqq.*, and Holder, *Inventio verae crucis*, 1889; (2) in Gretser, *op. cit.*, ii. 543 *sqq.*; (3) Wotke, *Wiener Studien*, 1891, p. 300 *sqq.*; the Latin (1) in the *Sanctuarium* (a rather rare book; c. 1479) of Mombricitus, and in *Acta Sanct.*, May 4, I., 445 *sqq.*; (2) in Holder, *op. cit.*; (3) in Mombricitus, *op. cit.*; the Syriac (1) from seventh century MS., in Nestle's *De sancta Cruce*, 1889; (2) *ib.*; (3) in Bedjan's *Acta Martyrum et Sanctorum*, 1890, p. 326 *sqq.*)

2. ST. GEORGE — (P. 98)

The article on St. George by Zöckler in Herzog and Plitt's *Encyclopædia* has been superseded by the discussion of F. Görres in the *Zeitsch. f. wiss. Theologie*, xvi. 1890, p. 454 *sqq.* "Ritter St. Georg in Geschichte, Legende, u. Kunst." [There is no question that the *Acta* (in *Act. Sanct.* 23rd April) are apocryphal and legendary. They are remarkable for the horrible descriptions of scenes of martyrdom, which might serve as a text to elucidate the pictures on the walls of the curious round Church of San Stefano on the Esquiline.] Görres arrives at practically the same conclusion as Tillemont (*Mém. eccl.*, v. 185-9, 658-60). All the details of St. George's martyrdom are uncertain; but St. George existed and suffered as a martyr in the East in some pre-Constantinian persecution. Tillemont established the reality of St. George by the existence of his cult (he was a •εγαλ•αργς) in the sixth century; Görres proves that it already existed in the fifth century. (1) The round Church of St. George at Thessalonica is not younger than the fifth century and possibly belongs to the fourth; (2) Venantius (*Carm.* ii. 12, p. 41, ed. M.H.G.) mentions a Gallic basilica to St. George, founded by Sidonius Apollinaris; (3) the decree of Pope Gelasius *de libris non recipiendis*, at end of fifth century, condemns the *Acta* of St. George as apocryphal, but confesses his historical existence.

The connection of his name with a dragon-slaying legend does not relegate him to the region of myth. For over against the fabulous Christian dragonslayer, Theodore of the Bithynian Heraclea, we can set Agapetus of Synnada and Arsacius, who though

celebrated as dragon-slayers were historical persons.

Gibbon's theory which identifies St. George with George of Cappadocia has nothing to be said for it; but Görres points out that it is not open to any objection on the ground that George of Cappadocia was an Arian. For there are examples of Arians admitted into the Martyrologium: he cites Agapetus of Synnada and Auxentius, afterwards bishop of Mopsuestia. (It is to be noted that one recension of the Acta S. Georgii was edited by Arians.)

3. CHURCHES OF CONSTANTINE AT JERUSALEM — (P. 75)

In regard to Constantine's Churches at Jerusalem it may be said, without entering upon the question as to the true positions of Golgotha and the Holy Sepulchre, that it is certain that these Churches — (1) the round Church of the Anastasis which contained the Sepulchre, and the (2) adjacent Basilica, dedicated to the Cross — stood on the site of the present Church of the Holy Sepulchre. Injured by the Persians (614 a.d.) they were restored some years later, and a plan of the buildings drawn up, towards the end of the seventh century, by the pilgrim Arculfus is extant, and is of great importance for the topography. Some traces of the old buildings still remain. "The relative position of the Churches is the same; the circular Church of the Anastasis has preserved its form; the south wall of the Basilica can be traced from 'Calvary' eastward, and one of the large cisterns constructed by Constantine has been discovered" (Sir C. Wilson, in Smith's Dict. of the Bible, new ed., 1893, p. 1654). Mr. Fergusson's theory which identified the Church of the Resurrection with the mosque known as Kubbet-es-Sakhrah, the Dome of the Rock (within the so-called "Haram area"), is now quite exploded.

The Dome of the Rock has its own question, but has nothing to do with Constantine. Is it of Saracenic origin dating from the end of the seventh century — built perhaps by a Greek architect? or was it originally a Christian Church, and converted into a mosque? It has been identified by Professor Sepp with a Church of St. Sophia built by Justinian. Sir C. Wilson thinks that it stands on the site of St. Sophia, which was destroyed by the Persians; "that it was rebuilt with the old material by Abdul-Melik who covered it with a dome, and that it was again repaired and redecorated by El Mamûn" (*ib.*, p. 1657).

The adjacent mosque el-Aksa occupies the site of the mosque of Omar. It was built by Abd al Malik, "out of the ruins of Justinian's Church of St. Mary" (Wilson, *ib.*), which is fully described by Procopius; but there is a difference of opinion whether the Church was on the same site as the mosque or (so Fergusson and others) in the south-eastern corner of the "Haram area," where there are vaults apparently of the Justinianean age.

For further details see Sir C. Wilson's article Jerusalem, cited above; Mr. T. H. Lewis'

essay on the Church of Constantine at Jerusalem in the Palestine Pilgrims' Text Society, 1891; Sepp, *Die Felsenkuppel eine Justinianische Sophien-kirche*; various papers in the Palestine Exploration Fund publications.

4. THE TIGRIS AND EUPHRATES — (P. 127)

The recent publication of a geographical description of Mesopotamia and Baghdād by an Arabic writer, Ibn Serapion, of whom nothing is known except that he wrote in the early years of the tenth century, by Mr. Guy Le Strange (with translation and commentary, in the *Journal of the Royal Asiatic Soc.*, 1895, January and April; cp. addenda in July, and 1896, October), is of considerable importance.

It shows that since the tenth century great alterations have taken place in the course of the Tigris and Euphrates, and shows what these alterations were; it gives a clear account of the canal system which drew the overflow of the Euphrates into the Tigris; and it supplies most important data for the reconstruction of the topography of Baghdād.

Before the Caliphate, the River Tigris followed its present course, from Kūt-al-Amarah (about 100 miles below Baghdād) flowing in a south-easterly direction to its junction with the Euphrates. But during the middle ages — in the tenth century for example — it flowed almost due south, “running down the channel now known as the Shatt-al-Hay, and passing through the city of Wēsit” (Le Strange, *ib.*, Jan., p. 3). The changes in the Euphrates are thus summed up by Mr. Le Strange (p. 4): A little above Al-Kūfa “the stream bifurcated. The branch to the right — considered then as the main stream of the Euphrates, but now known as the Hindiyya Canal — ran down past Al-Kūfa, and a short distance below the city became lost in the western part of the great Swamp,” which also swallowed up the waters of the Tigris. “The stream to the left or eastward called the Sūrē Canal — which, in its upper reach, follows the line of the modern Euphrates — ran a short course and then split up into numerous canals whose waters for the most part flowed out into the Tigris above Wēsit.” The great Swamp in which the streams of both Tigris and Euphrates lost themselves was drained by the Tidal Estuary which reached the sea at Abbadēn, “a town which, on account of the recession of the Persian Gulf, now lies nearly twenty miles distant from the present shore-line.”

It should be carefully remembered in reading the account of the events after Julian's death that the Tigris has also altered its course to the north of Ctesiphon since the tenth century. From a point below Samarrē to a point above Baghdād, it followed a shorter and more westerly channel than at the present day.

As to the canal Nahr-al-Malik (see above, p. 137), Mr. Le Strange says (*ib.*, Jan., p.

75), that “roughly speaking it followed the line of the modern Radhwāniyya Canal.”

It may be added that the geographical work of Abu-l-Fidā, mentioned by Gibbon, p. 127, n. 54, is not very valuable, being neither good nor early. The authoritative Arabic text is that of Reinaud, 1840, and there is a French translation by S. Guyard, 1883. On early geographical works in Arabic, see Le Strange’s Palestine under the Moslems (Pal. Explor. Fund).

5. AUTHORITIES — (C. XXV. *sqq.*)

For the works of Libanius, cp. vol. ii. Appendix 10, p. 361-362. The chronology of the most important of his later orations is determined by Sievers as follows: —

- a.d. 381. Or. ii., πρὸς τοὺς βαρὺν αὐτὸν καλοῦντας. He contrasts the present with the reign of Julian; and refers to the Battle of Hadrianople.
- a.d. 386. Or. xxxi. Against Tisamenos (consularis of Syria). An interesting indictment of the governor’s exactions and oppression.
- a.d. 387 (March). Or. xix., περὶ τῆς στ•σεως. On the sedition at Antioch, a petition to Theodosius for mercy.
- a.d. 387. Or. xxxiv., κατὰ τῶν πεφευγ•των. Against those who fled from the city during the sedition. It was written during the sedition but •ετὰ δικαστ•ρια καὶ κρ•σιν καὶ δεσ•ν.
- a.d. 387. Or. xx., πρὸς θεοδ•σιον ἐπὶ ταῖς διαλλαγαῖς. The story of the sedition and the pardon is narrated.
- a.d. 387. Or. xxi., πρὸς Καισ•

THE HISTORY OF THE DECLINE AND FALL OF THE ROMAN EMPIRE

CHAPTER XXVII

Death of Gratian — Ruin of Arianism — St. Ambrose — First Civil War, against Maximus — Character, Administration, and Penance of Theodosius — Death of Valentinian II. — Second Civil War, against Eugenius — Death of Theodosius

The fame of Gratian, before he had accomplished the twentieth year of his age, was equal to that of the most celebrated princes. His gentle and amiable disposition endeared him to his private friends, the graceful affability of his manners engaged the affection of the people: the men of letters, who enjoyed the liberality, acknowledged the taste and eloquence, of their sovereign; his valour and dexterity in arms were equally applauded by the soldiers; and the clergy considered the humble piety of Gratian as the first and most useful of his virtues. The victory of Colmar had delivered the West from a formidable invasion; and the grateful provinces of the East ascribed the merits of Theodosius to the author of *his* greatness and of the public safety. Gratian survived those memorable events only four or five years; but he survived his reputation; and, before he fell a victim to rebellion, he had lost, in a great measure, the respect and confidence of the Roman world.

The remarkable alteration of his character or conduct may not be imputed to the arts of flattery which had besieged the son of Valentinian from his infancy; nor to the headstrong passions which that gentle youth appears to have escaped. A more attentive view of the life of Gratian may perhaps suggest the true cause of the disappointment of the public hopes. His apparent virtues, instead of being the hardy productions of experience and adversity, were the premature and artificial fruits of a royal education. The anxious tenderness of his father was continually employed to bestow on him those advantages which he might perhaps esteem the more highly, as he himself had been deprived of them; and the most skilful masters of every science and of every art had laboured to form the mind and body of the young prince.¹ The knowledge which they painfully communicated was displayed with ostentation and celebrated with lavish praise. His soft and tractable disposition received the fair impression of their judicious precepts, and the absence of passion might easily be mistaken for the strength of reason. His preceptors gradually rose to the rank and consequence of ministers of

state;² and, as they wisely dissembled their secret authority, he seemed to act with firmness, with propriety and with judgment, on the most important occasions of his life and reign. But the influence of this elaborate instruction did not penetrate beyond the surface; and the skilful preceptors, who so accurately guided the steps of their royal pupil, could not infuse into his feeble and indolent character the vigorous and independent principle of action which renders the laborious pursuit of glory essentially necessary to the happiness, and almost to the existence, of the hero. As soon as time and accident had removed those faithful counsellors from the throne, the emperor of the West insensibly descended to the level of his natural genius; abandoned the reins of government to the ambitious hands which were stretched forwards to grasp them; and amused his leisure with the most frivolous gratifications. A public sale of favour and injustice was instituted, both in the court and in the provinces, by the worthless delegates of his power, whose merit it was made *sacrilege* to question.³ The conscience of the credulous prince was directed by saints and bishops,⁴ who procured an Imperial edict to punish as a capital offence, the violation, the neglect, or even the ignorance of the divine law.⁵ Among the various arts which had exercised the youth of Gratian, he had applied himself with singular inclination and success to manage the horse, to draw the bow, and to dart the javelin; and these qualifications, which might be useful to a soldier, were prostituted to the viler purposes of hunting. Large parks were enclosed for the Imperial pleasures, and plentifully stocked with every species of wild beasts; and Gratian neglected the duties, and even the dignity, of his rank, to consume whole days in the vain display of his dexterity and boldness in the chase. The pride and wish of the Roman emperor to excel in an art in which he might be surpassed by the meanest of his slaves reminded the numerous spectators of the examples of Nero and Commodus; but the chaste and temperate Gratian was a stranger to their monstrous vices; and his hands were stained only with the blood of animals.⁶

The behaviour of Gratian, which degraded his character in the eyes of mankind, could not have disturbed the security of his reign, if the army had not been provoked to resent their peculiar injuries. As long as the young emperor was guided by the instructions of his masters, he professed himself the friend and pupil of the soldiers; many of his hours were spent in the familiar conversation of the camp; and the health, the comforts, the rewards, the honours, of his faithful troops appeared to be the object of his attentive concern. But, after Gratian more freely indulged his prevailing taste for hunting and shooting, he naturally connected himself with the most dexterous ministers of his favourite amusement. A body of the Alani was received into the military and domestic service of the palace; and the admirable skill which they were accustomed to display in the unbounded plains of Scythia was exercised, on a more narrow theatre, in the parks and enclosures of Gaul. Gratian admired the talents and customs of these favourite guards, to whom alone he entrusted the defence of his person; and as if he meant to insult the public opinion, he frequently shewed himself to the soldiers and people, with the dress and arms, the long bow, the sounding quiver,

and the fur garments of a Scythian warrior. The unworthy spectacle of a Roman prince who had renounced the dress and manners of his country filled the minds of the legions with grief and indignation.⁷ Even the Germans, so strong and formidable in the armies of the empire, affected to disdain the strange and horrid appearance of the savages of the North, who, in the space of a few years, had wandered from the banks of the Volga to those of the Seine. A loud and licentious murmur was echoed through the camps and garrisons of the West; and, as the mild indolence of Gratian neglected to extinguish the first symptoms of discontent, the want of love and respect was not supplied by the influence of fear. But the subversion of an established government is always a work of some real, and of much apparent, difficulty; and the throne of Gratian was protected by the sanctions of custom, law, religion, and the nice balance of the civil and military powers, which had been established by the policy of Constantine. It is not very important to inquire from what causes the revolt of Britain was produced. Accident is commonly the parent of disorder; the seed of rebellion happened to fall on a soil which was supposed to be more fruitful than any other in tyrants and usurpers;⁸ the legions of that sequestered island had been long famous for a spirit of presumption and arrogance;⁹ and the name of Maximus was proclaimed by the tumultuary but unanimous voice both of the soldiers and of the provincials. The emperor, or the rebel, for his title was not yet ascertained by fortune, was a native of Spain, the countryman, the fellow-soldier, and the rival of Theodosius, whose elevation he had not seen without some emotions of envy and resentment. The events of his life had long since fixed him in Britain; and I should not be unwilling to find some evidence for the marriage which he is said to have contracted with the daughter of a wealthy lord of Caernarvonshire.¹⁰ But this provincial rank might justly be considered as a state of exile and obscurity; and, if Maximus had obtained any civil or military office, he was not invested with the authority either of governor or general.¹¹ His abilities, and even his integrity, are acknowledged by the partial writers of the age; and the merit must indeed have been conspicuous, that could extort such a confession in favour of the vanquished enemy of Theodosius. The discontent of Maximus might incline him to censure the conduct of his sovereign, and to encourage, perhaps without any views of ambition, the murmurs of the troops. But in the midst of the tumult he artfully, or modestly, refused to ascend the throne; and some credit appears to have been given to his own positive declaration that he was compelled to accept the dangerous present of the Imperial purple.¹²

But there was a danger likewise in refusing the empire; and from the moment that Maximus had violated his allegiance to his lawful sovereign, he could not hope to reign, or even to live, if he confined his moderate ambition within the narrow limits of Britain. He boldly and wisely resolved to prevent the designs of Gratian; the youth of the island crowded to his standard, and he invaded Gaul with a fleet and army, which were long afterwards remembered as the emigration of a considerable part of the British nation.¹³ The emperor, in his peaceful residence of Paris, was alarmed by their

hostile approach; and the darts which he idly wasted on lions and bears might have been employed more honourably against the rebels. But his feeble efforts announced his degenerate spirit and desperate situation, and deprived him of the resources which he still might have found in the support of his subjects and allies. The armies of Gaul, instead of opposing the march of Maximus, received him with joyful and loyal acclamations; and the shame of the desertion was transferred from the people to the prince. The troops whose station more immediately attached them to the service of the palace abandoned the standard of Gratian the first time that it was displayed in the neighbourhood of Paris. The emperor of the West fled towards Lyons, with a train of only three hundred horse; and in the cities along the road, where he hoped to find a refuge, or at least a passage, he was taught, by cruel experience, that every gate is shut against the unfortunate. Yet he might still have reached in safety the dominions of his brother, and soon have returned with the forces of Italy and the East, if he had not suffered himself to be fatally deceived by the perfidious governor of the Lyonese province. Gratian was amused by protestations of doubtful fidelity and the hopes of a support which could not be effectual, till the arrival of Andragathius, the general of the cavalry of Maximus, put an end to his suspense. That resolute officer executed without remorse the orders, or the intentions, of the usurper. Gratian, as he rose from supper, was delivered into the hands of the assassin; and his body was denied to the pious and pressing entreaties of his brother Valentinian.¹⁴ The death of the emperor was followed by that of his powerful general Mellobaudes, the king of the Franks; who maintained, to the last moment of his life, the ambiguous reputation which is the just recompense of obscure and subtle policy.¹⁵ These executions might be necessary to the public safety; but the successful usurper, whose power was acknowledged by all the provinces of the West, had the merit and the satisfaction of boasting that, except those who had perished by the chance of war, his triumph was not stained by the blood of the Romans.¹⁶

The events of this revolution had passed in such rapid succession that it would have been impossible for Theodosius to march to the relief of his benefactor, before he received the intelligence of his defeat and death. During the season of sincere grief, or ostentatious mourning, the Eastern emperor was interrupted by the arrival of the principal chamberlain of Maximus; and the choice of a venerable old man, for an office which was usually exercised by eunuchs, announced to the court of Constantinople the gravity and temperance of the British usurper. The ambassador condescended to justify, or excuse, the conduct of his master, and to protest in specious language that the murder of Gratian had been perpetrated, without his knowledge or consent, by the precipitate zeal of the soldiers. But he proceeded, in a firm and equal tone, to offer Theodosius the alternative of peace or war. The speech of the ambassador concluded with a spirited declaration that, although Maximus, as a Roman and as the father of his people, would choose rather to employ his forces in the common defence of the republic, he was armed and prepared, if his friendship should be rejected, to dispute in a field of battle the empire of the world. An immediate and

peremptory answer was required; but it was extremely difficult for Theodosius to satisfy, on this important occasion, either the feelings of his own mind or the expectations of the public. The imperious voice of honour and gratitude called aloud for revenge. From the liberality of Gratian he had received the Imperial diadem: his patience would encourage the odious suspicion that he was more deeply sensible of former injuries than of recent obligations; and, if he accepted the friendship, he must seem to share the guilt, of the assassin. Even the principles of justice and the interest of society would receive a fatal blow from the impunity of Maximus; and the example of successful usurpation would tend to dissolve the artificial fabric of government, and once more to replunge the empire in the crimes and calamities of the preceding age. But, as the sentiments of gratitude and honour should invariably regulate the conduct of an individual, they may be overbalanced in the mind of a sovereign by the sense of superior duties; and the maxims both of justice and humanity must permit the escape of an atrocious criminal, if an innocent people would be involved in the consequences of his punishment. The assassin of Gratian had usurped, but he actually possessed, the most warlike provinces of the empire; the East was exhausted by the misfortunes, and even by the success, of the Gothic war; and it was seriously to be apprehended that, after the vital strength of the republic had been wasted in a doubtful and destructive contest, the feeble conqueror would remain an easy prey to the Barbarians of the North. These weighty considerations engaged Theodosius to dissemble his resentment and to accept the alliance of the tyrant. But he stipulated that Maximus should content himself with the possession of the countries beyond the Alps. The brother of Gratian was confirmed and secured in the sovereignty of Italy, Africa, and the Western Illyricum; and some honourable conditions were inserted in the treaty, to protect the memory and the laws of the deceased emperor.¹⁷ According to the custom of the age, the images of the three Imperial colleagues were exhibited to the veneration of the people: nor should it be lightly supposed that, in the moment of a solemn reconciliation, Theodosius secretly cherished the intention of perfidy and revenge.¹⁸

The contempt of Gratian for the Roman soldiers had exposed him to the fatal effects of their resentment. His profound veneration for the Christian clergy was rewarded by the applause and gratitude of a powerful order, which has claimed, in every age, the privilege of dispensing honours both on earth and in heaven.¹⁹ The orthodox bishops bewailed his death and their own irreparable loss; but they were soon comforted by the discovery that Gratian had committed the sceptre of the East to the hands of a prince whose humble faith and fervent zeal were supported by the spirit and abilities of a more vigorous character. Among the benefactors of the church, the fame of Constantine has been rivalled by the glory of Theodosius. If Constantine had the advantage of erecting the standard of the cross, the emulation of his successor assumed the merit of subduing the Arian heresy and of abolishing the worship of idols in the Roman world. Theodosius was the first of the emperors baptised in the true faith of the Trinity. Although he was born of a Christian family, the maxims, or at least the practice, of the age encouraged him to delay the ceremony of his initiation; till he was

admonished of the danger of delay by the serious illness which threatened his life towards the end of the first year of his reign. Before he again took the field against the Goths, he received the sacrament of baptism²⁰ from Acholius, the orthodox bishop of Thessalonica;²¹ and, as the emperor ascended from the holy font, still glowing with the warm feelings of regeneration, he dictated a solemn edict, which proclaimed his own faith and prescribed the religion of his subjects. "It is our pleasure (such is the Imperial style) that all the nations which are governed by our clemency and moderation should steadfastly adhere to the religion which was taught by St. Peter to the Romans; which faithful tradition has preserved; and which is now professed by the pontiff Damasus, and by Peter, bishop of Alexandria, a man of apostolic holiness. According to the discipline of the apostles and the doctrine of the gospel, let us believe the sole deity of the Father, the Son, and the Holy Ghost; under an equal majesty and a pious Trinity. We authorise the followers of this doctrine to assume the title of Catholic Christians; and, as we judge that all others are extravagant madmen, we brand them with the infamous name of Heretics; and declare that their conventicles shall no longer usurp the respectable appellation of churches. Besides the condemnation of Divine justice, they must expect to suffer the severe penalties which our authority, guided by heavenly wisdom, shall think proper to inflict upon them."²² The faith of a soldier is commonly the fruit of instruction rather than of inquiry; but, as the emperor always fixed his eyes on the visible land-marks of orthodoxy, which he had so prudently constituted, his religious opinions were never affected by the specious texts, the subtle arguments, and the ambiguous creeds of the Arian doctors. Once indeed he expressed a faint inclination to converse with the eloquent and learned Eunomius, who lived in retirement at a small distance from Constantinople.^{22a} But the dangerous interview was prevented by the prayers of the empress Flaccilla, who trembled for the salvation of her husband; and the mind of Theodosius was confirmed by a theological argument, adapted to the rudest capacity. He had lately bestowed on his eldest son Arcadius the name and honours of Augustus; and the two princes were seated on a stately throne to receive the homage of their subjects. A bishop, Amphilochius of Iconium, approached the throne, and, after saluting with due reverence the person of his sovereign, he accosted the royal youth with the same familiar tenderness which he might have used towards a plebeian child. Provoked by this insolent behaviour, the monarch gave orders that the rustic priest should be instantly driven from his presence. But, while the guards were forcing him to the door, the dexterous polemic had time to execute his design, by exclaiming with a loud voice, "Such is the treatment, O emperor! which the King of heaven has prepared for those impious men who affect to worship the Father but refuse to acknowledge the equal majesty of his divine Son." Theodosius immediately embraced the bishop of Iconium, and never forgot the important lesson which he had received from this dramatic parable.²³

Constantinople was the principal seat and fortress of Arianism; and, in a long interval of forty years,²⁴ the faith of the princes and prelates who reigned in the capital of the

East was rejected in the purer schools of Rome and Alexandria. The archiepiscopal throne of Macedonius, which had been polluted with so much Christian blood, was successively filled by Eudoxus and Damophilus. Their diocese enjoyed a free importation of vice and error from every province of the empire; the eager pursuit of religious controversy afforded a new occupation to the busy idleness of the metropolis; and we may credit the assertion of an intelligent observer, who describes, with some pleasantry, the effects of their loquacious zeal. "This city," says he, "is full of mechanics and slaves, who are all of them profound theologians, and preach in the shops and in the streets. If you desire a man to change a piece of silver, he informs you wherein the Son differs from the Father; if you ask the price of a loaf, you are told by way of reply that the Son is inferior to the Father; and, if you enquire whether the bath is ready, the answer is that the Son was made out of nothing."²⁵ The heretics of various denominations subsisted in peace under the protection of the Arians of Constantinople; who endeavoured to secure the attachment of those obscure sectaries; while they abused, with unrelenting severity, the victory which they had obtained over the followers of the council of Nice. During the partial reigns of Constantius and Valens, the feeble remnant of the Homoiousians was deprived of the public and private exercise of their religion; and it has been observed, in pathetic language, that the scattered flock was left without a shepherd, to wander on the mountains, or to be devoured by rapacious wolves.²⁶ But, as their zeal, instead of being subdued, derived strength and vigour from oppression, they seized the first moments of imperfect freedom, which they acquired by the death of Valens, to form themselves into a regular congregation under the conduct of an episcopal pastor. Two natives of Cappadocia, Basil and Gregory Nazianzen,²⁷ were distinguished above all their contemporaries²⁸ by the rare union of profane eloquence and of orthodox piety. These orators, who might sometimes be compared, by themselves and by the public, to the most celebrated of the ancient Greeks, were united by the ties of the strictest friendship. They had cultivated, with equal ardour, the same liberal studies in the schools of Athens; they had retired, with equal devotion, to the same solitude in the deserts of Pontus; and every spark of emulation, or envy, appeared to be totally extinguished in the holy and ingenuous breasts of Gregory and Basil. But the exaltation of Basil, from a private life to the archiepiscopal throne of Cæsarea, discovered to the world, and perhaps to himself, the pride of his character; and the first favour which he condescended to bestow on his friend was received, and perhaps was intended, as a cruel insult.²⁹ Instead of employing the superior talents of Gregory in some useful and conspicuous station, the haughty prelate selected, among the fifty bishoprics of his extensive province, the wretched village of Sasima,³⁰ without water, without verdure, without society, situate at the junction of three highways, and frequented only by the incessant passage of rude and clamorous waggoners. Gregory submitted with reluctance to this humiliating exile; he was ordained bishop of Sasima; but he solemnly protests that he never consummated his spiritual marriage with this disgusting bride. He afterwards consented to undertake the government of his native

church of Nazianzus,[31](#) of which his father had been bishop above five-and-forty years. But, as he was still conscious that he deserved another audience and another theatre, he accepted, with no unworthy ambition, the honourable invitation which was addressed to him from the orthodox party of Constantinople. On his arrival in the capital, Gregory was entertained in the house of a pious and charitable kinsman; the most spacious room was consecrated to the uses of religious worship; and the name of *Anastasia* was chosen to express the resurrection of the Nicene faith. This private conventicle was afterwards converted into a magnificent church; and the credulity of the succeeding age was prepared to believe the miracles and visions, which attested the presence, or at least the protection, of the Mother of God.[32](#) The pulpit of the Anastasia was the scene of the labours and triumphs of Gregory Nazianzen; and, in the space of two years, he experienced all the spiritual adventures which constitute the prosperous or adverse fortunes of a missionary.[33](#) The Arians, who were provoked by the boldness of his enterprise, represented his doctrine as if he had preached three distinct and equal Deities; and the devout populace was excited to suppress, by violence and tumult, the irregular assemblies of the Athanasian heretics. From the cathedral of St. Sophia there issued a motley crowd “of common beggars, who had forfeited their claim to pity; of monks, who had the appearance of goats or satyrs; and of women, more terrible than so many Jezebels.” The doors of the Anastasia were broke open; much mischief was perpetrated, or attempted, with sticks, stones, and firebrands; and, as a man lost his life in the affray, Gregory, who was summoned the next morning before the magistrate, had the satisfaction of supposing that he publicly confessed the name of Christ. After he was delivered from the fear and danger of a foreign enemy, his infant church was disgraced and distracted by intestine faction. A stranger who assumed the name of Maximus[34](#) and the cloak of a Cynic philosopher, insinuated himself into the confidence of Gregory; deceived and abused his favourable opinion; and, forming a secret connection with some bishops of Egypt, attempted by a clandestine ordination to supplant his patron in the episcopal seat of Constantinople. These mortifications might sometimes tempt the Cappadocian missionary to regret his obscure solitude. But his fatigues were rewarded by the daily increase of his fame and his congregation; and he enjoyed the pleasure of observing that the greater part of his numerous audience retired from his sermons satisfied with the eloquence of the preacher[35](#) or dissatisfied with the manifold imperfections of their faith and practice.[36](#)

The Catholics of Constantinople were animated with joyful confidence by the baptism and edict of Theodosius; and they impatiently waited the effects of his gracious promise. Their hopes were speedily accomplished; and the emperor, as soon as he had finished the operations of the campaign, made his public entry into the capital at the head of a victorious army. The next day after his arrival, he summoned Damophilus to his presence, and offered that Arian prelate the hard alternative of subscribing the Nicene creed, or of instantly resigning, to the orthodox believers, the use and possession of the episcopal palace, the cathedral of St. Sophia, and all the churches of

Constantinople. The zeal of Damophilus, which in a Catholic saint would have been justly applauded, embraced, without hesitation, a life of poverty and exile,[37](#) and his removal was immediately followed by the purification of the Imperial City. The Arians might complain, with some appearance of justice, that an inconsiderable congregation of sectaries should usurp the hundred churches, which they were insufficient to fill; whilst the far greater part of the people was cruelly excluded from every place of religious worship. Theodosius was still inexorable: but, as the angels who protected the Catholic cause were only visible to the eyes of faith, he prudently reinforced those heavenly legions with the more effectual aid of temporal and carnal weapons; and the church of St. Sophia[38](#) was occupied by a large body of the Imperial guards. If the mind of Gregory was susceptible of pride, he must have felt a very lively satisfaction, when the emperor conducted him through the streets in solemn triumph; and, with his own hand, respectfully placed him on the archiepiscopal throne of Constantinople. But the saint (who had not subdued the imperfections of human virtue) was deeply affected by the mortifying consideration that his entrance into the fold was that of a wolf, rather than of a shepherd; that the glittering arms, which surrounded his person, were necessary for his safety; and that he alone was the object of the imprecations of a great party, whom, as men and citizens, it was impossible for him to despise. He beheld the innumerable multitude, of either sex and of every age, who crowded the streets, the windows, and the roofs of the houses; he heard the tumultuous voice of rage, grief, astonishment, and despair; and Gregory fairly confesses that, on the memorable day of his installation, the capital of the East wore the appearance of a city taken by storm, and in the hands of a Barbarian conqueror.[39](#) About six weeks afterwards, Theodosius declared his resolution of expelling, from all the churches of his dominions, the bishops and their clergy who should obstinately refuse to believe, or at least to profess, the doctrine of the council of Nice. His lieutenant Sapor was armed with the ample powers of a general law, a special commission, and a military force;[40](#) and this ecclesiastical revolution was conducted with so much discretion and vigour that the religion of the emperor was established, without tumult or bloodshed, in all the provinces of the East. The writings of the Arians, if they had been permitted to exist,[41](#) would perhaps contain the lamentable story of the persecution which afflicted the church under the reign of the impious Theodosius; and the sufferings of *their* holy confessors might claim the pity of the disinterested reader. Yet there is reason to imagine that the violence of zeal and revenge was, in some measure, eluded by the want of resistance; and that, in their adversity, the Arians displayed much less firmness than had been exerted by the orthodox party under the reigns of Constantius and Valens. The moral character and conduct of the hostile sects appear to have been governed by the same common principles of nature and religion; but a very material circumstance may be discovered, which tended to distinguish the degrees of their theological faith. Both parties in the schools, as well as in the temples, acknowledged and worshipped the divine majesty of Christ; and, as we are always prone to impute our own sentiments and passions to the Deity, it would be deemed more prudent and respectful to exaggerate, than to

circumscribe, the adorable perfections of the Son of God. The disciple of Athanasius exulted in the proud confidence that he had entitled himself to the divine favour; while the follower of Arius must have been tormented by the secret apprehension that he was guilty, perhaps, of an unpardonable offence, by the scanty praise, and parsimonious honours, which he bestowed on the Judge of the World. The opinions of Arianism might satisfy a cold and speculative mind; but the doctrine of the Nicene Creed, most powerfully recommended by the merits of faith and devotion, was much better adapted to become popular and successful in a believing age.

The hope that truth and wisdom would be found in the assemblies of the orthodox clergy induced the emperor to convene, at Constantinople, a synod of one hundred and fifty bishops, who proceeded, without much difficulty or delay, to complete the theological system which had been established in the council of Nice. The vehement disputes of the fourth century had been chiefly employed on the nature of the Son of God; and the various opinions, which were embraced concerning the *Second*, were extended and transferred, by a natural analogy, to the *Third*, person of the Trinity.^{[42](#)} Yet it was found, or it was thought, necessary, by the victorious adversaries of Arianism, to explain the ambiguous language of some respectable doctors; to confirm the faith of the Catholics; and to condemn an unpopular and inconsistent sect of Macedonians, who freely admitted that the Son was consubstantial to the Father, while they were fearful of seeming to acknowledge the existence of *Three* Gods. A final and unanimous sentence was pronounced to ratify the equal Deity of the Holy Ghost; the mysterious doctrine has been received by all the nations and all the churches of the Christian world; and their grateful reverence has assigned to the bishops of Theodosius the second rank among the general councils.^{[43](#)} Their knowledge of religious truth may have been preserved by tradition, or it may have been communicated by inspiration; but the sober evidence of history will not allow much weight to the personal authority of the fathers of Constantinople. In an age when the ecclesiastics had scandalously degenerated from the model of apostolical purity, the most worthless and corrupt were always the most eager to frequent, and disturb, the episcopal assemblies. The conflict and fermentation of so many opposite interests and tempers inflamed the passions of the bishops; and their ruling passions were the love of gold and the love of dispute. Many of the same prelates who now applauded the orthodox piety of Theodosius had repeatedly changed, with prudent flexibility, their creeds and opinions; and in the various revolutions of the church and state, the religion of their sovereign was the rule of their obsequious faith. When the emperor suspended his prevailing influence, the turbulent synod was blindly impelled by the absurd or selfish motives of pride, hatred, and resentment. The death of Meletius, which happened at the council of Constantinople, presented the most favourable opportunity of terminating the schism of Antioch, by suffering his aged rival, Paulinus, peaceably to end his days in the episcopal chair. The faith and virtues of Paulinus were unblemished. But his cause was supported by the Western churches; and the bishops of the synod resolved to

perpetuate the mischiefs of discord by the hasty ordination of a perjured candidate,[44](#) rather than to betray the imagined dignity of the East, which had been illustrated by the birth and death of the Son of God. Such unjust and disorderly proceedings forced the gravest members of the assembly to dissent and to secede; and the clamorous majority, which remained masters of the field of battle, could be compared only to wasps or magpies, to a flight of cranes, or to a flock of geese.[45](#)

A suspicion may possibly arise that so unfavourable a picture of ecclesiastical synods has been drawn by the partial hand of some obstinate heretic or some malicious infidel. But the name of the sincere historian who has conveyed this instructive lesson to the knowledge of posterity must silence the impotent murmurs of superstition and bigotry. He was one of the most pious and eloquent bishops of the age; a saint and a doctor of the church; the scourge of Arianism, and the pillar of the orthodox faith; a distinguished member of the council of Constantinople, in which, after the death of Meletius, he exercised the functions of president: in a word — Gregory Nazianzen himself. The harsh and ungenerous treatment which he experienced,[46](#) instead of derogating from the truth of his evidence, affords an additional proof of the spirit which actuated the deliberations of the synod. Their unanimous suffrage had confirmed the pretensions which the bishop of Constantinople derived from the choice of the people and the approbation of the emperor. But Gregory soon became the victim of malice and envy. The bishops of the East, his strenuous adherents, provoked by his moderation in the affairs of Antioch, abandoned him, without support, to the adverse faction of the Egyptians; who disputed the validity of his election, and rigorously asserted the obsolete canon that prohibited the licentious practice of episcopal translations. The pride, or the humility, of Gregory prompted him to decline a contest which might have been imputed to ambition and avarice; and he publicly offered, not without some mixture of indignation, to renounce the government of a church which had been restored, and almost created, by his labours. His resignation was accepted by the synod, and by the emperor, with more readiness than he seems to have expected. At the time, when he might have hoped to enjoy the fruits of his victory, his episcopal throne was filled by the senator Nectarius; and the new archbishop, accidentally recommended by his easy temper and venerable aspect, was obliged to delay the ceremony of his consecration, till he had previously despatched the rites of his baptism.[47](#) After this remarkable experience of the ingratitude of princes and prelates, Gregory retired once more to his obscure solitude of Cappadocia; where he employed the remainder of his life, about eight years, in the exercises of poetry and devotion. The title of Saint has been added to his name; but the tenderness of his heart[48](#) and the elegance of his genius reflect a more pleasing lustre on the memory of Gregory Nazianzen.

It was not enough that Theodosius had suppressed the insolent reign of Arianism, or that he had abundantly revenged the injuries which the Catholics sustained from the

zeal of Constantius and Valens. The orthodox emperor considered every heretic as a rebel against the supreme powers of heaven, and of earth; and each of those powers might exercise their peculiar jurisdiction over the soul and body of the guilty. The decrees of the council of Constantinople had ascertained the true standard of the faith; and the ecclesiastics who governed the conscience of Theodosius suggested the most effectual methods of persecution. In the space of fifteen years, he promulgated at least fifteen severe edicts against the heretics;[49](#) more especially against those who rejected the doctrine of the Trinity; and to deprive them of every hope of escape, he sternly enacted that, if any laws or rescripts should be alleged in their favour, the judges should consider them as the illegal productions either of fraud or forgery. The penal statutes were directed against the ministers, the assemblies, and the persons of the heretics; and the passions of the legislator were expressed in the language of declamation and invective. I. The heretical teachers, who usurped the sacred titles of Bishops or Presbyters, were not only excluded from the privileges and emoluments so liberally granted to the orthodox clergy, but they were exposed to the heavy penalties of exile and confiscation, if they presumed to preach the doctrine, or to practise the rites, of their *accursed* sects. A fine of ten pounds of gold (above four hundred pounds sterling) was imposed on every person who should dare to confer, or receive, or promote an heretical ordination: and it was reasonably expected that, if the race of pastors could be extinguished, their helpless flocks would be compelled by ignorance and hunger to return within the pale of the Catholic church. II. The rigorous prohibition of conventicles was carefully extended to every possible circumstance in which the heretics could assemble with the intention of worshipping God and Christ according to the dictates of their conscience. Their religious meetings, whether public or secret, by day or by night, in cities or in the country, were equally proscribed by the edicts of Theodosius; and the building or ground which had been used for that illegal purpose was forfeited to the Imperial domain. III. It was supposed that the error of the heretics could proceed only from the obstinate temper of their minds; and that such a temper was a fit object of censure and punishment. The anathemas of the church were fortified by a sort of civil excommunication, which separated them from their fellow-citizens by a peculiar brand of infamy; and this declaration of the supreme magistrate tended to justify, or at least to excuse, the insults of a fanatic populace. The sectaries were gradually disqualified for the possession of honourable or lucrative employments; and Theodosius was satisfied with his own justice, when he decreed that, as the Eunomians distinguished the nature of the Son from that of the Father, they should be incapable of making their wills or of receiving any advantage from testamentary donations. The guilt of the Manichæan heresy was esteemed of such magnitude that it could be expiated only by the death of the offender; and the same capital punishment was inflicted on the Audians, or *Quartodecimans*,[50](#) who should dare to perpetrate the atrocious crime of celebrating, on an improper day, the festival of Easter. Every Roman might exercise the right of public accusation; but the office of *Inquisitors* of the Faith, a name so deservedly abhorred, was first instituted under the reign of Theodosius. Yet we are assured that the execution of his penal edicts was

seldom enforced; and that the pious emperor appeared less desirous to punish than to reclaim, or terrify, his refractory subjects.[51](#)

The theory of persecution was established by Theodosius, whose justice and piety have been applauded by the saints; but the practice of it, in the fullest extent, was reserved for his rival and colleague Maximus, the first, among the Christian princes, who shed the blood of his Christian subjects on account of their religious opinions. The cause of the Priscillianists,[52](#) a recent sect of heretics, who disturbed the provinces of Spain, was transferred, by appeal, from the synod of Bourdeaux to the Imperial consistory of Treves; and, by the sentence of the Prætorian prefect, seven persons were tortured, condemned, and executed. The first of these was Priscillian[53](#) himself, bishop of Avila,[54](#) in Spain; who adorned the advantages of birth and fortune by the accomplishments of eloquence and learning. Two presbyters and two deacons accompanied their beloved master in his death, which they esteemed as a glorious martyrdom; and the number of religious victims was completed by the execution of Latronian, a poet, who rivalled the fame of the ancients; and of Euchrocia, a noble matron of Bourdeaux, the widow of the orator Delphidius.[55](#) Two bishops, who had embraced the sentiments of Priscillian, were condemned to a distant and dreary exile;[56](#) and some indulgence was shown to the meaner criminals who assumed the merit of an early repentance. If any credit could be allowed to confessions extorted by fear or pain, and to vague reports, the offspring of malice and credulity, the heresy of the Priscillianists would be found to include the various abominations of magic, of impiety, and of lewdness.[57](#) Priscillian, who wandered about the world in the company of his spiritual sisters, was accused of praying stark naked in the midst of the congregation; and it was confidently asserted that the effects of his criminal intercourse with the daughter of Euchrocia had been suppressed by means still more odious and criminal. But an accurate, or rather a candid, inquiry will discover that, if the Priscillianists violated the laws of nature, it was not by the licentiousness, but by the austerity, of their lives. They absolutely condemned the use of the marriage-bed; and the peace of families was often disturbed by indiscreet separations. They enjoined, or recommended, a total abstinence from all animal food; and their continual prayers, fasts, and vigils inculcated a rule of strict and perfect devotion. The speculative tenets of the sect, concerning the person of Christ and the nature of the human soul, were derived from the Gnostic and Manichæan system; and this vain philosophy, which had been transported from Egypt to Spain, was ill adapted to the grosser spirits of the West. The obscure disciples of Priscillian suffered, languished, and gradually disappeared: his tenets were rejected by the clergy and people, but his death was the subject of a long and vehement controversy; while some arraigned, and others applauded, the justice of his sentence. It is with pleasure that we can observe the humane inconsistency of the most illustrious saints and bishops, Ambrose of Milan,[58](#) and Martin of Tours;[59](#) who, on this occasion, asserted the cause of toleration. They pitied the unhappy men, who had been executed at Treves; they refused to hold

communication with their episcopal murderers; and, if Martin deviated from that generous resolution, his motives were laudable, and his repentance was exemplary. The bishops of Tours and Milan pronounced, without hesitation, the eternal damnation of heretics; but they were surprised, and shocked, by the bloody image of their temporal death, and the honest feelings of nature resisted the artificial prejudices of theology. The humanity of Ambrose and Martin was confirmed by the scandalous irregularity of the proceedings against Priscillian and his adherents. The civil and ecclesiastical ministers had transgressed the limits of their respective provinces. The secular judge had presumed to receive an appeal, and to pronounce a definitive sentence, in a matter of faith and episcopal jurisdiction. The bishops had disgraced themselves by exercising the function of accusers in a criminal prosecution. The cruelty of Ithacius,[60](#) who beheld the tortures, and solicited the death, of the heretics, provoked the just indignation of mankind; and the vices of that profligate bishop were admitted as a proof that his zeal was instigated by the sordid motives of interest. Since the death of Priscillian, the rude attempts of persecution have been refined and methodised in the holy office, which assigns their distinct parts to the ecclesiastical and secular powers. The devoted victim is regularly delivered by the priest to the magistrate, and by the magistrate to the executioner; and the inexorable sentence of the church, which declares the spiritual guilt of the offender, is expressed in the mild language of pity and intercession.

Among the ecclesiastics, who illustrated the reign of Theodosius, Gregory Nazianzen was distinguished by the talents of an eloquent preacher; the reputation of miraculous gifts added weight and dignity to the monastic virtues of Martin of Tours;[61](#) but the palm of episcopal vigour and ability was justly claimed by the intrepid Ambrose.[62](#) He was descended from a noble family of Romans; his father had exercised the important office of Prætorian prefect of Gaul; and the son, after passing through the studies of a liberal education, attained, in the regular gradation of civil honours, the station of consular of Liguria, a province which included the Imperial residence of Milan. At the age of thirty-four, and before he had received the sacrament of baptism, Ambrose, to his own surprise, and to that of the world, was suddenly transformed from a governor to an archbishop. Without the least mixture, as it is said, of art or intrigue, the whole body of the people unanimously saluted him with the episcopal title; the concord and perseverance of their acclamations were ascribed to a preternatural impulse; and the reluctant magistrate was compelled to undertake a spiritual office, for which he was not prepared by the habits and occupations of his former life. But the active force of his genius soon qualified him to exercise, with zeal and prudence, the duties of his ecclesiastical jurisdiction; and, while he cheerfully renounced the vain and splendid trappings of temporal greatness, he condescended, for the good of the church, to direct the conscience of the emperors and to control the administration of the empire. Gratian loved and revered him as a father; and the elaborate treatise on the faith of the Trinity was designed for the instruction of the young prince. After his tragic death, at a time when the empress Justina trembled for her own safety and for that of her son

Valentinian, the archbishop of Milan was despatched, on two different embassies, to the court of Treves. He exercised, with equal firmness and dexterity, the powers of his spiritual and political characters; and perhaps contributed, by his authority and eloquence, to check the ambition of Maximus and to protect the peace of Italy.⁶³

Ambrose had devoted his life and his abilities to the service of the church. Wealth was the object of his contempt; he had renounced his private patrimony; and he sold, without hesitation, the consecrated plate for the redemption of captives. The clergy and people of Milan were attached to their archbishop; and he deserved the esteem, without soliciting the favour or apprehending the displeasure, of his feeble sovereigns.

The government of Italy, and of the young emperor, naturally devolved to his mother Justina, a woman of beauty and spirit, but who, in the midst of an orthodox people, had the misfortune of professing the Arian heresy, which she endeavoured to instil into the mind of her son. Justina was persuaded that a Roman emperor might claim, in his own dominions, the public exercise of his religion; and she proposed to the archbishop, as a moderate and reasonable concession, that he should resign the use of a single church, either in the city or suburbs of Milan. But the conduct of Ambrose was governed by very different principles.⁶⁴ The palaces of the earth might indeed belong to Cæsar; but the churches were the houses of God; and, within the limits of his diocese, he himself, as the lawful successor of the apostles, was the only minister of God. The privileges of Christianity, temporal as well as spiritual, were confined to the true believers; and the mind of Ambrose was satisfied that his own theological opinions were the standard of truth and orthodoxy. The archbishop, who refused to hold any conference or negotiation with the instruments of Satan, declared, with modest firmness, his resolution to die a martyr rather than to yield to the impious sacrilege; and Justina, who resented the refusal as an act of insolence and rebellion, hastily determined to exert the Imperial prerogative of her son. As she desired to perform her public devotions on the approaching festival of Easter, Ambrose was ordered to appear before the council. He obeyed the summons with the respect of a faithful subject, but he was followed, without his consent, by an innumerable people: they pressed, with impetuous zeal, against the gates of the palace; and the affrighted ministers of Valentinian, instead of pronouncing a sentence of exile on the archbishop of Milan, humbly requested that he would interpose his authority, to protect the person of the emperor and to restore the tranquillity of the capital. But the promises which Ambrose received and communicated were soon violated by a perfidious court, and during six of the most solemn days which Christian piety has set apart for the exercise of religion the city was agitated by the irregular convulsions of tumult and fanaticism. The officers of the household were directed to prepare, first the Porcian, and afterwards the new *Basilica*, for the immediate reception of the emperor and his mother. The splendid canopy and hangings of the royal seat were arranged in the customary manner; but it was found necessary to defend them, by a strong guard, from the insults of the populace. The Arian ecclesiastics who ventured to shew themselves in the streets were exposed to the most imminent danger of their lives; and Ambrose enjoyed the merit

and reputation of rescuing his personal enemies from the hands of the enraged multitude.

But, while he laboured to restrain the effects of their zeal, the pathetic vehemence of his sermons continually inflamed the angry and seditious temper of the people of Milan. The characters of Eve, of the wife of Job, of Jezebel, of Herodias, were indecently applied to the mother of the emperor; and her desire to obtain a church for the Arians was compared to the most cruel persecutions which Christianity had endured under the reign of Paganism. The measures of the court served only to expose the magnitude of the evil. A fine of two hundred pounds of gold was imposed on the corporate body of merchants and manufacturers: an order was signified, in the name of the emperor, to all the officers, and inferior servants, of the courts of justice, that, during the continuance of the public disorders, they should strictly confine themselves to their houses: and the ministers of Valentinian imprudently confessed that the most respectable part of the citizens of Milan was attached to the cause of their archbishop. He was again solicited to restore peace to his country, by a timely compliance with the will of his sovereign. The reply of Ambrose was couched in the most humble and respectful terms, which might, however, be interpreted as a serious declaration of civil war. "His life and fortune were in the hands of the emperor; but he would never betray the church of Christ or degrade the dignity of the episcopal character. In such a cause, he was prepared to suffer whatever the malice of the demon could inflict; and he only wished to die in the presence of his faithful flock, and at the foot of the altar; *he* had not contributed to excite, but it was in the power of God alone to appease, the rage of the people: he deprecated the scenes of blood and confusion which were likely to ensue; and it was his fervent prayer that he might not survive to behold the ruin of a flourishing city and perhaps the desolation of all Italy."⁶⁵ The obstinate bigotry of Justina would have endangered the empire of her son, if, in this contest with the church and people of Milan, she could have depended on the active obedience of the troops of the palace. A large body of Goths had marched to occupy the *Basilica* which was the object of the dispute: and it might be expected from the Arian principles and barbarous manners of these foreign mercenaries that they would not entertain any scruples in the execution of the most sanguinary orders. They were encountered, on the sacred threshold, by the archbishop, who, thundering against them a sentence of excommunication, asked them, in the tone of a father and a master, Whether it was to invade the house of God that they had implored the hospitable protection of the republic? The suspense of the Barbarians allowed some hours for a more effectual negotiation; and the empress was persuaded, by the advice of her wisest counsellors, to leave the Catholics in possession of all the churches of Milan; and to dissemble, till a more convenient season, her intentions of revenge. The mother of Valentinian could never forgive the triumph of Ambrose; and the royal youth uttered a passionate exclamation that his own servants were ready to betray him into the hands of an insolent priest.

The laws of the empire, some of which were inscribed with the name of Valentinian, still condemned the Arian heresy, and seemed to excuse the resistance of the Catholics. By the influence of Justina an edict of toleration was promulgated in all the provinces which were subject to the court of Milan; the free exercise of their religion was granted to those who professed the faith of Rimini; and the emperor declared that all persons who should infringe this sacred and salutary constitution should be capitally punished as the enemies of the public peace.[66](#) The character and language of the archbishop of Milan may justify the suspicion that his conduct soon afforded a reasonable ground, or at least a specious pretence, to the Arian ministers, who watched the opportunity of surprising him in some act of disobedience to a law which he strangely represents as a law of blood and tyranny. A sentence of easy and honourable banishment was pronounced, which enjoined Ambrose to depart from Milan without delay; whilst it permitted him to choose the place of his exile and the number of his companions. But the authority of the saints who have preached and practised the maxims of passive loyalty appeared to Ambrose of less moment than the extreme and pressing danger of the church. He boldly refused to obey; and his refusal was supported by the unanimous consent of his faithful people.[67](#) They guarded by turns the person of their archbishop; the gates of the cathedral and the episcopal palace were strongly secured; and the Imperial troops, who had formed the blockade, were unwilling to risk the attack, of that impregnable fortress. The numerous poor, who had been relieved by the liberality of Ambrose, embraced the fair occasion of signalling their zeal and gratitude; and, as the patience of the multitude might have been exhausted by the length and uniformity of nocturnal vigils, he prudently introduced into the church of Milan the useful institution of a loud and regular psalmody. While he maintained this arduous contest, he was instructed by a dream to open the earth in a place where the remains of two martyrs, Gervasius and Protasius,[68](#) had been deposited above three hundred years. Immediately under the pavement of the church two perfect skeletons were found,[69](#) with the heads separated from their bodies, and a plentiful effusion of blood. The holy relics were presented, in solemn pomp, to the veneration of the people; and every circumstance of this fortunate discovery was admirably adapted to promote the designs of Ambrose. The bones of the martyrs, their blood, their garments, were supposed to contain a healing power; and their preternatural influence was communicated to the most distant objects, without losing any part of its original virtue. The extraordinary cure of a blind man,[70](#) and the reluctant confessions of several demoniacs, appeared to justify the faith and sanctity of Ambrose; and the truth of those miracles is attested by Ambrose himself, by his secretary Paulinus, and by his proselyte, the celebrated Augustin, who, at that time, professed the art of rhetoric in Milan. The reason of the present age may possibly approve the incredulity of Justina and her Arian court; who derided the theatrical representations which were exhibited by the contrivance, and at the expense, of the archbishop.[71](#) Their effect, however, on the minds of the people was rapid and irresistible; and the feeble sovereign of Italy found himself unable to contend with the

favourite of heaven. The powers likewise of the earth interposed in the defence of Ambrose; the disinterested advice of Theodosius was the general result of piety and friendship; and the mask of religious zeal concealed the hostile and ambitious designs of the tyrant of Gaul.[72](#)

The reign of Maximus might have ended in peace and prosperity, could he have contented himself with the possession of three ample countries, which now constitute the three most flourishing kingdoms of modern Europe. But the aspiring usurper, whose sordid ambition was not dignified by the love of glory and of arms, considered his actual forces as the instruments only of his future greatness, and his success was the immediate cause of his destruction. The wealth which he extorted[73](#) from the oppressed provinces of Gaul, Spain, and Britain was employed in levying and maintaining a formidable army of Barbarians, collected, for the most part, from the fiercest nations of Germany. The conquest of Italy was the object of his hopes and preparations; and he secretly meditated the ruin of an innocent youth, whose government was abhorred and despised by his Catholic subjects. But, as Maximus wished to occupy, without resistance, the passes of the Alps, he received, with perfidious smiles, Domninus of Syria, the ambassador of Valentinian, and pressed him to accept the aid of a considerable body of troops for the service of a Pannonian war. The penetration of Ambrose had discovered the snares of an enemy under the professions of friendship;[74](#) but the Syrian Domninus was corrupted, or deceived, by the liberal favour of the court of Treves; and the council of Milan obstinately rejected the suspicion of danger, with a blind confidence which was the effect, not of courage, but of fear. The march of the auxiliaries was guided by the ambassador; and they were admitted, without distrust, into the fortresses of the Alps. But the crafty tyrant followed, with hasty and silent footsteps, in the rear; and, as he diligently intercepted all intelligence of his motions, the gleam of armour and the dust excited by the troops of cavalry first announced the hostile approach of a stranger to the gates of Milan. In this extremity, Justina and her son might accuse their own imprudence and the perfidious arts of Maximus; but they wanted time, and force and resolution to stand against the Gauls and Germans, either in the field or within the walls of a large and disaffected city. Flight was their only hope, Aquileia their only refuge; and, as Maximus now displayed his genuine character, the brother of Gratian might expect the same fate from the hands of the same assassin. Maximus entered Milan in triumph; and, if the wise archbishop refused a dangerous and criminal connection with the usurper, he might indirectly contribute to the success of his arms by inculcating, from the pulpit, the duty of resignation rather than that of resistance.[75](#) The unfortunate Justina reached Aquileia in safety; but she distrusted the strength of the fortifications; she dreaded the event of a siege; and she resolved to implore the protection of the great Theodosius, whose power and virtue were celebrated in all the countries of the West. A vessel was secretly provided to transport the Imperial family; they embarked with precipitation in one of the obscure harbours of Venetia or Istria; traversed the whole extent of the Hadriatic and Ionian seas; turned the extreme promontory of

Peloponnesus; and, after a long but successful navigation, reposed themselves in the port of Thessalonica. All the subjects of Valentinian deserted the cause of a prince who, by his abdication, had absolved them from the duty of allegiance; and, if the little city of Æmona, on the verge of Italy, had not presumed to stop the career of his inglorious victory, Maximus would have obtained, without a struggle, the sole possession of the Western empire.

Instead of inviting his royal guests to the palace of Constantinople, Theodosius had some unknown reasons to fix their residence at Thessalonica; but these reasons did not proceed from contempt or indifference, as he speedily made a visit to that city, accompanied by the greatest part of his court and senate. After the first tender expressions of friendship and sympathy, the pious emperor of the East gently admonished Justina that the guilt of heresy was sometimes punished in this world as well as in the next; and that the public profession of the Nicene faith would be the most efficacious step to promote the restoration of her son, by the satisfaction which it must occasion both on earth and in heaven. The momentous question of peace or war was referred, by Theodosius, to the deliberation of his council; and the arguments which might be alleged on the side of honour and justice had acquired, since the death of Gratian, a considerable degree of additional weight. The persecution of the Imperial family, to which Theodosius himself had been indebted for his fortune, was now aggravated by recent and repeated injuries. Neither oaths nor treaties could restrain the boundless ambition of Maximus; and the delay of vigorous and decisive measures, instead of prolonging the blessings of peace, would expose the Eastern empire to the danger of an hostile invasion. The Barbarians, who had passed the Danube, had lately assumed the character of soldiers and subjects, but their native fierceness was yet untamed; and the operations of a war which would exercise their valour and diminish their numbers might tend to relieve the provinces from an intolerable oppression. Notwithstanding these specious and solid reasons, which were approved by a majority of the council, Theodosius still hesitated whether he should draw the sword in a contest which could no longer admit any terms of reconciliation; and his magnanimous character was not disgraced by the apprehensions which he felt for the safety of his infant sons and the welfare of his exhausted people. In this moment of anxious doubt, while the fate of the Roman world depended on the resolution of a single man, the charms of the princess Galla most powerfully pleaded the cause of her brother Valentinian.⁷⁶ The heart of Theodosius was softened by the tears of beauty; his affections were insensibly engaged by the graces of youth and innocence; the art of Justina managed and directed the impulse of passion; and the celebration of the royal nuptials was the assurance and signal of the civil war. The unfeeling critics, who consider every amorous weakness as an indelible stain on the memory of a great and orthodox emperor, are inclined, on this occasion, to dispute the suspicious evidence of the historian Zosimus. For my own part, I shall frankly confess that I am willing to find, or even to seek, in the revolutions of the world some traces of the mild and tender sentiments of domestic life; and, amidst the crowd of fierce and ambitious conquerors,

I can distinguish, with peculiar complacency, a gentle hero, who may be supposed to receive his armour from the hands of love. The alliance of the Persian king was secured by the faith of treaties; the martial Barbarians were persuaded to follow the standard, or to respect the frontiers, of an active and liberal monarch; and the dominions of Theodosius, from the Euphrates to the Hadriatic, resounded with the preparations of war both by land and sea. The skilful disposition of the forces of the East seemed to multiply their numbers, and distracted the attention of Maximus. He had reason to fear that a chosen body of troops, under the command of the intrepid Arbogastes, would direct their march along the banks of the Danube and boldly penetrate through the Rhætian provinces into the centre of Gaul. A powerful fleet was equipped in the harbours of Greece and Epirus, with an apparent design that, as soon as a passage had been opened by a naval victory, Valentinian and his mother should land in Italy, proceed, without delay, to Rome, and occupy the majestic seat of religion and empire. In the meanwhile, Theodosius himself advanced at the head of a brave and disciplined army, to encounter his unworthy rival, who, after the siege of Æmona, had fixed his camp in the neighbourhood of Siscia, a city of Pannonia, strongly fortified by the broad and rapid stream of the Save.

The veterans, who still remembered the long resistance and successive resources of the tyrant Magnentius, might prepare themselves for the labours of three bloody campaigns. But the contest with his successor, who, like him, had usurped the throne of the West, was easily decided in the term of two months⁷⁷ and within the space of two hundred miles. The superior genius of the emperor of the East might prevail over the feeble Maximus; who, in this important crisis, shewed himself destitute of military skill or personal courage; but the abilities of Theodosius were seconded by the advantage which he possessed of a numerous and active cavalry. The Huns, the Alani, and, after their example, the Goths themselves, were formed into squadrons of archers; who fought on horseback and confounded the steady valour of the Gauls and Germans by the rapid motions of a Tartar war. After the fatigue of a long march, in the heat of summer, they spurred their foaming horses into the waters of the Save, swam the river in the presence of the enemy, and instantly charged and routed the troops who guarded the high ground on the opposite side. Marcellinus, the tyrant's brother, advanced to support them with the select cohorts which were considered as the hope and strength of the army. The action, which had been interrupted by the approach of night, was renewed in the morning; and, after a sharp conflict, the surviving remnant of the bravest soldiers of Maximus threw down their arms at the feet of the conqueror. Without suspending his march to receive the loyal acclamations of the citizens of Æmona, Theodosius pressed forwards, to terminate the war by the death or captivity of his rival, who fled before him with the diligence of fear. From the summit of the Julian Alps, he descended with such incredible speed into the plain of Italy that he reached Aquileia on the evening of the first day; and Maximus, who found himself encompassed on all sides, had scarcely time to shut the gates of the city. But the gates could not long resist the effort of a victorious enemy; and the despair, the disaffection,

the indifference of the soldiers and people, hastened the downfall of the wretched Maximus. He was dragged from his throne, rudely stripped of the Imperial ornaments, the robe, the diadem, and the purple slippers; and conducted, like a malefactor, to the camp and presence of Theodosius, at a place about three miles from Aquileia. The behaviour of the emperor was not intended to insult, and he shewed some disposition to pity and forgive, the tyrant of the West, who had never been his personal enemy and was now become the object of his contempt. Our sympathy is the most forcibly excited by the misfortunes to which we are exposed; and the spectacle of a proud competitor, now prostrate at his feet, could not fail of producing very serious and solemn thoughts in the mind of the victorious emperor. But the feeble emotion of involuntary pity was checked by his regard for public justice and the memory of Gratian; and he abandoned the victim to the pious zeal of the soldiers, who drew him out of the Imperial presence and instantly separated his head from his body. The intelligence of his defeat and death was received with sincere, or well-dissembled, joy: his son Victor, on whom he had conferred the title of Augustus, died by the order, perhaps by the hand, of the bold Arbogastes; and all the military plans of Theodosius were successfully executed. When he had thus terminated the civil war with less difficulty and bloodshed than he might naturally expect, he employed the winter months of his residence at Milan to restore the state of the afflicted provinces; and early in the spring he made, after the example of Constantine and Constantius, his triumphal entry into the ancient capital of the Roman empire.[78](#)

The orator, who may be silent without danger, may praise without difficulty and without reluctance;[79](#) and posterity will confess that the character of Theodosius[80](#) might furnish the subject of a sincere and ample panegyric. The wisdom of his laws, and the success of his arms, rendered his administration respectable in the eyes both of his subjects and of his enemies. He loved and practised the virtues of domestic life, which seldom hold their residence in the palaces of kings. Theodosius was chaste and temperate; he enjoyed, without excess, the sensual and social pleasures of the table; and the warmth of his amorous passions was never diverted from their lawful objects. The proud titles of Imperial greatness were adorned by the tender names of a faithful husband, an indulgent father; his uncle was raised, by his affectionate esteem, to the rank of a second parent; Theodosius embraced, as his own, the children of his brother and sister; and the expressions of his regard were extended to the most distant and obscure branches of his numerous kindred. His familiar friends were judiciously selected from among those persons who, in the equal intercourse of private life, had appeared before his eyes without a mask; the consciousness of personal and superior merit enabled him to despise the accidental distinction of the purple; and he proved by his conduct that he had forgotten all the injuries, while he most gratefully remembered all the favours and services, which he had received before he ascended the throne of the Roman empire. The serious, or lively, tone of his conversation was adapted to the age, the rank, or the character of his subjects whom he admitted into his society; and the affability of his manners displayed the image of his mind. Theodosius respected

the simplicity of the good and virtuous; every art, every talent, of an useful, or even of an innocent, nature was rewarded by his judicious liberality; and, except the heretics whom he persecuted with implacable hatred, the diffusive circle of his benevolence was circumscribed only by the limits of the human race. The government of a mighty empire may assuredly suffice to occupy the time and the abilities of a mortal; yet the diligent prince, without aspiring to the unsuitable reputation of profound learning, always reserved some moments of his leisure for the instructive amusement of reading. History, which enlarged his experience, was his favourite study. The annals of Rome, in the long period of eleven hundred years, presented him with a various and splendid picture of human life; and it has been particularly observed that, whenever he perused the cruel acts of Cinna, of Marius, or of Sylla, he warmly expressed his generous detestation of those enemies of humanity and freedom. His disinterested opinion of past events was usefully applied as the rule of his own actions; and Theodosius has deserved the singular commendation that his virtues always seemed to expand with his fortune; the season of his prosperity was that of his moderation; and his clemency appeared the most conspicuous after the danger and success of the civil war. The Moorish guards of the tyrant had been massacred in the first heat of the victory; and a small number of the most obnoxious criminals suffered the punishment of the law. But the emperor shewed himself much more attentive to relieve the innocent than to chastise the guilty. The oppressed subjects of the West, who would have deemed themselves happy in the restoration of their lands, were astonished to receive a sum of money equivalent to their losses; and the liberality of the conqueror supported the aged mother, and educated the orphan daughters, of Maximus.[81](#) A character thus accomplished might almost excuse the extravagant supposition of the orator Pacatus, that, if the elder Brutus could be permitted to revisit the earth, the stern republican would abjure, at the feet of Theodosius, his hatred of kings; and ingenuously confess that such a monarch was the most faithful guardian of the happiness and dignity of the Roman people.[82](#)

Yet the piercing eye of the founder of the republic must have discerned two essential imperfections, which might, perhaps, have abated his recent love of despotism. The virtuous mind of Theodosius was often relaxed by indolence,[83](#) and it was sometimes inflamed by passion.[84](#) In the pursuit of an important object, his active courage was capable of the most vigorous exertions; but, as soon as the design was accomplished or the danger was surmounted, the hero sunk into inglorious repose; and, forgetful that the time of a prince is the property of his people, resigned himself to the enjoyment of the innocent, but trifling, pleasures of a luxurious court. The natural disposition of Theodosius was hasty and choleric; and, in a station where none could resist and few would dissuade the fatal consequence of his resentment, the humane monarch was justly alarmed by the consciousness of his infirmity, and of his power. It was the constant study of his life to suppress or regulate the intemperate sallies of passion; and the success of his efforts enhanced the merit of his clemency. But the painful virtue which claims the merit of victory is exposed to the danger of defeat; and the reign of a

wise and merciful prince was polluted by an act of cruelty which would stain the annals of Nero or Domitian. Within the space of three years, the inconsistent historian of Theodosius must relate the generous pardon of the citizens of Antioch and the inhuman massacre of the people of Thessalonica.

The lively impatience of the inhabitants of Antioch was never satisfied with their own situation, or with the character or conduct of their successive sovereigns. The Arian subjects of Theodosius deplored the loss of their churches; and, as three rival bishops disputed the throne of Antioch, the sentence which decided their pretensions excited the murmurs of the two unsuccessful congregations. The exigencies of the Gothic war, and the inevitable expense that accompanied the conclusion of the peace, had constrained the emperor to aggravate the weight of the public impositions; and the provinces of Asia, as they had not been involved in the distress, were the less inclined to contribute to the relief, of Europe. The auspicious period now approached of the tenth year of his reign; a festival more grateful to the soldiers, who received a liberal donative, than to the subjects, whose voluntary offerings had been long since converted into an extraordinary and oppressive burthen. The edicts of taxation interrupted the repose and pleasures of Antioch; and the tribunal of the magistrate was besieged by a suppliant crowd; who, in pathetic, but, at first, in respectful language, solicited the redress of their grievances. They were gradually incensed by the pride of their haughty rulers, who treated their complaints as a criminal resistance; their satirical wit degenerated into sharp and angry invectives; and, from the subordinate powers of government, the invectives of the people insensibly rose to attack the sacred character of the emperor himself. Their fury, provoked by a feeble opposition, discharged itself on the images of the Imperial family, which were erected as objects of public veneration in the most conspicuous places of the city. The statues of Theodosius, of his father, of his wife Flaccilla, of his two sons, Arcadius and Honorius, were insolently thrown down from their pedestals, broken in pieces, or dragged with contempt through the streets; and the indignities which were offered to the representations of Imperial majesty, sufficiently declared the impious and treasonable wishes of the populace. The tumult was almost immediately suppressed by the arrival of a body of archers; and Antioch had leisure to reflect on the nature and consequences of her crime.⁸⁵ According to the duty of his office, the governor of the province despatched a faithful narrative of the whole transaction; while the trembling citizens entrusted the confession of their crime, and the assurance of their repentance, to the zeal of Flavian their bishop and to the eloquence of the senator Hilarius, the friend, and most probably the disciple, of Libanius, whose genius, on this melancholy occasion, was not useless to his country.⁸⁶ But the two capitals, Antioch and Constantinople, were separated by the distance of eight hundred miles; and, notwithstanding the diligence of the Imperial posts, the guilty city was severely punished by a long and dreadful interval of suspense. Every rumour agitated the hopes and fears of the Antiochians, and they heard with terror that their sovereign, exasperated by the insult which had been offered to his own statues, and, more

especially, to those of his beloved wife, had resolved to level with the ground the offending city; and to massacre, without distinction of age or sex, the criminal inhabitants;⁸⁷ many of whom were actually driven by their apprehensions to seek a refuge in the mountains of Syria and the adjacent desert. At length, twenty-four days after the sedition, the general Hellebicus and Cæsarius, master of the offices, declared the will of the emperor and the sentence of Antioch. That proud capital was degraded from the rank of a city; and the metropolis of the East, stripped of its lands, its privileges, and its revenues, was subjected, under the humiliating denomination of a village, to the jurisdiction of Laodicea.⁸⁸ The baths, the circus, and the theatres were shut; and, that every source of plenty and pleasure might at the same time be intercepted, the distribution of corn was abolished by the severe instructions of Theodosius. His commissioners then proceeded to inquire into the guilt of individuals; of those who had perpetrated, and of those who had not prevented, the destruction of the sacred statues. The tribunal of Hellebicus and Cæsarius, encompassed with armed soldiers, was erected in the midst of the Forum. The noblest and most wealthy of the citizens of Antioch appeared before them in chains; the examination was assisted by the use of torture, and their sentence was pronounced or suspended, according to the judgment of these extraordinary magistrates. The houses of the criminals were exposed to sale, their wives and children were suddenly reduced, from affluence and luxury, to the most abject distress; and a bloody execution was expected to conclude the horrors of a day⁸⁹ which the preacher of Antioch, the eloquent Chrysostom, has represented as a lively image of the last and universal judgment of the world. But the ministers of Theodosius performed, with reluctance, the cruel task which had been assigned them; they dropped a gentle tear over the calamities of the people; and they listened with reverence to the pressing solicitations of the monks and hermits, who descended in swarms from the mountains.⁹⁰ Hellebicus and Cæsarius were persuaded to suspend the execution of their sentence; and it was agreed that the former should remain at Antioch, while the latter returned, with all possible speed, to Constantinople; and presumed once more to consult the will of his sovereign. The resentment of Theodosius had already subsided; the deputies of the people, both the bishop and the orator, had obtained a favourable audience; and the reproaches of the emperor were the complaints of injured friendship rather than the stern menaces of pride and power. A free and general pardon was granted to the city and citizens of Antioch; the prison-doors were thrown open; the senators who despaired of their lives recovered the possession of their houses and estates; and the capital of the East was restored to the enjoyment of her ancient dignity and splendour. Theodosius condescended to praise the senate of Constantinople, who had generously interceded for their distressed brethren; he rewarded the eloquence of Hilarius with the government of Palestine; and dismissed the bishop of Antioch with the warmest expressions of his respect and gratitude. A thousand new statues arose to the clemency of Theodosius; the applause of his subjects was ratified by the approbation of his own heart; and the emperor confessed that, if the exercise of justice is the most important duty, the indulgence of

mercy is the most exquisite pleasure, of a sovereign.[91](#)

The sedition of Thessalonica is ascribed to a more shameful cause,[91a](#) and was productive of much more dreadful consequences. That great city, the metropolis of all the Illyrian provinces, had been protected from the dangers of the Gothic war by strong fortifications and a numerous garrison. Botheric, the general of those troops, and, as it should seem from his name, a Barbarian, had among his slaves a beautiful boy, who excited the impure desires of one of the charioteers of the Circus. The insolent and brutal lover was thrown into prison by the order of Botheric; and he sternly rejected the importunate clamours of the multitude, who, on the day of the public games, lamented the absence of their favourite, and considered the skill of a charioteer as an object of more importance than his virtue. The resentment of the people was embittered by some previous disputes; and, as the strength of the garrison had been drawn away for the service of the Italian war, the feeble remnant, whose numbers were reduced by desertion, could not save the unhappy general from their licentious fury. Botheric, and several of his principal officers, were inhumanly murdered; their mangled bodies were dragged about the streets; and the emperor, who then resided at Milan, was surprised by the intelligence of the audacious and wanton cruelty of the people of Thessalonica. The sentence of a dispassionate judge would have inflicted a severe punishment on the authors of the crime; and the merit of Botheric might contribute to exasperate the grief and indignation of his master. The fiery and choleric temper of Theodosius was impatient of the dilatory forms of a judicial inquiry; and he hastily resolved that the blood of his lieutenant should be expiated by the blood of the guilty people. Yet his mind still fluctuated between the counsels of clemency and of revenge; the zeal of the bishops had almost extorted from the reluctant emperor the promise of a general pardon; his passion was again inflamed by the flattering suggestions of his minister Rufinus; and, after Theodosius had despatched the messengers of death, he attempted, when it was too late, to prevent the execution of his orders. The punishment of a Roman city was blindly committed to the undistinguishing sword of the Barbarians; and the hostile preparations were concerted with the dark and perfidious artifice of an illegal conspiracy. The people of Thessalonica were treacherously invited, in the name of their sovereign, to the games of the Circus; and such was their insatiate avidity for those amusements that every consideration of fear, or suspicion, was disregarded by the numerous spectators. As soon as the assembly was complete, the soldiers, who had secretly been posted round the Circus, received the signal, not of the races, but of a general massacre. The promiscuous carnage continued three hours, without discrimination of strangers or natives, of age or sex, of innocence or guilt; the most moderate accounts state the number of the slain at seven thousand;[92](#) and it is affirmed by some writers, that more than fifteen thousand victims were sacrificed to the manes of Botheric. A foreign merchant, who had probably no concern in his murder, offered his own life and all his wealth, to supply the place of *one* of his two sons; but, while the father hesitated with equal tenderness, while he was doubtful to choose and unwilling to condemn, the

soldiers determined his suspense by plunging their daggers at the same moment into the breasts of the defenceless youths. The apology of the assassins that they were obliged to produce the prescribed number of heads serves only to increase, by an appearance of order and design, the horrors of the massacre which was executed by the commands of Theodosius. The guilt of the emperor is aggravated by his long and frequent residence at Thessalonica. The situation of the unfortunate city, the aspect of the streets and buildings, the dress and faces of the inhabitants, were familiar and even present to his imagination; and Theodosius possessed a quick and lively sense of the existence of the people whom he destroyed.[93](#)

The respectful attachment of the emperor for the orthodox clergy had disposed him to love and admire the character of Ambrose; who united all the episcopal virtues in the most eminent degree. The friends and ministers of Theodosius imitated the example of their sovereign; and he observed, with more surprise than displeasure, that all his secret counsels were immediately communicated to the archbishop; who acted from the laudable persuasion that every measure of civil government may have some connection with the glory of God and the interest of the true religion. The monks and populace of Callinicum, an obscure town on the frontier of Persia, excited by their own fanaticism and by that of their bishop, had tumultuously burnt a conventicle of the Valentinians and a synagogue of the Jews. The seditious prelate was condemned by the magistrate of the province either to rebuild the synagogue or to repay the damage, and this moderate sentence was confirmed by the emperor. But it was not confirmed by the archbishop of Milan.[94](#) He dictated an epistle of censure and reproach, more suitable, perhaps, if the emperor had received the mark of circumcision and renounced the faith of his baptism. Ambrose considers the toleration of the Jewish, as the persecution of the Christian, religion; boldly declares that he himself and every true believer would eagerly dispute with the bishop of Callinicum the merit of the deed and the crown of martyrdom; and laments, in the most pathetic terms, that the execution of the sentence would be fatal to the fame and salvation of Theodosius. As this private admonition did not produce an immediate effect, the archbishop, from his pulpit,[95](#) publicly addressed the emperor on his throne;[96](#) nor would he consent to offer the oblation of the altar, till he had obtained from Theodosius a solemn and positive declaration, which secured the impunity of the bishop and monks of Callinicum. The recantation of Theodosius was sincere;[97](#) and, during the term of his residence at Milan, his affection for Ambrose was continually increased by the habits of pious and familiar conversation.

When Ambrose was informed of the massacre of Thessalonica,[97a](#) his mind was filled with horror and anguish. He retired into the country to indulge his grief, and to avoid the presence of Theodosius. But, as the archbishop was satisfied that a timid silence would render him the accomplice of his guilt, he represented, in a private letter, the enormity of the crime; which could only be effaced by the tears of penitence. The

episcopal vigour of Ambrose was tempered by prudence; and he contented himself with signifying⁹⁸ an indirect sort of excommunication, by the assurance that he had been warned in a vision not to offer the oblation in the name or in the presence of Theodosius; and by the advice that he would confine himself to the use of prayer, without presuming to approach the altar of Christ or to receive the holy eucharist with those hands that were still polluted with the blood of an innocent people. The emperor was deeply affected by his own reproaches and by those of his spiritual father; and, after he had bewailed the mischievous and irreparable consequences of his rash fury, he proceeded, in the accustomed manner, to perform his devotions in the great church of Milan. He was stopped in the porch by the archbishop; who, in the tone and language of an ambassador of Heaven, declared to his sovereign that private contrition was not sufficient to atone for a public fault or to appease the justice of the offended Deity. Theodosius humbly represented that, if he had contracted the guilt of homicide, David, the man after God's own heart, had been guilty, not only of murder, but of adultery. "You have imitated David in his crime, imitate then his repentance," was the reply of the undaunted Ambrose. The rigorous conditions of peace and pardon were accepted; and the public penance of the emperor Theodosius has been recorded as one of the most honourable events in the annals of the church. According to the mildest rules of ecclesiastical discipline which were established in the fourth century the crime of homicide was expiated by the penitence of twenty years;⁹⁹ and, as it was impossible, in the period of human life, to purge the accumulated guilt of the massacre of Thessalonica, the murderer should have been excluded from the holy communion till the hour of his death. But the archbishop, consulting the maxims of religious policy, granted some indulgence to the rank of his illustrious penitent, who humbled in the dust the pride of the diadem; and the public edification might be admitted as a weighty reason to abridge the duration of his punishment. It was sufficient that the emperor of the Romans, stripped of the ensigns of royalty, should appear in a mournful and suppliant posture; and that, in the midst of the church of Milan, he should humbly solicit, with sighs and tears, the pardon of his sins.¹⁰⁰ In this spiritual cure, Ambrose employed the various methods of mildness and severity. After a delay of about eight months, Theodosius was restored to the communion of the faithful; and the edict, which interposes a salutary interval of thirty days between the sentence and the execution, may be accepted as the worthy fruits of his repentance.¹⁰¹ Posterity has applauded the virtuous firmness of the archbishop; and the example of Theodosius may prove the beneficial influence of those principles which could force a monarch, exalted above the apprehension of human punishment, to respect the laws, and ministers, of an invisible Judge. "The prince," says Montesquieu, "who is actuated by the hopes and fears of religion, may be compared to a lion, docile only to the voice, and tractable to the hand, of his keeper."¹⁰² The motions of the royal animal will therefore depend on the inclination and interest of the man who has acquired such dangerous authority over him; and the priest who holds in his hand the conscience of a king may inflame or moderate his sanguinary passions. The cause of humanity, and that of persecution, have been asserted by the same Ambrose, with equal energy and

with equal success.

After the defeat and death of the tyrant of Gaul, the Roman world was in the possession of Theodosius. He derived from the choice of Gratian his honourable title to the provinces of the East; he had acquired the West by the right of conquest; and the three years which he spent in Italy were usefully employed to restore the authority of the laws, and to correct the abuses, which had prevailed with impunity under the usurpation of Maximus and the minority of Valentinian. The name of Valentinian was regularly inserted in the public acts; but the tender age, and doubtful faith, of the son of Justina appeared to require the prudent care of an orthodox guardian; and his specious ambition might have excluded the unfortunate youth, without a struggle and almost without a murmur, from the administration, and even from the inheritance, of the empire. If Theodosius had consulted the rigid maxims of interest and policy, his conduct would have been justified by his friends; but the generosity of his behaviour on this memorable occasion has extorted the applause of his most inveterate enemies. He seated Valentinian on the throne of Milan; and, without stipulating any present or future advantages, restored him to the absolute dominion of all the provinces from which he had been driven by the arms of Maximus. To the restitution of his ample patrimony, Theodosius added the free and generous gift of the countries beyond the Alps, which his successful valour had recovered from the assassin of Gratian.[103](#)

Satisfied with the glory which he had acquired, by revenging the death of his benefactor and delivering the West from the yoke of tyranny, the emperor returned from Milan to Constantinople; and, in the peaceful possession of the East, insensibly relapsed into his former habits of luxury and indolence. Theodosius discharged his obligation to the brother, he indulged his conjugal tenderness to the sister, of Valentinian; and posterity, which admires the pure and singular glory of his elevation, must applaud his unrivalled generosity in the use of victory.

Obelisk of Theodosius (from a photograph)

The empress Justina did not long survive her return to Italy; and, though she beheld the triumph of Theodosius, she was not allowed to influence the government of her son.[104](#) The pernicious attachment to the Arian sect, which Valentinian had imbibed

from her example and instructions, was soon erased by the lessons of a more orthodox education. His growing zeal for the faith of Nice and his filial reverence for the character and authority of Ambrose disposed the Catholics to entertain the most favourable opinion of the virtues of the young emperor of the West.¹⁰⁵ They applauded his chastity and temperance, his contempt of pleasure, his application to business, and his tender affection for his two sisters; which could not, however, seduce his impartial equity to pronounce an unjust sentence against the meanest of his subjects. But this amiable youth, before he had accomplished the twentieth year of his age, was oppressed by domestic treason; and the empire was again involved in the horrors of a civil war. Arbogastes,¹⁰⁶ a gallant soldier of the nation of the Franks, held the second rank in the service of Gratian. On the death of his master, he joined the standard of Theodosius; contributed, by his valour and military conduct, to the destruction of the tyrant; and was appointed, after the victory, master-general of the armies of Gaul. His real merit and apparent fidelity had gained the confidence both of the prince and people; his boundless liberality corrupted the allegiance of the troops; and, whilst he was universally esteemed as the pillar of the state, the bold and crafty Barbarian was secretly determined either to rule or to ruin the empire of the West. The important commands of the army were distributed among the Franks; the creatures of Arbogastes were promoted to all the honours and offices of the civil government; the progress of the conspiracy removed every faithful servant from the presence of Valentinian; and the emperor, without power and without intelligence, insensibly sunk into the precarious and dependent condition of a captive.¹⁰⁷ The indignation which he expressed, though it might arise only from the rash and impatient temper of youth, may be candidly ascribed to the generous spirit of a prince who felt that he was not unworthy to reign. He secretly invited the archbishop of Milan to undertake the office of a mediator, as the pledge of his sincerity and the guardian of his safety. He contrived to apprise the emperor of the East of his helpless situation; and he declared that, unless Theodosius could speedily march to his assistance, he must attempt to escape from the palace, or rather prison, of Vienna in Gaul, where he had imprudently fixed his residence in the midst of the hostile faction. But the hopes of relief were distant and doubtful; and, as every day furnished some new provocation, the emperor, without strength or counsel, too hastily resolved to risk an immediate contest with his powerful general. He received Arbogastes on the throne; and, as the count approached with some appearance of respect, delivered to him a paper, which dismissed him from all his employments. "My authority," replied Arbogastes with insulting coolness, "does not depend on the smile, or the frown, of a monarch;" and he contemptuously threw the paper on the ground.¹⁰⁸ The indignant monarch snatched at the sword of one of the guards, which he struggled to draw from its scabbard; and it was not without some degree of violence that he was prevented from using the deadly weapon against his enemy, or against himself. A few days after this extraordinary quarrel, in which he had exposed his resentment and his weakness, the unfortunate Valentinian was found strangled in his apartment; and some pains were employed to disguise the manifest guilt of Arbogastes, and to persuade the world that the death of the young

emperor had been the voluntary effect of his own despair.[109](#) His body was conducted with decent pomp to the sepulchre of Milan; and the archbishop pronounced a funeral oration, to commemorate his virtue and his misfortunes.[110](#) On this occasion, the humanity of Ambrose tempted him to make a singular breach in his theological system, and to comfort the weeping sisters of Valentinian, by the firm assurance that their pious brother, though he had not received the sacrament of baptism, was introduced, without difficulty, into the mansions of eternal bliss.[111](#)

The prudence of Arbogastes had prepared the success of his ambitious designs; and the provincials, in whose breasts every sentiment of patriotism or loyalty was extinguished, expected, with tame resignation, the unknown master, whom the choice of a Frank might place on the Imperial throne. But some remains of pride and prejudice still opposed the elevation of Arbogastes himself; and the judicious Barbarian thought it more advisable to reign under the name of some dependent Roman. He bestowed the purple on the rhetorician Eugenius;[112](#) whom he had already raised from the place of his domestic secretary to the rank of master of the offices.[112a](#) In the course both of his private and public service, the count had always approved the attachment and abilities of Eugenius; his learning and eloquence, supported by the gravity of his manners, recommended him to the esteem of the people; and the reluctance with which he seemed to ascend the throne may inspire a favourable prejudice of his virtue and moderation. The ambassadors of the new emperor were immediately despatched to the court of Theodosius, to communicate, with affected grief, the unfortunate accident of the death of Valentinian; and, without mentioning the name of Arbogastes, to request that the monarch of the East would embrace, as his lawful colleague, the respectable citizen who had obtained the unanimous suffrage of the armies and provinces of the West.[113](#) Theodosius was justly provoked that the perfidy of a Barbarian should have destroyed, in a moment, the labours and the fruit of his former victory; and he was excited by the tears of his beloved wife[114](#) to revenge the fate of her unhappy brother and once more to assert by arms the violated majesty of the throne. But, as the second conquest of the West was a task of difficulty and danger, he dismissed, with splendid presents and an ambiguous answer, the ambassadors of Eugenius; and almost two years were consumed in the preparations of the civil war. Before he formed any decisive resolution, the pious emperor was anxious to discover the will of Heaven; and, as the progress of Christianity had silenced the oracles of Delphi and Dodona, he consulted an Egyptian monk, who possessed, in the opinion of the age, the gift of miracles and the knowledge of futurity. Eutropius, one of the favourite eunuchs of the palace of Constantinople, embarked for Alexandria, from whence he sailed up the Nile as far as the city of Lycopolis, or of Wolves, in the remote province of Thebais.[115](#) In the neighbourhood of that city, and on the summit of a lofty mountain, the holy John[116](#) had constructed, with his own hands, an humble cell, in which he had dwelt above fifty years, without opening his door, without seeing the face of a woman, and without tasting any food that had been

prepared by fire or any human art. Five days of the week he spent in prayer and meditation; but on Saturdays and Sundays he regularly opened a small window, and gave audience to the crowd of suppliants who successively flowed from every part of the Christian world. The eunuch of Theodosius approached the window with respectful steps, proposed his questions concerning the event of the civil war, and soon returned with a favourable oracle, which animated the courage of the emperor by the assurance of a bloody but infallible victory.¹¹⁷ The accomplishment of the prediction was forwarded by all the means that human prudence could supply. The industry of the two master-generals, Stilicho and Timasius, was directed to recruit the numbers, and to revive the discipline, of the Roman legions. The formidable troops of Barbarians marched under the ensigns of their national chieftains. The Iberian, the Arab, and the Goth, who gazed on each other with mutual astonishment, were enlisted in the service of the same prince; and the renowned Alaric acquired, in the school of Theodosius, the knowledge of the art of war which he afterwards so fatally exerted for the destruction of Rome.¹¹⁸

The emperor of the West, or, to speak more properly, his general Arbogastes, was instructed by the misconduct and misfortune of Maximus, how dangerous it might prove to extend the line of defence against a skilful antagonist, who was free to press or to suspend, to contract or to multiply, his various methods of attack.¹¹⁹ Arbogastes fixed his station on the confines of Italy: the troops of Theodosius were permitted to occupy without resistance the provinces of Pannonia as far as the foot of the Julian Alps; and even the passages of the mountains were negligently, or perhaps artfully, abandoned to the bold invader. He descended from the hills, and beheld, with some astonishment, the formidable camp of the Gauls and Germans that covered with arms and tents the open country which extends to the walls of Aquileia and the banks of the Frigidus,¹²⁰ or Cold River.¹²¹ This narrow theatre of the war, circumscribed by the Alps and the Hadriatic, did not allow much room for the operations of military skill; the spirit of Arbogastes would have disdained a pardon; his guilt extinguished the hope of a negotiation; and Theodosius was impatient to satisfy his glory and revenge by the chastisement of the assassins of Valentinian. Without weighing the natural and artificial obstacles that opposed his efforts, the emperor of the East immediately attacked the fortifications of his rivals, assigned the post of honourable danger to the Goths, and cherished a secret wish that the bloody conflict might diminish the pride and numbers of the conquerors. Ten thousand of those auxiliaries, and Bacurius, general of the Iberians, died bravely on the field of battle. But the victory was not purchased by their blood; the Gauls maintained their advantage; and the approach of night protected the disorderly flight, or retreat, of the troops of Theodosius. The emperor retired to the adjacent hills; where he passed a disconsolate night, without sleep, without provisions, and without hopes;¹²² except that strong assurance which, under the most desperate circumstances, the independent mind may derive from the contempt of fortune and of life. The triumph of Eugenius was celebrated by the

insolent and dissolute joy of his camp; whilst the active and vigilant Arbogastes secretly detached a considerable body of troops, to occupy the passes of the mountains, and to encompass the rear of the Eastern army. The dawn of day discovered to the eyes of Theodosius the extent and the extremity of his danger: but his apprehensions were soon dispelled by a friendly message from the leaders of those troops, who expressed their inclination to desert the standard of the tyrant. The honourable and lucrative rewards, which they stipulated as the price of their perfidy, were granted without hesitation; and, as ink and paper could not easily be procured, the emperor subscribed, on his own tablets, the ratification of the treaty. The spirit of his soldiers was revived by this seasonable reinforcement; and they again marched with confidence, to surprise the camp of a tyrant whose principal officers appeared to distrust either the justice or the success of his arms. In the heat of the battle, a violent tempest,[123](#) such as is often felt among the Alps, suddenly arose from the East. The army of Theodosius was sheltered by their position from the impetuosity of the wind, which blew a cloud of dust in the faces of the enemy, disordered their ranks, wrested their weapons from their hands, and diverted or repelled their ineffectual javelins. This accidental advantage was skilfully improved; the violence of the storm was magnified by the superstitious terrors of the Gauls; and they yielded without shame to the invisible powers of heaven, who seemed to militate on the side of the pious emperor. His victory was decisive; and the deaths of his two rivals were distinguished only by the difference of their characters. The rhetorician Eugenius, who had almost acquired the dominion of the world, was reduced to implore the mercy of the conqueror; and the unrelenting soldiers separated his head from his body, as he lay prostrate at the feet of Theodosius. Arbogastes, after the loss of a battle in which he had discharged the duties of a soldier and a general, wandered several days among the mountains. But, when he was convinced that his cause was desperate, and his escape impracticable, the intrepid Barbarian imitated the example of the ancient Romans, and turned his sword against his own breast. The fate of the empire was determined in a narrow corner of Italy, and the legitimate successor of the house of Valentinian embraced the archbishop of Milan, and graciously received the submission of the provinces of the West. Those provinces were involved in the guilt of rebellion; while the inflexible courage of Ambrose alone had resisted the claims of successful usurpation. With a manly freedom, which might have been fatal to any other subject, the archbishop rejected the gifts of Eugenius, declined his correspondence, and withdrew himself from Milan, to avoid the odious presence of a tyrant, whose downfall he predicted in discreet and ambiguous language. The merit of Ambrose was applauded by the conqueror, who secured the attachment of the people by his alliance with the church; and the clemency of Theodosius is ascribed to the humane intercession of the archbishop of Milan.[124](#)

After the defeat of Eugenius, the merit, as well as the authority, of Theodosius was cheerfully acknowledged by all the inhabitants of the Roman world. The experience of his past conduct encouraged the most pleasing expectations of his future reign; and the age of the emperor, which did not exceed fifty years, seemed to extend the prospect of

the public felicity. His death, only four months after his victory, was considered by the people as an unforeseen and fatal event, which destroyed in a moment the hopes of the rising generation. But the indulgence of ease and luxury had secretly nourished the principles of disease.¹²⁵ The strength of Theodosius was unable to support the sudden and violent transition from the palace to the camp; and the increasing symptoms of a dropsy announced the speedy dissolution of the emperor. The opinion, and perhaps the interest, of the public had confirmed the division of the Eastern and Western empires; and the two royal youths, Arcadius and Honorius, who had already obtained, from the tenderness of their father, the title of Augustus, were destined to fill the thrones of Constantinople and of Rome. Those princes were not permitted to share the danger and glory of the civil war;¹²⁶ but, as soon as Theodosius had triumphed over his unworthy rivals, he called his younger son Honorius to enjoy the fruits of the victory and to receive the sceptre of the West from the hands of his dying father. The arrival of Honorius at Milan was welcomed by a splendid exhibition of the games of the Circus; and the emperor, though he was oppressed by the weight of his disorder, contributed by his presence to the public joy. But the remains of his strength were exhausted by the painful effort which he made to assist at the spectacles of the morning. Honorius supplied, during the rest of the day, the place of his father; and the great Theodosius expired in the ensuing night. Notwithstanding the recent animosities of a civil war, his death was universally lamented. The Barbarians, whom he had vanquished, and the churchmen, by whom he had been subdued, celebrated with loud and sincere applause, the qualities of the deceased emperor which appeared the most valuable in their eyes. The Romans were terrified by the impending dangers of a feeble and divided administration; and every disgraceful moment of the unfortunate reigns of Arcadius and Honorius revived the memory of their irreparable loss.

In the faithful picture of the virtues of Theodosius, his imperfections have not been dissembled: the act of cruelty, and the habits of indolence, which tarnished the glory of one of the greatest of the Roman princes. An historian, perpetually adverse to the fame of Theodosius, has exaggerated his vices and their pernicious effects; he boldly asserts that every rank of subjects imitated the effeminate manners of their sovereign; that every species of corruption polluted the course of public and private life; and that the feeble restraints of order and decency were insufficient to resist the progress of that degenerate spirit which sacrifices, without a blush, the consideration of duty and interest to the base indulgence of sloth and appetite.¹²⁷ The complaints of contemporary writers, who deplore the increase of luxury and depravation of manners, are commonly expressive of their peculiar temper and situation. There are few observers who possess a clear and comprehensive view of the revolutions of society; and who are capable of discovering the nice and secret springs of action which impel, in the same uniform direction, the blind and capricious passions of a multitude of individuals. If it can be affirmed, with any degree of truth, that the luxury of the Romans was more shameless and dissolute in the reign of Theodosius than in the age of Constantine, perhaps, or of Augustus, the alteration cannot be ascribed to any

beneficial improvements, which had gradually increased the stock of national riches. A long period of calamity or decay must have checked the industry, and diminished the wealth, of the people; and their profuse luxury must have been the result of that indolent despair which enjoys the present hour and declines the thoughts of futurity. The uncertain condition of their property discouraged the subjects of Theodosius from engaging in those useful and laborious undertakings which require an immediate expense and promise a slow and distant advantage. The frequent examples of ruin and desolation tempted them not to spare the remains of a patrimony which might, every hour, become the prey of the rapacious Goth. And the mad prodigality which prevails in the confusion of a shipwreck or a siege may serve to explain the progress of luxury amidst the misfortunes and terrors of a sinking nation.

The effeminate luxury which infected the manners of courts and cities had instilled a secret and destructive poison into the camps of the legions; and their degeneracy has been marked by the pen of a military writer who had accurately studied the genuine and ancient principles of Roman discipline. It is the just and important observation of Vegetius that the infantry was invariably covered with defensive armour, from the foundation of the city to the reign of the emperor Gratian. The relaxation of discipline and the disuse of exercise rendered the soldiers less able, and less willing, to support the fatigues of the service; they complained of the weight of the armour, which they seldom wore; and they successfully obtained the permission of laying aside both their cuirasses and their helmets. The heavy weapons of their ancestors, the short sword and the formidable *pilum*, which had subdued the world, insensibly dropped from their feeble hands. As the use of the shield is incompatible with that of the bow, they reluctantly marched into the field; condemned to suffer either the pain of wounds or the ignominy of flight, and always disposed to prefer the more shameful alternative. The cavalry of the Goths, the Huns and the Alani had felt the benefits, and adopted the use, of defensive armour; and, as they excelled in the management of missile weapons, they easily overwhelmed the naked and trembling legions, whose heads and breasts were exposed, without defence, to the arrows of the Barbarians. The loss of armies, the destruction of cities, and the dishonour of the Roman name ineffectually solicited the successors of Gratian to restore the helmets and cuirasses of the infantry. The enervated soldiers abandoned their own and the public defence; and their pusillanimous indolence may be considered as the immediate cause of the downfall of the empire.[128](#)

CHAPTER XXVIII

Final Destruction of Paganism — Introduction of the Worship of Saints, and Relics, among the Christians

The ruin of Paganism,¹ in the age of Theodosius, is perhaps the only example of the total extirpation of any ancient and popular superstition; and may therefore deserve to be considered as a singular event in the history of the human mind. The Christians, more especially the clergy, had impatiently supported the prudent delays of Constantine and the equal toleration of the elder Valentinian; nor could they deem their conquest perfect or secure, as long as their adversaries were permitted to exist. The influence which Ambrose and his brethren had acquired over the youth of Gratian and the piety of Theodosius was employed to infuse the maxims of persecution into the breasts of their Imperial proselytes. Two specious principles of religious jurisprudence were established, from whence they deduced a direct and rigorous conclusion against the subjects of the empire who still adhered to the ceremonies of their ancestors: *that* the magistrate is, in some measure, guilty of the crimes which he neglects to prohibit or to punish; and, *that* the idolatrous worship of fabulous deities and real demons is the most abominable crime against the supreme majesty of the Creator. The laws of Moses and the examples of Jewish history² were hastily, perhaps erroneously, applied by the clergy to the mild and universal reign of Christianity.³ The zeal of the emperors was excited to vindicate their own honour, and that of the Deity; and the temples of the Roman world were subverted, about sixty years after the conversion of Constantine.

From the age of Numa to the reign of Gratian the Romans preserved the regular succession of the several colleges of the sacerdotal order.⁴ Fifteen Pontiffs exercised their supreme jurisdiction over all things and persons that were consecrated to the service of the gods; and the various questions which perpetually arose in a loose and traditionary system were submitted to the judgment of their holy tribunal. Fifteen grave and learned Augurs observed the face of the heavens, and prescribed the actions of heroes, according to the flight of birds. Fifteen keepers of the Sybilline books (their name of Quindecemvirs was derived from their number) occasionally consulted the history of future, and as it should seem, of contingent, events. Six Vestals devoted their virginity to the guard of the sacred fire and of the unknown pledges of the duration of Rome; which no mortal had been suffered to behold with impunity.⁵ Seven Epulos⁶ prepared the table of the gods, conducted the solemn procession, and regulated the ceremonies of the annual festival. The three Flamens⁷ of Jupiter, of Mars, and of Quirinus were considered as the peculiar ministers of the three most powerful deities who watched over the fate of Rome and of the universe. The King of the Sacrifices represented the person of Numa, and of his successors, in the religious functions which could be performed only by royal hands. The confraternities of the Salians, the Lupercals, &c., practised such rites as might extort a smile of contempt from every reasonable man, with a lively confidence of recommending themselves to the favour of the immortal gods. The authority which the Roman priests had formerly obtained in the counsels of the republic was gradually abolished by the establishment of monarchy and the removal of the seat of empire. But the dignity of their sacred

character was still protected by the laws and manners of their country; and they still continued, more especially the college of pontiffs, to exercise in the capital, and sometimes in the provinces, the rights of their ecclesiastical and civil jurisdiction. Their robes of purple, chariots of state, and sumptuous entertainments attracted the admiration of the people; and they received, from the consecrated lands and the public revenue, an ample stipend, which liberally supported the splendour of the priesthood and all the expenses of the religious worship of the state. As the service of the altar was not incompatible with the command of armies, the Romans, after their consulships and triumphs, aspired to the place of pontiff or of augur; the seats of Cicero⁸ and Pompey were filled, in the fourth century, by the most illustrious members of the senate; and the dignity of their birth reflected additional splendour on their sacerdotal character. The fifteen priests who composed the college of pontiffs enjoyed a more distinguished rank as the companions of their sovereign; and the Christian emperors condescended to accept the robe and ensigns which were appropriated to the office of supreme pontiff. But, when Gratian ascended the throne, more scrupulous, or more enlightened, he sternly rejected those profane symbols;⁹ applied to the service of the state, or of the church, the revenues of the priests and vestals; abolished their honours and immunities; and dissolved the ancient fabric of Roman superstition, which was supported by the opinions and habits of eleven hundred years.¹⁰ Paganism was still the constitutional religion of the senate. The hall, or temple, in which they assembled, was adorned by the statue and altar of Victory;¹¹ a majestic female standing on a globe, with flowing garments, expanded wings, and a crown of laurel in her outstretched hand.¹² The senators were sworn on the altar of the goddess to observe the laws of the emperor and of the empire; and a solemn offering of wine and incense was the ordinary prelude of their public deliberations.¹³ The removal of this ancient monument was the only injury which Constantius had offered to the superstition of the Romans. The altar of Victory was again restored by Julian, tolerated by Valentinian, and once more banished from the senate by the zeal of Gratian.¹⁴ But the emperor yet spared the statues of the gods, which were exposed to the public veneration; four hundred and twenty-four temples, or chapels, still remained to satisfy the devotion of the people; and in every quarter of Rome the delicacy of the Christians was offended by the fumes of idolatrous sacrifice.¹⁵

But the Christians formed the least numerous party in the senate of Rome;¹⁶ and it was only by their absence that they could express their dissent from the legal, though profane, acts of a Pagan majority. In that assembly, the dying embers of freedom were, for a moment, revived and inflamed by the breath of fanaticism. Four respectable deputations were successively voted to the Imperial court¹⁷ to represent the grievances of the priesthood and the senate; and to solicit the restoration of the altar of Victory. The conduct of this important business was entrusted to the eloquent Symmachus,¹⁸ a wealthy and noble senator, who united the sacred characters of pontiff and augur with the civil dignities of proconsul of Africa and prefect of the city.

The breast of Symmachus was animated by the warmest zeal for the cause of expiring Paganism; and his religious antagonists lamented the abuse of his genius, and the inefficacy of his moral virtues.¹⁹ The orator, whose petition is extant to the emperor Valentinian, was conscious of the difficulty and danger of the office which he had assumed. He cautiously avoids every topic which might appear to reflect on the religion of his sovereign; humbly declares that prayers and entreaties are his only arms; and artfully draws his arguments from the schools of rhetoric rather than from those of philosophy. Symmachus endeavours to seduce the imagination of a young prince, by displaying the attributes of the goddess of victory; he insinuates that the confiscation of the revenues, which were consecrated to the service of the gods, was a measure unworthy of his liberal and disinterested character; and he maintains that the Roman sacrifices would be deprived of their force and energy, if they were no longer celebrated at the expense, as well as in the name, of the republic. Even scepticism is made to supply an apology for superstition. The great and incomprehensible *secret* of the universe eludes the inquiry of man. Where reason cannot instruct, custom may be permitted to guide; and every nation seems to consult the dictates of prudence by a faithful attachment to those rites and opinions which have received the sanction of ages. If those ages have been crowned with glory and prosperity, if the devout people has frequently obtained the blessings which they have solicited at the altars of the gods, it must appear still more advisable to persist in the same salutary practice; and not to risk the unknown perils that may attend any rash innovations. The test of antiquity and success was applied with singular advantage to the religion of Numa; and Rome herself, the celestial genius that presided over the fates of the city, is introduced by the orator to plead her own cause before the tribunal of the emperors. “Most excellent princes,” says the venerable matron, “fathers of your country! pity and respect my age, which has hitherto flowed in an uninterrupted course of piety. Since I do not repent, permit me to continue in the practice of my ancient rites. Since I am born free, allow me to enjoy my domestic institutions. This religion has reduced the world under my laws. These rites have repelled Hannibal from the city, and the Gauls from the capitol. Were my grey hairs reserved for such intolerable disgrace? I am ignorant²⁰ of the new system that I am required to adopt; but I am well assured that the correction of old age is always an ungrateful and ignominious office.”²¹ The fears of the people supplied what the discretion of the orator had suppressed; and the calamities which afflicted, or threatened, the declining empire were unanimously imputed, by the Pagans, to the new religion of Christ and of Constantine.

But the hopes of Symmachus were repeatedly baffled by the firm and dexterous opposition of the archbishop of Milan; who fortified the emperors against the fallacious eloquence of the advocate of Rome. In this controversy, Ambrose condescends to speak the language of a philosopher, and to ask, with some contempt, why it should be thought necessary to introduce an imaginary and invisible power, as the cause of those victories which were sufficiently explained by the valour and discipline of the legions? He justly derides the absurd reverence for antiquity which

could only tend to discourage the improvements of art and to replunge the human race into their original barbarism. From thence gradually rising to a more lofty and theological tone, he pronounces that Christianity alone is the doctrine of truth and salvation, and that every mode of Polytheism conducts its deluded votaries, through the paths of error, to the abyss of eternal perdition.²² Arguments like these, when they were suggested by a favourite bishop, had power to prevent the restoration of the altar of Victory; but the same arguments fell, with much more energy and effect, from the mouth of a conqueror; and the gods of antiquity were dragged in triumph at the chariot-wheels of Theodosius.²³ In a full meeting of the senate, the emperor proposed, according to the forms of the republic, the important question, Whether the worship of Jupiter or that of Christ should be the religion of the Romans?²⁴ The liberty of suffrages, which he affected to allow, was destroyed by the hopes and fears that his presence inspired; and the arbitrary exile of Symmachus was a recent admonition that it might be dangerous to oppose the wishes of the monarch. On a regular division of the senate, Jupiter was condemned and degraded by the sense of a very large majority; and it is rather surprising that any members should be found bold enough to declare by their speeches and votes that they were still attached to the interest of an abdicated deity.²⁵ The hasty conversion of the senate must be attributed either to supernatural or to sordid motives; and many of these reluctant proselytes betrayed, on every favourable occasion, their secret disposition to throw aside the mask of odious dissimulation. But they were gradually fixed in the new religion, as the cause of the ancient became more hopeless; they yielded to the authority of the emperor, to the fashion of the times, and to the entreaties of their wives and children,²⁶ who were instigated and governed by the clergy of Rome and the monks of the East. The edifying example of the Anician family was soon imitated by the rest of the nobility: the Bassi, the Paullini, the Gracchi, embraced the Christian religion; and “the luminaries of the world, the venerable assembly of Catos (such are the high-flown expressions of Prudentius), were impatient to strip themselves of their pontifical garment: to cast the skin of the old serpent; to assume the snowy robes of baptismal innocence; and to humble the pride of the consular fasces before the tombs of the martyrs.”²⁷ The citizens, who subsisted by their own industry, and the populace, who were supported by the public liberality, filled the churches of the Lateran and Vatican with an incessant throng of devout proselytes. The decrees of the senate, which proscribed the worship of idols, were ratified by the general consent of the Romans;²⁸ the splendour of the capitol was defaced, and the solitary temples were abandoned to ruin and contempt.²⁹ Rome submitted to the yoke of the Gospel; and the vanquished provinces had not yet lost their reverence for the name and authority of Rome.

The filial piety of the emperors themselves engaged them to proceed, with some caution and tenderness, in the reformation of the eternal city. Those absolute monarchs acted with less regard to the prejudices of the provincials. The pious labour, which had been suspended near twenty years since the death of Constantius,³⁰ was vigorously

resumed, and finally accomplished, by the zeal of Theodosius. Whilst that warlike prince yet struggled with the Goths, not for the glory, but for the safety, of the republic, he ventured to offend a considerable party of his subjects, by some acts which might perhaps secure the protection of Heaven, but which must seem rash and unseasonable in the eye of human prudence. The success of his first experiments against the Pagans encouraged the pious emperor to reiterate and enforce his edicts of proscription; the same laws which had been originally published in the provinces of the East were applied, after the defeat of Maximus, to the whole extent of the Western empire; and every victory of the orthodox Theodosius contributed to the triumph of the Christian and Catholic faith.³¹ He attacked superstition in her most vital part by prohibiting the use of sacrifices, which he declared to be criminal as well as infamous; and, if the terms of his edicts more strictly condemned the impious curiosity which examined the entrails of the victims,³² every subsequent explanation tended to involve, in the same guilt, the general practice of *immolation*, which essentially constituted the religion of the Pagans. As the temples had been erected for the purpose of sacrifice, it was the duty of a benevolent prince to remove from his subjects the dangerous temptation of offending against the laws which he had enacted. A special commission was granted to Cynegius, the Prætorian prefect of the East, and afterwards to the counts Jovius and Gaudentius, two officers of distinguished rank in the West; by which they were directed to shut the temples, to seize or destroy the instruments of idolatry, to abolish the privileges of the priests, and to confiscate the consecrated property for the benefit of the emperor, of the church, or of the army.³³ Here the desolation might have stopped, and the naked edifices, which were no longer employed in the service of idolatry, might have been protected from the destructive rage of fanaticism. Many of those temples were the most splendid and beautiful monuments of Grecian architecture: and the emperor himself was interested not to deface the splendour of his own cities or to diminish the value of his own possessions. Those stately edifices might be suffered to remain as so many lasting trophies of the victory of Christ. In the decline of the arts, they might be usefully converted into magazines, manufactures, or places of public assembly; and perhaps, when the walls of the temple had been sufficiently purified by holy rites, the worship of the true Deity might be allowed to expiate the ancient guilt of idolatry. But, as long as they subsisted, the Pagans fondly cherished the secret hope that an auspicious revolution, a second Julian, might again restore the altars of the gods; and the earnestness with which they addressed their unavailing prayers to the throne³⁴ increased the zeal of the Christian reformers to extirpate, without mercy, the root of superstition. The laws of the emperors exhibit some symptoms of a milder disposition;³⁵ but their cold and languid efforts were insufficient to stem the torrent of enthusiasm and rapine, which was conducted, or rather impelled, by the spiritual rulers of the church. In Gaul, the holy Martin, bishop of Tours,³⁶ marched at the head of his faithful monks, to destroy the idols, the temples, and the consecrated trees of his extensive diocese; and in the execution of this arduous task, the prudent reader will judge whether Martin was

supported by the aid of miraculous powers or of carnal weapons. In Syria, the divine and excellent Marcellus,[37](#) as he is styled by Theodoret, a bishop animated with apostolic fervour, resolved to level with the ground the stately temples within the diocese of Apamea. His attack was resisted by the skill and solidity with which the temple of Jupiter had been constructed. The building was seated on an eminence; on each of the four sides, the lofty roof was supported by fifteen massy columns, sixteen feet in circumference; and the large stones, of which they were composed, were firmly cemented with lead and iron. The force of the strongest and sharpest tools had been tried without effect. It was found necessary to undermine the foundations of the columns, which fell down as soon as the temporary wooden props had been consumed with fire; and the difficulties of the enterprise are described under the allegory of a black demon, who retarded, though he could not defeat, the operations of the Christian engineers. Elated with victory, Marcellus took the field in person against the powers of darkness; a numerous troop of soldiers and gladiators marched under the episcopal banner, and he successively attacked the villages and country temples of the diocese of Apamea. Whenever any resistance or danger was apprehended, the champion of the faith, whose lameness would not allow him either to fight or fly, placed himself at a convenient distance, beyond the reach of darts. But this prudence was the occasion of his death; he was surprised and slain by a body of exasperated rustics; and the synod of the province pronounced, without hesitation, that the holy Marcellus had sacrificed his life in the cause of God. In the support of this cause, the monks, who rushed with tumultuous fury from the desert, distinguished themselves by their zeal and diligence. They deserved the enmity of the Pagans; and some of them might deserve the reproaches of avarice and intemperance: of avarice, which they gratified with holy plunder, and of intemperance, which they indulged at the expense of the people, who foolishly admired their tattered garments, loud psalmody, and artificial paleness.[38](#) A small number of temples was protected by the fears, the venality, the taste, or the prudence, of the civil and ecclesiastical governors. The temple of the celestial Venus at Carthage, whose sacred precincts formed a circumference of two miles, was judiciously converted into a Christian church;[39](#) and a similar consecration has preserved inviolate the majestic dome of the Pantheon at Rome.[40](#) But, in almost every province of the Roman world, an army of fanatics, without authority and without discipline, invaded the peaceful inhabitants; and the ruin of the fairest structures of antiquity still displays the ravages of *those* Barbarians, who alone had time and inclination to execute such laborious destruction.

In this wide and various prospect of devastation, the spectator may distinguish the ruins of the temple of Serapis, at Alexandria.[41](#) Serapis does not appear to have been one of the native gods, or monsters, who sprung from the fruitful soil of superstitious Egypt.[42](#) The first of the Ptolemies had been commanded, by a dream, to import the mysterious stranger from the coast of Pontus, where he had been long adored by the inhabitants of Sinope; but his attributes and his reign were so imperfectly understood

that it became a subject of dispute, whether he represented the bright orb of day or the gloomy monarch of the subterraneous regions.[43](#) The Egyptians, who were obstinately devoted to the religion of their fathers, refused to admit this foreign deity within the walls of their cities.[44](#) But the obsequious priests, who were seduced by the liberality of the Ptolemies, submitted, without resistance, to the power of the god of Pontus; an honourable and domestic genealogy was provided; and this fortunate usurper was introduced into the throne and bed of Osiris,[45](#) the husband of Isis, and the celestial monarch of Egypt. Alexandria, which claimed his peculiar protection, gloried in the name of the city of Serapis. His temple,[46](#) which rivalled the pride and magnificence of the capitol, was erected on the spacious summit of an artificial mount, raised one hundred steps above the level of the adjacent parts of the city; and the interior cavity was strongly supported by arches, and distributed into vaults and subterraneous apartments. The consecrated buildings were surrounded by a quadrangular portico; the stately halls, and exquisite statues, displayed the triumph of the arts; and the treasures of ancient learning were preserved in the famous Alexandrian library, which had arisen with new splendour from its ashes.[47](#) After the edicts of Theodosius had severely prohibited the sacrifices of the Pagans, they were still tolerated in the city and temple of Serapis; and this singular indulgence was imprudently ascribed to the superstitious terrors of the Christians themselves: as if they had feared to abolish those ancient rites which could alone secure the inundations of the Nile, the harvests of Egypt, and the subsistence of Constantinople.[48](#)

At that time[49](#) the archiepiscopal throne of Alexandria was filled by Theophilus,[50](#) the perpetual enemy of peace and virtue; a bold, bad man, whose hands were alternately polluted with gold and with blood. His pious indignation was excited by the honours of Serapis; and the insults which he offered to an ancient chapel of Bacchus[51](#) convinced the Pagans that he meditated a more important and dangerous enterprise. In the tumultuous capital of Egypt, the slightest provocation was sufficient to inflame a civil war. The votaries of Serapis, whose strength and numbers were much inferior to those of their antagonists, rose in arms at the instigation of the philosopher Olympius,[52](#) who exhorted them to die in the defence of the altars of the gods. These Pagan fanatics fortified themselves in the temple, or rather fortress, of Serapis; repelled the besiegers by daring sallies and a resolute defence; and, by the inhuman cruelties which they exercised on their Christian prisoners, obtained the last consolation of despair. The efforts of the prudent magistrate were usefully exerted for the establishment of a truce till the answer of Theodosius should determine the fate of Serapis. The two parties assembled, without arms, in the principal square; and the Imperial rescript was publicly read. But, when a sentence of destruction against the idols of Alexandria was pronounced, the Christians set up a shout of joy and exultation, whilst the unfortunate Pagans, whose fury had given way to consternation, retired with hasty and silent steps, and eluded, by their flight or obscurity, the resentment of their enemies. Theophilus proceeded to demolish the temple of Serapis,

without any other difficulties than those which he found in the weight and solidity of the materials; but these obstacles proved so insuperable that he was obliged to leave the foundations and to content himself with reducing the edifice itself to a heap of rubbish; a part of which was soon afterwards cleared away, to make room for a church erected in honour of the Christian martyrs. The valuable library of Alexandria was pillaged or destroyed; and, near twenty years afterwards, the appearance of the empty shelves excited the regret and indignation of every spectator whose mind was not totally darkened by religious prejudice.⁵³ The compositions of ancient genius, so many of which have irretrievably perished, might surely have been excepted from the wreck of idolatry, for the amusement and instruction of succeeding ages; and either the zeal or the avarice of the archbishop⁵⁴ might have been satiated with the rich spoils which were the reward of his victory. While the images and vases of gold and silver were carefully melted, and those of a less valuable metal were contemptuously broken and cast into the streets, Theophilus laboured to expose the frauds and vices of the ministers of the idols; their dexterity in the management of the loadstone; their secret methods of introducing an human actor into a hollow statue; and their scandalous abuse of the confidence of devout husbands and unsuspecting females.⁵⁵ Charges like these may seem to deserve some degree of credit, as they are not repugnant to the crafty and interested spirit of superstition. But the same spirit is equally prone to the base practice of insulting and calumniating a fallen enemy; and our belief is naturally checked by the reflection that it is much less difficult to invent a fictitious story than to support a practical fraud. The colossal statue of Serapis⁵⁶ was involved in the ruin of his temple and religion. A great number of plates of different metals, artificially joined together, composed the majestic figure of the Deity, who touched on either side the walls of the sanctuary. The aspect of Serapis, his sitting posture, and the sceptre which he bore in his left hand were extremely similar to the ordinary representations of Jupiter. He was distinguished from Jupiter by the basket, or bushel, which was placed on his head; and by the emblematic monster, which he held in his right hand: the head and body of a serpent branching into three tails, which were again terminated by the triple heads of a dog, a lion, and a wolf. It was confidently affirmed that, if any impious hand should dare to violate the majesty of the god, the heavens and the earth would instantly return to their original chaos. An intrepid soldier, animated by zeal and armed with a weighty battle-axe, ascended the ladder; and even the Christian multitude expected, with some anxiety, the event of the combat.⁵⁷ He aimed a vigorous stroke against the cheek of Serapis; the cheek fell to the ground; the thunder was still silent, and both the heavens and the earth continued to preserve their accustomed order and tranquillity. The victorious soldier repeated his blows; the huge idol was overthrown, and broken in pieces; and the limbs of Serapis were ignominiously dragged through the streets of Alexandria. His mangled carcase was burnt in the Amphitheatre, amidst the shouts of the populace; and many persons attributed their conversion to this discovery of the impotence of their tutelar deity. The popular modes of religion that propose any visible and material objects of worship have the advantage of adapting and familiarising themselves to the senses of mankind; but this advantage is

counterbalanced by the various and inevitable accidents to which the faith of the idolater is exposed. It is scarcely possible that, in every disposition of mind, he should preserve his implicit reverence for the idols or the relics which the naked eye and the profane hand are unable to distinguish from the most common productions of art or nature; and, if, in the hour of danger, their secret and miraculous virtue does not operate for their own preservation, he scorns the vain apologies of his priest, and justly derides the object, and the folly, of his superstitious attachment.[58](#) After the fall of Serapis, some hopes were still entertained by the Pagans that the Nile would refuse his annual supply to the impious masters of Egypt; and the extraordinary delay of the inundation seemed to announce the displeasure of the river-god. But this delay was soon compensated by the rapid swell of the waters. They suddenly rose to such an unusual height as to comfort the discontented party with the pleasing expectation of a deluge; till the peaceful river again subsided to the well-known and fertilising level of sixteen cubits, or about thirty English feet.[59](#)

The temples of the Roman empire were deserted, or destroyed; but the ingenious superstition of the Pagans still attempted to elude the laws of Theodosius, by which all sacrifices had been severely prohibited. The inhabitants of the country, whose conduct was less exposed to the eye of malicious curiosity, disguised their *religious*, under the appearance of *convivial*, meetings. On the days of solemn festivals, they assembled in great numbers under the spreading shade of some consecrated trees; sheep and oxen were slaughtered and roasted; and this rural entertainment was sanctified by the use of incense, and by the hymns which were sung in honour of the gods. But it was alleged that, as no part of the animal was made a burnt-offering, as no altar was provided to receive the blood, and as the previous oblation of salt cakes and the concluding ceremony of libations were carefully omitted, these festal meetings did not involve the guests in the guilt, or penalty, of an illegal sacrifice.[60](#) Whatever might be the truth of the facts or the merit of the distinction,[61](#) these vain pretences were swept away by the last edict of Theodosius; which inflicted a deadly wound on the superstition of the Pagans.[62](#) This prohibitory law is expressed in the most absolute and comprehensive terms. “It is our will and pleasure,” says the emperor, “that none of our subjects, whether magistrates or private citizens, however exalted or however humble may be their rank and condition, shall presume, in any city or in any place, to worship an inanimate idol by the sacrifice of a guiltless victim.” The act of sacrificing and the practice of divination by the entrails of the victim are declared (without any regard to the object of the inquiry) a crime of high-treason against the state; which can be expiated only by the death of the guilty. The rites of Pagan superstition, which might seem less bloody and atrocious, are abolished, as highly injurious to the truth and honour of religion; luminaries, garlands, frankincense, and libations of wine are specially enumerated and condemned; and the harmless claims of the domestic genius, of the household gods, are included in this rigorous proscription. The use of any of these profane and illegal ceremonies subjects the offender to the forfeiture of the house

or estate where they have been performed; and, if he has artfully chosen the property of another for the scene of his impiety, he is compelled to discharge, without delay, a heavy fine of twenty-five pounds of gold, or more than one thousand pounds sterling. A fine, not less considerable, is imposed on the connivance of the secret enemies of religion, who shall neglect the duty of their respective stations, either to reveal or to punish the guilt of idolatry. Such was the persecuting spirit of the laws of Theodosius, which were repeatedly enforced by his sons and grandsons, with the loud and unanimous applause of the Christian world.[63](#)

In the cruel reigns of Decius and Diocletian, Christianity had been proscribed, as a revolt from the ancient and hereditary religion of the empire; and the unjust suspicions which were entertained of a dark and dangerous faction were, in some measure, countenanced by the inseparable union and rapid conquests of the Catholic church. But the same excuses of fear and ignorance cannot be applied to the Christian emperors, who violated the precepts of humanity and of the Gospel. The experience of ages had betrayed the weakness, as well as folly, of Paganism; the light of reason and of faith had already exposed, to the greatest part of mankind, the vanity of idols; and the declining sect, which still adhered to their worship, might have been permitted to enjoy, in peace and obscurity, the religious customs of their ancestors. Had the Pagans been animated by the undaunted zeal which possessed the minds of the primitive believers, the triumph of the church must have been stained with blood; and the martyrs of Jupiter and Apollo might have embraced the glorious opportunity of devoting their lives and fortunes at the foot of their altars. But such obstinate zeal was not congenial to the loose and careless temper of Polytheism. The violent and repeated strokes of the orthodox princes were broken by the soft and yielding substance against which they were directed; and the ready obedience of the Pagans protected them from the pains and penalties of the Theodosian Code.[64](#) Instead of asserting that the authority of the gods was superior to that of the emperor, they desisted, with a plaintive murmur, from the use of those sacred rites which their sovereign had condemned. If they were sometimes tempted, by a sally of passion or by the hopes of concealment, to indulge their favourite superstition, their humble repentance disarmed the severity of the Christian magistrate; and they seldom refused to atone for their rashness by submitting, with some secret reluctance, to the yoke of the Gospel. The churches were filled with the increasing multitude of these unworthy proselytes, who had conformed, from temporal motives, to the reigning religion; and, whilst they devoutly imitated the postures, and recited the prayers, of the faithful, they satisfied their conscience by the silent and sincere invocation of the gods of antiquity.[65](#) If the Pagans wanted patience to suffer, they wanted spirit to resist; and the scattered myriads, who deplored the ruin of the temples, yielded, without a contest, to the fortune of their adversaries. The disorderly opposition[66](#) of the peasants of Syria, and the populace of Alexandria, to the rage of private fanaticism was silenced by the name and authority of the emperor. The Pagans of the West, without contributing to the elevation of Eugenius, disgraced, by their partial attachment, the cause and character

of the usurper. The clergy vehemently exclaimed that he aggravated the crime of rebellion by the guilt of apostasy; that, by his permission, the altar of Victory was again restored; and that the idolatrous symbols of Jupiter and Hercules were displayed in the field against the invincible standard of the cross. But the vain hopes of the Pagans were soon annihilated by the defeat of Eugenius; and they were left exposed to the resentment of the conqueror, who laboured to deserve the favour of heaven by the extirpation of idolatry.[67](#)

A nation of slaves is always prepared to applaud the clemency of their master, who, in the abuse of absolute power, does not proceed to the last extremes of injustice and oppression. Theodosius might undoubtedly have proposed to his Pagan subjects the alternative of baptism or of death; and the eloquent Libanius has praised the moderation of a prince, who never enacted, by any positive law, that all his subjects should immediately embrace and practise the religion of their sovereign.[68](#) The profession of Christianity was not made an essential qualification for the enjoyment of the civil rights of society, nor were any peculiar hardships imposed on the sectaries who credulously received the fables of Ovid and obstinately rejected the miracles of the Gospel. The palace, the schools, the army, and the senate were filled with declared and devout Pagans; they obtained, without distinction, the civil and military honours of the empire. Theodosius distinguished his liberal regard for virtue and genius, by the consular dignity which he bestowed on Symmachus,[69](#) and by the personal friendship which he expressed to Libanius;[70](#) and the two eloquent apologists of Paganism were never required either to change or to dissemble their religious opinions. The Pagans were indulged in the most licentious freedom of speech and writing; the historical and philosophical remains of Eunapius, Zosimus,[71](#) and the fanatic teachers of the school of Plato, betray the most furious animosity, and contain the sharpest invectives, against the sentiments and conduct of their victorious adversaries. If these audacious libels were publicly known, we must applaud the good sense of the Christian princes who viewed, with a smile of contempt, the last struggles of superstition and despair.[72](#) But the Imperial laws which prohibited the sacrifices and ceremonies of Paganism were rigidly executed; and every hour contributed to destroy the influence of a religion which was supported by custom rather than by argument. The devotion of the poet or the philosopher may be secretly nourished by prayer, meditation, and study; but the exercise of public worship appears to be the only solid foundation of the religious sentiments of the people, which derive their force from imitation and habit. The interruption of that public exercise may consummate, in the period of a few years, the important work of a national revolution. The memory of theological opinions cannot long be preserved without the artificial helps of priests, of temples, and of books.[73](#) The ignorant vulgar, whose minds are still agitated by the blind hopes and terrors of superstition, will be soon persuaded by their superiors to direct their vows to the reigning deities of the age; and will insensibly imbibe an ardent zeal for the support and propagation of the new doctrine, which spiritual hunger at first compelled them to

accept. The generation that arose in the world after the promulgation of the Imperial laws was attracted within the pale of the Catholic church: and so rapid, yet so gentle, was the fall of Paganism that only twenty-eight years after the death of Theodosius the faint and minute vestiges were no longer visible to the eye of the legislator.[74](#)

The ruin of the Pagan religion is described by the sophists as a dreadful and amazing prodigy which covered the earth with darkness and restored the ancient dominion of chaos and of night. They relate, in solemn and pathetic strains, that the temples were converted into sepulchres, and that the holy places, which had been adorned by the statues of the gods, were basely polluted by the relics of Christian martyrs. “The monks” (a race of filthy animals, to whom Eunapius is tempted to refuse the name of men) “are the authors of the new worship, which, in the place of one of those deities, who are conceived by the understanding, has substituted the meanest and most contemptible slaves. The heads, salted and pickled, of those infamous malefactors, who for the multitude of their crimes have suffered a just and ignominious death; their bodies, still marked by the impression of the lash, and the scars of those tortures which were inflicted by the sentence of the magistrate; such” (continues Eunapius) “are the gods which the earth produces in our days; such are the martyrs, the supreme arbitrators of our prayers and petitions to the Deity, whose tombs are now consecrated as the objects of the veneration of the people.”[75](#) Without approving the malice, it is natural enough to share the surprise, of the Sophist, the spectator of a revolution which raised those obscure victims of the laws of Rome to the rank of celestial and invisible protectors of the Roman empire. The grateful respect of the Christians for the martyrs of the faith was exalted, by time and victory, into religious adoration; and the most illustrious of the saints and prophets were deservedly associated to the honours of the martyrs. One hundred and fifty years after the glorious deaths of St. Peter and St. Paul, the Vitican and the Ostian road were distinguished by the tombs, or rather by the trophies, of those spiritual heroes.[76](#) In the age which followed the conversion of Constantine, the emperors, the consuls, and the generals of armies devoutly visited the sepulchres of a tent-maker and a fisherman;[77](#) and their venerable bones were deposited under the altars of Christ, on which the bishops of the royal city continually offered the unbloody sacrifice.[78](#) The new capital of the Eastern world, unable to produce any ancient and domestic trophies, was enriched by the spoils of dependent provinces. The bodies of St. Andrew, St. Luke, and St. Timothy had reposed, near three hundred years, in the obscure graves from whence they were sent, in solemn pomp, to the church of the Apostles, which the magnificence of Constantine had founded on the banks of the Thracian Bosphorus.[79](#) About fifty years afterwards, the same banks were honoured by the presence of Samuel, the judge and prophet of the people of Israel. His ashes, deposited in a golden vase and covered with a silken veil, were delivered by the bishops into each other’s hands. The relics of Samuel were received by the people with the same joy and reverence which they would have shown to the living prophet; the highways, from Palestine to the gates of Constantinople,

were filled with an uninterrupted procession; and the emperor Arcadius himself, at the head of the most illustrious members of the clergy and senate, advanced to meet his extraordinary guest, who had always deserved and claimed the homage of kings.⁸⁰ The example of Rome and Constantinople confirmed the faith and discipline of the Catholic world. The honours of the saints and martyrs, after a feeble and ineffectual murmur of profane reason,⁸¹ were universally established; and in the age of Ambrose and Jerom, something was still deemed wanting to the sanctity of a Christian church, till it had been consecrated by some portion of holy relics, which fixed and inflamed the devotion of the faithful.

In the long period of twelve hundred years which elapsed between the reign of Constantine and the reformation of Luther the worship of saints and relics corrupted the pure and perfect simplicity of the Christian model; and some symptoms of degeneracy may be observed even in the first generations which adopted and cherished this pernicious innovation.

I. The satisfactory experience that the relics of saints were more valuable than gold or precious stones⁸² stimulated the clergy to multiply the treasures of the church.

Without much regard for truth or probability, they invented names for skeletons and actions for names. The fame of the apostles, and of the holy men who had imitated their virtues, was darkened by religious fiction. To the invincible band of genuine and primitive martyrs, they added myriads of imaginary heroes, who had never existed except in the fancy of crafty or credulous legendaries; and there is reason to suspect that Tours might not be the only diocese in which the bones of a malefactor were adored instead of those of a saint.⁸³ A superstitious practice, which tended to increase the temptations of fraud and credulity, insensibly extinguished the light of history and of reason in the Christian world.

II. But the progress of superstition would have been much less rapid and victorious, if the faith of the people had not been assisted by the seasonable aid of visions and miracles, to ascertain the authenticity and virtue of the most suspicious relics. In the reign of the younger Theodosius, Lucian,⁸⁴ a presbyter of Jerusalem, and the ecclesiastical minister of the village of Caphargamala, about twenty miles from the city, related a very singular dream, which, to remove his doubts, had been repeated on three successive Saturdays. A venerable figure stood before him, in the silence of the night, with a long beard, a white robe, and a gold rod; announced himself by the name of Gamaliel, and revealed to the astonished presbyter that his own corpse, with the bodies of his son Abibas, his friend Nicodemus, and the illustrious Stephen, the first martyr of the Christian faith, were secretly buried in the adjacent field. He added, with some impatience, that it was time to release himself and his companions from their obscure prison; that their appearance would be salutary to a distressed world; and that they had made choice of Lucian to inform the bishop of Jerusalem of their situation

and their wishes. The doubts and difficulties which still retarded this important discovery were successively removed by new visions; and the ground was opened by the bishop, in the presence of an innumerable multitude. The coffins of Gamaliel, of his son, and of his friend were found in regular order; but when the fourth coffin, which contained the remains of Stephen, was shown to the light, the earth trembled, and an odour, such as that of paradise, was smelt, which instantly cured the various diseases of seventy-three of the assistants. The companions of Stephen were left in their peaceful residence of Caphargamala; but the relics of the first martyr were transported in solemn procession to a church constructed in their honour on Mount Sion; and the minute particles of those relics, a drop of blood,[85](#) or the scrapings of a bone were acknowledged in almost every province of the Roman world to possess a divine and miraculous virtue. The grave and learned Augustin,[86](#) whose understanding scarcely admits the excuse of credulity, has attested the innumerable prodigies which were performed in Africa by the relics of St. Stephen; and this marvellous narrative is inserted in the elaborate work of the City of God, which the bishop of Hippo designed as a solid and immortal proof of the truth of Christianity. Augustin solemnly declares that he has selected those miracles only which were publicly certified by the persons who were either the objects, or the spectators, of the power of the martyr. Many prodigies were omitted or forgotten; and Hippo had been less favourably treated than the other cities of the province. And yet the bishop enumerates above seventy miracles, of which three were resurrections from the dead, in the space of two years and within the limits of his own diocese.[87](#) If we enlarge our view to all the dioceses and all the saints of the Christian world, it will not be easy to calculate the fables and the errors which issued from this inexhaustible source. But we may surely be allowed to observe that a miracle, in that age of superstition and credulity, lost its name and its merit, since it could scarcely be considered as a deviation from the ordinary and established laws of nature.

III. The innumerable miracles of which the tombs of the martyrs were the perpetual theatre revealed to the pious believer the actual state and constitution of the invisible world; and his religious speculations appeared to be founded on the firm basis of fact and experience. Whatever might be the condition of vulgar souls, in the long interval between the dissolution and the resurrection of their bodies, it was evident that the superior spirits of the saints and martyrs did not consume that portion of their existence in silent and inglorious sleep.[88](#) It was evident (without presuming to determine the place of their habitation or the nature of their felicity) that they enjoyed the lively and active consciousness of their happiness, their virtue, and their powers; and that they had already secured the possession of their eternal reward. The enlargement of their intellectual faculties surpassed the measure of the human imagination; since it was proved by *experience* that they were capable of hearing and understanding the various petitions of their numerous votaries; who, in the same moment of time, but in the most distant parts of the world, invoked the name and

assistance of Stephen or of Martin.⁸⁹ The confidence of their petitioners was founded on the persuasion that the saints, who reigned with Christ, cast an eye of pity upon earth; that they were warmly interested in the prosperity of the Catholic church; and that the individuals, who imitated the example of their faith and piety, were the peculiar and favourite objects of their most tender regard. Sometimes, indeed, their friendship might be influenced by considerations of a less exalted kind: they viewed, with partial affection, the places which had been consecrated by their birth, their residence, their death, their burial, or the possession of their relics. The meaner passions of pride, avarice, and revenge may be deemed unworthy of a celestial breast; yet the saints themselves condescended to testify their grateful approbation of the liberality of their votaries; and the sharpest bolts of punishment were hurled against those impious wretches who violated their magnificent shrines or disbelieved their supernatural power.⁹⁰ Atrocious, indeed, must have been the guilt, and strange would have been the scepticism, of those men, if they had obstinately resisted the proofs of a divine agency which the elements, the whole range of the animal creation, and even the subtle and invisible operations of the human mind were compelled to obey.⁹¹ The immediate, and almost instantaneous, effects, that were supposed to follow the prayer or the offence, satisfied the Christians of the ample measure of favour and authority which the saints enjoyed in the presence of the Supreme God; and it seemed almost superfluous to inquire whether they were continually obliged to intercede before the throne of grace, or whether they might not be permitted to exercise, according to the dictates of their benevolence and justice, the delegated powers of their subordinate ministry. The imagination, which had been raised by a painful effort to the contemplation and worship of the Universal Cause, eagerly embraced such inferior objects of adoration as were more proportioned to its gross conceptions and imperfect faculties. The sublime and simple theology of the primitive Christians was gradually corrupted; and the monarchy of heaven, already clouded by metaphysical subtleties, was degraded by the introduction of a popular mythology, which tended to restore the reign of polytheism.⁹²

IV. As the objects of religion were gradually reduced to the standard of the imagination, the rites and ceremonies were introduced that seemed most powerfully to affect the senses of the vulgar. If, in the beginning of the fifth century,⁹³ Tertullian or Lactantius⁹⁴ had been suddenly raised from the dead, to assist at the festival of some popular saint or martyr,⁹⁵ they would have gazed with astonishment and indignation on the profane spectacle, which had succeeded to the pure and spiritual worship of a Christian congregation. As soon as the doors of the church were thrown open, they must have been offended by the smoke of incense, the perfume of flowers, and the glare of lamps and tapers, which diffused, at noon-day, a gaudy, superfluous, and, in their opinion, a sacrilegious light. If they approached the balustrade of the altar, they made their way through the prostrate crowd, consisting, for the most part, of strangers and pilgrims, who restored to the city on the vigil of the feast; and who already felt the

strong intoxication of fanaticism, and, perhaps, of wine. Their devout kisses were imprinted on the walls and pavement of the sacred edifice; and their fervent prayers were directed, whatever might be the language of their church, to the bones, the blood, or the ashes of the saints, which were usually concealed by a linen or silken veil from the eyes of the vulgar. The Christians frequented the tombs of the martyrs, in the hope of obtaining, from their powerful intercession, every sort of spiritual, but more especially of temporal, blessings. They implored the preservation of their health or the cure of their infirmities; the fruitfulness of their barren wives or the safety and happiness of their children. Whenever they undertook any distant or dangerous journey, they requested that the holy martyrs would be their guides and protectors on the road; and, if they returned without having experienced any misfortune, they again hastened to the tombs of the martyrs, to celebrate, with grateful thanksgivings, their obligations to the memory and relics of those heavenly patrons. The walls were hung round with symbols of the favours which they had received; eyes, and hands, and feet, of gold and silver; and edifying pictures, which could not long escape the abuse of indiscreet or idolatrous devotion, represented the image, the attributes, and the miracles of the tutelar saint. The same uniform original spirit of superstition might suggest, in the most distant ages and countries, the same methods of deceiving the credulity, and of affecting the senses, of mankind;[96](#) but it must ingenuously be confessed that the ministers of the Catholic church imitated the profane model which they were impatient to destroy. The most respectable bishops had persuaded themselves that the ignorant rustics would more cheerfully renounce the superstitions of Paganism, if they found some resemblance, some compensation, in the bosom of Christianity. The religion of Constantine achieved, in less than a century, the final conquest of the Roman empire: but the victors themselves were insensibly subdued by the arts of their vanquished rivals.[97](#)

CHAPTER XXIX

Final Division of the Roman Empire between the Sons of Theodosius — Reign of Arcadius and Honorius — Administration of Rufinus and Stilicho — Revolt and Defeat of Gildo in Africa

The genius of Rome expired with Theodosius; the last of the successors of Augustus and Constantine, who appeared in the field at the head of their armies, and whose authority was universally acknowledged throughout the whole extent of the empire. The memory of his virtues still continued, however, to protect the feeble and inexperienced youth of his two sons. After the death of their father, Arcadius and Honorius were saluted, by the unanimous consent of mankind, as the lawful emperors of the East, and of the West; and the oath of fidelity was eagerly taken by every order

of the state; the senates of old and new Rome, the clergy, the magistrates, the soldiers, and the people. Arcadius, who then was about eighteen years of age, was born in Spain, in the humble habitation of a private family. But he received a princely education in the palace of Constantinople; and his inglorious life was spent in that peaceful and splendid seat of royalty, from whence he appeared to reign over the provinces of Thrace, Asia Minor, Syria, and Egypt, from the Lower Danube to the confines of Persia and Æthiopia. His younger brother, Honorius, assumed, in the eleventh year of his age, the nominal government of Italy, Africa, Gaul, Spain, and Britain; and the troops which guarded the frontiers of his kingdom were opposed, on one side, to the Caledonians, and on the other, to the Moors. The great and martial prefecture of Illyricum was divided between the two princes; the defence and possession of the provinces of Noricum, Pannonia, and Dalmatia still belonged to the Western empire; but the two large dioceses of Dacia and Macedonia, which Gratian had entrusted to the valour of Theodosius, were for ever united to the empire of the East. The boundary in Europe was not very different from the line which now separates the Germans and the Turks; and the respective advantages of territory, riches, populousness, and military strength were fairly balanced and compensated in this final and permanent division of the Roman empire. The hereditary sceptre of the sons of Theodosius appeared to be the gift of nature, and of their father; the generals and ministers had been accustomed to adore the majesty of the royal infants; and the army and people were not admonished of their rights and of their power by the dangerous example of a recent election. The gradual discovery of the weakness of Arcadius and Honorius, and the repeated calamities of their reign, were not sufficient to obliterate the deep and early impressions of loyalty. The subjects of Rome, who still revered the persons or rather the names of their sovereigns, beheld, with equal abhorrence, the rebels who opposed, and the ministers who abused, the authority of the throne.

Theodosius had tarnished the glory of his reign by the elevation of Rufinus: an odious favourite, who, in an age of civil and religious faction, has deserved, from every party, the imputation of every crime. The strong impulse of ambition and avarice¹ had urged Rufinus to abandon his native country, an obscure corner of Gaul,² to advance his fortune in the capital of the East; the talent of bold and ready elocution³ qualified him to succeed in the lucrative profession of the law; and his success in that profession was a regular step to the most honourable and important employments of the state. He was raised, by just degrees, to the station of master of the offices. In the exercise of his various functions, so essentially connected with the whole system of civil government, he acquired the confidence of a monarch, who soon discovered his diligence and capacity in business, and who long remained ignorant of the pride, the malice, and the covetousness of his disposition. These vices were concealed beneath the mask of profound dissimulation;⁴ his passions were subservient only to the passions of his master; yet, in the horrid massacre of Thessalonica, the cruel Rufinus inflamed the fury, without imitating the repentance, of Theodosius. The minister, who viewed with

proud indifference the rest of mankind, never forgave the appearance of an injury; and his personal enemies had forfeited in his opinion the merit of all public services. Promotus, the master-general of the infantry, had saved the empire from the invasion of the Ostrogoths; but he indignantly supported the pre-eminence of a rival whose character and profession he despised; and, in the midst of a public council, the impatient soldier was provoked to chastise with a blow the indecent pride of the favourite. This act of violence was represented to the emperor as an insult which it was incumbent on *his* dignity to resent. The disgrace and exile of Promotus were signified by a peremptory order to repair, without delay, to a military station on the banks of the Danube; and the death of that general (though he was slain in a skirmish with the Barbarians) was imputed to the perfidious arts of Rufinus.⁵ The sacrifice of an hero gratified his revenge; the honours of the consulship elated his vanity; but his power was still imperfect and precarious, as long as the important posts of prefect of the East and of prefect of Constantinople were filled by Tatian⁶ and his son Proculus; whose united authority balanced, for some time, the ambition and favour of the master of the offices. The two prefects were accused of rapine and corruption in the administration of the laws and finances. For the trial of these illustrious offenders, the emperor constituted a special commission; several judges were named to share the guilt and reproach of injustice; but the right of pronouncing sentence was reserved to the president alone, and that president was Rufinus himself. The father, stripped of the prefecture of the East, was thrown into a dungeon; but the son, conscious that few ministers can be found innocent where an enemy is their judge, had secretly escaped; and Rufinus must have been satisfied with the least obnoxious victim, if despotism had not condescended to employ the basest and most ungenerous artifice. The prosecution was conducted with an appearance of equity and moderation, which flattered Tatian with the hope of a favourable event; his confidence was fortified by the solemn assurances and perfidious oaths of the president, who presumed to interpose the sacred name of Theodosius himself; and the unhappy father was at last persuaded to recall, by a private letter, the fugitive Proculus. He was instantly seized, examined, condemned, and beheaded, in one of the suburbs of Constantinople, with a precipitation which disappointed the clemency of the emperor. Without respecting the misfortunes of a consular senator, the cruel judges of Tatian compelled him to behold the execution of his son; the fatal cord was fastened round his own neck; but, in the moment when he expected, and perhaps desired, the relief of a speedy death, he was permitted to consume the miserable remnant of his old age in poverty and exile.⁷ The punishment of the two prefects might perhaps be excused by the exceptionable parts of their own conduct; the enmity of Rufinus might be palliated by the jealous and unsociable nature of ambition. But he indulged a spirit of revenge, equally repugnant to prudence and to justice, when he degraded their native country of Lycia from the rank of Roman provinces; stigmatised a guiltless people with a mark of ignominy; and declared that the countrymen of Tatian and Proculus should ever remain incapable of holding any employment of honour or advantage under the Imperial government.⁸ The new prefect

of the East (for Rufinus instantly succeeded to the vacant honours of his adversary) was not diverted, however, by the most criminal pursuits, from the performance of the religious duties which in that age were considered as the most essential to salvation. In the suburb of Chalcedon, surnamed the *Oak*, he had built a magnificent villa; to which he devoutly added a stately church, consecrated to the apostles St. Peter and St. Paul, and continually sanctified by the prayers and penance of a regular society of monks. A numerous, and almost general, synod of the bishops of the Eastern empire was summoned to celebrate, at the same time, the dedication of the church and the baptism of the founder. This double ceremony was performed with extraordinary pomp; and, when Rufinus was purified, in the holy font, from all the sins that he had hitherto committed, a venerable hermit of Egypt rashly proposed himself as the sponsor of a proud and ambitious statesman.[9](#)

The character of Theodosius imposed on his minister the task of hypocrisy, which disguised, and sometimes restrained, the abuse of power; and Rufinus was apprehensive of disturbing the indolent slumber of a prince, still capable of exerting the abilities and the virtue which had raised him to the throne.[10](#) But the absence, and soon afterwards the death, of the emperor confirmed the absolute authority of Rufinus over the person and dominions of Arcadius: a feeble youth, whom the imperious prefect considered as his pupil rather than his sovereign. Regardless of the public opinion, he indulged his passions without remorse and without resistance; and his malignant and rapacious spirit rejected every passion that might have contributed to his own glory or the happiness of the people. His avarice,[11](#) which seems to have prevailed in his corrupt mind over every other sentiment, attracted the wealth of the East by the various arts of partial, and general, extortion: oppressive taxes, scandalous bribery, immoderate fines, unjust confiscations, forced or fictitious testaments, by which the tyrant despoiled of their lawful inheritance the children of strangers, or enemies; and the public sale of justice, as well as of favour, which he instituted in the palace of Constantinople. The ambitious candidate eagerly solicited, at the expense of the fairest part of his patrimony, the honours and emoluments of some provincial government; the lives and fortunes of the unhappy people were abandoned to the most liberal purchaser; and the public discontent was sometimes appeased by the sacrifice of an unpopular criminal, whose punishment was profitable only to the prefect of the East, his accomplice and his judge. If avarice were not the blindest of the human passions, the motives of Rufinus might excite our curiosity; and we might be tempted to inquire, with what view he violated every principle of humanity and justice, to accumulate those immense treasures which he could not spend without folly nor possess without danger. Perhaps he vainly imagined that he laboured for the interest of an only daughter, on whom he intended to bestow his royal pupil and the august rank of empress of the East. Perhaps he deceived himself by the opinion that his avarice was the instrument of his ambition. He aspired to place his fortune on a secure and independent basis, which should no longer depend on the caprice of the young emperor; yet he neglected to conciliate the hearts of the soldiers and people, by the

liberal distribution of those riches which he had acquired with so much toil, and with so much guilt. The extreme parsimony of Rufinus left him only the reproach and envy of ill-gotten wealth; his dependents served him without attachment; the universal hatred of mankind was repressed only by the influence of servile fear. The fate of Lucian proclaimed to the East that the prefect whose industry was much abated in the despatch of ordinary business was active and indefatigable in the pursuit of revenge. Lucian, the son of the prefect Florentius, the oppressor of Gaul, and the enemy of Julian, had employed a considerable part of his inheritance, the fruit of rapine and corruption, to purchase the friendship of Rufinus and the high office of Count of the East. But the new magistrate imprudently departed from the maxims of the court and of the times; disgraced his benefactor, by the contrast of a virtuous and temperate administration; and presumed to refuse an act of injustice, which might have tended to the profit of the emperor's uncle. Arcadius was easily persuaded to resent the supposed insult; and the prefect of the East resolved to execute in person the cruel vengeance which he meditated against this ungrateful delegate of his power. He performed with incessant speed the journey of seven or eight hundred miles from Constantinople to Antioch, entered the capital of Syria at the dead of night, and spread universal consternation among a people ignorant of his design but not ignorant of his character. The count of the fifteen provinces of the East was dragged, like the vilest malefactor, before the arbitrary tribunal of Rufinus. Notwithstanding the clearest evidence of his integrity, which was not impeached even by the voice of an accuser, Lucian was condemned, almost without a trial, to suffer a cruel and ignominious punishment. The ministers of the tyrant, by the order, and in the presence, of their master, beat him on the neck with leather thongs, armed at the extremities with lead; and, when he fainted under the violence of the pain, he was removed in a close litter, to conceal his dying agonies from the eyes of the indignant city. No sooner had Rufinus perpetrated this inhuman act, the sole object of his expedition, than he returned, amidst the deep and silent curses of a trembling people, from Antioch to Constantinople; and his diligence was accelerated by the hope of accomplishing, without delay, the nuptials of his daughter with the emperor of the East.[12](#)

But Rufinus soon experienced that a prudent minister should constantly secure his royal captive by the strong, though invisible, chain of habit; and that the merit, and much more easily the favour, of the absent are obliterated in a short time from the mind of a weak and capricious sovereign. While the prefect satiated his revenge at Antioch, a secret conspiracy of the favourite eunuchs, directed by the great chamberlain Eutropius, undermined his power in the palace of Constantinople. They discovered that Arcadius was not inclined to love the daughter of Rufinus, who had been chosen, without his consent, for his bride; and they contrived to substitute in her place the fair Eudoxia, the daughter of Bauto,[13](#) a general of the Franks in the service of Rome; and who was educated, since the death of her father, in the family of the sons of Promotus. The young emperor, whose chastity had been strictly guarded by the pious care of his tutor Arsenius,[14](#) eagerly listened to the artful and flattering

descriptions of the charms of Eudoxia; he gazed with impatient ardour on her picture, and he understood the necessity of concealing his amorous designs from the knowledge of a minister who was so deeply interested to oppose the consummation of his happiness. Soon after the return of Rufinus, the approaching ceremony of the royal nuptials was announced to the people of Constantinople, who prepared to celebrate, with false and hollow acclamations, the fortune of his daughter. A splendid train of eunuchs and officers issued, in hymeneal pomp, from the gates of the palace; bearing aloft the diadem, the robes and the inestimable ornaments of the future empress. The solemn procession passed through the streets of the city, which were adorned with garlands and filled with spectators; but, when it reached the house of the sons of Promotus, the principal eunuch respectfully entered the mansion, invested the fair Eudoxia with the Imperial robes, and conducted her in triumph to the palace and bed of Arcadius.¹⁵ The secrecy and success with which this conspiracy against Rufinus had been conducted imprinted a mark of indelible ridicule on the character of a minister who had suffered himself to be deceived in a post where the arts of deceit and dissimulation constitute the most distinguished merit. He considered, with a mixture of indignation and fear, the victory of an aspiring eunuch, who had secretly captivated the favour of his sovereign; and the disgrace of his daughter, whose interest was inseparably connected with his own, wounded the tenderness, or, at least, the pride, of Rufinus. At the moment when he flattered himself that he should become the father of a line of kings, a foreign maid, who had been educated in the house of his implacable enemies, was introduced into the Imperial bed; and Eudoxia soon displayed a superiority of sense and spirit, to improve the ascendant which her beauty must acquire over the mind of a fond and youthful husband. The emperor would soon be instructed to hate, to fear, and to destroy the powerful subject whom he had injured; and the consciousness of guilt deprived Rufinus of every hope, either of safety or comfort, in the retirement of a private life. But he still possessed the most effectual means of defending his dignity, and perhaps of oppressing his enemies. The prefect still exercised an uncontrolled authority over the civil and military government of the East; and his treasures, if he could resolve to use them, might be employed to procure proper instruments for the execution of the blackest designs that pride, ambition, and revenge could suggest to a desperate statesman. The character of Rufinus seemed to justify the accusations that he conspired against the person of his sovereign to seat himself on the vacant throne; and that he had secretly invited the Huns and the Goths to invade the provinces of the empire and to increase the public confusion. The subtle prefect, whose life had been spent in the intrigues of the palace, opposed, with equal arms, the artful measures of the eunuch Eutropius; but the timid soul of Rufinus was astonished by the hostile approach of a more formidable rival, of the great Stilicho, the general, or rather the master, of the empire of the West.¹⁶

The celestial gift which Achilles obtained, and Alexander envied, of a poet worthy to celebrate the actions of heroes has been enjoyed by Stilicho in a much higher degree than might have been expected from the declining state of genius and of art. The muse

of Claudian,¹⁷ devoted to his service, was always prepared to stigmatise his adversaries, Rufinus or Eutropius, with eternal infamy; or to paint, in the most splendid colours, the victories and virtues of a powerful benefactor. In the review of a period indifferently supplied with authentic materials, we cannot refuse to illustrate the annals of Honorius from the invectives or the panegyrics of a contemporary writer; but, as Claudian appears to have indulged the most ample privilege of a poet and a courtier, some criticism will be requisite to translate the language of fiction or exaggeration into the truth and simplicity of historic prose. His silence concerning the family of Stilicho may be admitted as a proof that his patron was neither able nor desirous to boast a long series of illustrious progenitors; and the slight mention of his father, an officer of Barbarian cavalry in the service of Valens, seems to countenance the assertion that the general who so long commanded the armies of Rome was descended from the savage and perfidious race of the Vandals.¹⁸ If Stilicho had not possessed the external advantages of strength and stature, the most flattering bard, in the presence of so many thousand spectators, would have hesitated to affirm that he surpassed the measure of the demigods of antiquity; and that, whenever he moved, with lofty steps, through the streets of the capital, the astonished crowd made room for the stranger, who displayed, in a private condition, the awful majesty of a hero. From his earliest youth he embraced the profession of arms; his prudence and valour were soon distinguished in the field; the horsemen and archers of the East admired his superior dexterity; and in each degree of his military promotions the public judgment always prevented and approved the choice of the sovereign. He was named by Theodosius to ratify a solemn treaty with the monarch of Persia; he supported, during that important embassy, the dignity of the Roman name; and, after his return to Constantinople, his merit was rewarded by an intimate and honourable alliance with the Imperial family. Theodosius had been prompted by a pious motive of fraternal affection to adopt for his own the daughter of his brother Honorius; the beauty and accomplishments of Serena¹⁹ were universally admired by the obsequious court; and Stilicho obtained the preference over a crowd of rivals, who ambitiously disputed the hand of the princess and the favour of her adoptive father.²⁰ The assurance that the husband of Serena would be faithful to the throne, which he was permitted to approach, engaged the emperor to exalt the fortunes and to employ the abilities of the sagacious and intrepid Stilicho. He rose, through the successive steps of master of the horse and count of the domestics, to the supreme rank of master-general of all the cavalry and infantry of the Roman, or at least of the Western, empire;²¹ and his enemies confessed that he invariably disdained to barter for gold the rewards of merit, or to defraud the soldiers of the pay and gratifications which they deserved or claimed from the liberality of the State.²² The valour and conduct which he afterwards displayed in the defence of Italy against the arms of Alaric and Radagaisus may justify the fame of his early achievements; and, in an age less attentive to the laws of honour or of pride, the Roman generals might yield the pre-eminence of rank to the ascendant of superior genius.²³ He lamented and revenged the murder of Promotus, his rival and

his friend; and the massacre of many thousands of the flying Bastarnæ is represented by the poet as a bloody sacrifice which the Roman Achilles offered to the manes of another Patroclus. The virtues and victories of Stilicho deserved the hatred of Rufinus; and the arts of calumny might have been successful, if the tender and vigilant Serena had not protected her husband against his domestic foes, whilst he vanquished in the field the enemies of the empire.²⁴ Theodosius continued to support an unworthy minister, to whose diligence he delegated the government of the palace and of the East; but, when he marched against the tyrant Eugenius, he associated his faithful general to the labours and glories of the civil war; and, in the last moments of his life, the dying monarch recommended to Stilicho the care of his sons, and of the republic.²⁵ The ambition and the abilities of Stilicho were not unequal to the important trust; and he claimed the guardianship of the two empires during the minority of Arcadius and Honorius.²⁶ The first measure of his administration, or rather of his reign, displayed to the nations the vigour and activity of a spirit worthy to command. He passed the Alps in the depth of winter; descended the stream of the Rhine from the fortress of Basel to the marshes of Batavia; reviewed the state of the garrisons; repressed the enterprises of the Germans; and, after establishing along the banks a firm and honourable peace, returned with incredible speed to the palace of Milan.²⁷ The person and court of Honorius were subject to the master-general of the West; and the armies and provinces of Europe obeyed, without hesitation, a regular authority, which was exercised in the name of their young sovereign. Two rivals only remained to dispute the claims, and to provoke the vengeance, of Stilicho. Within the limits of Africa, Gildo, the Moor, maintained a proud and dangerous independence; and the minister of Constantinople asserted his equal reign over the emperor and the empire of the East.

The impartiality which Stilicho affected, as the common guardian of the royal brothers, engaged him to regulate the equal division of the arms, the jewels, and the magnificent wardrobe and furniture of the deceased emperor.²⁸ But the most important object of the inheritance consisted of the numerous legions, cohorts and squadrons of Romans or Barbarians, whom the event of the civil war had united under the standard of Theodosius. The various multitudes of Europe and Asia, exasperated by recent animosities, were overawed by the authority of a single man; and the rigid discipline of Stilicho protected the lands of the citizen from the rapine of the licentious soldier.²⁹ Anxious, however, and impatient to relieve Italy from the presence of this formidable host, which could be useful only on the frontiers of the empire, he listened to the just requisition of the minister of Arcadius, declared his intention of re-conducting in person the troops of the East, and dexterously employed the rumour of a Gothic tumult to conceal his private designs of ambition and revenge.³⁰ The guilty soul of Rufinus was alarmed by the approach of a warrior and a rival, whose enmity he deserved; he computed with increasing terror the narrow space of his life and greatness: and, as the last hope of safety, he interposed the authority of the emperor

Arcadius. Stilicho, who appears to have directed his march along the sea coast of the Hadriatic, was not far distant from the city of Thessalonica, when he received a peremptory message to recall the troops of the East and to declare that *his* nearer approach would be considered by the Byzantine court as an act of hostility. The prompt and unexpected obedience of the general of the West convinced the vulgar of his loyalty and moderation; and, as he had already engaged the affection of the Eastern troops, he recommended to their zeal the execution of his bloody design, which might be accomplished in his absence with less danger, perhaps, and with less reproach. Stilicho left the command of the troops of the East to Gainas the Goth, on whose fidelity he firmly relied; with an assurance, at least, that the hardy Barbarian would never be diverted from his purpose by any consideration of fear or remorse. The soldiers were easily persuaded to punish the enemy of Stilicho and of Rome; and such was the general hatred which Rufinus had excited that the fatal secret, communicated to thousands, was faithfully preserved during the long march from Thessalonica to the gates of Constantinople. As soon as they had resolved his death, they condescended to flatter his pride; the ambitious prefect was seduced to believe that those powerful auxiliaries might be tempted to place the diadem on his head; and the treasures which he distributed with a tardy and reluctant hand were accepted by the indignant multitude as an insult rather than as a gift. At the distance of a mile from the capital, in the field of Mars, before the palace of Hebdomon,[31](#) the troops halted; and the emperor, as well as his minister, advanced according to ancient custom respectfully to salute the power which supported their throne. As Rufinus passed along the ranks and disguised with studied courtesy his innate haughtiness, the wings insensibly wheeled from the right and left and enclosed the devoted victim within the circle of their arms. Before he could reflect on the danger of his situation Gainas gave the signal of death; a daring and forward soldier plunged his sword into the breast of the guilty prefect, and Rufinus fell, groaned and expired at the feet of the affrighted emperor. If the agonies of a moment could expiate the crimes of a whole life, or if the outrages inflicted on a breathless corpse could be the object of pity, our humanity might perhaps be affected by the horrid circumstances which accompanied the murder of Rufinus. His mangled body was abandoned to the brutal fury of the populace of either sex, who hastened in crowds from every quarter of the city to trample on the remains of the haughty minister at whose frown they had so lately trembled. His right hand was cut off and carried through the streets of Constantinople in cruel mockery to extort contributions for the avaricious tyrant, whose head was publicly exposed, borne aloft on the point of a long lance.[32](#) According to the savage maxims of the Greek republics his innocent family would have shared the punishment of his crimes. The wife and daughter of Rufinus were indebted for their safety to the influence of religion. *Her* sanctuary protected them from the raging madness of the people; and they were permitted to spend the remainder of their lives in the exercises of Christian devotion in the peaceful retirement of Jerusalem.[33](#)

The servile poet of Stilicho applauds, with ferocious joy, this horrid deed, which, in

the execution, perhaps, of justice, violated every law of nature and society, profaned the majesty of the prince, and renewed the dangerous examples of military licence. The contemplation of the universal order and harmony had satisfied Claudian of the existence of the Deity; but the prosperous impunity of vice appeared to contradict his moral attributes; and the fate of Rufinus was the only event which could dispel the religious doubts of the poet.³⁴ Such an act might vindicate the honour of Providence; but it did not much contribute to the happiness of the people. In less than three months they were informed of the maxims of the new administration by a singular edict, which established the exclusive right of the treasury over the spoils of Rufinus; and silenced, under heavy penalties, the presumptuous claims of the subjects of the Eastern empire, who had been injured by his rapacious tyranny.³⁵ Even Stilicho did not derive from the murder of his rival the fruit which he had proposed; and, though he gratified his revenge, his ambition was disappointed. Under the name of a favourite, the weakness of Arcadius required a master; but he naturally preferred the obsequious arts of the eunuch Eutropius, who had obtained his domestic confidence; and the emperor contemplated, with terror and aversion, the stern genius of a foreign warrior. Till they were divided by the jealousy of power, the sword of Gainas and the charms of Eudoxia supported the favour of the great chamberlain of the palace; the perfidious Goth, who was appointed master-general of the East, betrayed, without scruple, the interest of his benefactor; and the same troops who had so lately massacred the enemy of Stilicho were engaged to support, against him, the independence of the throne of Constantinople. The favourites of Arcadius fomented a secret and irreconcilable war against a formidable hero who aspired to govern and to defend the two empires of Rome and the two sons of Theodosius. They incessantly laboured, by dark and treacherous machinations, to deprive him of the esteem of the prince, the respect of the people, and the friendship of the Barbarians. The life of Stilicho was repeatedly attempted by the dagger of hired assassins; and a decree was obtained, from the senate of Constantinople, to declare him an enemy of the republic and to confiscate his ample possessions in the provinces of the East. At a time when the only hope of delaying the ruin of the Roman name depended on the firm union, and reciprocal aid, of all the nations to whom it had been gradually communicated, the subjects of Arcadius and Honorius were instructed, by their respective masters, to view each other in a foreign, and even hostile, light; to rejoice in their mutual calamities, and to embrace, as their faithful allies, the Barbarians whom they excited to invade the territories of their countrymen.³⁶ The natives of Italy affected to despise the servile and effeminate Greeks of Byzantium, who presumed to imitate the dress, and to usurp the dignity, of Roman senators;³⁷ and the Greeks had not yet forgot the sentiments of hatred and contempt which their polished ancestors had so long entertained for the rude inhabitants of the West. The distinction of two governments, which soon produced the separation of two nations, will justify my design of suspending the series of the Byzantine history, to prosecute, without interruption, the disgraceful, but memorable, reign of Honorius.

The prudent Stilicho, instead of persisting to force the inclinations of a prince and people who rejected his government, wisely abandoned Arcadius to his unworthy favourites; and his reluctance to involve the two empires in a civil war displayed the moderation of a minister who had so often signalised his military spirit and abilities. But, if Stilicho had any longer endured the revolt of Africa, he would have betrayed the security of the capital and the majesty of the Western emperor to the capricious insolence of a Moorish rebel. Gildo,[38](#) the brother of the tyrant Firmus, had preserved and obtained, as the reward of his apparent fidelity, the immense patrimony which was forfeited by treason; long and meritorious service, in the armies of Rome, raised him to the dignity of a military count; the narrow policy of the court of Theodosius had adopted the mischievous expedient of supporting a legal government by the interest of a powerful family; and the brother of Firmus was invested with the command of Africa. His ambition soon usurped the administration of justice and of the finances, without account and without control; and he maintained, during a reign of twelve years, the possession of an office from which it was impossible to remove him without the danger of a civil war. During those twelve years, the province of Africa groaned under the dominion of a tyrant who seemed to unite the unfeeling temper of a stranger with the partial resentments of domestic faction. The forms of law were often superseded by the use of poison; and, if the trembling guests, who were invited to the table of Gildo, presumed to express their fears, the insolent suspicion served only to excite his fury, and he loudly summoned the ministers of death. Gildo alternately indulged the passions of avarice and lust;[39](#) and, if his *days* were terrible to the rich, his *nights* were not less dreadful to husbands and parents. The fairest of their wives and daughters were prostituted to the embraces of the tyrant; and afterwards abandoned to a ferocious troop of Barbarians and assassins, the black, or swarthy, natives of the desert, whom Gildo considered as the only guardians of his throne. In the civil war between Theodosius and Eugenius, the count, or rather the sovereign, of Africa maintained a haughty and suspicious neutrality; refused to assist either of the contending parties with troops or vessels, expected the declaration of fortune, and reserved for the conqueror the vain professions of his allegiance. Such professions would not have satisfied the master of the Roman world; but the death of Theodosius, and the weakness and discord of his sons, confirmed the power of the Moor; who condescended, as a proof of his moderation, to abstain from the use of the diadem and to supply Rome with the customary tribute, or rather subsidy, of corn. In every division of the empire, the five provinces of Africa were invariably assigned to the West; and Gildo had consented to govern that extensive country in the name of Honorius; but his knowledge of the character and designs of Stilicho soon engaged him to address his homage to a more distant and feeble sovereign. The ministers of Arcadius embraced the cause of a perfidious rebel; and the delusive hope of adding the numerous cities of Africa to the empire of the East tempted them to assert a claim which they were incapable of supporting either by reason or by arms.[40](#)

When Stilicho had given a firm and decisive answer to the pretensions of the Byzantine court, he solemnly accused the tyrant of Africa before the tribunal which had formerly judged the kings and nations of the earth; and the image of the republic was revived, after a long interval, under the reign of Honorius. The emperor transmitted an accurate and ample detail of the complaints of the provincials and the crimes of Gildo to the Roman senate; and the members of that venerable assembly were required to pronounce the condemnation of the rebel. Their unanimous suffrage declared him the enemy of the republic; and the decree of the senate added a sacred and legitimate sanction to the Roman arms.⁴¹ A people who still remembered that their ancestors had been the masters of the world would have applauded, with conscious pride, the representation of ancient freedom; if they had not long since been accustomed to prefer the solid assurance of bread to the unsubstantial visions of liberty and greatness. The subsistence of Rome depended on the harvests of Africa; and it was evident that a declaration of war would be the signal of famine. The prefect Symmachus, who presided in the deliberations of the senate, admonished the ministers of his just apprehension that, as soon as the revengeful Moor should prohibit the exportation of corn, the tranquillity, and perhaps the safety, of the capital would be threatened by the hungry rage of a turbulent multitude.⁴² The prudence of Stilicho conceived and executed without delay the most effectual measure for the relief of the Roman people. A large and seasonable supply of corn, collected in the inland provinces of Gaul, was embarked on the rapid stream of the Rhone, and transported, by an easy navigation, from the Rhone to the Tiber. During the whole term of the African war, the granaries of Rome were continually filled, her dignity was vindicated from the humiliating dependence, and the minds of an immense people were quieted by the calm confidence of peace and plenty.⁴³

The cause of Rome and the conduct of the African war were entrusted, by Stilicho, to a general active and ardent to avenge his private injuries on the head of the tyrant. The spirit of discord which prevailed in the house of Nabal had excited a deadly quarrel between two of his sons, Gildo and Mascezel.⁴⁴ The usurper pursued, with implacable rage, the life of his younger brother, whose courage and abilities he feared; and Mascezel, oppressed by superior power, took refuge in the court of Milan; where he soon received the cruel intelligence that his two innocent and helpless children had been murdered by their inhuman uncle. The affliction of the father was suspended only by the desire of revenge. The vigilant Stilicho already prepared to collect the naval and military forces of the Western empire; and he had resolved, if the tyrant should be able to wage an equal and doubtful war, to march against him in person. But, as Italy required his presence, and as it might be dangerous to weaken the defence of the frontier, he judged it more advisable that Mascezel should attempt this arduous adventure, at the head of a chosen body of Gallic veterans, who had lately served under the standard of Eugenius. These troops, who were exhorted to convince the world that they could subvert, as well as defend, the throne of an usurper, consisted of the *Jovian*, the *Herculian*, and the *Augustan* legions; of the *Nervian* auxiliaries; of the

soldiers who displayed in their banners the symbol of a *lion*, and of the troops which were distinguished by the auspicious names of *Fortunate* and *Invincible*. Yet such was the smallness of their establishments, or the difficulty of recruiting, that these *seven* bands,⁴⁵ of high dignity and reputation in the service of Rome, amounted to no more than five thousand effective men.⁴⁶ The fleet of galleys and transports sailed in tempestuous weather from the port of Pisa, in Tuscany, and steered their course to the little island of Capraria; which had borrowed that name from the wild goats, its original inhabitants, whose place was now occupied by a new colony of a strange and savage appearance. “The whole island (says an ingenious traveller of those times) is filled, or rather defiled, by men who fly from the light. They call themselves *Monks*, or solitaries, because they choose to live alone, without any witnesses of their actions. They fear the gifts of fortune, from the apprehension of losing them; and, lest they should be miserable, they embrace a life of voluntary wretchedness. How absurd is their choice! how perverse their understanding! to dread the evils, without being able to support the blessings, of the human condition. Either this melancholy madness is the effect of disease, or else the consciousness of guilt urges these unhappy men to exercise on their own bodies the tortures which are inflicted on fugitive slaves by the hand of justice.”⁴⁷ Such was the contempt of a profane magistrate for the monks of Capraria, who were revered, by the pious Mascezel, as the chosen servants of God.⁴⁸ Some of them were persuaded, by his entreaties, to embark on board the fleet; and it is observed, to the praise of the Roman general, that his days and nights were employed in prayer, fasting, and the occupation of singing psalms. The devout leader, who, with such a reinforcement, appeared confident of victory, avoided the dangerous rocks of Corsica, coasted along the eastern side of Sardinia, and secured his ships against the violence of the south wind, by casting anchor in the safe and capacious harbour of Cagliari, at the distance of one hundred and forty miles from the African shores.⁴⁹

Gildo was prepared to resist the invasion with all the forces of Africa. By the liberality of his gifts and promises, he endeavoured to secure the doubtful allegiance of the Roman soldiers, whilst he attracted to his standard the distant tribes of Gætulia and Æthiopia. He proudly reviewed an army of seventy thousand men, and boasted, with the rash presumption which is the forerunner of disgrace, that his numerous cavalry would trample under their horses’ feet the troops of Mascezel and involve, in a cloud of burning sand, the natives of the cold regions of Gaul and Germany.⁵⁰ But the Moor who commanded the legions of Honorius was too well acquainted with the manners of his countrymen to entertain any serious apprehension of a naked and disorderly host of Barbarians; whose left arm, instead of a shield, was protected only by a mantle; who were totally disarmed as soon as they had darted their javelin from their right hand; and whose horses had never been taught to bear the control, or to obey the guidance, of the bridle. He fixed his camp of five thousand veterans in the face of a superior enemy, and, after the delay of three days, gave the signal of a general engagement.⁵¹ As Mascezel advanced before the front with fair offers of peace and pardon, he

encountered one of the foremost standard-bearers of the Africans, and, on his refusal to yield, struck him on the arm with his sword. The arm, and the standard, sunk under the weight of the blow; and the imaginary act of submission was hastily repeated by all the standards of the line. At this signal, the disaffected cohorts proclaimed the name of their lawful sovereign; the Barbarians, astonished by the defection of their Roman allies, dispersed, according to their custom, in tumultuary flight; and Mascezel obtained the honours of an easy, and almost bloodless, victory.[52](#) The tyrant escaped from the field of battle to the seashore, and threw himself into a small vessel, with the hope of reaching in safety some friendly port of the empire of the East; but the obstinacy of the wind drove him back into the harbour of Tabraca,[53](#) which had acknowledged, with the rest of the province, the dominion of Honorius and the authority of his lieutenant. The inhabitants, as a proof of their repentance and loyalty, seized and confined the person of Gildo in a dungeon; and his own despair saved him from the intolerable torture of supporting the presence of an injured and victorious brother.[54](#) The captives and the spoils of Africa were laid at the feet of the emperor; but Stilicho, whose moderation appeared more conspicuous and more sincere in the midst of prosperity, still affected to consult the laws of the republic, and referred to the senate and people of Rome the judgment of the most illustrious criminals.[55](#) Their trial was public and solemn; but the judges, in the exercise of this obsolete and precarious jurisdiction, were impatient to punish the African magistrates, who had intercepted the subsistence of the Roman people. The rich and guilty province was impressed by the Imperial ministers, who had a visible interest to multiply the number of the accomplices of Gildo; and, if an edict of Honorius seems to check the malicious industry of informers, a subsequent edict, at the distance of ten years, continues and renews the prosecution of the offences which had been committed in the time of the general rebellion.[56](#) The adherents of the tyrant who escaped the first fury of the soldiers and the judges might derive some consolation from the tragic fate of his brother, who could never obtain his pardon for the extraordinary services which he had performed. After he had finished an important war in the space of a single winter, Mascezel was received at the court of Milan with loud applause, affected gratitude, and secret jealousy;[57](#) and his death, which, perhaps, was the effect of accident, has been considered as the crime of Stilicho. In the passage of a bridge, the Moorish prince, who accompanied the master-general of the West, was suddenly thrown from his horse into the river; the officious haste of the attendants was restrained by a cruel and perfidious smile which they observed on the countenance of Stilicho; and, while they delayed the necessary assistance, the unfortunate Mascezel was irrecoverably drowned.[58](#)

The joy of the African triumph was happily connected with the nuptials of the emperor Honorius and of his cousin Maria, the daughter of Stilicho: and this equal and honourable alliance seemed to invest the powerful minister with the authority of a parent over his submissive pupil. The muse of Claudian was not silent on this

propitious day:[59](#) he sung, in various and lively strains, the happiness of the royal pair, and the glory of the hero, who confirmed their union and supported their throne. The ancient fables of Greece, which had almost ceased to be the object of religious faith, were saved from oblivion by the genius of poetry. The picture of the Cyprian grove, the seat of harmony and love; the triumphant progress of Venus over her native seas, and the mild influence which her presence diffused in the palace of Milan; express to every age the natural sentiments of the heart, in the just and pleasing language of allegorical fiction. But the amorous impatience which Claudian attributes to the young prince[60](#) must excite the smiles of the court; and his beauteous spouse (if she deserved the praise of beauty) had not much to fear or to hope from the passions of her lover. Honorius was only in the fourteenth year of his age; Serena, the mother of his bride, deferred, by art or persuasion, the consummation of the royal nuptials; Maria died a virgin, after she had been ten years a wife; and the chastity of the emperor was secured by the coldness, or perhaps the debility, of his constitution.[61](#) His subjects, who attentively studied the character of their young sovereign, discovered that Honorius was without passions, and consequently without talents; and that his feeble and languid disposition was alike incapable of discharging the duties of his rank or of enjoying the pleasures of his age. In his early youth he made some progress in the exercises of riding and drawing the bow: but he soon relinquished these fatiguing occupations, and the amusement of feeding poultry became the serious and daily care of the monarch of the West,[62](#) who resigned the reins of empire to the firm and skilful hand of his guardian Stilicho. The experience of history will countenance the suspicion that a prince who was born in the purple received a worse education than the meanest peasant of his dominions; and that the ambitious minister suffered him to attain the age of manhood without attempting to excite his courage or to enlighten his understanding.[63](#) The predecessors of Honorius were accustomed to animate by their example, or at least by their presence, the valour of the legions; and the dates of their laws attest the perpetual activity of their motions through the provinces of the Roman world. But the son of Theodosius passed the slumber of his life, a captive in his palace, a stranger in his country, and the patient, almost the indifferent, spectator of the ruin of the Western empire, which was repeatedly attacked, and finally subverted, by the arms of the Barbarians. In the eventful history of a reign of twenty-eight years, it will seldom be necessary to mention the name of the emperor Honorius.

The Favourites of Honorius (from a painting by J.W. Waterhouse, R.A.)

CHAPTER XXX

Revolt of the Goths — They plunder Greece — Two great Invasions of Italy by Alaric and Radagaisus — They are repulsed by Stilicho — The Germans overrun Gaul — Usurpation of Constantine in the West — Disgrace and Death of Stilicho

If the subjects of Rome could be ignorant of their obligations to the great Theodosius, they were too soon convinced how painfully the spirit and abilities of their deceased emperor had supported the frail and mouldering edifice of the republic. He died in the month of January; and before the end of the winter of the same year the Gothic nation was in arms.¹ The Barbarian auxiliaries erected their independent standard; and boldly avowed the hostile designs which they had long cherished in their ferocious minds. Their countrymen, who had been condemned by the conditions of the last treaty to a life of tranquillity and labour, deserted their farms at the first sound of the trumpet, and eagerly resumed the weapons which they had reluctantly laid down. The barriers of the Danube were thrown open; the savage warriors of Scythia issued from their forests; and the uncommon severity of the winter allowed the poet to remark “that they rolled their ponderous waggons over the broad and icy back of the indignant river.”² The unhappy natives of the provinces to the south of the Danube submitted to the

calamities which, in the course of twenty years, were almost grown familiar to their imagination; and the various troops of Barbarians who gloried in the Gothic name were irregularly spread from the woody shores of Dalmatia to the walls of Constantinople.³ The interruption, or at least the diminution, of the subsidy which the Goths had received from the prudent liberality of Theodosius was the specious pretence of their revolt; the affront was embittered by their contempt for the unwarlike sons of Theodosius; and their resentment was inflamed by the weakness or treachery of the minister of Arcadius. The frequent visits of Rufinus to the camp of the Barbarians, whose arms and apparel he affected to imitate, were considered as a sufficient evidence of his guilty correspondence: and the public enemy, from a motive either of gratitude or of policy, was attentive, amidst the general devastation, to spare the private estates of the unpopular prefect. The Goths, instead of being impelled by the blind and headstrong passions of their chiefs, were now directed by the bold and artful genius of Alaric. That renowned leader was descended from the noble race of the Balti;⁴ which yielded only to the royal dignity of the Amali: he had solicited the command of the Roman armies; and the Imperial court provoked him to demonstrate the folly of their refusal and the importance of their loss. Whatever hopes might be entertained of the conquest of Constantinople, the judicious general soon abandoned an impracticable enterprise. In the midst of a divided court and a discontented people, the emperor Arcadius was terrified by the aspect of the Gothic arms; but the want of wisdom and valour was supplied by the strength of the city; and the fortifications, both of the sea and land, might securely brave the impotent and random darts of the Barbarians. Alaric disdained to trample any longer on the prostrate and ruined countries of Thrace and Dacia, and he resolved to seek a plentiful harvest of fame and riches in a province which had hitherto escaped the ravages of war.⁵

The character of the civil and military officers, on whom Rufinus had devolved the government of Greece, confirmed the public suspicion that he had betrayed the ancient seat of freedom and learning to the Gothic invader. The proconsul Antiochus was the unworthy son of a respectable father; and Gerontius, who commanded the provincial troops, was much better qualified to execute the oppressive orders of a tyrant than to defend, with courage and ability, a country most remarkably fortified by the hand of nature. Alaric had traversed, without resistance, the plains of Macedonia and Thessaly, as far as the foot of Mount Oeta, a steep and woody range of hills, almost impervious to his cavalry. They stretched from east to west, to the edge of the seashore; and left, between the precipice and the Malian Gulf, an interval of three hundred feet, which, in some places, was contracted to a road capable of admitting only a single carriage.⁶ In this narrow pass of Thermopylæ, where Leonidas and the three hundred Spartans had gloriously devoted their lives, the Goths might have been stopped, or destroyed, by a skilful general; and perhaps the view of that sacred spot might have kindled some sparks of military ardour in the breasts of the degenerate Greeks. The troops which had been posted to defend the straits of Thermopylæ retired, as they were directed, without

attempting to disturb the secure and rapid passage of Alaric;⁷ and the fertile fields of Phocis and Bœotia were instantly covered by a deluge of Barbarians, who massacred the males of an age of bear arms, and drove away the beautiful females, with the spoil and cattle, of the flaming villages. The travellers who visited Greece several years afterwards could easily discover the deep and bloody traces of the march of the Goths; and Thebes was less indebted for her preservation to the strength of her seven gates than to the eager haste of Alaric, who advanced to occupy the city of Athens and the important harbour of the Piræus. The same impatience urged him to prevent the delay and danger of a siege, by the offer of a capitulation: and, as soon as the Athenians heard the voice of the Gothic herald, they were easily persuaded to deliver the greatest part of their wealth, as the ransom of the city of Minerva and its inhabitants. The treaty was ratified by solemn oaths, and observed with mutual fidelity. The Gothic prince, with a small and select train, was admitted within the walls; he indulged himself in the refreshment of the bath, accepted a splendid banquet which was provided by the magistrate, and affected to show that he was not ignorant of the manners of civilised nations.⁸ But the whole territory of Attica, from the promontory of Sunium to the town of Megara, was blasted by his baleful presence; and, if we may use the comparison of a contemporary philosopher, Athens itself resembled the bleeding and empty skin of a slaughtered victim. The distance between Megara and Corinth could not much exceed thirty miles; but the *bad road*, an expressive name, which it still bears among the Greeks, was, or might easily have been made, impassable for the march of an enemy. The thick and gloomy woods of Mount Cithæron covered the inland country; the Scironian rocks approached the water's edge, and hung over the narrow and winding path, which was confined above six miles along the seashore.⁹ The passage of those rocks, so infamous in every age, was terminated by the isthmus of Corinth; and a small body of firm and intrepid soldiers might have successfully defended a temporary intrenchment of five or six miles from the Ionian to the Ægean Sea. The confidence of the cities of Peloponnesus in their natural rampart had tempted them to neglect the care of their antique walls; and the avarice of the Roman governors had exhausted and betrayed the unhappy province.¹⁰ Corinth, Argos, Sparta, yielded without resistance to the arms of the Goths; and the most fortunate of the inhabitants were saved by death from beholding the slavery of their families and the conflagration of their cities.¹¹ The vases and statues were distributed among the Barbarians, with more regard to the value of the materials than to the elegance of the workmanship; the female captives submitted to the laws of war; the enjoyment of beauty was the reward of valour; and the Greeks could not reasonably complain of an abuse, which was justified by the example of the heroic times.¹² The descendants of that extraordinary people, who had considered valour and discipline as the walls of Sparta, no longer remembered the generous reply of their ancestors to an invader more formidable than Alaric: "If thou art a god, thou wilt not hurt those who have never injured thee; if thou art a man, advance: — and thou wilt find men equal to thyself."¹³ From Thermopylæ to Sparta, the leader of the Goths pursued his victorious march without encountering any mortal

antagonists; but one of the advocates of expiring Paganism has confidently asserted that the walls of Athens were guarded by the goddess Minerva, with her formidable *Ægis*, and by the angry phantom of Achilles;[14](#) and that the conqueror was dismayed by the presence of the hostile deities of Greece. In an age of miracles, it would perhaps be unjust to dispute the claim of the historian Zosimus to the common benefit; yet it cannot be dissembled that the mind of Alaric was ill prepared to receive, either in sleeping or waking visions, the impressions of Greek superstition. The songs of Homer and the fame of Achilles had probably never reached the ear of the illiterate *Barbarian*; and the *Christian* faith, which he had devoutly embraced, taught him to despise the imaginary deities of Rome and Athens. The invasion of the Goths, instead of vindicating the honour, contributed, at least accidentally, to extirpate the last remains, of Paganism; and the mysteries of Ceres, which had subsisted eighteen hundred years, did not survive the destruction of Eleusis and the calamities of Greece.[15](#)

The last hope of a people who could no longer depend on their arms, their gods, or their sovereign was placed in the powerful assistance of the general of the West; and Stilicho, who had not been permitted to repulse, advanced to chastise the invaders of Greece.[16](#) A numerous fleet was equipped in the ports of Italy; and the troops, after a short and prosperous navigation over the Ionian Sea, were safely disembarked on the isthmus, near the ruins of Corinth. The woody and mountainous country of Arcadia, the fabulous residence of Pan and the Dryads, became the scene of a long and doubtful conflict between two generals not unworthy of each other. The skill and perseverance of the Roman at length prevailed; and the Goths, after sustaining a considerable loss from disease and desertion, gradually retreated to the lofty mountain of Pholoe, near the sources of the Peneus, and on the frontiers of Elis: a sacred country, which had formerly been exempted from the calamities of war.[17](#) The camp of the Barbarians was immediately besieged; the waters of the river[18](#) were diverted into another channel; and, while they laboured under the intolerable pressure of thirst and hunger, a strong line of circumvallation was formed to prevent their escape. After these precautions, Stilicho, too confident of victory, retired to enjoy his triumph in the theatrical games and lascivious dances of the Greeks; his soldiers, deserting their standards, spread themselves over the country of their allies, which they stripped of all that had been saved from the rapacious hands of the enemy. Alaric appears to have seized the favourable moment to execute one of those hardy enterprises, in which the abilities of a general are displayed with more genuine lustre than in the tumult of a day of battle. To extricate himself from the prison of Peloponnesus, it was necessary that he should pierce the intrenchments which surrounded his camp; that he should perform a difficult and dangerous march of thirty miles as far as the Gulf of Corinth; and that he should transport his troops, his captives, and his spoil over an arm of the sea which, in the narrow interval between Rhium and the opposite shore, is at least half a mile in breadth.[19](#) The operations of Alaric must have been secret, prudent, and rapid; since

the Roman general was confounded by the intelligence that the Goths, who had eluded his efforts, were in full possession of the important province of Epirus. This unfortunate delay allowed Alaric sufficient time to conclude the treaty, which he secretly negotiated with the ministers of Constantinople. The apprehension of a civil war compelled Stilicho to retire, at the haughty mandate of his rivals, from the dominions of Arcadius; and he respected in the enemy of Rome the honourable character of the ally and servant of the emperor of the East.

A Grecian philosopher,[20](#) who visited Constantinople soon after the death of Theodosius, published his liberal opinions concerning the duties of kings and the state of the Roman republic. Synesius observes and deplores the fatal abuse which the imprudent bounty of the late emperor had introduced into the military service. The citizens and subjects had purchased an exemption from the indispensable duty of defending their country; which was supported by the arms of Barbarian mercenaries. The fugitives of Scythia were permitted to disgrace the illustrious dignities of the empire; their ferocious youth, who disdained the salutary restraint of laws, were more anxious to acquire the riches than to imitate the arts of a people, the object of their contempt and hatred; and the power of the Goths was the stone of Tantalus, perpetually suspended over the peace and safety of the devoted state. The measures which Synesius recommends are the dictates of a bold and generous patriot. He exhorts the emperor to revive the courage of his subjects by the example of manly virtue; to banish luxury from the court and from the camp; to substitute in the place of the Barbarian mercenaries, an army of men interested in the defence of their laws and of their property; to force, in such a moment of public danger, the mechanic from his shop and the philosopher from his school; to rouse the indolent citizen from his dream of pleasure, and to arm, for the protection of agriculture, the hands of the laborious husbandman. At the head of such troops, who might deserve the name, and would display the spirit, of Romans, he animates the son of Theodosius to encounter a race of Barbarians who were destitute of any real courage; and never to lay down his arms, till he had chased them far away into the solitudes of Scythia; or had reduced them to the state of ignominious servitude which the Lacedæmonians formerly imposed on the captive Helots.[21](#) The court of Arcadius indulged the zeal, applauded the eloquence, and neglected the advice of Synesius. Perhaps the philosopher, who addresses the emperor of the East in the language of reason and virtue which he might have used to a Spartan king, had not condescended to form a practicable scheme, consistent with the temper and circumstances of a degenerate age. Perhaps the pride of the ministers, whose business was seldom interrupted by reflection, might reject as wild and visionary every proposal which exceeded the measure of their capacity and deviated from the forms and precedents of office. While the oration of Synesius and the downfall of the Barbarians were the topics of popular conversation, an edict was published at Constantinople, which declared the promotion of Alaric to the rank of master-general of the Eastern Illyricum. The Roman provincials and the allies, who had respected the faith of treaties, were justly indignant that the ruin of Greece and

Epirus should be so liberally rewarded. The Gothic conqueror was received as a lawful magistrate, in the cities which he had so lately besieged. The fathers whose sons he had massacred, the husbands whose wives he had violated, were subject to his authority; and the success of his rebellion encouraged the ambition of every leader of the foreign mercenaries. The use to which Alaric applied his new command distinguishes the firm and judicious character of his policy. He issued his orders to the four magazines and manufactures of offensive and defensive arms, Margus, Ratiaria, Naissus, and Thessalonica, to provide his troops with an extraordinary supply of shields, helmets, swords, and spears; the unhappy provincials were compelled to forge the instruments of their own destruction; and the Barbarians removed the only defect which had sometimes disappointed the efforts of their courage.²² The birth of Alaric, the glory of his past exploits, and the confidence in his future designs insensibly united the body of the nation under his victorious standard; and with the unanimous consent of the Barbarian chieftains, the mastergeneral of Illyricum was elevated, according to ancient custom, on a shield, and solemnly proclaimed king of the Visigoths.²³ Armed with this double power, seated on the verge of the two empires, he alternately sold his deceitful promises to the courts of Arcadius and Honorius;²⁴ till he declared and executed his resolution of invading the dominions of the West. The provinces of Europe which belonged to the Eastern emperor were already exhausted; those of Asia were inaccessible; and the strength of Constantinople had resisted his attack. But he was tempted by the fame, the beauty, the wealth of Italy, which he had twice visited; and he secretly aspired to plant the Gothic standard on the walls of Rome, and to enrich his army with the accumulated spoils of three hundred triumphs.²⁵

The scarcity of facts²⁶ and the uncertainty of dates²⁷ oppose our attempts to describe the circumstances of the first invasion of Italy by the arms of Alaric. His march, perhaps from Thessalonica, through the warlike and hostile country of Pannonia, as far as the foot of the Julian Alps; his passage of those mountains, which were strongly guarded by troops and intrenchments; the siege of Aquileia, and the conquest of the provinces of Istria and Venetia, appear to have employed a considerable time. Unless his operations were extremely cautious and slow, the length of the interval would suggest a probable suspicion that the Gothic king retreated towards the banks of the Danube and reinforced his army with fresh swarms of Barbarians, before he again attempted to penetrate into the heart of Italy. Since the public and important events escape the diligence of the historian, he may amuse himself with contemplating, for a moment, the influence of the arms of Alaric on the fortunes of two obscure individuals, a presbyter of Aquileia and an husbandman of Verona. The learned Rufinus, who was summoned by his enemies to appear before a Roman synod,²⁸ wisely preferred the dangers of a besieged city; and the Barbarians, who furiously shook the walls of Aquileia, might save him from the cruel sentence of another heretic, who, at the request of the same bishops, was severely whipped and condemned to perpetual exile on a desert island.²⁹ The *old man*,³⁰ who had passed his simple and

innocent life in the neighbourhood of Verona, was a stranger to the quarrels both of kings and of bishops; *his* pleasures, his desires, his knowledge, were confined within the little circle of his paternal farm; and a staff supported his aged steps, on the same ground where he had sported in his infancy. Yet even this humble and rustic felicity (which Claudian describes with so much truth and feeling) was still exposed to the undistinguishing rage of war. His trees, his old *contemporary* trees,³¹ must blaze in the conflagration of the whole country; a detachment of Gothic cavalry might sweep away his cottage and his family; and the power of Alaric could destroy this happiness which he was not able either to taste or to bestow. “Fame,” says the poet, “encircling with terror her gloomy wings, proclaimed the march of the Barbarian army, and filled Italy with consternation;” the apprehensions of each individual were increased in just proportion to the measure of his fortune; and the most timid, who had already embarked their valuable effects, meditated their escape to the island of Sicily or the African coast. The public distress was aggravated by the fears and reproaches of superstition.³² Every hour produced some horrid tale of strange and portentous accidents; the Pagans deplored the neglect of omens and the interruption of sacrifices; but the Christians still derived some comfort from the powerful intercession of the saints and martyrs.³³

The emperor Honorius was distinguished, above his subjects, by the pre-eminence of fear, as well as of rank. The pride and luxury in which he was educated had not allowed him to suspect that there existed on the earth any power presumptuous enough to invade the repose of the successor of Augustus. The arts of flattery concealed the impending danger, till Alaric approached the palace of Milan. But, when the sound of war had awakened the young emperor, instead of flying to arms with the spirit, or even the rashness, of his age, he eagerly listened to those timid counsellors who proposed to convey his sacred person and his faithful attendants to some secure and distant station in the provinces of Gaul. Stilicho alone³⁴ had courage and authority to resist this disgraceful measure, which would have abandoned Rome and Italy to the Barbarians; but, as the troops of the palace had been lately detached to the Rhætian frontier, and as the resource of new levies was slow and precarious, the general of the West could only promise that, if the court of Milan would maintain their ground during his absence, he would soon return with an army equal to the encounter of the Gothic king. Without losing a moment (while each moment was so important to the public safety) Stilicho hastily embarked on the Larian lake, ascended the mountains of ice and snow, amidst the severity of an Alpine winter, and suddenly repressed, by his unexpected presence, the enemy who had disturbed the tranquillity of Rhætia.³⁵ The Barbarians, perhaps some tribes of the Alemanni, respected the firmness of a chief who still assumed the language of command; and the choice which he condescended to make of a select number of their bravest youths was considered as a mark of his esteem and favour. The cohorts, who were delivered from the neighbouring foe, diligently repaired to the Imperial standard; and Stilicho issued his orders to the most remote troops of the West

to advance, by rapid marches, to the defence of Honorius and of Italy. The fortresses of the Rhine were abandoned; and the safety of Gaul was protected only by the faith of the Germans and the ancient terror of the Roman name. Even the legion which had been stationed to guard the wall of Britain against the Caledonians of the North was hastily recalled;³⁶ and a numerous body of the cavalry of the Alani was persuaded to engage in the service of the emperor, who anxiously expected the return of his general. The prudence and vigour of Stilicho were conspicuous on this occasion, which revealed, at the same time, the weakness of the falling empire. The legions of Rome, which had long since languished in the gradual decay of discipline and courage, were exterminated by the Gothic and civil wars; and it was found impossible, without exhausting and exposing the provinces, to assemble an army for the defence of Italy.

When Stilicho seemed to abandon his sovereign in the unguarded palace of Milan, he had probably calculated the term of his absence, the distance of the enemy, and the obstacles that might retard their march. He principally depended on the rivers of Italy, the Adige, the Mincius, the Oglio, and the Addua; which, in the winter or spring, by the fall of rains, or by the melting of the snows, are commonly swelled into broad and impetuous torrents.³⁷ But the season happened to be remarkably dry; and the Goths could traverse, without impediment, the wide and stony beds, whose centre was faintly marked by the course of a shallow stream. The bridge and passage of the Addua were secured by a strong detachment of the Gothic army; and, as Alaric approached the walls, or rather the suburbs, of Milan, he enjoyed the proud satisfaction of seeing the emperor of the Romans fly before him. Honorius, accompanied by a feeble train of statesmen and eunuchs, hastily retreated towards the Alps, with a design of securing his person in the city of Arles, which had often been the royal residence of his predecessors. But Honorius³⁸ had scarcely passed the Po, before he was overtaken by the speed of the Gothic cavalry;³⁹ since the urgency of the danger compelled him to seek a temporary shelter within the fortification of Asta, a town of Liguria or Piemont, situate on the banks of the Tanarus.⁴⁰ The siege of an obscure place, which contained so rich a prize and seemed incapable of a long resistance, was instantly formed and indefatigably pressed by the king of the Goths; and the bold declaration, which the emperor might afterwards make, that his breast had never been susceptible of fear, did not probably obtain much credit, even in his own court.⁴¹ In the last and almost hopeless extremity, after the Barbarians had already proposed the indignity of a capitulation, the Imperial captive was suddenly relieved by the fame, the approach, and at length the presence of the hero whom he had so long expected. At the head of a chosen and intrepid vanguard, Stilicho swam the stream of the Addua, to gain the time which he must have lost in the attack of the bridge; the passage of the Po was an enterprise of much less hazard and difficulty; and the successful action, in which he cut his way through the Gothic camp under the walls of Asta, revived the hopes, and vindicated the honour, of Rome. Instead of grasping the fruit of his victory, the Barbarian was gradually invested, on every side, by the troops of the West, who

successively issued through all the passes of the Alps; his quarters were straitened; his convoys were intercepted; and the vigilance of the Romans prepared to form a chain of fortifications, and to besiege the lines of the besiegers. A military council was assembled of the longhaired chiefs of the Gothic nation; of aged warriors, whose bodies were wrapped in furs, and whose stern countenances were marked with honourable wounds. They weighed the glory of persisting in their attempt against the advantage of securing their plunder; and they recommended the prudent measure of a seasonable retreat. In this important debate, Alaric displayed the spirit of the conqueror of Rome; and, after he had reminded his countrymen of their achievements and of their designs, he concluded his animating speech by the solemn and positive assurance that he was resolved to find in Italy either a kingdom or a grave.[42](#)

The loose discipline of the Barbarians always exposed them to the danger of a surprise; but, instead of choosing the dissolute hours of riot and intemperance, Stilicho resolved to attack the *Christian* Goths, whilst they were devoutly employed in celebrating the festival of Easter.[43](#) The execution of the stratagem, or, as it was termed by the clergy, of the sacrilege, was entrusted to Saul, a Barbarian and a Pagan, who had served, however, with distinguished reputation among the veteran generals of Theodosius. The camp of the Goths, which Alaric had pitched in the neighbourhood of Pollentia,[44](#) was thrown into confusion by the sudden and impetuous charge of the Imperial cavalry; but, in a few moments, the undaunted genius of their leader gave them an order, and a field, of battle; and, as soon as they had recovered from their astonishment, the pious confidence, that the God of the Christians would assert their cause, added new strength to their native valour. In this engagement, which was long maintained with equal courage and success, the chief of the Alani, whose diminutive and savage form concealed a magnanimous soul, approved his suspected loyalty by the zeal with which he fought, and fell, in the service of the republic; and the fame of this gallant Barbarian has been imperfectly preserved in the verses of Claudian, since the poet, who celebrates his virtue, has omitted the mention of his name. His death was followed by the flight and dismay of the squadrons which he commanded; and the defeat of the wing of cavalry might have decided the victory of Alaric, if Stilicho had not immediately led the Roman and Barbarian infantry to the attack. The skill of the general and the bravery of the soldiers surmounted every obstacle. In the evening of the bloody day, the Goths retreated from the field of battle; the intrenchments of their camp were forced, and the scene of rapine and slaughter made some atonement for the calamities which they had inflicted on the subjects of the empire.[45](#) The magnificent spoils of Corinth and Argos enriched the veterans of the West; the captive wife of Alaric, who had impatiently claimed his promise of Roman jewels and Patrician handmaids,[46](#) was reduced to implore the mercy of the insulting foe; and many thousand prisoners, released from the Gothic chains, dispersed through the provinces of Italy the praises of their heroic deliverer. The triumph of Stilicho[47](#) was compared by the poet, and perhaps by the public, to that of Marius; who, in the same part of

Italy, had encountered and destroyed another army of Northern Barbarians. The huge bones, and the empty helmets, of the Cimbri and of the Goths would easily be confounded by succeeding generations; and posterity might erect a common trophy to the memory of the two most illustrious generals who had vanquished, on the same memorable ground, the two most formidable enemies of Rome.[48](#)

The eloquence of Claudian[49](#) has celebrated with lavish applause the victory of Pollentia, one of the most glorious days in the life of his patron; but his reluctant and partial muse bestows more genuine praise on the character of the Gothic king. His name is indeed branded with the reproachful epithets of pirate and robber, to which the conquerors of every age are so justly entitled; but the poet of Stilicho is compelled to acknowledge that Alaric possessed the invincible temper of mind which rises superior to every misfortune and derives new resources from adversity. After the total defeat of his infantry he escaped, or rather withdrew, from the field of battle, with the greatest part of his cavalry entire and unbroken. Without wasting a moment to lament the irreparable loss of so many brave companions, he left his victorious enemy to bind in chains the captive images of a Gothic king;[50](#) and boldly resolved to break through the unguarded passes of the Apennine, to spread desolation over the fruitful face of Tuscany, and to conquer or die before the gates of Rome.[51](#) The capital was saved by the active and incessant diligence of Stilicho: but he respected the despair of his enemy; and, instead of committing the fate of the republic to the chance of another battle, he proposed to purchase the absence of the Barbarians. The spirit of Alaric would have rejected such terms, the permission of a retreat and the offer of a pension, with contempt and indignation; but he exercised a limited and precarious authority over the independent chieftains, who had raised him, for *their* service, above the rank of his equals; they were still less disposed to follow an unsuccessful general, and many of them were tempted to consult their interest by a private negotiation with the minister of Honorius. The king submitted to the voice of his people, ratified the treaty with the empire of the West, and repassed the Po, with the remains of the flourishing army which he had led into Italy. A considerable part of the Roman forces still continued to attend his motions; and Stilicho, who maintained a secret correspondence with some of the Barbarian chiefs, was punctually apprized of the designs that were formed in the camp and council of Alaric. The king of the Goths, ambitious to signalise his retreat by some splendid achievement, had resolved to occupy the important city of Verona, which commands the principal passage of the Rhætian Alps; and directing his march through the territories of those German tribes, whose alliance would restore his exhausted strength, to invade, on the side of the Rhine, the wealthy and unsuspecting provinces of Gaul. Ignorant of the treason, which had already betrayed his bold and judicious enterprise, he advanced towards the passes of the mountains, already possessed by the Imperial troops; where he was exposed, almost at the same instant, to a general attack in the front, on his flanks, and in the rear. In this bloody action, at a small distance from the walls of Verona,[52](#) the loss of the Goths

was not less heavy than that which they had sustained in the defeat of Pollentia; and their valiant king, who escaped by the swiftness of his horse, must either have been slain or made prisoner, if the hasty rashness of the Alani had not disappointed the measures of the Roman general. Alaric secured the remains of his army on the adjacent rocks; and prepared himself with undaunted resolution to maintain a siege against the superior numbers of the enemy, who invested him on all sides. But he could not oppose the destructive progress of hunger and disease; nor was it possible for him to check the continual desertion of his impatient and capricious Barbarians. In this extremity he still found resources in his own courage, or in the moderation of his adversary; and the retreat of the Gothic king was considered as the deliverance of Italy.⁵³ Yet the people and even the clergy, incapable of forming any rational judgment of the business of peace and war, presumed to arraign the policy of Stilicho, who so often vanquished, so often surrounded, and so often dismissed the implacable enemy of the republic. The first moment of the public safety is devoted to gratitude and joy; but the second is diligently occupied by envy and calumny.⁵⁴

The citizens of Rome had been astonished by the approach of Alaric; and the diligence with which they laboured to restore the walls of the capital confessed their own fears and the decline of the empire. After the retreat of the Barbarians, Honorius was directed to accept the dutiful invitation of the senate, and to celebrate in the Imperial city the auspicious era of the Gothic victory and of his sixth consulship.⁵⁵ The suburbs and the streets from the Milvian bridge to the Palatine mount, were filled by the Roman people, who, in the space of an hundred years, had only thrice been honoured with the presence of their sovereigns. While their eyes were fixed on the chariot where Stilicho was deservedly seated by the side of his royal pupil, they applauded the pomp of a triumph, which was not stained, like that of Constantine, or of Theodosius, with civil blood. The procession passed under a lofty arch, which had been purposely erected: but in less than seven years the Gothic conquerors of Rome might read, if they were able to read, the superb inscription of that monument, which attested the total defeat and destruction of their nation.⁵⁶ The emperor resided several months in the capital, and every part of his behaviour was regulated with care to conciliate the affection of the clergy, the senate, and the people of Rome. The clergy was edified by his frequent visits and liberal gifts to the shrines of the apostles. The senate, who in the triumphal procession had been excused from the humiliating ceremony of preceding on foot the Imperial chariot, was treated with the decent reverence which Stilicho always affected for that assembly. The people was repeatedly gratified by the attention and courtesy of Honorius in the public games, which were celebrated on that occasion with a magnificence not unworthy of the spectator. As soon as the appointed number of chariot races was concluded, the decoration of the Circus was suddenly changed; the hunting of wild beasts afforded a various and splendid entertainment; and the chase was succeeded by a military dance, which seems in the lively description of Claudian to present the image of a modern tournament.

In these games of Honorius, the inhuman combats of gladiators⁵⁷ polluted, for the last time, the amphitheatre of Rome. The first Christian emperor may claim the honour of the first edict which condemned the art and amusement of shedding human blood;⁵⁸ but this benevolent law expressed the wishes of the prince, without reforming an inveterate abuse, which degraded a civilised nation below the condition of savage cannibals. Several hundred, perhaps several thousand, victims were annually slaughtered in the great cities of the empire; and the month of December, more peculiarly devoted to the combats of gladiators, still exhibited to the eyes of the Roman people a grateful spectacle of blood and cruelty. Amidst the general joy of the victory of Pollentia, a Christian poet exhorted the emperor to extirpate by his authority the horrid custom which had so long resisted the voice of humanity and religion.⁵⁹

The pathetic representations of Prudentius were less effectual than the generous boldness of Telemachus, an Asiatic monk, whose death was more useful to mankind than his life.⁶⁰ The Romans were provoked by the interruption of their pleasures; and the rash monk, who had descended into the arena to separate the gladiators, was overwhelmed under a shower of stones. But the madness of the people soon subsided; they respected the memory of Telemachus, who had deserved the honours of martyrdom; and they submitted, without a murmur, to the laws of Honorius, which abolished for ever the human sacrifices of the amphitheatre. The citizens who adhered to the manners of their ancestors, might perhaps insinuate that the last remains of a martial spirit were preserved in this school of fortitude, which accustomed the Romans to the sight of blood and to the contempt of death: a vain and cruel prejudice, so nobly confuted by the valour of ancient Greece and of modern Europe.⁶¹

Armour of Gladiators (found at Ercolano, and now in the National Museum, Naples)

The recent danger to which the person of the emperor had been exposed in the defenceless palace of Milan urged him to seek a retreat in some inaccessible fortress of Italy, where he might securely remain while the open country was covered by a deluge of Barbarians. On the coast of the Hadriatic, about ten or twelve miles from the most southern of the seven mouths of the Po, the Thessalians had founded the ancient colony of Ravenna,[62](#) which they afterwards resigned to the natives of Umbria. Augustus, who had observed the opportunity of the place, prepared, at the distance of three miles from the old town, a capacious harbour for the reception of two hundred and fifty ships of war. This naval establishment, which included the arsenals and magazines, the barracks of the troops, and the houses of the artificers, derived its origin and name from the permanent station of the Roman fleet; the intermediate space was soon filled with buildings and inhabitants, and the three extensive and populous quarters of Ravenna gradually contributed to form one of the most important cities of Italy. The principal canal of Augustus poured a copious stream of the waters of the Po through the midst of the city to the entrance of the harbour; the same waters were introduced into the profound ditches that encompassed the walls; they were distributed by a thousand subordinate canals into every part of the city, which they divided into a variety of small islands; the communication was maintained only by the use of boats and bridges; and the houses of Ravenna, whose appearance may be compared to that of Venice, were raised on the foundation of wooden piles. The adjacent country, to the distance of many miles, was a deep and impassable morass; and the artificial causeway, which connected Ravenna with the continent, might be easily guarded or destroyed on the approach of an hostile army. These morasses were interspersed, however, with vineyards; and, though the soil was exhausted by four or five crops, the town enjoyed a more plentiful supply of wine than of fresh water.[63](#) The air, instead of receiving the sickly and almost pestilential exhalations of low and marshy grounds, was distinguished, like the neighbourhood of Alexandria, as uncommonly pure and salubrious; and this singular advantage was ascribed to the regular tides of the Hadriatic, which swept the canals, interrupted the unwholesome stagnation of the waters, and floated every day the vessels of the adjacent country into the heart of Ravenna. The gradual retreat of the sea has left the modern city at the distance of four miles from the Hadriatic; and as early as the fifth or sixth century of the Christian era the port of Augustus was converted into pleasant orchards, and a lonely grove of pines covered the ground where the Roman fleet once rode at anchor.[64](#) Even this alteration contributed to increase the natural strength of the place; and the shallowness of the water was a sufficient barrier against the large ships of the enemy. This advantageous situation was fortified by art and labour; and in the twentieth year of his age the emperor of the West, anxious only for his personal safety, retired to the perpetual confinement of the walls and morasses of Ravenna. The example of Honorius was imitated by his feeble successors, the Gothic kings, and afterwards the Exarchs, who occupied the throne and palace of the emperors; and, till the middle of the eighth century, Ravenna was considered as the seat of government and the capital of Italy.[65](#)

The fears of Honorius were not without foundation, nor were his precautions without effect. While Italy rejoiced in her deliverance from the Goths, a furious tempest was excited among the nations of Germany, who yielded to the irresistible impulse that appears to have been gradually communicated from the eastern extremity of the continent of Asia. The Chinese annals, as they have been interpreted by the learned industry of the present age, may be usefully applied to reveal the secret and remote causes of the fall of the Roman empire. The extensive territory to the north of the great wall was possessed, after the flight of the Huns, by the victorious Sien-pi, who were sometimes broken into independent tribes, and re-united under a supreme chief; till at length, styling themselves *Topa*, or masters of the earth, they acquired a more solid consistence and a more formidable power. The Topa soon compelled the pastoral nations of the eastern desert to acknowledge the superiority of their arms; they invaded China in a period of weakness and intestine discord; and these fortunate Tartars, adopting the laws and manners of the vanquished people, founded an Imperial dynasty, which reigned near one hundred and sixty years over the northern provinces of the monarchy. Some generations before they ascended the throne of China one of the Topa princes had enlisted in his cavalry a slave of the name of Moko, renowned for his valour; but who was tempted by the fear of punishment to desert his standard and to range the desert at the head of an hundred followers. This gang of robbers and outlaws swelled into a camp, a tribe, a numerous people, distinguished by the appellation of *Geougen*; and their hereditary chieftains, the posterity of Moko, the slave, assumed their rank among the Scythian monarchs. The youth of Toulun, the greatest of his descendants, was exercised by those misfortunes which are the school of heroes. He bravely struggled with adversity, broke the imperious yoke of the Topa, and became the legislator of his nation and the conqueror of Tartary. His troops were distributed into regular bands of an hundred and of a thousand men; cowards were stoned to death; the most splendid honours were proposed as the reward of valour; and Toulun, who had knowledge enough to despise the learning of China, adopted only such arts and institutions as were favourable to the military spirit of his government. His tents, which he removed in the winter season to a more southern latitude, were pitched during the summer on the fruitful banks of the Selinga. His conquests stretched from Corea far beyond the river Irtysh. He vanquished in the country to the north of the Caspian Sea the nation of the *Huns*; and the new title of *Khan* or *Cagan* expressed the fame and power which he derived from this memorable victory.[66](#)

The chain of events is interrupted, or rather is concealed, as it passes from the Volga to the Vistula, through the dark interval which separates the extreme limits of the Chinese and of the Roman geography. Yet the temper of the Barbarians and the experience of successive emigrations sufficiently declare that the Huns, who were oppressed by the arms of the Geougen, soon withdrew from the presence of an insulting victor. The countries towards the Euxine were already occupied by their kindred tribes; and their hasty flight, which they soon converted into a bold attack, would more naturally be

directed towards the rich and level plains through which the Vistula gently flows into the Baltic Sea. The North must again have been alarmed and agitated by the invasion of the Huns; and the nations who retreated before them must have pressed with incumbent weight on the confines of Germany.⁶⁷ The inhabitants of those regions which the ancients have assigned to the Suevi, the Vandals, and the Burgundians might embrace the resolution of abandoning to the fugitives of Sarmatia their woods and morasses; or at least of discharging their superfluous numbers on the provinces of the Roman empire.⁶⁸ About four years after the victorious Toulun had assumed the title of Khan of the Geougen, another Barbarian, the haughty Rhodogast or Radagaisus,⁶⁹ marched from the northern extremities of Germany almost to the gates of Rome, and left the remains of his army to achieve the destruction of the West. The Vandals, the Suevi, and the Burgundians formed the strength of this mighty host; but the Alani, who had found an hospitable reception in their new seats, added their active cavalry to the heavy infantry of the Germans; and the Gothic adventurers crowded so eagerly to the standard of Radagaisus that, by some historians, he has been styled the king of the Goths. Twelve thousand warriors, distinguished above the vulgar by their noble birth or their valiant deeds, glittered in the van;⁷⁰ and the whole multitude, which was not less than two hundred thousand fighting men, might be increased by the accession of women, of children, and of slaves, to the amount of four hundred thousand persons. This formidable emigration issued from the same coast of the Baltic which had poured forth the myriads of the Cimbri and Teutones to assault Rome and Italy in the vigour of the republic. After the departure of those Barbarians, their native country, which was marked by the vestiges of their greatness, long ramparts and gigantic moles,⁷¹ remained during some ages a vast and dreary solitude; till the human species was renewed by the powers of generation, and the vacancy was filled by the influx of new inhabitants. The nations who now usurp an extent of land which they are unable to cultivate would soon be assisted by the industrious poverty of their neighbours, if the government of Europe did not protect the claims of dominion and property.

The correspondence of nations was in that age so imperfect and precarious that the revolutions of the North might escape the knowledge of the court of Ravenna; till the dark cloud which was collected along the coast of the Baltic burst in thunder upon the banks of the Upper Danube. The emperor of the West, if his ministers disturbed his amusements by the news of the impending danger, was satisfied with being the occasion, and the spectator, of the war.⁷² The safety of Rome was entrusted to the counsels and the sword of Stilicho; but such was the feeble and exhausted state of the empire that it was impossible to restore the fortifications of the Danube, or to prevent, by a vigorous effort, the invasion of the Germans.⁷³ The hopes of the vigilant minister of Honorius were confined to the defence of Italy. He once more abandoned the provinces, recalled the troops, pressed the new levies, which were rigorously exacted and pusillanimously eluded, employed the most efficacious means to arrest, or allure,

the deserters, and offered the gift of freedom, and of two pieces of gold, to all the slaves who would enlist.⁷⁴ By these efforts he painfully collected, from the subjects of a great empire, an army of thirty or forty thousand men, which, in the days of Scipio or Camillus, would have been instantly furnished by the free citizens of the territory of Rome.⁷⁵ The thirty legions of Stilicho were reinforced by a large body of Barbarian auxiliaries; the faithful Alani were personally attached to his service; and the troops of Huns and of Goths, who marched under the banners of their native princes, Huldin and Sarus, were animated by interest and resentment to oppose the ambition of Radagaisus. The king of the confederate Germans passed, without resistance, the Alps, the Po, and the Apennine, leaving on one hand the inaccessible palace of Honorius, securely buried among the marshes of Ravenna, and, on the other, the camp of Stilicho, who had fixed his headquarters at Ticinum, or Pavia, but who seems to have avoided a decisive battle, till he had assembled his distant forces. Many cities of Italy were pillaged, or destroyed, and the siege of Florence⁷⁶ by Radagaisus is one of the earliest events in the history of that celebrated republic, whose firmness checked and delayed the unskilful fury of the Barbarians. The senate and people trembled at their approach within an hundred and eighty miles of Rome, and anxiously compared the danger which they had escaped with the new perils to which they were exposed. Alaric was a Christian and a soldier, the leader of a disciplined army; who understood the laws of war, who respected the sanctity of treaties, and who had familiarly conversed with the subjects of the empire in the same camps, and the same churches. The savage Radagaisus was a stranger to the manners, the religion, and even the language of the civilised nations of the South. The fierceness of his temper was exasperated by cruel superstition, and it was universally believed that he had bound himself by a solemn vow to reduce the city into a heap of stones and ashes, and to sacrifice the most illustrious of the Roman senators on the altars of those gods who were appeased by human blood. The public danger, which should have reconciled all domestic animosities, displayed the incurable madness of religious faction. The oppressed votaries of Jupiter and Mercury respected, in the implacable enemy of Rome, the character of a devout Pagan; loudly declared that they were more apprehensive of the sacrifices than of the arms of Radagaisus, and secretly rejoiced in the calamities of their country, which condemned the faith of their Christian adversaries.⁷⁷

Florence was reduced to the last extremity, and the fainting courage of the citizens was supported only by the authority of St. Ambrose, who had communicated, in a dream, the promise of a speedy deliverance.⁷⁸ On a sudden, they beheld, from their walls, the banners of Stilicho, who advanced, with his united force, to the relief of the faithful city, and who soon marked that fatal spot for the grave of the Barbarian host. The apparent contradictions of those writers who variously relate the defeat of Radagaisus may be reconciled, without offering much violence to their respective testimonies. Orosius and Augustin, who were intimately connected by friendship and religion, ascribe this miraculous victory to the providence of God rather than to the valour of

man.⁷⁹ They strictly exclude every idea of chance, or even of bloodshed, and positively affirm that the Romans, whose camp was the scene of plenty and idleness, enjoyed the distress of the Barbarians, slowly expiring on the sharp and barren ridge of the hills of Fæsulæ, which rise above the city of Florence. Their extravagant assertion that not a single soldier of the Christian army was killed, or even wounded, may be dismissed with silent contempt; but the rest of the narrative of Augustin and Orosius is consistent with the state of the war and the character of Stilicho. Conscious that he commanded the *last* army of the republic, his prudence would not expose it in the open field to the headstrong fury of the Germans. The method of surrounding the enemy with strong lines of circumvallation, which he had twice employed against the Gothic king, was repeated on a larger scale, and with more considerable effect. The examples of Cæsar must have been familiar to the most illiterate of the Roman warriors; and the fortifications of Dyrrachium, which connected twenty-four castles by a perpetual ditch and rampart of fifteen miles, afforded the model of an intrenchment which might confine and starve the most numerous host of Barbarians.⁸⁰ The Roman troops had less degenerated from the industry than from the valour of their ancestors, and, if the servile and laborious work offended the pride of the soliders, Tuscany could supply many thousand peasants who would labour, though perhaps they would not fight, for the salvation of their native country. The imprisoned multitude of horses and men⁸¹ was gradually destroyed by famine rather than by the sword; but the Romans were exposed, during the progress of such an extensive work, to the frequent attacks of an impatient enemy. The despair of the hungry Barbarians would precipitate them against the fortifications of Stilicho; the general might sometimes indulge the ardour of his brave auxiliaries, who eagerly pressed to assault the camp of the Germans; and these various incidents might produce the sharp and bloody conflicts which dignify the narrative of Zosimus and the Chronicles of Prosper and Marcellinus.⁸² A seasonable supply of men and provisions had been introduced into the walls of Florence, and the famished host of Radagaisus was in its turn besieged. The proud monarch of so many warlike nations, after the loss of his bravest warriors, was reduced to confide either in the faith of a capitulation or in the clemency of Stilicho.⁸³ But the death of the royal captive, who was ignominiously beheaded, disgraced the triumph of Rome and of Christianity, and the short delay of his execution was sufficient to brand the conqueror with the guilt of cool and deliberate cruelty.⁸⁴ The famished Germans who escaped the fury of the auxiliaries were sold as slaves, at the contemptible price of as many single pieces of gold; but the difference of food and climate swept away great numbers of those unhappy strangers; and it was observed that the inhuman purchasers, instead of reaping the fruits of their labour, were soon obliged to provide the expense of their interment. Stilicho informed the emperor and the senate of his success; and deserved, a second time, the glorious title of Deliverer of Italy.⁸⁵

The fame of the victory, and more especially of the miracle, has encouraged a vain persuasion that the whole army, or rather nation, of Germans, who migrated from the

shores of the Baltic, miserably perished under the walls of Florence. Such indeed was the fate of Radagaisus himself, of his brave and faithful companions, and of more than one third of the various multitude of Sueves and Vandals, of Alani and Burgundians, who adhered to the standard of their general.[86](#) The union of such an army might excite our surprise, but the causes of separation are obvious and forcible; the pride of birth, the insolence of valour, the jealousy of command, the impatience of subordination, and the obstinate conflict of opinions, of interests, and of passions, among so many kings and warriors, who were untaught to yield, or to obey. After the defeat of Radagaisus, two parts of the German host, which must have exceeded the number of one hundred thousand men, still remained in arms, between the Apennine and the Alps, or between the Alps and the Danube. It is uncertain whether they attempted to revenge the death of their general; but their irregular fury was soon diverted by the prudence and firmness of Stilicho, who opposed their march, and facilitated their retreat; who considered the safety of Rome and Italy as the great object of his care, and who sacrificed, with too much indifference, the wealth and tranquillity of the distant provinces.[87](#) The Barbarians acquired, from the junction of some Pannonian deserters, the knowledge of the country and of the roads; and the invasion of Gaul, which Alaric had designed, was executed by the remains of the great army of Radagaisus.[88](#)

Yet, if they expected to derive any assistance from the tribes of Germany, who inhabited the banks of the Rhine, their hopes were disappointed: The Alemanni preserved a state of inactive neutrality; and the Franks distinguished their zeal and courage in the defence of the empire. In the rapid progress down the Rhine, which was the first act of the administration of Stilicho, he had applied himself, with peculiar attention, to secure the alliance of the warlike Franks, and to remove the irreconcilable enemies of peace and of the republic. Marcomir, one of their kings, was publicly convicted before the tribunal of the Roman magistrate, of violating the faith of treaties. He was sentenced to a mild, but distant, exile in the province of Tuscany; and this degradation of the regal dignity was so far from exciting the resentment of his subjects that they punished with death the turbulent Sunno, who attempted to revenge his brother; and maintained a dutiful allegiance to the princes who were established on the throne by the choice of Stilicho.[89](#) When the limits of Gaul and Germany were shaken by the northern emigration, the Franks bravely encountered the single force of the Vandals, who, regardless of the lessons of adversity, had again separated their troops from the standard of their Barbarian allies. They paid the penalty of their rashness, and twenty thousand Vandals, with their king Godigisclus, were slain in the field of battle. The whole people must have been extirpated if the squadrons of the Alani, advancing to their relief, had not trampled down the infantry of the Franks, who, after an honourable resistance, were compelled to relinquish the unequal contest. The victorious confederates pursued their march; and on the last day of the year, in a season when the waters of the Rhine were most probably frozen, they entered, without opposition, the defenceless provinces of Gaul.

This memorable passage of the Suevi, the Vandals, the Alani, and the Burgundians, who never afterwards retreated, may be considered as the fall of the Roman empire in the countries beyond the Alps; and the barriers, which had so long separated the savage and the civilised nations of the earth, were from that fatal moment levelled with the ground.[90](#)

While the peace of Germany was secured by the attachment of the Franks, and the neutrality of the Alemanni, the subjects of Rome, unconscious of their approaching calamities, enjoyed the state of quiet and prosperity, which had seldom blessed the frontiers of Gaul. Their flocks and herds were permitted to graze in the pastures of the Barbarians; their huntsmen penetrated, without fear or danger, into the darkest recesses of the Hercynian wood.[91](#) The banks of the Rhine were crowned, like those of the Tiber, with elegant houses, and well-cultivated farms; and, if a poet descended the river, he might express his doubt on which side was situated the territory of the Romans.[92](#) This scene of peace and plenty was suddenly changed into a desert; and the prospect of the smoking ruins could alone distinguish the solitude of nature from the desolation of man. The flourishing city of Mentz was surprised and destroyed; and many thousand Christians were inhumanly massacred in the church. Worms perished after a long and obstinate siege; Strasburg, Spire, Rheims, Tournay, Arras, Amiens, experienced the cruel oppression of the German yoke; and the consuming flames of war spread from the banks of the Rhine over the greatest part of the seventeen provinces of Gaul. That rich and extensive country, as far as the ocean, the Alps, and the Pyrenees, was delivered to the Barbarians, who drove before them, in a promiscuous crowd, the bishop, the senator, and the virgin, laden with the spoils of their houses and altars.[93](#) The ecclesiastics, to whom we are indebted for this vague description of the public calamities, embraced the opportunity of exhorting the Christians to repent of the sins which had provoked the Divine Justice, and to renounce the perishable goods of a wretched and deceitful world. But, as the Pelagian controversy,[94](#) which attempts to sound the abyss of grace and predestination, soon became the serious employment of the Latin clergy; the Providence which had decreed, or foreseen, or permitted such a train of moral and natural evils was rashly weighed in the imperfect and fallacious balance of reason. The crimes and the misfortunes of the suffering people were presumptuously compared with those of their ancestors; and they arraigned the Divine Justice, which did not exempt from the common destruction the feeble, the guiltless, the infant portion of the human species. These idle disputants overlooked the invariable laws of nature, which have connected peace with innocence, plenty with industry, and safety with valour. The timid and selfish policy of the court of Ravenna might recall the Palatine legions for the protection of Italy; the remains of the stationary troops might be unequal to the arduous task; and the Barbarian auxiliaries might prefer the unbounded licence of spoil to the benefits of a moderate and regular stipend. But the provinces of Gaul were filled with a numerous race of hardy and robust youth, who, in the defence of their houses,

their families, and their altars, if they had dared to die, would have deserved to vanish. The knowledge of their native country would have enabled them to oppose continual and insuperable obstacles to the progress of an invader; and the deficiency of the Barbarians, in arms as well as in discipline, removed the only pretence which excuses the submission of a populous country to the inferior numbers of a veteran army. When France was invaded by Charles the Fifth, he inquired of a prisoner how many *days* Paris might be distant from the frontier. “Perhaps *twelve*, but they will be days of battle;”⁹⁵ such was the gallant answer which checked the arrogance of that ambitious prince. The subjects of Honorius and those of Francis I. were animated by a very different spirit; and in less than two years the divided troops of the savages of the Baltic, whose numbers, were they fairly stated, would appear contemptible, advanced without a combat to the foot of the Pyrenæan mountains.

In the early part of the reign of Honorius, the vigilance of Stilicho had successfully guarded the remote island of Britain from her incessant enemies of the ocean, the mountains, and the Irish coast.⁹⁶ But those restless Barbarians could not neglect the fair opportunity of the Gothic war, when the walls and stations of the province were stripped of the Roman troops. If any of the legionaries were permitted to return from the Italian expedition, their faithful report of the court and character of Honorius must have tended to dissolve the bonds of allegiance and to exasperate the seditious temper of the British army. The spirit of revolt, which had formerly disturbed the age of Gallienus, was revived by the capricious violence of the soldiers; and the unfortunate, perhaps the ambitious, candidates, who were the objects of their choice, were the instruments, and at length the victims, of their passion.⁹⁷ Marcus was the first whom they placed on the throne, as the lawful emperor of Britain, and of the West. They violated, by the hasty murder of Marcus, the oath of fidelity which they had imposed on themselves; and *their* disapprobation of his manners may seem to inscribe an honourable epitaph on his tomb. Gratian was the next whom they adorned with the diadem and the purple; and, at the end of four months, Gratian experienced the fate of his predecessor. The memory of the great Constantine, whom the British legions had given to the church and to the empire, suggested the singular motive of their third choice. They discovered in the ranks a private soldier of the name of Constantine, and their impetuous levity had already seated him on the throne, before they perceived his incapacity to sustain the weight of that glorious appellation.⁹⁸ Yet the authority of Constantine was less precarious, and his government was more successful, than the transient reigns of Marcus and of Gratian. The danger of leaving his inactive troops in those camps which had been twice polluted with blood and sedition urged him to attempt the reduction of the Western provinces. He landed at Boulogne with an inconsiderable force; and, after he had reposed himself some days, he summoned the cities of Gaul, which had escaped the yoke of the Barbarians, to acknowledge their lawful sovereign. They obeyed the summons without reluctance. The neglect of the court of Ravenna had absolved a deserted people from the duty of allegiance; their actual distress encouraged them to accept any circumstances of change, without

apprehension, and perhaps with some degree of hope; and they might flatter themselves that the troops, the authority, and even the name of a Roman emperor, who fixed his residence in Gaul, would protect the unhappy country from the rage of the Barbarians. The first successes of Constantine against the detached parties of the Germans were magnified by the voice of adulation into splendid and decisive victories; which the reunion and insolence of the enemy soon reduced to their just value. His negotiations procured a short and precarious truce; and, if some tribes of the Barbarians were engaged, by the liberality of his gifts and promises, to undertake the defence of the Rhine, these expensive and uncertain treaties, instead of restoring the pristine vigour of the Gallic frontier, served only to disgrace the majesty of the prince and to exhaust what yet remained of the treasures of the republic. Elated, however, with this imaginary triumph, the vain deliverer of Gaul advanced into the provinces of the South, to encounter a more pressing and personal danger. Sarus the Goth was ordered to lay the head of the rebel at the feet of the emperor Honorius; and the forces of Britain and Italy were unworthily consumed in this domestic quarrel. After the loss of his two bravest generals Justinian and Nevigastes, the former of whom was slain in the field of battle, the latter in a peaceful and treacherous interview, Constantine fortified himself within the walls of Vienna. The place was ineffectually attacked seven days; and the Imperial army supported, in a precipitate retreat, the ignominy of purchasing a secure passage from the freebooters and outlaws of the Alps.⁹⁹ Those mountains now separated the dominions of two rival monarchs: and the fortifications of the double frontier were guarded by the troops of the empire, whose arms would have been more usefully employed to maintain the Roman limits against the Barbarians of Germany and Scythia.

On the side of the Pyrenees, the ambition of Constantine might be justified by the proximity of danger; but his throne was soon established by the conquest, or rather submission, of Spain; which yielded to the influence of regular and habitual subordination, and received the laws and magistrates of the Gallic prefecture. The only opposition which was made to the authority of Constantine proceeded not so much from the powers of government, or the spirit of the people, as from the private zeal and interest of the family of Theodosius. Four brothers¹⁰⁰ had obtained by the favour of their kinsman, the deceased emperor, an honourable rank, and ample possessions, in their native country; and the grateful youths resolved to risk those advantages in the service of his son. After an unsuccessful effort to maintain their ground at the head of the stationary troops of Lusitania, they retired to their estates; where they armed and levied, at their own expense, a considerable body of slaves and dependents, and boldly marched to occupy the strong posts of the Pyrenæan mountains. This domestic insurrection alarmed and perplexed the sovereign of Gaul and Britain; and he was compelled to negotiate with some troops of Barbarian auxiliaries, for the service of the Spanish war. They were distinguished by the title of *Honorians*; ¹⁰¹ a name which might have reminded them of their fidelity to their lawful sovereign; and, if it should

candidly be allowed that the *Scots* were influenced by any partial affection for a British prince, the *Moors* and *Marcomanni* could be tempted only by the profuse liberality of the usurper, who distributed among the Barbarians the military, and even the civil, honours of Spain. The nine bands of *Honorians*, which may be easily traced on the establishment of the Western empire, could not exceed the number of five thousand men; yet this inconsiderable force was sufficient to terminate a war which had threatened the power and safety of Constantine. The rustic army of the Theodosian family was surrounded and destroyed in the Pyrenees: two of the brothers had the good fortune to escape by sea to Italy, or the East; the other two, after an interval of suspense, were executed at Arles; and, if Honorius could remain insensible of the public disgrace, he might perhaps be affected by the personal misfortunes of his generous kinsmen. Such were the feeble arms which decided the possession of the Western provinces of Europe, from the wall of Antoninus to the columns of Hercules. The events of peace and war have undoubtedly been diminished by the narrow and imperfect view of the historians of the times, who were equally ignorant of the causes and of the effects of the most important revolutions. But the total decay of the national strength had annihilated even the last resource of a despotic government; and the revenue of exhausted provinces could no longer purchase the military service of a discontented and pusillanimous people.

The poet whose flattery has ascribed to the Roman eagle the victories of Pollentia and Verona pursues the hasty retreat of Alaric, from the confines of Italy, with a horrid train of imaginary spectres, such as might hover over an army of Barbarians, which was almost exterminated by war, famine, and disease.¹⁰² In the course of this unfortunate expedition, the king of the Goths must indeed have sustained a considerable loss, and his harassed forces required an interval of repose, to recruit their numbers and revive their confidence. Adversity had exercised, and displayed, the genius of Alaric; and the fame of his valour invited to the Gothic standard the bravest of the Barbarian warriors, who, from the Euxine to the Rhine, were agitated by the desire of rapine and conquest. He had deserved the esteem, and he soon accepted the friendship, of Stilicho himself. Renouncing the service of the emperor of the East, Alaric concluded, with the court of Ravenna, a treaty of peace and alliance, by which he was declared master-general of the Roman armies throughout the prefecture of Illyricum; as it was claimed, according to the true and ancient limits, by the minister of Honorius.¹⁰³ The execution of the ambitious design, which was either stipulated, or implied, in the articles of the treaty, appears to have been suspended by the formidable irruption of Radagaisus; and the neutrality of the Gothic king may perhaps be compared to the indifference of Cæsar, who, in the conspiracy of Catiline, refused either to assist or to oppose the enemy of the republic. After the defeat of the Vandals, Stilicho resumed his pretensions to the provinces of the East; appointed civil magistrates for the administration of justice, and of the finances; and declared his impatience to lead to the gates of Constantinople the united armies of the Romans and of the Goths. The prudence, however, of Stilicho, his aversion to civil war, and his

perfect knowledge of the weakness of the state may countenance the suspicion that domestic peace, rather than foreign conquest, was the object of his policy; and that his principal care was to employ the forces of Alaric at a distance from Italy. This design could not long escape the penetration of the Gothic king, who continued to hold a doubtful, and perhaps a treacherous, correspondence with the rival courts, who protracted, like a dissatisfied mercenary, his languid operations in Thessaly and Epirus, and who soon returned to claim the extravagant reward of his ineffectual services. From his camp near Æmona,[104](#) on the confines of Italy, he transmitted, to the emperor of the West, a long account of promises, of expenses, and of demands; called for immediate satisfaction and clearly intimated the consequences of a refusal. Yet, if his conduct was hostile, his language was decent and dutiful. He humbly professed himself the friend of Stilicho, and the soldier of Honorius; offered his person and his troops to march, without delay, against the usurper of Gaul; and solicited, as a permanent retreat for the Gothic nation, the possession of some vacant province of the Western empire.

The political and secret transactions of two statesmen, who laboured to deceive each other and the world, must for ever have been concealed in the impenetrable darkness of the cabinet, if the debates of a popular assembly had not thrown some rays of light on the correspondence of Alaric and Stilicho. The necessity of finding some artificial support for a government, which, from a principle, not of moderation, but of weakness, was reduced to negotiate with its own subjects, had insensibly revived the authority of the Roman senate; and the minister of Honorius respectfully consulted the legislative council of the republic. Stilicho assembled the senate in the palace of the Cæsars; represented, in a studied oration, the actual state of affairs; proposed the demands of the Gothic king, and submitted to their consideration the choice of peace or war. The senators, as if they had been suddenly awakened from a dream of four hundred years, appeared on this important occasion to be inspired by the courage, rather than by the wisdom, of their predecessors. They loudly declared, in regular speeches, or in tumultuary acclamations, that it was unworthy of the majesty of Rome to purchase a precarious and disgraceful truce from a Barbarian king; and that, in the judgment of a magnanimous people, the chance of ruin was always preferable to the certainty of dishonour. The minister, whose pacific intentions were seconded only by the voices of a few servile and venal followers, attempted to allay the general ferment, by an apology for his own conduct, and even for the demands of the Gothic prince. “The payment of a subsidy, which had excited the indignation of the Romans, ought not (such was the language of Stilicho) to be considered in the odious light either of a tribute or of a ransom, extorted by the menaces of a Barbarian enemy. Alaric had faithfully asserted the just pretensions of the republic to the provinces which were usurped by the Greeks of Constantinople; he modestly required the fair and stipulated recompense of his services; and, if he had desisted from the prosecution of his enterprise, he had obeyed, in his retreat, the peremptory though private letters of the emperor himself. These contradictory orders (he would not dissemble the errors of his

own family) had been procured by the intercession of Serena. The tender piety of his wife had been too deeply affected by the discord of the royal brothers, the sons of her adopted father; and the sentiments of nature had too easily prevailed over the stern dictates of the public welfare.” These ostensible reasons, which faintly disguise the obscure intrigues of the palace of Ravenna, were supported by the authority of Stilicho; and obtained, after a warm debate, the reluctant approbation of the senate. The tumult of virtue and freedom subsided; and the sum of four thousand pounds of gold was granted, under the name of a subsidy, to secure the peace of Italy, and to conciliate the friendship of the king of the Goths. Lampadius alone, one of the most illustrious members of the assembly, still persisted in his dissent; exclaimed with a loud voice, “This is not a treaty of peace, but of servitude;”[105](#) and escaped the danger of such bold opposition by immediately retiring to the sanctuary of a Christian church.

But the reign of Stilicho drew towards its end, and the proud minister might perceive the symptoms of his approaching disgrace. The generous boldness of Lampadius had been applauded; and the senate, so patiently resigned to a long servitude, rejected with disdain the offer of invidious and imaginary freedom. The troops, who still assumed the name and prerogatives of the Roman legions, were exasperated by the partial affection of Stilicho for the Barbarians; and the people imputed to the mischievous policy of the minister the public misfortunes, which were the natural consequence of their own degeneracy. Yet Stilicho might have continued to brave the clamours of the people, and even of the soldiers, if he could have maintained his dominion over the feeble mind of his pupil. But the respectful attachment of Honorius was converted into fear, suspicion, and hatred. The crafty Olympius,[106](#) who concealed his vices under the mask of Christian piety, had secretly undermined the benefactor by whose favour he was promoted to the honourable offices of the Imperial palace. Olympius revealed to the unsuspecting emperor, who had attained the twenty-fifth year of his age, that he was without weight, or authority, in his own government; and artfully alarmed his timid and indolent disposition by a lively picture of the designs of Stilicho, who already mediated the death of his sovereign, with the ambitious hope of placing the diadem on the head of his son Eucherius. The emperor was instigated, by his new favourite, to assume the tone of independent dignity; and the minister was astonished to find that secret resolutions were formed in the court and council, which were repugnant to his interest or to his intentions. Instead of residing in the palace at Rome, Honorius declared that it was his pleasure to return to the secure fortress of Ravenna. On the first intelligence of the death of his brother Arcadius, he prepared to visit Constantinople, and to regulate, with the authority of a guardian, the provinces of the infant Theodosius.[107](#) The representation of the difficulty and expense of such a distant expedition checked this strange and sudden sally of active diligence; but the dangerous project of showing the emperor to the camp of Pavia, which was composed of the Roman troops, the enemies of Stilicho, and his Barbarian auxiliaries, remained fixed and unalterable. The minister was pressed, by the advice of his confidant Justinian, a Roman advocate of a lively and penetrating genius, to oppose a journey so

prejudicial to his reputation and safety. His strenuous, but ineffectual, efforts confirmed the triumph of Olympius; and the prudent lawyer withdrew himself from the impending ruin of his patron.

In the passage of the emperor through Bologna, a mutiny of the guards was excited and appeased by the secret policy of Stilicho; who announced his instructions to decimate the guilty, and ascribed to his own intercession the merit of their pardon. After this tumult, Honourius embraced, for the last time, the minister whom he now considered as a tyrant, and proceeded on his way to the camp of Pavia, where he was received by the loyal acclamations of the troops who were assembled for the service of the Gallic war. On the morning of the fourth day, he pronounced, as he had been taught, a military oration in the presence of the soldiers, whom the charitable visits, and artful discourses, of Olympius had prepared to execute a dark and bloody conspiracy. At the first signal, they massacred the friends of Stilicho, the most illustrious officers of the empire; two Prætorian prefects, of Gaul, and of Italy; two masters-general, of the cavalry and infantry; the master of the offices; the quæstor, the treasurer, and the count of the domestics. Many lives were lost; many houses were plundered; the furious sedition continued to rage till the close of the evening; and the trembling emperor, who was seen in the streets of Pavia without his robes or diadem, yielded to the persuasions of his favourite, condemned the memory of the slain, and solemnly approved the innocence and fidelity of their assassins. The intelligence of the massacre of Pavia filled the mind of Stilicho with just and gloomy apprehensions; and he instantly summoned, in the camp of Bologna, a council of the confederate leaders who were attached to his service, and would be involved in his ruin. The impetuous voice of the assembly called aloud for arms, and for revenge; to march, without a moment's delay, under the banners of a hero whom they had so often followed to victory; to surprise, to oppress, to extirpate the guilty Olympius, and his degenerate Romans; and perhaps to fix the diadem on the head of their injured general. Instead of executing a resolution, which might have been justified by success, Stilicho hesitated till he was irrecoverably lost. He was still ignorant of the fate of the emperor; he distrusted the fidelity of his own party; and he viewed with horror the fatal consequences of arming a crowd of licentious Barbarians against the soldiers and people of Italy. The confederates, impatient of his timorous and doubtful delay, hastily retired, with fear and indignation. At the hour of midnight, Sarus, a Gothic warrior, renowned among the Barbarians themselves for his strength and valour, suddenly invaded the camp of his benefactor, plundered the baggage, cut in pieces the faithful Huns, who guarded his person, and penetrated to the tent, where the minister, pensive and sleepless, meditated on the dangers of his situation. Stilicho escaped with difficulty from the sword of the Goths; and, after issuing a last and generous admonition to the cities of Italy, to shut their gates against the Barbarians, his confidence, or his despair, urged him to throw himself into Ravenna, which was already in the absolute possession of his enemies. Olympius, who had assumed the dominion of Honourius, was speedily informed that his rival had embraced, as a

suppliant, the altar of the Christian church. The base and cruel disposition of the hypocrite was incapable of pity or remorse; but he piously affected to elude, rather than to violate, the privilege of the sanctuary. Count Heraclian, with a troop of soldiers, appeared, at the dawn of day, before the gates of the church of Ravenna. The bishop was satisfied by a solemn oath that the Imperial mandate only directed them to secure the person of Stilicho: but, as soon as the unfortunate minister had been tempted beyond the holy threshold, he produced the warrant for his instant execution. Stilicho supported, with calm resignation, the injurious names of traitor and parricide; repressed the unseasonable zeal of his followers, who were ready to attempt an ineffectual rescue; and, with a firmness not unworthy of the last of the Roman generals, submitted his neck to the sword of Heraclian.[108](#)

The servile crowd of the palace, who had so long adored the fortune of Stilicho, affected to insult his fall, and the most distant connection with the master-general of the West, which had so lately been a title to wealth and honours, was studiously denied and rigorously punished. His family, united by a triple alliance with the family of Theodosius, might envy the condition of the meanest peasant. The flight of his son Eucherius was intercepted, and the death of that innocent youth soon followed the divorce of Thermantia, who filled the place of her sister Maria, and who, like Maria, had remained a virgin in the Imperial bed.[109](#) The friends of Stilicho, who had escaped the massacre of Pavia, were persecuted by the implacable revenge of Olympius, and the most exquisite cruelty was employed to extort the confession of a treasonable and sacrilegious conspiracy. They died in silence: their firmness justified the choice,[110](#) and perhaps absolved the innocence, of their patron, and the despotic power which could take his life without a trial, and stigmatise his memory without a proof, has no jurisdiction over the impartial suffrage of posterity.[111](#) The services of Stilicho are great and manifest; his crimes, as they are vaguely stated in the language of flattery and hatred, are obscure, at least, and improbable. About four months after his death an edict was published in the name of Honorius to restore the free communication of the two empires which had been so long interrupted by the *public enemy*.[112](#) The minister whose fame and fortune depended on the prosperity of the state was accused of betraying Italy to the Barbarians, whom he repeatedly vanquished at Pollentia, at Verona, and before the walls of Florence. His pretended design of placing the diadem on the head of his son Eucherius could not have been conducted without preparations or accomplices, and the ambitious father would not surely have left the future emperor, till the twentieth year of his age, in the humble station of tribune of the notaries. Even the religion of Stilicho was arraigned by the malice of his rival. The seasonable and almost miraculous deliverance was devoutly celebrated by the applause of the clergy, who asserted that the restoration of idols and the persecution of the church would have been the first measure of the reign of Eucherius. The son of Stilicho, however, was educated in the bosom of Christianity, which his father had uniformly professed and zealously supported.[113](#) Serena had borrowed her

magnificent necklace from the statue of Vesta,[114](#) and the Pagans execrated the memory of the sacrilegious minister, by whose order the Sybilline books, the oracles of Rome, had been committed to the flames.[115](#) The pride and power of Stilicho constituted his real guilt. An honourable reluctance to shed the blood of his countrymen appears to have contributed to the success of his unworthy rival; and it is the last humiliation of the character of Honorius that posterity has not condescended to reproach him with his base ingratitude to the guardian of his youth and the support of his empire.

Among the train of dependents whose wealth and dignity attracted the notice of their own times *our* curiosity is excited by the celebrated name of the poet Claudian, who enjoyed the favour of Stilicho, and was overwhelmed in the ruin of his patron. The titular offices of tribune and notary fixed his rank in the Imperial court; he was indebted to the powerful intercession of Serena for his marriage with a very rich heiress of the province of Africa,[116](#) and the statue of Claudian, erected in the forum of Trajan, was a monument of the taste and liberality of the Roman senate.[117](#) After the praises of Stilicho became offensive and criminal, Claudian was exposed to the enmity of a powerful and unforgiving courtier, whom he had provoked by the insolence of wit. He had compared, in a lively epigram, the opposite characters of two Prætorian prefects of Italy; he contrasts the innocent repose of a philosopher who sometimes resigned the hours of business to slumber, perhaps to study, with the interested diligence of a rapacious minister, indefatigable in the pursuit of unjust or sacrilegious gain. "How happy," continues Claudian, "how happy might it be for the people of Italy if Mallius could be constantly awake, and if Hadrian would always sleep!"[118](#) The repose of Mallius was not disturbed by this friendly and gentle admonition, but the cruel vigilance of Hadrian watched the opportunity of revenge, and easily obtained from the enemies of Stilicho the trifling sacrifice of an obnoxious poet. The poet concealed himself, however, during the tumult of the revolution, and, consulting the dictates of prudence rather than of honour, he addressed, in the form of an epistle, a suppliant and humble recantation to the offended prefect. He deploras, in mournful strains, the fatal indiscretion into which he had been hurried by passion and folly; submits to the imitation of his adversary the generous examples of the clemency of gods, of heroes, and of lions; and expresses his hope that the magnanimity of Hadrian will not trample on a defenceless and contemptible foe, already humbled by disgrace and poverty, and deeply wounded by the exile, the tortures, and the death of his dearest friends.[119](#) Whatever might be the success of his prayer, or the accidents of his future life, the period of a few years levelled in the grave the minister and the poet: but the name of Hadrian is almost sunk in oblivion, while Claudian is read with pleasure in every country which has retained, or acquired, the knowledge of the Latin language. If we fairly balance his merits and his defects, we shall acknowledge that Claudian does not either satisfy or silence our reason. It would not be easy to produce a passage that deserves the epithet of sublime or pathetic; to select a verse that melts

the heart or enlarges the imagination. We should vainly seek, in the poems of Claudian, the happy invention and artificial conduct of an interesting fable, or the just and lively representation of the characters and situations of real life. For the service of his patron he published occasional panegyrics and invectives; and the design of these slavish compositions encouraged his propensity to exceed the limits of truth and nature. These imperfections, however, are compensated in some degree by the poetical virtues of Claudian. He was endowed with the rare and precious talent of raising the meanest, of adoring the most barren, and of diversifying the most similar topics; his colouring, more especially in descriptive poetry, is soft and splendid; and he seldom fails to display, and even to abuse, the advantages of a cultivated understanding, a copious fancy, an easy, and sometimes forcible, expression, and a perpetual flow of harmonious versifications. To these commendations, independent of any accidents of time and place, we must add the peculiar merit which Claudian derived from the unfavourable circumstances of his birth. In the decline of arts and of empire a native of Egypt,[120](#) who had received the education of a Greek, assumed, in a mature age, the familiar use and absolute command of the Latin language,[121](#) soared above the heads of his feeble contemporaries, and placed himself, after an interval of three hundred years, among the poets of ancient Rome.[122](#)

CHAPTER XXXI

Invasion of Italy by Alaric — Manners of the Roman Senate and People — Rome is thrice besieged and at length pillaged by the Goths — Death of Alaric — The Goths evacuate Italy — Fall of Constantine — Gaul and Spain are occupied by the Barbarians — Independence of Britain

The incapacity of a weak and distracted government may often assume the appearance, and produce the effects, of a treasonable correspondence with the public enemy. If Alaric himself had been introduced into the council of Ravenna, he would probably have advised the same measures which were actually pursued by the ministers of Honorius.[1](#) The king of the Goths would have conspired, perhaps with some reluctance, to destroy the formidable adversary by whose arms, in Italy as well as in Greece, he had been twice overthrown. *Their* active and interested hatred laboriously accomplished the disgrace and ruin of the great Stilicho. The valour of Sarus, his fame in arms, and his personal, or hereditary, influence over the confederate Barbarians could recommend him only to the friends of their country, who despised, or detested, the worthless characters of Turpilio, Varanes, and Vigilantius. By the pressing instances of the new favourites, these generals, unworthy as they had shewn themselves of the name of soldiers,[2](#) were promoted to the command of the cavalry, of the infantry, and of the domestic troops. The Gothic prince would have subscribed

with pleasure the edict which the fanaticism of Olympius dictated to the simple and devout emperor. Honorius excluded all persons who were adverse to the catholic church from holding any office in the state; obstinately rejected the service of all those who dissented from his religion; and rashly disqualified many of his bravest and most skilful officers, who adhered to the Pagan worship, or who had imbibed the opinions of Arianism.³ These measures, so advantageous to an enemy, Alaric would have approved, and might perhaps have suggested; but it may seem doubtful whether the Barbarian would have promoted his interest at the expense of the inhuman and absurd cruelty which was perpetrated by the direction, or at least with the connivance, of the Imperial ministers. The foreign auxiliaries who had been attached to the person of Stilicho lamented his death; but the desire of revenge was checked by a natural apprehension for the safety of their wives and children; who were detained as hostages in the strong cities of Italy, where they had likewise deposited their most valuable effects. At the same hour, and as if by a common signal, the cities of Italy were polluted by the same horrid scenes of universal massacre and pillage, which involved, in promiscuous destruction, the families and fortunes of the Barbarians. Exasperated by such an injury, which might have awakened the tamest and most servile spirit, they cast a look of indignation and hope towards the camp of Alaric, and unanimously swore to pursue, with just and implacable war, the perfidious nation that had so basely violated the laws of hospitality. By the imprudent conduct of the ministers of Honorius, the republic lost the assistance, and deserved the enmity, of thirty thousand of her bravest soldiers; and the weight of that formidable army, which alone might have determined the event of the war, was transferred from the scale of the Romans into that of the Goths.

In the arts of negotiation, as well as in those of war, the Gothic king maintained his superior ascendant over an enemy whose seeming changes proceeded from the total want of counsel and design. From his camp, on the confines of Italy, Alaric attentively observed the revolutions of the palace, watched the progress of faction and discontent, disguised the hostile aspect of a Barbarian invader, and assumed the more popular appearance of the friend and ally of the great Stilicho; to whose virtues, when they were no longer formidable, he could pay a just tribute of sincere praise and regret. The pressing invitation of the malcontents, who urged the king of the Goths to invade Italy, was enforced by a lively sense of his personal injuries; and he might speciously complain that the Imperial ministers still delayed and eluded the payment of the four thousand pounds of gold, which had been granted by the Roman senate either to reward his services or to appease his fury. His decent firmness was supported by an artful moderation, which contributed to the success of his designs. He required a fair and reasonable satisfaction; but he gave the strongest assurances that, as soon as he had obtained it, he would immediately retire. He refused to trust the faith of the Romans, unless Aetius and Jason, the sons of two great officers of state, were sent as hostages to his camp; but he offered to deliver, in exchange, several of the noblest youths of the Gothic nation. The modesty of Alaric was interpreted, by the ministers of

Ravenna, as a sure evidence of his weakness and fear. They disdained either to negotiate a treaty or to assemble an army; and with a rash confidence, derived only from their ignorance of the extreme danger, irretrievably wasted the decisive moments of peace and war. While they expected, in sullen silence, that the Barbarians should evacuate the confines of Italy, Alaric, with bold and rapid marches, passed the Alps and the Po; hastily pillaged the cities of Aquileia, Altinum, Concordia, and Cremona, which yielded to his arms;[4](#) increased his forces by the accession of thirty thousand auxiliaries; and without meeting a single enemy in the field, advanced as far as the edge of the morass which protected the impregnable residence of the emperor of the West. Instead of attempting the hopeless siege of Ravenna, the prudent leader of the Goths proceeded to Rimini, stretched his ravages along the sea-coast of the Hadriatic, and meditated the conquest of the ancient mistress of the world. An Italian hermit, whose zeal and sanctity were respected by the Barbarians themselves, encountered the victorious monarch, and boldly denounced the indignation of heaven against the oppressors of the earth; but the saint himself was so confounded by the solemn asseveration of Alaric, that he felt a secret and preternatural impulse, which directed, and even compelled, his march to the gates of Rome. He felt that his genius and his fortune were equal to the most arduous enterprises; and the enthusiasm which he communicated to the Goths insensibly removed the popular, and almost superstitious, reverence of the nations for the majesty of the Roman name. His troops, animated by the hopes of spoil, followed the course of the Flaminian way, occupied the unguarded passes of the Apennine,[5](#) descended into the rich plains of Umbria; and, as they lay encamped on the banks of the Clitumnus, might wantonly slaughter and devour the milk-white oxen, which had been so long reserved for the use of Roman triumphs.[6](#) A lofty situation and a seasonable tempest of thunder and lightning preserved the little city of Narni; but the king of the Goths, despising the ignoble prey, still advanced with unabated vigour; and, after he had passed through the stately arches, adorned with the spoils of Barbaric victories, he pitched his camp under the walls of Rome.[7](#)

During a period of six hundred and nineteen years, the seat of empire had never been violated by the presence of a foreign enemy. The unsuccessful expedition of Hannibal[8](#) served only to display the character of the senate and people; of a senate degraded, rather than ennobled, by the comparison of an assembly of kings; and of a people to whom the ambassador of Pyrrhus ascribed the inexhaustible resources of the Hydra.[9](#) Each of the senators, in the time of the Punic war, had accomplished his term of military service, either in a subordinate or a superior station; and the decree which invested with temporary command all those who had been consuls or censors or dictators gave the republic the immediate assistance of many brave and experienced generals. In the beginning of the war, the Roman people consisted of two hundred and fifty thousand citizens of an age to bear arms.[10](#) Fifty thousand had already died in the defence of their country; and the twenty-three legions which were employed in the different camps of Italy, Greece, Sardinia, Sicily, and Spain required about one

hundred thousand men. But there still remained an equal number in Rome, and the adjacent territory, who were animated by the same intrepid courage; and every citizen was trained, from his earliest youth, in the discipline and exercises of a soldier. Hannibal was astonished by the constancy of the senate, who, without raising the siege of Capua or recalling their scattered forces, expected his approach. He encamped on the banks of the Anio, at the distance of three miles from the city; and he was soon informed that the ground on which he had pitched his tent was sold for an adequate price at a public auction and that a body of troops was dismissed by an opposite road, to reinforce the legions of Spain.[11](#) He led his Africans to the gates of Rome, where he found three armies in order of battle, prepared to receive him; but Hannibal dreaded the event of a combat from which he could not hope to escape, unless he destroyed the last of his enemies; and his speedy retreat confessed the invincible courage of the Romans.

From the time of the Punic war the uninterrupted succession of senators had preserved the name and image of the republic; and the degenerate subjects of Honorius ambitiously derived their descent from the heroes who had repulsed the arms of Hannibal and subdued the nations of the earth. The temporal honours which the devout Paula[12](#) inherited and despised are carefully recapitulated by Jerom, the guide of her conscience and the historian of her life. The genealogy of her father, Rogatus, which ascended as high as Agamemnon, might seem to betray a Grecian origin; but her mother, Blæsilla, numbered the Scipios, Æmilius Paulus and the Gracchi, in the list of her ancestors; and Toxotius, the husband of Paula, deduced his royal lineage from Æneas, the father of the Julian line. The vanity of the rich who desired to be noble was gratified by these lofty pretensions. Encouraged by the applause of their parasites, they easily imposed on the credulity of the vulgar, and were countenanced in some measure by the custom of adopting the name of their patron, which had always prevailed among the freedmen and clients of illustrious families. Most of those families, however, attacked by so many causes of external violence or internal decay, were gradually extirpated; and it would be more reasonable to seek for a lineal descent of twenty generations among the mountains of the Alps, or in the peaceful solitude of Apulia, than on the theatre of Rome, the seat of fortune, of danger, and of perpetual revolutions. Under each successive reign and from every province of the empire, a crowd of hardy adventurers, rising to eminence by their talents or their vices, usurped the wealth, the honours, and the palaces of Rome; and oppressed or protected the poor and humble remains of consular families; who were ignorant perhaps of the glory of their ancestors.[13](#)

In the time of Jerom and Claudian, the senators unanimously yielded the pre-eminence to the Anician line; and a slight view of *their* history will serve to appreciate the rank and antiquity of the noble families which contended only for the second place.[14](#) During the first five ages of the city the name of the Anicians was unknown; they

appear to have derived their origin from Præneste; and the ambition of those new citizens was long satisfied with the Plebeian honours of tribunes of the people.¹⁵ One hundred and sixty-eight years before the Christian era, the family was ennobled by the prætorship of Anicius, who gloriously terminated the Illyrian war by the conquest of the nation and the captivity of their king.¹⁶ From the triumph of that general, three consulships in distant periods mark the succession of the Anician name.¹⁷ From the reign of Diocletian to the final extinction of the Western empire that name shone with a lustre which was not eclipsed in the public estimation by the majesty of the Imperial purple.¹⁸ The several branches to whom it was communicated united, by marriage or inheritance, the wealth and titles of the Annian, the Petronian, and the Olybrian houses; and in each generation the number of consulships was multiplied by an hereditary claim.¹⁹ The Anician family excelled in faith and in riches; they were the first of the Roman senate who embraced Christianity; and it is probable that Anicius Julian, who was afterwards consul and prefect of the city, atoned for his attachment to the party of Maxentius by the readiness with which he accepted the religion of Constantine.²⁰ Their ample patrimony was increased by the industry of Probus, the chief of the Anician family; who shared with Gratian the honours of the consulship, and exercised four times the high office of Prætorian prefect.²¹ His immense estates were scattered over the wide extent of the Roman world; and, though the public might suspect or disapprove the methods by which they had been acquired, the generosity and magnificence of that fortunate statesman deserved the gratitude of his clients and the admiration of strangers.²² Such was the respect entertained for his memory that the two sons of Probus in their earliest youth, and at the request of the senate, were associated in the consular dignity: a memorable distinction without example in the annals of Rome.²³

“The marbles of the Anician palace” was used as a proverbial expression of opulence and splendour;²⁴ but the nobles and senators of Rome aspired in due gradation to imitate that illustrious family. The accurate description of the city, which was composed in the Theodosian age, enumerates one thousand seven hundred and eighty *houses*, the residence of wealthy and honourable citizens.²⁵ Many of these stately mansions might almost excuse the exaggeration of the poet: that Rome contained a multitude of palaces, and that each palace was equal to a city; since it included within its own precincts everything which could be subservient either to use or luxury: markets, hippodromes, temples, fountains, baths, porticos, shady groves, and artificial aviaries.²⁶ The historian Olympiodorus, who represents the state of Rome when it was besieged by the Goths,²⁷ continues to observe that several of the richest senators received from their estates an annual income of four thousand pounds of gold, above one hundred and sixty thousand pounds sterling; without computing the stated provision of corn and wine, which, had they been sold, might have equalled in value one third of the money. Compared to this immoderate wealth, an ordinary revenue of a

thousand or fifteen hundred pounds of gold might be considered as no more than adequate to the dignity of the senatorian rank, which required many expenses of a public and ostentatious kind. Several examples are recorded in the age of Honorius, of vain and popular nobles who celebrated the year of their prætorship by a festival, which lasted seven days and cost above one hundred thousand pounds sterling.²⁸ The estates of the Roman senators, which so far exceeded the proportion of modern wealth, were not confined to the limits of Italy. Their possessions extended far beyond the Ionian and Ægean seas to the most distant provinces; the city of Nicopolis, which Augustus had founded as an eternal monument of the Actian victory, was the property of the devout Paula;²⁹ and it is observed by Seneca that the rivers which had divided hostile nations now flowed through the lands of private citizens.³⁰ According to their temper and circumstances, the estates of the Romans were either cultivated by the labour of their slaves or granted, for a certain and stipulated rent, to the industrious farmer. The economical writers of antiquity strenuously recommend the former method wherever it may be practicable; but, if the object should be removed by its distance or magnitude from the immediate eye of the master, they prefer the active care of an old hereditary tenant, attached to the soil and interested in the produce, to the mercenary administration of a negligent, perhaps an unfaithful, steward.³¹

The opulent nobles of an immense capital, who were never excited by the pursuit of military glory, and seldom engaged in the occupations of civil government, naturally resigned their leisure to the business and amusements of private life. At Rome, commerce was always held in contempt; but the senators, from the first age of the republic, increased their patrimony, and multiplied their clients, by the lucrative practice of usury; and the obsolete laws were eluded, or violated, by the mutual inclinations and interest of both parties.³² A considerable mass of treasure must always have existed at Rome, either in the current coin of the empire or in the form of gold and silver plate; and there were many sideboards, in the time of Pliny, which contained more solid silver than had been transported by Scipio from vanquished Carthage.³³ The greater part of the nobles, who dissipated their fortunes in profuse luxury, found themselves poor in the midst of wealth, and idle in a constant round of dissipation. Their desires were continually gratified by the labour of a thousand hands; of the numerous train of their domestic slaves, who were actuated by the fear of punishment; and of the various professions of artificers and merchants, who were more powerfully impelled by the hopes of gain. The ancients were destitute of many of the conveniencies of life which have been invented or improved by the progress of industry; and the plenty of glass and linen has diffused more real comforts among the modern nations of Europe than the senators of Rome could derive from all the refinements of pompous or sensual luxury.³⁴ Their luxury and their manners have been the subject of minute and laborious disquisition; but, as such inquiries would divert me too long from the design of the present work, I shall produce an authentic state of Rome and its inhabitants, which is more peculiarly applicable to the period of

the Gothic invasion. Ammianus Marcellinus, who prudently chose the capital of the empire as the residence the best adapted to the historian of his own times, has mixed with the narrative of public events a lively representation of the scenes with which he was familiarly conversant. The judicious reader will not always approve the asperity of censure, the choice of circumstances, or the style of expression; he will perhaps detect the latent prejudices and personal resentments which soured the temper of Ammianus himself; but he will surely observe, with philosophic curiosity, the interesting and original picture of the manners of Rome.[35](#)

“The greatness of Rome” (such is the language of the historian) “was founded on the rare and almost incredible alliance of virtue and of fortune. The long period of her infancy was employed in a laborious struggle against the tribes of Italy, the neighbours and enemies of the rising city. In the strength and ardour of youth, she sustained the storms of war; carried her victorious arms beyond the seas and the mountains; and brought home triumphal laurels from every country of the globe. At length, verging towards old age, and sometimes conquering by the terror only of her name, she sought the blessings of ease and tranquillity. The venerable city, which had trampled on the necks of the fiercest nations, and established a system of laws, the perpetual guardians of justice and freedom, was content, like a wise and wealthy parent, to devolve on the Cæsars, her favourite sons, the care of governing her ample patrimony.[36](#) A secure and profound peace, such as had been once enjoyed in the reign of Numa, succeeded to the tumults of a republic; while Rome was still adored as the queen of the earth, and the subject nations still revered the name of the people and the majesty of the senate. But this native splendour” (continues Ammianus) “is degraded and sullied by the conduct of some nobles; who, unmindful of their own dignity and of that of their country, assume an unbounded licence of vice and folly. They contend with each other in the empty vanity of titles and surnames; and curiously select or invent the most lofty and sonorous appellations, Reburus, or Fabunius, Pagonius, or Tarrasius,[37](#) which may impress the ears of the vulgar with astonishment and respect. From a vain ambition of perpetuating their memory, they affect to multiply their likeness in statues of bronze and marble; nor are they satisfied, unless those statues are covered with plates of gold: an honourable distinction, first granted to Acilius the consul, after he had subdued, by his arms and counsels, the power of king Antiochus. The ostentation of displaying, of magnifying perhaps, the rent-roll of the estates which they possess in all the provinces, from the rising to the setting sun, provokes the just resentment of every man who recollects that their poor and invincible ancestors were not distinguished from the meanest of the soldiers by the delicacy of their food or the splendour of their apparel. But the modern nobles measure their rank and consequence according to the loftiness of their chariots[38](#) and the weighty magnificence of their dress. Their long robes of silk and purple float in the wind; and, as they are agitated, by art or accident, they occasionally discover the under garments, the rich tunics, embroidered with the figures of various animals.[39](#) Followed by a train of fifty

servants, and tearing up the pavement, they move along the streets with the same impetuous speed as if they travelled with post horses; and the example of the senators is boldly imitated by the matrons and ladies, whose covered carriages are continually driving round the immense space of the city and suburbs. Whenever these persons of high distinction condescend to visit the public baths, they assume, on their entrance, a tone of loud and insolent command, and appropriate to their own use the conveniencies which were designed for the Roman people. If, in these places of mixed and general resort, they meet any of the infamous ministers of their pleasures, they express their affection by a tender embrace; while they proudly decline the salutations of their fellow-citizens, who are not permitted to aspire above the honour of kissing their hands or their knees. As soon as they have indulged themselves in the refreshment of the bath, they resume their rings, and the other ensigns of their dignity; select from their private wardrobe of the finest linen, such as might suffice for a dozen persons, the garments the most agreeable to their fancy, and maintain till their departure the same haughty demeanour; which perhaps might have been excused in the great Marcellus, after the conquest of Syracuse. Sometimes, indeed, these heroes undertake more arduous achievements; they visit their estates in Italy, and procure themselves, by the toil of servile hands, the amusements of the chase.⁴⁰ If at any time, but more especially on a hot day, they have courage to sail, in their painted galleys, from the Lucrine lake⁴¹ to their elegant villas on the sea-coast of Puteoli and Caieta,⁴² they compare their own expeditions to the marches of Cæsar and Alexander. Yet should a fly presume to settle on the silken folds of their gilded umbrellas, should a sunbeam penetrate through some unguarded and imperceptible chink, they deplore their intolerable hardships, and lament in affected language that they were not born in the land of the Cimmerians,⁴³ the regions of eternal darkness. In these journeys into the country⁴⁴ the whole body of the household marches with their master. In the same manner as the cavalry and infantry, the heavy and the light armed troops, the advanced guard and the rear, are marshalled by the skill of their military leaders; so the domestic officers, who bear a rod as an ensign of authority, distribute and arrange the numerous train of slaves and attendants. The baggage and wardrobe move in the front; and are immediately followed by a multitude of cooks and inferior ministers employed in the service of the kitchens and of the table. The main body is composed of a promiscuous crowd of slaves, increased by the accidental concourse of idle or dependent plebeians. The rear is closed by the favourite band of eunuchs, distributed from age to youth, according to the order of seniority. Their numbers and their deformity excite the horror of the indignant spectators, who are ready to execrate the memory of Semiramis for the cruel art which she invented of frustrating the purposes of nature and of blasting in the bud the hopes of future generations. In the exercise of domestic jurisdiction the nobles of Rome express an exquisite sensibility for any personal injury, and a contemptuous indifference for the rest of the human species. When they have called for warm water, if a slave has been tardy in his obedience, he is instantly chastised with three hundred lashes: but should the same slave commit wilful murder, the master will mildly observe that he is a worthless fellow; but that, if he repeats the offence, he

shall not escape punishment. Hospitality was formerly the virtue of the Romans; and every stranger who could plead either merit or misfortune was relieved or rewarded by their generosity. At present, if a foreigner, perhaps of no contemptible rank, is introduced to one of the proud and wealthy senators, he is welcomed indeed in the first audience, with such warm professions and such kind inquiries that he retires, enchanted with the affability of his illustrious friend, and full of regret that he had so long delayed his journey to Rome, the native seat of manners as well as of empire. Secure of a favourable reception, he repeats his visit the ensuing day, and is mortified by the discovery that his person, his name, and his country are already forgotten. If he still has resolution to persevere, he is gradually numbered in the train of dependents, and obtains the permission to pay his assiduous and unprofitable court to a haughty patron, incapable of gratitude or friendship; who scarcely deigns to remark his presence, his departure, or his return. Whenever the rich prepare a solemn and popular entertainment;[45](#) whenever they celebrate, with profuse and pernicious luxury, their private banquets; the choice of the guests is the subject of anxious deliberation. The modest, the sober, and the learned are seldom preferred; and the nomenclators, who are commonly swayed by interested motives, have the address to insert, in the list of invitations, the obscure names of the most worthless of mankind. But the frequent and familiar companions of the great are those parasites who practise the most useful of all arts, the art of flattery; who eagerly applaud each word and every action of their immortal patron; gaze with rapture on his marble columns and variegated pavements; and strenuously praise the pomp and elegance which he is taught to consider as a part of his personal merit. At the Roman tables the birds, the *squirrels*,[46](#) or the fish, which appear of an uncommon size, are contemplated with curious attention; a pair of scales is accurately applied to ascertain their real weight; and, while the more rational guests are disgusted by the vain and tedious repetition, notaries are summoned to attest by an authentic record the truth of such a marvellous event. Another method of introduction into the houses and society of the great is derived from the profession of gaming, or, as it is more politely styled, of play. The confederates are united by a strict and indissoluble bond of friendship, or rather of conspiracy; a superior degree of skill in the *Tesserarian* art (which may be interpreted the game of dice and tables[47](#)) is a sure road to wealth and reputation. A master of that sublime science, who in a supper or assembly is placed below a magistrate, displays in his countenance the surprise and indignation which Cato might be supposed to feel when he was refused the prætorship by the votes of a capricious people. The acquisition of knowledge seldom engages the curiosity of the nobles, who abhor the fatigue and disdain the advantages of study; and the only books which they peruse are the satires of Juvenal, and the verbose and fabulous histories of Marius Maximus.[48](#) The libraries which they have inherited from their fathers are secluded, like dreary sepulchres, from the light of day.[49](#) But the costly instruments of the theatre, flutes, and enormous lyres, and hydraulic organs, are constructed for their use; and the harmony of vocal and instrumental music is incessantly repeated in the palaces of Rome. In those palaces sound is preferred to

sense; and the care of the body to that of the mind. It is allowed as a salutary maxim that the light and frivolous suspicion of a contagious malady is of sufficient weight to excuse the visits of the most intimate friends; and even the servants who are despatched to make the decent inquiries are not suffered to return home till they have undergone the ceremony of a previous ablution. Yet this selfish and unmanly delicacy occasionally yields to the more imperious passion of avarice. The prospect of gain will urge a rich and gouty senator as far as Spoleto; every sentiment of arrogance and dignity is subdued by the hopes of an inheritance, or even of a legacy; and a wealthy, childless citizen is the most powerful of the Romans. The art of obtaining the signature of a favourable testament, and sometimes of hastening the moment of its execution, is perfectly understood; and it has happened that in the same house, though in different apartments, a husband and a wife, with the laudable design of over-reaching each other, have summoned their respective lawyers, to declare, at the same time, their mutual but contradictory intentions. The distress which follows and chastises extravagant luxury often reduces the great to the use of the most humiliating expedients. When they desire to borrow, they employ the base and supplicating style of the slave in the comedy; but, when they are called upon to pay, they assume the royal and tragic declamation of the grandsons of Hercules. If the demand is repeated, they readily procure some trusty sycophant, instructed to maintain a charge of poison or magic against the insolent creditor; who is seldom released from prison till he has signed a discharge of the whole debt. These vices, which degrade the moral character of the Romans, are mixed with a puerile superstition that disgraces their understanding. They listen with confidence to the predictions of haruspices, who pretend to read in the entrails of victims the signs of future greatness and prosperity; and there are many who do not presume either to bathe, or to dine, or to appear in public, till they have diligently consulted, according to the rules of astrology, the situation of Mercury and the aspect of the moon.⁵⁰ It is singular enough that this vain credulity may often be discovered among the profane sceptics, who impiously doubt or deny the existence of a celestial power.”

In populous cities which are the seat of commerce and manufactures, the middle ranks of inhabitants, who derive their subsistence from the dexterity or labour of their hands, are commonly the most prolific, the most useful, and in that sense the most respectable part of the community. But the plebeians of Rome, who disdained such sedentary and servile arts, had been oppressed from the earliest times, by the weight of debt and usury; and the husbandman, during the term of his military service, was obliged to abandon the cultivation of his farm.⁵¹ The lands of Italy, which had been originally divided among the families of free and indigent proprietors, were insensibly purchased or usurped by the avarice of the nobles; and in the age which preceded the fall of the republic it was computed that only two thousand citizens were possessed of any independent substance.⁵² Yet, as long as the people bestowed, by their suffrages, the honours of the state, the command of the legions, and the administration of wealthy provinces, their conscious pride alleviated, in some measure, the hardships of poverty;

and their wants were seasonably supplied by the ambitious liberality of the candidates, who aspired to secure a venal majority in the thirty-five tribes, or the hundred and ninety-three centuries, of Rome. But, when the prodigal commons had imprudently alienated not only the *use*, but the *inheritance*, of power, they sunk, under the reign of the Cæsars, into a vile and wretched populace which must, in a few generations, have been totally extinguished, if it had not been continually recruited by the manumission of slaves and the influx of strangers. As early as the time of Hadrian it was the just complaint of the ingenuous natives that the capital had attracted the vices of the universe and the manners of the most opposite nations. The intemperance of the Gauls, the cunning and levity of the Greeks, the savage obstinacy of the Egyptians and Jews, the servile temper of the Asiatics, and the dissolute, effeminate prostitution of the Syrians, were mingled in the various multitude, which, under the proud and false denomination of Romans, presumed to despise their fellow-subjects, and even their sovereigns, who dwelt beyond the precincts of the eternal city.[53](#)

Yet the name of that city was still pronounced with respect: the frequent and capricious tumults of its inhabitants were indulged with impunity; and the successors of Constantine, instead of crushing the last remains of the democracy by the strong arm of military power, embraced the mild policy of Augustus, and studied to relieve the poverty, and to amuse the idleness, of an innumerable people.[54](#) I. For the convenience of the lazy plebeians the monthly distributions of corn were converted into a daily allowance of bread; a great number of ovens was constructed and maintained at the public expense; and at the appointed hour each citizen who was furnished with a ticket ascended the flight of steps which had been assigned to his peculiar quarter or division, and received, either as a gift or at a very low price, a loaf of bread of the weight of three pounds for the use of his family. II. The forests of Lucania, whose acorns fattened large droves of wild hogs,[55](#) afforded, as a species of tribute, a plentiful supply of cheap and wholesome meat. During five months of the year a regular allowance of bacon was distributed to the poorer citizens; and the annual consumption of the capital, at a time when it was much declined from its former lustre, was ascertained by an edict of Valentinian the Third, at three millions six hundred and twenty-eight thousand pounds.[56](#) III. In the manners of antiquity the use of oil was indispensable for the lamp as well as for the bath; and the annual tax, which was imposed on Africa for the benefit of Rome, amounted to the weight of three millions of pounds, to the measure, perhaps, of three hundred thousand English gallons. IV. The anxiety of Augustus to provide the metropolis with sufficient plenty of corn was not extended beyond that necessary article of human subsistence; and, when the popular clamour accused the dearness and scarcity of wine, a proclamation was issued by the grave reformer to remind his subjects that no man could reasonably complain of thirst since the aqueducts of Agrippa had introduced into the city so many copious streams of pure and salubrious water.[57](#) This rigid sobriety was insensibly relaxed; and, although the generous design of Aurelian[58](#) does not appear to have been

executed in its full extent, the use of wine was allowed on very easy and liberal terms. The administration of the public cellars was delegated to a magistrate of honourable rank; and a considerable part of the vintage of Campania was reserved for the fortunate inhabitants of Rome.

The stupendous aqueducts, so justly celebrated by the praises of Augustus himself, replenished the *Thermæ*, or baths, which had been constructed in every part of the city, with Imperial magnificence. The baths of Antoninus Caracalla, which were open, at stated hours, for the indiscriminate service of the senators and the people, contained about sixteen hundred seats of marble; and more than three thousand were reckoned in the baths of Diocletian.⁵⁹ The walls of the lofty apartments were covered with curious mosaics, that imitated the art of the pencil in the elegance of design and the variety of colours. The Egyptian granite was beautifully incrustured with the precious green marble of Numidia; the perpetual stream of hot water was poured into the capacious basins, through so many wide mouths of bright and massy silver; and the meanest Roman could purchase, with a small copper coin, the daily enjoyment of a scene of pomp and luxury, which might excite the envy of the kings of Asia.⁶⁰ From these stately palaces issued a swarm of dirty and ragged plebeians, without shoes, and without a mantle; who loitered away whole days in the street or Forum, to hear news, and to hold disputes; who dissipated, in extravagant gaming, the miserable pittance of their wives and children; and spent the hours of the night in obscure taverns and brothels in the indulgence of gross and vulgar sensuality.⁶¹

But the most lively and splendid amusement of the idle multitude depended on the frequent exhibition of public games and spectacles. The piety of Christian princes had suppressed the inhuman combats of gladiators; but the Roman people still considered the Circus as their home, their temple, and the seat of the republic. The impatient crowd rushed at the dawn of day to secure their places, and there were many who passed a sleepless and anxious night in the adjacent porticos. From the morning to the evening, careless of the sun or of the rain, the spectators, who sometimes amounted to the number of four hundred thousand, remained in eager attention; their eyes fixed on the horses and charioteers, their minds agitated with hope and fear, for the success of the *colours* which they espoused: and the happiness of Rome appeared to hang on the event of a race.⁶² The same immoderate ardour inspired their clamours and their applause, as often as they were entertained with the hunting of wild beasts and the various modes of theatrical representation. These representations in modern capitals may deserve to be considered as a pure and elegant school of taste, and perhaps of virtue. But the Tragic and Comic Muse of the Romans, who seldom aspired beyond the imitation of Attic genius,⁶³ had been almost totally silent since the fall of the republic;⁶⁴ and their place was unworthily occupied by licentious farce, effeminate music, and splendid pageantry. The pantomimes,⁶⁵ who maintained their reputation from the age of Augustus to the sixth century, expressed, without the use of words, the

various fables of the gods and heroes of antiquity; and the perfection of their art, which sometimes disarmed the gravity of the philosopher, always excited the applause and wonder of the people. The vast and magnificent theatres of Rome were filled by three thousand female dancers, and by three thousand singers, with the masters of the respective choruses. Such was the popular favour which they enjoyed that, in a time of scarcity, when all strangers were banished from the city, the merit of contributing to the public pleasures exempted *them* from a law which was strictly executed against the professors of the liberal arts.[66](#)

It is said that the foolish curiosity of Elagabalus attempted to discover, from the quantity of spiders' webs, the number of the inhabitants of Rome. A more rational method of inquiry might not have been undeserving of the attention of the wisest princes, who could easily have resolved a question so important for the Roman government and so interesting to succeeding ages. The births and deaths of the citizens were duly registered; and, if any writer of antiquity had condescended to mention the annual amount, or the common average, we might now produce some satisfactory calculation, which would destroy the extravagant assertions of critics, and perhaps confirm the modest and probable conjectures of philosophers.[67](#) The most diligent researches have collected only the following circumstances; which, slight and imperfect as they are, may tend, in some degree, to illustrate the question of the populousness of ancient Rome. I. When the capital of the empire was besieged by the Goths, the circuit of the walls was accurately measured by Ammonius, the mathematician, who found it equal to twenty-one miles.[68](#) It should not be forgotten that the form of the city was almost that of a circle, the geometrical figure which is known to contain the largest space within any given circumference. II. The architect Vitruvius, who flourished in the Augustan age, and whose evidence on this occasion has peculiar weight and authority, observes that the innumerable habitations of the Roman people would have spread themselves far beyond the narrow limits of the city; and that the want of ground, which was probably contracted on every side by gardens and villas, suggested the common, though inconvenient, practice of raising the houses to a considerable height in the air.[69](#) But the loftiness of these buildings, which often consisted of hasty work and insufficient materials, was the cause of frequent and fatal accidents; and it was repeatedly enacted by Augustus, as well as by Nero, that the height of private edifices within the walls of Rome should not exceed the measure of seventy feet from the ground.[70](#) III. Juvenal[71](#) laments, as it should seem from his own experience, the hardships of the poorer citizens, to whom he addresses the salutary advice of emigrating, without delay, from the smoke of Rome, since they might purchase, in the little towns of Italy, a cheerful, commodious dwelling, at the same price which they annually paid for a dark and miserable lodging. House-rent was therefore immoderately dear; the rich acquired, at an enormous expense, the ground, which they covered with palaces and gardens; but the body of the Roman people was crowded into a narrow space; and the different floors and apartments of the same

house were divided, as it is still the custom of Paris and other cities, among several families of plebeians. IV. The total number of houses in the fourteen regions of the city is accurately stated in the description of Rome composed under the reign of Theodosius, and they amount to forty-eight thousand three hundred and eighty-two.⁷² The two classes of *domus* and of *insulæ*, into which they are divided, include all the habitations of the capital, of every rank and condition, from the marble palace of the Anicii, with a numerous establishment of freedmen and slaves, to the lofty and narrow lodging-house, where the poet Codrus and his wife were permitted to hire a wretched garret immediately under the tiles. If we adopt the same average which, under similar circumstances, has been found applicable to Paris,⁷³ and indifferently allow about twenty-five persons for each house of every degree, we may fairly estimate the inhabitants of Rome at twelve hundred thousand: a number which cannot be thought excessive for the capital of a mighty empire, though it exceeds the populousness of the greatest cities of modern Europe.⁷⁴

Such was the state of Rome under the reign of Honorius; at the time when the Gothic army formed the siege, or rather the blockade, of the city.⁷⁵ By a skilful disposition of his numerous forces, who impatiently watched the moment of an assault, Alaric encompassed the walls, commanded the twelve principal gates, intercepted all communication with the adjacent country, and vigilantly guarded the navigation of the Tiber, from which the Romans derived the surest and most plentiful supply of provisions. The first emotions of the nobles and of the people were those of surprise and indignation, that a vile Barbarian should dare to insult the capital of the world; but their arrogance was soon humbled by misfortune; and their unmanly rage, instead of being directed against an enemy in arms, was meanly exercised on a defenceless and innocent victim. Perhaps in the person of Serena the Romans might have respected the niece of Theodosius, the aunt, nay even the adopted mother, of the reigning emperor: but they abhorred the widow of Stilicho; and they listened with credulous passion to the tale of calumny which accused her of maintaining a secret and criminal correspondence with the Gothic invader. Actuated, or overawed, by the same popular frenzy, the senate, without requiring any evidence of her guilt, pronounced the sentence of her death. Serena was ignominiously strangled; and the infatuated multitude were astonished to find that this cruel act of injustice did not immediately produce the retreat of the Barbarians and the deliverance of the city. That unfortunate city gradually experienced the distress of scarcity, and at length the horrid calamities of famine. The daily allowance of three pounds of bread was reduced to one half, to one third, to nothing; and the price of corn still continued to rise in a rapid and extravagant proportion. The poorer citizens, who were unable to purchase the necessaries of life, solicited the precarious charity of the rich; and for a while the public misery was alleviated by the humanity of Læta, the widow of the emperor Gratian, who had fixed her residence at Rome, and consecrated to the use of the indigent the princely revenue which she annually received from the grateful successors

of her husband.⁷⁶ But these private and temporary donatives were insufficient to appease the hunger of a numerous people; and the progress of famine invaded the marble palaces of the senators themselves. The persons of both sexes, who had been educated in the enjoyment of ease and luxury, discovered how little is requisite to supply the demands of nature; and lavished their unavailing treasures of gold and silver, to obtain the coarse and scanty sustenance which they would formerly have rejected with disdain. The food the most repugnant to sense or imagination, the aliments the most unwholesome and pernicious to the constitution, were eagerly devoured and fiercely disputed by the rage of hunger. A dark suspicion was entertained that some desperate wretches fed on the bodies of their fellow-creatures, whom they had secretly murdered; and even mothers (such was the horrid conflict of the two most powerful instincts implanted by nature in the human breast) — even mothers are said to have tasted the flesh of their slaughtered infants!⁷⁷ Many thousands of the inhabitants of Rome expired in their houses, or in the streets, for want of sustenance; and, as the public sepulchres without the walls were in the power of the enemy, the stench which arose from so many putrid and unburied carcasses infected the air, and the miseries of famine were succeeded and aggravated by the contagion of pestilential disease. The assurances of speedy and effectual relief, which were repeatedly transmitted from the court of Ravenna, supported for some time the fainting resolution of the Romans, till at length the despair of any human aid tempted them to accept the offers of a preternatural deliverance. Pompeianus, prefect of the city, had been persuaded, by the art or fanaticism of some Tuscan diviners, that, by the mysterious force of spells and sacrifices, they could extract the lightning from the clouds, and point those celestial fires against the camp of the Barbarians.⁷⁸ The important secret was communicated to Innocent, the bishop of Rome; and the successor of St. Peter is accused, perhaps without foundation, of preferring the safety of the republic to the rigid severity of the Christian worship. But, when the question was agitated in the senate; when it was proposed, as an essential condition, that those sacrifices should be performed in the Capitol, by the authority, and in the presence, of the magistrates; the majority of that respectable assembly, apprehensive either of the Divine or of the Imperial displeasure, refused to join in an act which appeared almost equivalent to the public restoration of Paganism.⁷⁹

The last resource of the Romans was in the clemency, or at least in the moderation, of the king of the Goths. The senate, who in this emergency assumed the supreme powers of government, appointed two ambassadors to negotiate with the enemy. This important trust was delegated to Basilius, a senator, of Spanish extraction, and already conspicuous in the administration of provinces: and to John, the first tribune of the notaries, who was peculiarly qualified by his dexterity in business as well as by his former intimacy with the Gothic prince. When they were introduced into his presence, they declared, perhaps in a more lofty style than became their abject condition, that the Romans were resolved to maintain their dignity, either in peace or war; and that, if Alaric refused them a fair and honourable capitulation, he might sound his trumpets,

and prepare to give battle to an innumerable people, exercised in arms and animated by despair. "The thicker the hay, the easier it is mowed," was the concise reply of the Barbarian; and this rustic metaphor was accompanied by a loud and insulting laugh, expressive of his contempt for the menaces of an unwarlike populace, enervated by luxury before they were emaciated by famine. He then condescended to fix the ransom, which he would accept as the price of his retreat from the walls of Rome: *all* the gold and silver in the city, whether it were the property of the state or of individuals; *all* the rich and precious moveables; and *all* the slaves who could prove their title to the name of *Barbarians*. The ministers of the senate presumed to ask, in a modest and suppliant tone, "If such, O king! are your demands, what do you intend to leave us?" "Your lives," replied the haughty conqueror: they trembled and retired. Yet, before they retired, a short suspension of arms was granted, which allowed some time for a more temperate negotiation. The stern features of Alaric were insensibly relaxed; he abated much of the rigour of his terms; and at length consented to raise the siege, on the immediate payment of five thousand pounds of gold, of thirty thousand pounds of silver, of four thousand robes of silk, of three thousand pieces of fine scarlet cloth,^{[80](#)} and of three thousand pounds weight of pepper.^{[81](#)} But the public treasury was exhausted; the annual rents of the great estates in Italy and the provinces were intercepted by the calamities of war; the gold and gems had been exchanged during the famine for the vilest sustenance; the hoards of secret wealth were still concealed by the obstinacy of avarice; and some remains of consecrated spoils afforded the only resource that could avert the impending ruin of the city. As soon as the Romans had satisfied the rapacious demands of Alaric, they were restored, in some measure, to the enjoyment of peace and plenty. Several of the gates were cautiously opened; the importation of provisions from the river and the adjacent country was no longer obstructed by the Goths; the citizens resorted in crowds to the free market, which was held during three days in the suburbs; and, while the merchants who undertook this gainful trade made a considerable profit, the future subsistence of the city was secured by the ample magazines which were deposited in the public and private granaries. A more regular discipline than could have been expected was maintained in the camp of Alaric; and the wise Barbarian justified his regard for the faith of treaties by the just severity with which he chastised a party of licentious Goths, who had insulted some Roman citizens on the road to Ostia. His army, enriched by the contributions of the capital, slowly advanced into the fair and fruitful province of Tuscany, where he proposed to establish his winter-quarters; and the Gothic standard became the refuge of forty thousand Barbarian slaves, who had broke their chains, and aspired, under the command of their great deliverer, to revenge the injuries and the disgrace of their cruel servitude. About the same time, he received a more honourable reinforcement of Goths and Huns, whom Adolphus,^{[82](#)} the brother of his wife, had conducted, at his pressing invitation, from the banks of the Danube to those of the Tiber, and who had cut their way, with some difficulty and loss, through the superior numbers of the Imperial troops. A victorious leader, who united the daring spirit of a Barbarian with the art and discipline of a Roman general, was at the head of an hundred thousand fighting men;

and Italy pronounced, with terror and respect, the formidable name of Alaric.[83](#)

At the distance of fourteen centuries, we may be satisfied with relating the military exploits of the conquerors of Rome without presuming to investigate the motives of their political conduct. In the midst of his apparent prosperity, Alaric was conscious, perhaps, of some secret weakness, some internal defect; or perhaps the moderation which he displayed was intended only to deceive and disarm the easy credulity of the ministers of Honorius. The king of the Goths repeatedly declared that it was his desire to be considered as the friend of peace and of the Romans. Three senators, at his earnest request, were sent ambassadors to the court of Ravenna, to solicit the exchange of hostages and the conclusion of the treaty; and the proposals, which he more clearly expressed during the course of the negotiations, could only inspire a doubt of his sincerity, as they might seem inadequate to the state of his fortune. The Barbarian still aspired to the rank of master-general of the armies of the West; he stipulated an annual subsidy of corn and money; and he chose the provinces of Dalmatia, Noricum, and Venetia for the seat of his new kingdom, which would have commanded the important communication between Italy and the Danube. If these modest terms should be rejected, Alaric shewed a disposition to relinquish his pecuniary demands, and even to content himself with the possession of Noricum: an exhausted and impoverished country, perpetually exposed to the inroads of the Barbarians of Germany.[84](#) But the hopes of peace were disappointed by the weak obstinacy, or interested views, of the minister Olympius. Without listening to the salutary remonstrances of the senate, he dismissed their ambassadors under the conduct of a military escort, too numerous for a retinue of honour and too feeble for an army of defence. Six thousand Dalmatians, the flower of the Imperial legions, were ordered to march from Ravenna to Rome, through an open country, which was occupied by the formidable myriads of the Barbarians. These brave legionaries, encompassed and betrayed, fell a sacrifice to ministerial folly; their general, Valens, with an hundred soldiers, escaped from the field of battle; and one of the ambassadors, who could no longer claim the protection of the law of nations, was obliged to purchase his freedom with a ransom of thirty thousand pieces of gold. Yet Alaric, instead of resenting this act of impotent hostility, immediately renewed his proposals of peace; and the second embassy of the Roman senate, which derived weight and dignity from the presence of Innocent, bishop of the city, was guarded from the dangers of the road by a detachment of Gothic soldiers.[85](#)

Olympius[86](#) might have continued to insult the just resentment of a people who loudly accused him as the author of the public calamities; but his power was undermined by the secret intrigues of the palace. The favourite eunuchs transferred the government of Honorius and the empire to Jovius, the Prætorian prefect: an unworthy servant, who did not atone by the merit of personal attachment for the errors and misfortunes of his administration. The exile or escape of the guilty Olympius reserved him for more vicissitudes of fortune: he experienced the adventures of an obscure and wandering

life; he again rose to power; he fell a second time into disgrace; his ears were cut off; he expired under the lash; and his ignominious death afforded a grateful spectacle to the friends of Stilicho. After the removal of Olympius, whose character was deeply tainted with religious fanaticism, the Pagans and heretics were delivered from the impolitic proscription which excluded them from the dignities of the state. The brave Gennerid,⁸⁷ a soldier of Barbarian origin who still adhered to the worship of his ancestors, had been obliged to lay aside the military belt; and, though he was repeatedly assured by the emperor himself that laws were not made for persons of his rank or merit, he refused to accept any partial dispensation, and persevered in honourable disgrace till he had extorted a general act of justice from the distress of the Roman government. The conduct of Gennerid in the important station, to which he was promoted or restored, of master-general of Dalmatia, Pannonia, Noricum and Rhætia⁸⁸ seemed to revive the discipline and spirit of the republic. From a life of idleness and want his troops were soon habituated to severe exercise and plentiful subsistence; and his private generosity often supplied the rewards which were denied by the avarice or poverty of the court of Ravenna. The valour of Gennerid, formidable to the adjacent Barbarians, was the firmest bulwark of the Illyrian frontier; and his vigilant care assisted the empire with a reinforcement of ten thousand Huns, who arrived on the confines of Italy, attended by such a convoy of provisions and such a numerous train of sheep and oxen as might have been sufficient not only for the march of an army but for the settlement of a colony. But the court and councils of Honorius still remained a scene of weakness and distraction, of corruption and anarchy. Instigated by the prefect Jovius the guards rose in furious mutiny, and demanded the heads of two generals, and of the two principal eunuchs. The generals, under a perfidious promise of safety, were sent on shipboard, and privately executed; while the favour of the eunuchs procured them a mild and secure exile at Milan and Constantinople. Eusebius the eunuch and the Barbarian Allobich succeeded to the command of the bedchamber and of the guards; and the mutual jealousy of these subordinate ministers was the cause of their mutual destruction. By the insolent order of the count of the domestics the great chamberlain was shamefully beaten to death with sticks before the eyes of the astonished emperor; and the subsequent assassination of Allobich in the midst of a public procession is the only circumstance of his life in which Honorius discovered the faintest symptom of courage or resentment. Yet, before they fell, Eusebius and Allobich had contributed their part to the ruin of the empire by opposing the conclusion of a treaty which Jovius, from a selfish and perhaps a criminal motive, had negotiated with Alaric in a personal interview under the walls of Rimini. During the absence of Jovius the emperor was persuaded to assume a lofty tone of inflexible dignity, such as neither his situation nor his character could enable him to support: and a letter signed with the name of Honorius was immediately despatched to the Prætorian prefect, granting him a free permission to dispose of the public money, but sternly refusing to prostitute the military honours of Rome to the proud demands of a Barbarian. This letter was imprudently communicated to Alaric himself; and the Goth, who in the whole transaction had behaved with temper and decency, expressed

in the most outrageous language his lively sense of the insult so wantonly offered to his person and to his nation. The conference of Rimini was hastily interrupted; and the prefect Jovius on his return to Ravenna was compelled to adopt, and even to encourage, the fashionable opinions of the court. By his advice and example the principal officers of the state and army were obliged to swear that, without listening, in *any* circumstances, to *any* condition of peace, they would still persevere in perpetual and implacable war against the enemy of the republic. This rash engagement opposed an insuperable bar to all future negotiation. The ministers of Honorius were heard to declare that, if they had only invoked the name of the Deity, they would consult the public safety and trust their souls to the mercy of Heaven; but they had sworn by the sacred head of the emperor himself; they had touched in solemn ceremony that august seat of majesty and wisdom; and the violation of their oath would expose them to the temporal penalties of sacrilege and rebellion.[89](#)

While the emperor and his court enjoyed, with sullen pride, the security of the marshes and fortifications of Ravenna, they abandoned Rome almost without defence to the resentment of Alaric. Yet such was the moderation which he still preserved or affected that, as he moved with his army along the Flaminian way, he successively despatched the bishops of the towns of Italy to reiterate his offers of peace and to conjure the emperor that he would save the city and its inhabitants from hostile fire and the sword of the Barbarians.[90](#) These impending calamities were however averted, not indeed by the wisdom of Honorius, but by the prudence or humanity of the Gothic king; who employed a milder, though not less effectual, method of conquest. Instead of assaulting the capital, he successfully directed his efforts against the *Port* of Ostia, one of the boldest and most stupendous works of Roman magnificence.[91](#) The accidents to which the precarious subsistence of the city was continually exposed in a winter-navigation and an open road had suggested to the genius of the first Cæsar the useful design which was executed under the reign of Claudius. The artificial moles which formed the narrow entrance advanced far into the sea and firmly repelled the fury of the waves, while the largest vessels securely rode at anchor within three deep and capacious basins, which received the northern branch of the Tiber, about two miles from the ancient colony of Ostia.[92](#) The Roman *Port* insensibly swelled to the size of an episcopal city,[93](#) where the corn of Africa was deposited in spacious granaries for the use of the capital. As soon as Alaric was in possession of that important place, he summoned the city to surrender at discretion, and his demands were enforced by the positive declaration that a refusal or even a delay should be instantly followed by the destruction of the magazines, on which the life of the Roman people depended. The clamours of that people and the terror of famine subdued the pride of the senate; they listened without reluctance to the proposal of placing a new emperor on the throne of the unworthy Honorius; and the suffrage of the Gothic conqueror bestowed the purple on Attalus, prefect of the city. The grateful monarch immediately acknowledged his protector as master-general of the armies of the West; Adolphus, with the rank of

count of the domestics, obtained the custody of the person of Attalus; and the two hostile nations seemed to be united in the closest bands of friendship and alliance.[94](#)

The gates of the city were thrown open, and the new emperor of the Romans, encompassed on every side by the Gothic arms, was conducted in tumultuous procession, to the palace of Augustus and Trajan. After he had distributed the civil and military dignities among his favourites and followers, Attalus convened an assembly of the senate; before whom, in a formal and florid speech, he asserted his resolution of restoring the majesty of the republic, and of uniting to the empire the provinces of Egypt and the East, which had once acknowledged the sovereignty of Rome. Such extravagant promises inspired every reasonable citizen with a just contempt for the character of an unwarlike usurper; whose elevation was the deepest and most ignominious wound which the republic had yet sustained from the insolence of the Barbarians. But the populace, with their usual levity, applauded the change of masters. The public discontent was favourable to the rival of Honorius; and the sectaries, oppressed by his persecuting edicts, expected some degree of countenance, or at least of toleration, from a prince who, in his native country of Ionia, had been educated in the Pagan superstition, and who had since received the sacrament of baptism from the hands of an Arian bishop.[95](#) The first days of the reign of Attalus were fair and prosperous. An officer of confidence was sent with an inconsiderable body of troops to secure the obedience of Africa; the greatest part of Italy submitted to the terror of the Gothic powers; and, though the city of Bologna made a vigorous and effectual resistance, the people of Milan, dissatisfied perhaps with the absence of Honorius, accepted, with loud acclamations, the choice of the Roman senate. At the head of a formidable army Alaric conducted his royal captive almost to the gates of Ravenna; and a solemn embassy of the principal ministers, of Jovius, the Prætorian prefect, of Valens, master of the cavalry and infantry, of the quæstor Potamius, and of Julian, the first of the notaries, was introduced with martial pomp into the Gothic camp. In the name of their sovereign they consented to acknowledge the lawful election of his competitor, and to divide the provinces of Italy and the West between the two emperors. Their proposals were rejected with disdain; and the refusal was aggravated by the insulting clemency of Attalus, who condescended to promise that, if Honorius would instantly resign the purple, he should be permitted to pass the remainder of his life in the peaceful exile of some remote island.[96](#) So desperate indeed did the situation of the son of Theodosius appear to those who were the best acquainted with his strength and resources, that Jovius and Valens, his minister and his general, betrayed their trust, infamously deserted the sinking cause of their benefactor, and devoted their treacherous allegiance to the service of his more fortunate rival. Astonished by such examples of domestic treason, Honorius trembled at the approach of every servant, at the arrival of every messenger. He dreaded the secret enemies, who might lurk in his capital, his palace, his bedchamber; and some ships lay ready in the harbour of Ravenna to transport the abdicated monarch to the dominions of his infant nephew, the emperor of the East.

But there is a Providence (such at least was the opinion of the historian Procopius⁹⁷) that watches over innocence and folly; and the pretensions of Honorius to its peculiar care cannot reasonably be disputed. At the moment when his despair, incapable of any wise or manly resolution, meditated a shameful flight,⁹⁸ a seasonable reinforcement of four thousand veterans unexpectedly landed in the port of Ravenna. To these valiant strangers, whose fidelity had not been corrupted by the factions of the court, he committed the walls and gates of the city; and the slumbers of the emperor were no longer disturbed by the apprehension of imminent and internal danger. The favourable intelligence which was received from Africa suddenly changed the opinions of men, and the state of public affairs. The troops and officers whom Attalus had sent into that province were defeated and slain; and the active zeal of Heraclian maintained his own allegiance and that of his people. The faithful count of Africa transmitted a large sum of money, which fixed the attachment of the Imperial guards; and his vigilance, in preventing the exportation of corn and oil, introduced famine, tumult, and discontent into the walls of Rome. The failure of the African expedition was the source of mutual complaint and recrimination in the party of Attalus; and the mind of his protector was insensibly alienated from the interest of a prince who wanted spirit to command or docility to obey. The most imprudent measures were adopted, without the knowledge, or against the advice, of Alaric; and the obstinate refusal of the senate to allow, in the embarkation, the mixture even of five hundred Goths betrayed a suspicious and distrustful temper, which, in their situation, was neither generous nor prudent. The resentment of the Gothic king was exasperated by the malicious arts of Jovius, who had been raised to the rank of patrician, and who afterwards excused his double perfidy by declaring, without a blush, that he had only *seemed* to abandon the service of Honorius, more effectually to ruin the cause of the usurper. In a large plain near Rimini, and in the presence of an innumerable multitude of Romans and Barbarians, the wretched Attalus was publicly despoiled of the diadem and purple; and those ensigns of royalty were sent by Alaric, as the pledge of peace and friendship, to the son of Theodosius.⁹⁹ The officers who returned to their duty were reinstated in their employments, and even the merit of a tardy repentance was graciously allowed; but the degraded emperor of the Romans, desirous of life and insensible of disgrace, implored the permission of following the Gothic camp in the train of a haughty and capricious Barbarian.¹⁰⁰

The degradation of Attalus removed the only real obstacle to the conclusion of the peace; and Alaric advanced within three miles of Ravenna, to press the irresolution of the Imperial ministers, whose insolence soon returned with the return of fortune. His indignation was kindled by the report that a rival chieftain, that Sarus, the personal enemy of Adolphus and the hereditary foe of the house of Balti, had been received into the palace. At the head of three hundred followers, that fearless Barbarian immediately sallied from the gates of Ravenna; surprised, and cut in pieces, a considerable body of

Goths; re-entered the city in triumph; and was permitted to insult his adversary by the voice of a herald, who publicly declared that the guilt of Alaric had for ever excluded him from the friendship and alliance of the emperor.[101](#) The crime and folly of the court of Ravenna was expiated a third time by the calamities of Rome. The king of the Goths, who no longer dissembled his appetite for plunder and revenge, appeared in arms under the walls of the capital; and the trembling senate, without any hopes of relief, prepared, by a desperate resistance, to delay the ruin of their country. But they were unable to guard against the secret conspiracy of their slaves and domestics; who, either from birth or interest, were attached to the cause of the enemy. At the hour of midnight, the Salarian gate was silently opened, and the inhabitants were awakened by the tremendous sound of the Gothic trumpet. Eleven hundred and sixty-three years after the foundation of Rome, the Imperial city, which had subdued and civilised so considerable a part of mankind, was delivered to the licentious fury of the tribes of Germany and Scythia.[102](#)

The proclamation of Alaric, when he forced his entrance into a vanquished city, discovered, however, some regard for the laws of humanity and religion. He encouraged his troops boldly to seize the rewards of valour, and to enrich themselves with the spoils of a wealthy and effeminate people; but he exhorted them at the same time to spare the lives of the unresisting citizens, and to respect the churches of the apostles St. Peter and St. Paul, as holy and inviolable sanctuaries. Amidst the horrors of a nocturnal tumult, several of the Christian Goths displayed the fervour of a recent conversion; and some instances of their uncommon piety and moderation are related, and perhaps adorned, by the zeal of ecclesiastical writers.[103](#) While the Barbarians roamed through the city in quest of prey, the humble dwelling of an aged virgin, who had devoted her life to the service of the altar, was forced open by one of the powerful Goths. He immediately demanded, though in civil language, all the gold and silver in her possession; and was astonished at the readiness with which she conducted him to a splendid hoard of massy plate, of the richest materials, and the most curious workmanship. The Barbarian viewed with wonder and delight this valuable acquisition, till he was interrupted by a serious admonition, addressed to him in the following words: “These,” said she, “are the consecrated vessels belonging to St. Peter; if you presume to touch them, the sacrilegious deed will remain on your conscience. For my part, I dare not keep what I am unable to defend.” The Gothic captain, struck with reverential awe, despatched a messenger to inform the king of the treasure which he had discovered; and received a peremptory order from Alaric that all the consecrated plate and ornaments should be transported, without damage or delay, to the church of the apostle. From the extremity, perhaps, of the Quirinal hill to the distant quarter of the Vatican, a numerous detachment of Goths, marching in order of battle through the principal streets, protected, with glittering arms, the long train of their devout companions, who bore aloft, on their heads, the sacred vessels of gold and silver; and the martial shouts of the Barbarians were mingled with the sound of religious psalmody. From all the adjacent houses, a crowd of Christians hastened to

join this edifying procession; and a multitude of fugitives, without distinction of age, or rank, or even of sect, had the good fortune to escape to the secure and hospitable sanctuary of the Vatican. The learned work, concerning the *City of God*, was professedly composed by St. Augustin, to justify the ways of Providence in the destruction of the Roman greatness. He celebrates with peculiar satisfaction this memorable triumph of Christ; and insults his adversaries by challenging them to produce some similar example of a town taken by storm in which the fabulous gods of antiquity had been able to protect either themselves or their deluded votaries.[104](#)

In the sack of Rome, some rare and extraordinary examples of Barbarian virtue have been deservedly applauded. But the holy precincts of the Vatican and the apostolic churches could receive a very small proportion of the Roman people: many thousand warriors, more especially of the Huns, who served under the standard of Alaric, were strangers to the name, or at least to the faith, of Christ; and we may suspect, without any breach of charity or candour, that in the hour of savage licence, when every passion was inflamed and every restraint was removed, the precepts of the gospel seldom influenced the behaviour of the Gothic Christians. The writers, the best disposed to exaggerate their clemency, have freely confessed that a cruel slaughter was made of the Romans;[105](#) and that the streets of the city were filled with dead bodies, which remained without burial during the general consternation. The despair of the citizens was sometimes converted into fury; and, whenever the Barbarians were provoked by opposition, they extended the promiscuous massacre to the feeble, the innocent, and the helpless. The private revenge of forty thousand slaves was exercised without pity or remorse; and the ignominious lashes, which they had formerly received, were washed away in the blood of the guilty, or obnoxious, families. The matrons and virgins of Rome were exposed to injuries more dreadful in the apprehension of chastity than death itself; and the ecclesiastical historian has selected an example of female virtue, for the admiration of future ages.[106](#) A Roman lady of singular beauty and orthodox faith had excited the impatient desires of a young Goth, who, according to the sagacious remark of Sozomen, was attached to the Arian heresy. Exasperated by her obstinate resistance, he drew his sword, and, with the anger of a lover, slightly wounded her neck. The bleeding heroine still continued to brave his resentment and to repel his love, till the ravisher desisted from his unavailing efforts, respectfully conducted her to the sanctuary of the Vatican, and gave six pieces of gold to the guards of the church, on condition that they should restore her inviolate to the arms of her husband. Such instances of courage and generosity were not extremely common. The brutal soldiers satisfied their sensual appetites, without consulting either the inclination or the duties of their female captives; and a nice question of casuistry was seriously agitated, Whether those tender victims who had inflexibly refused their consent to the violation which they sustained had lost, by their misfortune, the glorious crown of virginity.[107](#) There were other losses indeed of a more substantial kind and more general concern. It cannot be presumed that all the Barbarians were at all times

capable of perpetrating such amorous outrages; and the want of youth or beauty or chastity protected the greatest part of the Roman women from the danger of a rape. But avarice is an insatiate and universal passion; since the enjoyment of almost every object that can afford pleasure to the different tastes and tempers of mankind may be procured by the possession of wealth. In the pillage of Rome, a just preference was given to gold and jewels, which contain the greatest value in the smallest compass and weight; but, after these portable riches had been removed by the more diligent robbers, the palaces of Rome were rudely stripped of their splendid and costly furniture. The sideboards of massy plate, and the variegated wardrobes of silk and purple, were irregularly piled in the waggons that always followed the march of a Gothic army. The most exquisite works of art were roughly handled or wantonly destroyed: many a statue was melted for the sake of the precious materials; and many a vase, in the division of the spoil, was shivered into fragments by the stroke of a battle-axe. The acquisition of riches served only to stimulate the avarice of the rapacious Barbarians, who proceeded by threats, by blows, and by tortures to force from their prisoners the confession of hidden treasure.[108](#) Visible splendour and expense were alleged as the proof of a plentiful fortune; the appearance of poverty was imputed to a parsimonious disposition; and the obstinacy of some misers, who endured the most cruel torments before they would discover the secret object of their affection, was fatal to many unhappy wretches, who expired under the lash for refusing to reveal their imaginary treasures. The edifices of Rome,

THE HISTORY OF THE DECLINE AND FALL OF THE ROMAN EMPIRE

CHAPTER XXXIV

The Character, Conquests, and Court of Attila, King of the Huns — Death of Theodosius the Younger — Elevation of Marcian to the Empire of the East

The Western world was oppressed by the Goths and Vandals, who fled before the Huns; but the achievements of the Huns themselves were not adequate to their power and prosperity. Their victorious hordes had spread from the Volga to the Danube; but the public force was exhausted by the discord of independent chieftains; their valour was idly consumed in obscure and predatory excursions; and they often degraded their national dignity by condescending, for the hopes of spoil, to enlist under the banners of their fugitive enemies. In the reign of Attila,¹ the Huns again became the terror of the world; and I shall now describe the character and actions of that formidable Barbarian, who alternately insulted and invaded the East and the West, and urged the rapid downfall of the Roman empire.

In the tide of emigration which impetuously rolled from the confines of China to those of Germany, the most powerful and populous tribes may commonly be found on the verge of the Roman provinces. The accumulated weight was sustained for a while by artificial barriers; and the easy condescension of the emperors invited, without satisfying, the insolent demands of the Barbarians, who had acquired an eager appetite for the luxuries of civilised life. The Hungarians, who ambitiously insert the name of Attila among their native kings, may affirm with truth that the hordes which were subject to his uncle Roas, or Rugilas, had formed their encampments within the limits of modern Hungary,² in a fertile country which liberally supplied the wants of a nation of hunters and shepherds. In this advantageous situation, Rugilas and his valiant brothers, who continually added to their power and reputation, commanded the alternative of peace or war with the two empires. His alliance with the Romans of the West was cemented by his personal friendship for the great Aetius; who was always secure of finding in the Barbarian camp a hospitable reception and a powerful support. At his solicitation, in the name of John the usurper, sixty thousand Huns advanced to the confines of Italy; their march and their retreat were alike expensive to the state; and the grateful policy of Aetius abandoned the possession of Pannonia to his faithful confederates. The Romans of the East were not less apprehensive of the arms of Rugilas, which threatened the provinces, or even the capital. Some ecclesiastical

historians have destroyed the Barbarians with lightning and pestilence;[3](#) but Theodosius was reduced to the more humble expedient of stipulating an annual payment of three hundred and fifty pounds of gold, and of disguising this dishonourable tribute by the title of general, which the king of the Huns condescended to accept. The public tranquillity was frequently interrupted by the fierce impatience of the Barbarians and the perfidious intrigues of the Byzantine court. Four dependent nations, among whom we may distinguish the Bavarians, disclaimed the sovereignty of the Huns; and their revolt was encouraged and protected by a Roman alliance; till the just claims and formidable power of Rugilas were effectually urged by the voice of Eslaw, his ambassador. Peace was the unanimous wish of the senate; their decree was ratified by the emperor; and two ambassadors were named, Plinthas, a general of Scythian extraction, but of consular rank, and the quæstor Epigenes, a wise and experienced statesman, who was recommended to that office by his ambitious colleague.

The death of Rugilas suspended the progress of the treaty. His two nephews, Attila and Bleda, who succeeded to the throne of their uncle, consented to a personal interview with the ambassadors of Constantinople; but, as they proudly refused to dismount, the business was transacted on horseback, in a spacious plain near the city of Margus in the Upper Mæsia. The kings of the Huns assumed the solid benefits, as well as the vain honours, of the negotiation. They dictated the conditions of peace, and each condition was an insult on the majesty of the empire. Besides the freedom of a safe and plentiful market on the banks of the Danube, they required that the annual contribution should be augmented from three hundred and fifty to seven hundred pounds of gold; that a fine, or ransom, of eight pieces of gold should be paid for every Roman captive who had escaped from his Barbarian master; that the emperor should renounce all treaties and engagements with the enemies of the Huns; and that all the fugitives, who had taken refuge in the court or provinces of Theodosius, should be delivered to the justice of their offended sovereign. This justice was rigorously inflicted on some unfortunate youths of a royal race. They were crucified on the territories of the empire, by the command of Attila: and, as soon as the king of the Huns had impressed the Romans with the terror of his name, he indulged them in a short and arbitrary respite, whilst he subdued the rebellious or independent nations of Scythia and Germany.[4](#)

Attila, the son of Mundzuk, deduced his noble, perhaps his regal, descent[5](#) from the ancient Huns, who had formerly contended with the monarchs of China. His features, according to the observation of a Gothic historian, bore the stamp of his national origin; and the portrait of Attila exhibits the genuine deformity of a modern Calmuck:[6](#) a large head, a swarthy complexion, small, deep-seated eyes, a flat nose, a few hairs in the place of a beard, broad shoulders, and a short square body, of nervous strength, though of a disproportioned form. The haughty step and demeanour of the king of the Huns expressed the consciousness of his superiority above the rest of mankind; and he

had a custom of fiercely rolling his eyes, as if he wished to enjoy the terror which he inspired. Yet this savage hero was not inaccessible to pity: his suppliant enemies might confide in the assurance of peace or pardon; and Attila was considered by his subjects as a just and indulgent master. He delighted in war; but, after he had ascended the throne in a mature age, his head, rather than his hand, achieved the conquest of the North; and the fame of an adventurous soldier was usefully exchanged for that of a prudent and successful general. The effects of personal valour are so inconsiderable, except in poetry or romance, that victory, even among Barbarians, must depend on the degree of skill with which the passions of the multitude are combined and guided for the service of a single man. The Scythian conquerors, Attila and Zingis, surpassed their rude countrymen in art rather than in courage; and it may be observed that the monarchies, both of the Huns and of the Moguls, were erected by their founders on the basis of popular superstition. The miraculous conception, which fraud and credulity ascribed to the virgin-mother of Zingis, raised him above the level of human nature; and the naked prophet, who, in the name of the Deity, invested him with the empire of the earth, pointed the valour of the Moguls with irresistible enthusiasm.⁷ The religious arts of Attila were not less skilfully adapted to the character of his age and country. It was natural enough that the Scythians should adore, with peculiar devotion, the god of war; but, as they were incapable of forming either an abstract idea or a corporeal representation, they worshipped their tutelar deity under the symbol of an iron cimeter.⁸ One of the shepherds of the Huns perceived that a heifer, who was grazing, had wounded herself in the foot, and curiously followed the track of the blood, till he discovered, among the long grass, the point of an ancient sword, which he dug out of the ground and presented to Attila. That magnanimous, or rather that artful, prince accepted, with pious gratitude, this celestial favour; and, as the rightful possessor of the *sword of Mars*, asserted his divine and indefeasible claim to the dominion of the earth.⁹ If the rites of Scythia were practised on this solemn occasion, a lofty altar, or rather pile of faggots, three hundred yards in length and in breadth, was raised in a spacious plain; and the sword of Mars was placed erect on the summit of this rustic altar, which was annually consecrated by the blood of sheep, horses, and of the hundredth captive.¹⁰ Whether human sacrifices formed any part of the worship of Attila, or whether he propitiated the god of war with the victims which he continually offered in the field of battle, the favourite of Mars soon acquired a sacred character, which rendered his conquests more easy, and more permanent; and the Barbarian princes confessed, in the language of devotion and flattery, that they could not presume to gaze, with a steady eye, on the divine majesty of the king of the Huns.¹¹ His brother Bleda, who reigned over a considerable part of the nation, was compelled to resign his sceptre and his life. Yet even this cruel act was attributed to a supernatural impulse; and the vigour with which Attila wielded the sword of Mars convinced the world that it had been reserved alone for his invincible arm.¹² But the extent of his empire affords the only remaining evidence of the number and importance of his victories; and the Scythian monarch, however ignorant of the value

of science and philosophy, might, perhaps, lament that his illiterate subjects were destitute of the art which could perpetuate the memory of his exploits.

If a line of separation were drawn between the civilised and the savage climates of the globe; between the inhabitants of cities, who cultivated the earth, and the hunters and shepherds, who dwelt in tents; Attila might aspire to the title of supreme and sole monarch of the Barbarians.¹³ He alone, among the conquerors of ancient and modern times, united the two mighty kingdoms of Germany and Scythia; and those vague appellations, when they are applied to his reign, may be understood with an ample latitude. Thuringia, which stretched beyond its actual limits as far as the Danube, was in the number of his provinces; he interposed, with the weight of a powerful neighbour, in the domestic affairs of the Franks; and one of his lieutenants chastised, and almost exterminated, the Burgundians of the Rhine. He subdued the islands of the ocean, the kingdoms of Scandinavia, encompassed and divided by the waters of the Baltic; and the Huns might derive a tribute of furs from that Northern region which has been protected from all other conquerors by the severity of the climate and the courage of the natives. Towards the east, it is difficult to circumscribe the dominion of Attila over the Scythian deserts; yet we may be assured that he reigned on the banks of the Volga; that the king of the Huns was dreaded, not only as a warrior, but as a magician;¹⁴ that he insulted and vanquished the Khan of the formidable Geougen; and that he sent ambassadors to negotiate an equal alliance with the empire of China. In the proud review of the nations who acknowledged the sovereignty of Attila, and who never entertained, during his lifetime, the thought of a revolt, the Gepidæ and the Ostrogoths were distinguished by their numbers, their bravery, and the personal merit of their chiefs. The renowned Ardaric, king of the Gepidæ, was the faithful and sagacious counsellor of the monarch, who esteemed his intrepid genius, whilst he loved the mild and discreet virtues of the noble Walamir, king of the Ostrogoths. The crowd of vulgar kings, the leaders of so many martial tribes, who served under the standard of Attila, were ranged in the submissive order of guards and domestics, round the person of their master. They watched his nod; they trembled at his frown; and, at the first signal of his will, they executed, without murmur or hesitation, his stern and absolute commands. In time of peace, the dependent princes, with their national troops, attended the royal camp in regular succession; but, when Attila collected his military force, he was able to bring into the field an army of five, or according to another account of seven, hundred thousand Barbarians.¹⁵

The ambassadors of the Huns might awaken the attention of Theodosius, by reminding him that they were his neighbours both in Europe and Asia; since they touched the Danube on one hand, and reached, with the other, as far as the Tanais. In the reign of his father Arcadius, a band of adventurous Huns had ravaged the provinces of the East; from whence they brought away rich spoils and innumerable captives.¹⁶

They advanced, by a secret path, along the shores of the Caspian Sea; traversed the snowy mountains of Armenia; passed the Tigris, the Euphrates, and the Halys; recruited their weary cavalry with the generous breed of Cappadocian horses; occupied the hilly country of Cilicia; and disturbed the festal songs and dances of the citizens of Antioch. Egypt trembled at their approach; and the monks and pilgrims of the Holy Land prepared to escape their fury by a speedy embarkation. The memory of this invasion was still recent in the minds of the Orientals. The subjects of Attila might execute, with superior forces, the design which these adventurers had so boldly attempted; and it soon became the subject of anxious conjecture, whether the tempest would fall on the dominions of Rome or of Persia. Some of the great vassals of the king of the Huns, who were themselves in the rank of powerful princes, had been sent to ratify an alliance and society of arms with the emperor, or rather with the general, of the West. They related, during their residence at Rome, the circumstances of an expedition which they had lately made into the East. After passing a desert and a morass, supposed by the Romans to be the lake Mæotis, they penetrated through the mountains, and arrived, at the end of fifteen days' march, on the confines of Media; where they advanced as far as the unknown cities of Basic and Cursic.¹⁷ They encountered the Persian army in the plains of Media; and the air, according to their own expression, was darkened by a cloud of arrows. But the Huns were obliged to retire, before the numbers of the enemy. Their laborious retreat was effected by a different road; they lost the greatest part of their booty; and at length returned to the royal camp, with some knowledge of the country, and an impatient desire of revenge. In the free conversation of the Imperial ambassadors, who discussed, at the court of Attila, the character and designs of their formidable enemy, the ministers of Constantinople expressed their hope that his strength might be diverted and employed in a long and doubtful contest with the princes of the house of Sassan. The more sagacious Italians admonished their Eastern brethren of the folly and danger of such a hope, and convinced them *that* the Medes and Persians were incapable of resisting the arms of the Huns, and *that* the easy and important acquisition would exalt the pride, as well as power, of the conqueror. Instead of contenting himself with a moderate contribution, and a military title which equalled him only to the generals of Theodosius, Attila would proceed to impose a disgraceful and intolerable yoke on the necks of the prostrate and captive Romans, who would then be encompassed, on all sides, by the empire of the Huns.¹⁸

While the powers of Europe and Asia were solicitous to avert the impending danger, the alliance of Attila maintained the Vandals in the possession of Africa. An enterprise had been concerted between the courts of Ravenna and Constantinople, for the recovery of that valuable province; and the ports of Sicily were already filled with the military and naval forces of Theodosius. But the subtle Genseric, who spread his negotiations round the world, prevented their designs by exciting the king of the Huns to invade the Eastern empire; and a trifling incident soon became the motive, or pretence, of a destructive war.¹⁹ Under the faith of the treaty of Margus, a free market

was held on the northern side of the Danube, which was protected by a Roman fortress surnamed Constantia. A troop of Barbarians violated the commercial security, killed, or dispersed, the unsuspecting traders, and levelled the fortress with the ground. The Huns justified this outrage as an act of reprisal; alleged that the bishop of Margus had entered their territories, to discover and steal a secret treasure of their kings; and sternly demanded the guilty prelate, the sacrilegious spoil, and the fugitive subjects, who had escaped from the justice of Attila. The refusal of the Byzantine court was the signal of war; and the Mæsians at first applauded the generous firmness of their sovereign. But they were soon intimidated by the destruction of Viminacium and the adjacent towns; and the people were persuaded to adopt the convenient maxim that a private citizen, however innocent or respectable, may be justly sacrificed to the safety of his country. The bishop of Margus, who did not possess the spirit of a martyr, resolved to prevent the designs which he suspected. He boldly treated with the princes of the Huns; secured, by solemn oaths, his pardon and reward; posted a numerous detachment of Barbarians, in silent ambush, on the banks of the Danube; and at the appointed hour opened, with his own hand, the gates of his episcopal city. This advantage, which had been obtained by treachery, served as a prelude to more honourable and decisive victories. The Illyrian frontier was covered by a line of castles and fortresses; and, though the greatest part of them consisted only of a single tower, with a small garrison, they were commonly sufficient to repel, or to intercept, the inroads of an enemy who was ignorant of the art, and impatient of the delay, of a regular siege. But these slight obstacles were instantly swept away by the inundation of the Huns.²⁰ They destroyed, with fire and sword, the populous cities of Sirmium and Singidunum, of Ratiaria^{20a} and Marcianopolis, of Naissus and Sardica; where every circumstance, in the discipline of the people and the construction of the buildings, had been gradually adapted to the sole purpose of defence. The whole breadth of Europe, as it extends above five hundred miles from the Euxine to the Hadriatic, was at once invaded, and occupied, and desolated by the myriads of Barbarians whom Attila led into the field. The public danger and distress could not, however, provoke Theodosius to interrupt his amusements and devotion, or to appear in person at the head of the Roman legions. But the troops which had been sent against Genseric were hastily recalled from Sicily; the garrisons on the side of Persia were exhausted; and a military force was collected in Europe, formidable by their arms and numbers, if the generals had understood the science of command, and their soldiers the duty of obedience. The armies of the Eastern empire were vanquished in three successive engagements; and the progress of Attila may be traced by the fields of battle. The two former, on the banks of the Utus, and under the walls of Marcianopolis, were fought in the extensive plains between the Danube and Mount Hæmus. As the Romans were pressed by a victorious enemy, they gradually, and unskilfully, retired towards the Chersonesus of Thrace; and that narrow peninsula, the last extremity of the land, was marked by their third, and irreparable, defeat. By the destruction of this army, Attila acquired the indisputable possession of the field. From the Hellespont to Thermopylæ and the suburbs of Constantinople, he ravaged, without

resistance, and without mercy, the provinces of Thrace and Macedonia. Heraclea and Hadrianople might, perhaps, escape this dreadful irruption of the Huns; but the words the most expressive of total extirpation and erasure are applied to the calamities which they inflicted on seventy cities of the Eastern empire.[21](#) Theodosius, his court, and the unwarlike people were protected by the walls of Constantinople; but those walls had been shaken by a recent earthquake, and the fall of fifty-eight towers had opened a large and tremendous breach. The damage indeed was speedily repaired; but this accident was aggravated by a superstitious fear that Heaven itself had delivered the Imperial city to the shepherds of Scythia, who were strangers to the laws, the language, and the religion of the Romans.[22](#)

In all their invasions of the civilised empires of the South, the Scythian shepherds have been uniformly actuated by a savage and destructive spirit. The laws of war, that restrain the exercise of national rapine and murder, are founded on two principles of substantial interest: the knowledge of the permanent benefits which may be obtained by a moderate use of conquest; and a just apprehension lest the desolation which we inflict on the enemy's country may be retaliated on our own. But these considerations of hope and fear are almost unknown in the pastoral state of nations. The Huns of Attila may, without injustice, be compared to the Moguls and Tartars, before their primitive manners were changed by religion and luxury; and the evidence of Oriental history may reflect some light on the short and imperfect annals of Rome. After the Moguls had subdued the northern provinces of China, it was seriously proposed, not in the hour of victory and passion, but in calm deliberate council, to exterminate all the inhabitants of that populous country, that the vacant land might be converted to the pasture of cattle. The firmness of a Chinese mandarin,[23](#) who insinuated some principles of rational policy into the mind of Zingis, diverted him from the execution of this horrid design. But in the cities of Asia, which yielded to the Moguls, the inhuman abuse of the rights of war was exercised, with a regular form of discipline, which may, with equal reason, though not with equal authority, be imputed to the victorious Huns. The inhabitants, who had submitted to their discretion, were ordered to evacuate their houses, and to assemble in some plain adjacent to the city; where a division was made of the vanquished into three parts. The first class consisted of the soldiers of the garrison, and of the young men capable of bearing arms; and their fate was instantly decided: they were either enlisted among the Moguls, or they were massacred on the spot by the troops, who, with pointed spears and bended bows, had formed a circle round the captive multitude. The second class, composed of the young and beautiful women, of the artificers of every rank and profession, and of the more wealthy or honourable citizens, from whom a private ransom might be expected, was distributed in equal or proportionable lots. The remainder, whose life or death was alike useless to the conquerors, were permitted to return to the city; which, in the meanwhile, had been stripped of its valuable furniture; and a tax was imposed on those wretched inhabitants for the indulgence of breathing their native air. Such was the behaviour of the Moguls, when they were not conscious of any extraordinary rigour.[24](#)

But the most casual provocation, the slightest motive of caprice or convenience, often provoked them to involve a whole people in an indiscriminate massacre; and the ruin of some flourishing cities was executed with such unrelenting perseverance that, according to their own expression, horses might run, without stumbling, over the ground where they had once stood. The three great capitals of Khorasan, Maru, Neisabour, and Herat were destroyed by the armies of Zingis; and the exact account which was taken of the slain amounted to four millions three hundred and forty-seven thousand persons.²⁵ Timur, or Tamerlane, was educated in a less barbarous age, and in the profession of the Mahometan religion; yet, if Attila equalled the hostile ravages of Tamerlane,²⁶ either the Tartar or the Hun might deserve the epithet of the Scourge of God.²⁷

It may be affirmed, with bolder assurance, that the Huns depopulated the provinces of the empire, by the number of Roman subjects whom they led away into captivity. In the hands of a wise legislator, such an industrious colony might have contributed to diffuse, through the deserts of Scythia, the rudiments of the useful and ornamental arts; but these captives, who had been taken in war, were accidentally dispersed among the hordes that obeyed the empire of Attila. The estimate of their respective value was formed by the simple judgment of unenlightened and unprejudiced Barbarians. Perhaps they might not understand the merit of a theologian, profoundly skilled in the controversies of the Trinity and the Incarnation; yet they respected the ministers of every religion; and the active zeal of the Christian missionaries, without approaching the person or the palace of the monarch, successfully laboured in the propagation of the gospel.²⁸ The pastoral tribes, who were ignorant of the distinction of landed property, must have disregarded the use, as well as the abuse, of civil jurisprudence; and the skill of an eloquent lawyer could excite only their contempt, or their abhorrence.²⁹ The perpetual intercourse of the Huns and the Goths had communicated the familiar knowledge of the two national dialects; and the Barbarians were ambitious of conversing in Latin, the military idiom even of the Eastern empire.³⁰ But they disdained the language, and the sciences, of the Greeks; and the vain sophist, or grave philosopher, who had enjoyed the flattering applause of the schools, was mortified to find that his robust servant was a captive of more value and importance than himself. The mechanic arts were encouraged and esteemed, as they tended to satisfy the wants of the Huns. An architect, in the service of Onegesius, one of the favourites of Attila, was employed to construct a bath; but this work was a rare example of private luxury; and the trades of the smith, the carpenter, the armourer, were much more adapted to supply a wandering people with the useful instruments of peace and war. But the merit of the physician was received with universal favour and respect; the Barbarians, who despised death, might be apprehensive of disease; and the haughty conqueror trembled in the presence of a captive, to whom he ascribed, perhaps, an imaginary power of prolonging, or preserving, his life.³¹ The Huns might be provoked to insult the misery of their slaves, over whom they exercised a despotic command;³² but their manners

were not susceptible of a refined system of oppression; and the efforts of courage and diligence were often recompensed by the gift of freedom. The historian Priscus, whose embassy is a course of curious instruction, was accosted, in the camp of Attila, by a stranger, who saluted him in the Greek language, but whose dress and figure displayed the appearance of a wealthy Scythian. In the siege of Viminacium, he had lost, according to his own account, his fortune and liberty; he became the slave of Onegesius; but his faithful services, against the Romans and the Acatzires, had gradually raised him to the rank of the native Huns; to whom he was attached by the domestic pledges of a new wife and several children. The spoils of war had restored and improved his private property; he was admitted to the table of his former lord; and the apostate Greek blessed the hour of his captivity, since it had been the introduction to an happy and independent state; which he held by the honourable tenure of military service. This reflection naturally produced a dispute on the advantages, and defects, of the Roman government, which was severely arraigned by the apostate, and defended by Priscus in a prolix and feeble declamation. The freedman of Onegesius exposed, in true and lively colours, the vices of a declining empire, of which he had so long been the victim; the cruel absurdity of the Roman princes, unable to protect their subjects against the public enemy, unwilling to trust them with arms for their own defence; the intolerable weight of taxes, rendered still more oppressive by the intricate or arbitrary modes of collection; the obscurity of numerous and contradictory laws; the tedious and expensive forms of judicial proceedings; the partial administration of justice; and the universal corruption, which increased the influence of the rich, and aggravated the misfortunes of the poor. A sentiment of patriotic sympathy was at length revived in the breast of the fortunate exile; and he lamented, with a flood of tears, the guilt or weakness of those magistrates who had perverted the wisest and most salutary institutions.[33](#)

The timid, or selfish, policy of the Western Romans had abandoned the Eastern empire to the Huns.[34](#) The loss of armies, and the want of discipline or virtue, were not supplied by the personal character of the monarch. Theodosius might still affect the style, as well as the title, of *Invincible Augustus*; but he was reduced to solicit the clemency of Attila, who imperiously dictated these harsh and humiliating conditions of peace. I. The emperor of the East resigned, by an express or tacit convention, an extensive and important territory, which stretched along the southern banks of the Danube, from Singidunum, or Belgrade, as far as Novæ, in the diocese of Thrace. The breadth was defined by the vague computation of fifteen days' journey; but, from the proposal of Attila to remove the situation of the national market, it soon appeared that he comprehended the ruined city of Naissus within the limits of his dominions. II. The king of the Huns required and obtained, that his tribute or subsidy should be augmented from seven hundred pounds of gold to the annual sum of two thousand one hundred; and he stipulated the immediate payment of six thousand pounds of gold to defray the expenses, or to expiate the guilt, of the war. One might imagine that such a demand, which scarcely equalled the measure of private wealth, would have been

readily discharged by the opulent empire of the East; and the public distress affords a remarkable proof of the impoverished, or at least of the disorderly, state of the finances. A large proportion of the taxes, extorted from the people, was detained and intercepted in their passage, through the foulest channels, to the treasury of Constantinople. The revenue was dissipated by Theodosius and his favourites in wasteful and profuse luxury; which was disguised by the names of Imperial magnificence or Christian charity. The immediate supplies had been exhausted by the unforeseen necessity of military preparations. A personal contribution, rigorously, but capriciously, imposed on the members of the senatorian order, was the only expedient that could disarm, without loss of time, the impatient avarice of Attila; but the poverty of the nobles compelled them to adopt the scandalous resource of exposing to public auction the jewels of their wives and the hereditary ornaments of their palaces.³⁵ III. The king of the Huns appears to have established, as a principle of national jurisprudence, that he could never lose the property which he had once acquired in the persons who had yielded either a voluntary or reluctant submission to his authority. From this principle he concluded, and the conclusions of Attila were irrevocable laws, that the Huns who had been taken prisoners in war should be released without delay and without ransom; that every Roman captive who had presumed to escape should purchase his right to freedom at the price of twelve pieces of gold; and that all the Barbarians who had deserted the standard of Attila should be restored, without any promise, or stipulation, of pardon. In the execution of this cruel and ignominious treaty, the Imperial officers were forced to massacre several loyal and noble deserters, who refused to devote themselves to certain death; and the Romans forfeited all reasonable claims to the friendship of any Scythian people, by this public confession that they were destitute either of faith or power to protect the suppliants who had embraced the throne of Theodosius.³⁶

The firmness of a single town, so obscure that, except on this occasion, it has never been mentioned by any historian or geographer, exposed the disgrace of the emperor and empire. Azimus, or Azimuntium, a small city of Thrace on the Illyrian borders,³⁷ had been distinguished by the martial spirit of its youth, the skill and reputation of the leaders whom they had chosen, and their daring exploits against the innumerable host of the Barbarians. Instead of tamely expecting their approach, the Azimuntines attacked, in frequent and successful sallies, the troops of the Huns, who gradually declined the dangerous neighbourhood; rescued from their hands the spoil and the captives; and recruited their domestic force by the voluntary association of fugitives and deserters. After the conclusion of the treaty, Attila still menaced the empire with implacable war, unless the Azimuntines were persuaded, or compelled, to comply with the conditions which their sovereign had accepted. The ministers of Theodosius confessed with shame, and with truth, that they no longer possessed any authority over a society of men, who so bravely asserted their natural independence; and the king of the Huns condescended to negotiate an equal exchange with the citizens of Azimus. They demanded the restitution of some shepherds, who, with their cattle, had been

accidentally surprised. A strict, though fruitless, inquiry was allowed; but the Huns were obliged to swear that they did not detain any prisoners belonging to the city, before they could recover two surviving countrymen, whom the Azimuntines had reserved as pledges for the safety of their lost companions. Attila, on his side, was satisfied, and deceived, by their solemn asseveration that the rest of the captives had been put to the sword; and that it was their constant practice immediately to dismiss the Romans and the deserters, who had obtained the security of the public faith. This prudent and officious dissimulation may be condemned or excused by the casuists, as they incline to the rigid decree of St. Augustin or to the milder sentiment of St. Jerom and St. Chrysostom; but every soldier, every statesman, must acknowledge that, if the race of the Azimuntines had been encouraged and multiplied, the Barbarians would have ceased to trample on the majesty of the empire.[38](#)

It would have been strange, indeed, if Theodosius had purchased, by the loss of honour, a secure and solid tranquillity; or if his tameness had not invited the repetition of injuries. The Byzantine court was insulted by five or six successive embassies;[39](#) and the ministers of Attila were uniformly instructed to press the tardy or imperfect execution of the last treaty; to produce the names of fugitives and deserters, who were still protected by the empire; and to declare, with seeming moderation, that, unless their sovereign obtained complete and immediate satisfaction, it would be impossible for him, were it even his wish, to check the resentment of his warlike tribes. Besides the motives of pride and interest which might prompt the king of the Huns to continue this train of negotiation, he was influenced by the less honourable view of enriching his favourites at the expense of his enemies. The Imperial treasury was exhausted, to procure the friendly offices of the ambassadors and their principal attendants, whose favourable report might conduce to the maintenance of peace. The Barbarian monarch was flattered by the liberal reception of his ministers; he computed with pleasure the value and splendour of their gifts, rigorously exacted the performance of every promise which would contribute to their private emolument, and treated as an important business of state the marriage of his secretary Constantius.[40](#) That Gallic adventurer, who was recommended by Aetius to the king of the Huns, had engaged his service to the ministers of Constantinople, for the stipulated reward of a wealthy and noble wife; and the daughter of Count Saturninus was chosen to discharge the obligations of her country. The reluctance of the victim, some domestic troubles, and the unjust confiscation of her fortune cooled the ardour of her interested lover; but he still demanded, in the name of Attila, an equivalent alliance; and, after many ambiguous delays and excuses, the Byzantine court was compelled to sacrifice to this insolent stranger the widow of Armatius, whose birth, opulence, and beauty placed her in the most illustrious rank of the Roman matrons. For these importunate and oppressive embassies, Attila claimed a suitable return; he weighed, with suspicious pride, the character and station of the Imperial envoys; but he condescended to promise that he would advance as far as Sardica, to receive any ministers who had been invested with the consular dignity. The council of Theodosius eluded this

proposal by representing the desolate and ruined condition of Sardica; and even ventured to insinuate that every officer of the army or household was qualified to treat with the most powerful princes of Scythia. Maximin,^{[41](#)} a respectable courtier, whose abilities had been long exercised in civil and military employments, accepted with reluctance the troublesome and, perhaps, dangerous commission of reconciling the angry spirit of the king of the Huns. His friend, the historian Priscus,^{[42](#)} embraced the opportunity of observing the Barbarian hero in the peaceful and domestic scenes of life; but the secret of the embassy, a fatal and guilty secret, was entrusted only to the interpreter Vigilius. The two last ambassadors of the Huns, Orestes, a noble subject of the Pannonian province, and Edecon, a valiant chieftain of the tribe of the Scyri, returned at the same time from Constantinople to the royal camp. Their obscure names were afterwards illustrated by the extraordinary fortune and the contrast of their sons; the two servants of Attila became the fathers of the last Roman emperor of the West and of the first Barbarian king of Italy.

The ambassadors, who were followed by a numerous train of men and horses, made their first halt at Sardica, at the distance of three hundred and fifty miles, or thirteen days' journey, from Constantinople. As the remains of Sardica were still included within the limits of the empire, it was incumbent on the Romans to exercise the duties of hospitality. They provided, with the assistance of the provincials, a sufficient number of sheep and oxen; and invited the Huns to a splendid, or at least a plentiful, supper. But the harmony of the entertainment was soon disturbed by mutual prejudice and indiscretion. The greatness of the emperor and the empire was warmly maintained by their ministers; the Huns, with equal ardour, asserted the superiority of their victorious monarch: the dispute was inflamed by the rash and unseasonable flattery of Vigilius, who passionately rejected the comparison of a mere mortal with the divine Theodosius; and it was with extreme difficulty that Maximin and Priscus were able to divert the conversation, or to soothe the angry minds of the Barbarians. When they rose from table, the Imperial ambassador presented Edecon and Orestes with rich gifts of silk robes and Indian pearls, which they thankfully accepted. Yet Orestes could not forbear insinuating that *he* had not always been treated with such respect and liberality; the offensive distinction which was implied between his civil office and the hereditary rank of his colleague seems to have made Edecon a doubtful friend, and Orestes an irreconcilable enemy. After this entertainment, they travelled about one hundred miles from Sardica to Naissus. That flourishing city, which had given birth to the great Constantine, was levelled with the ground; the inhabitants were destroyed or dispersed; and the appearance of some sick persons, who were still permitted to exist among the ruins of the churches, served only to increase the horror of the prospect. The surface of the country was covered with the bones of the slain; and the ambassadors, who directed their course to the north-west, were obliged to pass the hills of modern Servia, before they descended into the flat and marshy grounds which are terminated by the Danube. The Huns were masters of the great river; their navigation was performed in large canoes, hollowed out of the trunk of a single tree;

the ministers of Theodosius were safely landed on the opposite bank; and their Barbarian associates immediately hastened to the camp of Attila, which was equally prepared for the amusements of hunting or of war. No sooner had Maximin advanced about two miles from the Danube, than he began to experience the fastidious insolence of the conqueror. He was sternly forbid to pitch his tents in a pleasant valley, lest he should infringe the distant awe that was due to the royal mansion. The ministers of Attila pressed him to communicate the business and the instructions, which he reserved for the ear of their sovereign. When Maximin temperately urged the contrary practice of nations, he was still more confounded to find that the resolutions of the Sacred Consistory, those secrets (says Priscus) which should not be revealed to the gods themselves, had been treacherously disclosed to the public enemy. On his refusal to comply with such ignominious terms, the Imperial envoy was commanded instantly to depart; the order was recalled; it was again repeated; and the Huns renewed their ineffectual attempts to subdue the patient firmness of Maximin. At length, by the intercession of Scotta, the brother of Onegesius, whose friendship had been purchased by a liberal gift, he was admitted to the royal presence: but, instead of obtaining a decisive answer, he was compelled to undertake a remote journey towards the North, that Attila might enjoy the proud satisfaction of receiving, in the same camp, the ambassadors of the Eastern and Western empires. His journey was regulated by the guides, who obliged him to halt, to hasten his march, or to deviate from the common road, as it best suited the convenience of the king. The Romans who traversed the plains of Hungary suppose that they passed *several* navigable rivers, either in canoes or portable boats; but there is reason to suspect that the winding stream of the Theiss, or Tibiscus, might present itself in different places, under different names. From the contiguous villages they received a plentiful and regular supply of provisions; mead instead of wine, millet in the place of bread, and a certain liquor named *camus*, which, according to the report of Priscus, was distilled from barley.⁴³ Such fare might appear coarse and indelicate to men who had tasted the luxury of Constantinople: but, in their accidental distress, they were relieved by the gentleness and hospitality of the same Barbarians, so terrible and so merciless in war. The ambassadors had encamped on the edge of a large morass. A violent tempest of wind and rain, of thunder and lightning, overturned their tents, immersed their baggage and furniture in the water, and scattered their retinue, who wandered in the darkness of the night, uncertain of their road, and apprehensive of some unknown danger, till they awakened by their cries the inhabitants of a neighbouring village, the property of the widow of Bleda. A bright illumination, and, in a few moments, a comfortable fire of reeds, was kindled by their officious benevolence; the wants, and even the desires, of the Romans were liberally satisfied; and they seem to have been embarrassed by the singular politeness of Bleda's widow, who added to her other favours the gift, or at least the loan, of a sufficient number of beautiful and obsequious damsels. The sunshine of the succeeding day was dedicated to repose; to collect and dry the baggage, and to the refreshment of the men and horses: but, in the evening, before they pursued their journey, the ambassadors expressed their gratitude to the bounteous lady of the village,

by a very acceptable present of silver cups, red fleeces, dried fruits, and Indian pepper. Soon after this adventure, they rejoined the march of Attila, from whom they had been separated about six days; and slowly proceeded to the capital of an empire which did not contain, in the space of several thousand miles, a single city.

As far as we may ascertain the vague and obscure geography of Priscus, this capital appears to have been seated between the Danube, the Theiss, and the Carpathian hills, in the plains of Upper Hungary, and most probably in the neighbourhood of Jazberin, Agria, or Tokay.⁴⁴ In its origin it could be no more than an accidental camp, which, by the long and frequent residence of Attila, had insensibly swelled into a huge village, for the reception of his court, of the troops who followed his person, and of the various multitude of idle or industrious slaves and retainers.⁴⁵ The baths, constructed by Onegesius, were the only edifice of stone; the materials had been transported from Pannonia; and, since the adjacent country was destitute even of large timber, it may be presumed that the meaner habitations of the royal village consisted of straw, of mud, or of canvas. The wooden houses of the more illustrious Huns were built and adorned with rude magnificence, according to the rank, the fortune, or the taste of the proprietors. They seem to have been distributed with some degree of order and symmetry; and each spot became more honourable, as it approached the person of the sovereign. The palace of Attila, which surpassed all other houses in his dominions, was built entirely of wood, and covered an ample space of ground. The outward enclosure was a lofty wall, or palisade of smooth square timber, intersected with high towers, but intended rather for ornament than defence. This wall, which seems to have encircled the declivity of a hill, comprehended a great variety of wooden edifices, adapted to the uses of royalty. A separate house was assigned to each of the numerous wives of Attila; and, instead of the rigid and illiberal confinement imposed by Asiatic jealousy, they politely admitted the Roman ambassadors to their presence, their table, and even to the freedom of an innocent embrace. When Maximin offered his presents to Cerca, the principal queen, he admired the singular architecture of her mansion, the height of the round columns, the size and beauty of the wood, which was curiously shaped, or turned, or polished, or carved; and his attentive eye was able to discover some taste in the ornaments, and some regularity in the proportions. After passing through the guards who watched before the gate, the ambassadors were introduced into the private apartment of Cerca. The wife of Attila received their visit sitting, or rather lying, on a soft couch; the floor was covered with a carpet; the domestics formed a circle round the queen; and her damsels, seated on the ground, were employed in working the variegated embroidery which adorned the dress of the Barbaric warriors. The Huns were ambitious of displaying those riches which were the fruit and evidence of their victories: the trappings of their horses, their swords, and even their shoes were studded with gold and precious stones; and their tables were profusely spread with plates, and goblets, and vases of gold and silver, which had been fashioned by the labour of Grecian artists. The monarch alone assumed the superior pride of still adhering to the simplicity of his Scythian ancestors.⁴⁶ The dress of Attila, his arms,

and the furniture of his horse were plain, without ornament, and of a single colour. The royal table was served in wooden cups and platters; flesh was his only food; and the conqueror of the North never tasted the luxury of bread.

When Attila first gave audience to the Roman ambassadors on the banks of the Danube, his tent was encompassed with a formidable guard. The monarch himself was seated in a wooden chair. His stern countenance, angry gestures, and impatient tone astonished the firmness of Maximin; but Vigilius had more reason to tremble, since he distinctly understood the menace that, if Attila did not respect the law of nations, he would nail the deceitful interpreter to a cross and leave his body to the vultures. The Barbarian condescended, by producing an accurate list, to expose the bold falsehood of Vigilius, who had affirmed that no more than seventeen deserters could be found. But he arrogantly declared that he apprehended only the disgrace of contending with his fugitive slaves; since he despised their impotent efforts to defend the provinces which Theodosius had entrusted to their arms: “For what fortress” (added Attila), “what city, in the wide extent of the Roman empire, can hope to exist, secure and impregnable, if it is our pleasure that it should be erased from the earth?” He dismissed, however, the interpreter, who returned to Constantinople with his peremptory demand of more complete restitution and a more splendid embassy. His anger gradually subsided, and his domestic satisfaction in a marriage which he celebrated on the road with the daughter of Eslam⁴⁷ might perhaps contribute to mollify the native fierceness of his temper. The entrance of Attila into the royal village was marked by a very singular ceremony. A numerous troop of women came out to meet their hero, and their king. They marched before him, distributed into long and regular files; the intervals between the files were filled by white veils of thin linen, which the women on either side bore aloft in their hands, and which formed a canopy for a chorus of young virgins, who chanted hymns and songs in the Scythian language. The wife of his favourite Onegesius, with a train of female attendants, saluted Attila at the door of her own house, on his way to the palace; and offered, according to the custom of the country, her respectful homage, by entreating him to taste the wine and meat which she had prepared for his reception. As soon as the monarch had graciously accepted her hospitable gift, his domestics lifted a small silver table to a convenient height, as he sat on horseback; and Attila, when he had touched the goblet with his lips, again saluted the wife of Onegesius, and continued his march. During his residence at the seat of empire, his hours were not wasted in the recluse idleness of a seraglio; and the king of the Huns could maintain his superior dignity, without concealing his person from the public view. He frequently assembled his council, and gave audience to the ambassadors of the nations; and his people might appeal to the supreme tribunal, which he held at stated times, and, according to the Eastern custom, before the principal gate of his wooden palace. The Romans, both of the East and of the West, were twice invited to the banquets, where Attila feasted with the princes and nobles of Scythia. Maximin and his colleagues were stopped on the threshold, till they had made a devout libation to the health and prosperity of the king of the Huns; and were

conducted, after this ceremony, to their respective seats in a spacious hall. The royal table and couch, covered with carpets and fine linen, was raised by several steps in the midst of the hall; and a son, an uncle, or perhaps a favourite king, were admitted to share the simple and homely repast of Attila. Two lines of small tables, each of which contained three or four guests, were ranged in order on either hand; the right was esteemed the most honourable, but the Romans ingenuously confess that they were placed on the left; and that Beric, an unknown chieftain, most probably of the Gothic race, preceded the representatives of Theodosius and Valentinian. The Barbarian monarch received from his cup-bearer a goblet filled with wine, and courteously drank to the health of the most distinguished guest, who rose from his seat and expressed, in the same manner, his loyal and respectful vows. This ceremony was successively performed for all, or at least for the illustrious persons of the assembly; and a considerable time must have been consumed, since it was thrice repeated, as each course or service was placed on the table. But the wine still remained after the meat had been removed; and the Huns continued to indulge their intemperance long after the sober and decent ambassadors of the two empires had withdrawn themselves from the nocturnal banquet. Yet before they retired, they enjoyed a singular opportunity of observing the manners of the nation in their convivial amusements. Two Scythians stood before the couch of Attila, and recited the verses which they had composed, to celebrate his valour and his victories. A profound silence prevailed in the hall; and the attention of the guests was captivated by the vocal harmony, which revived and perpetuated the memory of their own exploits: a martial ardour flashed from the eyes of the warriors, who were impatient for battle; and the tears of the old men expressed their generous despair that they could no longer partake the danger and glory of the field.⁴⁸ This entertainment, which might be considered as a school of military virtue, was succeeded by a farce that debased the dignity of human nature. A Moorish and a Scythian buffoon successively excited the mirth of the rude spectators, by their deformed figure, ridiculous dress, antic gestures, absurd speeches, and the strange unintelligible confusion of the Latin, the Gothic, and the Hunnic languages; and the hall resounded with loud and licentious peals of laughter. In the midst of this intemperate riot, Attila alone, without a change of countenance, maintained his steadfast and inflexible gravity; which was never relaxed, except on the entrance of Irnac, the youngest of his sons: he embraced the boy with a smile of paternal tenderness, gently pinched him by the cheek, and betrayed a partial affection, which was justified by the assurance of his prophets that Irnac would be the future support of his family and empire. Two days afterwards, the ambassadors received a second invitation; and they had reason to praise the politeness as well as the hospitality of Attila. The king of the Huns held a long and familiar conversation with Maximin; but his civility was interrupted by rude expressions, and haughty reproaches; and he was provoked, by a motive of interest, to support, with unbecoming zeal, the private claims of his secretary Constantius. "The emperor" (said Attila) "has long promised him a rich wife; Constantius must not be disappointed; nor should a Roman emperor deserve the name of liar." On the third day, the ambassadors were dismissed; the freedom of several

captives was granted, for a moderate ransom, to their pressing entreaties; and, besides the royal presents, they were permitted to accept from each of the Scythian nobles the honourable and useful gift of a horse. Maximin returned, by the same road, to Constantinople; and though he was involved in an accidental dispute with Beric, the new ambassador of Attila, he flattered himself that he had contributed, by the laborious journey, to confirm the peace and alliance of the two nations.[49](#)

But the Roman ambassador was ignorant of the treacherous design, which had been concealed under the mask of the public faith. The surprise and satisfaction of Edecon, when he contemplated the splendour of Constantinople, had encouraged the interpreter Vigilius to procure for him a secret interview with the eunuch Chrysaphius,[50](#) who governed the emperor and the empire. After some previous conversation, and a mutual oath of secrecy, the eunuch, who had not, from his own feelings or experience, imbibed any exalted notions of ministerial virtue, ventured to propose the death of Attila, as an important service, by which Edecon might deserve a liberal share of the wealth and luxury which he admired. The ambassador of the Huns listened to the tempting offer, and professed, with apparent zeal, his ability, as well as readiness, to execute the bloody deed; the design was communicated to the master of the offices, and the devout Theodosius consented to the assassination of his invincible enemy. But this perfidious conspiracy was defeated by the dissimulation, or the repentance, of Edecon; and, though he might exaggerate his inward abhorrence for the treason, which he seemed to approve, he dexterously assumed the merit of an early and voluntary confession. If we *now* review the embassy of Maximin, and the behaviour of Attila, we must applaud the Barbarian, who respected the laws of hospitality, and generously entertained and dismissed the minister of a prince who had conspired against his life. But the rashness of Vigilius will appear still more extraordinary, since he returned, conscious of his guilt and danger, to the royal camp; accompanied by his son, and carrying with him a weighty purse of gold, which the favourite eunuch had furnished, to satisfy the demands of Edecon, and to corrupt the fidelity of the guards. The interpreter was instantly seized, and dragged before the tribunal of Attila, where he asserted his innocence with specious firmness, till the threat of inflicting instant death on his son extorted from him a sincere discovery of the criminal transaction. Under the name of ransom or confiscation, the rapacious king of the Huns accepted two hundred pounds of gold for the life of a traitor, whom he disdained to punish. He pointed his just indignation against a nobler object. His ambassadors Eslaw and Orestes were immediately despatched to Constantinople with a peremptory instruction, which it was much safer for them to execute than to disobey. They boldly entered the Imperial presence, with the fatal purse hanging down from the neck of Orestes; who interrogated the eunuch Chrysaphius, as he stood beside the throne, whether he recognised the evidence of his guilt. But the office of reproof was reserved for the superior dignity of his colleague Eslaw, who gravely addressed the Emperor of the East in the following words: “Theodosius is the son of an illustrious and respectable parent; Attila likewise is descended from a noble race; and *he* has supported, by his

actions, the dignity which he inherited from his father Mundzuk. But Theodosius has forfeited his paternal honours, and, by consenting to pay tribute, has degraded himself to the condition of a slave. It is therefore just that he should reverence the man whom fortune and merit have placed above him; instead of attempting, like a wicked slave, clandestinely to conspire against his master.” The son of Arcadius, who was accustomed only to the voice of flattery, heard with astonishment the severe language of truth; he blushed and trembled; nor did he presume directly to refuse the head of Chrysaphius, which Eslaw and Orestes were instructed to demand. A solemn embassy, armed with full powers and magnificent gifts, was hastily sent to deprecate the wrath of Attila; and his pride was gratified by the choice of Nomius and Anatolius, two ministers of consular or patrician rank, of whom the one was great treasurer, and the other was master-general of the armies of the East. He condescended to meet these ambassadors on the banks of the river Drengo; and, though he at first affected a stern and haughty demeanour, his anger was insensibly mollified by their eloquence and liberality. He condescended to pardon the emperor, the eunuch, and the interpreter; bound himself by an oath to observe the conditions of peace; to release a great number of captives; abandoned the fugitives and deserters to their fate; and resigned a large territory to the south of the Danube, which he had already exhausted of its wealth and its inhabitants. But this treaty was purchased at an expense which might have supported a vigorous and successful war; and the subjects of Theodosius were compelled to redeem the safety of a worthless favourite by oppressive taxes, which they would more cheerfully have paid for his destruction.[51](#)

The emperor Theodosius did not long survive the most humiliating circumstance of an inglorious life. As he was riding, or hunting, in the neighbourhood of Constantinople, he was thrown from his horse into the river Lycus; the spine of the back was injured by the fall; and he expired some days afterwards, in the fiftieth year of his age, and the forty-third of his reign.[52](#) His sister Pulcheria, whose authority had been controlled both in civil and ecclesiastical affairs by the pernicious influence of the eunuchs, was unanimously proclaimed empress of the East; and the Romans, for the first time, submitted to a female reign. No sooner had Pulcheria ascended the throne than she indulged her own and the public resentment by an act of popular justice. Without any legal trial, the eunuch Chrysaphius was executed before the gates of the city; and the immense riches which had been accumulated by the rapacious favourite served only to hasten and to justify his punishment.[53](#) Amidst the general acclamations of the clergy and people, the empress did not forget the prejudice and disadvantage to which her sex was exposed; and she wisely resolved to prevent their murmurs by the choice of a colleague, who would always respect the superior rank and virgin chastity of his wife. She gave her hand to Marcian, a senator, about sixty years of age, and the nominal husband of Pulcheria was solemnly invested with the Imperial purple. The zeal which he displayed for the orthodox creed, as it was established by the council of Chalcedon, would alone have inspired the grateful eloquence of the Catholics. But the behaviour of Marcian in a private life, and afterwards on the throne, may support a more rational

belief that he was qualified to restore and invigorate an empire which had been almost dissolved by the successive weakness of two hereditary monarchs. He was born in Thrace, and educated to the profession of arms; but Marcian's youth had been severely exercised by poverty and misfortune, since his only resource, when he first arrived at Constantinople, consisted in two hundred pieces of gold, which he had borrowed of a friend. He passed nineteen years in the domestic and military service of Aspar and his son Ardaburius; followed those powerful generals to the Persian and African wars; and obtained, by their influence, the honourable rank of tribune and senator. His mild disposition, and useful talents, without alarming the jealousy, recommended Marcian to the esteem and favour, of his patrons; he had seen, perhaps he had felt, the abuses of a venal and oppressive administration; and his own example gave weight and energy to the laws which he promulgated for the reformation of manners.[54](#)

CHAPTER XXXV

Invasion of Gaul by Attila — He is repulsed by Aetius and the Visigoths — Attila invades and evacuates Italy — The deaths of Attila, Aetius, and Valentinian the Third

It was the opinion of Marcian that war should be avoided, as long as it is possible to preserve a secure and honourable peace; but it was likewise his opinion that peace cannot be honourable or secure, if the sovereign betrays a pusillanimous aversion to war. This temperate courage dictated his reply to the demands of Attila, who insolently pressed the payment of the annual tribute. The emperor signified to the Barbarians that they must no longer insult the majesty of Rome, by the mention of a tribute; that he was disposed to reward with becoming liberality the faithful friendship of his allies; but that if they presumed to violate the public peace, they should feel that he possessed troops, and arms, and resolution, to repel their attacks. The same language, even in the camp of the Huns, was used by his ambassador Apollonius, whose bold refusal to deliver the presents, till he had been admitted to a personal interview, displayed a sense of dignity, and a contempt of danger, which Attila was not prepared to expect from the degenerate Romans.[1](#) He threatened to chastise the rash successor of Theodosius; but he hesitated whether he should first direct his invincible arms against the Eastern or the Western empire. While mankind awaited his decision with awful suspense, he sent an equal defiance to the courts of Ravenna and Constantinople, and his ministers saluted the two emperors with the same haughty declaration. "Attila, *my* Lord, and *thy* lord, commands thee to provide a palace for his immediate reception."[2](#) But, as the Barbarian despised, or affected to despise, the Romans of the East, whom he had so often vanquished, he soon declared his resolution of suspending the easy conquest, till he had achieved a more glorious and important enterprise. In the memorable invasions of Gaul and Italy, the Huns were naturally attracted by the

wealth and fertility of those provinces; but the particular motives and provocations of Attila can only be explained by the state of the Western empire under the reign of Valentinian, or, to speak more correctly, under the administration of Aetius.³

After the death of his rival Boniface, Aetius had prudently retired to the tents of the Huns; and he was indebted to their alliance for his safety and his restoration. Instead of the suppliant language of a guilty exile, he solicited his pardon at the head of sixty thousand Barbarians; and the empress Placidia confessed, by a feeble resistance, that the condescension, which might have been ascribed to clemency, was the effect of weakness or fear. She delivered herself, her son Valentinian, and the Western empire into the hands of an insolent subject; nor could Placidia protect the son-in-law of Boniface, the virtuous and faithful Sebastian,⁴ from the implacable persecution, which urged him from one kingdom to another, till he miserably perished in the service of the Vandals. The fortunate Aetius, who was immediately promoted to the rank of patrician, and thrice invested with the honours of the consulship, assumed, with the title of master of the cavalry and infantry, the whole military power of the state; and he is sometimes styled, by contemporary writers, the Duke, or General, of the Romans of the West. His prudence, rather than his virtue, engaged him to leave the grandson of Theodosius in the possession of the purple; and Valentinian was permitted to enjoy the peace and luxury of Italy, while the patrician appeared in the glorious light of a hero and a patriot who supported near twenty years the ruins of the Western empire. The Gothic historian ingenuously confesses that Aetius was born for the salvation of the Roman republic;⁵ and the following portrait, though it is drawn in the fairest colours, must be allowed to contain a much larger proportion of truth than of flattery. “His mother was a wealthy and noble Italian, and his father Gaudentius, who held a distinguished rank in the province of Scythia, gradually rose from the station of a military *domestic* to the dignity of master of the cavalry. Their son, who was enrolled almost in his infancy in the guards, was given as a hostage, first to Alaric, and afterwards to the Huns; and he successively obtained the civil and military honours of the palace, for which he was equally qualified by superior merit. The graceful figure of Aetius was not above the middle stature; but his manly limbs were admirably formed for strength, beauty, and agility; and he excelled in the martial exercises of managing a horse, drawing the bow, and darting the javelin. He could patiently endure the want of food or of sleep; and his mind and body were alike capable of the most laborious efforts. He possessed the genuine courage that can despise not only dangers but injuries; and it was impossible either to corrupt, or deceive, or intimidate the firm integrity of his soul.”⁶ The Barbarians who had seated themselves in the Western provinces were insensibly taught to respect the faith and valour of the patrician Aetius. He soothed their passions, consulted their prejudices, balanced their interests, and checked their ambition. A seasonable treaty, which he concluded with Genseric, protected Italy from the depredations of the Vandals; the independent Britons implored and acknowledged his salutary aid; the Imperial authority was restored and maintained in Gaul and Spain; and he compelled the Franks and the Suevi, whom he had

vanquished in the field, to become the useful confederates of the republic.

From a principle of interest, as well as gratitude, Aetius assiduously cultivated the alliance of the Huns. While he resided in their tents as a hostage or an exile, he had familiarly conversed with Attila himself, the nephew of his benefactor; and the two famous antagonists appear to have been connected by a personal and military friendship, which they afterwards confirmed by mutual gifts, frequent embassies, and the education of Carpilio, the son of Aetius, in the camp of Attila. By the specious professions of gratitude and voluntary attachment, the patrician might disguise his apprehensions of the Scythian conqueror, who pressed the two empires with his innumerable armies. His demands were obeyed or eluded. When he claimed the spoils of a vanquished city, some vases of gold, which had been fraudulently embezzled, the civil and military governors of Noricum were immediately despatched to satisfy his complaints;⁷ and it is evident from their conversation with Maximin and Priscus in the royal village, that the valour and prudence of Aetius had not saved the Western Romans from the common ignominy of tribute. Yet his dexterous policy prolonged the advantages of a salutary peace, and a numerous army of Huns and Alani, whom he had attached to his person, was employed in the defence of Gaul. Two colonies of these Barbarians were judiciously fixed in the territories of Valence and Orleans;⁸ and their active cavalry secured the important passages of the Rhone and of the Loire. These savage allies were not indeed less formidable to the subjects than to the enemies of Rome. Their original settlement was enforced with the licentious violence of conquest; and the province through which they marched was exposed to all the calamities of an hostile invasion.⁹ Strangers to the emperor or the republic, the Alani of Gaul were devoted to the ambition of Aetius; and, though he might suspect that, in a contest with Attila himself, they would revolt to the standard of their national king, the patrician laboured to restrain, rather than to excite, their zeal and resentment against the Goths, the Burgundians, and the Franks.

The kingdom established by the Visigoths in the southern provinces of Gaul had gradually acquired strength and maturity; and the conduct of those ambitious Barbarians, either in peace or war, engaged the perpetual vigilance of Aetius. After the death of Wallia the Gothic sceptre devolved to Theodoric, the son of the great Alaric;¹⁰ and his prosperous reign, of more than thirty years, over a turbulent people may be allowed to prove that his prudence was supported by uncommon vigour, both of mind and body. Impatient of his narrow limits, Theodoric aspired to the possession of Arles, the wealthy seat of government and commerce; but the city was saved by the timely approach of Aetius; and the Gothic king, who had raised the siege with some loss and disgrace, was persuaded, for an adequate subsidy, to divert the martial valour of his subjects in a Spanish war. Yet Theodoric still watched, and eagerly seized, the favourable moment of renewing his hostile attempts. The Goths besieged Narbonne, while the Belgic provinces were invaded by the Burgundians; and the public safety

was threatened on every side by the apparent union of the enemies of Rome. On every side, the activity of Aetius, and his Scythian cavalry, opposed a firm and successful resistance. Twenty thousand Burgundians were slain in battle; and the remains of the nation humbly accepted a dependent seat in the mountains of Savoy.¹¹ The walls of Narbonne had been shaken by the battering engines, and the inhabitants had endured the last extremities of famine, when Count Litorius, approaching in silence, and directing each horseman to carry behind him two sacks of flour, cut his way through the entrenchments of the besiegers. The siege was immediately raised; and the more decisive victory, which is ascribed to the personal conduct of Aetius himself, was marked with the blood of eight thousand Goths. But in the absence of the patrician, who was hastily summoned to Italy by some public or private interest, Count Litorius succeeded to the command; and his presumption soon discovered that far different talents are required to lead a wing of cavalry, or to direct the operations of an important war. At the head of an army of Huns, he rashly advanced to the gates of Toulouse, full of careless contempt for an enemy whom his misfortunes had rendered prudent and his situation made desperate. The predictions of the augurs had inspired Litorius with the profane confidence that he should enter the Gothic capital in triumph; and the trust which he reposed in his Pagan allies encouraged him to reject the fair conditions of peace, which were repeatedly proposed by the bishops in the name of Theodoric. The king of the Goths exhibited in his distress the edifying contrast of Christian piety and moderation; nor did he lay aside his sackcloth and ashes till he was prepared to arm for the combat. His soldiers, animated with martial and religious enthusiasm, assaulted the camp of Litorius. The conflict was obstinate; the slaughter was mutual. The Roman general, after a total defeat, which could be imputed only to his unskilful rashness, was actually led through the streets of Toulouse, not in his own, but in a hostile triumph; and the misery which he experienced, in a long and ignominious captivity, excited the compassion of the Barbarians themselves.¹² Such a loss, in a country whose spirit and finances were long since exhausted, could not easily be repaired; and the Goths, assuming, in their turn, the sentiments of ambition and revenge, would have planted their victorious standards on the banks of the Rhone, if the presence of Aetius had not restored strength and discipline to the Romans.¹³ The two armies expected the signal of a decisive action; but the generals, who were conscious of each other's force, and doubtful of their own superiority, prudently sheathed their swords in the field of battle; and their reconciliation was permanent and sincere. Theodoric, king of the Visigoths, appears to have deserved the love of his subjects, the confidence of his allies, and the esteem of mankind. His throne was surrounded by six valiant sons, who were educated with equal care in the exercises of the Barbarian camp and in those of the Gallic schools; from the study of the Roman jurisprudence, they acquired the theory, at least, of law and justice; and the harmonious sense of Virgil contributed to soften the asperity of their native manners.¹⁴ The two daughters of the Gothic king were given in marriage to the eldest sons of the kings of the Suevi and of the Vandals, who reigned in Spain and Africa; but these illustrious alliances were pregnant with guilt and discord. The queen of the

Suevi bewailed the death of an husband, inhumanly massacred by her brother. The princess of the Vandals was the victim of a jealous tyrant, whom she called her father. The cruel Genseric suspected that his son's wife had conspired to poison him; the supposed crime was punished by the amputation of her nose and ears; and the unhappy daughter of Theodoric was ignominiously returned to the court of Toulouse in that deformed and mutilated condition. This horrid act, which must seem incredible to a civilised age, drew tears from every spectator; but Theodoric was urged, by the feelings of a parent and a king, to revenge such irreparable injuries. The Imperial ministers, who always cherished the discord of the Barbarians, would have supplied the Goths with arms and ships and treasures for the African war; and the cruelty of Genseric might have been fatal to himself, if the artful Vandal had not armed, in his cause, the formidable power of the Huns. His rich gifts and pressing solicitations inflamed the ambition of Attila; and the designs of Aetius and Theodoric were prevented by the invasion of Gaul.[15](#)

The Franks, whose monarchy was still confined to the neighbourhood of the Lower Rhine, had wisely established the right of hereditary succession in the noble family of the Merovingians.[16](#) These princes were elevated on a buckler, the symbol of military command;[17](#) and the royal fashion of long hair was the ensign of their birth and dignity. Their flaxen locks, which they combed and dressed with singular care, hung down in flowing ringlets on their back and shoulders; while the rest of the nation were obliged, either by law or custom, to shave the hinder part of their head, to comb their hair over the forehead, and to content themselves with the ornament of two small whiskers.[18](#) The lofty stature of the Franks, and their blue eyes, denoted a Germanic origin; their close apparel accurately expressed the figure of their limbs; a weighty sword was suspended from a broad belt; their bodies were protected by a large shield; and these warlike Barbarians were trained, from their earliest youth, to run, to leap, to swim; to dart the javelin or battle-axe with unerring aim; to advance, without hesitation, against a superior enemy; and to maintain, either in life or death, the invincible reputation of their ancestors.[19](#) Clodion, the first of the long-haired kings whose name and actions are mentioned in authentic history, held his residence at Dispargum,[20](#) a village or fortress whose place may be assigned between Louvain and Brussels. From the report of his spies the king of the Franks was informed that the defenceless state of the second Belgic must yield, on the slightest attack, to the valour of his subjects. He boldly penetrated through the thickets and morasses of the Carbonarian forest;[21](#) occupied Tournay and Cambray, the only cities which existed in the fifth century; and extended his conquests as far as the river Somme, over a desolate country, whose cultivation and populousness are the effects of more recent industry.[22](#) While Clodion lay encamped in the plains of Artois,[23](#) and celebrated with vain and ostentatious security the marriage, perhaps, of his son, the nuptial feast was interrupted by the unexpected and unwelcome presence of Aetius, who had passed the Somme at the head of his light cavalry. The tables, which had been spread under the shelter of a

hill, along the banks of a pleasant stream, were rudely overturned; the Franks were oppressed before they could recover their arms, or their ranks; and their unavailing valour was fatal only to themselves. The loaded waggons which had followed their march afforded a rich booty; and the virgin bride, with her female attendants, submitted to the new lovers who were imposed on them by the chance of war. This advantage, which had been obtained by the skill and activity of Aetius, might reflect some disgrace on the military prudence of Clodion; but the king of the Franks soon regained his strength and reputation, and still maintained the possession of his Gallic kingdom from the Rhine to the Somme.²⁴ Under his reign, and most probably from the enterprising spirit of his subjects, the three capitals, Mentz, Treves, and Cologne, experienced the effects of hostile cruelty and avarice. The distress of Cologne was prolonged by the perpetual dominion of the same Barbarians, who evacuated the ruins of Treves; and Treves, which, in the space of forty years, had been four times besieged and pillaged, was disposed to lose the memory of her afflictions in the vain amusements of the circus.²⁵ The death of Clodion, after a reign of twenty years, exposed his kingdom to the discord and ambition of his two sons. Meroveus, the younger,²⁶ was persuaded to implore the protection of Rome; he was received at the Imperial court as the ally of Valentinian and the adopted son of the patrician Aetius; and dismissed to his native country with splendid gifts and the strongest assurances of friendship and support. During his absence, his elder brother had solicited, with equal ardour, the formidable aid of Attila: and the king of the Huns embraced an alliance which facilitated the passage of the Rhine and justified, by a specious and honourable pretence, the invasion of Gaul.²⁷

When Attila declared his resolution of supporting the cause of his allies, the Vandals and the Franks, at the same time, and almost in the spirit of romantic chivalry, the savage monarch professed himself the lover and the champion of the princess Honoria. The sister of Valentinian was educated in the palace of Ravenna; and, as her marriage might be productive of some danger to the state, she was raised, by the title of *Augusta*,²⁸ above the hopes of the most presumptuous subject. But the fair Honoria had no sooner attained the sixteenth year of her age than she detested the importunate greatness which must for ever exclude her from the comforts of honourable love; in the midst of vain and unsatisfactory pomp, Honoria sighed, yielded to the impulse of nature, and threw herself into the arms of her chamberlain Eugenius. Her guilt and shame (such is the absurd language of imperious man) were soon betrayed by the appearances of pregnancy; but the disgrace of the royal family was published to the world by the imprudence of the empress Placidia; who dismissed her daughter, after a strict and shameful confinement, to a remote exile at Constantinople. The unhappy princess passed twelve or fourteen years in the irksome society of the sisters of Theodosius, and their chosen virgins; to whose *crown* Honoria could no longer aspire, and whose monastic assiduity of prayer, fasting, and vigils she reluctantly imitated. Her impatience of long and hopeless celibacy urged her to embrace a strange and desperate resolution. The name of Attila was familiar and formidable at Constantinople; and his frequent embassies entertained a perpetual intercourse between his camp and the Imperial palace. In the pursuit of love, or rather of revenge,

the daughter of Placidia sacrificed every duty and every prejudice; and offered to deliver her person into the arms of a Barbarian, of whose language she was ignorant, whose figure was scarcely human, and whose religion and manners she abhorred. By the ministry of a faithful eunuch, she transmitted to Attila a ring, the pledge of her affection; and earnestly conjured him to claim her as a lawful spouse, to whom he had been secretly betrothed. These indecent advances were received, however, with coldness and disdain; and the king of the Huns continued to multiply the number of his wives, till his love was awakened by the more forcible passions of ambition and avarice. The invasion of Gaul was preceded, and justified, by a formal demand of the princess Honoria, with a just and equal share of the Imperial patrimony. His predecessors, the ancient Tanjous, had often addressed, in the same hostile and peremptory manner, the daughters of China; and the pretensions of Attila were not less offensive to the majesty of Rome. A firm, but temperate, refusal was communicated to his ambassadors. The right of female succession, though it might derive a specious argument from the recent examples of Placidia and Pulcheria, was strenuously denied; and the indissoluble engagements of Honoria were opposed to the claims of her Scythian lover.²⁹ On the discovery of her connection with the king of the Huns, the guilty princess had been sent away, as an object of horror, from Constantinople to Italy; her life was spared; but the ceremony of her marriage was performed with some obscure and nominal husband, before she was immured in a perpetual prison, to bewail those crimes and misfortunes which Honoria might have escaped, had she not been born the daughter of an emperor.³⁰

A native of Gaul and a contemporary, the learned and eloquent Sidonius, who was afterwards bishop of Clermont, had made a promise to one of his friends that he would compose a regular history of the war of Attila. If the modesty of Sidonius had not discouraged him from the prosecution of this interesting work,³¹ the historian would have related, with the simplicity of truth, those memorable events to which the poet, in vague and doubtful metaphors, has concisely alluded.³² The kings and nations of Germany and Scythia, from the Volga perhaps to the Danube, obeyed the warlike summons of Attila. From the royal village, in the plains of Hungary, his standard moved towards the West; and, after a march of seven or eight hundred miles, he reached the conflux of the Rhine and the Necker; where he was joined by the Franks, who adhered to his ally, the elder of the sons of Clodion. A troop of light Barbarians, who roamed in quest of plunder, might choose the winter for the convenience of passing the river on the ice; but the innumerable cavalry of the Huns required such plenty of forage and provisions, as could be procured only in a milder season; the Hercynian forest supplied materials for a bridge of boats; and the hostile myriads were poured, with resistless violence, into the Belgic provinces.³³ The consternation of Gaul was universal; and the various fortunes of its cities have been adorned by tradition with martyrdom and miracles.³⁴ Troyes was saved by the merits of St. Lupus; St. Servatius was removed from the world, that he might not behold the ruin of

Tongres; and the prayers of St. Genevieve diverted the march of Attila from the neighbourhood of Paris. But, as the greatest part of the Gallic cities were alike destitute of saints and soldiers, they were besieged and stormed by the Huns; who practised, in the example of Metz,³⁵ their customary maxims of war. They involved, in a promiscuous massacre, the priests who served at the altar, and the infants, who, in the hour of danger, had been providently baptised by the bishop; the flourishing city was delivered to the flames, and a solitary chapel of St. Stephen marked the place where it formerly stood. From the Rhine and the Moselle, Attila advanced into the heart of Gaul; crossed the Seine at Auxerre; and, after a long and laborious march, fixed his camp under the walls of Orleans. He was desirous of securing his conquests by the possession of an advantageous post, which commanded the passage of the Lorie; and he depended on the secret invitation of Sangiban, king of the Alani, who had promised to betray the city, and to revolt from the service of the empire. But this treacherous conspiracy was detected and disappointed; Orleans had been strengthened with recent fortifications; and the assaults of the Huns were vigorously repelled by the faithful valour of the soldiers, or citizens, who defended the place. The pastoral diligence of Anianus, a bishop of primitive sanctity and consummate prudence, exhausted every art of religious policy to support their courage, till the arrival of the expected succours.³⁶ After an obstinate siege, the walls were shaken by the battering-rams; the Huns had already occupied the suburbs; and the people, who were incapable of bearing arms, lay prostrate in prayer. Anianus, who anxiously counted the days and hours, despatched a trusty messenger to observe, from the rampart, the face of the distant country. He returned twice without any intelligence that could inspire hope or comfort; but, in his third report, he mentioned a small cloud, which he had faintly descried at the extremity of the horizon. "It is the aid of God!" exclaimed the bishop, in a tone of pious confidence; and the whole multitude repeated after him, "It is the aid of God." The remote object, on which every eye was fixed, became each moment larger and more distinct; the Roman and Gothic banners were gradually perceived; and a favourable wind, blowing aside the dust, discovered, in deep array, the impatient squadrons of Aetius and Theodoric, who pressed forwards to the relief of Orleans.

The facility with which Attila had penetrated into the heart of Gaul may be ascribed to his insidious policy as well as to the terror of his arms. His public declarations were skilfully mitigated by his private assurances; he alternately soothed and threatened the Romans and the Goths; and the courts of Ravenna and Toulouse, mutually suspicious of each other's intentions, beheld with supine indifference the approach of their common enemy. Aetius was the sole guardian of the public safety; but his wisest measures were embarrassed by a faction which, since the death of Placidia, infested the Imperial palace; the youth of Italy trembled at the sound of the trumpet; and the Barbarians who, from fear or affection, were inclined to the cause of Attila awaited, with doubtful and venal faith, the event of the war. The patrician passed the Alps at the head of some troops, whose strength and numbers scarcely deserved the name of an army.³⁷ But on his arrival at Arles, or Lyons, he was confounded by the intelligence

that the Visigoths, refusing to embrace the defence of Gaul, had determined to expect, within their own territories, the formidable invader, whom they professed to despise. The senator Avitus, who, after the honourable exercise of the Prætorian prefecture, had retired to his estate in Auvergne, was persuaded to accept the important embassy, which he executed with ability and success. He represented to Theodoric that an ambitious conqueror, who aspired to the dominion of the earth, could be resisted only by the firm and unanimous alliance of the powers whom he laboured to oppress. The lively eloquence of Avitus inflamed the Gothic warriors, by the description of the injuries which their ancestors had suffered from the Huns; whose implacable fury still pursued them from the Danube to the foot of the Pyrenees. He strenuously urged that it was the duty of every Christian to save from sacrilegious violation the churches of God and the relics of the saints; that it was the interest of every Barbarian who had acquired a settlement in Gaul to defend the fields and vineyards, which were cultivated for his use, against the desolation of the Scythian shepherds. Theodoric yielded to the evidence of truth; adopted the measure at once the most prudent and the most honourable; and declared that, as the faithful ally of Aetius and the Romans, he was ready to expose his life and kingdom for the common safety of Gaul.³⁸ The Visigoths, who at that time were in the mature vigour of their fame and power, obeyed with alacrity the signal of war, prepared their arms and horses, and assembled under the standard of their aged king, who was resolved, with his two eldest sons, Torismond and Theodoric, to command in person his numerous and valiant people. The example of the Goths determined several tribes or nations that seemed to fluctuate between the Huns and the Romans. The indefatigable diligence of the patrician gradually collected the troops of Gaul and Germany, who had formerly acknowledged themselves the subjects or soldiers of the republic, but who now claimed the rewards of voluntary service and the rank of independent allies; the Læti, the Armoricans, the Breones, the Saxons, the Burgundians, the Sarmatians or Alani, the Ripuarians, and the Franks who followed Meroveus as their lawful prince. Such was the various army, which, under the conduct of Aetius and Theodoric, advanced, by rapid marches, to relieve Orleans, and to give battle to the innumerable host of Attila.³⁹

On their approach the king of the Huns immediately raised the siege, and sounded a retreat to recall the foremost of his troops from the pillage of a city which they had already entered.⁴⁰ The valour of Attila was always guided by his prudence; and, as he foresaw the fatal consequences of a defeat in the heart of Gaul, he repassed the Seine and expected the enemy in the plains of Châlons, whose smooth and level surface was adapted to the operations of his Scythian cavalry. But in this tumultuary retreat the vanguard of the Romans and their allies continually pressed, and sometimes engaged the troops whom Attila had posted in the rear; the hostile columns, in the darkness of the night, and the perplexity of the roads, might encounter each other without design; and the bloody conflict of the Franks and Gepidæ, in which fifteen thousand⁴¹ Barbarians were slain, was a prelude to a more general and decisive action. The

Catalaunian fields⁴² spread themselves round Châlons, and extend, according to the vague measurement of Jornandes, to the length of one hundred and fifty, and the breadth of one hundred, miles, over the whole province, which is entitled to the appellation of a *champaign* country.⁴³ This spacious plain was distinguished, however, by some inequalities of ground; and the importance of an height, which commanded the camp of Attila, was understood, and disputed, by the two generals. The young and valiant Torismond first occupied the summit; the Goths rushed with irresistible weight on the Huns, who laboured to ascend from the opposite side; and the possession of this advantageous post inspired both the troops and their leaders with a fair assurance of victory. The anxiety of Attila prompted him to consult his priests and haruspices. It was reported that, after scrutinising the entrails of victims and scraping their bones, they revealed, in mysterious language, his own defeat, with the death of his principal adversary; and that the Barbarian, by accepting the equivalent, expressed his involuntary esteem for the superior merit of Aetius. But the unusual despondency, which seemed to prevail among the Huns, engaged Attila to use the expedient, so familiar to the generals of antiquity, of animating his troops by a military oration; and his language was that of a king who had often fought and conquered at their head.⁴⁴ He pressed them to consider their past glory, their actual danger, and their future hopes. The same fortune which opened the deserts and morasses of Scythia to their unarmed valour, which had laid so many warlike nations prostrate at their feet, had reserved the joys of this memorable field for the consummation of their victories. The cautious steps of their enemies, their strict alliance, and their advantageous posts, he artfully represented as the effects, not of prudence, but of fear. The Visigoths alone were the strength and nerves of the opposite army; and the Huns might securely trample on the degenerate Romans, whose close and compact order betrayed their apprehensions, and who were equally incapable of supporting the dangers or the fatigues of a day of battle. The doctrine of predestination, so favourable to martial virtue, was carefully inculcated by the king of the Huns, who assured his subjects that the warriors, protected by Heaven, were safe and invulnerable amidst the darts of the enemy; but that the unerring Fates would strike their victims in the bosom of inglorious peace. "I myself," continued Attila, "will throw the first javelin, and the wretch who refuses to imitate the example of his sovereign is devoted to inevitable death." The spirit of the Barbarians was rekindled by the presence, the voice, and the example of their intrepid leader; and Attila, yielding to their impatience, immediately formed his order of battle. At the head of his brave and faithful Huns he occupied in person the centre of the line. The nations subject to his empire, the Rugians, the Heruli, the Thuringians, the Franks, the Burgundians, were extended, on either hand, over the ample space of the Catalaunian fields; the right wing was commanded by Ardaric, king of the Gepidæ; and the three valiant brothers who reigned over the Ostrogoths were posted on the left to oppose the kindred tribes of the Visigoths. The disposition of the allies was regulated by a different principle. Sangiban, the faithless king of the Alani, was placed in the centre; where his motions might be strictly watched, and his treachery might be instantly punished. Aetius assumed the command

of the left, and Theodoric of the right wing; while Torismond still continued to occupy the heights which appear to have stretched on the flank, and perhaps the rear, of the Scythian army. The nations from the Volga to the Atlantic were assembled on the plain of Châlons; but many of these nations had been divided by faction, or conquest, or emigration; and the appearance of similar arms and ensigns, which threatened each other, presented the image of a civil war.

The discipline and tactics of the Greeks and Romans form an interesting part of their national manners. The attentive study of the military operations of Xenophon, or Cæsar, or Frederic, when they are described by the same genius which conceived and executed them, may tend to improve (if such improvement can be wished) the art of destroying the human species. But the battle of Châlons can only excite our curiosity by the magnitude of the object; since it was decided by the blind impetuosity of Barbarians, and has been related by partial writers, whose civil or ecclesiastical profession secluded them from the knowledge of military affairs. Cassiodorus, however, had familiarly conversed with many Gothic warriors, who served in that memorable engagement; “a conflict,” as they informed him, “fierce, various, obstinate and bloody; such as could not be paralleled either in the present or in past ages.” The number of the slain amounted to one hundred and sixty-two thousand, or, according to another account, three hundred thousand persons;⁴⁵ and these incredible exaggerations suppose a real and effective loss, sufficient to justify the historian’s remark that whole generations may be swept away, by the madness of kings, in the space of a single hour. After the mutual and repeated discharge of missile weapons, in which the archers of Scythia might signalise their superior dexterity, the cavalry and infantry of the two armies were furiously mingled in closer combat. The Huns, who fought under the eyes of their king, pierced through the feeble and doubtful centre of the allies, separated their wings from each other, and wheeling, with a rapid effort, to the left, directed their whole force against the Visigoths. As Theodoric rode along the ranks to animate his troops, he received a mortal stroke from the javelin of Andages, a noble Ostrogoth, and immediately fell from his horse. The wounded king was oppressed in the general disorder, and trampled under the feet of his own cavalry; and this important death served to explain the ambiguous prophecy of the haruspices. Attila already exulted in the confidence of victory, when the valiant Torismond descended from the hills, and verified the remainder of the prediction. The Visigoths, who had been thrown into confusion by the flight, or defection, of the Alani, gradually restored their order of battle; and the Huns were undoubtedly vanquished, since Attila was compelled to retreat. He had exposed his person with the rashness of a private soldier; but the intrepid troops of the centre had pushed forwards beyond the rest of the line; their attack was faintly supported; their flanks were unguarded; and the conquerors of Scythia and Germany were saved by the approach of the night from a total defeat. They retired within the circle of waggons that fortified their camp; and the dismounted squadrons prepared themselves for a defence, to which neither their arms nor their temper were adapted. The event was doubtful; but Attila had secured a last and

honourable resource. The saddles and rich furniture of the cavalry were collected by his order into a funeral pile; and the magnanimous Barbarian had resolved, if his intrenchments should be forced, to rush headlong into the flames, and to deprive his enemies of the glory which they might have acquired by the death or captivity of Attila.[46](#)

But his enemies had passed the night in equal disorder and anxiety. The inconsiderate courage of Torismond was tempted to urge the pursuit, till he unexpectedly found himself, with a few followers, in the midst of the Scythian waggons. In the confusion of a nocturnal combat, he was thrown from his horse; and the Gothic prince must have perished like his father, if his youthful strength, and the intrepid zeal of his companions, had not rescued him from this dangerous situation. In the same manner, but on the left of the line, Aetius himself, separated from his allies, ignorant of their victory, and anxious for their fate, encountered and escaped the hostile troops that were scattered over the plains of Châlons; and at length reached the camp of the Goths, which he could only fortify with a slight rampart of shields, till the dawn of day. The Imperial general was soon satisfied of the defeat of Attila, who still remained inactive within his intrenchments; and, when he contemplated the bloody scene, he observed, with secret satisfaction, that the loss had principally fallen on the Barbarians. The body of Theodoric, pierced with honourable wounds, was discovered under a heap of the slain: his subjects bewailed the death of their king and father; but their tears were mingled with songs and acclamations, and his funeral rites were performed in the face of a vanquished enemy. The Goths, clashing their arms, elevated on a buckler his eldest son Torismond, to whom they justly ascribed the glory of their success; and the new king accepted the obligation of revenge as a sacred portion of his paternal inheritance. Yet the Goths themselves were astonished by the fierce and undaunted aspect of their formidable antagonist; and their historian has compared Attila to a lion encompassed in his den, and threatening his hunters with redoubled fury. The kings and nations, who might have deserted his standard in the hour of distress, were made sensible that the displeasure of their monarch was the most imminent and inevitable danger. All his instruments of martial music incessantly sounded a loud and animating strain of defiance; and the foremost troops who advanced to the assault were checked, or destroyed, by showers of arrows from every side of the intrenchments. It was determined in a general council of war, to besiege the king of the Huns in his camp, to intercept his provisions, and to reduce him to the alternative of a disgraceful treaty or an unequal combat. But the impatience of the Barbarians soon disdained these cautious and dilatory measures; and the mature policy of Aetius was apprehensive that, after the extirpation of the Huns, the republic would be oppressed by the pride and power of the Gothic nation. The patrician exerted the superior ascendant of authority and reason, to calm the passions which the son of Theodoric considered as a duty; represented, with seeming affection, and real truth, the dangers of absence and delay; and persuaded Torismond to disappoint, by his speedy return, the ambitious designs of his brothers, who might occupy the throne and treasures of Toulouse.[47](#) After the departure of the

Goths and the separation of the allied army, Attila was surprised at the vast silence that reigned over the plains of Châlons; the suspicion of some hostile stratagem detained him several days within the circle of his waggons; and his retreat beyond the Rhine confessed the last victory which was achieved in the name of the Western empire. Meroveus and his Franks, observing a prudent distance, and magnifying the opinion of their strength by the numerous fires which they kindled every night, continued to follow the rear of the Huns, till they reached the confines of Thuringia. The Thuringians served in the army of Attila; they traversed, both in their march and in their return, the territories of the Franks; and it was perhaps in this war that they exercised the cruelties which, about fourscore years afterwards, were revenged by the son of Clovis. They massacred their hostages, as well as their captives: two hundred young maidens were tortured with exquisite and unrelenting rage; their bodies were torn asunder by wild horses, or their bones were crushed under the weight of rolling waggons; and their unburied limbs were abandoned on the public roads, as a prey to dogs and vultures. Such were those savage ancestors, whose imaginary virtues have sometimes excited the praise and envy of civilised ages.[48](#)

Neither the spirit nor the forces nor the reputation of Attila were impaired by the failure of the Gallic expedition. In the ensuing spring, he repeated his demand of the princess Honoria and her patrimonial treasures.[48a](#) The demand was again rejected, or eluded; and the indignant lover immediately took the field, passed the Alps, invaded Italy, and besieged Aquileia with an innumerable host of Barbarians. Those Barbarians were unskilled in the methods of conducting a regular siege, which, even among the ancients, required some knowledge, or at least some practice, of the mechanic arts. But the labour of many thousand provincials and captives, whose lives were sacrificed without pity, might execute the most painful and dangerous work. The skill of the Roman artists might be corrupted to the destruction of their country. The walls of Aquileia were assaulted by a formidable train of battering-rams, moveable turrets, and engines, that threw stones, darts, and fire;[49](#) and the monarch of the Huns employed the forcible impulse of hope, fear, emulation, and interest, to subvert the only barrier which delayed the conquest of Italy. Aquileia was at that period one of the richest, the most populous, and the strongest of the maritime cities of the Hadriatic coast. The Gothic auxiliaries, who appear to have served under their native princes Alaric and Antala, communicated their intrepid spirit; and the citizens still remembered the glorious and successful resistance, which their ancestors had opposed to a fierce, inexorable Barbarian, who disgraced the majesty of the Roman purple. Three months were consumed without effect in the siege of Aquileia; till the want of provisions, and the clamours of his army, compelled Attila to relinquish the enterprise, and reluctantly to issue his orders that the troops should strike their tents the next morning and begin their retreat. But, as he rode round the walls, pensive, angry, and disappointed, he observed a stork preparing to leave her nest, in one of the towers, and to fly with her infant family towards the country. He seized, with the ready penetration of a statesman, this trifling incident, which chance had offered to superstition; and

exclaimed, in a loud and cheerful tone, that such a domestic bird, so constantly attached to human society, would never have abandoned her ancient seats, unless those towers had been devoted to impending ruin and solitude.[50](#) The favourable omen inspired an assurance of victory; the siege was renewed, and prosecuted with fresh vigour; a large breach was made in the part of the wall from whence the stork had taken her flight; the Huns mounted to the assault with irresistible fury; and the succeeding generation could scarcely discover the ruins of Aquileia.[51](#) After this dreadful chastisement, Attila pursued his march; and, as he passed, the cities of Altinum, Concordia, and Padua were reduced into heaps of stones and ashes. The inland towns, Vicenza, Verona, and Bergamo, were exposed to the rapacious cruelty of the Huns. Milan and Pavia submitted, without resistance, to the loss of their wealth; and applauded the unusual clemency, which preserved from the flames the public, as well as private, buildings; and spared the lives of the captive multitude. The popular traditions of Comum, Turin, or Moderna may justly be suspected; yet they concur with more authentic evidence to prove that Attila spread his ravages over the rich plains of modern Lombardy: which are divided by the Po, and bounded by the Alps and Apennine.[52](#) When he took possession of the royal palace of Milan, he was surprised, and offended, at the sight of a picture, which represented the Cæsars seated on their throne and the princes of Scythia prostrate at their feet. The revenge which Attila inflicted on this monument of Roman vanity was harmless and ingenious. He commanded a painter to reverse the figures and the attitudes; and the emperors were delineated on the same canvas, approaching in a suppliant posture to empty their bags of tributary gold before the throne of the Scythian monarch.[53](#) The spectators must have confessed the truth and propriety of the alteration; and were perhaps tempted to apply, on this singular occasion, the well-known fable of the dispute between the lion and the man.[54](#)

It is a saying worthy of the ferocious pride of Attila, that the grass never grew on the spot where his horse had trod. Yet the savage destroyer undesignedly laid the foundations of a republic which revived, in the feudal state of Europe, the art and spirit of commercial industry. The celebrated name of Venice, or Venetia,[55](#) was formerly diffused over a large and fertile province of Italy, from the confines of Pannonia to the river Addua, and from the Po to the Rhætian and Julian Alps. Before the irruption of the Barbarians, fifty Venetian cities flourished in peace and prosperity; Aquileia was placed in the most conspicuous station; but the ancient dignity of Padua was supported by agriculture and manufactures; and the property of five hundred citizens, who were entitled to the equestrian rank, must have amounted, at the strictest computation, to one million seven hundred thousand pounds. Many families of Aquileia, Padua, and the adjacent towns, who fled from the sword of the Huns, found a safe, though obscure, refuge in the neighbouring islands.[56](#) At the extremity of the Gulf, where the Hadriatic feebly imitates the tides of the ocean, near an hundred small islands are separated by shallow water from the continent, and protected from the waves by

several long slips of land, which admit the entrance of vessels through some secret and narrow channels.⁵⁷ Till the middle of the fifth century, these remote and sequestered spots remained without cultivation, with few inhabitants, and almost without a name. But the manners of the Venetian fugitives, their arts and their government, were gradually formed by their new situation; and one of the epistles of Cassiodorus,⁵⁸ which describes their condition about seventy years afterwards, may be considered as the primitive monument of the republic. The minister of Theodoric compares them, in his quaint declamatory style, to water-fowl, who had fixed their nests on the bosom of the waves; and, though he allows that the Venetian provinces had formerly contained many noble families, he insinuates that they were now reduced by misfortune to the same level of humble poverty. Fish was the common, and almost the universal, food of every rank; their only treasure consisted in the plenty of salt, which they extracted from the sea; and the exchange of that commodity, so essential to human life, was substituted in the neighbouring markets to the currency of gold and silver. A people, whose habitations might be doubtfully assigned to the earth or water, soon became alike familiar with the two elements; and the demands of avarice succeeded to those of necessity. The islanders, who, from Grado to Chiozza, were intimately connected with each other, penetrated into the heart of Italy by the secure, though laborious, navigation of the rivers and inland canals. Their vessels, which were continually increasing in size and number, visited all the harbours of the Gulf; and the marriage, which Venice annually celebrates with the Adriatic, was contracted in her early infancy. The epistle of Cassiodorus, the Prætorian prefect, is addressed to the maritime tribunes; and he exhorts them, in a mild tone of authority, to animate the zeal of their countrymen for the public service, which required their assistance to transport the magazines of wine and oil from the province of Istria to the royal city of Ravenna. The ambiguous office of these magistrates is explained by the tradition that, in the twelve principal islands, twelve tribunes, or judges, were created by an annual and popular election. The existence of the Venetian republic under the Gothic kingdom of Italy is attested by the same authentic record, which annihilates their lofty claim of original and perpetual independence.⁵⁹ The Italians, who had long since renounced the exercise of arms, were surprised, after forty years' peace, by the approach of a formidable Barbarian, whom they abhorred, as the enemy of their religion as well as of their republic. Amidst the general consternation, Aetius alone was incapable of fear; but it was impossible that he should achieve, alone and unassisted, any military exploits worthy of his former renown. The Barbarians who had defended Gaul refused to march to the relief of Italy; and the succours promised by the Eastern emperor were distant and doubtful. Since Aetius, at the head of his domestic troops, still maintained the field, and harassed or retarded the march of Attila, he never shewed himself more truly great than at the time when his conduct was blamed by an ignorant and ungrateful people.⁶⁰ If the mind of Valentinian had been susceptible of any generous sentiments, he would have chosen such a general for his example and his guide. But the timid grandson of Theodosius, instead of sharing the dangers, escaped from the sound, of war; and his hasty retreat from Ravenna to Rome, from an impregnable

fortress to an open capital, betrayed his secret intention of abandoning Italy as soon as the danger should approach his Imperial person. This shameful abdication was suspended, however, by the spirit of doubt and delay, which commonly adheres to pusillanimous counsels, and sometimes corrects their pernicious tendency. The Western emperor, with the senate and people of Rome, embraced the more salutary resolution of deprecating, by a solemn and suppliant embassy, the wrath of Attila. This important commission was accepted by Avienus, who, from his birth and riches, his consular dignity, the numerous train of his clients, and his personal abilities, held the first rank in the Roman senate. The specious and artful character of Avienus⁶¹ was admirably qualified to conduct a negotiation either of public or private interest; his colleague Trigetius had exercised the Prætorian prefecture of Italy; and Leo, bishop of Rome, consented to expose his life for the safety of his flock. The genius of Leo⁶² was exercised and displayed in the public misfortunes; and he has deserved the appellation of *Great* by the successful zeal with which he laboured to establish his opinions and his authority, under the venerable names of orthodox faith and ecclesiastical discipline. The Roman ambassadors were introduced to the tent of Attila, as he lay encamped at the place where the slowwinding Mincius is lost in the foaming waves of the lake Benacus,⁶³ and trampled, with his Scythian cavalry, the farms of Catullus and Virgil.⁶⁴ The Barbarian monarch listened with favourable, and even respectful attention; and the deliverance of Italy was purchased by the immense ransom, or dowry, of the princess Honoria. The state of his army might facilitate the treaty, and hasten his retreat. Their martial spirit was relaxed by the wealth and indolence of a warm climate. The shepherds of the North, whose ordinary food consisted of milk and raw flesh, indulged themselves too freely in the use of bread, of wine, and of meat prepared and seasoned by the arts of cookery; and the progress of disease revenged in some measure the injuries of the Italians.⁶⁵ When Attila declared his resolution of carrying his victorious arms to the gates of Rome, he was admonished by his friends, as well as by his enemies, that Alaric had not long survived the conquest of the eternal city. His mind, superior to real danger, was assaulted by imaginary terrors; nor could he escape the influence of superstition, which had so often been subservient to his designs.⁶⁶ The pressing eloquence of Leo, his majestic aspect and sacerdotal robes, excited the veneration of Attila for the spiritual father of the Christians. The apparition of the two apostles, St. Peter and St. Paul, who menaced the Barbarian with instant death, if he rejected the prayer of their successor, is one of the noblest legends of ecclesiastical tradition. The safety of Rome might deserve the interposition of celestial beings; and some indulgence is due to a fable which has been represented by the pencil of Raphael and the chisel of Algardi.⁶⁷

Venice (from a painting by Turner)

Before the king of the Huns evacuated Italy, he threatened to return more dreadful and more implacable, if his bride, the princess Honoria, were not delivered to his ambassadors within the term stipulated by the treaty. Yet, in the meanwhile, Attila relieved his tender anxiety by adding a beautiful maid, whose name was Ildico, to the list of his innumerable wives.⁶⁸ Their marriage was celebrated with barbaric pomp and festivity at his wooden palace beyond the Danube; and the monarch, oppressed with wine and sleep, retired, at a late hour, from the banquet to the nuptial bed. His attendants continued to respect his pleasures, or his repose, the greatest part of the ensuing day, till the unusual silence alarmed their fears and suspicions; and, after attempting to awaken Attila by loud and repeated cries, they at length broke into the royal apartment. They found the trembling bride sitting by the bedside, hiding her face with her veil, and lamenting her own danger as well as the death of the king, who had expired during the night.⁶⁹ An artery had suddenly burst; and, as Attila lay in a supine posture, he was suffocated by a torrent of blood, which, instead of finding a passage through the nostrils, regurgitated into the lungs and stomach. His body was solemnly exposed in the midst of the plain, under a silken pavilion; and the chosen squadrons of the Huns, wheeling round in measured evolutions, chanted a funeral song to the memory of a hero, glorious in his life, invincible in his death, the father of his people, the scourge of his enemies, and the terror of the world. According to their national custom, the Barbarians cut off a part of their hair, gashed their faces with unseemly wounds, and bewailed their valiant leader as he deserved, not with the tears of women, but with the blood of warriors. The remains of Attila were enclosed within three

coffins, of gold, of silver, and of iron, and privately buried in the night: the spoils of nations were thrown into his grave; the captives who had opened the ground were inhumanly massacred; and the same Huns, who had indulged such excessive grief, feasted, with dissolute and intemperate mirth, about the recent sepulchre of their king. It was reported at Constantinople that on the fortunate night in which he expired Marcian beheld in a dream the bow of Attila broken asunder; and the report may be allowed to prove how seldom the image of that formidable Barbarian was absent from the mind of a Roman emperor.[70](#)

The revolution which subverted the empire of the Huns established the fame of Attila, whose genius alone had sustained the huge and disjointed fabric. After his death, the boldest chieftains aspired to the rank of kings; the most powerful kings refused to acknowledge a superior; and the numerous sons, whom so many various mothers bore to the deceased monarch, divided and disputed, like a private inheritance, the sovereign command of the nations of Germany and Scythia. The bold Ardaric felt and represented the disgrace of this servile partition; and his subjects, the warlike Gepidæ, with the Ostrogoths, under the conduct of three valiant brothers, encouraged their allies to vindicate the rights of freedom and royalty. In a bloody and decisive conflict on the banks of the river Netad, in Pannonia, the lance of the Gepidæ, the sword of the Goths, the arrows of the Huns, the Suevic infantry, the light arms of the Heruli, and the heavy weapons of the Alani encountered or supported each other, and the victory of Ardaric was accompanied with the slaughter of thirty thousand of his enemies. Ellac, the eldest son of Attila, lost his life and crown in the memorable battle of Netad: his early valour had raised him to the throne of the Acatzires, a Scythian people, whom he subdued; and his father, who loved the superior merit, would have envied the death, of Ellac.[71](#) His brother Dengisich with an army of Huns, still formidable in their flight and ruin, maintained his ground above fifteen years on the banks of the Danube. The palace of Attila, with the old country of Dacia, from the Carpathian hills to the Euxine, became the seat of a new power, which was erected by Ardaric, king of the Gepidæ. The Pannonian conquests, from Vienna to Sirmium, were occupied by the Ostrogoths; and the settlements of the tribes, who had so bravely asserted their native freedom, were irregularly distributed, according to the measure of their respective strength. Surrounded and oppressed by the multitude of his father's slaves, the kingdom of Dengisich was confined to the circle of his waggons; his desperate courage urged him to invade the Eastern empire; he fell in battle; and his head, ignominiously exposed in the Hippodrome, exhibited a grateful spectacle to the people of Constantinople. Attila had fondly or superstitiously believed that Irnac, the youngest of his sons, was destined to perpetuate the glories of his race. The character of that prince, who attempted to moderate the rashness of his brother Dengisich, was more suitable to the declining condition of the Huns, and Irnac, with his subject hordes, retired into the heart of the Lesser Scythia. They were soon overwhelmed by a torrent of new Barbarians, who followed the same road which their own ancestors had formerly discovered. The *Geougen*, or Avars, whose residence is assigned by the Greek writers

to the shores of the ocean, impelled the adjacent tribes; till at length the Igours of the North, issuing from the cold Siberian regions, which produce the most valuable furs, spread themselves over the desert, as far as the Borysthenes and Caspian gates; and finally extinguished the empire of the Huns.[72](#)

Such an event might contribute to the safety of the Eastern empire, under the reign of a prince who conciliated the friendship, without forfeiting the esteem, of the Barbarians. But the emperor of the West, the feeble and dissolute Valentinian, who had reached his thirty-fifth year without attaining the age of reason or courage, abused this apparent security, to undermine the foundations of his own throne by the murder of the patrician Aetius. From the instinct of a base and jealous mind, he hated the man who was universally celebrated as the terror of the Barbarians and the support of the republic; and his new favourite, the eunuch Heraclius, awakened the emperor from the supine lethargy, which might be disguised, during the life of Placidia,[73](#) by the excuse of filial piety. The fame of Aetius, his wealth and dignity, the numerous and martial train of Barbarian followers, his powerful dependents, who filled the civil offices of the state, and the hopes of his son Gaudentius,[74](#) who was already contracted to Eudoxia, the emperor's daughter, had raised him above the rank of a subject. The ambitious designs, of which he was secretly accused, excited the fears, as well as the resentment, of Valentinian. Aetius himself, supported by the consciousness of his merit, his services, and perhaps his innocence, seems to have maintained a haughty and indiscreet behaviour. The patrician offended his sovereign by an hostile declaration; he aggravated the offence by compelling him to ratify, with a solemn oath, a treaty of reconciliation and alliance; he proclaimed his suspicions, he neglected his safety; and, from a vain confidence that the enemy, whom he despised, was incapable even of a manly crime, he rashly ventured his person in the palace of Rome. Whilst he urged, perhaps with intemperate vehemence, the marriage of his son, Valentinian, drawing his sword, the first sword he had ever drawn, plunged it in the breast of a general who had saved his empire; his courtiers and eunuchs ambitiously struggled to imitate their master; and Aetius, pierced with an hundred wounds, fell dead in the royal presence. Boethius, the Prætorian prefect, was killed at the same moment; and, before the event could be divulged, the principal friends of the patrician were summoned to the palace, and separately murdered. The horrid deed, palliated by the specious names of justice and necessity, was immediately communicated by the emperor to his soldiers, his subjects, and his allies. The nations, who were strangers or enemies to Aetius, generously deplored the unworthy fate of a hero; the Barbarians, who had been attached to his service, dissembled their grief and resentment; and the public contempt which had been so long entertained for Valentinian was at once converted into deep and universal abhorrence. Such sentiments seldom pervade the walls of a palace; yet the emperor was confounded by the honest reply of a Roman, whose approbation he had not disdained to solicit: "I am ignorant, sir, of your motives or provocations; I only know that you have acted like a man who cuts off his right hand with his left."[75](#)

The luxury of Rome seems to have attracted the long and frequent visits of Valentinian; who was consequently more despised at Rome than in any other part of his dominions. A republican spirit was insensibly revived in the senate, as their authority, and even their supplies, became necessary for the support of his feeble government. The stately demeanour of an hereditary monarch offended their pride; and the pleasures of Valentinian were injurious to the peace and honour of noble families. The birth of the empress Eudoxia was equal to his own, and her charms and tender affection deserved those testimonies of love which her inconstant husband dissipated in vague and unlawful amours. Petronius Maximus, a wealthy senator of the Anician family, who had been twice consul, was possessed of a chaste and beautiful wife: her obstinate resistance served only to irritate the desires of Valentinian; and he resolved to accomplish them either by strategem or force. Deep gaming was one of the vices of the court; the emperor, who, by chance or contrivance, had gained from Maximus a considerable sum, uncourteously exacted his ring as a security for the debt; and sent it by a trusty messenger to his wife, with an order, in her husband's name, that she should immediately attend the empress Eudoxia. The unsuspecting wife of Maximus was conveyed in her litter to the Imperial palace; the emissaries of her impatient lover conducted her to a remote and silent bed-chamber; and Valentinian violated, without remorse, the laws of hospitality. Her tears, when she returned home, her deep affliction, and her bitter reproaches against her husband, whom she considered as the accomplice of his own shame, excited Maximus to a just revenge; the desire of revenge was stimulated by ambition; and he might reasonably aspire, by the free suffrage of the Roman senate, to the throne of a detested and despicable rival. Valentinian, who supposed that every human breast was devoid, like his own, of friendship and gratitude, had imprudently admitted among his guards several domestics and followers of Aetius. Two of these, of Barbarian race, were persuaded to execute a sacred and honourable duty, by punishing with death the assassin of their patron; and their intrepid courage did not long expect a favourable moment. Whilst Valentinian amused himself in the field of Mars with the spectacle of some military sports, they suddenly rushed upon him with drawn weapons, despatched the guilty Heraclius, and stabbed the emperor to the heart, without the least opposition from his numerous train, who seemed to rejoice in the tyrant's death. Such was the fate of Valentinian the Third,[76](#) the last Roman emperor of the family of Theodosius. He faithfully imitated the hereditary weakness of his cousin and his two uncles, without inheriting the gentleness, the purity, the innocence, which alleviate, in their characters, the want of spirit and ability. Valentinian was less excusable, since he had passions, without virtues; even his religion was questionable; and, though he never deviated into the paths of heresy, he scandalised the pious Christians by his attachment to the profane arts of magic and divination.

As early as the time of Cicero and Varro, it was the opinion of the Roman augurs that the *twelve vultures*, which Romulus had seen, represented the *twelve centuries*,

assigned for the fatal period of his city.⁷⁷ This prophecy, disregarded perhaps in the season of health and prosperity, inspired the people with gloomy apprehensions, when the twelfth century, clouded with disgrace and misfortune, was almost elapsed;⁷⁸ and even posterity must acknowledge with some surprise that the arbitrary interpretation of an accidental or fabulous circumstance has been seriously verified in the downfall of the Western empire. But its fall was announced by a clearer omen than the flight of vultures: the Roman government appeared every day less formidable to its enemies, more odious and oppressive to its subjects.⁷⁹ The taxes were multiplied with the public distress; economy was neglected in proportion as it became necessary; and the injustice of the rich shifted the unequal burden from themselves to the people, whom they defrauded of the *indulgencies* that might sometimes have alleviated their misery. The severe inquisition, which confiscated their goods and tortured their persons, compelled the subjects of Valentinian to prefer the more simple tyranny of the Barbarians, to fly to the woods and mountains, or to embrace the vile and abject condition of mercenary servants. They abjured and abhorred the name of Roman citizens, which had formerly excited the ambition of mankind. The Armorican provinces of Gaul, and the greatest part of Spain, were thrown into a state of disorderly independence, by the confederations of the Bagaudæ; and the Imperial ministers pursued with proscriptive laws, and ineffectual arms, the rebels whom they had made.⁸⁰ If all the Barbarian conquerors had been annihilated in the same hour, their total destruction would not have restored the empire of the West; and, if Rome still survived, she survived the loss of freedom, of virtue, and of honour.

CHAPTER XXXVI

Sack of Rome by Genseric, King of the Vandals — His naval Depredations — Succession of the last Emperors of the West, Maximus, Avitus, Majorian, Severus, Anthemius, Olybrius, Glycerius, Nepos, Augustulus — Total Extinction of the Western Empire — Reign of Odoacer, the first Barbarian King of Italy

The loss or desolation of the provinces, from the ocean to the Alps, impaired the glory and greatness of Rome; her internal prosperity was irretrievably destroyed by the separation of Africa. The rapacious Vandals confiscated the patrimonial estates of the senators, and intercepted the regular subsidies which relieved the poverty, and encouraged the idleness, of the plebeians. The distress of the Romans was soon aggravated by an unexpected attack; and the province, so long cultivated for their use by industrious and obedient subjects, was armed against them by an ambitious Barbarian. The Vandals and Alani, who followed the successful standard of Genseric, had acquired a rich and fertile territory, which stretched along the coast above ninety days' journey from Tangier to Tripoli; but their narrow limits were pressed and

confined, on either side, by the sandy desert and the Mediterranean. The discovery and conquest of the Black nations, that might dwell beneath the torrid zone, could not tempt the rational ambition of Genseric; but he cast his eyes towards the sea; he resolved to create a naval power; and his bold resolution was executed with steady and active perseverance. The woods of Mount Atlas afforded an inexhaustible nursery of timber; his new subjects were skilled in the arts of navigation and shipbuilding; he animated his daring Vandals to embrace a mode of warfare which would render every maritime country accessible to their arms; the Moors and Africans were allured by the hopes of plunder; and, after an interval of six centuries, the fleets that issued from the port of Carthage again claimed the empire of the Mediterranean. The success of the Vandals, the conquest of Sicily, the sack of Palermo, and the frequent descents on the coast of Lucania awakened and alarmed the mother of Valentinian and the sister of Theodosius. Alliances were formed; and armaments, expensive and ineffectual, were prepared, for the destruction of the common enemy, who reserved his courage to encounter those dangers which his policy could not prevent or elude. The designs of the Roman government were repeatedly baffled by his artful delays, ambiguous promises, and apparent concessions; and the interposition of his formidable confederate, the king of the Huns, recalled the emperors from the conquest of Africa to the care of their domestic safety. The revolutions of the palace, which left the Western empire without a defender and without a lawful prince, dispelled the apprehensions, and stimulated the avarice, of Genseric. He immediately equipped a numerous fleet of Vandals and Moors, and cast anchor at the mouth of the Tiber, about three months after the death of Valentinian and the elevation of Maximus to the Imperial throne.

The private life of the senator Petronius Maximus¹ was often alleged as a rare example of human felicity. His birth was noble and illustrious, since he descended from the Anician family; his dignity was supported by an adequate patrimony in land and money; and these advantages of fortune were accompanied with liberal arts and decent manners, which adorn or imitate the inestimable gifts of genius and virtue. The luxury of his palace and table was hospitable and elegant. Whenever Maximus appeared in public, he was surrounded by a train of grateful and obsequious clients;² and it is possible that among these clients he might deserve and possess some real friends. His merit was rewarded by the favour of the prince and senate; he thrice exercised the office of Prætorian prefect of Italy;³ he was twice invested with the consulship, and he obtained the rank of patrician. These civil honours were not incompatible with the enjoyment of leisure and tranquillity; his hours, according to the demands of pleasure or reason, were accurately distributed by a water-clock; and this avarice of time may be allowed to prove the sense which Maximus entertained of his own happiness. The injury which he received from the emperor Valentinian appears to excuse the most bloody revenge. Yet a philosopher might have reflected that, if the resistance of his wife had been sincere, her chastity was still inviolate, and that it could never be restored if she had consented to the will of the adulterer. A patriot would have hesitated before he plunged himself and his country into those inevitable calamities

which must follow the extinction of the royal house of Theodosius. The imprudent Maximus disregarded these salutary considerations: he gratified his resentment and ambition; he saw the bleeding corpse of Valentinian at his feet; and he heard himself saluted emperor by the unanimous voice of the senate and people. But the day of his inauguration was the last day of his happiness. He was imprisoned (such is the lively expression of Sidonius) in the palace; and, after passing a sleepless night, he sighed that he had attained the summit of his wishes, and aspired only to descend from the dangerous elevation. Oppressed by the weight of the diadem, he communicated his anxious thoughts to his friend and quæstor Fulgentius; and, when he looked back with unavailing regret on the secure pleasures of his former life, the emperor exclaimed, “O fortunate Damocles,⁴ thy reign began and ended with the same dinner”: a wellknown allusion, which Fulgentius afterwards repeated as an instructive lesson for princes and subjects.

The reign of Maximus continued about three months.⁵ His hours, of which he had lost the command, were disturbed by remorse, or guilt, or terror; and his throne was shaken by the seditions of the soldiers, the people, and the confederate Barbarians. The marriage of his son Palladius with the eldest daughter of the late emperor might tend to establish the hereditary succession of his family; but the violence which he offered to the empress Eudoxia could proceed only from the blind impulse of lust or revenge. His own wife, the cause of these tragic events, had been seasonably removed by death; and the widow of Valentinian was compelled to violate her decent mourning, perhaps her real grief, and to submit to the embraces of a presumptuous usurper, whom she suspected as the assassin of her deceased husband. These suspicions were soon justified by the indiscreet confession of Maximus himself; and he wantonly provoked the hatred of his reluctant bride, who was still conscious that she descended from a line of emperors. From the East, however, Eudoxia could not hope to obtain any effectual assistance; her father and her aunt Pulcheria were dead; her mother languished at Jerusalem in disgrace and exile; and the sceptre of Constantinople was in the hands of a stranger. She directed her eyes towards Carthage; secretly implored the aid of the king of the Vandals; and persuaded Genseric to improve the fair opportunity of disguising his rapacious designs by the specious names of honour, justice, and compassion.⁶ Whatever abilities Maximus might have shown in a subordinate station, he was found incapable of administering an empire; and, though he might easily have been informed of the naval preparations which were made on the opposite shores of Africa, he expected with supine indifference the approach of the enemy, without adopting any measures of defence, of negotiation, or of a timely retreat. When the Vandals disembarked at the mouth of the Tiber, the emperor was suddenly roused from his lethargy by the clamours of a trembling and exasperated multitude. The only hope which presented itself to his astonished mind was that of a precipitate flight, and he exhorted the senators to imitate the example of their prince. But no sooner did Maximus appear in the streets than he was assaulted by a shower of stones; a Roman, or a Burgundian, soldier claimed the honour of the first wound; his mangled body was

ignominiously cast into the Tiber; the Roman people rejoiced in the punishment which they had inflicted on the author of the public calamities; and the domestics of Eudoxia signalised their zeal in the service of their mistress.[7](#)

On the third day after the tumult, Genseric boldly advanced from the port of Ostia to the gates of the defenceless city. Instead of a sally of the Roman youth, there issued from the gates an unarmed and venerable procession of the bishop at the head of his clergy.[8](#) The fearless spirit of Leo, his authority and eloquence, *again* mitigated the fierceness of a Barbarian conqueror: the king of the Vandals promised to spare the unresisting multitude, to protect the buildings from fire, and to exempt the captives from torture; and, although such orders were neither seriously given nor strictly obeyed, the mediation of Leo was glorious to himself and in some degree beneficial to his country. But Rome and its inhabitants were delivered to the licentiousness of the Vandals and Moors, whose blind passions revenged the injuries of Carthage. The pillage lasted fourteen days and nights;[9](#) and all that yet remained of public or private wealth, of sacred or profane treasure, was diligently transported to the vessels of Genseric. Among the spoils, the splendid relics of two temples, or rather of two religions, exhibited a memorable example of the vicissitude of human and divine things. Since the abolition of Paganism, the Capitol had been violated and abandoned; yet the statues of the gods and heroes were still respected, and the curious roof of gilt bronze was reserved for the rapacious hands of Genseric.[10](#) The holy instruments of the Jewish worship,[11](#) the gold table, and the gold candlestick with seven branches, originally framed according to the particular instructions of God himself, and which were placed in the sanctuary of his temple, had been ostentatiously displayed to the Roman people in the triumph of Titus. They were afterwards deposited in the temple of Peace; and at the end of four hundred years the spoils of Jerusalem were transferred from Rome to Carthage, by a Barbarian who derived his origin from the shores of the Baltic. These ancient monuments might attract the notice of curiosity, as well as of avarice. But the Christian churches, enriched and adorned by the prevailing superstition of the times, afforded more plentiful materials for sacrilege; and the pious liberality of Pope Leo, who melted six silver vases, the gift of Constantine, each of an hundred pounds weight, is an evidence of the damage which he attempted to repair. In the forty-five years that had elapsed since the Gothic invasion the pomp and luxury of Rome were in some measure restored; and it was difficult either to escape or to satisfy the avarice of a conqueror who possessed leisure to collect, and ships to transport, the wealth of the capital. The Imperial ornaments of the palace, the magnificent furniture and wardrobe, the sideboards of massy plate, were accumulated with disorderly rapine; the gold and silver amounted to several thousand talents; yet even the brass and copper were laboriously removed. Eudoxia herself, who advanced to meet her friend and deliverer, soon bewailed the imprudence of her own conduct. She was rudely stripped of her jewels: and the unfortunate empress, with her two daughters, the only surviving remains of the great Theodosius, was compelled, as a captive, to follow the haughty

Vandal; who immediately hoisted sail, and returned with a prosperous navigation to the port of Carthage.^{[12](#)} Many thousand Romans of both sexes, chosen for some useful or agreeable qualifications, reluctantly embarked on board the fleet of Genseric; and their distress was aggravated by the unfeeling Barbarians, who, in the division of the booty, separated the wives from their husbands, and the children from their parents. The charity of Deogratias, bishop of Carthage,^{[13](#)} was their only consolation and support. He generously sold the gold and silver plate of the church to purchase the freedom of some, to alleviate the slavery of others, and to assist the wants and infirmities of a captive multitude, whose health was impaired by the hardships which they had suffered in their passage from Italy to Africa. By his order, two spacious churches were converted into hospitals; the sick were distributed in convenient beds, and liberally supplied with food and medicines; and the aged prelate repeated his visits both in the day and night, with an assiduity that surpassed his strength, and a tender sympathy which enhanced the value of his services. Compare this scene with the field of Cannæ; and judge between Hannibal and the successor of St. Cyprian.^{[14](#)}

The deaths of Aetius and Valentinian had relaxed the ties which held the Barbarians of Gaul in peace and subordination. The sea-coast was infested by the Saxons; the Alemanni and the Franks advanced from the Rhine to the Seine; and the ambition of the Goths seemed to meditate more extensive and permanent conquests. The emperor Maximus relieved himself, by a judicious choice, from the weight of these distant cares; he silenced the solicitations of his friends, listened to the voice of fame, and promoted a stranger to the general command of the forces in Gaul. Avitus,^{[15](#)} the stranger whose merit was so nobly rewarded, descended from a wealthy and honourable family in the diocese of Auvergne. The convulsions of the times urged him to embrace, with the same ardour, the civil and military professions; and the indefatigable youth blended the studies of literature and jurisprudence with the exercise of arms and hunting. Thirty years of his life were laudably spent in the public service; he alternately displayed his talents in war and negotiation; and the soldier of Aetius, after executing the most important embassies, was raised to the station of Prætorian prefect of Gaul. Either the merit of Avitus excited envy, or his moderation was desirous of repose, since he calmly retired to an estate which he possessed in the neighbourhood of Clermont. A copious stream, issuing from the mountain, and falling headlong in many a loud and foaming cascade, discharged its waters into a lake about two miles in length, and the villa was pleasantly seated on the margin of the lake. The baths, the porticoes, the summer and winter apartments, were adapted to the purposes of luxury and use; and the adjacent country afforded the various prospects of woods, pastures, and meadows.^{[16](#)} In this retreat, where Avitus amused his leisure with books, rural sports, the practice of husbandry, and the society of his friends,^{[17](#)} he received the Imperial diploma, which constituted him master-general of the cavalry and infantry of Gaul. He assumed the military command; the Barbarians suspended their fury; and, whatever means he might employ, whatever concessions he might be forced to make,

the people enjoyed the benefits of actual tranquillity. But the fate of Gaul depended on the Visigoths; and the Roman general, less attentive to his dignity than to the public interest, did not disdain to visit Toulouse in the character of an ambassador. He was received with courteous hospitality by Theodoric, the king of the Goths; but, while Avitus laid the foundation of a solid alliance with that powerful nation, he was astonished by the intelligence that the emperor Maximus was slain and that Rome had been pillaged by the Vandals. A vacant throne, which he might ascend without guilt or danger, tempted his ambition;[18](#) and the Visigoths were easily persuaded to support his claim by their irresistible suffrage. They loved the person of Avitus; they respected his virtues; and they were not insensible of the advantage, as well as honour, of giving an emperor to the West. The season was now approaching in which the annual assembly of the seven provinces was held at Arles; their deliberations might perhaps be influenced by the presence of Theodoric and his martial brothers; but their choice would naturally incline to the most illustrious of their countrymen. Avitus, after a decent resistance, accepted the Imperial diadem from the representatives of Gaul; and his election was ratified by the acclamations of the Barbarians and provincials.[19](#) The formal consent of Marcian, emperor of the East, was solicited and obtained; but the senate, Rome, and Italy, though humbled by their recent calamities, submitted with a secret murmur to the presumption of the Gallic usurper.[20](#)

Theodoric, to whom Avitus was indebted for the purple, had acquired the Gothic sceptre by the murder of his elder brother Torismond; and he justified this atrocious deed by the design which his predecessor had formed of violating his alliance with the empire.[21](#) Such a crime might not be incompatible with the virtues of a Barbarian; but the manners of Theodoric were gentle and humane; and posterity may contemplate without terror the original picture of a Gothic king, whom Sidonius had intimately observed in the hours of peace and of social intercourse. In an epistle, dated from the court of Toulouse, the orator satisfies the curiosity of one of his friends, in the following description:[22](#) “By the majesty of his appearance, Theodoric would command the respect of those who are ignorant of his merit; and, although he is born a prince, his merit would dignify a private station. He is of a middle stature, his body appears rather plump than fat, and in his well-proportioned limbs agility is united with muscular strength.[23](#) If you examine his countenance, you will distinguish a high forehead, large shaggy eyebrows, an aquiline nose, thin lips, a regular set of white teeth, and a fair complexion that blushes more frequently from modesty than from anger. The ordinary distribution of his time, as far as it is exposed to the public view, may be concisely represented. Before daybreak, he repairs, with a small train, to his domestic chapel, where the service is performed by the Arian clergy; but those who presume to interpret his secret sentiments consider this assiduous devotion as the effect of habit and policy. The rest of the morning is employed in the administration of his kingdom. His chair is surrounded by some military officers of decent aspect and behaviour; the noisy crowd of his Barbarian guards occupies the hall of audience; but

they are not permitted to stand within the veils or curtains that conceal the councilchamber from vulgar eyes. The ambassadors of the nations are successively introduced: Theodoric listens with attention, answers them with discreet brevity, and either announces or delays, according to the nature of their business, his final resolution. About eight (the second hour) he rises from his throne, and visits either his treasury or his stables. If he chooses to hunt, or at least to exercise himself on horseback, his bow is carried by a favourite youth; but, when the game is marked, he bends it with his own hand, and seldom misses the object of his aim: as a king, he disdains to bear arms in such ignoble warfare; but, as a soldier, he would blush to accept any military service which he could perform himself. On common days his dinner is not different from the repast of a private citizen; but every Saturday many honourable guests are invited to the royal table, which, on these occasions, is served with the elegance of Greece, the plenty of Gaul, and the order and diligence of Italy.²⁴ The gold or silver plate is less remarkable for its weight than for the brightness and curious workmanship; the taste is gratified without the help of foreign and costly luxury; the size and number of the cups of wine are regulated with a strict regard to the laws of temperance; and the respectful silence that prevails is interrupted only by grave and instructive conversation. After dinner, Theodoric sometimes indulges himself in a short slumber; and, as soon as he wakes, he calls for the dice and tables, encourages his friends to forget the royal majesty, and is delighted when they freely express the passions which are excited by the incidents of play. At this game, which he loves as the image of war, he alternately displays his eagerness, his skill, his patience, and his cheerful temper. If he loses, he laughs; he is modest and silent if he wins. Yet, notwithstanding this seeming indifference, his courtiers choose to solicit any favour in the moments of victory; and I myself, in my applications to the king, have derived some benefit from my losses.²⁵ About the ninth hour (three o'clock) the tide of business again returns, and flows incessantly till after sunset, when the signal of the royal supper dismisses the weary crowd of suppliants and pleaders. At the supper, a more familiar repast, buffoons and pantomimes are sometimes introduced, to divert, not to offend, the company by their ridiculous wit; but female singers and the soft effeminate modes of music are severely banished, and such martial tunes as animate the soul to deeds of valour are alone grateful to the ear of Theodoric. He retires from table; and the nocturnal guards are immediately posted at the entrance of the treasury, the palace, and the private apartments."

When the king of the Visigoths encouraged Avitus to assume the purple, he offered his person and his forces, as a faithful soldier of the republic.²⁶ The exploits of Theodoric soon convinced the world that he had not degenerated from the warlike virtues of his ancestors. After the establishment of the Goths in Aquitain and the passage of the Vandals into Africa, the Suevi, who had fixed their kingdom in Gallicia, aspired to the conquest of Spain, and threatened to extinguish the feeble remains of the Roman dominion. The provincials of Carthagen and Tarragona, afflicted by an hostile invasion, represented their injuries and their apprehensions. Count Fronto was

despatched, in the name of the emperor Avitus, with advantageous offers of peace and alliance; and Theodoric interposed his weighty mediation, to declare that, unless his brother-in-law, the king of the Suevi, immediately retired, he should be obliged to arm in the cause of justice and of Rome. "Tell him," replied the haughty Rechiarius, "that I despise his friendship and his arms; but that I shall soon try whether he will dare to expect my arrival under the walls of Toulouse." Such a challenge urged Theodoric to prevent the bold designs of his enemy: he passed the Pyrenees at the head of the Visigoths; the Franks and Burgundians served under his standard; and, though he professed himself the dutiful servant of Avitus, he privately stipulated, for himself and his successors, the absolute possession of his Spanish conquests. The two armies, or rather the two nations, encountered each other on the banks of the river Urbicus, about twelve miles from Astorga; and the decisive victory of the Goths appeared for a while to have extirpated the name and kingdom of the Suevi. From the field of battle Theodoric advanced to Braga, their metropolis, which still retained the splendid vestiges of its ancient commerce and dignity.²⁷ His entrance was not polluted with blood, and the Goths respected the chastity of their female captives, more especially of the consecrated virgins; but the greatest part of the clergy and people were made slaves, and even the churches and altars were confounded in the universal pillage. The unfortunate king of the Suevi had escaped to one of the ports of the ocean; but the obstinacy of the winds opposed his flight; he was delivered to his implacable rival; and Rechiarius, who neither desired nor expected mercy, received, with manly constancy, the death which he would probably have inflicted. After this bloody sacrifice to policy or resentment, Theodoric carried his victorious arms as far as Merida, the principal town of Lusitania, without meeting any resistance, except from the miraculous powers of St. Eulalia; but he was stopped in the full career of success, and recalled from Spain, before he could provide for the security of his conquests. In his retreat towards the Pyrenees, he revenged his disappointment on the country through which he passed; and, in the sack of Pollentia and Astorga, he shewed himself a faithless ally, as well as a cruel enemy. Whilst the king of the Visigoths fought and vanquished in the name of Avitus, the reign of Avitus had expired; and both the honour and the interest of Theodoric were deeply wounded by the disgrace of a friend, whom he had seated on the throne of the Western empire.²⁸

The pressing solicitations of the senate and people persuaded the emperor Avitus to fix his residence at Rome and to accept the consulship for the ensuing year. On the first day of January, his son-in-law, Sidonius Apollinaris, celebrated his praises in a panegyric of six hundred verses; but this composition, though it was rewarded with a brass statue,²⁹ seems to contain a very moderate proportion either of genius or of truth. The poet, if we may degrade that sacred name, exaggerates the merit of a sovereign and a father; and his prophecy of a long and glorious reign was soon contradicted by the event. Avitus, at a time when the Imperial dignity was reduced to a pre-eminence of toil and danger, indulged himself in the pleasures of Italian luxury; age had not extinguished his amorous inclinations; and he is accused of insulting, with

indiscreet and ungenerous raillery, the husbands whose wives he had seduced or violated.³⁰ But the Romans were not inclined either to excuse his faults or to acknowledge his virtues. The several parts of the empire became every day more alienated from each other; and the stranger of Gaul was the object of popular hatred and contempt. The senate asserted their legitimate claim in the election of an emperor; and their authority, which had been originally derived from the old constitution, was again fortified by the actual weakness of a declining monarchy. Yet even such a monarchy might have resisted the votes of an unarmed senate, if their discontent had not been supported, or perhaps inflamed, by Count Ricimer, one of the principal commanders of the Barbarian troops, who formed the military defence of Italy. The daughter of Wallia, king of the Visigoths, was the mother of Ricimer; but he was descended, on the father's side, from the nation of the Suevi;³¹ his pride, or patriotism, might be exasperated by the misfortunes of his countrymen; and he obeyed, with reluctance, an emperor in whose elevation he had not been consulted. His faithful and important services against the common enemy rendered him still more formidable;³² and, after destroying, on the coast of Corsica, a fleet of Vandals, which consisted of sixty galleys, Ricimer returned in triumph with the appellation of the Deliverer of Italy. He chose that moment to signify to Avitus that his reign was at an end; and the feeble emperor, at a distance from his Gothic allies, was compelled, after a short and unavailing struggle, to abdicate the purple. By the clemency, however, or the contempt, of Ricimer,³³ he was permitted to descend from the throne to the more desirable station of bishop of Placentia; but the resentment of the senate was still unsatisfied, and their inflexible severity pronounced the sentence of his death. He fled towards the Alps, with the humble hope, not of arming the Visigoths in his cause, but of securing his person and treasures in the sanctuary of Julian, one of the tutelar saints of Auvergne.³⁴ Disease, or the hand of the executioner, arrested him on the road; yet his remains were decently transported to Brivas, or Brioude, in his native province, and he reposed at the feet of his holy patron.³⁵ Avitus left only³⁶ one daughter, the wife of Sidonius Apollinaris, who inherited the patrimony of his father-in-law; lamenting, at the same time, the disappointment of his public and private expectations. His resentment prompted him to join, or at least to countenance, the measures of a rebellious faction in Gaul; and the poet had contracted some guilt, which it was incumbent on him to expiate by a new tribute of flattery to the succeeding emperor.³⁷

The successor of Avitus presents the welcome discovery of a great and heroic character, such as sometimes arise in a degenerate age, to vindicate the honour of the human species. The emperor Majorian has deserved the praises of his contemporaries, and of posterity; and these praises may be strongly expressed in the words of a judicious and disinterested historian: "That he was gentle to his subjects; that he was terrible to his enemies; and that he excelled in *every* virtue *all* his predecessors who had reigned over the Romans."³⁸ Such a testimony may justify at least the panegyric of Sidonius; and we may acquiesce in the assurance that, although the obsequious

orator would have flattered, with equal zeal, the most worthless of princes, the extraordinary merit of his object confined him, on this occasion, within the bounds of truth.³⁹ Majorian derived his name from his maternal grandfather, who in the reign of the great Theodosius had commanded the troops of the Illyrian frontier. He gave his daughter in marriage to the father of Majorian, a respectable officer, who administered the revenues of Gaul with skill and integrity, and generously preferred the friendship of Aetius to the tempting offers of an insidious court. His son, the future emperor, who was educated in the profession of arms, displayed, from his early youth, intrepid courage, premature wisdom, and unbounded liberality in a scanty fortune. He followed the standard of Aetius, contributed to his success, shared and sometimes eclipsed his glory, and at last excited the jealousy of the patrician, or rather of his wife, who forced him to retire from the service.⁴⁰ Majorian, after the death of Aetius, was recalled, and promoted; and his intimate connection with Count Ricimer was the immediate step by which he ascended the throne of the Western empire. During the vacancy that succeeded the abdication of Avitus, the ambitious Barbarian, whose birth excluded him from the Imperial dignity, governed Italy, with the title of Patrician; resigned, to his friend, the conspicuous station of master-general of the cavalry and infantry; and, after an interval of some months, consented to the unanimous wish of the Romans, whose favour Majorian had solicited by a recent victory over the Alemanni.⁴¹ He was invested with the purple at Ravenna, and the epistle which he addressed to the senate will best describe his situation and his sentiments. “Your election, Conscript Fathers! and the ordinance of the most valiant army, have made me your emperor.⁴² May the propitious Deity direct and prosper the consuls and events of my administration, to your advantage, and to the public welfare! For my own part, I did not aspire, I have submitted, to reign; nor should I have discharged the obligations of a citizen, if I had refused, with base and selfish ingratitude, to support the weight of those labours which were imposed by the republic. Assist, therefore, the prince whom you have made; partake the duties which you have enjoined; and may our common endeavours promote the happiness of an empire which I have accepted from your hands. Be assured that, in our times, justice shall resume her ancient vigour, and that virtue shall become not only innocent but meritorious. Let none, except the authors themselves, be apprehensive of *delations*,⁴³ which, as a subject, I have always condemned, and, as a prince, will severely punish. Our own vigilance, and that of our father, the patrician Ricimer, shall regulate all military affairs, and provide for the safety of the Roman world, which we have saved from foreign and domestic enemies.⁴⁴ You now understand the maxims of my government: you may confide in the faithful love and sincere assurances of a prince who has formerly been the companion of your life and dangers, who still glories in the name of senator, and who is anxious that you should never repent of the judgment which you have pronounced in his favour.” The emperor, who, amidst the ruins of the Roman world, revived the ancient language of law and liberty which Trajan would not have disclaimed, must have derived those generous sentiments from his own heart; since they were not suggested to his imitation by the

customs of his age, or the example of his predecessors.[45](#)

The private and public actions of Majorian are very imperfectly known; but his laws, remarkable for an original cast of thought and expression, faithfully represent the character of a sovereign who loved his people, who sympathised in their distress, who had studied the causes of the decline of the empire, and who was capable of applying (as far as such reformation was practicable) judicious and effectual remedies to the public disorders.[46](#) His regulations concerning the finances manifestly tended to remove, or at least to mitigate, the most intolerable grievances. I. From the first hour of his own reign, he was solicitous (I translate his own words) to relieve the *weary* fortunes of the provincials, oppressed by the accumulated weight of indictions and superindictions.[47](#) With this view he granted an universal amnesty, a final and absolute discharge of all arrears[48](#) of tribute, of all debts, which, under any pretence, the fiscal officers might demand from the people. This wise dereliction of obsolete, vexatious, and unprofitable claims improved and purified the sources of the public revenue; and the subject who could now look back without despair might labour with hope and gratitude for himself and for his country. II. In the assessment and collection of taxes Majorian restored the ordinary jurisdiction of the provincial magistrates, and suppressed the extraordinary commissions which had been introduced in the name of the emperor himself or of the Prætorian prefects. The favourite servants, who obtained such irregular powers, were insolent in their behaviour and arbitrary in their demands; they affected to despise the subordinate tribunals, and they were discontented if their fees and profits did not twice exceed the sum which they condescended to pay into the treasury. One instance of their extortion would appear incredible, were it not authenticated by the legislator himself. They exacted the whole payment in gold; but they refused the current coin of the empire, and would accept only such ancient pieces as were stamped with the names of Faustina or the Antonines. The subject who was unprovided with these curious medals had recourse to the expedient of compounding with their rapacious demands; or, if he succeeded in the research, his imposition was doubled, according to the weight and value of the money of former times.[49](#) III. “The municipal corporations (says the emperor), the lesser senates (so antiquity has justly styled them), deserve to be considered as the heart of the cities and the sinews of the republic. And yet so low are they now reduced, by the injustice of magistrates and the venality of collectors, that many of their members, renouncing their dignity and their country, have taken refuge in distant and obscure exile.” He urges, and even compels, their return to their respective cities; but he removes the grievance which had forced them to desert the exercise of their municipal functions. They are directed, under the authority of the provincial magistrates, to resume their office of levying the tribute; but, instead of being made responsible for the whole sum assessed on their district, they are only required to produce a regular account of the payments which they have actually received, and of the defaulters who are still indebted to the public. IV. But Majorian was not ignorant that these corporate bodies were too much inclined to

retaliate the injustice and oppression which they had suffered; and he therefore revives the useful office of the *defenders of cities*. He exhorts the people to elect, in a full and free assembly, some man of discretion and integrity, who would dare to assert their privileges, to represent their grievances, to protect the poor from the tyranny of the rich, and to inform the emperor of the abuses that were committed under the sanction of his name and authority.

The spectator, who casts a mournful view over the ruins of ancient Rome, is tempted to accuse the memory of the Goths and Vandals, for the mischief which they had neither leisure, nor power, nor perhaps inclination, to perpetrate. The tempest of war might strike some lofty turrets to the ground; but the destruction which undermined the foundations of those massy fabrics was prosecuted, slowly and silently, during a period of ten centuries; and the motives of interest that afterwards operated without shame or control were severely checked by the taste and spirit of the emperor Majorian. The decay of the city had gradually impaired the value of the public works. The circus and theatres might still excite, but they seldom gratified, the desires of the people; the temples, which had escaped the zeal of the Christians, were no longer inhabited either by gods or men; the diminished crowds of the Romans were lost in the immense space of their baths and porticoes; and the stately libraries and halls of justice became useless to an indolent generation, whose repose was seldom disturbed either by study or business. The monuments of consular, or Imperial, greatness were no longer revered as the immortal glory of the capital; they were only esteemed as an inexhaustible mine of materials, cheaper and more convenient than the distant quarry. Specious petitions were continually addressed to the easy magistrates of Rome, which stated the want of stones or bricks for some necessary service; the fairest forms of architecture were rudely defaced for the sake of some paltry, or pretended, repairs; and the degenerate Romans, who converted the spoil to their own emolument, demolished with sacrilegious hands the labours of their ancestors. Majorian, who had often sighed over the desolation of the city, applied a severe remedy to the growing evil.⁵⁰ He reserved to the prince and senate the sole cognisance of the extreme cases which might justify the destruction of an ancient edifice; imposed a fine of fifty pounds of gold (two thousand pounds sterling) on every magistrate who should presume to grant such illegal and scandalous licence; and threatened to chastise the criminal obedience of their subordinate officers, by a severe whipping and the amputation of both their hands. In the last instance, the legislature might seem to forget the proportion of guilt and punishment; but his zeal arose from a generous principle, and Majorian was anxious to protect the monuments of those ages in which he would have desired and deserved to live. The emperor conceived that it was his interest to increase the number of his subjects; that it was his duty to guard the purity of the marriage-bed; but the means which he employed to accomplish these salutary purposes are of an ambiguous, and perhaps exceptionable, kind. The pious maids, who consecrated their virginity to Christ, were restrained from taking the veil till they had reached their fortieth year. Widows under that age were compelled to form a second alliance within the term of

five years, by the forfeiture of half their wealth to their nearest relations or to the state. Unequal marriages were condemned or annulled. The punishment of confiscation and exile was deemed so inadequate to the guilt of adultery, that, if the criminal returned to Italy, he might, by the express declaration of Majorian, be slain with impunity.[51](#)

While the emperor Majorian assiduously laboured to restore the happiness and virtue of the Romans, he encountered the arms of Genseric, from his character and situation their most formidable enemy. A fleet of Vandals and Moors landed at the mouth of the Liris, or Garigliano; but the Imperial troops surprised and attacked the disorderly Barbarians, who were encumbered with the spoils of Campania; they were chased with slaughter to their ships, and their leader, the king's brother-in-law, was found in the number of the slain.[52](#) Such vigilance might announce the character of the new reign; but the strictest vigilance and the most numerous forces were insufficient to protect the long-extended coast of Italy from the depredations of a naval war. The public opinion had imposed a nobler and more arduous task on the genius of Majorian. Rome expected from him alone the restitution of Africa; and the design which he formed, of attacking the Vandals in their new settlements, was the result of bold and judicious policy. If the intrepid emperor could have infused his own spirit into the youth of Italy; if he could have revived, in the field of Mars, the manly exercises in which he had always surpassed his equals; he might have marched against Genseric at the head of a *Roman* army. Such a reformation of national manners might be embraced by the rising generation; but it is the misfortune of those princes who laboriously sustain a declining monarchy that, to obtain some immediate advantage, or to avert some impending danger, they are forced to countenance, and even to multiply, the most pernicious abuses. Majorian, like the weakest of his predecessors, was reduced to the disgraceful expedient of substituting Barbarian auxiliaries in the place of his unwarlike subjects; and his superior abilities could only be displayed in the vigour and dexterity with which he wielded a dangerous instrument, so apt to recoil on the hand that used it. Besides the confederates, who were already engaged in the service of the empire, the fame of his liberality and valour attracted the nations of the Danube, the Borysthenes, and perhaps of the Tanais. Many thousands of the bravest subjects of Attila, the Gepidæ, the Ostrogoths, the Rugians, the Burgundians, the Suevi, the Alani, assembled in the plains of Liguria; and their formidable strength was balanced by their mutual animosities.[53](#) They passed the Alps in a severe winter. The emperor led the way on foot, and in complete armour; sounding, with his long staff, the depth of the ice, or snow, and encouraging the Scythians, who complained of the extreme cold, by the cheerful assurance that they should be satisfied with the heat of Africa. The citizens of Lyons had presumed to shut their gates: they soon implored, and experienced, the clemency of Majorian. He vanquished Theodoric in the field; and admitted to his friendship and alliance a king whom he had found not unworthy of his arms. The beneficial, though precarious, reunion of the greatest part of Gaul and Spain was the effect of persuasion, as well as of force;[54](#) and the independent Bagaudæ, who had escaped, or resisted, the oppression of former reigns, were disposed to confide in

the virtues of Majorian. His camp was filled with Barbarian allies; his throne was supported by the zeal of an affectionate people; but the emperor had foreseen that it was impossible, without a maritime power, to achieve the conquest of Africa. In the first Punic war, the republic had exerted such incredible diligence that, within sixty days after the first stroke of the axe had been given in the forest, a fleet of one hundred and sixty galleys proudly rode at anchor in the sea.⁵⁵ Under circumstances much less favourable, Majorian equalled the spirit and perseverance of the ancient Romans. The woods of the Apennine were felled; the arsenals and manufactures of Ravenna and Misenum were restored; Italy and Gaul vied with each other in liberal contributions to the public service; and the Imperial navy, of three hundred large galleys, with an adequate proportion of transports and smaller vessels, was collected in the secure and capacious harbour of Carthage in Spain.⁵⁶ The intrepid countenance of Majorian animated his troops with a confidence of victory; and, if we might credit the historian Procopius, his courage sometimes hurried him beyond the bounds of prudence. Anxious to explore, with his own eyes, the state of the Vandals, he ventured, after disguising the colour of his hair, to visit Carthage in the character of his own ambassador; and Genseric was afterwards mortified by the discovery that he had entertained and dismissed the emperor of the Romans. Such an anecdote may be rejected as an improbable fiction; but it is a fiction which would not have been imagined, unless in the life of a hero.⁵⁷

Without the help of a personal interview, Genseric was sufficiently acquainted with the genius and designs of his adversary. He practised his customary arts of fraud and delay, but he practised them without success. His applications for peace became each hour more submissive, and perhaps more sincere; but the inflexible Majorian had adopted the ancient maxim that Rome could not be safe as long as Carthage existed in a hostile state. The king of the Vandals distrusted the valour of his native subjects, who were enervated by the luxury of the South;⁵⁸ he suspected the fidelity of the vanquished people, who abhorred him as an Arian tyrant; and the desperate measure, which he executed, of reducing Mauritania into a desert,⁵⁹ could not defeat the operations of the Roman emperor, who was at liberty to land his troops on any part of the African coast. But Genseric was saved from impending and inevitable ruin by the treachery of some powerful subjects, envious, or apprehensive, of their master's success. Guided by their secret intelligence, he surprised the unguarded fleet in the bay of Carthage; many of the ships were sunk, or taken, or burnt; and the preparations of three years were destroyed in a single day.⁶⁰ After this event, the behaviour of the two antagonists shewed them superior to their fortune. The Vandal, instead of being elated by this accidental victory, immediately renewed his solicitations for peace. The emperor of the West, who was capable of forming great designs, and of supporting heavy disappointments, consented to a treaty, or rather to a suspension of arms; in the full assurance that, before he could restore his navy, he should be supplied with provocations to justify a second war. Majorian returned to Italy, to prosecute his

labours for the public happiness; and, as he was conscious of his own integrity, he might long remain ignorant of the dark conspiracy which threatened his throne and his life. The recent misfortune of Carthagera sullied the glory which had dazzled the eyes of the multitude; almost every description of civil and military officers were exasperated against the Reformer, since they all derived some advantage from the abuses which he endeavoured to suppress; and the patrician Ricimer impelled the inconstant passions of the Barbarians against a prince whom he esteemed and hated. The virtues of Majorian could not protect him from the impetuous sedition which broke out in the camp near Tortona, at the foot of the Alps. He was compelled to abdicate the Imperial purple: five days after his abdication, it was reported that he died of a dysentery;[61](#) and the humble tomb, which covered his remains, was consecrated by the respect and gratitude of succeeding generations.[62](#) The private character of Majorian inspired love and respect. Malicious calumny and satire excited his indignation, or, if he himself were the object, his contempt; but he protected the freedom of wit, and, in the hours which the emperor gave to the familiar society of his friends, he could indulge his taste for pleasantries, without degrading the majesty of his rank.[63](#)

It was not perhaps without some regret that Ricimer sacrificed his friend to the interest of his ambition; but he resolved, in a second choice, to avoid the imprudent preference of superior virtue and merit. At his command the obsequious senate of Rome bestowed the Imperial title on Libius Severus, who ascended the throne of the West without emerging from the obscurity of a private condition. History has scarcely deigned to notice his birth, his elevation, his character, or his death. Severus expired, as soon as his life became inconvenient to his patron;[64](#) and it would be useless to discriminate his nominal reign in the vacant interval of six years, between the death of Majorian and the elevation of Anthemius. During that period, the government was in the hands of Ricimer alone; and, although the modest Barbarian disclaimed the name of king, he accumulated treasures, formed a separate army, negotiated private alliances, and ruled Italy with the same independent and despotic authority which was afterwards exercised by Odoacer and Theodoric. But his dominions were bounded by the Alps; and two Roman generals, Marcellinus and Ægidius, maintained their allegiance to the republic, by rejecting, with disdain, the phantom which he styled an emperor. Marcellinus still adhered to the old religion; and the devout Pagans, who secretly disobeyed the laws of the church and state, applauded his profound skill in the science of divination. But he possessed the more valuable qualifications of learning, virtue, and courage;[65](#) the study of the Latin literature had improved his taste; and his military talents had recommended him to the esteem and confidence of the great Aetius, in whose ruin he was involved. By a timely flight, Marcellinus escaped the rage of Valentinian, and boldly asserted his liberty amidst the convulsions of the Western empire. His voluntary, or reluctant, submission to the authority of Majorian was rewarded by the government of Sicily and the command of an army, stationed in that

island to oppose, or to attack, the Vandals; but his Barbarian mercenaries, after the emperor's death, were tempted to revolt by the artful liberality of Ricimer. At the head of a band of faithful followers, the intrepid Marcellinus occupied the province of Dalmatia, assumed the title of Patrician of the West, secured the love of his subjects by a mild and equitable reign, built a fleet which claimed the dominion of the Adriatic, and alternately alarmed the coasts of Italy and of Africa.⁶⁶ Ægidius, the master-general of Gaul, who equalled, or at least who imitated, the heroes of ancient Rome,⁶⁷ proclaimed his immortal resentment against the assassins of his beloved master. A brave and numerous army was attached to his standard; and, though he was prevented by the arts of Ricimer, and the arms of the Visigoths, from marching to the gates of Rome, he maintained his independent sovereignty beyond the Alps, and rendered the name of Ægidius respectable both in peace and war. The Franks, who had punished with exile the youthful follies of Childeric, elected the Roman general for their king; his vanity, rather than his ambition, was gratified by that singular honour; and, when the nation, at the end of four years, repented of the injury which they had offered to the Merovingian family, he patiently acquiesced in the restoration of the lawful prince. The authority of Ægidius ended only with his life; and the suspicions of poison and secret violence, which derived some countenance from the character of Ricimer, were eagerly entertained by the passionate credulity of the Gauls.⁶⁸

The kingdom of Italy, a name to which the Western empire was gradually reduced, was afflicted, under the reign of Ricimer, by the incessant depredations of the Vandal pirates.⁶⁹ In the spring of each year they equipped a formidable navy in the port of Carthage; and Genseric himself, though in a very advanced age, still commanded in person the most important expeditions. His designs were concealed with impenetrable secrecy, till the moment that he hoisted sail. When he was asked by his pilot, what course he should steer: "Leave the determination to the winds (replied the Barbarian with pious arrogance); *they* will transport us to the guilty coast, whose inhabitants have provoked the divine justice;" but, if Genseric himself deigned to issue more precise orders, he judged the most wealthy to be the most criminal. The Vandals repeatedly visited the coasts of Spain, Liguria, Tuscany, Campania, Lucania, Bruttium, Apulia, Calabria, Venetia, Dalmatia, Epirus, Greece, and Sicily; they were tempted to subdue the island of Sardinia, so advantageously placed in the centre of the Mediterranean; and their arms spread desolation, or terror, from the columns of Hercules to the mouth of the Nile. As they were more ambitious of spoil than of glory, they seldom attacked any fortified cities or engaged any regular troops in the open field. But the celerity of their motions enabled them, almost at the same time, to threaten and to attack the most distant objects which attracted their desires; and, as they always embarked a sufficient number of horses, they had no sooner landed than they swept the dismayed country with a body of light cavalry. Yet, notwithstanding the example of their king, the native Vandals and Alani insensibly declined this toilsome and perilous warfare; the hardy generation of the first conquerors was almost extinguished, and their sons, who were born in Africa, enjoyed the delicious baths and gardens which had been acquired by

the valour of their fathers. Their place was readily supplied by a various multitude of Moors and Romans, of captives and outlaws; and those desperate wretches who had already violated the laws of their country were the most eager to promote the atrocious acts which disgrace the victories of Genseric. In the treatment of his unhappy prisoners, he sometimes consulted his avarice, and sometimes indulged his cruelty; and the massacre of five hundred noble citizens of Zant or Zacynthus, whose mangled bodies he cast into the Ionian sea, was imputed, by the public indignation, to his latest posterity.

Such crimes could not be excused by any provocations; but the war which the king of the Vandals prosecuted against the Roman empire was justified by a specious and reasonable motive. The widow of Valentinian, Eudoxia, whom he had led captive from Rome to Carthage, was the sole heiress of the Theodosian house; her elder daughter, Eudocia, became the reluctant wife of Hunneric, his eldest son; and the stern father, asserting a legal claim, which could not easily be refuted or satisfied, demanded a just proportion of the Imperial patrimony. An adequate, or at least a valuable, compensation was offered by the Eastern emperor, to purchase a necessary peace. Eudoxia and her younger daughter, Placidia, were honourably restored, and the fury of the Vandals was confined to the limits of the Western empire. The Italians, destitute of a naval force, which alone was capable of protecting their coasts, implored the aid of the more fortunate nations of the East; who had formerly acknowledged, in peace and war, the supremacy of Rome. But the perpetual division of the two empires had alienated their interest and their inclinations; the faith of a recent treaty was alleged; and the Western Romans, instead of arms and ships, could only obtain the assistance of a cold and ineffectual mediation. The haughty Ricimer, who had long struggled with the difficulties of his situation, was at length reduced to address the throne of Constantinople, in the humble language of a subject; and Italy submitted, as the price and security of the alliance, to accept a master from the choice of the emperor of the East.⁷⁰ It is not the purpose of the present chapter [or even of the present volume]^{70a} to continue the distinct series of the Byzantine history; but a concise view of the reign and character of the emperor Leo may explain the last efforts that were attempted to save the falling empire of the West.⁷¹

Since the death of the younger Theodosius, the domestic repose of Constantinople had never been interrupted by war or faction. Pulcheria had bestowed her hand, and the sceptre of the East, on the modest virtue of Marcian; he gratefully revered her august rank and virgin chastity; and, after her death, he gave his people the example of the religious worship that was due to the memory of the Imperial saint.⁷² Attentive to the prosperity of his own dominions, Marcian seemed to behold with indifference the misfortunes of Rome; and the obstinate refusal of a brave and active prince to draw his sword against the Vandals was ascribed to a secret promise, which had formerly been exacted from him when he was a captive in the power of Genseric.⁷³ The death of

Marcian, after a reign of seven years, would have exposed the East to the danger of a popular election, if the superior weight of a single family had not been able to incline the balance in favour of the candidate whose interest they supported. The patrician Aspar might have placed the diadem on his own head, if he would have subscribed the Nicene creed.⁷⁴ During three generations the armies of the East were successively commanded by his father, by himself, and by his son Ardaburius; his Barbarian guards formed a military force that overawed the palace and the capital; and the liberal distribution of his immense treasures rendered Aspar as popular as he was powerful. He recommended the obscure name of Leo of Thrace, a military tribune, and the principal steward of his household. His nomination was unanimously ratified by the senate; and the servant of Aspar received the Imperial crown from the hands of the patriarch or bishop, who was permitted to express, by this unusual ceremony, the suffrage of the Deity.⁷⁵ This emperor, the first of the name of Leo, has been distinguished by the title of the *Great*, from a succession of princes, who gradually fixed, in the opinion of the Greeks, a very humble standard of heroic, or at least of royal, perfection. Yet the temperate firmness with which Leo resisted the oppression of his benefactor shewed that he was conscious of his duty and of his prerogative. Aspar was astonished to find that his influence could no longer appoint a prefect of Constantinople: he presumed to reproach his sovereign with a breach of promise, and, insolently shaking his purple, "It is not proper (said he) that the man who is invested with this garment should be guilty of lying." "Nor is it proper (replied Leo) that a prince should be compelled to resign his own judgment, and the public interest, to the will of a subject."⁷⁶ After this extraordinary scene, it was impossible that the reconciliation of the emperor and the patrician could be sincere; or, at least, that it could be solid and permanent. An army of Isaurians⁷⁷ was secretly levied, and introduced into Constantinople; and, while Leo undermined the authority, and prepared the disgrace, of the family of Aspar, his mild and cautious behaviour restrained them from any rash and desperate attempts, which might have been fatal to themselves or their enemies. The measures of peace and war were affected by this internal revolution. As long as Aspar degraded the majesty of the throne, the secret correspondence of religion and interest engaged him to favour the cause of Genseric. When Leo had delivered himself from that ignominious servitude, he listened to the complaints of the Italians; resolved to extirpate the tyranny of the Vandals; and declared his alliance with his colleague, Anthemius, whom he solemnly invested with the diadem and purple of the West.

The virtues of Anthemius have perhaps been magnified, since the Imperial descent, which he could only deduce from the usurper Procopius, has been swelled into a line of emperors.⁷⁸ But the merit of his immediate parents, their honours, and their riches rendered Anthemius one of the most illustrious subjects of the East. His father Procopius obtained, after his Persian embassy, the rank of general and patrician; and the name of Anthemius was derived from his maternal grandfather, the celebrated

prefect, who protected, with so much ability and success, the infant reign of Theodosius. The grandson of the prefect was raised above the condition of a private subject, by his marriage with Euphemia, the daughter of the emperor Marcian. This splendid alliance, which might supersede the necessity of merit, hastened the promotion of Anthemius to the successive dignities of count, of master-general, of consul, and of patrician; and his merit or fortune claimed the honours of a victory which was obtained on the banks of the Danube over the Huns. Without indulging an extravagant ambition, the son-in-law of Marcian might hope to be his successor; but Anthemius supported the disappointment with courage and patience; and his subsequent elevation was universally approved by the public, who esteemed him worthy to reign, till he ascended the throne.⁷⁹ The emperor of the West marched from Constantinople, attended by several counts of high distinction, and a body of guards, almost equal to the strength and numbers of a regular army; he entered Rome in triumph, and the choice of Leo was confirmed by the senate, the people, and the Barbarian confederates of Italy.⁸⁰ The solemn inauguration of Anthemius was followed by the nuptials of his daughter and the patrician Ricimer: a fortunate event which was considered as the firmest security of the union and happiness of the state. The wealth of two empires was ostentatiously displayed; and many senators completed their ruin by an expensive effort to disguise their poverty. All serious business was suspended during this festival; the courts of justice were shut; the streets of Rome, the theatres, the places of public and private resort, resounded with hymenæal songs and dances; and the royal bride, clothed in silken robes, with a crown on her head, was conducted to the palace of Ricimer, who had changed his military dress for the habit of a consul and a senator. On this memorable occasion, Sidonius, whose early ambition had been so fatally blasted, appeared as the orator of Auvergne, among the provincial deputies who addressed the throne with congratulations or complaints.⁸¹ The calends of January were now approaching, and the venal poet, who had loved Avitus and esteemed Majorian, was persuaded by his friends to celebrate, in heroic verse, the merit, the felicity, the second consulship and the future triumphs of the emperor Anthemius. Sidonius pronounced, with assurance and success, a panegyric which is still extant; and, whatever might be the imperfections either of the subject or of the composition, the welcome flatterer was immediately rewarded with the prefecture of Rome; a dignity which placed him among the illustrious personages of the empire, till he wisely preferred the more respectable character of a bishop and a saint.⁸²

The Greeks ambitiously commend the piety and Catholic faith of the emperor whom they gave to the West; nor do they forget to observe that, when he left Constantinople, he converted his palace into the pious foundation of a public bath, a church, and an hospital for old men.⁸³ Yet some suspicious appearances are found to sully the theological fame of Anthemius. From the conversation of Philotheus, a Macedonian sectary, he had imbibed the spirit of religious toleration; and the heretics of Rome would have assembled with impunity, if the bold and vehement censure which Pope

Hilary pronounced in the church of St. Peter had not obliged him to abjure the unpopular indulgence.⁸⁴ Even the Pagans, a feeble and obscure remnant, conceived some vain hopes from the indifference or partiality of Anthemius; and his singular friendship for the philosopher Severus, whom he promoted to the consulship, was ascribed to a secret project of reviving the ancient worship of the gods.⁸⁵ These idols were crumbled into dust, and the mythology which had once been the creed of nations was so universally disbelieved that it might be employed without scandal, or at least without suspicion, by Christian poets.⁸⁶ Yet the vestiges of superstition were not absolutely obliterated, and the festival of the Lupercalia, whose origin had preceded the foundation of Rome, was still celebrated under the reign of Anthemius. The savage and simple rites were expressive of an early state of society before the invention of arts and agriculture. The rustic deities who presided over the toils and pleasures of the pastoral life, Pan, Faunus, and their train of satyrs, were such as the fancy of shepherds might create, sportive, petulant, and lascivious; whose power was limited, and whose malice was inoffensive. A goat was the offering the best adapted to their character and attributes; the flesh of the victim was roasted on willow spits; and the riotous youths who crowded to the feast ran naked about the fields, with leather thongs in their hands, communicating, as it was supposed, the blessing of fecundity to the women whom they touched.⁸⁷ The altar of Pan was erected, perhaps by Evander the Arcadian, in a dark recess in the side of the Palatine hill, watered by a perpetual fountain, and shaded by an hanging grove. A tradition that, in the same place, Romulus and Remus were suckled by the wolf rendered it still more sacred and venerable in the eyes of the Romans; and this sylvan spot was gradually surrounded by the stately edifices of the Forum.⁸⁸ After the conversion of the Imperial city, the Christians still continued, in the month of February, the annual celebration of the Lupercalia; to which they ascribed a secret and mysterious influence on the genial powers of the animal and vegetable world. The bishops of Rome were solicitous to abolish a profane custom, so repugnant to the spirit of Christianity; but their zeal was not supported by the authority of the civil magistrate: the inveterate abuse subsisted till the end of the fifth century, and Pope Gelasius, who purified the capital from the last stain of idolatry, appeased, by a formal apology, the murmurs of the senate and people.⁸⁹

In all his public declarations, the emperor Leo assumes the authority, and professes the affection, of a father for his son Anthemius, with whom he had divided the administration of the universe.⁹⁰ The situation, and perhaps the character, of Leo dissuaded him from exposing his person to the toils and dangers of an African war. But the powers of the Eastern empire were strenuously exerted to deliver Italy and the Mediterranean from the Vandals; and Genseric, who had so long oppressed both the land and the sea, was threatened from every side with a formidable invasion. The campaign was opened by a bold and successful enterprise of the prefect Heraclius.⁹¹ The troops of Egypt, Thebais, and Libya were embarked under his command; and the Arabs, with a train of horses and camels, opened the roads of the desert. Heraclius

landed on the coast of Tripoli, surprised and subdued the cities of that province, and prepared, by a laborious march, which Cato had formerly executed,⁹² to join the Imperial army under the walls of Carthage. The intelligence of this loss extorted from Genseric some insidious and ineffectual propositions of peace; but he was still more seriously alarmed by the reconciliation of Marcellinus with the two empires. The independent patrician had been persuaded to acknowledge the legitimate title of Anthemius, whom he accompanied in his journey to Rome; the Dalmatian fleet was received into the harbours of Italy; the active valour of Marcellinus expelled the Vandals from the island of Sardinia; and the languid efforts of the West added some weight to the immense preparations of the Eastern Romans. The expense of the naval armament, which Leo sent against the Vandals, has been distinctly ascertained; and the curious and instructive account displays the wealth of the declining empire. The royal demesnes, or private patrimony of the prince, supplied seventeen thousand pounds of gold; forty-seven thousand pounds of gold, and seven hundred thousand of silver, were levied and paid into the treasury by the Prætorian prefects. But the cities were reduced to extreme poverty; and the diligent calculation of fines and forfeitures, as a valuable object of the revenue, does not suggest the idea of a just or merciful administration. The whole expense, by whatever means it was defrayed, of the African campaign amounted to the sum of one hundred and thirty thousand pounds of gold, about five millions two hundred thousand pounds sterling, at a time when the value of money appears, from the comparative price of corn, to have been somewhat higher than in the present age.⁹³ The fleet that sailed from Constantinople to Carthage, consisted of eleven hundred and thirteen ships, and the number of soldiers and mariners exceeded one hundred thousand men. Basiliscus, the brother of the empress Verina, was entrusted with this important command. His sister, the wife of Leo, had exaggerated the merit of his former exploits against the Scythians. But the discovery of his guilt, or incapacity, was reserved for the African war; and his friends could only save his military reputation by asserting that he had conspired with Aspar to spare Genseric and to betray the last hope of the Western empire.

Experience has shewn that the success of an invader most commonly depends on the vigour and celerity of his operations. The strength and sharpness of the first impression are blunted by delay; the health and spirit of the troops insensibly languish in a distant climate; the naval and military force, a mighty effort which perhaps can never be repeated, is silently consumed; and every hour that is wasted in negotiation accustoms the enemy to contemplate and examine those hostile terrors which, on their first appearance, he deemed irresistible. The formidable navy of Basiliscus pursued its prosperous navigation from the Thracian Bosphorus to the coast of Africa. He landed his troops at Cape Bona, or the promontory of Mercury, about forty miles from Carthage.⁹⁴ The army of Heraclius and the fleet of Marcellinus either joined or seconded the Imperial lieutenant; and the Vandals, who opposed his progress by sea or land, were successively vanquished.⁹⁵ If Basiliscus had seized the moment of consternation and boldly advanced to the capital, Carthage must have surrendered, and

the kingdom of the Vandals was extinguished. Genseric beheld the danger with firmness, and eluded it with his veteran dexterity. He protested, in the most respectful language, that he was ready to submit his person and his dominions to the will of the emperor; but he requested a truce of five days to regulate the terms of his submission; and it was universally believed that his secret liberality contributed to the success of this public negotiation. Instead of obstinately refusing whatever indulgence his enemy so earnestly solicited, the guilty, or the credulous, Basiliscus consented to the fatal truce; and his imprudent security seemed to proclaim that he already considered himself as the conqueror of Africa. During this short interval, the wind became favourable to the designs of Genseric. He manned his largest ships of war with the bravest of the Moors and Vandals, and they towed after them many large barques filled with combustible materials. In the obscurity of the night these destructive vessels were impelled against the unguarded and unsuspecting fleet of the Romans, who were awakened by the sense of their instant danger. Their close and crowded order assisted the progress of the fire, which was communicated with rapid and irresistible violence; and the noise of the wind, the crackling of the flames, the dissonant cries of the soldiers and mariners, who could neither command nor obey, increased the horror of the nocturnal tumult. Whilst they laboured to extricate themselves from the fire-ships, and to save at least a part of the navy, the galleys of Genseric assaulted them with temperate and disciplined valour; and many of the Romans, who escaped the fury of the flames, were destroyed or taken by the victorious Vandals. Among the events of that disastrous night the heroic, or rather desperate, courage of John, one of the principal officers of Basiliscus, has rescued his name from oblivion. When the ship, which he had bravely defended, was almost consumed, he threw himself in his armour into the sea, disdainfully rejected the esteem and pity of Genso, the son of Genseric, who pressed him to accept honourable quarter, and sunk under the waves; exclaiming, with his last breath, that he would never fall alive into the hands of those impious dogs. Actuated by a far different spirit, Basiliscus, whose station was the most remote from danger, disgracefully fled in the beginning of the engagement, returned to Constantinople with the loss of more than half of his fleet and army, and sheltered his guilty head in the sanctuary of St. Sophia, till his sister, by her tears and entreaties, could obtain his pardon from the indignant emperor. Heraclius effected his retreat through the desert; Marcellinus retired to Sicily, where he was assassinated, perhaps at the instigation of Ricimer, by one of his own captains; and the king of the Vandals expressed his surprise and satisfaction that the Romans themselves should remove from the world his most formidable antagonists.⁹⁶ After the failure of this great expedition, Genseric again became the tyrant of the sea: the coasts of Italy, Greece, and Asia were again exposed to his revenge and avarice; Tripoli and Sardinia returned to his obedience; he added Sicily to the number of his provinces; and, before he died; in the fulness of years and of glory, he beheld the final extinction of the empire of the West.⁹⁷

During his long and active reign, the African monarch had studiously cultivated the

friendship of the Barbarians of Europe, whose arms he might employ in a seasonable and effectual diversion against the two empires. After the death of Attila, he renewed his alliance with the Visigoths of Gaul; and the sons of the elder Theodoric, who successively reigned over that warlike nation, were easily persuaded, by the sense of interest, to forget the cruel affront which Genseric had inflicted on their sister.⁹⁸ The death of the emperor Majorian delivered Theodoric the second from the restraint of fear, and perhaps of honour; he violated his recent treaty with the Romans; and the ample territory of Narbonne, which he firmly united to his dominions, became the immediate reward of his perfidy. The selfish policy of Ricimer encouraged him to invade the provinces which were in the possession of Ægidius, his rival; but the active count, by the defence of Arles and the victory of Orleans, saved Gaul, and checked, during his lifetime, the progress of the Visigoths. Their ambition was soon rekindled; and the design of extinguishing the Roman empire in Spain and Gaul was conceived, and almost completed, in the reign of Euric, who assassinated his brother Theodoric, and displayed, with a more savage temper, superior abilities both in peace and war. He passed the Pyrenees at the head of a numerous army, subdued the cities of Saragossa and Pampeluna, vanquished in battle the martial nobles of the Tarragonese province, carried his victorious arms into the heart of Lusitania, and permitted the Suevi to hold the kingdom of Galicia under the Gothic monarchy of Spain.⁹⁹ The efforts of Euric were not less vigorous or less successful in Gaul; and, throughout the country that extends from the Pyrenees to the Rhone and the Loire, Berry and Auvergne were the only cities, or dioceses, which refused to acknowledge him as their master.¹⁰⁰ In the defence of Clermont, their principal town, the inhabitants of Auvergne sustained with inflexible resolution the miseries of war, pestilence, and famine; and the Visigoths, relinquishing the fruitless siege, suspended the hopes of that important conquest. The youth of the province were animated by the heroic and almost incredible valour of Eccidius, the son of the emperor Avitus,¹⁰¹ who made a desperate sally with only eighteen horsemen, boldly attacked the Gothic army, and, after maintaining a flying skirmish, retired safe and victorious within the walls of Clermont. His charity was equal to his courage: in a time of extreme scarcity four thousand poor were fed at his expense, and his private influence levied an army of Burgundians for the deliverance of Auvergne. From *his* virtues alone the faithful citizens of Gaul derived any hopes of safety or freedom; and even such virtues were insufficient to avert the impending ruin of their country, since they were anxious to learn from his authority and example, whether they should prefer the alternative of exile or servitude.¹⁰² The public confidence was lost; the resources of the state were exhausted; and the Gauls had too much reason to believe that Anthemius, who reigned in Italy, was incapable of protecting his distressed subjects beyond the Alps. The feeble emperor could only procure for their defence the service of twelve thousand British auxiliaries. Riothamus, one of the independent kings, or chieftains, of the island, was persuaded to transport his troops to the continent of Gaul; he sailed up the Loire, and established his quarters in Berry, where the people complained of these oppressive allies, till they were

destroyed, or dispersed, by the arms of the Visigoths.[103](#)

One of the last acts of jurisdiction, which the Roman senate exercised over their subjects of Gaul, was the trial and condemnation of Arvandus the Prætorian prefect. Sidonius, who rejoices that he lived under a reign in which he might pity and assist a state criminal, has expressed with tenderness and freedom, the faults of his indiscreet and unfortunate friend.[104](#) From the perils which he had escaped, Arvandus imbibed confidence rather than wisdom; and such was the various, though uniform, imprudence of his behaviour that his prosperity must appear much more surprising than his downfall. The second prefecture, which he obtained within the term of five years, abolished the merit and popularity of his preceding administration. His easy temper was corrupted by flattery and exasperated by opposition; he was forced to satisfy his importunate creditors with the spoils of the province; his capricious insolence offended the nobles of Gaul, and he sunk under the weight of the public hatred. The mandate of his disgrace summoned him to justify his conduct before the senate; and he passed the sea of Tuscany with a favourable wind, the presage, as he vainly imagined, of his future fortunes. A decent respect was still observed for the *Præfectorian* rank; and, on his arrival at Rome, Arvandus was committed to the hospitality, rather than to the custody, of Flavius Asellus, the count of the sacred largesses, who resided in the Capitol.[105](#) He was eagerly pursued by his accusers, the four deputies of Gaul, who were all distinguished by their birth, their dignities, or their eloquence. In the name of a great province, and according to the forms of Roman jurisprudence, they instituted a civil and criminal action, requiring such a restitution as might compensate the losses of individuals, and such punishment as might satisfy the justice of the state. Their charges of corrupt oppression were numerous and weighty; but they placed their secret dependence on a letter, which they had intercepted, and which they could prove, by the evidence of his secretary, to have been dictated by Arvandus himself. The author of this letter seemed to dissuade the king of the Goths from a peace with the *Greek* emperor; he suggested the attack of the Britons on the Loire; and he recommended a division of Gaul, according to the law of nations, between the Visigoths and the Burgundians.[106](#) These pernicious schemes, which a friend could only palliate by the reproaches of vanity and indiscretion, were susceptible of a treasonable interpretation; and the deputies had artfully resolved not to produce their most formidable weapons till the decisive moment of the contest. But their intentions were discovered by the zeal of Sidonius. He immediately apprised the unsuspecting criminal of his danger; and sincerely lamented, without any mixture of anger, the haughty presumption of Arvandus, who rejected, and even resented, the salutary advice of his friends. Ignorant of his real situation, Arvandus shewed himself in the Capitol in the white robe of a candidate, accepted indiscriminate salutations and offers of service, examined the shops of the merchants, the silks and gems, sometimes with the indifference of a spectator, and sometimes with the attention of a purchaser; and complained of the times, of the senate, of the prince, and of the delays of justice. His complaints were soon removed. An early day was fixed for his trial; and Arvandus appeared, with his

accusers, before a numerous assembly of the Roman senate. The mournful garb which they affected excited the compassion of the judges, who were scandalised by the gay and splendid dress of their adversary; and, when the prefect Arvandus, with the first of the Gallic deputies, were directed to take their places on the senatorial benches, the same contrast of pride and modesty was observed in their behaviour. In this memorable judgment, which presented a lively image of the old republic, the Gauls exposed, with force and freedom, the grievances of the province; and, as soon as the minds of the audience were sufficiently inflamed, they recited the fatal epistle. The obstinacy of Arvandus was founded on the strange supposition that a subject could not be convicted of treason, unless he had actually conspired to assume the purple. As the paper was read, he repeatedly, and with a loud voice, acknowledged it for his genuine composition; and his astonishment was equal to his dismay, when the unanimous voice of the senate declared him guilty of a capital offence. By their decree, he was degraded from the rank of a prefect to the obscure condition of a plebeian, and ignominiously dragged by servile hands to the public prison. After a fortnight's adjournment, the senate was again convened to pronounce the sentence of his death; but, while he expected, in the island of Æsculapius, the expiration of the thirty days allowed by an ancient law to the vilest malefactors,[107](#) his friends interposed, the emperor Anthemius relented, and the prefect of Gaul obtained the milder punishment of exile and confiscation. The faults of Arvandus might deserve compassion; but the impunity of Seronatus accused the justice of the republic, till he was condemned, and executed, on the complaint of the people of Auvergne. That flagitious minister, the Catiline of his age and country, held a secret correspondence with the Visigoths, to betray the province which he oppressed; his industry was continually exercised in the discovery of new taxes and obsolete offences; and his extravagant vices would have inspired contempt, if they had not excited fear and abhorrence.[108](#)

Such criminals were not beyond the reach of justice; but whatever might be the guilt of Ricimer, that powerful Barbarian was able to contend or to negotiate with the prince whose alliance he had condescended to accept. The peaceful and prosperous reign which Anthemius had promised to the West was soon clouded by misfortune and discord. Ricimer, apprehensive, or impatient, of a superior, retired from Rome, and fixed his residence at Milan, an advantageous situation either to invite or to repel the warlike tribes that were seated between the Alps and the Danube.[109](#) Italy was gradually divided into two independent and hostile kingdoms; and the nobles of Liguria, who trembled at the near approach of a civil war, fell prostrate at the feet of the patrician, and conjured him to spare their unhappy country. "For my own part," replied Ricimer in a tone of insolent moderation, "I am still inclined to embrace the friendship of the Galatian;[110](#) but who will undertake to appease his anger, or to mitigate the pride which always rises in proportion to our submission?" They informed him that Epiphanius, bishop of Pavia,[111](#) united the wisdom of the serpent with the innocence of the dove; and appeared confident that the eloquence of such an

ambassador must prevail against the strongest opposition either of interest or passion. Their recommendation was approved; and Epiphanius, assuming the benevolent office of mediation, proceeded without delay to Rome, where he was received with the honours due to his merit and reputation. The oration of a bishop in favour of peace may be easily supposed: he argued, that in all possible circumstances the forgiveness of injuries must be an act of mercy, or magnanimity, or prudence; and he seriously admonished the emperor to avoid a contest with a fierce Barbarian, which might be fatal to himself, and must be ruinous to his dominions. Anthemius acknowledged the truth of his maxims; but he deeply felt, with grief and indignation, the behaviour of Ricimer, and his passion gave eloquence and energy to his discourse. "What favours," he warmly exclaimed, "have we refused to this ungrateful man? What provocations have we not endured? Regardless of the majesty of the purple, I gave my daughter to a Goth; I sacrificed my own blood to the safety of the republic. The liberality which ought to have secured the eternal attachment of Ricimer has exasperated him against his benefactor. What wars has he not excited against the empire? How often has he instigated and assisted the fury of hostile nations? Shall I now accept his perfidious friendship? Can I hope that *he* will respect the engagements of a treaty, who has already violated the duties of a son?" But the anger of Anthemius evaporated in these passionate exclamations; he insensibly yielded to the proposals of Epiphanius; and the bishop returned to his diocese with the satisfaction of restoring the peace of Italy, by a reconciliation,¹¹² of which the sincerity and continuance might be reasonably suspected. The clemency of the emperor was extorted from his weakness; and Ricimer suspended his ambitious designs, till he had secretly prepared the engines with which he resolved to subvert the throne of Anthemius. The mask of peace and moderation was then thrown aside. The army of Ricimer was fortified by a numerous reinforcement of Burgundians and Oriental Suevi; he disclaimed all allegiance to the Greek emperor, marched from Milan to the gates of Rome, and, fixing his camp on the banks of the Anio, impatiently expected the arrival of Olybrius, his Imperial candidate.

The senator Olybrius, of the Anician family, might esteem himself the lawful heir of the Western empire. He had married Placidia, the younger daughter of Valentinian, after she was restored by Genseric; who still detained her sister Eudoxia, as the wife, or rather as the captive, of his son. The king of the Vandals supported, by threats and solicitations, the fair pretensions of his Roman ally; and assigned, as one of the motives of the war, the refusal of the senate and people to acknowledge their lawful prince, and the unworthy preference which they had given to a stranger.¹¹³ The friendship of the public enemy might render Olybrius still more unpopular to the Italians; but, when Ricimer meditated the ruin of the emperor Anthemius, he tempted with the offer of a diadem the candidate who could justify his rebellion by an illustrious name and a royal alliance. The husband of Placidia, who, like most of his ancestors, had been invested with the consular dignity, might have continued to enjoy a secure and splendid fortune in the peaceful residence of Constantinople; nor does he appear to have been tormented by such a genius as cannot be amused or occupied

unless by the administration of an empire. Yet Olybrius yielded to the importunities of his friends, perhaps of his wife; rashly plunged into the dangers and calamities of a civil war; and, with the secret connivance of the emperor Leo, accepted the Italian purple, which was bestowed and resumed at the capricious will of a Barbarian. He landed without obstacle (for Genseric was master of the sea) either at Ravenna or the port of Ostia, and immediately proceeded to the camp of Ricimer, where he was received as the sovereign of the Western world.[114](#)

The patrician, who had extended his posts from the Anio to the Milvian bridge, already possessed two quarters of Rome, the Vatican and the Janiculum, which are separated by the Tiber from the rest of the city;[115](#) and it may be conjectured that an assembly of seceding senators imitated, in the choice of Olybrius, the forms of a legal election. But the body of the senate and people firmly adhered to the cause of Anthemius; and the more effectual support of a Gothic army enabled him to prolong his reign, and the public distress, by a resistance of three months, which produced the concomitant evils of famine and pestilence. At length Ricimer made a furious assault on the bridge of Hadrian, or St. Angelo; and the narrow pass was defended with equal valour by the Goths, till the death of Gilimer, their leader. The victorious troops, breaking down every barrier, rushed with irresistible violence into the heart of the city, and Rome (if we may use the language of a contemporary pope) was subverted by the civil fury of Anthemius and Ricimer.[116](#) The unfortunate Anthemius was dragged from his concealment and inhumanly massacred by the command of his son-in-law; who thus added a third, or perhaps a fourth, emperor to the number of his victims. The soldiers, who united the rage of factious citizens with the savage manners of Barbarians, were indulged, without control, in the licence of rapine and murder; the crowd of slaves and plebeians, who were unconcerned in the event, could only gain by the indiscriminate pillage; and the face of the city exhibited the strange contrast of stern cruelty and dissolute intemperance.[117](#) Forty days after this calamitous event, the subject not of glory but of guilt, Italy was delivered, by a painful disease, from the tyrant Ricimer, who bequeathed the command of his army to his nephew Gundobald, one of the princes of the Burgundians. In the same year, all the principal actors in this great revolution were removed from the stage; and the whole reign of Olybrius, whose death does not betray any symptoms of violence, is included within the term of seven months. He left one daughter, the offspring of his marriage with Placidia; and the family of the great Theodosius, transplanted from Spain to Constantinople, was propagated in the female line as far as the eighth generation.[118](#)

Whilst the vacant throne of Italy was abandoned to lawless Barbarians,[119](#) the election of a new colleague was seriously agitated in the council of Leo. The empress Verina, studious to promote the greatness of her own family, had married one of her nieces to Julius Nepos, who succeeded his uncle Marcellinus in the sovereignty of Dalmatia, a more solid possession than the title which he was persuaded to accept, of Emperor of

the West. But the measures of the Byzantine court were so languid and irresolute that many months elapsed after the death of Anthemius, and even of Olybrius, before their destined successor could shew himself, with a respectable force, to his Italian subjects. During that interval, Glycerius, an obscure soldier, was invested with the purple by his patron Gundobald; but the Burgundian prince was unable, or unwilling, to support his nomination by a civil war: the pursuits of domestic ambition recalled him beyond the Alps,[120](#) and his client was permitted to exchange the Roman sceptre for the bishopric of Salona. After extinguishing such a competitor, the emperor Nepos was acknowledged by the senate, by the Italians, and by the provincials of Gaul; his moral virtues and military talents were loudly celebrated; and those who derived any private benefit from his government announced, in prophetic strains, the restoration of the public felicity.[121](#) Their hopes (if such hopes had been entertained) were confounded within the term of a single year; and the treaty of peace, which ceded Auvergne to the Visigoths, is the only event of his short and inglorious reign. The most faithful subjects of Gaul were sacrificed by the Italian emperor to the hope of domestic security;[122](#) but his repose was soon invaded by a furious sedition of the Barbarian confederates, who, under the command of Orestes, their general, were in full march from Rome to Ravenna. Nepos trembled at their approach; and, instead of placing a just confidence in the strength of Ravenna, he hastily escaped to his ships, and retired to his Dalmatian principality, on the opposite coast of the Hadriatic. By this shameful abdication, he protracted his life about five years, in a very ambiguous state, between an emperor and an exile, till he was assassinated at Salona by the ungrateful Glycerius, who was translated, perhaps as the reward of his crime, to the archbishopric of Milan.[123](#)

The nations who had asserted their independence after the death of Attila were established, by the right of possession or conquest, in the boundless countries to the north of the Danube, or in the Roman provinces between the river and the Alps. But the bravest of their youth enlisted in the army of *confederates*, who formed the defence and the terror of Italy;[124](#) and in this promiscuous multitude, the names of the Heruli, the Scyri, the Alani, the Turcilingi, and the Rugians appear to have predominated. The example of these warriors was imitated by Orestes,[125](#) the son of Tatullus, and the father of the last Roman emperor of the West. Orestes, who has been already mentioned in this history, had never deserted his country. His birth and fortunes rendered him one of the most illustrious subjects of Pannonia. When that province was ceded to the Huns, he entered into the service of Attila, his lawful sovereign, obtained the office of his secretary, and was repeatedly sent ambassador to Constantinople, to represent the person, and signify the commands, of the imperious monarch. The death of that conqueror restored him to his freedom; and Orestes might honourably refuse either to follow the sons of Attila into the Scythian desert or to obey the Ostrogoths, who had usurped the dominion of Pannonia. He preferred the service of the Italian princes, the successors of Valentinian; and, as he possessed the qualifications of courage, industry, and experience, he advanced with rapid steps in the military

profession, till he was elevated, by the favour of Nepos himself, to the dignities of patrician and master-general of the troops. These troops had been long accustomed to reverence the character and authority of Orestes, who affected their manners, conversed with them in their own language, and was intimately connected with their national chieftains, by long habits of familiarity and friendship. At his solicitation they rose in arms against the obscure Greek, who presumed to claim their obedience; and, when Orestes, from some secret motive, declined the purple, they consented, with the same facility, to acknowledge his son Augustulus as the emperor of the West. By the abdication of Nepos, Orestes had now attained the summit of his ambitious hopes; but he soon discovered, before the end of the first year, that the lessons of perjury and ingratitude, which a rebel must inculcate, will be retorted against himself; and that the precarious sovereign of Italy was only permitted to choose whether he would be the slave or the victim of his Barbarian mercenaries. The dangerous alliance of these strangers had oppressed and insulted the last remains of Roman freedom and dignity. At each revolution, their pay and privileges were augmented; but their insolence increased in a still more extravagant degree; they envied the fortune of their brethren in Gaul, Spain, and Africa, whose victorious arms had acquired an independent and perpetual inheritance; and they insisted on their peremptory demand that a *third* part of the lands of Italy should be immediately divided among them. Orestes, with a spirit which, in another situation, might be entitled to our esteem, chose rather to encounter the rage of an armed multitude than to subscribe the ruin of an innocent people. He rejected the audacious demand; and his refusal was favourable to the ambition of Odoacer; a bold Barbarian, who assured his fellow-soldiers that, if they dared to associate under his command, they might soon extort the justice which had been denied to their dutiful petitions. From all the camps and garrisons of Italy, the confederates, actuated by the same resentment and the same hopes, impatiently flocked to the standard of this popular leader; and the unfortunate patrician, overwhelmed by the torrent, hastily retreated to the strong city of Pavia, the episcopal seat of the holy Epiphanius.[125a](#) Pavia was immediately besieged, the fortifications were stormed, the town was pillaged; and, although the bishop might labour, with much zeal and some success, to save the property of the church and the chastity of female captives, the tumult could only be appeased by the execution of Orestes.[126](#) His brother Paul was slain in an action near Ravenna; and the helpless Augustulus, who could no longer command the respect, was reduced to implore the clemency, of Odoacer.

That successful Barbarian was the son of Edecon: who, in some remarkable transactions, particularly described in a preceding chapter, had been the colleague of Orestes himself. The honour of an ambassador should be exempt from suspicion; and Edecon had listened to a conspiracy against the life of his sovereign. But this apparent guilt was expiated by his merit or repentance; his rank was eminent and conspicuous; he enjoyed the favour of Attila; and the troops under his command, who guarded in their turn the royal village, consisted in a tribe of Scyrri, his immediate and hereditary

subjects. In the revolt of the nations, they still adhered to the Huns; and, more than twelve years afterwards, the name of Edecon is honourably mentioned, in their unequal contest with the Ostrogoths; which was terminated, after two bloody battles, by the defeat and dispersion of the Scyrri.¹²⁷ Their gallant leader, who did not survive this national calamity, left two sons, Onulf and Odoacer, to struggle with adversity, and to maintain as they might, by rapine or service, the faithful followers of their exile. Onulf directed his steps towards Constantinople, where he sullied, by the assassination of a generous benefactor, the fame which he had acquired in arms. His brother Odoacer led a wandering life among the Barbarians of Noricum, with a mind and a fortune suited to the most desperate adventures; and, when he had fixed his choice, he piously visited the cell of Severinus, the popular saint of the country, to solicit his approbation and blessing. The lowness of the door would not admit the lofty stature of Odoacer: he was obliged to stoop: but in that humble attitude the saint could discern the symptoms of his future greatness; and, addressing him in a prophetic tone, “Pursue” (said he) “your design; proceed to Italy; you will soon cast away this coarse garment of skins; and your wealth will be adequate to the liberality of your mind.”¹²⁸ The Barbarian, whose daring spirit accepted and ratified the prediction, was admitted into the service of the Western empire, and soon obtained an honourable rank in the guards. His manners were gradually polished, his military skill was improved, and the confederates of Italy would not have elected him for their general, unless the exploits of Odoacer had established a high opinion of his courage and capacity.¹²⁹ Their military acclamations saluted him with the title of King; but he abstained, during his whole reign, from the use of the purple and diadem,¹³⁰ lest he should offend those princes whose subjects, by their accidental mixture, had formed the victorious army which time and policy might insensibly unite into a great nation.

Royalty was familiar to the Barbarians, and the submissive people of Italy was prepared to obey, without a murmur, the authority which he should condescend to exercise as the viceroy of the emperor of the West. But Odoacer had resolved to abolish that useless and expensive office; and such is the weight of antique prejudice that it required some boldness and penetration to discover the extreme facility of the enterprise. The unfortunate Augustulus was made the instrument of his own disgrace; he signified his resignation to the senate; and that assembly, in their last act of obedience to a Roman prince, still affected the spirit of freedom and the forms of the constitution. An epistle was addressed, by their unanimous decree, to the emperor Zeno, the son-in-law and successor of Leo; who had lately been restored, after a short rebellion, to the Byzantine throne. They solemnly “disclaim the necessity, or even the wish, of continuing any longer the Imperial succession in Italy; since, in their opinion, the majesty of a sole monarch is sufficient to pervade and protect, at the same time, both the East and the West. In their own name, and in the name of the people, they consent that the seat of universal empire shall be transferred from Rome to Constantinople; and they basely renounce the right of choosing their master, the only vestige that yet remained of the authority which had given laws to the world. The

republic (they repeat that name without a blush) might safely confide in the civil and military virtues of Odoacer; and they humbly request that the emperor would invest him with the title of Patrician and the administration of the *diocese* of Italy.” The deputies of the senate were received at Constantinople with some marks of displeasure and indignation; and, when they were admitted to the audience of Zeno, he sternly reproached them with their treatment of the two emperors, Anthemius and Nepos, whom the East had successively granted to the prayers of Italy. “The first” (continued he) “you have murdered; the second you have expelled; but the second is still alive, and whilst he lives he is your lawful sovereign.” But the prudent Zeno soon deserted the hopeless cause of his abdicated colleague. His vanity was gratified by the title of sole emperor and by the statues erected to his honour in the several quarters of Rome; he entertained a friendly, though ambiguous, correspondence with the *patrician* Odoacer; and he gratefully accepted the Imperial ensigns, the sacred ornaments of the throne and palace, which the Barbarian was not unwilling to remove from the sight of the people.[131](#)

In the space of twenty years since the death of Valentinian, nine emperors had successively disappeared; and the son of Orestes, a youth recommended only by his beauty, would be the least entitled to the notice of posterity, if his reign, which was marked by the extinction of the Roman empire in the West, did not leave a memorable era in the history of mankind.[132](#) The patrician Orestes had married the daughter of count *Romulus*, of Petovio, in Noricum; the name of *Augustus*, notwithstanding the jealousy of power, was known at Aquileia as a familiar surname; and the appellations of the two great founders, of the city and of the monarchy, were thus strangely united in the last of their successors.[133](#) The son of Orestes assumed and disgraced the names of Romulus Augustus; but the first was corrupted into Momyllus, by the Greeks, and the second has been changed by the Latins into the contemptible diminutive Augustulus. The life of this inoffensive youth was spared by the generous clemency of Odoacer; who dismissed him, with his whole family, from the Imperial palace, fixed his annual allowance at six thousand pieces of gold, and assigned the castle of Lucullus, in Campania, for the place of his exile or retirement.[134](#) As soon as the Romans breathed from the toils of the Punic war, they were attracted by the beauties and the pleasures of Campania; and the country house of the elder Scipio at Liternum exhibited a lasting model of their rustic simplicity.[135](#) The delicious shores of the bay of Naples were crowded with villas; and Sylla applauded the masterly skill of his rival, who had seated himself on the lofty promontory of Misenum, that commands, on every side, the sea and land, as far as the boundaries of the horizon.[136](#) The villa of Marius was purchased, within a few years, by Lucullus, and the price had increased from two thousand five hundred to more than fourscore thousand pounds sterling.[137](#) It was adorned by the new proprietor with Grecian arts, and Asiatic treasures; and the houses and gardens of Lucullus obtained a distinguished rank in the list of Imperial palaces.[138](#) When the Vandals became formidable to the sea-coast, the Lucullan villa,

on the promontory of Misenum, gradually assumed the strength and appellation of a strong castle, the obscure retreat of the last emperor of the West. About twenty years after that great revolution it was converted into a church and monastery, to receive the bones of St. Severinus. They securely reposed, amidst the broken trophies of Cimbric and Armenian victories, till the beginning of the tenth century; when the fortifications, which might afford a dangerous shelter to the Saracens, were demolished by the people of Naples.[139](#)

Odoacer was the first Barbarian who reigned in Italy, over a people who had once asserted their just superiority above the rest of mankind. The disgrace of the Romans still excites our respectful compassion, and we fondly sympathise with the imaginary grief and indignation of their degenerate posterity. But the calamities of Italy had gradually subdued the proud consciousness of freedom and glory. In the age of Roman virtue, the provinces were subject to the arms, and the citizens to the laws, of the republic; till those laws were subverted by civil discord, and both the city and the provinces became the servile property of a tyrant. The forms of the constitution, which alleviated or disguised their abject slavery, were abolished by time and violence; the Italians alternately lamented the presence or the absence of the sovereigns, whom they detested or despised; and the succession of five centuries inflicted the various evils of military licence, capricious despotism, and elaborate oppression. During the same period, the Barbarians had emerged from obscurity and contempt, and the warriors of Germany and Scythia were introduced into the provinces, as the servants, the allies, and at length the masters of the Romans, whom they insulted or protected. The hatred of the people was suppressed by fear; they respected the spirit and splendour of the martial chiefs who were invested with the honours of the empire; and the fate of Rome had long depended on the sword of those formidable strangers. The stern Ricimer, who trampled on the ruins of Italy, had exercised the power, without assuming the title, of a king; and the patient Romans were insensibly prepared to acknowledge the royalty of Odoacer and his Barbaric successors.

The King of Italy was not unworthy of the high station to which his valour and fortune had exalted him; his savage manners were polished by the habits of conversation; and he respected, though a conqueror and a Barbarian, the institutions, and even the prejudices, of his subjects. After an interval of seven years, Odoacer restored the consulship of the West. For himself, he modestly, or proudly, declined an honour which was still accepted by the emperors of the East; but the curule chair was successively filled by eleven of the most illustrious senators;[140](#) and the list is adorned by the respectable name of Basilius, whose virtues claimed the friendship and grateful applause of Sidonius, his client.[141](#) The laws of the emperors were strictly enforced, and the civil administration of Italy was still exercised by the Prætorian prefect and his subordinate officers. Odoacer devolved on the Roman magistrates the odious and oppressive task of collecting the public revenue; but he reserved for himself the merit

of seasonable and popular indulgence.¹⁴² Like the rest of the Barbarians, he had been instructed in the Arian heresy; but he revered the monastic and episcopal characters; and the silence of the Catholics attests the toleration which they enjoyed. The peace of the city required the interposition of his prefect Basilius in the choice of a woman pontiff; the decree which restrained the clergy from alienating the lands was ultimately designed for the benefit of the people, whose devotion would have been taxed to repair the dilapidations of the church.¹⁴³ Italy was protected by the arms of its conqueror; and its frontiers were respected by the Barbarians of Gaul and Germany, who had so long insulted the feeble race of Theodosius. Odoacer passed the Hadriatic, to chastise the assassins of the emperor Nepos, and to acquire the maritime province of Dalmatia. He passed the Alps, to rescue the remains of Noricum from Fava, or Feletheus, king of the Rugians, who held his residence beyond the Danube. The king was vanquished in battle, and led away prisoner; a numerous colony of captives and subjects was transplanted into Italy; and Rome, after a long period of defeat and disgrace, might claim the triumph of her Barbarian master.¹⁴⁴

Notwithstanding the prudence and success of Odoacer, his kingdom exhibited the sad prospect of misery and desolation. Since the age of Tiberius, the decay of agriculture had been felt in Italy; and it was a subject of complaint that the life of the Roman people depended on the accidents of the winds and waves.¹⁴⁵ In the division and the decline of the empire, the tributary harvests of Egypt and Africa were withdrawn; the numbers of the inhabitants continually diminished with the means of subsistence; and the country was exhausted by the irretrievable losses of war, famine,¹⁴⁶ and pestilence. St. Ambrose has deplored the ruin of a populous district, which had been once adorned with the flourishing cities of Bologna, Modena, Regium, and Placentia.¹⁴⁷ Pope Gelasius was a subject of Odoacer, and he affirms, with strong exaggeration, that in Æmilia, Tuscany, and the adjacent provinces, the human species was almost extirpated.¹⁴⁸ The plebeians of Rome, who were fed by the hand of their master, perished or disappeared, as soon as his liberality was suppressed; the decline of the arts reduced the industrious mechanic to idleness and want; and the senators, who might support with patience the ruin of their country, bewailed their private loss of wealth and luxury. One third of those ample estates, to which the ruin of Italy is originally imputed,¹⁴⁹ was extorted for the use of the conquerors. Injuries were aggravated by insults; the sense of actual sufferings was embittered by the fear of more dreadful evils; and, as new lands were allotted to new swarms of Barbarians, each senator was apprehensive lest the arbitrary surveyors should approach his favourite villa or his most profitable farm. The least unfortunate were those who submitted without a murmur to the power which it was impossible to resist. Since they desired to live, they owed some gratitude to the tyrant who had spared their lives; and, since he was the absolute master of their fortunes, the portion which he left must be accepted as his pure and voluntary gift.¹⁵⁰ The distress of Italy was mitigated by the prudence and humanity of Odoacer, who had bound himself, as the price of his elevation, to satisfy

the demands of a licentious and turbulent multitude. The kings of the Barbarians were frequently resisted, deposed, or murdered by their *native* subjects; and the various bands of Italian mercenaries, who associated under the standard of an elective general, claimed a larger privilege of freedom and rapine. A monarchy destitute of national union, and hereditary right, hastened to its dissolution. After a reign of fourteen years, Odoacer was oppressed by the superior genius of Theodoric, king of the Ostrogoths, a hero alike excellent in the arts of war and of government, who restored an age of peace and prosperity, and whose name still excites and deserves the attention of mankind.

CHAPTER XXXVII

Origin, Progress, and Effects of the Monastic Life — Conversion of the Barbarians to Christianity and Arianism — Prosecution of the Vandals in Africa — Extinction of Arianism among the Barbarians

The indissoluble connection of civil and ecclesiastical affairs has compelled and encouraged me to relate the progress, the persecutions, the establishment, the divisions, the final triumph, and the gradual corruption of Christianity. I have purposely delayed the consideration of two religious events, interesting in the study of human nature, and important in the decline and fall of the Roman empire: I. The institution of the monastic life;¹ and, II. The conversion of the Northern Barbarians.

I. Prosperity and peace introduced the distinction of the *vulgar* and the *Ascetic Christians*.² The loose and imperfect practice of religion satisfied the conscience of the multitude. The prince or magistrate, the soldier or merchant, reconciled their fervent zeal, and implicit faith, with the exercise of their profession, the pursuit of their interest, and the indulgence of their passions; but the Ascetics, who obeyed and abused the rigid precepts of the gospel, were inspired by the savage enthusiasm which represents man as a criminal and God as a tyrant. They seriously renounced the business, and the pleasures, of the age; abjured the use of wine, of flesh, and of marriage; chastised their body, mortified their affections, and embraced a life of misery, as the price of eternal happiness. In the reign of Constantine, the Ascetics fled from a profane and degenerate world, to perpetual solitude, or religious society. Like the first Christians of Jerusalem,³ they resigned the use, or the property, of their temporal possessions; established regular communities of the same sex, and a similar disposition; and assumed the names of *Hermits*, *Monks*, and *Anachorets*, expressive of their lonely retreat in a natural or artificial desert. They soon acquired the respect of the world, which they despised; and the loudest applause was bestowed on this Divine Philosophy,⁴ which surpassed, without the aid of science or reason, the laborious virtues of the Grecian schools. The monks might indeed contend with the Stoics in the

contempt of fortune, of pain, and of death; the Pythagorean silence and submission were revived in their servile discipline; and they disdained, as firmly as the Cynics themselves, all the forms and decencies of civil society. But the votaries of this Divine Philosophy aspired to imitate a purer and more perfect model. They trod in the footsteps of the prophets, who had retired to the desert;⁵ and they restored the devout and contemplative life, which had been instituted by the Essenians, in Palestine and Egypt. The philosophic eye of Pliny had surveyed with astonishment a solitary people, who dwelt among the palmtrees near the Dead Sea; who subsisted without money, who were propagated without women; and who derived from the disgust and repentance of mankind a perpetual supply of voluntary associates.⁶

Egypt, the fruitful parent of superstition, afforded the first example of the monastic life. Antony,⁷ an illiterate⁸ youth of the lower parts of Thebais, distributed his patrimony,⁹ deserted his family and native home, and executed his monastic penance with original and intrepid fanaticism. After a long and painful novitiate among the tombs and in a ruined tower, he boldly advanced into the desert three days' journey to the eastward of the Nile; discovered a lonely spot, which possessed the advantages of shade and water; and fixed his last residence on Mount Colzim near the Red Sea, where an ancient monastery still preserves the name and memory of the saint.¹⁰ The curious devotion of the Christians pursued him to the desert; and, when he was obliged to appear at Alexandria, in the face of mankind, he supported his fame with discretion and dignity. He enjoyed the friendship of Athanasius, whose doctrine he approved; and the Egyptian peasant respectfully declined a respectful invitation from the emperor Constantine. The venerable patriarch (for Antony attained the age of one hundred and five years) beheld the numerous progeny which had been formed by his example and his lessons. The prolific colonies of monks multiplied with rapid increase on the sands of Libya, upon the rocks of Thebais, and in the cities of the Nile. To the south of Alexandria, the mountain, and adjacent desert, of Nitria were peopled by 5000 anachorets; and the traveller may still investigate the ruins of fifty monasteries, which were planted in that barren soil by the disciples of Antony.¹¹ In the Upper Thebais, the vacant Island of Tabenne¹² was occupied by Pachomius, and fourteen hundred of his brethren. That holy abbot successively founded nine monasteries of men, and one of women; and the festival of Easter sometimes collected fifty thousand religious persons, who followed his angelic rule of discipline.¹³ The stately and populous city of Oxyrinchus, the seat of Christian orthodoxy, had devoted the temples, the public edifices, and even the ramparts, to pious and charitable uses; and the bishop, who might preach in twelve churches, computed ten thousand females, and twenty thousand males, of the monastic profession.¹⁴ The Egyptians, who gloried in this marvellous revolution, were disposed to hope, and to believe, that the number of the monks was equal to the remainder of the people;¹⁵ and posterity might repeat the saying, which had formerly been applied to the sacred animals of the same country, That, in Egypt, it was less difficult to find a god than a man.

Athanasius introduced into Rome the knowledge and practice of the monastic life; and a school of this new philosophy was opened by the disciples of Antony, who accompanied their primate to the holy threshold of the Vatican. The strange and savage appearance of these Egyptians excited, at first, horror and contempt, and at length applause and zealous imitation. The senators, and more especially the matrons, transformed their palaces and villas into religious houses; and the narrow institution of six Vestals was eclipsed by the frequent monasteries, which were seated on the ruins of ancient temples, and in the midst of the Roman Forum.¹⁶ Inflamed by the example of Antony, a Syrian youth, whose name was Hilarion,¹⁷ fixed his dreary abode on a sandy beach, between the sea and a morass, about seven miles from Gaza. The austere penance, in which he persisted forty-eight years, diffused a similar enthusiasm; and the holy man was followed by a train of two or three thousand anachorets, whenever he visited the innumerable monasteries of Palestine. The fame of Basil¹⁸ is immortal in the monastic history of the East. With a mind that had tasted the learning and eloquence of Athens, with an ambition scarcely to be satisfied by the archbishopric of Cæsarea, Basil retired to a savage solitude in Pontus; and deigned, for a while, to give laws to the spiritual colonies which he profusely scattered along the coast of the Black Sea. In the West, Martin of Tours,¹⁹ a soldier, an hermit, a bishop, and a saint, established the monasteries of Gaul; two thousand of his disciples followed him to the grave; and his eloquent historian challenges the deserts of Thebais to produce, in a more favourable climate, a champion of equal virtue. The progress of the monks was not less rapid or universal than that of Christianity itself. Every province, and at last every city, of the empire was filled with their increasing multitudes; and the bleak and barren isles, from Lerins to Lipari, that arise out of the Tuscan sea, were chosen by the anachorets, for the place of their voluntary exile. An easy and perpetual intercourse by sea and land connected the provinces of the Roman world; and the life of Hilarion displays the facility with which an indigent hermit of Palestine might traverse Egypt, embark for Sicily, escape to Epirus, and finally settle in the island of Cyprus.²⁰ The Latin Christians embraced the religious institutions of Rome. The pilgrims, who visited Jerusalem, eagerly copied, in the most distant climates of the earth, the faithful model of the monastic life. The disciples of Antony spread themselves beyond the tropic, over the Christian empire of Ethiopia.²¹ The monastery of Banchor,²² in Flintshire, which contained above two thousand brethren, dispersed a numerous colony among the Barbarians of Ireland;²³ and Iona, one of the Hebrides, which was planted by the Irish monks, diffused over the Northern regions a doubtful ray of science and superstition.²⁴

These unhappy exiles from social life were impelled by the dark and implacable genius of superstition. Their mutual resolution was supported by the example of millions, of either sex, of every age, and of every rank; and each proselyte, who entered the gates of a monastery, was persuaded that he trod the steep and thorny path

of eternal happiness.²⁵ But the operation of these religious motives was variously determined by the temper and situation of mankind. Reason might subdue, or passion might suspend, their influence; but they acted most forcibly on the infirm minds of children and females; they were strengthened by secret remorse or accidental misfortune; and they might derive some aid from the temporal considerations of vanity or interest. It was naturally supposed that the pious and humble monks, who had renounced the world to accomplish the work of their salvation, were the best qualified for the spiritual government of the Christians. The reluctant hermit was torn from his cell, and seated, amidst the acclamations of the people, on the episcopal throne; the monasteries of Egypt, of Gaul, and of the East supplied a regular succession of saints and bishops; and ambition soon discovered the secret road which led to the possession of wealth and honours.²⁶ The popular monks, whose reputation was connected with the fame and success of the order, assiduously laboured to multiply the number of their fellow-captives. They insinuated themselves into noble and opulent families; and the specious arts of flattery and seduction were employed to secure those proselytes who might bestow wealth or dignity on the monastic profession. The indignant father bewailed the loss, perhaps, of an only son;²⁷ the credulous maid was betrayed by vanity to violate the laws of nature; and the matron aspired to imaginary perfection, by renouncing the virtues of domestic life. Paula yielded to the persuasive eloquence of Jerom;²⁸ and the profane title of mother-in-law of God²⁹ tempted that illustrious widow to consecrate the virginity of her daughter Eustochium. By the advice, and in the company, of her spiritual guide, Paula abandoned Rome and her infant son; retired to the holy village of Bethlem; founded an hospital and four monasteries; and acquired, by her alms and penance, an eminent and conspicuous station in the Catholic church. Such rare and illustrious penitents were celebrated as the glory and example of their age; but the monasteries were filled by a crowd of obscure and abject plebeians,³⁰ who gained in the cloister much more than they had sacrificed in the world. Peasants, slaves, and mechanics might escape from poverty and contempt to a safe and honourable profession, whose apparent hardships are mitigated by custom, by popular applause, and by the secret relaxation of discipline.³¹ The subjects of Rome, whose persons and fortunes were made responsible for unequal and exorbitant tributes, retired from the oppression of the Imperial government; and the pusillanimous youth preferred the penance of a monastic, to the dangers of a military, life. The affrighted provincials, of every rank, who fled before the Barbarians, found shelter and subsistence; whole legions were buried in these religious sanctuaries; and the same cause, which relieved the distress of individuals, impaired the strength and fortitude of the empire.³²

The monastic profession of the ancients³³ was an act of voluntary devotion. The inconstant fanatic was threatened with the eternal vengeance of the God whom he deserted; but the doors of the monastery were still open for repentance. Those monks, whose conscience was fortified by reason or passion, were at liberty to resume the

character of men and citizens; and even the spouses of Christ might accept the legal embraces of an earthly lover.[34](#) The examples of scandal and the progress of superstition suggested the propriety of more forcible restraints. After a sufficient trial, the fidelity of the novice was secured by a solemn and perpetual vow; and his irrevocable engagement was ratified by the laws of the church and state. A guilty fugitive was pursued, arrested, and restored to his perpetual prison; and the interposition of the magistrate oppressed the freedom and merit which had alleviated, in some degree, the abject slavery of the monastic discipline.[35](#) The actions of a monk, his words and even his thoughts, were determined by an inflexible rule,[36](#) or a capricious superior; the slightest offences were corrected by disgrace or confinement, extraordinary fasts or bloody flagellation; and disobedience, murmur, or delay were ranked in the catalogue of the most heinous sins.[37](#) A blind submission to the commands of the abbot, however absurd, or even criminal, they might seem, was the ruling principle, the first virtue of the Egyptian monks; and their patience was frequently exercised by the most extravagant trials. They were directed to remove an enormous rock; assiduously to water a barren staff, that was planted in the ground, till, at the end of three years, it should vegetate and blossom like a tree; to walk into a fiery furnace; or to cast their infant into a deep pond: and several saints, or madmen, have been immortalised in monastic story by their thoughtless and fearless obedience.[38](#) The freedom of the mind, the source of every generous and rational sentiment, was destroyed by the habits of credulity and submission; and the monk, contracting the vices of a slave, devoutly followed the faith and passions of his ecclesiastical tyrant. The peace of the Eastern church was invaded by a swarm of fanatics, incapable of fear, or reason, or humanity; and the Imperial troops acknowledged, without shame, that they were much less apprehensive of an encounter with the fiercest Barbarians.[39](#)

Superstition has often framed and consecrated the fantastic garments of the monks;[40](#) but their apparent singularity sometimes proceeds from their uniform attachment to a simple and primitive model, which the revolutions of fashion have made ridiculous in the eyes of mankind. The father of the Benedictines expressly disclaims all idea of choice or merit, and soberly exhorts his disciples to adopt the coarse and convenient dress of the countries which they may inhabit.[41](#) The monastic habits of the ancients varied with the climate and their mode of life; and they assumed, with the same indifference, the sheepskin of the Egyptian peasants or the cloak of the Grecian philosophers. They allowed themselves the use of linen in Egypt, where it was a cheap and domestic manufacture; but in the West they rejected such an expensive article of foreign luxury.[42](#) It was the practice of the monks either to cut or shave their hair;[43](#) they wrapped their heads in a cowl, to escape the sight of profane objects; their legs and feet were naked, except in the extreme cold of winter; and their slow and feeble steps were supported by a long staff. The aspect of a genuine anchoress was horrid and disgusting; every sensation that is offensive to man was thought acceptable to God; and the angelic rule of Tabenne condemned the salutary custom of bathing the limbs in

water and of anointing them with oil.[44](#) The austere monks slept on the ground, on a hard mat or a rough blanket, and the same bundle of palm-leaves served them as a seat in the day and a pillow in the night. Their original cells were low narrow huts, built of the slightest materials; which formed, by the regular distribution of the streets, a large and populous village, enclosing within the common wall a church, an hospital, perhaps a library, some necessary offices, a garden, and a fountain or reservoir of fresh water. Thirty or forty brethren composed a family of separate discipline and diet; and the great monasteries of Egypt consisted of thirty or forty families.

Pleasure and guilt are synonymous terms in the language of the monks; and they had discovered, by experience, that rigid fasts and abstemious diet are the most effectual preservatives against the impure desires of the flesh.[45](#) The rules of abstinence, which they imposed, or practised, were not uniform or perpetual: the cheerful festival of the Pentecost was balanced by the extraordinary mortification of Lent; the fervour of new monasteries was insensibly relaxed; and the voracious appetite of the Gauls could not imitate the patient and temperate virtue of the Egyptians.[46](#) The disciples of Antony and Pachomius were satisfied with their daily pittance[47](#) of twelve ounces of bread, or rather biscuit,[48](#) which they divided into two frugal repasts, of the afternoon and of the evening. It was esteemed a merit, and almost a duty, to abstain from the boiled vegetables which were provided for the refectory; but the extraordinary bounty of the abbot sometimes indulged them with the luxury of cheese, fruit, salad, and the small dried fish of the Nile.[49](#) A more ample latitude of sea and river fish was gradually allowed or assumed; but the use of flesh was long confined to the sick or travellers; and, when it gradually prevailed in the less rigid monasteries of Europe, a singular distinction was introduced; as if birds, whether wild or domestic, had been less profane than the grosser animals of the field. Water was the pure and innocent beverage of the primitive monks; and the founder of the Benedictines regrets the daily portion of half a pint of wine, which had been extorted from him by the intemperance of the age.[50](#) Such an allowance might be easily supplied by the vineyards of Italy; and his victorious disciples, who passed the Alps, the Rhine, and the Baltic, required, in the place of wine, an adequate compensation of strong beer or cyder.

The candidate who aspired to the virtue of evangelical poverty abjured, at his first entrance into a regular community, the idea, and even the name, of all separate or exclusive possession.[51](#) The brethren were supported by their manual labour; and the duty of labour was strenuously recommended as a penance, as an exercise, and as the most laudable means of securing their daily sustenance.[52](#) The garden and fields, which the industry of the monks had often rescued from the forest or the morass, were diligently cultivated by their hands. They performed, without reluctance, the menial offices of slaves and domestics; and the several trades that were necessary to provide their habits, their utensils, and their lodging were exercised within the precincts of the great monasteries. The monastic studies have tended, for the most part, to darken,

rather than to dispel, the cloud of superstition. Yet the curiosity or zeal of some learned solitaries has cultivated the ecclesiastical, and even the profane, sciences; and posterity must gratefully acknowledge that the monuments of Greek and Roman literature have been preserved and multiplied by their indefatigable pens.⁵³ But the more humble industry of the monks, especially in Egypt, was contented with the silent, sedentary occupation of making wooden sandals or of twisting the leaves of the palm-trees into mats and baskets. The superfluous stock, which was not consumed in domestic use, supplied, by trade, the wants of the community; the boats of Tabenne, and the other monasteries of Thebais, descended the Nile as far as Alexandria; and, in a Christian market, the sanctity of the workmen might enhance the intrinsic value of the work.

But the necessity of manual labour was insensibly superseded. The novice was tempted to bestow his fortune on the saints, in whose society he was resolved to spend the remainder of his life; and the pernicious indulgence of the laws permitted him to receive, for their use, any future accessions of legacy or inheritance.⁵⁴ Melania contributed her plate, three hundred pounds weight of silver, and Paula contracted an immense debt, for the relief of their favourite monks; who kindly imparted the merits of their prayers and penance to a rich and liberal sinner.⁵⁵ Time continually increased, and accidents could seldom diminish, the estates of the popular monasteries, which spread over the adjacent country and cities; and, in the first century of their institution, the infidel Zosimus has maliciously observed that, for the benefit of the poor, the Christian monks had reduced a great part of mankind to a state of beggary.⁵⁶ As long as they maintained their original fervour, they approved themselves, however, the faithful and benevolent stewards of the charity which was entrusted to their care. But their discipline was corrupted by prosperity: they gradually assumed the pride of wealth, and at last indulged the luxury of expense. Their public luxury might be excused by the magnificence of religious worship and the decent motive of erecting durable habitations for an immortal society. But every age of the church has accused the licentiousness of the degenerate monks; who no longer remembered the object of their institution, embraced the vain and sensual pleasures of the world which they had renounced,⁵⁷ and scandalously abused the riches which had been acquired by the austere virtues of their founders.⁵⁸ Their natural descent from such painful and dangerous virtue to the common vices of humanity will not, perhaps, excite much grief or indignation in the mind of a philosopher.

The lives of the primitive monks were consumed in penance and solitude, undisturbed by the various occupations which fill the time, and exercise the faculties, of reasonable, active, and social beings. Whenever they were permitted to step beyond the precincts of the monastery, two jealous companions were the mutual guards and spies of each other's actions; and, after their return, they were condemned to forget, or, at least, to suppress, whatever they had seen or heard in the world. Strangers, who

professed the orthodox faith, were hospitably entertained in a separate apartment; but their dangerous conversation was restricted to some chosen elders of approved discretion and fidelity. Except in their presence, the monastic slave might not receive the visits of his friends or kindred; and it was deemed highly meritorious if he afflicted a tender sister or an aged parent by the obstinate refusal of a word or look.[59](#) The monks themselves passed their lives, without personal attachments, among a crowd, which had been formed by accident and was detained, in the same prison, by force or prejudice. Recluse fanatics have few ideas or sentiments to communicate; a special licence of the abbot regulated the time and duration of their familiar visits; and, at their silent meals, they were enveloped in their cowls, inaccessible, and almost invisible, to each other.[60](#) Study is the resource of solitude; but education had not prepared and qualified for any liberal studies the mechanics and peasants, who filled the monastic communities. They might work; but the vanity of spiritual perfection was tempted to disdain the exercise of manual labour, and the industry must be faint and languid which is not excited by the sense of personal interest.

According to their faith and zeal, they might employ the day, which they passed in their cells, either in vocal or mental prayer; they assembled in the evening, and they were awakened in the night, for the public worship of the monastery. The precise moment was determined by the stars, which are seldom clouded in the serene sky of Egypt; and a rustic horn or trumpet, the signal of devotion, twice interrupted the vast silence of the desert.[61](#) Even sleep, the last refuge of the unhappy, was rigorously measured; the vacant hours of the monk heavily rolled along, without business or pleasure; and, before the close of each day, he had repeatedly accused the tedious progress of the Sun.[62](#) In this comfortless state, superstition still pursued and tormented her wretched votaries.[63](#) The repose which they had sought in the cloister was disturbed by tardy repentance, profane doubts, and guilty desires; and, while they considered each natural impulse as an unpardonable sin, they perpetually trembled on the edge of a flaming and bottomless abyss. From the painful struggles of disease and despair these unhappy victims were sometimes relieved by madness or death; and, in the sixth century, an hospital was founded at Jerusalem for a small portion of the austere penitents, who were deprived of their senses.[64](#) Their visions, before they attained this extreme and acknowledged term of frenzy, have afforded ample materials of supernatural history. It was their firm persuasion that the air which they breathed was peopled with invisible enemies; with innumerable demons, who watched every occasion, and assumed every form, to terrify, and above all to tempt, their unguarded virtue. The imagination, and even the senses, were deceived by the illusions of distempered fanaticism; and the hermit, whose midnight prayer was oppressed by involuntary slumber, might easily confound the phantoms of horror or delight which had occupied his sleeping and his waking dreams.[65](#)

The monks were divided into two classes: the *Cænobites*, who lived under a common

and regular discipline; and the *Anachorets*, who indulged their unsocial, independent fanaticism.⁶⁶ The most devout, or the most ambitious, of the spiritual brethren renounced the convent, as they had renounced the world. The fervent monasteries of Egypt, Palestine, and Syria were surrounded by a *Laura*,⁶⁷ a distant circle of solitary cells; and the extravagant penance of the Hermits was stimulated by applause and emulation.⁶⁸ They sunk under the painful weight of crosses and chains; and their emaciated limbs were confined by collars, bracelets, gauntlets, and greaves, of massy and rigid iron. All superfluous incumbrance of dress they contemptuously cast away; and some savage saints of both sexes have been admired, whose naked bodies were only covered by their long hair. They aspired to reduce themselves to the rude and miserable state in which the human brute is scarcely distinguished above his kindred animals; and a numerous sect of Anachorets derived their name from their humble practice of grazing in the fields of Mesopotamia with the common herd.⁶⁹ They often usurped the den of some wild beast whom they affected to resemble; they buried themselves in some gloomy cavern which art or nature had scooped out of the rock; and the marble quarries of Thebais are still inscribed with the monuments of their penance.⁷⁰ The most perfect hermits are supposed to have passed many days without food, many nights without sleep, and many years without speaking; and glorious was the *man* (I abuse that name) who contrived any cell, or seat, of a peculiar construction, which might expose him, in the most inconvenient posture, to the inclemency of the seasons.

Among these heroes of the monastic life, the name and genius of Simeon Stylites⁷¹ have been immortalised by the singular invention of an aerial penance. At the age of thirteen, the young Syrian deserted the profession of a shepherd and threw himself into an austere monastery. After a long and painful novitiate, in which Simeon was repeatedly saved from pious suicide, he established his residence on a mountain about thirty or forty miles to the east of Antioch. Within the space of a *mandra*, or circle of stones, to which he had attached himself by a ponderous chain, he ascended a column, which was successively raised from the height of nine, to that of sixty, feet from the ground.⁷² In this last and lofty station, the Syrian Anachoret resisted the heat of thirty summers, and the cold of as many winters. Habit and exercise instructed him to maintain his dangerous situation without fear or giddiness, and successively to assume the different postures of devotion. He sometimes prayed in an erect attitude with his outstretched arms in the figure of a cross; but his most familiar practice was that of bending his meagre skeleton from the forehead to the feet; and a curious spectator, after numbering twelve hundred and forty-four repetitions, at length desisted from the endless account. The progress of an ulcer in his thigh⁷³ might shorten, but it could not disturb, this *celestial* life; and the patient Hermit expired without descending from his column. A prince who should capriciously inflict such tortures would be deemed a tyrant; but it would surpass the power of a tyrant to impose a long and miserable existence on the reluctant victims of his cruelty. This voluntary martyrdom must have

gradually destroyed the sensibility both of the mind and body; nor can it be presumed that the fanatics, who torment themselves, are susceptible of any lively affection for the rest of mankind. A cruel unfeeling temper has distinguished the monks of every age and country: their stern indifference, which is seldom mollified by personal friendship, is inflamed by religious hatred; and their merciless zeal has strenuously administered the holy office of the Inquisition.

The monastic saints, who excite only the contempt and pity of a philosopher, were respected, and almost adored, by the prince and people. Successive crowds of pilgrims from Gaul and India saluted the divine pillar of Simeon; the tribes of Saracens disputed in arms the honour of his benediction; the queens of Arabia and Persia gratefully confessed his supernatural virtue; and the angelic Hermit was consulted by the younger Theodosius, in the most important concerns of the church and state. His remains were transported from the mountain of Telenissa, by a solemn procession of the patriarch, the master-general of the East, six bishops, twenty-one counts or tribunes, and six thousand soldiers; and Antioch revered his bones, as her glorious ornament and impregnable defence. The fame of the apostles and martyrs was gradually eclipsed by these recent and popular Anachorets; the Christian world fell prostrate before their shrines; and the miracles ascribed to their relics exceeded, at least in number and duration, the spiritual exploits of their lives. But the golden legend of their lives⁷⁴ was embellished by the artful credulity of their interested brethren; and a believing age was easily persuaded that the slightest caprice of an Egyptian or a Syrian monk had been sufficient to interrupt the eternal laws of the universe. The favourites of Heaven were accustomed to cure inveterate diseases with a touch, a word, or a distant message; and to expel the most obstinate demons from the souls, or bodies, which they possessed. They familiarly accosted, or imperiously commanded, the lions and serpents of the desert; infused vegetation into a sapless trunk; suspended iron on the surface of the water; passed the Nile on the back of a crocodile, and refreshed themselves in a fiery furnace. These extravagant tales, which display the fiction, without the genius, of poetry, have seriously affected the reason, the faith, and the morals of the Christians. Their credulity debased and vitiated the faculties of the mind; they corrupted the evidence of history; and superstition gradually extinguished the hostile light of philosophy and science. Every mode of religious worship which had been practised by the saints, every mysterious doctrine which they believed, was fortified by the sanction of divine revelation, and all the manly virtues were oppressed by the servile and pusillanimous reign of the monks. If it be possible to measure the interval between the philosophic writings of Cicero and the sacred legend of Theodoret, between the character of Cato and that of Simeon, we may appreciate the memorable revolution which was accomplished in the Roman empire within a period of five hundred years.

II. The progress of Christianity has been marked by two glorious and decisive victories: over the learned and luxurious citizens of the Roman empire; and over the

warlike Barbarians of Scythia and Germany, who subverted the empire, and embraced the religion, of the Romans. The Goths were the foremost of these savage proselytes; and the nation was indebted for its conversion to a countryman, or, at least, to a subject, worthy to be ranked among the inventors of useful arts, who have deserved the remembrance and gratitude of posterity. A great number of Roman provincials had been led away into captivity by the Gothic bands who ravaged Asia in the time of Gallienus; and of these captives, many were Christians, and several belonged to the ecclesiastical order. Those involuntary missionaries, dispersed as slaves in the villages of Dacia, successively laboured for the salvation of their masters. The seeds, which they planted, of the evangelic doctrine, were gradually propagated; and before the end of a century, the pious work was achieved by the labours of Ulphilas, whose ancestors had been transported beyond the Danube from a small town of Cappadocia.

Ulphilas, the bishop and apostle of the Goths,[75](#) acquired their love and reverence by his blameless life and indefatigable zeal; and they received, with implicit confidence, the doctrines of truth and virtue which he preached and practised. He executed the arduous task of translating the Scriptures into their native tongue, a dialect of the German or Teutonic language; but he prudently suppressed the four books of Kings, as they might tend to irritate the fierce and sanguinary spirit of the Barbarians. The rude, imperfect idiom of soldiers and shepherds, so ill-qualified to communicate any spiritual ideas, was improved and modulated by his genius; and Ulphilas, before he could frame his version, was obliged to compose a new alphabet of twenty-four letters; four of which he invented, to express the peculiar sounds that were unknown to the Greek, and Latin, pronunciation.[76](#) But the prosperous state of the Gothic church was soon afflicted by war and intestine discord, and the chieftains were divided by religion as well as by interest. Fritigern, the friend of the Romans, became the proselyte of Ulphilas; while the haughty soul of Athanaric disdained the yoke of the empire, and of the Gospel. The faith of the new converts was tried by the persecution which he excited. A waggon, bearing aloft the shapeless image of Thor, perhaps, or of Woden, was conducted in solemn procession through the streets of the camp; and the rebels, who refused to worship the God of their fathers, were immediately burned, with their tents and families. The character of Ulphilas recommended him to the esteem of the Eastern court, where he twice appeared as the minister of peace; he pleaded the cause of the distressed Goths, who implored the protection of Valens; and the name of *Moses* was applied to this spiritual guide, who conducted his people, through the deep waters of the Danube, to the Land of Promise.[77](#) The devout shepherds, who were attached to his person and tractable to his voice, acquiesced in their settlement, at the foot of the Mæsan mountains, in a country of woodlands and pastures, which supported their flocks and herds and enabled them to purchase the corn and wine of the more plentiful provinces. These harmless Barbarians multiplied in obscure peace and the profession of Christianity.[78](#)

Their fiercer brethren, the formidable Visigoths, universally adopted the religion of the Romans, with whom they maintained a perpetual intercourse, of war, of friendship, or of conquest. In their long and victorious march from the Danube to the Atlantic Ocean, they converted their allies; they educated the rising generation; and the devotion which reigned in the camp of Alaric, or the court of Toulouse, might edify, or disgrace, the palaces of Rome and Constantinople.⁷⁹ During the same period, Christianity was embraced by almost all the Barbarians, who established their kingdoms on the ruins of the Western empire; the Burgundians in Gaul, the Suevi in Spain, the Vandals in Africa, the Ostrogoths in Pannonia, and the various bands of mercenaries that raised Odoacer to the throne of Italy. The Franks and the Saxons still persevered in the errors of Paganism; but the Franks obtained the monarchy of Gaul by their submission to the example of Clovis; and the Saxon conquerors of Britain were reclaimed from their savage superstition by the missionaries of Rome. These Barbarian proselytes displayed an ardent and successful zeal in the propagation of the faith. The Merovingian kings, and their successors, Charlemagne and the Othos, extended, by their laws and victories, the dominion of the cross. England produced the apostle of Germany; and the evangelic light was gradually diffused from the neighbourhood of the Rhine to the nations of the Elbe, the Vistula, and the Baltic.⁸⁰

The different motives which influenced the reason, or the passions, of the Barbarian converts cannot easily be ascertained. They were often capricious and accidental; a dream, an omen, the report of a miracle, the example of some priest or hero, the charms of a believing wife, and, above all, the fortunate event of a prayer or vow which, in a moment of danger, they had addressed to the God of the Christians.⁸¹ The early prejudices of education were insensibly erased by the habits of frequent and familiar society; the moral precepts of the Gospel were protected by the extravagant virtues of the monks; and a spiritual theology was supported by the visible power of relics and the pomp of religious worship. But the rational and ingenious mode of persuasion which a Saxon bishop⁸² suggested to a popular saint might sometimes be employed by the missionaries who laboured for the conversion of infidels. “Admit,” says the sagacious disputant, “whatever they are pleased to assert of the fabulous, and carnal, genealogy of their gods and goddesses, who are propagated from each other. From this principle deduce their imperfect nature, and human infirmities, the assurance they were *born*, and the probability that they will *die*. At what time, by what means, from what cause, were the eldest of the gods or goddesses produced? Do they still continue, or have they ceased, to propagate? If they have ceased, summon your antagonists to declare the reason of this strange alteration. If they still continue, the number of the gods must become infinite; and shall we not risk, by the indiscreet worship of some impotent deity, to excite the resentment of his jealous superior? The visible heavens and earth, the whole system of the universe, which may be conceived by the mind, is it created or eternal? If created, how, or where, could the gods themselves exist before the creation? If eternal, how could they assume the empire of an independent and pre-existing world? Urge these arguments with temper and

moderation; insinuate, at seasonable intervals, the truth, and beauty, of the Christian revelation; and endeavour to make the unbelievers ashamed, without making them angry.” This metaphysical reasoning, too refined perhaps for the Barbarians of Germany, was fortified by the grosser weight of authority and popular consent. The advantage of temporal prosperity had deserted the Pagan cause, and passed over to the service of Christianity. The Romans themselves, the most powerful and enlightened nation of the globe, had renounced their ancient superstition; and, if the ruin of their empire seemed to accuse the efficacy of the new faith, the disgrace was already retrieved by the conversion of the victorious Goths. The valiant and fortunate Barbarians, who subdued the provinces of the West, successively received, and reflected, the same edifying example. Before the age of Charlemagne, the Christian nations of Europe might exult in the exclusive possession of the temperate climates, of the fertile lands, which produced corn, wine, and oil, while the savage idolaters, and their helpless idols, were confined to the extremities of the earth, the dark and frozen regions of the North.[83](#)

Christianity, which opened the gates of Heaven to the Barbarians, introduced an important change in their moral and political condition. They received, at the same time, the use of letters, so essential to a religion whose doctrines are contained in a sacred book, and, while they studied the divine truth, their minds were insensibly enlarged by the distant view of history, of nature, of the arts, and of society. The version of the Scriptures into their native tongue, which had facilitated their conversion, must excite, among their clergy, some curiosity to read the original text, to understand the sacred liturgy of the church, and to examine, in the writings of the fathers, the chain of ecclesiastical tradition. These spiritual gifts were preserved in the Greek and Latin languages, which concealed the inestimable monuments of ancient learning. The immortal productions of Virgil, Cicero, and Livy, which were accessible to the Christian Barbarians, maintained a silent intercourse between the reign of Augustus and the times of Clovis and Charlemagne. The emulation of mankind was encouraged by the remembrance of a more perfect state; and the flame of science was secretly kept alive, to warm and enlighten the mature age of the Western world. In the most corrupt state of Christianity, the Barbarians might learn justice from the law, and mercy from the gospel; and, if the knowledge of their duty was insufficient to guide their actions or to regulate their passions, they were sometimes restrained by conscience, and frequently punished by remorse. But the direct authority of religion was less effectual than the holy communion which united them with their Christian brethren in spiritual friendship. The influence of these sentiments contributed to secure their fidelity in the service, or the alliance, of the Romans, to alleviate the horrors of war, to moderate the insolence of conquest, and to preserve, in the downfall of the empire, a permanent respect for the name and institutions of Rome. In the days of Paganism, the priests of Gaul and Germany reigned over the people, and controlled the jurisdiction of the magistrates; and the zealous proselytes transferred an equal, or more ample, measure of devout obedience to the pontiffs of the Christian faith. The sacred

character of the bishops was supported by their temporal possessions; they obtained an honourable seat in the legislative assemblies of soldiers and freemen; and it was their interest, as well as their duty, to mollify, by peaceful counsels, the fierce spirit of the Barbarians. The perpetual correspondence of the Latin clergy, the frequent pilgrimages to Rome and Jerusalem, and the growing authority of the popes, cemented the union of the Christian republic; and gradually produced the similar manners, and common jurisprudence, which have distinguished, from the rest of mankind, the independent, and even hostile, nations of modern Europe.

But the operation of these causes was checked and retarded by the unfortunate accident which infused a deadly poison into the cup of Salvation. Whatever might be the early sentiments of Ulphilas, his connections with the empire and the church were formed during the reign of Arianism. The apostle of the Goths subscribed the creed of Rimini; professed with freedom, and perhaps with sincerity, that the Son was not equal or consubstantial to the Father;[84](#) communicated these errors to the clergy and people; and infected the Barbaric world with an heresy[85](#) which the great Theodosius proscribed and extinguished among the Romans. The temper and understanding of the new proselytes were not adapted to metaphysical subtleties; but they strenuously maintained what they had piously received, as the pure and genuine doctrines of Christianity. The advantage of preaching and expounding the Scriptures in the Teutonic language promoted the apostolic labours of Ulphilas and his successors; and they ordained a competent number of bishops and presbyters, for the instruction of the kindred tribes. The Ostrogoths, the Burgundians, the Suevi, and the Vandals, who had listened to the eloquence of the Latin clergy,[86](#) preferred the more intelligible lessons of their domestic teachers; and Arianism was adopted as the national faith of the warlike converts who were seated on the ruins of the Western empire. This irreconcilable difference of religion was a perpetual source of jealousy and hatred; and the reproach of *Barbarian* was embittered by the more odious epithet of *Heretic*. The heroes of the North, who had submitted, with some reluctance, to believe that all their ancestors were in hell,[87](#) were astonished and exasperated to learn that they themselves had only changed the mode of their eternal condemnation. Instead of the smooth applause which Christian kings are accustomed to expect from their loyal prelates, the orthodox bishops and their clergy were in a state of opposition to the Arian courts; and their indiscreet opposition frequently became criminal, and might sometimes be dangerous.[88](#) The pulpit, that safe and sacred organ of sedition, resounded with the names of Pharaoh and Holofernes;[89](#) the public discontent was inflamed by the hope or promise of a glorious deliverance; and the seditious saints were tempted to promote the accomplishment of their own predictions. Notwithstanding these provocations, the Catholics of Gaul, Spain, and Italy enjoyed, under the reign of the Arians, the free and peaceful exercise of their religion. Their haughty masters respected the zeal of a numerous people, resolved to die at the foot of their altars; and the example of their devout constancy was admired and imitated by

the Barbarians themselves. The conquerors evaded, however, the disgraceful reproach, or confession, of fear, by attributing their toleration to the liberal motives of reason and humanity; and, while they affected the language, they imperceptibly imbibed the spirit, of genuine Christianity.

The peace of the church was sometimes interrupted. The Catholics were indiscreet, the Barbarians were impatient; and the partial acts of severity or injustice which had been recommended by the Arian clergy were exaggerated by the orthodox writers. The guilt of persecution may be imputed to Euric, king of the Visigoths; who suspended the exercise of ecclesiastical, or, at least, of episcopal, functions, and punished the popular bishops of Aquitain with imprisonment, exile, and confiscation.⁹⁰ But the cruel and absurd enterprise of subduing the minds of a whole people was undertaken by the Vandals alone. Genseric himself, in his early youth, had renounced the orthodox communion; and the apostate could neither grant nor expect a sincere forgiveness. He was exasperated to find that the Africans who had fled before him in the field still presumed to dispute his will in synods and churches; and his ferocious mind was incapable of fear or of compassion. His Catholic subjects were oppressed by intolerant laws and arbitrary punishments. The language of Genseric was furious and formidable; the knowledge of his intentions might justify the most unfavourable interpretations of his actions; and the Arians were reproached with the frequent executions which stained the palace and the dominions of the tyrant.⁹¹ Arms and ambition were, however, the ruling passions of the monarch of the sea. But Hunneric, his inglorious son, who seemed to inherit only his vices, tormented the Catholics with the same unrelenting fury which had been fatal to his brother, his nephews, and the friends and favourites of his father, and, even to the Arian patriarch, who was inhumanly burnt alive in the midst of Carthage. The religious war was preceded and prepared by an insidious truce; persecution was made the serious and important business of the Vandal court; and the loathsome disease, which hastened the death of Hunneric, revenged the injuries, without contributing to the deliverance, of the church. The throne of Africa was successively filled by the two nephews of Hunneric; by Gundamund, who reigned about twelve, and by Thrasimund, who governed the nation above twenty-seven, years. Their administration was hostile and oppressive to the orthodox party. Gundamund appeared to emulate, or even to surpass, the cruelty of his uncle; and, if at length he relented, if he recalled the bishops and restored the freedom of Athanasian worship, a premature death intercepted the benefits of his tardy clemency. His brother, Thrasimund, was the greatest and most accomplished of the Vandal kings, whom he excelled in beauty, prudence, and magnanimity of soul. But this magnanimous character was degraded by his intolerant zeal and deceitful clemency. Instead of threats and tortures, he employed the gentle but efficacious powers of seduction. Wealth, dignity, and the royal favour were the liberal rewards of apostacy; the Catholics, who had violated the laws, might purchase their pardon by the renunciation of their faith; and, whenever Thrasimund meditated any rigorous measure, he patiently waited till the indiscretion of his adversaries furnished him with a specious

opportunity. Bigotry was his last sentiment in the hour of death; and he exacted from his successor a solemn oath that he would never tolerate the sectaries of Athanasius. But his successor, Hilderic, the gentle son of the savage Hunneric, preferred the duties of humanity and justice to the vain obligation of an impious oath; and his accession was gloriously marked by the restoration of peace and universal freedom. The throne of that virtuous, though feeble, monarch was usurped by his cousin Gelimer, a zealous Arian; but the Vandal kingdom, before he could enjoy or abuse his power, was subverted by the arms of Belisarius; and the orthodox party retaliated the injuries which they had endured.[92](#)

The passionate declamations of the Catholics, the sole historians of this persecution, cannot afford any distinct series of causes and events, any impartial view of characters or counsels; but the most remarkable circumstances, that deserve either credit or notice, may be referred to the following heads: I. In the original law, which is still extant,[93](#) Hunneric expressly declares, and the declaration appears to be correct, that he had faithfully transcribed the regulations and penalties of the Imperial edicts, against the heretical congregations, the clergy, and the people, who dissented from the established religion. If the rights of conscience had been understood, the Catholics must have condemned their past conduct, or acquiesced in their actual sufferings. But they still persisted to refuse the indulgence which they claimed. While they trembled under the lash of persecution, they praised the *laudable* severity of Hunneric himself, who burnt or banished great numbers of Manichæans:[94](#) and they rejected, with horror, the ignominious compromise that the disciples of Arius and of Athanasius should enjoy a reciprocal and similar toleration in the territories of the Romans and in those of the Vandals.[95](#) II. The practice of a conference, which the Catholics had so frequently used to insult and punish their obstinate antagonists, was retorted against themselves.[96](#) At the command of Hunneric, four hundred and sixty-six orthodox bishops assembled at Carthage; but, when they were admitted into the hall of audience, they had the mortification of beholding the Arian Cyrila exalted on the patriarchal throne. The disputants were separated, after the mutual and ordinary reproaches of noise and silence, of delay and precipitation, of military force and of popular clamour. One martyr and one confessor were selected among the Catholic bishops; twenty-eight escaped by flight, and eighty-eight by conformity, forty-six were sent into Corsica to cut timber for the royal navy; and three hundred and two were banished to the different parts of Africa, exposed to the insults of their enemies, and carefully deprived of all the temporal and spiritual comforts of life.[97](#) The hardships of ten years' exile must have reduced their numbers; and, if they had complied with the law of Thrasimund, which prohibited any episcopal consecrations, the orthodox church of Africa must have expired with the lives of its actual members. They disobeyed; and their disobedience was punished by a second exile of two hundred and twenty bishops into Sardinia; where they languished fifteen years, till the accession of the gracious Hilderic.[98](#) The two islands were judiciously chosen by the malice of their Arian

tyrants. Seneca, from his own experience, has deplored and exaggerated the miserable state of Corsica,[99](#) and the plenty of Sardinia was over-balanced by the unwholesome quality of the air.[100](#) III. The zeal of Genseric and his successors for the conversion of the Catholics must have rendered them still more jealous to guard the purity of the Vandal faith. Before the churches were finally shut, it was a crime to appear in a Barbarian dress; and those who presumed to neglect the royal mandate were rudely dragged backwards by their long hair.[101](#) The Palatine officers who refused to profess the religion of their prince were ignominiously stripped of their honours and employments; banished to Sardinia and Sicily; or condemned to the servile labours of slaves and peasants in the field of Utica. In the districts which had been peculiarly allotted to the Vandals, the exercise of the Catholic worship was more strictly prohibited: and severe penalties were denounced against the guilt both of the missionary and the proselyte. By these arts, the faith of the Barbarians was preserved, and their zeal was inflamed; they discharged, with devout fury, the office of spies informers, or executioners; and, whenever their cavalry took the field, it was the favourite amusement of the march to defile the churches and to insult the clergy of the adverse faction.[102](#) IV. The citizens who had been educated in the luxury of the Roman province were delivered, with exquisite cruelty, to the Moors of the desert. A venerable train of bishops, presbyters, and deacons, with a faithful crowd of four thousand and ninety-six persons, whose guilt is not precisely ascertained, were torn from their native homes, by the command of Hunneric. During the night, they were confined, like a herd of cattle, amidst their own ordure; during the day, they pursued their march over the burning sands; and, if they fainted under the heat and fatigue, they were goaded or dragged along, till they expired in the hands of their tormentors.[103](#) These unhappy exiles, when they reached the Moorish huts, might excite the compassion of a people, whose native humanity was neither improved by reason nor corrupted by fanaticism; but, if they escaped the dangers, they were condemned to share the distress, of a savage life. V. It is incumbent on the authors of persecution previously to reflect, whether they are determined to support it in the last extreme. They excite the flame which they strive to extinguish; and it soon becomes necessary to chastise the contumacy, as well as the crime, of the offender. The fine, which he is unable or unwilling to discharge, exposes his person to the severity of the law; and his contempt of lighter penalties suggests the use and propriety of capital punishment. Through the veil of fiction and declamation, we may clearly perceive that the Catholics, more especially under the reign of Hunneric, endured the most cruel and ignominious treatment.[104](#) Respectable citizens, noble matrons, and consecrated virgins were stripped naked, and raised in the air by pulleys, with a weight suspended at their feet. In this painful attitude their naked bodies were torn with scourges, or burnt in the most tender parts with red-hot plates of iron. The amputation of the ears, the nose, the tongue, and the right hand was inflicted by the Arians; and, although the precise number cannot be defined, it is evident that many persons, among whom a bishop[105](#) and a proconsul[106](#) may be named, were entitled to the crown of

martyrdom. The same honour has been ascribed to the memory of Count Sebastian, who professed the Nicene creed with unshaken constancy; and Genseric might detest, as an heretic, the brave and ambitious fugitive whom he dreaded as a rival.[107](#) VI. A new mode of conversion, which might subdue the feeble, and alarm the timorous, was employed by the Arian ministers. They imposed, by fraud or violence, the rites of baptism; and punished the apostacy of the Catholics, if they disclaimed this odious and profane ceremony, which scandalously violated the freedom of the will and the unity of the sacrament.[108](#) The hostile sects had formerly allowed the validity of each other's baptism; and the innovation, so fiercely maintained by the Vandals, can be imputed only to the example and advice of the Donatists. VII. The Arian clergy surpassed, in religious cruelty, the king and his Vandals; but they were incapable of cultivating the spiritual vineyard which they were so desirous to possess. A patriarch[109](#) might seat himself on the throne of Carthage; some bishops, in the principal cities, might usurp the place of their rivals; but the smallness of their numbers and their ignorance of the Latin language[110](#) disqualified the Barbarians for the ecclesiastical ministry of a great church; and the Africans, after the loss of their orthodox pastors, were deprived of the public exercise of Christianity. VIII. The emperors were the natural protectors of the Homoousian doctrine; and the faithful people of Africa, both as Romans and as Catholics, preferred their lawful sovereignty to the usurpation of the Barbarous heretics. During an interval of peace and friendship, Hunneric restored the cathedral of Carthage, at the intercession of Zeno, who reigned in the East, and of Placidia, the daughter and relict of emperors, and the sister of the queen of the Vandals.[111](#) But this decent regard was of short duration; and the haughty tyrant displayed his contempt for the religion of the Empire by studiously arranging the bloody images of persecution in all the principal streets through which the Roman ambassador must pass in his way to the palace.[112](#) An oath was required from the bishops, who were assembled at Carthage, that they would support the succession of his son Hilderic, and that they would renounce all foreign or *transmarine* correspondence. This engagement, consistent as it should seem with their moral and religious duties, was refused by the more sagacious members[113](#) of the assembly. Their refusal, faintly coloured by the pretence that it is unlawful for a Christian to swear, must provoke the suspicions of a jealous tyrant.

The Catholics, oppressed by royal and military force, were far superior to their adversaries in numbers and learning. With the same weapons which the Greek[114](#) and Latin fathers had already provided for the Arian controversy, they repeatedly silenced, or vanquished, the fierce and illiterate successors of Ulphilas. The consciousness of their own superiority might have raised them above the arts and passions of religious warfare. Yet, instead of assuming such honourable pride, the orthodox theologians were tempted, by the assurance of impunity, to compose fictions, which must be stigmatised with the epithets of fraud and forgery. They ascribed their own polemical works to the most venerable names of Christian antiquity; the characters of Athanasius

and Augustin were awkwardly personated by Vigilius and his disciples;[115](#) and the famous creed which so clearly expounds the mysteries of the Trinity and the Incarnation is deduced, with strong probability, from this African school.[116](#) Even the scriptures themselves were profaned by their rash and sacrilegious hands. The memorable text which asserts the unity of the Three who bear witness in heaven[117](#) is condemned by the universal silence of the orthodox fathers, ancient versions, and authentic manuscripts.[118](#) It was first alleged by the Catholic bishops whom Hunneric summoned to the conference of Carthage.[119](#) An allegorical interpretation, in the form, perhaps, of a marginal note, invaded the text of the Latin Bibles, which were renewed and corrected in a dark period of ten centuries.[120](#) After the invention of printing,[121](#) the editors of the Greek Testament yielded to their own prejudices, or those of the times;[122](#) and the pious fraud, which was embraced with equal zeal at Rome and at Geneva, has been infinitely multiplied in every country and every language of modern Europe.

The example of fraud must excite suspicion; and the specious miracles by which the African Catholics have defended the truth and justice of their cause may be ascribed, with more reason, to their own industry than to the visible protection of Heaven. Yet the historian, who views this religious conflict with an impartial eye, may condescend to mention *one* preternatural event which will edify the devout and surprise the incredulous. Tipasa,[123](#) a maritime colony of Mauritania, sixteen miles to the east of Cæsarea, had been distinguished, in every age, by the orthodox zeal of its inhabitants. They had braved the fury of the Donatists;[124](#) they resisted, or eluded, the tyranny of the Arians. The town was deserted on the approach of an heretical bishop: most of the inhabitants who could procure ships passed over to the coast of Spain; and the unhappy remnant, refusing all communion with the usurper, still presumed to hold their pious, but illegal, assemblies. Their disobedience exasperated the cruelty of Hunneric. A military count was despatched from Carthage to Tipasa; he collected the Catholics in the Forum, and, in the presence of the whole province, deprived the guilty of their right hands and their tongues. But the holy confessors continued to speak without tongues; and this miracle is attested by Victor, an African bishop, who published an history of the persecution within two years after the event.[125](#) “If any one,” says Victor, “should doubt of the truth, let him repair to Constantinople, and listen to the clear and perfect language of Restitutus, the subdeacon, one of these glorious sufferers, who is now lodged in the palace of the emperor Zeno, and is respected by the devout empress.” At Constantinople we are astonished to find a cool, a learned, an unexceptionable witness, without interest, and without passion. Æneas of Gaza, a Platonic philosopher, has accurately described his own observations on these African sufferers. “I saw them myself: I heard them speak: I diligently enquired by what means such an articulate voice could be formed without any organ of speech: I used my eyes to examine the report of my ears: I opened their mouth, and saw that the whole tongue had been completely torn away by the roots, an operation which the

physicians generally suppose to be mortal.”[126](#) The testimony of Æneas of Gaza might be confirmed by the superfluous evidence of the emperor Justinian, in a perpetual edict; of Count Marcellinus, in his Chronicle of the times; and of Pope Gregory I., who had resided at Constantinople, as the minister of the Roman pontiff.[127](#) They all lived within the compass of a century; and they all appeal to their personal knowledge, or the public notoriety, for the truth of a miracle which was repeated in several instances, displayed on the greatest theatre of the world, and submitted, during a series of years, to the calm examination of the senses. This supernatural gift of the African confessors, who spoke without tongues, will command the assent of those, and of those only, who already believe that their language was pure and orthodox. But the stubborn mind of an infidel is guarded by secret incurable suspicion; and the Arian, or Socinian, who has seriously rejected the doctrine of the Trinity, will not be shaken by the most plausible evidence of an Athanasian miracle.

The Vandals and the Ostrogoths persevered in the profession of Arianism till the final ruin of the kingdoms which they had founded in Africa and Italy. The Barbarians of Gaul submitted to the orthodox dominion of the Franks; and Spain was restored to the Catholic church by the voluntary conversion of the Visigoths.

This salutary revolution[128](#) was hastened by the example of a royal martyr, whom our calmer reason may style an ungrateful rebel. Leovigild, the Gothic monarch of Spain, deserved the respect of his enemies, and the love of his subjects: the Catholics enjoyed a free toleration, and his Arian synods attempted, without much success, to reconcile their scruples by abolishing the unpopular rite of a *second* baptism. His eldest son Hermenegild, who was invested by his father with the royal diadem, and the fair principality of Bætica, contracted an honourable and orthodox alliance with a Merovingian princess, the daughter of Sigibert, king of Austrasia, and of the famous Brunehild. The beautiful Ingundis, who was no more than thirteen years of age, was received, beloved, and persecuted in the Arian court of Toledo; and her religious constancy was alternately assaulted with blandishments and violence by Goisvintha, the Gothic queen, who abused the double claim of maternal authority.[129](#) Incensed by her resistance, Goisvintha seized the Catholic princess by her long hair, inhumanly dashed her against the ground, kicked her till she was covered with blood, and at last gave orders that she should be stripped, and thrown into a basin, or fish-pond.[130](#) Love and honour might excite Hermenegild to resent this injurious treatment of his bride; and he was gradually persuaded that Ingundis suffered for the cause of divine truth. Her tender complaints and the weighty arguments of Leander, archbishop of Seville, accomplished his conversion; and the heir of the Gothic monarchy was initiated in the Nicene faith by the solemn rite of confirmation.[131](#) The rash youth, inflamed by zeal, and perhaps by ambition, was tempted to violate the duties of a son, and a subject; and the Catholics of Spain, although they could not complain of persecution, applauded his pious rebellion against an heretical father. The civil war

was protracted by the long and obstinate sieges of Merida, Cordova, and Seville, which had strenuously espoused the party of Hermenegild. He invited the orthodox Barbarians, the Suevi, and the Franks, to the destruction of his native land; he solicited the dangerous aid of the Romans, who possessed Africa and a part of the Spanish coast; and his holy ambassador, the archbishop Leander, effectually negotiated in person with the Byzantine court. But the hopes of the Catholics were crushed by the active diligence of a monarch who commanded the troops and treasures of Spain; and the guilty Hermenegild, after his vain attempts to resist or to escape, was compelled to surrender himself into the hands of an incensed father. Leovigild was still mindful of that sacred character; and the rebel, despoiled of the regal ornaments, was still permitted, in a decent exile, to profess the Catholic religion. His repeated and unsuccessful treasons at length provoked the indignation of the Gothic king; and the sentence of death, which he pronounced with apparent reluctance, was privately executed in the tower of Seville.^{[132](#)} The inflexible constancy with which he refused to accept the Arian communion, as the price of his safety, may excuse the honours that have been paid to the memory of St. Hermenegild. His wife and infant son were detained by the Romans in ignominious captivity; and this domestic misfortune tarnished the glories of Leovigild, and embittered the last moments of his life.

His son and successor, Recared, the first Catholic king of Spain, had imbibed the faith of his unfortunate brother, which he supported with more prudence and success. Instead of revolting against his father, Recared patiently expected the hour of his death. Instead of condemning his memory, he piously supposed that the dying monarch had abjured the errors of Arianism and recommended to his son the conversion of the Gothic nation. To accomplish that salutary end, Recared convened an assembly of the Arian clergy and nobles, declared himself a Catholic, and exhorted them to imitate the example of their prince. The laborious interpretation of doubtful texts, or the curious pursuit of metaphysical arguments, would have excited an endless controversy; and the monarch discreetly proposed to his illiterate audience two substantial and visible arguments, the testimony of Earth and of Heaven. The *Earth* had submitted to the Nicene synod: the Romans, the Barbarians, and the inhabitants of Spain unanimously professed the same orthodox creed; and the Visigoths resisted, almost alone, the consent of the Christian world. A superstitious age was prepared to reverence, as the testimony of *Heaven*, the preternatural cures, which were performed by the skill or virtue of the Catholic clergy; the baptismal fonts of Osset in Bætica,^{[133](#)} which were spontaneously replenished each year on the vigil of Easter;^{[134](#)} and the miraculous shrine of St. Martin of Tours, which had already converted the Suevic prince and people of Gallicia.^{[135](#)} The Catholic king encountered some difficulties on this important change of the national religion. A conspiracy, secretly fomented by the queen-dowager, was formed against his life; and two counts excited a dangerous revolt in the Narbonnese Gaul. But Recared disarmed the conspirators, defeated the rebels, and executed severe justice; which the Arians, in their turn, might brand with the reproach of persecution. Eight bishops, whose names betray their Barbaric origin,

abjured their errors; and all the books of Arian theology were reduced to ashes, with the house in which they had been purposely collected. The whole body of the Visigoths and Suevi were allured or driven into the pale of the Catholic communion; the faith, at least of the rising generation, was fervent and sincere; and the devout liberality of the Barbarians enriched the churches and monasteries of Spain. Seventy bishops, assembled in the council of Toledo, received the submission of their conquerors; and the zeal of the Spaniards improved the Nicene creed, by declaring the procession of the Holy Ghost from the Son, as well as from the Father: a weighty point of doctrine, which produced, long afterwards, the schism of the Greek and Latin Churches.[136](#) The royal proselyte immediately saluted and consulted Pope Gregory, surnamed the Great, a learned and holy prelate, whose reign was distinguished by the conversion of heretics and infidels. The ambassadors of Recared respectfully offered on the threshold of the Vatican his rich presents of gold and gems; they accepted, as a lucrative exchange, the hairs of St. John the Baptist, a cross which enclosed a small piece of the true wood, and a key that contained some particles of iron which had been scraped from the chains of St. Peter.[137](#)

The same Gregory, the spiritual conqueror of Britain, encouraged the pious Theodelinda, queen of the Lombards, to propagate the Nicene faith among the victorious savages, whose recent Christianity was polluted by the Arian heresy. Her devout labours still left room for the industry and success of future missionaries; and many cities of Italy were still disputed by hostile bishops. But the cause of Arianism was gradually suppressed by the weight of truth, of interest, and of example; and the controversy, which Egypt had derived from the Platonic school, was terminated, after a war of three hundred years, by the final conversion of the Lombards of Italy.[138](#)

The first missionaries who preached the gospel to the Barbarians appealed to the evidence of reason, and claimed the benefit of toleration.[139](#) But no sooner had they established their spiritual dominion than they exhorted the Christian kings to extirpate, without mercy, the remains of Roman or Barbaric superstition. The successors of Clovis inflicted one hundred lashes on the peasants who refused to destroy their idols; the crime of sacrificing to the demons was punished by the Anglo-Saxon laws with the heavier penalties of imprisonment and confiscation; and even the wise Alfred adopted, as an indispensable duty, the extreme rigour of the Mosaic institutions.[140](#) But the punishment, and the crime, were gradually abolished among a Christian people; the theological disputes of the schools were suspended by propitious ignorance; and the intolerant spirit, which could find neither idolaters nor heretics, was reduced to the persecution of the Jews. That exiled nation had founded some synagogues in the cities of Gaul; but Spain, since the time of Hadrian, was filled with their numerous colonies.[141](#) The wealth which they accumulated by trade, and the management of the finances, invited the pious avarice of their masters; and they might be oppressed without danger, as they had lost the use, and even the remembrance, of arms. Sisebut,

a Gothic king, who reigned in the beginning of the seventh century, proceeded at once to the last extremes of persecution.¹⁴² Ninety thousand Jews were compelled to receive the sacrament of baptism; the fortunes of the obstinate infidels were confiscated, their bodies were tortured; and it seems doubtful whether they were permitted to abandon their native country. The excessive zeal of the Catholic king was moderated, even by the clergy of Spain, who solemnly pronounced an inconsistent sentence: *that* the sacraments should not be forcibly imposed; but *that* the Jews who had been baptised should be constrained, for the honour of the church, to persevere in the external practice of a religion which they disbelieved and detested. Their frequent relapses provoked one of the successors of Sisebut to banish the whole nation from his dominions; and a council of Toledo published a decree that every Gothic king should swear to maintain this salutary edict. But the tyrants were unwilling to dismiss the victims, whom they delighted to torture, or to deprive themselves of the industrious slaves, over whom they might exercise a lucrative oppression. The Jews still continued in Spain, under the weight of the civil and ecclesiastical laws, which in the same country have been faithfully transcribed in the Code of the Inquisition. The Gothic kings and bishops at length discovered that injuries will produce hatred and that hatred will find the opportunity of revenge. A nation, the secret or professed enemies of Christianity, still multiplied in servitude and distress; and the intrigues of the Jews promoted the rapid success of the Arabian conquerors.¹⁴³

As soon as the Barbarians withdrew their powerful support, the unpopular heresy of Arius sunk into contempt and oblivion. But the Greeks still retained their subtle and loquacious disposition; the establishment of an obscure doctrine suggested new questions and new disputes; and it was always in the power of an ambitious prelate, or a fanatic monk, to violate the peace of the church, and, perhaps, of the empire. The historian of the empire may overlook those disputes which were confined to the obscurity of schools and synods. The Manichæans, who laboured to reconcile the religions of Christ and of Zoroaster, had secretly introduced themselves into the provinces; but these foreign sectaries were involved in the common disgrace of the Gnostics, and the Imperial laws were executed by the public hatred. The rational opinions of the Pelagians were propagated from Britain to Rome, Africa and Palestine, and silently expired in a superstitious age. But the East was distracted by the Nestorian and Eutychian controversies; which attempted to explain the mystery of the incarnation, and hastened the ruin of Christianity in her native land. These controversies were first agitated under the reign of the younger Theodosius; but their important consequences extend far beyond the limits of the present volume. The metaphysical chain of argument, the contests of ecclesiastical ambition, and their political influence on the decline of the Byzantine empire, may afford an interesting and instructive series of history, from the general councils of Ephesus and Chalcedon to the conquest of the East by the successors of Mahomet.

CHAPTER XXXVIII

Reign and Conversion of Clovis — His Victories over the Alemanni, Burgundians, and Visigoths — Establishment of the French Monarchy in Gaul — Laws of the Barbarians — State of the Romans — The Visigoths of Spain — Conquest of Britain by the Saxons

The Gauls,¹ who impatiently supported the Roman yoke, received a memorable lesson from one of the lieutenants of Vespasian, whose weighty sense has been refined and expressed by the genius of Tacitus.² “The protection of the republic has delivered Gaul from internal discord and foreign invasions. By the loss of national independence, you have acquired the name and privileges of Roman citizens. You enjoy, in common with ourselves, the permanent benefits of civil government; and your remote situation is less exposed to the accidental mischiefs of tyranny. Instead of exercising the rights of conquest, we have been contented to impose such tributes as are requisite for your own preservation. Peace cannot be secured without armies; and armies must be supported at the expense of the people. It is for your sake, not for our own, that we guard the barrier of the Rhine against the ferocious Germans, who have so often attempted, and who will always desire, to exchange the solitude of their woods and morasses for the wealth and fertility of Gaul. The fall of Rome would be fatal to the provinces; and you would be buried in the ruins of that mighty fabric which has been raised by the valour and wisdom of eight hundred years. Your imaginary freedom would be insulted and oppressed by a savage master; and the expulsion of the Romans would be succeeded by the eternal hostilities of the Barbarian conquerors.”³ This salutary advice was accepted, and this strange prediction was accomplished. In the space of four hundred years, the hardy Gauls, who had encountered the arms of Cæsar, were imperceptibly melted into the general mass of citizens and subjects; the Western empire was dissolved; and the Germans, who had passed the Rhine, fiercely contended for the possession of Gaul, and excited the contempt or abhorrence of its peaceful and polished inhabitants. With that conscious pride which the pre-eminence of knowledge and luxury seldom fails to inspire, they derided the hairy and gigantic savages of the North, — their rustic manners, dissonant joy, voracious appetite, and their horrid appearance, equally disgusting to the sight and to the smell. The liberal studies were still cultivated in the schools of Autun and Bordeaux; and the language of Cicero and Virgil was familiar to the Gallic youth. Their ears were astonished by the harsh and unknown sounds of the Germanic dialect, and they ingeniously lamented that the trembling muses fled from the harmony of a Burgundian lyre. The Gauls were endowed with all the advantages of art and nature; but, as they wanted courage to defend them, they were justly condemned to obey, and even to flatter, the victorious Barbarians, by whose clemency they held their precarious fortunes and their lives.⁴

As soon as Odoacer had extinguished the Western empire, he sought the friendship of

the most powerful of the Barbarians. The new sovereign of Italy resigned to Euric, king of the Visigoths, all the Roman conquests beyond the Alps, as far as the Rhine and the Ocean;⁵ and the senate might confirm this liberal gift with some ostentation of power, and without any real loss of revenue or dominion. The lawful pretensions of Euric were justified by ambition and success; and the Gothic nation might aspire, under his command, to the monarchy of Spain and Gaul. Arles and Marseilles surrendered to his arms; he oppressed the freedom of Auvergne; and the bishop condescended to purchase his recall from exile by a tribute of just, but reluctant, praise. Sidonius waited before the gates of the palace among a crowd of ambassadors and suppliants; and their various business at the court of Bordeaux attested the power and the renown of the king of the Visigoths. The Heruli of the distant ocean, who painted their naked bodies with its cærulean colour, implored his protection; and the Saxons respected the maritime provinces of a prince who was destitute of any naval force. The tall Burgundians submitted to his authority; nor did he restore the captive Franks, till he had imposed on that fierce nation the terms of an unequal peace. The Vandals of Africa cultivated his useful friendship; and the Ostrogoths of Pannonia were supported by his powerful aid against the oppression of the neighbouring Huns. The North (such are the lofty strains of the poet) was agitated, or appeased, by the nod of Euric; the great king of Persia consulted the oracle of the West; and the aged god of the Tiber was protected by the swelling genius of the Garonne.⁶ The fortune of nations has often depended on accidents; and France may ascribe her greatness to the premature death of the Gothic king, at a time when his son Alaric was an helpless infant, and his adversary Clovis⁷ an ambitious and valiant youth.

While Childeric, the father of Clovis, lived an exile in Germany, he was hospitably entertained by the queen as well as by the king of the Thuringians. After his restoration, Basina escaped from her husband's bed to the arms of her lover; freely declaring that, if she had known a man wiser, stronger, or more beautiful than Childeric, that man should have been the object of her preference.⁸ Clovis was the offspring of this voluntary union; and, when he was no more than fifteen years of age, he succeeded, by his father's death, to the command of the Salian tribe. The narrow limits of his kingdom⁹ were confined to the island of the Batavians, with the ancient dioceses of Tournay and Arras;¹⁰ and, at the baptism of Clovis, the number of his warriors could not exceed five thousand. The kindred tribes of the Franks, who had seated themselves along the Belgic rivers, the Scheld, the Meuse, the Moselle, and the Rhine, were governed by their independent kings of the Merovingian race; the equals, the allies, and sometimes the enemies of the Salic prince.¹¹ But the Germans, who obeyed, in peace, the hereditary jurisdiction of their chiefs, were free to follow the standard of a popular and victorious general; and the superior merit of Clovis attracted the respect and allegiance of the national confederacy. When he first took the field, he had neither gold and silver in his coffers, nor wine and corn in his magazines;¹² but he imitated the example of Cæsar, who, in the same country, had acquired wealth by the

sword and purchased soldiers with the fruits of conquest. After each successful battle or expedition, the spoils were accumulated in one common mass; every warrior received his proportionable share, and the royal prerogative submitted to the equal regulations of military law. The untamed spirit of the Barbarians was taught to acknowledge the advantages of regular discipline.¹³ At the annual review of the month of March, their arms were diligently inspected; and, when they traversed a peaceful territory, they were prohibited from touching a blade of grass. The justice of Clovis was inexorable; and his careless or disobedient soldiers were punished with instant death. It would be superfluous to praise the valour of a Frank; but the valour of Clovis was directed by cool and consummate prudence.¹⁴ In all his transactions with mankind, he calculated the weight of interest, of passion, and of opinion; and his measures were sometimes adapted to the sanguinary manners of the Germans, and sometimes moderated by the milder genius of Rome and Christianity. He was intercepted in the career of victory, since he died in the forty-fifth year of his age; but he had already accomplished, in a reign of thirty years, the establishment of the French monarchy in Gaul.

The first exploit of Clovis was the defeat of Syagrius, the son of Ægidius; and the public quarrel might, on this occasion, be inflamed by private resentment. The glory of the father still insulted the Merovingian race; the power of the son might excite the jealous ambition of the king of the Franks. Syagrius inherited, as a patrimonial estate, the city and diocese of Soissons, the desolate remnant of the second Belgic, Rheims and Troyes, Beauvais and Amiens, would naturally submit to the count or patrician;¹⁵ and after the dissolution of the Western empire he might reign with the title, or at least with the authority, of king of the Romans.¹⁶ As a Roman, he had been educated in the liberal studies of rhetoric and jurisprudence; but he was engaged by accident and policy in the familiar use of the Germanic idiom. The independent Barbarians resorted to the tribunal of a stranger, who possessed the singular talent of explaining, in their native tongue, the dictates of reason and equity. The diligence and affability of their judge rendered him popular, the impartial wisdom of his decrees obtained their voluntary obedience, and the reign of Syagrius over the Franks and Burgundians seemed to revive the original institution of civil society.¹⁷ In the midst of these peaceful occupations, Syagrius received, and boldly accepted, the hostile defiance of Clovis; who challenged his rival in the spirit, and almost in the language, of chivalry, to appoint the day and the field¹⁸ of battle. In the time of Cæsar, Soissons would have poured forth a body of fifty thousand horse; and such an army might have been plentifully supplied with shields, cuirasses, and military engines, from the three arsenals, or manufactures, of the city.¹⁹ But the courage and numbers of the Gallic youth were long since exhausted; and the loose bands of volunteers, or mercenaries, who marched under the standard of Syagrius, were incapable of contending with the national valour of the Franks. It would be ungenerous, without some more accurate knowledge of his strength and resources, to condemn the rapid flight of Syagrius, who

escaped, after the loss of a battle, to the distant court of Toulouse. The feeble minority of Alaric could not assist or protect an unfortunate fugitive; the pusillanimous²⁰ Goths were intimidated by the menaces of Clovis; and the Roman *king*, after a short confinement, was delivered into the hands of the executioner. The Belgic cities surrendered to the king of the Franks;²¹ and his dominions were enlarged towards the east by the ample diocese of Tongres,²² which Clovis subdued in the tenth year of his reign.

Triumphal Arch at Rheims (from a photograph)

The name of the Alemanni has been absurdly derived from their imaginary settlement on the banks of the *Leman* lake.²³ That fortunate district, from the lake to Avenche and Mount Jura, was occupied by the Burgundians.²⁴ The northern parts of Helvetia had indeed been subdued by the ferocious Alemanni, who destroyed with their own hands the fruits of their conquest. A province, improved and adorned by the arts of Rome, was again reduced to a savage wilderness; and some vestige of the stately Vindonissa may still be discovered in the fertile and populous valley of the Aar.²⁵ From the source of the Rhine to its conflux with the Main and the Moselle, the formidable swarms of the Alemanni commanded either side of the river, by the right of ancient possession or recent victory. They had spread themselves into Gaul, over the modern provinces of Alsace and Lorraine; and their bold invasion of the kingdom of Cologne summoned the Salic prince to the defence of his Ripuarian allies. Clovis encountered the invaders of Gaul in the plain of Tolbiac, about twenty-four miles from

Cologne;[26](#) and the two fiercest nations of Germany were mutually animated by the memory of past exploits and the prospect of future greatness. The Franks, after an obstinate struggle, gave way; and the Alemanni, raising a shout of victory, impetuously pressed their retreat. But the battle was restored by the valour, the conduct, and perhaps by the piety of Clovis; and the event of the bloody day decided for ever the alternative of empire or servitud

THE HISTORY OF THE DECLINE AND FALL OF THE ROMAN EMPIRE

CHAPTER XL

Elevation of Justin the Elder — Reign of Justinian: — I. The Empress Theodora — II. Factions of the Circus, and Sedition of Constantinople — III. Trade and Manufacture of Silk — IV. Finances and Taxes — V. Edifices of Justinian — Church of St. Sophia — Fortifications and Frontiers of the Eastern Empire — Abolition of the Schools of Athens and the Consulship of Rome

The emperor Justinian was born¹ near the ruins of Sardica (the modern Sophia), of an obscure race² of Barbarians,³ the inhabitants of a wild and desolate country, to which the names of Dardania, of Dacia, and of Bulgaria have been successively applied. His elevation was prepared by the adventurous spirit of his uncle Justin, who, with two other peasants of the same village, deserted, for the profession of arms, the more useful employment of husbandmen or shepherds.⁴ On foot, with a scanty provision of biscuit in their knapsacks, the three youths followed the highroad of Constantinople, and were soon enrolled, for their strength and stature, among the guards of the emperor Leo. Under the two succeeding reigns, the fortunate peasant emerged to wealth and honours; and his escape from some dangers which threatened his life was afterwards ascribed to the guardian angel who watches over the fate of kings. His long and laudable service in the Isaurian and Persian wars would not have preserved from oblivion the name of Justin; yet they might warrant the military promotion which in the course of fifty years he gradually obtained; the rank of tribune, of count, and of general, the dignity of senator, and the command of the guards, who obeyed him as their chief, at the important crisis when the emperor Anastasius was removed from the world. The powerful kinsmen whom he had raised and enriched were excluded from the throne; and the eunuch Amantius, who reigned in the palace, had secretly resolved to fix the diadem on the head of the most obsequious of his creatures. A liberal donative, to conciliate the suffrage of the guards, was entrusted for that purpose in the hands of their commander. But these weighty arguments were treacherously employed by Justin in his own favour; and, as no competitor presumed to appear, the Dacian peasant was invested with the purple, by the unanimous consent of the soldiers who knew him to be brave and gentle, of the clergy and people who believed him to be orthodox, and of the provincials who yielded a blind and implicit submission to the will of the capital. The elder Justin, as he is distinguished from another emperor of the same family and name, ascended the Byzantine throne at the age of sixty-eight years; and, had he been left to his own guidance, every moment of a nine years' reign must have exposed to his subjects the impropriety of their choice. His ignorance was similar

to that of Theodoric; and it is remarkable that, in an age not destitute of learning, two contemporary monarchs had never been instructed in the knowledge of the alphabet. But the genius of Justin was far inferior to that of the Gothic king; the experience of a soldier had not qualified him for the government of an empire^{4a}; and, though personally brave, the consciousness of his own weakness was naturally attended with doubt, distrust, and political apprehension. But the official business of the state was diligently and faithfully transacted by the quæstor Proclus:⁵ and the aged emperor adopted the talents and ambition of his nephew Justinian, an aspiring youth, whom his uncle had drawn from the rustic solitude of Dacia, and educated at Constantinople, as the heir of his private fortune, and at length of the Eastern empire.

Since the eunuch Amantius had been defrauded of his money, it became necessary to deprive him of his life. The task was easily accomplished by the charge of a real or fictitious conspiracy; and the judges were informed, as an accumulation of guilt, that he was secretly addicted to the Manichæan heresy.⁶ Amantius lost his head; three of his companions, the first domestics of the palace, were punished either with death or exile; and their unfortunate candidate for the purple was cast into a deep dungeon, overwhelmed with stones, and ignominiously thrown, without burial, into the sea. The ruin of Vitalian was a work of more difficulty and danger. That Gothic chief had rendered himself popular by the civil war which he boldly waged against Anastasius for the defence of the orthodox faith, and, after the conclusion of an advantageous treaty, he still remained in the neighbourhood of Constantinople at the head of a formidable and victorious army of Barbarians. By the frail security of oaths, he was tempted to relinquish this advantageous situation, and to trust his person within the walls of a city whose inhabitants, particularly the *blue* faction, were artfully incensed against him by the remembrance even of his pious hostilities. The emperor and his nephew embraced him as the faithful and worthy champion of the church and state; and gratefully adorned their favourite with the titles of consul and general; but, in the seventh month of his consulship, Vitalian was stabbed with seventeen wounds at the royal banquet;⁷ and Justinian, who inherited the spoil, was accused as the assassin of a spiritual brother, to whom he had recently pledged his faith in the participation of the Christian mysteries.⁸ After the fall of his rival, he was promoted, without any claim of military service, to the office of master-general of the Eastern armies, whom it was his duty to lead into the field against the public enemy. But, in the pursuit of fame, Justinian might have lost his present dominion over the age and weakness of his uncle; and instead of acquiring by Scythian or Persian trophies the applause of his countrymen,⁹ the prudent warrior solicited their favour in the churches, the circus, and the senate of Constantinople. The Catholics were attached to the nephew of Justin, who, between the Nestorian and Eutychian heresies, trod the narrow path of inflexible and intolerant orthodoxy.¹⁰ In the first days of the new reign, he prompted and gratified the popular enthusiasm against the memory of the deceased emperor. After a schism of thirty-four years, he reconciled the proud and angry spirit of the Roman

pontiff, and spread among the Latins a favourable report of his pious respect for the apostolic see. The thrones of the East were filled with Catholic bishops devoted to his interest, the clergy and the monks were gained by his liberality, and the people were taught to pray for their future sovereign, the hope and pillar of the true religion. The magnificence of Justinian was displayed in the superior pomp of his public spectacles, an object not less sacred and important in the eyes of the multitude than the creed of Nice or Chalcedon; the expense of his consulship was estimated at two hundred and eighty-eight thousand pieces of gold; twenty lions, and thirty leopards, were produced at the same time in the amphitheatre, and a numerous train of horses, with their rich trappings, was bestowed as an extraordinary gift on the victorious charioteers of the circus. While he indulged the people of Constantinople, and received the addresses of foreign kings, the nephew of Justin assiduously cultivated the friendship of the senate. That venerable name seemed to qualify its members to declare the sense of the nation, and to regulate the succession of the Imperial throne; the feeble Anastasius had permitted the vigour of government to degenerate into the form or substance of an aristocracy; and the military officers who had obtained the senatorial rank were followed by their domestic guards, a band of veterans, whose arms or acclamations might fix in a tumultuous moment the diadem of the East. The treasures of the state were lavished to procure the voices of the senators, and their unanimous wish, that he would be pleased to adopt Justinian for his colleague, was communicated to the emperor. But this request, which too clearly admonished him of his approaching end, was unwelcome to the jealous temper of an aged monarch, desirous to retain the power which he was incapable of exercising; and Justin, holding his purple with both his hands, advised them to prefer, since an election was so profitable, some older candidate. Notwithstanding this reproach, the senate proceeded to decorate Justinian with the royal epithet of *nobilissimus*; and their decree was ratified by the affection or the fears of his uncle. After some time the languor of mind and body, to which he was reduced by an incurable wound in his thigh, indispensably required the aid of a guardian. He summoned the patriarch and senators; and in their presence solemnly placed the diadem on the head of his nephew, who was conducted from the palace to the circus, and saluted by the loud and joyful applause of the people. The life of Justin was prolonged about four months, but from the instant of this ceremony he was considered as dead to the empire, which acknowledged Justinian, in the forty-fifth year of his age, for the lawful sovereign of the East.[11](#)

From his elevation to his death, Justinian governed the Roman empire thirty-eight years, seven months, and thirteen days. The events of his reign, which excite our curious attention by their number, variety, and importance, are diligently related by the secretary of Belisarius, a rhetorician whom eloquence had promoted to the rank of senator and prefect of Constantinople. According to the vicissitudes of courage or servitude, of favour or disgrace, Procopius[12](#) successively composed the *history*, the *panegyric*, and the *satire* of his own times. The eight books of the Persian, Vandalic, and Gothic wars,[13](#) which are continued in the five books of Agathias, deserve our

esteem as a laborious and successful imitation of the Attic, or at least of the Asiatic, writers of ancient Greece. His facts are collected from the personal experience and free conversation of a soldier, a statesman, and a traveller; his style continually aspires, and often attains, to the merit of strength and elegance; his reflections, more especially in the speeches, which he too frequently inserts, contain a rich fund of political knowledge; and the historian, excited by the generous ambition of pleasing and instructing posterity, appears to disdain the prejudices of the people and the flattery of courts. The writings of Procopius¹⁴ were read and applauded by his contemporaries;¹⁵ but, although he respectfully laid them at the foot of the throne, the pride of Justinian must have been wounded by the praise of an hero, who perpetually eclipses the glory of his inactive sovereign. The conscious dignity of independence was subdued by the hopes and fears of a slave; and the secretary of Belisarius laboured for pardon and reward in the six books of the Imperial *edifices*. He had dexterously chosen a subject of apparent splendour, in which he could loudly celebrate the genius, the magnificence, and the piety of a prince who, both as a conqueror and legislator, had surpassed the puerile virtues of Themistocles and Cyrus.¹⁶ Disappointment might urge the flatterer to secret revenge; and the first glance of favour might again tempt him to suspend and suppress a libel,¹⁷ in which the Roman Cyrus is degraded into an odious and contemptible tyrant, in which both the emperor and his consort Theodora are seriously represented as two demons, who had assumed an human form for the destruction of mankind.¹⁸ Such base inconsistency must doubtless sully the reputation, and detract from the credit, of Procopius; yet, after the venom of his malignity has been suffered to exhale, the residue of the *anecdotes*, even the most disgraceful facts, some of which had been tenderly hinted in his public history, are established by their internal evidence, or the authentic monuments of the times.¹⁹ From these various materials, I shall now proceed to describe the reign of Justinian, which will deserve and occupy an ample space. The present chapter will explain the elevation and character of Theodora, the factions of the circus, and the peaceful administration of the sovereign of the East. In the three succeeding chapters I shall relate the wars of Justinian which achieved the conquest of Africa and Italy; and I shall follow the victories of Belisarius and Narses, without disguising the vanity of their triumphs, or the hostile virtue of the Persian and Gothic heroes. The series of this and the following volume will embrace the jurisprudence and theology of the emperor; the controversies and sects which still divide the Oriental church; the reformation of the Roman law, which is obeyed or respected by the nations of modern Europe.

I. In the exercise of supreme power, the first act of Justinian was to divide it with the woman whom he loved, the famous Theodora,²⁰ whose strange elevation cannot be applauded as the triumph of female virtue. Under the reign of Anastasius, the care of the wild beasts maintained by the green faction of Constantinople was entrusted to Acacius, a native of the isle of Cyprus, who, from his employment, was surnamed the master of the bears. This honourable office was given after his death to another

candidate, notwithstanding the diligence of his widow, who had already provided a husband and a successor. Acacius had left three daughters, Comito,[21](#) Theodora, and Anastasia, the eldest of whom did not then exceed the age of seven years. On a solemn festival, these helpless orphans were sent by their distressed and indignant mother, in the garb of suppliants, into the midst of the theatre; the green faction received them with contempt, the blues with compassion; and this difference, which sunk deep into the mind of Theodora, was felt long afterwards in the administration of the empire. As they improved in age and beauty, the three sisters were successively devoted to the public and private pleasures of the Byzantine people; and Theodora, after following Comito on the stage, in the dress of a slave, with a stool on her head, was at length permitted to exercise her independent talents. She neither danced, nor sung, nor played on the flute; her skill was confined to the pantomime arts; she excelled in buffoon characters, and, as often as the comedian swelled her cheeks, and complained with a ridiculous tone and gesture of the blows that were inflicted, the whole theatre of Constantinople resounded with laughter and applause. The beauty of Theodora[22](#) was the subject of more flattering praise, and the source of more exquisite delight. Her features were delicate and regular; her complexion, though somewhat pale, was tinged with a natural colour; every sensation was instantly expressed by the vivacity of her eyes; her easy motions displayed the graces of a small but elegant figure; and even love or adulation might proclaim that painting and poetry were incapable of delineating the matchless excellence of her form. But this form was degraded by the facility with which it was exposed to the public eye and prostituted to licentious desire. Her venal charms were abandoned to a promiscuous crowd of citizens and strangers, of every rank, and of every profession; the fortunate lover who had been promised a night of enjoyment was often driven from her bed by a stronger or more wealthy favourite; and, when she passed through the streets, her presence was avoided by all who wished to escape either the scandal or the temptation. The satirical historian has not blushed[23](#) to describe the naked scenes which Theodora was not ashamed to exhibit in the theatre.[24](#) After exhausting the arts of sensual pleasure,[25](#) she most ungratefully murmured against the parsimony of Nature;[26](#) but her murmurs, her pleasures, and her arts must be veiled in the obscurity of a learned language. After reigning for some time, the delight and contempt of the capital, she condescended to accompany Ecebolus, a native of Tyre, who had obtained the government of the African Pentapolis. But this union was frail and transient; Ecebolus soon rejected an expensive or faithless concubine; she was reduced at Alexandria to extreme distress; and, in her laborious return to Constantinople, every city of the East admired and enjoyed the fair Cyprian, whose merit appeared to justify her descent from the peculiar island of Venus. The vague commerce of Theodora, and the most detestable precautions, preserved her from the danger which she feared; yet once, and once only, she became a mother. The infant was saved and educated in Arabia, by his father, who imparted to him on his death-bed that he was the son of an empress. Filled with ambitious hopes, the unsuspecting youth immediately hastened to the palace of Constantinople, and was admitted to the presence of his mother. As he was never more

seen, even after the decease of Theodora, she deserves the foul imputation of extinguishing with his life a secret so offensive to her Imperial virtue.

In the most abject state of her fortune and reputation, some vision, either of sleep or of fancy, had whispered to Theodora the pleasing assurance that she was destined to become the spouse of a potent monarch. Conscious of her approaching greatness, she returned from Paphlagonia to Constantinople; assumed, like a skilful actress, a more decent character; relieved her poverty by the laudable industry of spinning wool; and affected a life of chastity and solitude in a small house, which she afterwards changed into a magnificent temple.²⁷ Her beauty, assisted by art or accident, soon attracted, captivated, and fixed the patrician Justinian, who already reigned with absolute sway under the name of his uncle. Perhaps she contrived to enhance the value of a gift which she had so often lavished on the meanest of mankind; perhaps she inflamed, at first by modest delays, and at last by sensual allurements, the desires of a lover, who from nature or devotion was addicted to long vigils and abstemious diet. When his first transports had subsided, she still maintained the same ascendant over his mind, by the more solid merit of temper and understanding. Justinian delighted to ennoble and enrich the object of his affection; the treasures of the East were poured at her feet; and the nephew of Justin was determined, perhaps by religious scruples, to bestow on his concubine the sacred and legal character of a wife. But the laws of Rome expressly prohibited the marriage of a senator with any female who had been dishonoured by a servile origin or theatrical profession; the empress Lupicina, or Euphemia, a Barbarian of rustic manners but of irreproachable virtue, refused to accept a prostitute for her niece; and even Vigilantia, the superstitious mother of Justinian, though she acknowledged the wit and beauty of Theodora, was seriously apprehensive lest the levity and arrogance of that artful paramour might corrupt the piety and happiness of her son. These obstacles were removed by the inflexible constancy of Justinian. He patiently expected the death of the empress; he despised the tears of his mother, who soon sunk under the weight of her affliction; and a law was promulgated in the name of the emperor Justin, which abolished the rigid jurisprudence of antiquity. A glorious repentance (the words of the edict) was left open for the unhappy females who had prostituted their persons on the theatre, and they were permitted to contract a legal union with the most illustrious of the Romans.²⁸ This indulgence was speedily followed by the solemn nuptials of Justinian and Theodora; her dignity was gradually exalted with that of her lover; and, as soon as Justin had invested his nephew with the purple, the patriarch of Constantinople placed the diadem on the heads of the emperor and empress of the East. But the usual honours which the severity of Roman manners had allowed to the wives of princes could not satisfy either the ambition of Theodora or the fondness of Justinian. He seated her on the throne as an equal and independent colleague in the sovereignty of the empire, and an oath of allegiance was imposed on the governors of the provinces in the joint names of Justinian and Theodora.²⁹ The Eastern world fell prostrate before the genius and fortune of the daughter of Acacius.

The prostitute, who, in the presence of innumerable spectators, had polluted the theatre of Constantinople, was adored as a queen in the same city, by grave magistrates, orthodox bishops, victorious generals, and captive monarchs.[30](#)

Those who believe that the female mind is totally depraved by the loss of chastity will eagerly listen to all the invectives of private envy or popular resentment, which have dissembled the virtues of Theodora, exaggerated her vices, and condemned with rigour the venal or voluntary sins of the youthful harlot. From a motive of shame or contempt, she often declined the servile homage of the multitude, escaped from the odious light of the capital, and passed the greatest part of the year in the palaces and gardens which were pleasantly seated on the sea-coast of the Propontis and the Bosphorus. Her private hours were devoted to the prudent as well as grateful care of her beauty, the luxury of the bath and table, and the long slumber of the evening and the morning. Her secret apartments were occupied by the favourite women and eunuchs, whose interests and passions she indulged at the expense of justice; the most illustrious personages of the state were crowded into a dark and sultry antichamber, and when at last, after tedious attendance, they were admitted to kiss the feet of Theodora, they experienced, as her humour might suggest, the silent arrogance of an empress or the capricious levity of a comedian. Her rapacious avarice to accumulate an immense treasure may be excused by the apprehension of her husband's death, which could leave no alternative between ruin and the throne; and fear as well as ambition might exasperate Theodora against two generals, who, during a malady of the emperor, had rashly declared that they were not disposed to acquiesce in the choice of the capital. But the reproach of cruelty, so repugnant even to her softer vices, has left an indelible stain on the memory of Theodora. Her numerous spies observed, and zealously reported, every action, or word, or look, injurious to their royal mistress. Whomsoever they accused were cast into her peculiar prisons,[31](#) inaccessible to the inquiries of justice; and it was rumoured that the torture of the rack or scourge had been inflicted in the presence of a female tyrant, insensible to the voice of prayer or of pity.[32](#) Some of these unhappy victims perished in deep unwholesome dungeons, while others were permitted, after the loss of their limbs, their reason, or their fortune, to appear in the world the living monuments of her vengeance, which was commonly extended to the children of those whom she had suspected or injured. The senator, or bishop, whose death or exile Theodora had pronounced, was delivered to a trusty messenger, and his diligence was quickened by a menace from her own mouth. "If you fail in the execution of my commands, I swear by him who liveth for ever, that your skin shall be flayed from your body."[33](#)

If the creed of Theodora had not been tainted with heresy, her exemplary devotion might have atoned, in the opinion of her contemporaries, for pride, avarice, and cruelty. But, if she employed her influence to assuage the intolerant fury of the emperor, the present age will allow some merit to her religion, and much indulgence to

her speculative errors.[34](#) The name of Theodora was introduced, with equal honour, in all the pious and charitable foundations of Justinian; and the most benevolent institution of his reign may be ascribed to the sympathy of the empress for her less fortunate sisters, who had been seduced or compelled to embrace the trade of prostitution. A palace, on the Asiatic side of the Bosphorus, was converted into a stately and spacious monastery, and a liberal maintenance was assigned to five hundred women, who had been collected from the streets and brothels of Constantinople. In this safe and holy retreat, they were devoted to perpetual confinement; and the despair of some, who threw themselves headlong into the sea, was lost in the gratitude of the penitents, who had been delivered from sin and misery by their generous benefactress.[35](#) The prudence of Theodora is celebrated by Justinian himself; and his laws are attributed to the sage counsels of his most reverend wife, whom he had received as the gift of the Deity.[36](#) Her courage was displayed amidst the tumult of the people and the terrors of the court. Her chastity, from the moment of her union with Justinian, is founded on the silence of her implacable enemies; and, although the daughter of Acacius might be satiated with love, yet some applause is due to the firmness of a mind which could sacrifice pleasure and habit to the stronger sense either of duty or interest. The wishes and prayers of Theodora could never obtain the blessing of a lawful son, and she buried an infant daughter, the sole offspring of her marriage.[37](#) Notwithstanding this disappointment, her dominion was permanent and absolute; she preserved, by art or merit, the affections of Justinian; and their seeming dissensions were always fatal to the courtiers who believed them to be sincere. Perhaps her health had been impaired by the licentiousness of her youth; but it was always delicate, and she was directed by her physicians to use the Pythian warm baths. In this journey, the empress was followed by the Prætorian prefect, the great treasurer, several counts and patricians, and a splendid train of four thousand attendants; the highways were repaired at her approach; a palace was erected for her reception; and, as she passed through Bithynia, she distributed liberal alms to the churches, the monasteries, and the hospitals, that they might implore heaven for the restoration of her health.[38](#) At length, in the twenty-fourth year of her marriage, and the twenty-second of her reign, she was consumed by a cancer;[39](#) and the irreparable loss was deplored by her husband, who, in the room of a theatrical prostitute, might have selected the purest and most noble virgin of the East.[40](#)

II. A material difference may be observed in the games of antiquity: the most eminent of the Greeks were actors, the Romans were merely spectators. The Olympic stadium was open to wealth, merit, and ambition; and, if the candidates could depend on their personal skill and activity, they might pursue the footsteps of Diomedes and Menelaus, and conduct their own horses in the rapid career.[41](#) Ten, twenty, forty, chariots were allowed to start at the same instant; a crown of leaves was the reward of the victor; and his fame, with that of his family and country, was chaunted in lyric strains more durable than monuments of brass and marble. But a senator, or even a citizen,

conscious of his dignity, would have blushed to expose his person or his horses in the circus of Rome. The games were exhibited at the expense of the republic, the magistrates, or the emperors: but the reins were abandoned to servile hands; and, if the profits of a favourite charioteer sometimes exceeded those of an advocate, they must be considered as the effects of popular extravagance, and the high wages of a disgraceful profession. The race, in its first institution, was a simple contest of two chariots, whose drivers were distinguished by *white* and *red* liveries; two additional colours, a light *green* and a *cærulean blue*, were afterwards introduced; and, as the races were repeated twenty-five times, one hundred chariots contributed in the same day to the pomp of the circus. The four *factions* soon acquired a legal establishment, and a mysterious origin; and their fanciful colours were derived from the various appearances of nature in the four seasons of the year: the red dog-star of summer, the snows of winter, the deep shades of autumn, and the cheerful verdure of the spring.[42](#) Another interpretation preferred the elements to the seasons, and the struggle of the green and blue was supposed to represent the conflict of the earth and sea. Their respective victories announced either a plentiful harvest or a prosperous navigation, and the hostility of the husbandmen and mariners was somewhat less absurd than the blind ardour of the Roman people, who devoted their lives and fortunes to the colour which they had espoused. Such folly was disdained and indulged by the wisest princes; but the names of Caligula, Nero, Vitellius, Verus, Commodus, Caracalla, and Elagabalus were enrolled in the blue or green factions of the circus; they frequented their stables, applauded their favourites, chastised their antagonists, and deserved the esteem of the populace by the natural or affected imitation of their manners. The bloody and tumultuous contest continued to disturb the public festivity till the last age of the spectacles of Rome; and Theodoric, from a motive of justice or affection, interposed his authority to protect the greens against the violence of a consul and a patrician, who were passionately addicted to the blue faction of the circus.[43](#)

Constantinople adopted the follies, though not the virtues, of ancient Rome; and the same factions which had agitated the circus raged with redoubled fury in the hippodrome. Under the reign of Anastasius, this popular frenzy was inflamed by religious zeal; and the greens, who had treacherously concealed stones and daggers under baskets of fruit, massacred, at a solemn festival, three thousand of their blue adversaries.[44](#) From the capital, this pestilence was diffused into the provinces and cities of the East, and the sportive distinction of two colours produced two strong and irreconcilable factions, which shook the foundations of a feeble government.[45](#) The popular dissensions, founded on the most serious interest, or holy pretence, have scarcely equalled the obstinacy of this wanton discord, which invaded the peace of families, divided friends and brothers, and tempted the female sex, though seldom seen in the circus, to espouse the inclinations of their lovers or to contradict the wishes of their husbands. Every law, either human or divine, was trampled underfoot, and, as long as the party was successful, its deluded followers appeared careless of private distress or public calamity. The licence, without the freedom, of democracy was

revived at Antioch and Constantinople, and the support of a faction became necessary to every candidate for civil or ecclesiastical honours. A secret attachment to the family or sect of Anastasius was imputed to the greens; the blues were zealously devoted to the cause of orthodoxy and Justinian,[46](#) and their grateful patron protected, above five years, the disorders of a faction, whose seasonable tumults overawed the palace, the senate, and the capitals of the East. Insolent with royal favour, the blues affected to strike terror by a peculiar and Barbaric dress, the long hair of the Huns, their close sleeves and ample garments, a lofty step, and a sonorous voice. In the day they concealed their two-edged poniards, but in the night they boldly assembled in arms and in numerous bands, prepared for every act of violence and rapine. Their adversaries of the green faction, or even inoffensive citizens, were stripped and often murdered by these nocturnal robbers, and it became dangerous to wear any gold buttons or girdles, or to appear at a late hour in the streets of a peaceful capital. A daring spirit, rising with impunity, proceeded to violate the safeguard of private houses; and fire was employed to facilitate the attack, or to conceal the crimes, of these factious rioters. No place was safe or sacred from their depredations; to gratify either avarice or revenge, they profusely spilt the blood of the innocent; churches and altars were polluted by atrocious murders; and it was the boast of the assassins that their dexterity could always inflict a mortal wound with a single stroke of their dagger. The dissolute youth of Constantinople adopted the blue livery of disorder; the laws were silent, and the bonds of society were relaxed; creditors were compelled to resign their obligations; judges to reverse their sentence; masters to enfranchise their slaves; fathers to supply the extravagance of their children; noble matrons were prostituted to the lust of their servants; beautiful boys were torn from the arms of their parents; and wives, unless they preferred a voluntary death, were ravished in the presence of their husbands.[47](#) The despair of the greens, who were persecuted by their enemies, and deserted by the magistrate, assumed the privilege of defence, perhaps of retaliation; but those who survived the combat were dragged to execution, and the unhappy fugitives, escaping to woods and caverns, preyed without mercy on the society from whence they were expelled. Those ministers of justice who had courage to punish the crimes, and to brave the resentment, of the blues became the victims of their indiscreet zeal; a prefect of Constantinople fled for refuge to the holy sepulchre, a count of the East was ignominiously whipped, and a governor of Cilicia was hanged, by the order of Theodora, on the tomb of two assassins, whom he had condemned for the murder of his groom and a daring attack upon his own life.[48](#) An aspiring candidate may be tempted to build his greatness on the public confusion, but it is the interest as well as the duty of a sovereign to maintain the authority of the laws. The first edict of Justinian, which was often repeated and sometimes executed, announced his firm resolution to support the innocent and to chastise the guilty of every denomination and *colour*. Yet the balance of justice was still inclined in favour of the blue faction, by the secret affection, the habits, and the fears of the emperor; his equity, after an apparent struggle, submitted, without reluctance, to the implacable passions of Theodora, and the empress never forgot, or forgave, the injuries of the comedian. At the accession of

the younger Justin, the proclamation of equal and rigorous justice indirectly condemned the partiality of the former reign. “Ye blues, Justinian is no more! ye greens, he is still alive!”[49](#)

A sedition, which almost laid Constantinople in ashes, was excited by the mutual hatred and momentary reconciliation of the two factions. In the fifth year of his reign, Justinian celebrated the festival of the ides of January: the games were incessantly disturbed by the clamorous discontent of the greens; till the twenty-second race, the emperor maintained his silent gravity; at length, yielding to his impatience, he condescended to hold, in abrupt sentences, and by the voice of a crier, the most singular dialogue[50](#) that ever passed between a prince and his subjects. Their first complaints were respectful and modest; they accused the subordinate ministers of oppression, and proclaimed their wishes for the long life and victory of the emperor. “Be patient and attentive, ye insolent railers!” exclaimed Justinian; “be mute, ye Jews, Samaritans, and Manichæans!” The greens still attempted to awaken his compassion. “We are poor, we are innocent, we are injured, we dare not pass through the streets: a general persecution is exercised against our name and colour. Let us die, O emperor! but let us die by your command, and for your service!” But the repetition of partial and passionate invectives degraded, in their eyes, the majesty of the purple; they renounced allegiance to the prince who refused justice to his people; lamented that the father of Justinian had been born; and branded his son with the opprobrious names of an homicide, an ass,[51](#) and a perjured tyrant. “Do you despise your lives?” cried the indignant monarch: the blues rose with fury from their seats; their hostile clamours thundered in the hippodrome; and their adversaries, deserting the unequal contest, spread terror and despair through the streets of Constantinople. At this dangerous moment, seven notorious assassins of both factions, who had been condemned by the prefect, were carried round the city, and afterwards transported to the place of execution in the suburb of Pera. Four were immediately beheaded; a fifth was hanged; but when the same punishment was inflicted on the remaining two, the rope broke, they fell alive to the ground, the populace applauded their escape, and the monks of St. Conon, issuing from the neighbouring convent, conveyed them in a boat to the sanctuary of the church.[52](#) As

PART OF CONSTANTINOPLE, TO ILLUSTRATE THE NIKA RIOT

one of these criminals was of the blue, and the other of the green, livery, the two factions were equally provoked by the cruelty of their oppressor, or the ingratitude of their patron; and a short truce was concluded, till they had delivered their prisoners and satisfied their revenge. The palace of the prefect, who withstood the seditious torrent, was instantly burnt, his officers and guards were massacred, the prisons were forced open, and freedom was restored to those who could only use it for the public destruction. A military force, which had been despatched to the aid of the civil magistrate, was fiercely encountered by an armed multitude, whose numbers and boldness continually increased; and the Heruli, the wildest Barbarians in the service of the empire, overturned the priests and their relics, which, from a pious motive, had been rashly interposed to separate the bloody conflict. The tumult was exasperated by this sacrilege, the people fought with enthusiasm in the cause of God; the women, from the roofs and windows, showered stones on the heads of the soliders, who darted firebrands against the houses; and the various flames, which had been kindled by the hands of citizens and strangers spread without control over the face of the city. The conflagration involved the cathedral of St. Sophia, the baths of Zeuxippus, a part of the palace, from the first entrance to the altar of Mars, and the long portico from the palace to the forum of Constantine; a large hospital, with the sick patients, was consumed; many churches and stately edifices were destroyed, and an immense treasure of gold and silver was either melted or lost. From such scenes of horror and distress, the wise and wealthy citizens escaped over the Bosphorus to the Asiatic side; and during five days Constantinople was abandoned to the factions, whose watch-word, Nika, *vanquish!* has given a name to this memorable sedition.[53](#)

As long as the factions were divided, the triumphant blues and desponding greens appeared to behold with the same indifference the disorders of the state. They agreed to censure the corrupt management of justice and the finance; and the two responsible ministers, the artful Tribonian and the rapacious John of Cappadocia, were loudly arraigned as the authors of the public misery. The peaceful murmurs of the people would have been disregarded: they were heard with respect when the city was in flames; the quæstor and the prefect were instantly removed, and their offices were filled by two senators of blameless integrity. After this popular concession, Justinian proceeded to the hippodrome to confess his own errors and to accept the repentance of his grateful subjects; but they distrusted his assurances, though solemnly pronounced in the presence of the holy gospels; and the emperor, alarmed by their distrust, retreated with precipitation to the strong fortress of the palace. The obstinacy of the tumult was now imputed to a secret and ambitious conspiracy, and a suspicion was entertained that the insurgents, more especially the green faction, had been supplied

with arms and money by Hypatius and Pompey, two patricians, who could neither forget with honour, nor remember with safety, that they were the nephews of the emperor Anastasius. Capriciously trusted, disgraced, and pardoned by the jealous levity of the monarch, they had appeared as loyal servants before the throne; and, during five days of the tumult, they were detained as important hostages; till at length, the fears of Justinian prevailing over his prudence, he viewed the two brothers in the light of spies, perhaps of assassins, and sternly commanded them to depart from the palace. After a fruitless representation that obedience might lead to involuntary treason, they retired to their houses, and in the morning of the sixth day Hypatius was surrounded and seized by the people, who, regardless of his virtuous resistance and the tears of his wife, transported their favourite to the forum of Constantine, and, instead of a diadem, placed a rich collar on his head. If the usurper, who afterwards pleaded the merit of his delay, had complied with the advice of his senate, and urged the fury of the multitude, their first irresistible effort might have oppressed or expelled his trembling competitor. The Byzantine palace enjoyed a free communication with the sea; vessels lay ready at the garden-stairs; and a secret resolution was already formed to convey the emperor with his family and treasures to a safe retreat, at some distance from the capital.

Justinian was lost, if the prostitute whom he raised from the theatre had not renounced the timidity, as well as the virtues, of her sex. In the midst of a council, where Belisarius was present, Theodora alone displayed the spirit of an hero; and she alone, without apprehending his future hatred, could save the emperor from the imminent danger and his unworthy fears. "If flight," said the consort of Justinian, "were the only means of safety, yet I should disdain to fly. Death is the condition of our birth; but they who have reigned should never survive the loss of dignity and dominion. I implore heaven that I may never be seen, not a day, without my diadem and purple; that I may no longer behold the light, when I cease to be saluted with the name of queen. If you resolve, O Cæsar! to fly, you have treasures; behold the sea, you have ships; but tremble lest the desire of life should expose you to wretched exile and ignominious death. For my own part, I adhere to the maxim of antiquity, that the throne is a glorious sepulchre." The firmness of a woman restored the courage to deliberate and act, and courage soon discovers the resources of the most desperate situation. It was an easy and a decisive measure to revive the animosity of the factions; the blues were astonished at their own guilt and folly, that a trifling injury should provoke them to conspire with their implacable enemies against a gracious and liberal benefactor; they again proclaimed the majesty of Justinian, and the greens, with their upstart emperor, were left alone in the hippodrome. The fidelity of the guards was doubtful; but the military force of Justinian consisted in three thousand veterans, who had been trained to valour and discipline in the Persian and Illyrian wars. Under the command of Belisarius and Mundus, they silently marched in two divisions from the palace, forced their obscure way through narrow passages, expiring flames, and falling edifices, and burst open at the same moment the two opposite gates of the hippodrome.

In this narrow space, the disorderly and affrighted crowd was incapable of resisting on either side a firm and regular attack; the blues signalled the fury of their repentance; and it is computed that above thirty thousand persons were slain in the merciless and promiscuous carnage of the day. Hypatius was dragged from his throne, and conducted with his brother Pompey to the feet of the emperor; they implored his clemency; but their crime was manifest, their innocence uncertain, and Justinian had been too much terrified to forgive. The next morning the two nephews of Anastasius, with eighteen *illustrious* accomplices of patrician or consular rank, were privately executed by the soldiers; their bodies were thrown into the sea, their palaces razed, and their fortunes confiscated. The hippodrome itself was condemned during several years to a mournful silence; with the restoration of the games, the same disorders revived; and the blue and green factions continued to afflict the reign of Justinian, and to disturb the tranquillity of the Eastern empire.[54](#)

III. That empire, after Rome was Barbarous, still embraced the nations whom she had conquered beyond the Hadriatic and as far as the frontiers of Ethiopia and Persia. Justinian reigned over sixty-four provinces and nine hundred and thirty-five cities;[55](#) his dominions were blessed by nature with the advantages of soil, situation, and climate; and the improvements of human art had been perpetually diffused along the coast of the Mediterranean and the banks of the Nile, from ancient Troy to the Egyptian Thebes. Abraham[56](#) had been relieved by the well-known plenty of Egypt; the same country, a small and populous tract, was still capable of exporting each year two hundred and sixty thousand quarters of wheat for the use of Constantinople;[57](#) and the capital of Justinian was supplied with the manufactures of Sidon, fifteen centuries after they had been celebrated in the poems of Homer.[58](#) The annual powers of vegetation, instead of being exhausted by two thousand harvests, were renewed and invigorated by skilful husbandry, rich manure, and seasonable repose. The breed of domestic animals was infinitely multiplied. Plantations, buildings, and the instruments of labour and luxury, which are more durable than the term of human life, were accumulated by the care of successive generations. Tradition preserved, and experience simplified, the humble practice of the arts; society was enriched by the division of labour and the facility of exchange; and every Roman was lodged, clothed, and subsisted by the industry of a thousand hands. The invention of the loom and distaff has been piously ascribed to the gods. In every age, a variety of animal and vegetable productions, hair, skins, wool, flax, cotton, and at length *silk*, have been skilfully manufactured to hide or adorn the human body; they were stained with an infusion of permanent colours; and the pencil was successfully employed to improve the labours of the loom. In the choice of those colours[59](#) which imitate the beauties of nature, the freedom of taste and fashion was indulged; but the deep purple[60](#) which the Phœnicians extracted from a shell-fish was restrained to the sacred person and palace of the emperor; and the penalties of treason were denounced against the ambitious subjects who dared to usurp the prerogative of the throne.[61](#)

I need not explain that *silk*⁶² is originally spun from the bowels of a caterpillar, and that it composes the golden tomb from whence a worm emerges in the form of a butterfly. Till the reign of Justinian, the silk-worms who feed on the leaves of the white mulberry-tree were confined to China; those of the pine, the oak, and the ash were common in the forests both of Asia and Europe; but, as their education is more difficult and their produce more uncertain, they were generally neglected, except in the little island of Ceos, near the coast of Attica. A thin gauze was procured from their webs, and this Cean manufacture, the invention of a woman, for female use, was long admired both in the East and at Rome. Whatever suspicions may be raised by the garments of the Medes and Assyrians, Virgil is the most ancient writer who expressly mentions the soft wool which was combed from the trees of the Seres or Chinese;⁶³ and this natural error, less marvellous than the truth, was slowly corrected by the knowledge of a valuable insect, the first artificer of the luxury of nations. That rare and elegant luxury was censured, in the reign of Tiberius, by the gravest of the Romans; and Pliny, in affected though forcible language, has condemned the thirst of gain, which explored the last confines of the earth for the pernicious purpose of exposing to the public eye naked draperies and transparent matrons.⁶⁴ A dress which shewed the turn of the limbs and colour of the skin might gratify vanity or provoke desire; the silks which had been closely woven in China were sometimes unravelled by the Phœnician women, and the precious materials were multiplied by a looser texture and the intermixture of linen threads.⁶⁵ Two hundred years after the age of Pliny, the use of pure or even of mixed silks was confined to the female sex, till the opulent citizens of Rome and the provinces were insensibly familiarised with the example of Elagabalus, the first who, by this effeminate habit, had sullied the dignity of an emperor and a man. Aurelian complained that a pound of silk was sold at Rome for twelve ounces of gold; but the supply increased with the demand, and the price diminished with the supply. If accident or monopoly sometimes raised the value even above the standard of Aurelian, the manufacturers of Tyre and Berytus were sometimes compelled, by the operation of the same causes, to content themselves with a ninth part of that extravagant rate.⁶⁶ A law was thought necessary to discriminate the dress of comedians from that of senators; and of the silk exported from its native country the far greater part was consumed by the subjects of Justinian. They were still more intimately acquainted with a shell-fish of the Mediterranean, surnamed the silk-worm of the sea; the fine wool or hair by which the mother-of-pearl affixes itself to the rock is now manufactured for curiosity rather than use; and a robe obtained from the same singular materials was the gift of the Roman emperor to the satraps of Armenia.⁶⁷

A valuable merchandise of small bulk is capable of defraying the expense of land carriage; and the caravans traversed the whole latitude of Asia in two hundred and forty-three days from the Chinese ocean to the sea-coast of Syria. Silk was

immediately delivered to the Romans by the Persian merchants,⁶⁸ who frequented the fairs of Armenia and Nisibis; but this trade, which in the intervals of truce was oppressed by avarice and jealousy, was totally interrupted by the long wars of the rival monarchies. The great king might proudly number Sogdiana, and even *Serica*, among the provinces of his empire; but his real dominion was bounded by the Oxus, and his useful intercourse with the Sogdoites, beyond the river, depended on the pleasure of their conquerors, the white Huns and the Turks, who successively reigned over that industrious people. Yet the most savage dominion has not extirpated the seeds of agriculture and commerce in a region which is celebrated as one of the four gardens of Asia; the cities of Samarcand and Bochara are advantageously seated for the exchange of its various productions; and their merchants purchased from the Chinese⁶⁹ the raw or manufactured silk which they transported into Persia for the use of the Roman empire. In the vain capital of China, the Sogdian caravans were entertained as the suppliant embassies of tributary kingdoms, and, if they returned in safety, the bold adventure was rewarded with exorbitant gain. But the difficult and perilous march from Samarcand to the first town of Shensi could not be performed in less than sixty, eighty, or one hundred days; as soon as they had passed the Jaxartes, they entered the desert; and the wandering hords, unless they are restrained by armies and garrisons, have always considered the citizen and the traveller as the objects of lawful rapine. To escape the Tartar robbers and the tyrants of Persia, the silk caravans explored a more southern road; they traversed the mountains of Thibet, descended the streams of the Ganges or the Indus, and patiently expected, in the ports of Guzerat and Malabar, the annual fleets of the West.⁷⁰ But the dangers of the desert were found less intolerable than toil, hunger, and the loss of time; the attempt was seldom renewed; and the only European who has passed that unfrequented way applauds his own diligence, that in nine months after his departure from Pekin he reached the mouth of the Indus. The ocean, however, was open to the free communication of mankind. From the great river to the tropic of Cancer, the provinces of China were subdued and civilised by the emperors of the North; they were filled about the time of the Christian era with cities and men, mulberry-trees and their precious inhabitants; and, if the Chinese, with the knowledge of the compass, had possessed the genius of the Greeks or Phœnicians, they might have spread their discoveries over the southern hemisphere. I am not qualified to examine, and I am not disposed to believe, their distant voyages to the Persian gulf or the Cape of Good Hope; but their ancestors might equal the labours and success of the present race, and the sphere of their navigation might extend from the isles of Japan to the straits of Malacca, the pillars, if we may apply that name, of an Oriental Hercules.⁷¹ Without losing sight of land, they might sail along the coast to the extreme promontory of Achin, which is annually visited by ten or twelve ships laden with the productions, the manufactures, and even the artificers of China; the island of Sumatra and the opposite peninsula are faintly delineated⁷² as the regions of gold and silver; and the trading cities named in the geography of Ptolemy may indicate that this wealth was not solely derived from the mines. The direct interval between Sumatra and Ceylon is about three hundred leagues; the Chinese and Indian navigators

were conducted by the flight of birds and periodical winds, and the ocean might be securely traversed in square-built ships, which, instead of iron, were sewed together with the strong thread of the cocoa-nut. Ceylon, Serendib, or Taprobana was divided between two hostile princes; one of whom possessed the mountains, the elephants, and the luminous carbuncle; and the other enjoyed the more solid riches of domestic industry, foreign trade, and the capacious harbour of Trinquemale, which received and dismissed the fleets of the East and West. In this hospitable isle, at an equal distance (as it was computed) from their respective countries, the silk merchants of China, who had collected in their voyages aloes, cloves, nutmegs, and sandal-wood, maintained a free and beneficial commerce with the inhabitants of the Persian gulf. The subjects of the great king exalted, without a rival, his power and magnificence; and the Roman, who confounded their vanity by comparing his paltry coin with a gold medal of the emperor Anastasius, had sailed to Ceylon in an Æthiopian ship, as a simple passenger.[73](#)

As silk became of indispensable use, the emperor Justinian saw, with concern, that the Persians had occupied by land and sea the monopoly of this important supply, and that the wealth of his subjects was continually drained by a nation of enemies and idolaters. An active government would have restored the trade of Egypt and the navigation of the Red Sea, which had decayed with the prosperity of the empire; and the Roman vessels might have sailed, for the purchase of silk, to the ports of Ceylon, of Malacca, or even of China. Justinian embraced a more humble expedient, and solicited the aid of his Christian allies, the Æthiopians of Abyssinia, who had recently acquired the arts of navigation, the spirit of trade, and the seaport of Adulis,[74](#) still decorated with the trophies of a Grecian conqueror. Along the African coast, they penetrated to the equator in search of gold, emeralds, and aromatics; but they wisely declined an unequal competition, in which they must be always prevented by the vicinity of the Persians to the markets of India; and the emperor submitted to the disappointment, till his wishes were gratified by an unexpected event. The gospel had been preached to the Indians: a bishop already governed the Christians of St. Thomas on the pepper coast of Malabar; a church was planted in Ceylon; and the missionaries pursued the footsteps of commerce to the extremities of Asia.[75](#) Two Persian monks had long resided in China, perhaps in the royal city of Nankin, the seat of a monarch addicted to foreign superstitions, and who actually received an embassy from the isle of Ceylon. Amidst their pious occupations, they viewed with a curious eye the common dress of the Chinese, the manufactures of silk, and the myriads of silk-worms, whose education (either on trees or in houses) had once been considered as the labour of queens.[76](#) They soon discovered that it was impracticable to transport the short-lived insect, but that in the eggs a numerous progeny might be preserved and multiplied in a distant climate. Religion or interest had more power over the Persian monks than the love of their country: after a long journey, they arrived at Constantinople, imparted their project to the emperor, and were liberally encouraged by the gifts and promises of

Justinian. To the historians of that prince, a campaign at the foot of Mount Caucasus has seemed more deserving of a minute relation than the labours of these missionaries of commerce, who again entered China, deceived a jealous people by concealing the eggs of the silk-worm in a hollow cane, and returned in triumph with the spoils of the East. Under their direction, the eggs were hatched at the proper season by the artificial heat of dung; the worms were fed with mulberry leaves; they lived and laboured in a foreign climate; a sufficient number of butterflies was saved to propagate the race; and trees were planted to supply the nourishment of the rising generations. Experience and reflection corrected the errors of a new attempt, and the Sogdoite ambassadors acknowledged, in the succeeding reign, that the Romans were not inferior to the natives of China in the education of the insects and the manufactures of silk,⁷⁷ in which both China and Constantinople have been surpassed by the industry of modern Europe. I am not insensible of the benefits of elegant luxury; yet I reflect with some pain that, if the importers of silk had introduced the art of printing, already practised by the Chinese, the comedies of Menander and the entire decads of Livy would have been perpetuated in the editions of the sixth century. A larger view of the globe might at least have promoted the improvement of speculative science, but the Christian geography was forcibly extracted from texts of scripture, and the study of nature was the surest symptom of an unbelieving mind. The orthodox faith confined the habitable world to *one* temperate zone, and represented the earth as an oblong surface, four hundred days' journey in length, two hundred in breadth, encompassed by the ocean, and covered by the solid crystal of the firmament.⁷⁸

IV. The subjects of Justinian were dissatisfied with the times, and with the government. Europe was over-run by the Barbarians, and Asia by the monks; the poverty of the West discouraged the trade and manufactures of the East; the produce of labour was consumed by the unprofitable servants of the church, the state, and the army; and a rapid decrease was felt in the fixed and circulating capitals which constitute the national wealth. The public distress had been alleviated by the economy of Anastasius, and that prudent emperor accumulated an immense treasure while he delivered his people from the most odious or oppressive taxes. Their gratitude universally applauded the abolition of the *gold of affliction*, a personal tribute on the industry of the poor,⁷⁹ but more intolerable, as it should seem, in the form than in the substance, since the flourishing city of Edessa paid only one hundred and forty pounds of gold, which was collected in four years from ten thousand artificers.⁸⁰ Yet such was the parsimony which supported this liberal disposition that, in a reign of twenty-seven years, Anastasius saved, from his annual revenue, the enormous sum of thirteen millions sterling, or three hundred and twenty thousand pounds of gold.⁸¹ His example was neglected, and his treasure was abused, by the nephew of Justin. The riches of Justinian were speedily exhausted by alms and buildings, by ambitious wars, and ignominious treaties. His revenues were found inadequate to his expenses. Every art was tried to extort from the people the gold and silver which he scattered with a

lavish hand from Persia to France;[82](#) his reign was marked by the vicissitudes, or rather by the combat, of rapaciousness and avarice, of splendour and poverty; he lived with the reputation of hidden treasures,[83](#) and bequeathed to his successor the payment of his debts.[84](#) Such a character has been justly accused by the voice of the people and of posterity; but public discontent is credulous; private malice is bold; and a lover of truth will peruse with a suspicious eye the instructive anecdotes of Procopius. The secret historian represents only the vices of Justinian, and those vices are darkened by his malevolent pencil. Ambiguous actions are imputed to the worst motives; error is confounded with guilt, accident with design, and laws with abuses; the partial injustice of a moment is dexterously applied as the general maxim of a reign of thirty-two years; the emperor alone is made responsible for the faults of his officers, the disorders of the times, and the corruption of his subjects; and even the calamities of nature, plagues, earthquakes, and inundations are imputed to the prince of the demons, who had mischievously assumed the form of Justinian.[85](#)

After this precaution I shall briefly relate the anecdotes of avarice and rapine, under the following heads: I. Justinian was so profuse that he could not be liberal. The civil and military officers, when they were admitted into the service of the palace, obtained an humble rank and a moderate stipend; they ascended by seniority to a station of affluence and repose; the annual pensions, of which the most honourable class was abolished by Justinian, amounted to four hundred thousand pounds; and this domestic economy was deplored by the venal or indigent courtiers as the last outrage on the majesty of the empire. The posts, the salaries of physicians, and the nocturnal illuminations were objects of more general concern; and the cities might justly complain that he usurped the municipal revenues which had been appropriated to these useful institutions. Even the soldiers were injured; and such was the decay of military spirit that they were injured with impunity. The emperor refused, at the return of each fifth year, the customary donative of five pieces of gold, reduced his veterans to beg their bread, and suffered unpaid armies to melt away in the wars of Italy and Persia. II. The humanity of his predecessors had always remitted, in some auspicious circumstance of their reign, the arrears of the public tribute; and they dexterously assumed the merit of resigning those claims which it was impracticable to enforce. “Justinian in the space of thirty-two years has never granted a similar indulgence; and many of his subjects have renounced the possession of those lands whose value is insufficient to satisfy the demands of the treasury. To the cities which had suffered by hostile inroads, Anastasius promised a general exemption of seven years: the provinces of Justinian have been ravaged by the Persians and Arabs, the Huns and Sclavonians; but his vain and ridiculous dispensations of a single year have been confined to those places which were actually taken by the enemy.” Such is the language of the secret historian, who expressly denies that *any* indulgence was granted to Palestine after the revolt of the Samaritans: a false and odious charge, confuted by the authentic record, which attests a relief of thirteen centenaries of gold (fifty-two thousand pounds)

obtained for that desolate province by the intercession of St. Sabas.⁸⁶ III. Procopius has not condescended to explain the system of taxation, which fell like a hail-storm upon the land, like a devouring pestilence on its inhabitants; but we should become the accomplices of his malignity, if we imputed to Justinian alone the ancient though rigorous principle that a whole district should be condemned to sustain the partial loss of the persons or property of individuals. The *Annona*, or supply of corn for the use of the army and capital, was a grievous and arbitrary exaction, which exceeded, perhaps in a tenfold proportion, the ability of the farmer; and his distress was aggravated by the partial injustice of weights and measures, and the expense and labour of distant carriage. In a time of scarcity an extraordinary requisition was made to the adjacent provinces of Thrace, Bithynia, and Phrygia; but the proprietors, after a wearisome journey and a perilous navigation, received so inadequate a compensation that they would have chosen the alternative of delivering both the corn and price at the doors of their granaries. These precautions might indicate a tender solicitude for the welfare of the capital; yet Constantinople did not escape the rapacious despotism of Justinian. Till his reign, the straits of the Bosphorus and Hellespont were open to the freedom of trade, and nothing was prohibited except the exportation of arms for the service of the Barbarians. At each of these gates of the city, a prætor was stationed, the minister of Imperial avarice; heavy customs were imposed on the vessels and their merchandise; the oppression was retaliated on the helpless consumer; the poor were afflicted by the artificial scarcity and exorbitant price of the market; and a people, accustomed to depend on the liberality of their prince, might sometimes complain of the deficiency of water and bread.⁸⁷ The *aerial* tribute, without a name, a law, or a definite object, was an annual gift of one hundred and twenty thousand pounds, which the emperor accepted from his Prætorian prefect; and the means of payment were abandoned to the discretion of that powerful magistrate. IV. Even such a tax was less intolerable than the privilege of monopolies, which checked the fair competition of industry, and, for the sake of a small and dishonest gain, imposed an arbitrary burthen on the wants and luxury of the subject. "As soon (I transcribe the Anecdotes) as the exclusive sale of silk was usurped by the Imperial treasurer, a whole people, the manufacturers of Tyre and Berytus, was reduced to extreme misery, and either perished with hunger or fled to the hostile dominions of Persia." A province might suffer by the decay of its manufactures, but in this example of silk Procopius has partially overlooked the inestimable and lasting benefit which the empire received from the curiosity of Justinian. His addition of one seventh to the ordinary price of copper money may be interpreted with the same candour; and the alteration, which might be wise, appears to have been innocent; since he neither alloyed the purity, nor enhanced the value, of the gold coin,⁸⁸ the legal measure of public and private payments. V. The ample jurisdiction required by the farmers of the revenue to accomplish their engagements might be placed in an odious light, as if they had purchased from the emperor the lives and fortunes of their fellow-citizens. And a more direct sale of honours and offices was transacted in the palace, with the permission, or at least with the connivance, of Justinian and Theodora. The claims of merit, even those of favour, were disregarded,

and it was almost reasonable to expect that the bold adventurer who had undertaken the trade of a magistrate should find a rich compensation for infamy, labour, danger, the debts which he had contracted, and the heavy interest which he paid. A sense of the disgrace and mischief of this venal practice at length awakened the slumbering virtue of Justinian; and he attempted, by the sanction of oaths⁸⁹ and penalties, to guard the integrity of his government; but at the end of a year of perjury his rigorous edict was suspended, and corruption licentiously abused her triumph over the impotence of the laws. VI. The testament of Eulalius, count of the domestics, declared the emperor his sole heir, on condition, however, that he should discharge his debts and legacies, allow to his three daughters a decent maintenance, and bestow each of them in marriage, with a portion of ten pounds of gold. But the splendid fortune of Eulalius had been consumed by fire; and the inventory of his goods did not exceed the trifling sum of five hundred and sixty-four pieces in gold. A similar instance in Grecian history admonished the emperor of the honourable part prescribed for his imitation. He checked the selfish murmurs of the treasury, applauded the confidence of his friend, discharged the legacies and debts, educated the three virgins under the eye of the empress Theodora, and doubled the marriage portion which had satisfied the tenderness of their father.⁹⁰ The humanity of a prince (for princes cannot be generous) is entitled to some praise; yet even in this act of virtue we may discover the inveterate custom of supplanting the legal or natural heirs, which Procopius imputes to the reign of Justinian. His charge is supported by eminent names and scandalous examples; neither widows nor orphans were spared; and the art of soliciting, or extorting, or supposing testaments was beneficially practised by the agents of the palace. This base and mischievous tyranny invades the security of private life; and the monarch who has indulged an appetite for gain will soon be tempted to anticipate the moment of succession, to interpret wealth as an evidence of guilt, and to proceed from the claim of inheritance to the power of confiscation. VII. Among the forms of rapine, a philosopher may be permitted to name the conversion of Pagan or heretical riches to the use of the faithful; but in the time of Justinian this holy plunder was condemned by the sectaries alone, who became the victims of his orthodox avarice.⁹¹

Dishonour might be ultimately reflected on the character of Justinian; but much of the guilt, and still more of the profit, was intercepted by the ministers, who were seldom promoted for their virtues, and not always selected for their talents.^{91a} The merits of Tribonian the quæstor will hereafter be weighed in the reformation of the Roman law; but the economy of the East was subordinate to the Prætorian prefect, and Procopius has justified his Anecdotes by the portrait, which he exposes in his public history, of the notorious vices of John of Cappadocia.⁹² His knowledge was not borrowed from the schools,⁹³ and his style was scarcely legible; but he excelled in the powers of native genius to suggest the wisest counsels and to find expedients in the most desperate situations. The corruption of his heart was equal to the vigour of his understanding. Although he was suspected of magic and Pagan superstition, he

appeared insensible to the fear of God or the reproaches of man; and his aspiring fortune was raised on the death of thousands, the poverty of millions, the ruin of cities, and the desolation of provinces. From the dawn of light to the moment of dinner, he assiduously laboured to enrich his master and himself at the expense of the Roman world; the remainder of the day was spent in sensual and obscene pleasures; and the silent hours of the night were interrupted by the perpetual dread of the justice of an assassin. His abilities, perhaps his vices, recommended him to the lasting friendship of Justinian; the emperor yielded with reluctance to the fury of the people; his victory was displayed by the immediate restoration of their enemy; and they felt above ten years, under his oppressive administration, that he was stimulated by revenge rather than instructed by misfortune. Their murmurs served only to fortify the resolution of Justinian; but the prefect in the insolence of favour provoked the resentment of Theodora, disdained a power before which every knee was bent, and attempted to sow the seeds of discord between the emperor and his beloved consort. Even Theodora herself was constrained to dissemble, to wait a favourable moment, and by an artful conspiracy to render John of Cappadocia the accomplice of his own destruction. At a time when Belisarius, unless he had been a hero, must have shewn himself a rebel, his wife Antonina, who enjoyed the secret confidence of the empress, communicated his feigned discontent to Euphemia, the daughter of the prefect; the credulous virgin imparted to her father the dangerous project; and John, who might have known the value of oaths and promises, was tempted to accept a nocturnal, and almost treasonable, interview with the wife of Belisarius. An ambuscade of guards and eunuchs had been posted by the command of Theodora; they rushed with drawn swords to seize or to punish the guilty minister; he was saved by the fidelity of his attendants; but, instead of appealing to a gracious sovereign who had privately warned him of his danger, he pusillanimously fled to the sanctuary of the church. The favourite of Justinian was sacrificed to conjugal tenderness or domestic tranquillity; the conversion of a prefect into a priest extinguished his ambitious hopes; but the friendship of the emperor alleviated his disgrace, and he retained in the mild exile of Cyzicus an ample portion of his riches. Such imperfect revenge could not satisfy the unrelenting hatred of Theodora; the murder of his old enemy, the bishop of Cyzicus, afforded a decent pretence; and John of Cappadocia, whose actions had deserved a thousand deaths, was at last condemned for a crime of which he was innocent. A great minister, who had been invested with the honours of consul and patrician, was ignominiously scourged like the vilest of malefactors; a tattered cloak was the sole remnant of his fortunes; he was transported in a bark to the place of his banishment at Antinopolis in Upper Egypt, and the prefect of the East begged his bread through the cities which had trembled at his name. During an exile of seven years, his life was protracted and threatened by the ingenious cruelty of Theodora; and, when her death permitted the emperor to recall a servant whom he had abandoned with regret, the ambition of John of Cappadocia was reduced to the humble duties of the sacerdotal profession. His successors convinced the subjects of Justinian that the arts of oppression might still be improved by experience and industry; the frauds of a Syrian

banker were introduced into the administration of the finances; and the example of the prefect was diligently copied by the quæstor, the public and private treasurer, the governors of provinces, and the principal magistrates of the Eastern empire.[94](#)

V. The *edifices* of Justinian were cemented with the blood and treasure of his people; but those stately structures appeared to announce the prosperity of the empire, and actually displayed the skill of their architects. Both the theory and practice of the arts which depend on mathematical science and mechanical power were cultivated under the patronage of the emperors; the fame of Archimedes was rivalled by Proclus and Anthemius; and, if their *miracles* had been related by intelligent spectators, they might now enlarge the speculations, instead of exciting the distrust, of philosophers. A tradition has prevailed that the Roman fleet was reduced to ashes in the port of Syracuse by the burning-glasses of Archimedes;[95](#) and it is asserted that a similar expedient was employed by Proclus to destroy the Gothic vessels in the harbour of Constantinople, and to protect his benefactor Anastasius against the bold enterprise of Vitalian.[96](#) A machine was fixed on the walls of the city, consisting of an hexagon mirror of polished brass, with many smaller and moveable polygons to receive and reflect the rays of the meridian sun; and a consuming flame was darted to the distance, perhaps, of two hundred feet.[97](#) The truth of these two extraordinary facts is invalidated by the silence of the most authentic historians; and the use of burning-glasses was never adopted in the attack or defence of places.[98](#) Yet the admirable experiments of a French philosopher[99](#) have demonstrated the possibility of such a mirror; and, since it is possible, I am more disposed to attribute the art to the greatest mathematicians of antiquity than to give the merit of the fiction to the idle fancy of a monk or a sophist. According to another story, Proclus applied sulphur to the destruction of the Gothic fleet;[100](#) in a modern imagination, the name of sulphur is instantly connected with the suspicion of gunpowder, and that suspicion is propagated by the secret arts of his disciple Anthemius.[101](#) A citizen of Tralles in Asia had five sons, who were all distinguished in their respective professions by merit and success. Olympius excelled in the knowledge and practice of the Roman jurisprudence. Dioscorus and Alexander became learned physicians; but the skill of the former was exercised for the benefit of his fellow-citizens, while his more ambitious brother acquired wealth and reputation at Rome. The fame of Metrodorus the grammarian, and of Anthemius the mathematician and architect, reached the ears of the emperor Justinian, who invited them to Constantinople; and, while the one instructed the rising generation in the schools of eloquence, the other filled the capital and provinces with more lasting monuments of his art. In a trifling dispute relative to the walls or windows of their contiguous houses, he had been vanquished by the eloquence of his neighbour Zeno; but the orator was defeated in his turn by the master of mechanics, whose malicious, though harmless, stratagems are darkly represented by the ignorance of Agathias. In a lower room, Anthemius arranged several vessels or cauldrons of water, each of them covered by the wide bottom of a leathern tube, which rose to a

narrow top, and was artificially conveyed among the joists and rafters of the adjacent building. A fire was kindled beneath the cauldron; the steam of the boiling water ascended through the tubes; the house was shaken by the efforts of imprisoned air, and its trembling inhabitants might wonder that the city was unconscious of the earthquake which they had felt. At another time, the friends of Zeno, as they sat at table, were dazzled by the intolerable light which flashed in their eyes from the reflecting mirrors of Anthemius; they were astonished by the noise which he produced from a collision of certain minute and sonorous particles; and the orator declared in tragic style to the senate, that a mere mortal must yield to the power of an antagonist who shook the earth with the trident of Neptune and imitated the thunder and lightning of Jove himself. The genius of Anthemius and his colleague Isidore the Milesian was excited and employed by a prince whose taste for architecture had degenerated into a mischievous and costly passion. His favourite architects submitted their designs and difficulties to Justinian, and discreetly confessed how much their laborious meditations were surpassed by the intuitive knowledge or celestial inspiration of an emperor, whose views were always directed to the benefit of his people, the glory of his reign, and the salvation of his soul.[102](#)

The principal church, which was dedicated by the founder of Constantinople to Saint Sophia, or the eternal wisdom, had been twice destroyed by fire: after the exile of John Chrysostom, and during the *Nika* of the blue and green factions. No sooner did the tumult subside than the Christian populace deplored their sacrilegious rashness; but they might have rejoiced in the calamity, had they foreseen the glory of the new temple, which at the end of forty days was strenuously undertaken by the piety of Justinian.[103](#) The ruins were cleared away, a more spacious plan was described, and, as it required the consent of some proprietors of ground, they obtained the most exorbitant terms from the eager desires and timorous conscience of the monarch. Anthemius formed the design, and his genius directed the hands of ten thousand workmen, whose payment in pieces of fine silver was never delayed beyond the evening. The emperor himself, clad in a linen tunic, surveyed each day their rapid progress, and encouraged their diligence by his familiarity, his zeal, and his rewards. The new cathedral of St. Sophia was consecrated by the patriarch, five years, eleven months, and ten days from the first foundation; and, in the midst of the solemn festival, Justinian exclaimed with devout vanity, “Glory be to God who hath thought me worthy to accomplish so great a work; I have vanquished thee, O Solomon!”[104](#) But the pride of the Roman Solomon, before twenty years had elapsed, was humbled by an earthquake, which overthrew the eastern part of the dome. Its splendour was again restored by the perseverance of the same prince; and in the thirty-sixth year of his reign Justinian celebrated the second dedication of a temple, which remains, after twelve centuries, a stately monument of his fame. The architecture of St. Sophia, which is now converted into the principal mosch, has been imitated by the Turkish sultans, and that venerable pile continues to excite the fond admiration of the Greeks, and the more rational curiosity of European travellers. The eye of the spectator is

disappointed by an irregular prospect of half domes and shelving roofs; the western front, the principal approach, is destitute of simplicity and magnificence; and the scale of dimensions has been much surpassed by several of the Latin cathedrals. But the architect who first erected an *aerial* cupola is entitled to the praise of bold design and skilful execution. The dome of St. Sophia, illuminated by four and twenty windows, is formed with so small a curve that the depth is equal only to one sixth of its diameter; the measure of that diameter is one hundred and fifteen feet; and the lofty centre, where a crescent has supplanted the cross, rises to the perpendicular height of one hundred and eighty feet above the pavement. The circle which encompasses the dome lightly reposes on four strong arches, and their weight is firmly supported by four massy piles whose strength is assisted on the northern and southern sides by four columns of Egyptian granite. A Greek cross, inscribed in a quadrangle, represents the form of the edifice; the exact breadth is two hundred and fortythree feet, and two hundred and sixty-nine may be assigned for the extreme length from the sanctuary in the east to the nine western doors which open into the vestibule, and from thence into the *narthex* or exterior portico. That portico was the humble station of the penitents. The nave or body of the church was filled by the congregation of the faithful; but the two sexes were prudently distinguished, and the upper and lower galleries were allotted for the more private devotion of the women. Beyond the northern and southern piles, a balustrade, terminated on either side by the thrones of the emperor and the patriarch, divided the nave from the choir; and the space, as far as the steps of the altar, was occupied by the clergy and singers. The altar itself, a name which insensibly became familiar to Christian ears, was placed in the eastern recess, artificially built in the form of a demi-cylinder; and this sanctuary communicated by several doors with the sacristy, the vestry, the baptistery, and the contiguous buildings subservient either to the pomp of worship or the private use of the ecclesiastical ministers. The memory of past calamities inspired Justinian with a wise resolution that no wood, except for the doors, should be admitted into the new edifice; and the choice of the materials was applied to the strength, the lightness, or the splendour of the respective parts. The solid piles which sustained the cupola were composed of huge blocks of freestone, hewn into squares and triangles, fortified by circles of iron, and firmly cemented by the infusion of lead and quicklime; but the weight of the cupola was diminished by the levity of its substance, which consists either of pumice-stone that floats in the water or of bricks from the isle of Rhodes five times less ponderous than the ordinary sort. The whole frame of the edifice was constructed of brick; but those base materials were concealed by a crust of marble; and the inside of St. Sophia, the cupola, the two larger and the six smaller semi-domes, the walls, the hundred columns, and the pavement, delight even the eyes of Barbarians with a rich and variegated picture. A poet,¹⁰⁵ who beheld the primitive lustre of St. Sophia, enumerates the colours, the shades, and the spots of ten or twelve marbles, jaspers, and porphyries, which nature had profusely diversified, and which were blended and contrasted as it were by a skilful painter. The triumph of Christ was adorned with the last spoils of Paganism, but the greater part of these costly stones was extracted from the quarries of Asia Minor, the isles and

continent of Greece, Egypt, Africa, and Gaul. Eight columns of porphyry, which Aurelian had placed in the temple of the sun, were offered by the piety of a Roman matron; eight others of green marble were presented by the ambitious zeal of the magistrates of Ephesus: both are admirable by their size and beauty, but every order of architecture disclaims their fantastic capitals. A variety of ornaments and figures was curiously expressed in mosaic; and the images of Christ, of the Virgin, of saints, and of angels, which have been defaced by Turkish fanaticism, were dangerously exposed to the superstition of the Greeks. According to the sanctity of each object, the precious metals were distributed in thin leaves or in solid masses. The balustrade of the choir, the capitals of the pillars, the ornaments of the doors and galleries, were of gilt bronze; the spectator was dazzled by the glittering aspect of the cupola; the sanctuary contained forty thousand pounds weight of silver; and the holy vases and vestments of the altar were of the purest gold, enriched with inestimable gems. Before the structure of the church had risen two cubits above the ground, forty-five thousand two hundred pounds were already consumed; and the whole expense amounted to three hundred and twenty thousand: each reader, according to the measure of his belief, may estimate their value either in gold or silver; but the sum of one million sterling is the result of the lowest computation. A magnificent temple is a laudable monument of national taste and religion, and the enthusiast who entered the dome of St. Sophia might be tempted to suppose that it was the residence, or even the workmanship, of the Deity. Yet how dull is the artifice, how insignificant is the labour, if it be compared with the formation of the vilest insect that crawls upon the surface of the temple!

So minute a description of an edifice which time has respected may attest the truth, and excuse the relation, of the innumerable works, both in the capital and provinces, which Justinian constructed on a smaller scale and less durable foundations.¹⁰⁶ In Constantinople alone, and the adjacent suburbs, he dedicated twenty-five churches to the honour of Christ, the Virgin, and the saints: most of these churches were decorated with marble and gold; and their various situation was skilfully chosen in a populous square or a pleasant grove, on the margin of the sea-shore or on some lofty eminence which overlooked the continents of Europe and Asia. The church of the Holy Apostles at Constantinople and that of St. John at Ephesus appear to have been framed on the same model: their domes aspired to imitate the cupolas of St. Sophia; but the altar was more judiciously placed under the centre of the dome, at the junction of four stately porticoes, which more accurately expressed the figure of the Greek cross. The Virgin of Jerusalem might exult in the temple erected by her Imperial votary on a most ungrateful spot, which afforded neither ground nor materials to the architect. A level was formed, by raising part of a deep valley to the height of the mountain. The stones of a neighbouring quarry were hewn into regular forms; each block was fixed on a peculiar carriage drawn by forty of the strongest oxen; and the roads were widened for the passage of such enormous weights. Lebanon furnished her loftiest cedars for the timbers of the church; and the seasonable discovery of a vein of red marble supplied its beautiful columns, two of which, the supporters of the exterior portico, were

esteemed the largest in the world. The pious munificence of the emperor was diffused over the Holy Land; and, if reason should condemn the monasteries of both sexes which were built or restored by Justinian, yet charity must applaud the wells which he sunk, and the hospitals which he founded, for the relief of the weary pilgrims. The schismatical temper of Egypt was ill-entitled to the royal bounty; but in Syria and Africa some remedies were applied to the disasters of wars and earthquakes, and both Carthage and Antioch, emerging from their ruins, might revere the name of their gracious benefactor.[107](#) Almost every saint in the calendar acquired the honours of a temple; almost every city of the empire obtained the solid advantages of bridges, hospitals, and aqueducts; but the severe liberality of the monarch disdained to indulge his subjects in the popular luxury of baths and theatres. While Justinian laboured for the public service, he was not unmindful of his own dignity and ease. The Byzantine palace, which had been damaged by the conflagration, was restored with new magnificence; and some notion may be conceived of the whole edifice by the vestibule or hall, which, from the doors perhaps or the roof, was surnamed *chalce*, or the brazen. The dome of a spacious quadrangle was supported by massy pillars; the pavement and walls were encrusted with many-coloured marbles — the emerald green of Laconia, the fiery red, and the white Phrygian stone intersected with veins of a sea-green hue: the mosaic paintings of the dome and sides represented the glories of the African and Italian triumphs. On the Asiatic shore of the Propontis, at a small distance to the east of Chalcedon, the costly palace and gardens of Heræum[108](#) were prepared for the summer residence of Justinian, and more especially of Theodora. The poets of the age have celebrated the rare alliance of nature and art, the harmony of the nymphs of the groves, the fountains, and the waves; yet the crowd of attendants who followed the court complained of their inconvenient lodgings,[109](#) and the nymphs were too often alarmed by the famous Porphyrio, a whale of ten cubits in breadth and thirty in length, who was stranded at the mouth of the river Sangarius, after he had infested more than half a century the seas of Constantinople.[110](#)

The fortifications of Europe and Asia were multiplied by Justinian; but the repetition of those timid and fruitless precautions exposes to a philosophic eye the debility of the empire.[111](#) From Belgrade to the Euxine, from the conflux of the Save to the mouth of the Danube, a chain of above fourscore fortified places was extended along the banks of the great river. Single watch-towers were changed into spacious citadels; vacant walls, which the engineers contracted or enlarged according to the nature of the ground, were filled with colonies or garrisons; a strong fortress defended the ruins of Trajan's bridge,[112](#) and several military stations affected to spread beyond the Danube the pride of the Roman name. But that name was divested of its terrors; the Barbarians, in their annual inroads, passed, and contemptuously repassed, before these useless bulwarks; and the inhabitants of the frontier, instead of reposing under the shadow of the general defence, were compelled to guard, with incessant vigilance, their separate habitations. The solitude of ancient cities was replenished; the new foundations of

Justinian acquired, perhaps too hastily, the epithets of impregnable and populous; and the auspicious place of his own nativity attracted the grateful reverence of the vainest of princes. Under the name of *Justiniana prima*, the obscure village of Tauresium became the seat of an archbishop and a prefect, whose jurisdiction extended over seven warlike provinces of Illyricum;[113](#) and the corrupt appellation of *Giustendil* still indicates, about twenty miles to the south of Sophia, the residence of a Turkish sanjak.[114](#) For the use of the emperor's countrymen, a cathedral, a palace, and an aqueduct were speedily constructed; the public and private edifices were adapted to the greatness of a royal city; and the strength of the walls resisted, during the life-time of Justinian, the unskilful assaults of the Huns and Sclavonians. Their progress was sometimes retarded, and their hopes of rapine were disappointed, by the innumerable castles, which, in the provinces of Dacia, Epirus, Thessaly, Macedonia, and Thrace, appeared to cover the whole face of the country. Six hundred of these forts were built or repaired by the emperor; but it seems reasonable to believe that the far greater part consisted only of a stone or brick tower, in the midst of a square or circular area, which was surrounded by a wall and ditch, and afforded in a moment of danger some protection to the peasants and cattle of the neighbouring villages.[115](#) Yet these military works, which exhausted the public treasure, could not remove the just apprehensions of Justinian and his European subjects. The warm baths of Anchialus in Thrace were rendered as safe as they were salutary; but the rich pastures of Thessalonica were foraged by the Scythian cavalry; the delicious vale of Tempe, three hundred miles from the Danube, was continually alarmed by the sound of war;[116](#) and no unfortified spot, however distant or solitary, could securely enjoy the blessings of peace. The straits of Thermopylæ, which seemed to protect, but which had so often betrayed, the safety of Greece, were diligently strengthened by the labours of Justinian. From the edge of the seashore, through the forests and valleys, and as far as the summit of the Thessalian mountains, a strong wall was continued, which occupied every practicable entrance. Instead of an hasty crowd of peasants, a garrison of two thousand soldiers was stationed along the rampart; granaries of corn and reservoirs of water were provided for their use; and, by a precaution that inspired the cowardice which it foresaw, convenient fortresses were erected for their retreat. The walls of Corinth, overthrown by an earthquake, and the mouldering bulwarks of Athens and Plataea, were carefully restored; the Barbarians were discouraged by the prospect of successive and painful sieges; and the naked cities of Peloponnesus were covered by the fortifications of the isthmus of Corinth. At the extremity of Europe, another peninsula, the Thracian Chersonesus, runs three days' journey into the sea, to form, with the adjacent shores of Asia, the straits of the Hellespont. The intervals between eleven populous towns were filled by lofty woods, fair pastures, and arable lands; and the isthmus, of thirty-seven stadia or furlongs, had been fortified by a Spartan general nine hundred years before the reign of Justinian.[117](#) In an age of freedom and valour, the slightest rampart may prevent a surprise; and Procopius appears insensible of the superiority of ancient times, while he praises the solid construction and double parapet of a wall whose long arms stretched on either side into the sea; but whose strength was

deemed insufficient to guard the Chersonesus, if each city, and particularly Gallipoli and Sestus, had not been secured by their peculiar fortifications. The *long wall*, as it was emphatically styled, was a work as disgraceful in the object, as it was respectable in the execution. The riches of a capital diffuse themselves over the neighbouring country, and the territory of Constantinople, a paradise of nature, was adorned with the luxurious gardens and villas of the senators and opulent citizens. But their wealth served only to attract the bold and rapacious Barbarians; the noblest of the Romans, in the bosom of peaceful indolence, were led away into Scythian captivity, and their sovereign might view from his palace the hostile flames which were insolently spread to the gates of the Imperial city. At the distance only of forty miles Anastasius was constrained to establish a last frontier; his long wall, of sixty miles from the Propontis to the Euxine, proclaimed the impotence of his arms; and, as the danger became more imminent, new fortifications were added by the indefatigable prudence of Justinian. [118](#)

Justinian (from a rare engraving by Pine)

Asia Minor, after the submission of the Isaurians,[119](#) remained without enemies and without fortifications. Those bold savages, who had disdained to be the subjects of Gallienus, persisted two hundred and thirty years in a life of independence and rapine. The most successful princes respected the strength of the mountains and the despair of the natives; their fierce spirit was sometimes soothed with gifts, and sometimes restrained by terror; and a military count, with three legions, fixed his permanent and ignominious station in the heart of the Roman provinces.[120](#) But no sooner was the vigilance of power relaxed or diverted, than the light-armed squadrons descended from the hills and invaded the peaceful plenty of Asia. Although the Isaurians were not remarkable for stature or bravery, want rendered them bold, and experience made them skilful, in the exercise of predatory war. They advanced with secrecy and speed to the attack of villages and defenceless towns; their flying parties have sometimes touched the Hellespont, the Euxine, and the gates of Tarsus, Antioch, or Damascus;[121](#) and the spoil was lodged in their inaccessible mountains, before the Roman troops had received their orders, or the distant province had computed its loss. The guilt of rebellion and robbery excluded them from the rights of national enemies; and the magistrates were instructed by an edict, that the trial or punishment of an Isaurian, even on the festival of Easter, was a meritorious act of justice and piety.[122](#) If the captives were condemned to domestic slavery, they maintained, with their sword or dagger, the private quarrel of their masters; and it was found expedient for the public tranquillity to prohibit the service of such dangerous retainers. When their countryman Tarcalissæus or Zeno ascended the throne, he invited a faithful and formidable band of Isaurians, who insulted the court and city, and were rewarded by an annual tribute of

five thousand pounds of gold. But the hopes of fortune depopulated the mountains, luxury enervated the hardiness of their minds and bodies, and, in proportion as they mixed with mankind, they became less qualified for the enjoyment of poor and solitary freedom. After the death of Zeno, his successor Anastasius suppressed their pensions, exposed their persons to the revenge of the people, banished them from Constantinople, and prepared to sustain a war, which left only the alternative of victory or servitude. A brother of the last emperor usurped the title of Augustus, his cause was powerfully supported by the arms, the treasures, and the magazines, collected by Zeno; and the native Isaurians must have formed the smallest portion of the hundred and fifty thousand Barbarians under his standard, which was sanctified, for the first time, by the presence of a fighting bishop. Their disorderly numbers were vanquished in the plains of Phrygia by the valour and discipline of the Goths; but a war of six years almost exhausted the courage of the emperor.[123](#) The Isaurians retired to their mountains; their fortresses were successively besieged and ruined; their communication with the sea was intercepted; the bravest of their leaders died in arms; the surviving chiefs, before their execution, were dragged in chains through the hippodrome; a colony of their youth was transplanted into Thrace, and the remnant of the people submitted to the Roman government. Yet some generations elapsed before their minds were reduced to the level of slavery. The populous villages of Mount Taurus were filled with horsemen and archers; they resisted the imposition of tributes, but they recruited the armies of Justinian; and his civil magistrates, the proconsul of Cappadocia, the count of Isauria, and the prætors of Lycaonia and Pisidia, were invested with military power to restrain the licentious practice of rapes and assassinations.[124](#)

If we extend our view from the tropic to the mouth of the Tanais, we may observe, on one hand, the precautions of Justinian to curb the savages of Æthiopia,[125](#) and, on the other, the long walls which he constructed in Crimea for the protection of his friendly Goths, a colony of three thousand shepherds and warriors.[126](#) From that peninsula to Trebizond, the eastern curve of the Euxine was secured by forts, by alliance, or by religion; and the possession of *Lazica*, the Colchos of ancient, the Mingrelia of modern, geography, soon became the object of an important war. Trebizond, in after-times the seat of a romantic empire, was indebted to the liberality of Justinian for a church, an aqueduct, and a castle, whose ditches are hewn in the solid rock. From that maritime city, a frontier-line of five hundred miles may be drawn to the fortress of Circesium, the last Roman station on the Euphrates.[127](#) Above Trebizond immediately, and five days' journey to the south, the country rises into dark forests and craggy mountains, as savage though not so lofty as the Alps and the Pyrenees. In this rigorous climate,[128](#) where the snows seldom melt, the fruits are tardy and tasteless, even honey is poisonous; the most industrious tillage would be confined to some pleasant valleys; and the pastoral tribes obtained a scanty sustenance from the flesh and milk of their cattle. The *Chalybians*[129](#) derived their name and temper from

the iron quality of the soil; and, since the days of Cyrus, they might produce, under the various appellations of Chaldæans and Zanians, an uninterrupted prescription of war and rapine. Under the reign of Justinian, they acknowledged the God and the emperor of the Romans, and seven fortresses were built in the most accessible passes, to exclude the ambition of the Persian monarch.¹³⁰ The principal source of the Euphrates descends from the Chalybian mountains, and seems to flow towards the west and the Euxine; bending to the south-west, the river passes under the walls of Satala and Melitene (which were restored by Justinian as the bulwarks of the lesser Armenia), and gradually approaches the Mediterranean sea; till at length, repelled by Mount Taurus,¹³¹ the Euphrates inclines his long and flexible course to the south-east and the gulf of Persia. Among the Roman cities beyond the Euphrates, we distinguish two recent foundations, which were named from Theodosius and the relics of the Martyrs; and two capitals, Amida and Edessa, which are celebrated in the history of every age. Their strength was proportioned by Justinian to the danger of their situation. A ditch and palisade might be sufficient to resist the artless force of the cavalry of Scythia; but more elaborate works were required to sustain a regular siege against the arms and treasures of the great king. His skilful engineers understood the methods of conducting deep mines, and of raising platforms to the level of the rampart; he shook the strongest battlements with his military engines, and sometimes advanced to the assault with a line of moveable turrets on the backs of elephants. In the great cities of the East, the disadvantage of space, perhaps of position, was compensated by the zeal of the people, who seconded the garrison in the defence of their country and religion; and the fabulous promise of the Son of God, that Edessa should never be taken, filled the citizens with valiant confidence, and chilled the besiegers with doubt and dismay.¹³² The subordinate towns of Armenia and Mesopotamia were diligently strengthened, and the posts which appeared to have any command of ground or water were occupied by numerous forts, substantially built of stone, or more hastily erected with the obvious materials of earth and brick. The eye of Justinian investigated every spot; and his cruel precautions might attract the war into some lonely vale, whose peaceful natives, connected by trade and marriage, were ignorant of national discord and the quarrels of princes. Westward of the Euphrates, a sandy desert extends above six hundred miles to the Red Sea. Nature had interposed a vacant solitude between the ambition of two rival empires; the Arabians, till Mahomet arose, were formidable only as robbers; and, in the proud security of peace, the fortifications of Syria were neglected on the most vulnerable side.

But the national enmity, at least the effects of that enmity, had been suspended by a truce, which continued above four-score years. An ambassador from the emperor Zeno accompanied the rash and unfortunate Perozes, in his expedition against the Nepthalites or white Huns, whose conquests had been stretched from the Caspian to the heart of India, whose throne was enriched with emeralds,¹³³ and whose cavalry was supported by a line of two thousand elephants.¹³⁴ The Persians were twice

circumvented, in a situation which made valour useless and flight impossible; and the double victory of the Huns was achieved by military stratagem. They dismissed their royal captive after he had submitted to adore the majesty of a Barbarian; and the humiliation was poorly evaded by the casuistical subtilty of the Magi, who instructed Perozes to direct his attention to the rising sun. The indignant successor of Cyrus forgot his danger and his gratitude: he renewed the attack with headstrong fury, and lost both his army and his life.[135](#) The death of Perozes abandoned Persia to her foreign and domestic enemies; and twelve years of confusion elapsed before his son Cabades or Kobad could embrace any designs of ambition or revenge. The unkind parsimony of Anastasius was the motive or pretence of a Roman war;[136](#) the Huns and Arabs marched under the Persian standard; and the fortifications of Armenia and Mesopotamia were at that time in a ruinous or imperfect condition. The emperor returned his thanks to the governor and people of Martyropolis for the prompt surrender of a city which could not be successfully defended, and the conflagration of Theodosiopolis might justify the conduct of their prudent neighbours. Amida sustained a long and destructive siege: at the end of three months the loss of fifty thousand of the soldiers of Cabades was not balanced by any prospect of success, and it was in vain that the Magi deduced a flattering prediction from the indecency of the women on the ramparts, who had revealed their most secret charms to the eyes of the assailants. At length, in a silent night, they ascended the most accessible tower, which was guarded only by some monks, oppressed; after the duties of a festival, with sleep and wine. Scaling-ladders were applied at the dawn of day; the presence of Cabades, his stern command, and his drawn sword compelled the Persians to vanquish; and, before it was sheathed, fourscore thousand of the inhabitants had expiated the blood of their companions. After the siege of Amida, the war continued three years, and the unhappy frontier tasted the full measure of its calamities. The gold of Anastasius was offered too late; the number of his troops was defeated by the number of their generals; the country was stripped of its inhabitants; and both the living and the dead were abandoned to the wild beasts of the desert. The resistance of Edessa, and the deficiency of spoil, inclined the mind of Cabades to peace; he sold his conquests for an exorbitant price; and the same line, though marked with slaughter and devastation, still separated the two empires. To avert the repetition of the same evils, Anastasius resolved to form a new colony, so strong that it should defy the power of the Persian, so far advanced towards Assyria that its stationary troops might defend the province by the menace or operation of offensive war. For this purpose, the town of Dara,[137](#) fourteen miles from Nisibis, and four days' journey from the Tigris, was peopled and adorned; the hasty works of Anastasius were improved by the perseverance of Justinian; and, without insisting on places less important, the fortifications of Dara may represent the military architecture of the age. The city was surrounded with two walls, and the interval between them, of fifty paces, afforded a retreat to the cattle of the besieged. The inner wall was a monument of strength and beauty: it measured sixty feet from the ground, and the height of the towers was one hundred feet; the loop-holes, from whence an enemy might be annoyed with missile weapons, were small, but

numerous; the soldiers were planted along the rampart, under the shelter of double galleries; and a third platform, spacious and secure, was raised on the summit of the towers. The exterior wall appears to have been less lofty, but more solid; and each tower was protected by a quadrangular bulwark. A hard rocky soil resisted the tools of the miners, and on the south-east, where the ground was more tractable, their approach was retarded by a new work, which advanced in the shape of an half-moon. The double and treble ditches were filled with a stream of water; and in the management of the river the most skilful labour was employed to supply the inhabitants, to distress the besiegers, and to prevent the mischiefs of a natural or artificial inundation. Dara continued more than sixty years to fulfil the wishes of its founders, and to provoke the jealousy of the Persians, who incessantly complained that this impregnable fortress had been constructed in manifest violation of the treaty of peace between the two empires.

Between the Euxine and the Caspian, the countries of Colchos, Iberia, and Albania are intersected in every direction by the branches of Mount Caucasus; and the two principal *gates* or passes from north to south have been frequently confounded in the geography both of the ancients and moderns. The name of *Caspian* or *Albanian* gates is properly applied to Derbend,[138](#) which occupies a short declivity between the mountains and the sea; the city, if we give credit to local tradition, had been founded by the Greeks; and this dangerous entrance was fortified by the kings of Persia with a mole, double walls, and doors of iron. The *Iberian* gates[139](#) are formed by a narrow passage of six miles in Mount Caucasus, which opens from the northern side of Iberia or Georgia into the plain that reaches to the Tanais and the Volga. A fortress, designed by Alexander, perhaps, or one of his successors, to command that important pass, had descended by right of conquest or inheritance to a prince of the Huns, who offered it for a moderate price to the emperor; but, while Anastasius paused, while he timorously computed the cost and the distance, a more vigilant rival interposed, and Cabades forcibly occupied the straits of Caucasus. The Albanian and Iberian gates excluded the horsemen of Scythia from the shortest and most practicable roads, and the whole front of the mountains was covered by the rampart of Gog and Magog, the long wall which has excited the curiosity of an Arabian caliph[140](#) and a Russian conqueror.[141](#) According to a recent description, huge stones seven feet thick, twenty-one feet in length or height, are artificially joined without iron or cement, to compose a wall which runs above three hundred miles from the shores of Derbend, over the hills and through the valleys of Daghestan and Georgia. Without a vision, such a work might be undertaken by the policy of Cabades; without a miracle, it might be accomplished by his son, so formidable to the Romans under the name of Chosroes, so dear to the Orientals under the appellation of Nushirwan. The Persian monarch held in his hand the keys both of peace and war; but he stipulated, in every treaty, that Justinian should contribute to the expense of a common barrier, which equally protected the two empires from the inroads of the Scythians.[142](#)

VII. Justinian suppressed the schools of Athens and the consulship of Rome, which had given so many sages and heroes to mankind. Both these institutions had long since degenerated from their primitive glory; yet some reproach may be justly inflicted on the avarice and jealousy of a prince by whose hands such venerable ruins were destroyed.

Athens, after her Persian triumphs, adopted the philosophy of Ionia and the rhetoric of Sicily; and these studies became the patrimony of a city whose inhabitants, about thirty thousand males, condensed, within the period of a single life, the genius of ages and millions. Our sense of the dignity of human nature is exalted by the simple recollection that Isocrates¹⁴³ was the companion of Plato and Xenophon; that he assisted, perhaps with the historian Thucydides, at the first representations of the *Œdipus* of Sophocles and the *Iphigenia* of Euripides; and that his pupils *Æschines* and *Demosthenes* contended for the crown of patriotism in the presence of Aristotle, the master of *Theophrastus*, who taught at Athens with the founders of the Stoic and Epicurean sects.¹⁴⁴ The ingenuous youth of Attica enjoyed the benefits of their domestic education, which was communicated without envy to the rival cities. Two thousand disciples heard the lessons of *Theophrastus*; ¹⁴⁵ the schools of rhetoric must have been still more populous than those of philosophy; and a rapid succession of students diffused the fame of their teachers as far as the utmost limits of the Grecian language and name. Those limits were enlarged by the victories of Alexander; the arts of Athens survived her freedom and dominion; and the Greek colonies which the Macedonians planted in Egypt, and scattered over Asia, undertook long and frequent pilgrimages to worship the Muses in their favourite temple on the banks of the *Ilissus*. The Latin conquerors respectfully listened to the instructions of their subjects and captives; the names of Cicero and Horace were enrolled in the schools of Athens; and, after the perfect settlement of the Roman empire, the natives of Italy, of Africa, and of Britain conversed in the groves of the academy with their fellow-students of the East. The studies of philosophy and eloquence are congenial to a popular state, which encourages the freedom of inquiry and submits only to the force of persuasion. In the republics of Greece and Rome, the art of speaking was the powerful engine of patriotism or ambition; and the schools of rhetoric poured forth a colony of statesmen and legislators. When the liberty of public debate was suppressed, the orator, in the honourable profession of an advocate, might plead the cause of innocence and justice; he might abuse his talents in the more profitable trade of panegyric; and the same precepts continued to dictate the fanciful declamations of the sophist and the chaster beauties of historical composition. The systems which professed to unfold the nature of God, of man, and of the universe entertained the curiosity of the philosophic student; and, according to the temper of his mind, he might doubt with the sceptics or decide with the Stoics, sublimely speculate with Plato or severely argue with Aristotle. The pride of the adverse sects had fixed an unattainable term of moral happiness and perfection; but the race was glorious and salutary; the disciples of Zeno, and even

those of Epicurus, were taught both to act and to suffer; and the death of Petronius was not less effectual than that of Seneca to humble a tyrant by the discovery of his impotence. The light of science could not indeed be confined within the walls of Athens. Her incomparable writers address themselves to the human race; the living masters emigrated to Italy and Asia; Berytus, in later times, was devoted to the study of the law; astronomy and physic were cultivated in the museum of Alexandria; but the Attic schools of rhetoric and philosophy maintained their superior reputation from the Peloponnesian war to the reign of Justinian. Athens, though situate in a barren soil, possessed a pure air, a free navigation, and the monuments of ancient art. That sacred retirement was seldom disturbed by the business of trade or government; and the last of the Athenians were distinguished by their lively wit, the purity of their taste and language, their social manners, and some traces, at least in discourse, of the magnanimity of their fathers. In the suburbs of the city, the *academy* of the Platonists, the *lyceum* of the Peripatetics, the *portico* of the Stoics, and the *garden* of the Epicureans were planted with trees and decorated with statues; and the philosophers, instead of being immured in a cloister, delivered their instructions in spacious and pleasant walks, which at different hours were consecrated to the exercises of the mind and body. The genius of the founders still lived in those venerable seats; the ambition of succeeding to the masters of human reason excited a generous emulation; and the merit of the candidates was determined, on each vacancy, by the free voices of an enlightened people. The Athenian professors were paid by their disciples; according to their mutual wants and abilities, the price appears to have varied from a mina to a talent; and Isocrates himself, who derides the avarice of the sophists, required in his school of rhetoric about thirty pounds from each of his hundred pupils. The wages of industry are just and honourable, yet the same Isocrates shed tears at the first receipt of a stipend; the Stoic might blush when he was hired to preach the contempt of money; and I should be sorry to discover that Aristotle or Plato so far degenerated from the example of Socrates, as to exchange knowledge for gold. But some property of lands and houses was settled by the permission of the laws, and the legacies of deceased friends, on the philosophic chairs of Athens. Epicurus bequeathed to his disciples the gardens which he had purchased for eighty minæ or two hundred and fifty pounds, with a fund sufficient for their frugal subsistence and monthly festivals;[146](#) and the patrimony of Plato afforded an annual rent, which, in eight centuries, was gradually increased from three to one thousand pieces of gold.[147](#) The schools of Athens were protected by the wisest and most virtuous of the Roman princes. The library which Hadrian founded was placed in a portico adorned with pictures, statues, and a roof of alabaster, and supported by one hundred columns of Phrygian marble. The public salaries were assigned by the generous spirit of the Antonines; and each professor, of politics, of rhetoric, of the Platonic, the Peripatetic, the Stoic, and the Epicurean philosophy, received an annual stipend of ten thousand drachmæ, or more than three hundred pounds sterling.[148](#) After the death of Marcus, these liberal donations, and the privileges attached to the *thrones* of science, were abolished and revived, diminished and enlarged; but some vestige of royal bounty may be found under the

successors of Constantine; and their arbitrary choice of an unworthy candidate might tempt the philosophers of Athens to regret the days of independence and poverty.[149](#) It is remarkable that the impartial favour of the Antonines was bestowed on the four adverse sects of philosophy, which they considered as equally useful, or at least as equally innocent. Socrates had formerly been the glory and the reproach of his country; and the first lessons of Epicurus so strangely scandalised the pious ears of the Athenians that by his exile, and that of his antagonists, they silenced all vain disputes concerning the nature of the gods. But in the ensuing year they recalled the hasty decree, restored the liberty of the schools, and were convinced, by the experience of ages, that the moral character of philosophers is not affected by the diversity of their theological speculations.[150](#)

The Gothic arms were less fatal to the schools of Athens than the establishment of a new religion, whose ministers superseded the exercise of reason, resolved every question by an article of faith, and condemned the infidel or sceptic to eternal flames. In many a volume of laborious controversy, they exposed the weakness of the understanding and the corruption of the heart, insulted human nature in the sages of antiquity, and proscribed the spirit of philosophical inquiry, so repugnant to the doctrine, or at least to the temper, of an humble believer. The surviving sect of the Platonists, whom Plato would have blushed to acknowledge, extravagantly mingled a sublime theory with the practice of superstition and magic; and, as they remained alone in the midst of a Christian world, they indulged a secret rancour against the government of the church and state, whose severity was still suspended over their heads. About a century after the reign of Julian,[151](#) Proclus[152](#) was permitted to teach in the philosophic chair of the academy, and such was his industry that he frequently, in the same day, pronounced five lessons and composed seven hundred lines. His sagacious mind explored the deepest questions of morals and metaphysics, and he ventured to urge eighteen arguments against the Christian doctrine of the creation of the world. But in the intervals of study he *personally* conversed with Pan, Æsculapius, and Minerva, in whose mysteries he was secretly initiated, and whose prostrate statues he adored; in the devout persuasion that the philosopher, who is a citizen of the universe, should be the priest of its various deities. An eclipse of the sun announced his approaching end; and his life, with that of his scholar Isidore,[153](#) compiled by two of their most learned disciples, exhibits a deplorable picture of the second childhood of human reason. Yet the golden chain, as it was fondly styled, of the Platonic succession, continued forty-four years from the death of Proclus to the edict of Justinian,[154](#) which imposed a perpetual silence on the schools of Athens, and excited the grief and indignation of the few remaining votaries of Grecian science and superstition. Seven friends and philosophers, Diogenes and Hermias, Eulalius and Priscian, Damascius, Isidore, and Simplicius, who dissented from the religion of their sovereign, embraced the resolution of seeking, in a foreign land, the freedom which was denied in their native country. They had heard, and they credulously believed, that

the republic of Plato was realised in the despotic government of Persia, and that a patriotic king reigned over the happiest and most virtuous of nations. They were soon astonished by the natural discovery that Persia resembled the other countries of the globe; that Chosroes, who affected the name of a philosopher, was vain, cruel, and ambitious; that bigotry, and a spirit of intolerance, prevailed among the Magi; that the nobles were haughty, the courtiers servile, and the magistrates unjust; that the guilty sometimes escaped, and that the innocent were often oppressed. The disappointment of the philosophers provoked them to overlook the real virtues of the Persians; and they were scandalised, more deeply perhaps than became their profession, with the plurality of wives and concubines, the incestuous marriages, and the custom of exposing dead bodies to the dogs and vultures, instead of hiding them in the earth or consuming them with fire. Their repentance was expressed by a precipitate return, and they loudly declared that they had rather die on the borders of the empire than enjoy the wealth and favour of the Barbarian. From this journey, however, they derived a benefit which reflects the purest lustre on the character of Chosroes. He required that the seven sages who had visited the court of Persia should be exempted from the penal laws which Justinian enacted against his Pagan subjects; and this privilege, expressly stipulated in a treaty of peace, was guarded by the vigilance of a powerful mediator.[155](#) Simplicius and his companions ended their lives in peace and obscurity; and, as they left no disciples, they terminate the long list of Grecian philosophers, who may be justly praised, notwithstanding their defects, as the wisest and most virtuous of their contemporaries. The writings of Simplicius are now extant. His physical and metaphysical commentaries on Aristotle have passed away with the fashion of the times; but his moral interpretation of Epictetus is preserved in the library of nations, as a classic book, most excellently adapted to direct the will, to purify the heart, and to confirm the understanding, by a just confidence in the nature both of God and man.

About the same time that Pythagoras first invented the appellation of philosopher, liberty and the consulship were founded at Rome by the elder Brutus. The revolutions of the consular office, which may be viewed in the successive lights of a substance, a shadow, and a name, have been occasionally mentioned in the present history. The first magistrates of the republic had been chosen by the people, to exercise, in the senate and in the camp, the powers of peace and war, which were afterwards translated to the emperors. But the tradition of ancient dignity was long revered by the Romans and Barbarians. A Gothic historian applauds the consulship of Theodoric as the height of all temporal glory and greatness;[156](#) the king of Italy himself congratulates those annual favourites of fortune who, without the cares, enjoyed the splendour of the throne; and at the end of a thousand years two consuls were created by the sovereigns of Rome and Constantinople, for the sole purpose of giving a date to the year and a festival to the people. But the expenses of this festival, in which the wealthy and the vain aspired to surpass their predecessors, insensibly arose to the enormous sum of fourscore thousand pounds; the wisest senators declined an useless honour, which involved the certain ruin of their families; and to this reluctance I should impute the

frequent chasms in the last age of the consular *Fasti*. The predecessors of Justinian had assisted from the public treasures the dignity of the less opulent candidates; the avarice of that prince preferred the cheaper and more convenient method of advice and regulation.¹⁵⁷ Seven *processions* or spectacles were the number to which his edict confined the horse and chariot races, the athletic sports, the music and pantomimes of the theatre, and the hunting of wild beasts; and small pieces of silver were discreetly substituted to the gold medals, which had always excited tumult and drunkenness, when they were scattered with a profuse hand among the populace. Notwithstanding these precautions and his own example, the succession of consuls finally ceased in the thirteenth year of Justinian, whose despotic temper might be gratified by the silent extinction of a title which admonished the Romans of their ancient freedom.¹⁵⁸ Yet the annual consulship still lived in the minds of the people; they fondly expected its speedy restoration; they applauded the gracious condescension of successive princes, by whom it was assumed in the first year of their reign; and three centuries elapsed, after the death of Justinian, before that obsolete dignity, which had been suppressed by custom, could be abolished by law.¹⁵⁹ The imperfect mode of distinguishing each year by the name of a magistrate was usefully supplied by the date of a permanent era: the creation of the world, according to the septuagint version, was adopted by the Greeks;¹⁶⁰ and the Latins, since the age of Charlemagne, have computed their time from the birth of Christ.¹⁶¹

CHAPTER XLI

Conquests of Justinian in the West — Character and first Campaigns of Belisarius — He invades and subdues the Vandal Kingdom of Africa — His Triumph — The Gothic War — He recovers Sicily, Naples, and Rome — Siege of Rome by the Goths — Their Retreat and Losses — Surrender of Ravenna — Glory of Belisarius — His domestic Shame and Misfortunes

When Justinian ascended the throne, about fifty years after the fall of the Western empire, the kingdom of the Goths and Vandals had obtained a solid and, as it might seem, a legal establishment both in Europe and Africa. The titles which Roman victory had inscribed were erased with equal justice by the sword of the Barbarians; and their successful rapine derived a more venerable sanction from time, from treaties, and from the oaths of fidelity, already repeated by a second or third generation of obedient subjects. Experience and Christianity had refuted the superstitious hope that Rome was founded by the gods to reign for ever over the nations of the earth. But the proud claim of perpetual and indefeasible dominion, which her soldiers could no longer maintain, was firmly asserted by her statesmen and lawyers, whose opinions have been sometimes revived and propagated in the modern schools of jurisprudence. After

Rome herself had been stripped of the Imperial purple, the princes of Constantinople assumed the sole and sacred sceptre of the monarchy; demanded, as their rightful inheritance, the provinces which had been subdued by the consuls or possessed by the Cæsars; and feebly aspired to deliver their faithful subjects of the West from the usurpation of heretics and Barbarians. The execution of this splendid design was in some degree reserved for Justinian. During the five first years of his reign, he reluctantly waged a costly and unprofitable war against the Persians; till his pride submitted to his ambition, and he purchased, at the price of four hundred and forty thousand pounds sterling, the benefit of a precarious truce, which, in the language of both nations, was dignified with the appellation of the *endless* peace. The safety of the East enabled the emperor to employ his forces against the Vandals; and the internal state of Africa afforded an honourable motive, and promised a powerful support, to the Roman arms.[1](#)

According to the testament of the founder, the African kingdom had lineally descended to Hilderic the eldest of the Vandal princes. A mild disposition inclined the son of a tyrant, the grandson of a conqueror, to prefer the counsels of clemency and peace; and his accession was marked by the salutary edict which restored two hundred bishops to their churches and allowed the free profession of the Athanasian creed.[2](#) But the Catholics accepted with cold and transient gratitude a favour so inadequate to their pretensions, and the virtues of Hilderic offended the prejudices of his countrymen. The Arian clergy presumed to insinuate that he had renounced the faith, and the soldiers more loudly complained that he had degenerated from the courage, of his ancestors. His ambassadors were suspected of a secret and disgraceful negotiation in the Byzantine court; and his general, the Achilles,[3](#) as he was named, of the Vandals, lost a battle against the naked and disorderly Moors. The public discontent was exasperated by Gelimer,[4](#) whose age, descent, and military fame gave him an apparent title to the succession; he assumed, with the consent of the nation, the reins of government; and his unfortunate sovereign sunk without a struggle from the throne to a dungeon, where he was strictly guarded with a faithful counsellor and his unpopular nephew, the Achilles of the Vandals. But the indulgence which Hilderic had shewn to his Catholic subjects had powerfully recommended him to the favour of Justinian, who, for the benefit of his own sect, could acknowledge the use and justice of religious toleration; their alliance, while the nephew of Justin remained in a private station, was cemented by the mutual exchange of gifts and letters; and the emperor Justinian asserted the cause of royalty and friendship. In two successive embassies, he admonished the usurper to repent of his treason, or to abstain, at least, from any further violence, which might provoke the displeasure of God and of the Romans; to reverence the laws of kindred and succession; and to suffer an infirm old man peaceably to end his days either on the throne of Carthage or in the palace of Constantinople. The passions or even the prudence of Gelimer compelled him to reject these requests, which were urged in the haughty tone of menace and command; and he justified his ambition in a language rarely spoken in the Byzantine court, by alleging

the right of a free people to remove or punish their chief magistrate, who had failed in the execution of the kingly office.⁵ After this fruitless expostulation, the captive monarch was more rigorously treated, his nephew was deprived of his eyes, and the cruel Vandal, confident in his strength and distance, derided the vain threats and slow preparations of the emperor of the East. Justinian resolved to deliver or revenge his friend, Gelimer to maintain his usurpation; and the war was preceded, according to the practice of civilised nations, by the most solemn protestations that each party was sincerely desirous of peace.

The report of an African war was grateful only to the vain and idle populace of Constantinople, whose poverty exempted them from tribute, and whose cowardice was seldom exposed to military service. But the wiser citizens, who judged of the future by the past, revolved in their memory the immense loss both of men and money, which the empire had sustained in the expedition of Basiliscus. The troops, which, after five laborious campaigns, had been recalled from the Persian frontier, dreaded the sea, the climate, and the arms of an unknown enemy. The ministers of the finances computed, as far as they might compute, the demands of an African war; the taxes which must be found and levied to supply those insatiate demands; and the danger lest their own lives, or at least their lucrative employments, should be made responsible for the deficiency of the supply. Inspired by such selfish motives (for we may not suspect him of any zeal for the public good), John of Cappadocia ventured to oppose in full council the inclinations of his master. He confessed that a victory of such importance could not be too dearly purchased; but he represented in a grave discourse the certain difficulties and the uncertain event. “You undertake,” said the prefect, “to besiege Carthage by land, the distance is not less than one hundred and forty days’ journey; on the sea, a whole year⁶ must elapse before you can receive any intelligence from your fleet. If Africa should be reduced, it cannot be preserved without the additional conquest of Sicily and Italy. Success will impose the obligation of new labours; a single misfortune will attract the Barbarians into the heart of your exhausted empire.” Justinian felt the weight of this salutary advice; he was confounded by the unwonted freedom of an obsequious servant; and the design of the war would perhaps have been relinquished, if his courage had not been revived by a voice which silenced the doubts of profane reason. “I have seen a vision,” cried an artful or fanatic bishop of the East. “It is the will of heaven, O emperor! that you should not abandon your holy enterprise for the deliverance of the African church. The God of battles will march before your standard, and disperse your enemies, who are the enemies of his Son.” The emperor might be tempted, and his counsellors were constrained, to give credit to this seasonable revelation; but they derived more rational hope from the revolt which the adherents of Hilderic or Athanasius had already excited on the borders of the Vandal monarchy. Pudentius, an African subject, had privately signified his loyal intentions, and a small military aid restored the province of Tripoli to the obedience of the Romans. The government of Sardinia had been entrusted to Godas, a valiant Barbarian; he suspended the payment of tribute, disclaimed his allegiance to the usurper, and gave

audience to the emissaries of Justinian, who found him master of that fruitful island, at the head of his guards, and proudly invested with the ensigns of royalty. The forces of the Vandals were diminished by discord and suspicion; the Roman armies were animated by the spirit of Belisarius: one of those heroic names which are familiar to every age and to every nation.

The Africanus of new Rome was born, and perhaps educated, among the Thracian peasants,⁷ without any of those advantages which had formed the virtues of the elder and the younger Scipio: a noble origin, liberal studies, and the emulation of a free state. The silence of a loquacious secretary may be admitted to prove that the youth of Belisarius could not afford any subject of praise: he served, most assuredly with valour and reputation, among the private guards of Justinian; and, when his patron became emperor, the domestic was promoted to military command. After a bold inroad into Persarmenia, in which his glory was shared by a colleague and his progress was checked by an enemy, Belisarius repaired to the important station of Dara, where he first accepted the service of Procopius, the faithful companion, and diligent historian, of his exploits.⁸ The Mirranes⁹ of Persia advanced, with forty thousand of her best troops, to raze the fortifications of Dara; and signified the day and the hour on which the citizens should prepare a bath for his refreshment after the toils of victory. He encountered an adversary equal to himself, by the new title of General of the East:¹⁰ his superior in the science of war, but much inferior in the number and quality of his troops, which amounted only to twenty-five thousand Romans and strangers, relaxed in their discipline, and humbled by recent disasters. As the level plain of Dara refused all shelter to stratagem and ambush, Belisarius protected his front with a deep trench, which was prolonged at first in perpendicular and afterwards in parallel lines, to cover the wings of cavalry advantageously posted to command the flanks and rear of the enemy.¹¹ When the Roman centre was shaken, their well-timed and rapid charge decided the conflict: the standard of Persia fell; the *immortals* fled; the infantry threw away their bucklers; and eight thousand of the vanquished were left on the field of battle. In the next campaign, Syria was invaded on the side of the desert; and Belisarius, with twenty thousand men, hastened from Dara to the relief of the province. During the whole summer, the designs of the enemy were baffled by his skilful dispositions: he pressed their retreat, occupied each night their camp of the preceding day, and would have secured a bloodless victory if he could have resisted the impatience of his own troops. Their valiant promise was faintly supported in the hour of battle; the right wing was exposed by the treacherous or cowardly desertion of the Christian Arabs; the Huns, a veteran band of eight hundred warriors, were oppressed by superior numbers; the flight of the Isaurians was intercepted; but the Roman infantry stood firm on the left, for Belisarius himself, dismounting from his horse, shewed them that intrepid despair was their only safety. They turned their backs to the Euphrates, and their faces to the enemy; innumerable arrows glanced without effect from the compact and shelving order of their bucklers; an impenetrable line of pikes

was opposed to the repeated assaults of the Persian cavalry; and, after a resistance of many hours, the remaining troops were skilfully embarked under the shadow of the night. The Persian commander retired with disorder and disgrace, to answer a strict account of the lives of so many soldiers which he had consumed in a barren victory. But the fame of Belisarius was not sullied by a defeat, in which he alone had saved his army from the consequences of their own rashness;¹² the approach of peace relieved him from the guard of the eastern frontier, and his conduct in the sedition of Constantinople amply discharged his obligations to the emperor. When the African war became the topic of popular discourse and secret deliberation, each of the Roman generals was apprehensive, rather than ambitious, of the dangerous honour; but, as soon as Justinian had declared his preference of superior merit, their envy was rekindled by the unanimous applause which was given to the choice of Belisarius. The temper of the Byzantine court may encourage a suspicion that the hero was darkly assisted by the intrigues of his wife, the fair and subtle Antonina, who alternately enjoyed the confidence, and incurred the hatred, of the empress Theodora. The birth of Antonina was ignoble, she descended from a family of charioteers; and her chastity has been stained with the foulest reproach. Yet she reigned with long and absolute power over the mind of her illustrious husband; and, if Antonina disdained the merit of conjugal fidelity, she expressed a manly friendship to Belisarius, whom she accompanied with undaunted resolution in all the hardships and dangers of a military life.¹³

The preparations for the African war were not unworthy of the last contest between Rome and Carthage. The pride and flower of the army consisted of the guards of Belisarius, who according to the pernicious indulgence of the times, devoted themselves by a particular oath of fidelity to the service of their patrons. Their strength and stature, for which they had been curiously selected, the goodness of their horses and armour, and the assiduous practice of all the exercises of war, enabled them to act whatever their courage might prompt; and their courage was exalted by the social honour of their rank and the personal ambition of favour and fortune. Four hundred of the bravest of the Heruli marched under the banner of the faithful and active Pharas; their untractable valour was more highly prized than the tame submission of the Greeks and Syrians; and of such importance was it deemed to procure a reinforcement of six hundred Massagetæ, or Huns, that they were allured by fraud and deceit to engage in a naval expedition. Five thousand horse and ten thousand foot were embarked at Constantinople for the conquest of Africa, but the infantry, for the most part levied in Thrace and Isauria, yielded to the more prevailing use and reputation of the cavalry; and the Scythian bow was the weapon on which the armies of Rome were now reduced to place their principal dependence. From a laudable desire to assert the dignity of his theme, Procopius defends the soldiers of his own time against the morose critics who confined that respectable name to the heavy-armed warriors of antiquity and maliciously observed that the word *archer* is introduced by Homer¹⁴ as a term of contempt. “Such contempt might, perhaps, be due to the naked youths who

appeared on foot in the fields of Troy, and, lurking behind a tomb-stone, or the shield of a friend, drew the bow-string to their breast,¹⁵ and dismissed a feeble and lifeless arrow. But our archers (pursues the historian), are mounted on horses, which they manage with admirable skill; their head and shoulders are protected by a cask or buckler; they wear greaves of iron on their legs, and their bodies are guarded by a coat of mail. On their right side hangs a quiver, a sword on their left, and their hand is accustomed to wield a lance or javelin in closer combat. Their bows are strong and weighty; they shoot in every possible direction, advancing, retreating, to the front, to the rear, or to either flank; and, as they are taught to draw the bow-string not to the breast, but to the right ear, firm, indeed, must be the armour that can resist the rapid violence of their shaft.” Five hundred transports, navigated by twenty thousand mariners of Egypt, Cilicia, and Ionia, were collected in the harbour of Constantinople. The smallest of these vessels may be computed at thirty, the largest at five hundred, tons; and the fair average will supply an allowance, liberal but not profuse, of about one hundred thousand tons,¹⁶ for the reception of thirty-five thousand soldiers and sailors, of five thousand horses, of arms, engines, and military stores, and of a sufficient stock of water and provisions for a voyage, perhaps, of three months. The proud galleys, which in former ages swept the Mediterranean with so many hundred oars, had long since disappeared; and the fleet of Justinian was escorted only by ninety-two light brigantines, covered from the missile weapons of the enemy, and rowed by two thousand of the brave and robust youth of Constantinople. Twenty-two generals are named, most of whom were afterwards distinguished in the wars of Africa and Italy; but the supreme command, both by land and sea, was delegated to Belisarius alone, with a boundless power of acting according to his discretion as if the emperor himself were present. The separation of the naval and military professions is at once the effect and the cause of the modern improvements in the science of navigation and maritime war.

In the seventh year of the reign of Justinian, and about the time of the summer solstice, the whole fleet of six hundred ships was ranged in martial pomp before the gardens of the palace. The patriarch pronounced his benediction, the emperor signified his last commands, the general’s trumpet gave the signal of departure, and every heart, according to its fears or wishes, explored with anxious curiosity the omens of misfortune and success. The first halt was made at Perinthus or Heraclea, where Belisarius waited five days to receive some Thracian horses, a military gift of his sovereign. From thence the fleet pursued their course through the midst of the Propontis; but, as they struggled to pass the straits of the Hellespont, an unfavourable wind detained them four days at Abydus, where the general exhibited a memorable lesson of firmness and severity. Two of the Huns, who in a drunken quarrel had slain one of their fellow-soldiers, were instantly shewn to the army suspended on a lofty gibbet. The national indignity was resented by their countrymen, who disclaimed the servile laws of the empire, and asserted the free privilege of Scythia, where a small fine was allowed to expiate the hasty sallies of intemperance and anger. Their

complaints were specious, their clamours were loud, and the Romans were not averse to the example of disorder and impunity. But the rising sedition was appeased by the authority and eloquence of the general; and he represented to the assembled troops the obligation of justice, the importance of discipline, the rewards of piety and virtue, and the unpardonable guilt of murder, which, in his apprehension, was aggravated rather than excused by the vice of intoxication.¹⁷ In the navigation from the Hellespont to Peloponnesus, which the Greeks, after the siege of Troy, had performed in four days,¹⁸ the fleet of Belisarius was guided in their course by his master-galley, conspicuous in the day by the redness of the sails, and in the night by the torches blazing from the mast-head. It was the duty of the pilots, as they steered between the islands, and turned the capes of Malea and Tænarum, to preserve the just order and regular intervals of such a multitude of ships; as the wind was fair and moderate, their labours were not unsuccessful, and the troops were safely disembarked at Methone on the Messenian coast, to repose themselves for a while after the fatigues of the sea. In this place they experienced how avarice, invested with authority, may sport with the lives of thousands which are bravely exposed for the public service. According to military practice, the bread or biscuit of the Romans was twice prepared in the oven, and a diminution of one fourth was cheerfully allowed for the loss of weight. To gain this miserable profit, and to save the expense of wood, the prefect John of Cappadocia had given orders that the flour should be slightly baked by the same fire which warmed the baths of Constantinople; and, when the sacks were opened, a soft and mouldy paste was distributed to the army. Such unwholesome food, assisted by the heat of the climate and season, soon produced an epidemical disease, which swept away five hundred soldiers. Their health was restored by the diligence of Belisarius, who provided fresh bread at Methone, and boldly expressed his just and humane indignation; the emperor heard his complaint; the general was praised; but the minister was not punished. From the port of Methone, the pilots steered along the western coast of Peloponnesus, as far as the isle of Zacynthus or Zant, before they undertook the voyage (in their eyes a most arduous voyage) of one hundred leagues over the Ionian sea. As the fleet was surprised by a calm, sixteen days were consumed in the slow navigation; and even the general would have suffered the intolerable hardship of thirst, if the ingenuity of Antonina had not preserved the water in glass bottles, which she buried deep in the sand in a part of the ship impervious to the rays of the sun. At length the harbour of Caucana,¹⁹ on the southern side of Sicily, afforded a secure and hospitable shelter. The Gothic officers who governed the island in the name of the daughter and grandson of Theodoric obeyed their imprudent orders, to receive the troops of Justinian like friends and allies: provisions were liberally supplied, the cavalry was remounted,²⁰ and Procopius soon returned from Syracuse with correct information of the state and designs of the Vandals. His intelligence determined Belisarius to hasten his operations, and his wise impatience was seconded by the winds. The fleet lost sight of Sicily, passed before the isle of Malta, discovered the capes of Africa, ran along the coast with a strong gale from the north-east, and finally cast anchor at the promontory of Caput Vada, about five days' journey to the south of

If Gelimer had been informed of the approach of the enemy, he must have delayed the conquest of Sardinia, for the immediate defence of his person and kingdom. A detachment of five thousand soldiers, and one hundred and twenty galleys, would have joined the remaining forces of the Vandals; and the descendant of Genseric might have surprised and oppressed a fleet of deep-laden transports incapable of action, and of light brigantines that seemed only qualified for flight. Belisarius had secretly trembled when he overheard his soldiers, in the passage, emboldening each other to confess their apprehensions: if they were once on shore, they hoped to maintain the honour of their arms; but, if they should be attacked at sea, they did not blush to acknowledge that they wanted courage to contend at the same time with the winds, the waves, and the Barbarians.[22](#) The knowledge of their sentiments decided Belisarius to seize the first opportunity of landing them on the coast of Africa, and he prudently rejected, in a council of war, the proposal of sailing with the fleet and army into the port of Carthage. Three months after their departure from Constantinople, the men and horses, the arms and military stores, were safely disembarked, and five soldiers were left as a guard on board each of the ships, which were disposed in the form of a semicircle. The remainder of the troops occupied a camp on the sea-shore, which they fortified, according to ancient discipline, with a ditch and rampart; and the discovery of a source of fresh water, while it allayed the thirst, excited the superstitious confidence, of the Romans. The next morning, some of the neighbouring gardens were pillaged; and Belisarius, after chastising the offenders, embraced the slight occasion, but the decisive moment, of inculcating the maxims of justice, moderation, and genuine policy. “When I first accepted the commission of subduing Africa, I depended much less,” said the general, “on the numbers, or even the bravery, of my troops, than upon the friendly disposition of the natives and their immortal hatred to the Vandals. You alone can deprive me of this hope: if you continue to extort by rapine, what might be purchased for a little money, such acts of violence will reconcile these implacable enemies, and unite them in a just and holy league against the invaders of their country.” These exhortations were enforced by a rigid discipline, of which the soldiers themselves soon felt and praised the salutary effects. The inhabitants, instead of deserting their houses, or hiding their corn, supplied the Romans with a fair and liberal market; the civil officers of the province continued to exercise their functions in the name of Justinian; and the clergy, from motives of conscience and interest, assiduously laboured to promote the cause of a Catholic emperor. The small town of Sullecte,[23](#) one day’s journey from the camp, had the honour of being foremost to open her gates and to resume her ancient allegiance; the larger cities of Leptis and Adrumetum imitated the example of loyalty as soon as Belisarius appeared; and he advanced without opposition as far as Grassé, a palace of the Vandal kings, at the distance of fifty miles from Carthage. The weary Romans indulged themselves in the refreshment of shady groves, cool fountains, and delicious fruits; and the preference which Procopius allows to these gardens over any that he had seen, either in the East or West,

may be ascribed either to the taste or the fatigue of the historian. In three generations prosperity and a warm climate had dissolved the hardy virtue of the Vandals, who insensibly became the most luxurious of mankind. In their villas and gardens, which might deserve the Persian name of *paradise*,²⁴ they enjoyed a cool and elegant repose; and, after the daily use of the bath, the Barbarians were seated at a table profusely spread with the delicacies of the land and sea. Their silken robes, loosely flowing after the fashion of the Medes, were embroidered with gold; love and hunting were the labours of their life; and their vacant hours were amused by pantomimes, chariot-races, and the music and dances of the theatre.

In a march of ten or twelve days, the vigilance of Belisarius was constantly awake and active against his unseen enemies, by whom, in every place and at every hour, he might be suddenly attacked. An officer of confidence and merit, John the Armenian, led the vanguard of three hundred horse; six hundred Massagetæ covered at a certain distance the left flank; and the whole fleet, steering along the coast, seldom lost sight of the army, which moved each day about twelve miles, and lodged in the evening in strong camps or in friendly towns. The near approach of the Romans to Carthage filled the mind of Gelimer with anxiety and terror. He prudently wished to protract the war till his brother, with his veteran troops, should return from the conquest of Sardinia; and he now lamented the rash policy of his ancestors, who, by destroying the fortifications of Africa, had left him only the dangerous resource of risking a battle in the neighbourhood of his capital. The Vandal conquerors, from their original number of fifty thousand, were multiplied, without including their women and children, to one hundred and sixty thousand²⁵ fighting men; and such forces, animated with valour and union, might have crushed, at their first landing, the feeble and exhausted bands of the Roman general. But the friends of the captive king were more inclined to accept the invitations, than to resist the progress, of Belisarius; and many a proud Barbarian disguised his aversion to war under the more specious name of his hatred to the usurper. Yet the authority and promises of Gelimer collected a formidable army, and his plans were concerted with some degree of military skill. An order was despatched to his brother Ammatas, to collect all the forces of Carthage and to encounter the van of the Roman army at the distance of ten miles from the city; his nephew Gibamund, with two thousand horse, was destined to attack their left, when the monarch himself, who silently followed, should charge their rear in a situation which excluded them from the aid or even the view of their fleet. But the rashness of Ammatas was fatal to himself and his country. He anticipated the hour of attack, outstripped his tardy followers, and was pierced with a mortal wound, after he had slain, with his own hand, twelve of his boldest antagonists. His Vandals fled to Carthage; the highway, almost ten miles, was strewn with dead bodies; and it seemed incredible that such multitudes could be slaughtered by the swords of three hundred Romans. The nephew of Gelimer was defeated after a slight combat by the six hundred Massagetæ; they did not equal the third part of his numbers; but each Scythian was fired by the example of his chief, who gloriously exercised the privilege of his family by riding foremost and alone to

shoot the first arrow against the enemy. In the meanwhile, Gelimer himself, ignorant of the event, and misguided by the windings of the hills, inadvertently passed the Roman army, and reached the scene of action where Ammatas had fallen. He wept the fate of his brother and of Carthage, charged with irresistible fury the advancing squadrons, and might have pursued, and perhaps decided the victory, if he had not wasted those inestimable moments in the discharge of a vain, though pious, duty to the dead. While his spirit was broken by this mournful office, he heard the trumpet of Belisarius, who, leaving Antonina and his infantry in the camp, pressed forwards with his guards and the remainder of the cavalry to rally his flying troops and to restore the fortune of the day. Much room could not be found in this disorderly battle for the talents of a general; but the king fled before the hero; and the Vandals, accustomed only to a Moorish enemy, were incapable of withstanding the arms and discipline of the Romans. Gelimer retired with hasty steps towards the desert of Numidia; but he had soon the consolation of learning that his private orders for the execution of Hilderic and his captive friends had been faithfully obeyed. The tyrant's revenge was useful only to his enemies. The death of a lawful prince excited the compassion of his people; his life might have perplexed the victorious Romans; and the lieutenant of Justinian, by a crime of which he was innocent, was relieved from the painful alternative of forfeiting his honour or relinquishing his conquests.

As soon as the tumult had subsided, the several parts of the army informed each other of the accidents of the day; and Belisarius pitched his camp on the field of victory, to which the tenth mile-stone from Carthage had applied the Latin appellation of *Decimus*. From a wise suspicion of the stratagems and resources of the Vandals, he marched the next day in order of battle, halted in the evening before the gates of Carthage, and allowed a night of repose, that he might not in darkness and disorder expose the city to the licentiousness of the soldiers or the soldiers themselves to the secret ambush of the city. But, as the fears of Belisarius were the result of calm and intrepid reason, he was soon satisfied that he might confide, without danger, in the peaceful and friendly aspect of the capital. Carthage blazed with innumerable torches, the signals of the public joy; the chain was removed that guarded the entrance of the port; the gates were thrown open; and the people, with acclamations of gratitude, hailed and invited their Roman deliverers. The defeat of the Vandals and the freedom of Africa were announced to the city on the eve of St. Cyprian, when the churches were already adorned and illuminated for the festival of the martyr, whom three centuries of superstition had almost raised to a local deity. The Arians, conscious that their reign had expired, resigned the temple to the Catholics, who rescued their saint from profane hands, performed the holy rites, and loudly proclaimed the creed of Athanasius and Justinian. One awful hour reversed the fortunes of the contending parties. The suppliant Vandals, who had so lately indulged the vices of conquerors, sought an humble refuge in the sanctuary of the church; while the merchants of the East were delivered from the deepest dungeon of the palace by their affrighted keeper, who implored the protection of his captives, and shewed them, through an aperture in

the wall, the sails of the Roman fleet. After their separation from the army, the naval commanders had proceeded with slow caution along the coast, till they reached the Hermæan promontory and obtained the first intelligence of the victory of Belisarius. Faithful to his instructions, they would have cast anchor about twenty miles from Carthage, if the more skilful seamen had not represented the perils of the shore and the signs of an impending tempest. Still ignorant of the revolution, they declined, however, the rash attempt of forcing the chain of the port; and the adjacent harbour and suburb of Mandracium were insulted only by the rapine of a private officer who disobeyed and deserted his leaders. But the Imperial fleet, advancing with a fair wind, steered through the narrow entrance of the Goletta, and occupied in the deep and capacious lake of Tunis a secure station about five miles from the capital.[26](#) No sooner was Belisarius informed of their arrival than he despatched orders that the greatest part of the mariners should be immediately landed to join the triumph, and to swell the apparent numbers, of the Romans. Before he allowed them to enter the gates of Carthage, he exhorted them, in a discourse worthy of himself and the occasion, not to disgrace the glory of their arms; and to remember that the Vandals had been the tyrants, but that *they* were the deliverers, of the Africans, who must now be respected as the voluntary and affectionate subjects of their common sovereign. The Romans marched through the streets in close ranks, prepared for battle if an enemy had appeared; the strict order maintained by the general imprinted on their minds the duty of obedience; and, in an age in which custom and impunity almost sanctified the abuse of conquest, the genius of one man repressed the passions of a victorious army. The voice of menace and complaint was silent; the trade of Carthage was not interrupted; while Africa changed her master and her government, the shops continued open and busy; and the soldiers, after sufficient guards had been posted, modestly departed to the houses which were allotted for their reception. Belisarius fixed his residence in the palace; seated himself on the throne of Genseric; accepted and distributed the Barbaric spoil; granted their lives to the suppliant Vandals; and laboured to repair the damage which the suburb of Mandracium had sustained in the preceding night. At supper he entertained his principal officers with the form and magnificence of a royal banquet.[27](#) The victor was respectfully served by the captive officers of the household; and in the moments of festivity, when the impartial spectators applauded the fortune and merit of Belisarius, his envious flatterers secretly shed their venom on every word and gesture which might alarm the suspicions of a jealous monarch. One day was given to these pompous scenes, which may not be despised as useless, if they attracted the popular veneration; but the active mind of Belisarius, which in the pride of victory could suppose a defeat, had already resolved that the Roman empire in Africa should not depend on the chance of arms or the favour of the people. The fortifications of Carthage had alone been exempted from the general proscription; but in the reign of ninety-five years they were suffered to decay by the thoughtless and indolent Vandals. A wiser conqueror restored with incredible despatch the walls and ditches of the city. His liberality encouraged the workmen; the soldiers, the mariners, and the citizens vied with each other in the salutary labour; and Gelimer, who had feared to trust his person

in an open town, beheld with astonishment and despair the rising strength of an impregnable fortress.

That unfortunate monarch, after the loss of his capital, applied himself to collect the remains of an army scattered, rather than destroyed, by the preceding battle; and the hopes of pillage attracted some Moorish bands to the standard of Gelimer. He encamped in the fields of Bulla, four days' journey from Carthage; insulted the capital, which he deprived of the use of an aqueduct; proposed an high reward for the head of every Roman; affected to spare the persons and property of his African subjects; and secretly negotiated with the Arian sectaries and the confederate Huns. Under these circumstances, the conquest of Sardinia served only to aggravate his distress; he reflected, with the deepest anguish, that he had wasted in that useless enterprise five thousand of his bravest troops; and he read, [28](#) with grief and shame, the victorious letter of his brother Zano, who expressed a sanguine confidence that the king, after the example of their ancestors, had already chastised the rashness of the Roman invader. "Alas! my brother," replied Gelimer, "Heaven has declared against our unhappy nation. While you have subdued Sardinia, we have lost Africa. No sooner did Belisarius appear with a handful of soldiers than courage and prosperity deserted the cause of the Vandals. Your nephew Gibamund, your brother Ammatas, have been betrayed to death by the cowardice of their followers. Our horses, our ships, Carthage itself, and all Africa are in the power of the enemy. Yet the Vandals still prefer an ignominious repose at the expense of their wives and children, their wealth and liberty. Nothing now remains, except the field of Bulla and the hope of your valour. Abandon Sardinia; fly to our relief; restore our empire, or perish by our side." On the receipt of this epistle, Zano imparted his grief to the principal Vandals; but the intelligence was prudently concealed from the natives of the island. The troops embarked in one hundred and twenty galleys at the port of Cagliari, cast anchor the third day on the confines of Mauritania, and hastily pursued their march to join the royal standard in the camp of Bulla. Mournful was the interview: the two brothers embraced; they wept in silence; no questions were asked of the Sardinian victory; no inquiries were made of the African misfortunes; they saw before their eyes the whole extent of their calamities; and the absence of their wives and children afforded a melancholy proof that either death or captivity had been their lot. The languid spirit of the Vandals was at length awakened and united by the entreaties of their king, the example of Zano, and the instant danger which threatened their monarchy and religion. The military strength of the nation advanced to battle; and such was the rapid increase that, before their army reached Tricameron, about twenty miles from Carthage, they might boast, perhaps with some exaggeration, that they surpassed, in a tenfold proportion, the diminutive powers of the Romans. But these powers were under the command of Belisarius; and, as he was conscious of their superior merit, he permitted the Barbarians to surprise him at an unseasonable hour. The Romans were instantly under arms; a rivulet covered their front; the cavalry formed the first line, which Belisarius supported in the centre, at the head of five hundred guards; the infantry, at some

distance, was posted in the second line; and the vigilance of the general watched the separate station and ambiguous faith of the Massagetæ, who secretly reserved their aid for the conquerors. The historian has inserted, and the reader may easily supply, the speeches²⁹ of the commanders, who, by arguments the most apposite to their situation, inculcated the importance of victory and the contempt of life. Zano, with the troops which had followed him to the conquest of Sardinia, was placed in the centre; and the throne of Genseric might have stood, if the multitude of Vandals had imitated their intrepid resolution. Casting away their lances and missile weapons, they drew their swords, and expected the charge; the Roman cavalry thrice passed the rivulet; they were thrice repulsed; and the conflict was firmly maintained, till Zano fell, and the standard of Belisarius was displayed. Gelimer retreated to his camp; the Huns joined the pursuit; and the victors despoiled the bodies of the slain. Yet no more than fifty Romans and eight hundred Vandals were found on the field of battle; so inconsiderable was the carnage of a day which extinguished a nation and transferred the empire of Africa. In the evening Belisarius led his infantry to the attack of the camp; and the pusillanimous flight of Gelimer exposed the vanity of his recent declarations that, to the vanquished, death was a relief, life a burthen, and infamy the only object of terror. His departure was secret; but, as soon as the Vandals discovered that their king had deserted them, they hastily dispersed, anxious only for their personal safety, and careless of every object that is dear or valuable to mankind. The Romans entered the camp without resistance; and the wildest scenes of disorder were veiled in the darkness and confusion of the night. Every Barbarian who met their swords was inhumanly massacred; their widows and daughters, as rich heirs or beautiful concubines, were embraced by the licentious soldiers; and avarice itself was almost satiated with the treasures of gold and silver, the accumulated fruits of conquest or economy in a long period of prosperity and peace. In this frantic search, the troops even of Belisarius forgot their caution and respect. Intoxicated with lust and rapine, they explored, in small parties, or alone, the adjacent fields, the woods, the rocks, and the caverns, that might possibly conceal any desirable prize; laden with booty, they deserted their ranks, and wandered, without a guide, on the high road to Carthage; and, if the flying enemies had dared to return, very few of the conquerors would have escaped. Deeply sensible of the disgrace and danger, Belisarius passed an apprehensive night on the field of victory; at the dawn of day he planted his standard on a hill, recalled his guards and veterans, and gradually restored the modesty and obedience of the camp. It was equally the concern of the Roman general to subdue the hostile, and to save the prostrate, Barbarian; and the suppliant Vandals, who could be found only in churches, were protected by his authority, disarmed, and separately confined, that they might neither disturb the public peace nor become the victims of popular revenge. After despatching a light detachment to tread the footsteps of Gelimer, he advanced with his whole army, about ten days' march, as far as Hippo Regius, which no longer possessed the relics of St. Augustin.³⁰ The season, and the certain intelligence that the Vandal had fled to the inaccessible country of the Moors, determined Belisarius to relinquish the vain pursuit and to fix his winter quarters at

Carthage. From thence he despatched his principal lieutenant, to inform the emperor that, in the space of three months, he had achieved the conquest of Africa.

Belisarius spoke the language of truth. The surviving Vandals yielded, without resistance, their arms and their freedom; the neighbourhood of Carthage submitted to his presence; and the more distant provinces were successively subdued by the report of his victory. Tripoli was confirmed in her voluntary allegiance; Sardinia and Corsica surrendered to an officer, who carried, instead of a sword, the head of the valiant Zano; and the isles of Majorca, Minorca, and Yvica consented to remain an humble appendage of the African kingdom. Cæsarea, a royal city, which in looser geography may be confounded with the modern Algiers, was situate thirty days' march to the westward of Carthage; by land the road was infested by the Moors; but the sea was open, and the Romans were now masters of the sea. An active and discreet tribune sailed as far as the Straits, where he occupied Septem or Ceuta,³¹ which rises opposite to Gibraltar on the African coast; that remote place was afterwards adorned and fortified by Justinian; and he seems to have indulged the vain ambition of extending his empire to the columns of Hercules. He received the messengers of victory at the time when he was preparing to publish the pandects of the Roman law; and the devout or jealous emperor celebrated the divine goodness, and confessed in silence the merit of his successful general.³² Impatient to abolish the temporal and spiritual tyranny of the Vandals, he proceeded, without delay, to the full establishment of the Catholic church. Her jurisdiction, wealth, and immunities, perhaps the most essential part of episcopal religion, were restored and amplified with a liberal hand; the Arian worship was suppressed; the Donatist meetings were proscribed;³³ and the synod of Carthage, by the voice of two hundred and seventeen bishops,³⁴ applauded the just measure of pious retaliation. On such an occasion, it may not be presumed that many orthodox prelates were absent; but the comparative smallness of their number, which in ancient councils had been twice or even thrice multiplied, most clearly indicates the decay both of the church and state. While Justinian approved himself the defender of the faith, he entertained an ambitious hope that his victorious lieutenant would speedily enlarge the narrow limits of his dominion to the space which they occupied before the invasion of the Moors and Vandals; and Belisarius was instructed to establish five *dukes* or commanders in the convenient stations of Tripoli, Leptis, Cirta, Cæsarea, and Sardinia, and to compute the military force of *palatines* or *borderers* that might be sufficient for the defence of Africa. The kingdom of the Vandals was not unworthy of the presence of a prætorian prefect; and four consulars, three presidents, were appointed to administer the seven provinces under his civil jurisdiction. The number of their subordinate officers, clerks, messengers, or assistants was minutely expressed; three hundred and ninety-six for the prefect himself, fifty for each of his vicegerents; and the rigid definition of their fees and salaries was more effectual to confirm the right than to prevent the abuse. These magistrates might be oppressive, but they were not idle; and the subtle questions of justice and revenue were infinitely propagated under the new government, which professed to revive the freedom and equity of the

Roman republic. The conqueror was solicitous to extract a prompt and plentiful supply from his African subjects; and he allowed them to claim, even in the third degree, and from the collateral line, the houses and lands of which their families had been unjustly despoiled by the Vandals. After the departure of Belisarius, who acted by an high and special commission, no ordinary provision was made for a master-general of the forces; but the office of Prætorian prefect was entrusted to a soldier; the civil and military powers were united, according to the practice of Justinian, in the chief governor; and the representative of the emperor in Africa, as well as in Italy, was soon distinguished by the appellation of Exarch.[35](#)

Yet the conquest of Africa was imperfect, till her former sovereign was delivered either alive or dead into the hands of the Romans. Doubtful of the event, Gelimer had given secret orders that a part of his treasure should be transported to Spain, where he hoped to find a secure refuge at the court of the king of the Visigoths. But these intentions were disappointed by accident, treachery, and the indefatigable pursuit of his enemies, who intercepted his flight from the seashore, and chased the unfortunate monarch, with some faithful followers, to the inaccessible mountain of Papua,[36](#) in the inland country of Numidia. He was immediately besieged by Pharas, an officer whose truth and sobriety were the more applauded, as such qualities could seldom be found among the Heruli, the most corrupt of the Barbarian tribes. To his vigilance Belisarius had entrusted this important charge; and, after a bold attempt to scale the mountain, in which he lost an hundred and ten soldiers, Pharas expected, during a winter siege, the operation of distress and famine on the mind of the Vandal king. From the softest habits of pleasure, from the unbounded command of industry and wealth, he was reduced to share the poverty of the Moors,[37](#) supportable only to themselves by their ignorance of a happier condition. In their rude hovels of mud and hurdles, which confined the smoke and excluded the light, they promiscuously slept on the ground, perhaps on a sheep-skin, with their wives, their children, and their cattle. Sordid and scanty were their garments; the use of bread and wine was unknown; and their oaten or barley cakes, imperfectly baked in the ashes, were devoured almost in a crude state by the hungry savages. The health of Gelimer must have sunk under these strange and unwonted hardships, from whatsoever cause they had been endured; but his actual misery was embittered by the recollection of past greatness, the daily insolence of his protectors, and the just apprehension that the light and venal Moors might be tempted to betray the rights of hospitality. The knowledge of his situation dictated the humane and friendly epistle of Pharas. "Like yourself," said the chief of the Heruli, "I am an illiterate Barbarian, but I speak the language of plain sense and an honest heart. Why will you persist in hopeless obstinacy? Why will you ruin yourself, your family, and nation? The love of freedom and abhorrence of slavery? Alas! my dearest Gelimer, are you not already the worst of slaves, the slave of the vile nation of the Moors? Would it not be preferable to sustain at Constantinople a life of poverty and servitude, rather than to reign the undoubted monarch of the mountain of Papua? Do you think it a

disgrace to be the subject of Justinian? Belisarius is his subject; and we ourselves, whose birth is not inferior to your own, are not ashamed of our obedience to the Roman emperor. That generous prince will grant you a rich inheritance of lands, a place in the senate, and the dignity of Patrician: such are his gracious intentions, and you may depend with full assurance on the word of Belisarius. So long as heaven has condemned us to suffer, patience is a virtue; but, if we reject the proffered deliverance, it degenerates into blind and stupid despair.” “I am not insensible,” replied the king of the Vandals, “how kind and rational is your advice. But I cannot persuade myself to become the slave of an unjust enemy, who has deserved my implacable hatred. *Him* I had never injured either by word or deed; yet he has sent against me, I know not from whence, a certain Belisarius, who has cast me headlong from the throne into this abyss of misery. Justinian is a man; he is a prince; does he not dread for himself a similar reverse of fortune? I can write no more: my grief oppresses me. Send me, I beseech you, my dear Pharas, send me a lyre,[38](#) a sponge, and a loaf of bread.” From the Vandal messenger, Pharas was informed of the motives of this singular request. It was long since the king of Africa had tasted bread; a defluxion had fallen on his eyes, the effect of fatigue or incessant weeping; and he wished to solace the melancholy hours by singing to the lyre the sad story of his own misfortunes. The humanity of Pharas was moved; he sent the three extraordinary gifts; but even his humanity prompted him to redouble the vigilance of his guard, that he might sooner compel his prisoner to embrace a resolution advantageous to the Romans, but salutary to himself. The obstinacy of Gelimer at length yielded to reason and necessity; the solemn assurances of safety and honourable treatment were ratified in the emperor’s name, by the ambassador of Belisarius; and the king of the Vandals descended from the mountain. The first public interview was in one of the suburbs of Carthage; and, when the royal captive accosted his conqueror, he burst into a fit of laughter. The crowd might naturally believe that extreme grief had deprived Gelimer of his senses; but in this mournful state unseasonable mirth insinuated to more intelligent observers that the vain and transitory scenes of human greatness are unworthy of a serious thought.[39](#)

Their contempt was soon justified by a new example of a vulgar truth; that flattery adheres to power, and envy to superior merit. The chiefs of the Roman army presumed to think themselves the rivals of an hero. Their private despatches maliciously affirmed that the conqueror of Africa, strong in his reputation and the public love, conspired to seat himself on the throne of the Vandals. Justinian listened with too patient an ear; and his silence was the result of jealousy rather than of confidence. An honourable alternative, of remaining in the province or of returning to the capital, was indeed submitted to the discretion of Belisarius; but he wisely concluded, from intercepted letters and the knowledge of his sovereign’s temper, that he must either resign his head, erect his standard, or confound his enemies by his presence and submission. Innocence and courage decided his choice: his guards, captives, and treasures were diligently embarked; and so prosperous was the navigation that his arrival at Constantinople preceded any certain account of his departure from the port

of Carthage. Such unsuspecting loyalty removed the apprehensions of Justinian; envy was silenced and inflamed by the public gratitude; and the third Africanus obtained the honours of a triumph, a ceremony which the city of Constantine had never seen, and which ancient Rome, since the reign of Tiberius, had reserved for the *auspicious* arms of the Cæsars.⁴⁰ From the palace of Belisarius, the procession was conducted through the principal streets to the hippodrome; and this memorable day seemed to avenge the injuries of Genseric, and to expiate the shame of the Romans. The wealth of nations was displayed, the trophies of martial or ineffeminate luxury: rich armour, golden thrones, and the chariots of state which had been used by the Vandal queen; the massy furniture of the royal banquet, the splendour of precious stones, the elegant forms of statues and vases, the more substantial treasure of gold, and the holy vessels of the Jewish temple, which, after their long peregrination, were respectfully deposited in the Christian church of Jerusalem. A long train of the noblest Vandals reluctantly exposed their lofty stature and manly countenance. Gelimer slowly advanced: he was clad in a purple robe, and still maintained the majesty of a king. Not a tear escaped from his eyes, not a sigh was heard; but his pride or piety derived some secret consolation from the words of Solomon,⁴¹ which he repeatedly pronounced, vanity! vanity! all is vanity! Instead of ascending a triumphal car drawn by four horses or elephants, the modest conqueror marched on foot at the head of his brave companions: his prudence might decline an honour too conspicuous for a subject; and his magnanimity might justly disdain what had been so often sullied by the vilest of tyrants. The glorious procession entered the gate of the hippodrome; was saluted by the acclamations of the senate and people; and halted before the throne where Justinian and Theodora were seated to receive the homage of the captive monarch and the victorious hero. They both performed the customary adoration, and, falling prostrate on the ground, respectfully touched the footstool of a prince who had not unsheathed his sword, and of a prostitute who had danced on the theatre; some gentle violence was used to bend the stubborn spirit of the grandson of Genseric; and, however, trained to servitude, the genius of Belisarius must have secretly rebelled. He was immediately declared consul for the ensuing year, and the day of his inauguration resembled the pomp of a second triumph: his curule chair was borne aloft on the shoulders of captive Vandals; and the spoils of war, gold cups, and rich girdles were profusely scattered among the populace.

But the purest reward of Belisarius was in the faithful execution of a treaty for which his honour had been pledged to the king of the Vandals. The religious scruples of Gelimer, who adhered to the Arian heresy, were incompatible with the dignity of senator or patrician; but he received from the emperor an ample estate in the province of Galatia, where the abdicated monarch retired with his family and friends, to a life of peace, of affluence, and perhaps of content.⁴² The daughters of Hilderic were entertained with the respectful tenderness due to their age and misfortune; and Justinian and Theodora accepted the honour of educating and enriching the female descendants of the great Theodosius. The bravest of the Vandal youth were distributed into five squadrons of cavalry, which adopted the name of their benefactor, and

supported in the Persian wars the glory of their ancestors. But these rare exceptions, the reward of birth or valour, are insufficient to explain the fate of a nation, whose numbers, before a short and bloodless war, amounted to more than six hundred thousand persons. After the exile of their king and nobles, the servile crowd might purchase their safety by abjuring their character, religion, and language; and their degenerate posterity would be insensibly mingled with the common herd of African subjects. Yet even in the present age, and in the heart of the Moorish tribes, a curious traveller has discovered the white complexion and long flaxen hair of a Northern race;[43](#) and it was formerly believed that the boldest of the Vandals fled beyond the power, or even the knowledge, of the Romans, to enjoy their solitary freedom on the shores of the Atlantic ocean.[44](#) Africa had been their empire, it became their prison; nor could they entertain an hope, or even a wish, of returning to the banks of the Elbe, where their brethren, of a spirit less adventurous, still wandered in their native forests. It was impossible for cowards to surmount the barriers of unknown seas and hostile Barbarians; it was impossible for brave men to expose their nakedness and defeat before the eyes of their countrymen, to describe the kingdoms which they had lost, and to claim a share of the humble inheritance which, in a happier hour, they had almost unanimously renounced.[45](#) In the country between the Elbe and the Oder, several populous villages of Lusatia are inhabited by the Vandals: they still preserve their language, their customs, and the purity of their blood; support with some impatience, the Saxon or Prussian yoke; and serve with secret and voluntary allegiance the descendant of their ancient kings, who in his garb and present fortune is confounded with the meanest of his vassals.[46](#) The name and situation of this unhappy people might indicate their descent from one common stock with the conquerors of Africa. But the use of a Scalvonian dialect more clearly represents them as the last remnant of the new colonies, who succeeded to the genuine Vandals, already scattered or destroyed in the age of Procopius.[47](#)

If Belisarius had been tempted to hesitate in his allegiance, he might have urged, even against the emperor himself, the indispensable duty of saving Africa from an enemy more barbarous than the Vandals. The origin of the Moors is involved in darkness; they were ignorant of the use of letters.[48](#) Their limits cannot be precisely defined: a boundless continent was opened to the Libyan shepherds; the change of seasons and pastures regulated their motions; and their rude huts and slender furniture were transported with the same ease as their arms, their families, and their cattle, which consisted of sheep, oxen, and camels.[49](#) During the vigour of the Roman power, they observed a respectable distance from Carthage and the sea-shore; under the feeble reign of the Vandals they invaded the cities of Numidia, occupied the sea-coast from Tangier to Cæsarea, and pitched their camps, with impunity, in the fertile province of Byzacium. The formidable strength and artful conduct of Belisarius secured the neutrality of the Moorish princes, whose vanity aspired to receive, in the emperor's name, the ensigns of their regal dignity.[50](#) They were astonished by the rapid event,

and trembled in the presence of their conqueror. But his approaching departure soon relieved the apprehensions of a savage and superstitious people; the number of their wives allowed them to disregard the safety of their infant hostages; and, when the Roman general hoisted sail in the port of Carthage, he heard the cries, and almost beheld the flames, of the desolated province. Yet he persisted in his resolution; and, leaving only a part of his guards to reinforce the feeble garrisons, he entrusted the command of Africa to the eunuch Solomon,[51](#) who proved himself not unworthy to be the successor of Belisarius. In the first invasion, some detachments, with two officers of merit, were surprised and intercepted; but Solomon speedily assembled his troops, marched from Carthage into the heart of the country, and in two great battles destroyed sixty thousand of the Barbarians. The Moors depended on their multitude, their swiftness, and their inaccessible mountains; and the aspect and smell of their camels are said to have produced some confusion in the Roman cavalry.[52](#) But, as soon as they were commanded to dismount, they derided this contemptible obstacle; as soon as the columns ascended the hills, the naked and disorderly crowd was dazzled by glittering arms and regular evolutions; and the menace of their female prophets was repeatedly fulfilled, that the Moors should be discomfited by a *beardless* antagonist. The victorious eunuch advanced thirteen days' journey from Carthage, to besiege Mount Aurasius,[53](#) the citadel, and at the same time the garden, of Numidia. That range of hills, a branch of the great Atlas, contains within a circumference of one hundred and twenty miles, a rare variety of soil and climate; the intermediate valleys and elevated plains abound with rich pastures, perpetual streams, and fruits of a delicious taste and uncommon magnitude. This fair solitude is decorated with the ruins of Lambesa, a Roman city, once the seat of a legion, and the residence of forty thousand inhabitants. The Ionic temple of Æsculapius is encompassed with Moorish huts; and the cattle now graze in the midst of an amphitheatre, under the shade of Corinthian columns. A sharp perpendicular rock rises above the level of the mountain, where the African princes deposited their wives and treasures; and a proverb is familiar to the Arabs, that the man may eat fire, who dares to attack the craggy cliffs and inhospitable natives of Mount Aurasius. This hardy enterprise was twice attempted by the eunuch Solomon: from the first he retreated with some disgrace; and in the second, his patience and provisions were almost exhausted; and he must again have retired, if he had not yielded to the impetuous courage of his troops, who audaciously scaled, to the astonishment of the Moors, the mountain, the hostile camp, and the summit of the Geminian Rock. A citadel was erected to secure this important conquest, and to remind the Barbarians of their defeat; and, as Solomon pursued his march to the west, the long-lost province of Mauritanian Sitifi was again annexed to the Roman empire. The Moorish war continued several years after the departure of Belisarius; but the laurels which he resigned to a faithful lieutenant may be justly ascribed to his own triumph.

The experience of past faults, which may sometimes correct the mature age of an individual, is seldom profitable to the successive generations of mankind. The nations

of antiquity, careless of each other's safety, were separately vanquished and enslaved by the Romans. This awful lesson might have instructed the Barbarians of the West to oppose, with timely counsels and confederate arms, the unbounded ambition of Justinian. Yet the same error was repeated, the same consequences were felt, and the Goths, both of Italy and Spain, insensible of their approaching danger, beheld with indifference, and even with joy, the rapid downfall of the Vandals. After the failure of the royal line, Theudes, a valiant and powerful chief, ascended the throne of Spain, which he had formerly administered in the name of Theodoric and his infant grandson. Under his command the Visigoths besieged the fortress of Ceuta on the African coast; but, while they spent the Sabbath-day in peace and devotion, the pious security of their camp was invaded by a sally from the town; and the king himself, with some difficulty and danger, escaped from the hands of a sacrilegious enemy.⁵⁴ It was not long before his pride and resentment were gratified by a suppliant embassy from the unfortunate Gelimer, who implored, in his distress, the aid of the Spanish monarch. But, instead of sacrificing these unworthy passions to the dictates of generosity and prudence, Theudes amused the ambassadors, till he was secretly informed of the loss of Carthage, and then dismissed them with obscure and contemptuous advice, to seek in their native country a true knowledge of the state of the Vandals.⁵⁵ The long continuance of the Italian war delayed the punishment of the Visigoths; and the eyes of Theudes were closed before they tasted the fruits of his mistaken policy. After his death, the sceptre of Spain was disputed by a civil war. The weaker candidate solicited the protection of Justinian, and ambitiously subscribed a treaty of alliance, which deeply wounded the independence and happiness of his country. Several cities, both on the ocean and the Mediterranean, were ceded to the Roman troops, who afterwards refused to evacuate those pledges, as it should seem, either of safety or payment; and, as they were fortified by perpetual supplies from Africa, they maintained their impregnable stations, for the mischievous purpose of inflaming the civil and religious factions of the Barbarians. Seventy years elapsed before this painful thorn could be extirpated from the bosom of the monarchy; and, as long as the emperors retained any share of these remote and useless possessions, their vanity might number Spain in the list of their provinces, and the successors of Alaric in the rank of their vassals.⁵⁶

The error of the Goths who reigned in Italy was less excusable than that of their Spanish brethren, and their punishment was still more immediate and terrible. From a motive of private revenge, they enabled their most dangerous enemy to destroy their most valuable ally. A sister of the great Theodoric had been given in marriage to Thrasimond the African king:⁵⁷ on this occasion, the fortress of Lilybæum⁵⁸ in Sicily was resigned to the Vandals; and the princess Amalafrida was attended by a martial train of one thousand nobles, and five thousand Gothic soldiers, who signalled their valour in the Moorish wars. Their merit was over-rated by themselves, and perhaps neglected by the Vandals; they viewed the country with envy, and the conquerors with disdain; but their real or fictitious conspiracy was prevented by a massacre; the Goths

were oppressed, and the captivity of Amalafrida was soon followed by her secret and suspicious death. The eloquent pen of Cassiodorus was employed to reproach the Vandal court with the cruel violation of every social and public duty; but the vengeance which he threatened in the name of his sovereign might be derided with impunity, as long as Africa was protected by the sea, and the Goths were destitute of a navy. In the blind impotence of grief and indignation, they joyfully saluted the approach of the Romans, entertained the fleet of Belisarius in the ports of Sicily, and were speedily delighted or alarmed by the surprising intelligence that their revenge was executed beyond the measure of their hopes, or perhaps of their wishes. To their friendship the emperor was indebted for the kingdom of Africa, and the Goths might reasonably think that they were entitled to resume the possession of a barren rock, so recently separated as a nuptial gift from the island of Sicily. They were soon undeceived by the haughty mandate of Belisarius, which excited their tardy and unavailing repentance. "The city and promontory of Lilybæum," said the Roman general, "belonged to the Vandals, and I claim them by the right of conquest. Your submission may deserve the favour of the emperor; your obstinacy will provoke his displeasure, and must kindle a war that can terminate only in your utter ruin. If you compel us to take up arms, we shall contend, not to regain the possession of a single city, but to deprive you of all the provinces which you unjustly withhold from their lawful sovereign." A nation of two hundred thousand soldiers might have smiled at the vain menace of Justinian and his lieutenant; but a spirit of discord and disaffection prevailed in Italy, and the Goths supported, with reluctance, the indignity of a female reign.[59](#)

The birth of Amalasontha, the regent and queen of Italy,[60](#) united the two most illustrious families of the Barbarians. Her mother, the sister of Clovis, was descended from the long-haired kings of the *Merovingian* race;[61](#) and the regal succession of the *Amali* was illustrated in the eleventh generation by her father, the great Theodoric, whose merit might have ennobled a plebeian origin. The sex of his daughter excluded her from the Gothic throne; but his vigilant tenderness for his family and his people discovered the last heir of the royal line, whose ancestors had taken refuge in Spain; and the fortunate Eutharic was suddenly exalted to the rank of a consul and a prince. He enjoyed only a short time the charms of Amalasontha, and the hopes of the succession; and his widow, after the death of her husband and father, was left the guardian of her son Athalaric, and the kingdom of Italy. At the age of about twenty-eight years, the endowments of her mind and person had attained their perfect maturity. Her beauty, which, in the apprehension of Theodora herself, might have disputed the conquest of an emperor, was animated by manly sense, activity, and resolution. Education and experience had cultivated her talents; her philosophic studies were exempt from vanity; and, though she expressed herself with equal elegance and ease in the Greek, the Latin, and the Gothic tongue, the daughter of Theodoric maintained in her counsels a discreet and impenetrable silence. By a faithful imitation of the virtues, she revived the prosperity, of his reign; while she strove, with pious

care, to expiate the faults, and to obliterate the darker memory, of his declining age. The children of Boethius and Symmachus were restored to their paternal inheritance; her extreme lenity never consented to inflict any corporal or pecuniary penalties on her Roman subjects; and she generously despised the clamours of the Goths, who at the end of forty years still considered the people of Italy as their slaves or their enemies. Her salutary measures were directed by the wisdom, and celebrated by the eloquence, of Cassiodorius; she solicited and deserved the friendship of the emperor; and the kingdoms of Europe respected, both in peace and war, the majesty of the Gothic throne. But the future happiness of the queen and of Italy depended on the education of her son, who was destined, by his birth, to support the different and almost incompatible characters of the chief of a Barbarian camp and the first magistrate of a civilised nation. From the age of ten years,⁶² Athalaric was diligently instructed in the arts and sciences, either useful or ornamental for a Roman prince; and three venerable Goths were chosen to instil the principles of honour and virtue into the mind of their young king. But the pupil who is insensible of the benefits, must abhor the restraints, of education; and the solicitude of the queen, which affection rendered anxious and severe, offended the untractable nature of her son and his subjects. On a solemn festival, when the Goths were assembled in the palace of Ravenna, the royal youth escaped from his mother's apartment, and, with tears of pride and anger, complained of a blow which his stubborn disobedience had provoked her to inflict. The Barbarians resented the indignity which had been offered to their king; accused the regent of conspiring against his life and crown; and imperiously demanded that the grandson of Theodoric should be rescued from the dastardly discipline of women and pedants, and educated, like a valiant Goth, in the society of his equals and the glorious ignorance of his ancestors. To this rude clamour, importunately urged as the voice of the nation, Amalasontha was compelled to yield her reason and the dearest wishes of her heart. The king of Italy was abandoned to wine, to women, and to rustic sports; and the indiscreet contempt of the ungrateful youth betrayed the mischievous designs of his favourites and her enemies. Encompassed with domestic foes, she entered into a secret negotiation with the emperor Justinian; obtained the assurance of a friendly reception; and had actually deposited at Dyrrachium in Epirus a treasure of forty thousand pounds of gold. Happy would it have been for her fame and safety, if she had calmly retired from barbarous faction to the peace and splendour of Constantinople. But the mind of Amalasontha was inflamed by ambition and revenge; and, while her ships lay at anchor in the port, she waited for the success of a crime which her passions excused or applauded as an act of justice. Three of the most dangerous malecontents had been separately removed, under the pretence of trust and command, to the frontiers of Italy; they were assassinated by her private emissaries; and the blood of these noble Goths rendered the queen-mother absolute in the court of Ravenna, and justly odious to a free people. But, if she had lamented the disorders of her son, she soon wept his irreparable loss; and the death of Athalaric, who at the age of sixteen was consumed by premature intemperance, left her destitute of any firm support or legal authority. Instead of submitting to the laws of her country, which held as a fundamental maxim that the

succession could never pass from the lance to the distaff, the daughter of Theodoric conceived the impracticable design of sharing with one of her cousins the regal title, and of reserving in her own hands the substance of supreme power. He received the proposal with profound respect and affected gratitude; and the eloquent Cassiodorius announced to the senate and the emperor, that Amalasontha and Theodatus had ascended the throne of Italy. His birth (for his mother was the sister of Theodoric) might be considered as an imperfect title; and the choice of Amalasontha was more strongly directed by her contempt of his avarice and pusillanimity, which had deprived him of the love of the Italians and the esteem of the Barbarians. But Theodatus was exasperated by the contempt which he deserved; her justice had repressed and reproached the oppression which he exercised against his Tuscan neighbours; and the principal Goths, united by common guilt and resentment, conspired to instigate his slow and timid disposition. The letters of congratulation were scarcely despatched before the queen of Italy was imprisoned in a small island of the lake of Bolsena,[63](#) where, after a short confinement, she was strangled in the bath, by the order, or with the connivance, of the new king, who instructed his turbulent subjects to shed the blood of their sovereigns.

Justinian beheld with joy the dissensions of the Goths; and the mediation of an ally concealed and promoted the ambitious views of the conqueror. His ambassadors, in their public audience, demanded the fortress of Lilybæum, ten Barbarian fugitives, and a just compensation for the pillage of a small town on the Illyrian borders; but they secretly negotiated with Theodatus to betray the province of Tuscany, and tempted Amalasontha to extricate herself from danger and perplexity by a free surrender of the kingdom of Italy. A false and servile epistle was subscribed by the reluctant hand of the captive queen; but the confession of the Roman senators, who were sent to Constantinople, revealed the truth of her deplorable situation; and Justinian, by the voice of a new ambassador, most powerfully interceded for her life and liberty. Yet the secret instructions of the same minister were adapted to serve the cruel jealousy of Theodora, who dreaded the presence and superior charms of a rival: he prompted with artful and ambiguous hints the execution of a crime so useful to the Romans;[64](#) received the intelligence of her death with grief and indignation, and denounced, in his master's name, immortal war against the perfidious assassin. In Italy, as well as in Africa, the guilt of an usurper appeared to justify the arms of Justinian; but the forces which he prepared were insufficient for the subversion of a mighty kingdom, if their feeble numbers had not been multiplied by the name, the spirit, and the conduct of an hero. A chosen troop of guards, who served on horseback and were armed with lances and bucklers, attended the person of Belisarius; his cavalry was composed of two hundred Huns, three hundred Moors, and four thousand *confederates*, and the infantry consisted only of three thousand Isaurians. Steering the same course as in his former expedition, the Roman consul cast anchor before Catana in Sicily, to survey the strength of the island, and to decide whether he should attempt the conquest or peaceably pursue his voyage for the African coast. He found a fruitful land and a

friendly people. Notwithstanding the decay of agriculture, Sicily still supplied the granaries of Rome; the farmers were graciously exempted from the oppression of military quarters, and the Goths, who trusted the defence of the island to the inhabitants, had some reason to complain that their confidence was ungratefully betrayed. Instead of soliciting and expecting the aid of the king of Italy, they yielded to the first summons a cheerful obedience; and this province, the first fruits of the Punic wars, was again, after a long separation, united to the Roman empire.⁶⁵ The Gothic garrison of Palermo, which alone attempted to resist, was reduced, after a short siege, by a singular stratagem. Belisarius introduced his ships into the deepest recess of the harbour; their boats were laboriously hoisted with ropes and pulleys to the topmast head, and he filled them with archers, who from that superior station commanded the ramparts of the city. After this easy though successful campaign, the conqueror entered Syracuse in triumph, at the head of his victorious bands, distributing gold medals to the people, on the day which so gloriously terminated the year of the consulship. He passed the winter season in the palace of ancient kings, amidst the ruins of a Grecian colony, which once extended to a circumference of two and twenty miles;⁶⁶ but in the spring, about the festival of Easter, the prosecution of his designs was interrupted by a dangerous revolt of the African forces. Carthage was saved by the presence of Belisarius, who suddenly landed with a thousand guards.⁶⁷ Two thousand soldiers of doubtful faith returned to the standard of their old commander; and he marched, without hesitation, above fifty miles, to seek an enemy whom he affected to pity and despise. Eight thousand rebels trembled at his approach; they were routed at the first onset by the dexterity of their master; and this ignoble victory would have restored the peace of Africa, if the conqueror had not been hastily recalled to Sicily, to appease a sedition which was kindled during his absence in his own camp.⁶⁸ Disorder and disobedience were the common malady of the times; the genius to command and the virtue to obey resided only in the mind of Belisarius.

Although Theodatus descended from a race of heroes, he was ignorant of the art, and averse to the dangers, of war. Although he had studied the writings of Plato and Tully, philosophy was incapable of purifying his mind from the basest passions, avarice and fear. He had purchased a sceptre by ingratitude and murder; at the first menace of an enemy he degraded his own majesty, and that of a nation which already disdained their unworthy sovereign. Astonished by the recent example of Gelimer, he saw himself dragged in chains through the streets of Constantinople; the terrors which Belisarius inspired, were heightened by the eloquence of Peter, the Byzantine ambassador; and that bold and subtle advocate persuaded him to sign a treaty, too ignominious to become the foundation of a lasting peace. It was stipulated that in the acclamations of the Roman people the name of the emperor should be always proclaimed before that of the Gothic king; and that, as often as the statue of Theodatus was erected in brass or marble, the divine image of Justinian should be placed on its right hand. Instead of conferring, the king of Italy was reduced to solicit, the honours of the senate; and the consent of the emperor was made indispensable before he could execute, against a

priest or senator, the sentence either of death or confiscation. The feeble monarch resigned the possession of Sicily; offered, as the annual mark of his dependence, a crown of gold, of the weight of three hundred pounds; and promised to supply, at the requisition of his sovereign, three thousand Gothic auxiliaries for the service of the empire. Satisfied with these extraordinary concessions, the successful agent of Justinian hastened his journey to Constantinople; but no sooner had he reached the Alban villa⁶⁹ than he was recalled by the anxiety of Theodatus; and the dialogue which passed between the king and the ambassador deserves to be represented in its original simplicity. “Are you of opinion that the emperor will ratify this treaty? *Perhaps*. If he refuses, what consequence will ensue? *War*. Will such a war be just or reasonable? *Most assuredly: every one should act according to his character*. What is your meaning? *You are a philosopher — Justinian is emperor of the Romans: it would ill become the disciple of Plato to shed the blood of thousands in his private quarrel; the successor of Augustus should vindicate his rights, and recover by arms the ancient provinces of his empire.*” This reasoning might not convince, but it was sufficient to alarm and subdue, the weakness of Theodatus; and he soon descended to his last offer, that for the poor equivalent of a pension of forty-eight thousand pounds sterling he would resign the kingdom of the Goths and Italians, and spend the remainder of his days in the innocent pleasures of philosophy and agriculture. Both treaties were entrusted to the hands of the ambassador, on the frail security of an oath not to produce the second till the first had been positively rejected. The event may be easily foreseen: Justinian required and accepted the abdication of the Gothic king. His indefatigable agent returned from Constantinople to Ravenna, with ample instructions; and a fair epistle, which praised the wisdom and generosity of the royal philosopher, granted his pension, with the assurance of such honours as a subject and a Catholic might enjoy, and wisely referred the final execution of the treaty to the presence and authority of Belisarius. But, in the interval of suspense, two Roman generals, who had entered the province of Dalmatia, were defeated and slain by the Gothic troops. From blind and abject despair, Theodatus capriciously rose to groundless and fatal presumption,⁷⁰ and dared to receive with menace and contempt the ambassador of Justinian, who claimed his promise, solicited the allegiance of his subjects, and boldly asserted the inviolable privilege of his own character. The march of Belisarius dispelled this visionary pride; and, as the first campaign⁷¹ was employed in the reduction of Sicily, the invasion of Italy is applied by Procopius to the second year of the Gothic War.⁷²

After Belisarius had left sufficient garrisons in Palermo and Syracuse, he embarked his troops at Messina, and landed them, without resistance, on the opposite shores of Rhegium. A Gothic prince, who had married the daughter of Theodatus, was stationed with an army to guard the entrance of Italy; but he imitated, without scruple, the example of a sovereign faithless to his public and private duties. The perfidious Ebermor deserted with his followers to the Roman camp, and was dismissed to enjoy the servile honours of the Byzantine court.⁷³ From Rhegium to Naples, the fleet and

army of Belisarius, almost always in view of each other, advanced near three hundred miles along the sea-coast. The people of Bruttium, Lucania, and Campania, who abhorred the name and religion of the Goths, embraced the specious excuse that their ruined walls were incapable of defence; the soldiers paid a just equivalent for a plentiful market; and curiosity alone interrupted the peaceful occupations of the husbandman or artificer. Naples, which has swelled to a great and populous capital, long cherished the language and manners of a Grecian colony;⁷⁴ and the choice of Virgil had ennobled this elegant retreat, which attracted the lovers of repose and study, from the noise, the smoke, and the laborious opulence of Rome.⁷⁵ As soon as the place was invested by sea and land, Belisarius gave audience to the deputies of the people, who exhorted him to disregard a conquest unworthy of his arms, to seek the Gothic king in a field of battle, and, after his victory, to claim, as the sovereign of Rome, the allegiance of the dependent cities. “When I treat with my enemies,” replied the Roman chief, with an haughty smile, “I am more accustomed to give than to receive counsel; but I hold in one hand inevitable ruin, and in the other, peace and freedom, such as Sicily now enjoys.” The impatience of delay urged him to grant the most liberal terms; his honour secured their performance; but Naples was divided into two factions; and the Greek democracy was inflamed by their orators, who, with much spirit and some truth, represented to the multitude that the Goths would punish their defection and that Belisarius himself must esteem their loyalty and valour. Their deliberations, however, were not perfectly free: the city was commanded by eight hundred Barbarians, whose wives and children were detained at Ravenna as the pledge of their fidelity; and even the Jews, who were rich and numerous, resisted, with desperate enthusiasm, the intolerant laws of Justinian. In a much later period, the circumference of Naples⁷⁶ measured only two thousand three hundred and sixty-three paces:⁷⁷ the fortifications were defended by precipices or the sea; when the aqueducts were intercepted, a supply of water might be drawn from wells and fountains; and the stock of provisions was sufficient to consume the patience of the besiegers. At the end of twenty days, that of Belisarius was almost exhausted, and he had reconciled himself to the disgrace of abandoning the siege, that he might march, before the winter season, against Rome and the Gothic king. But his anxiety was relieved by the bold curiosity of an Isaurian, who explored the dry channel of an aqueduct, and secretly reported that a passage might be perforated to introduce a file of armed soldiers into the heart of the city. When the work had been silently executed, the humane general risked the discovery of his secret, by a last and fruitless admonition of the impending danger. In the darkness of the night, four hundred Romans entered the aqueduct, raised themselves by a rope, which they fastened to an olive tree, into the house or garden of a solitary matron, sounded their trumpets, surprised the sentinels, and gave admittance to their companions, who on all sides scaled the walls and burst open the gates of the city. Every crime which is punished by social justice, was practised as the rights of war; the Huns were distinguished by cruelty and sacrilege; and Belisarius alone appeared in the streets and churches of Naples to moderate the calamities which he predicted. “The gold and silver,” he

repeatedly exclaimed, “are the just rewards of your valour. But spare the inhabitants, they are Christians, they are suppliants, they are now your fellow-subjects. Restore the children to their parents, the wives to their husbands; and shew them, by your generosity, of what friends they have obstinately deprived themselves.” The city was saved by the virtue and authority of its conqueror,[78](#) and, when the Neapolitans returned to their houses, they found some consolation in the secret enjoyment of their hidden treasures. The Barbarian garrison enlisted in the service of the emperor; Apulia and Calabria, delivered from the odious presence of the Goths, acknowledged his dominion; and the tusks of the Calydonian boar, which were still shewn at Beneventum, are curiously described by the historian of Belisarius.[79](#)

The faithful soldiers and citizens of Naples had expected their deliverance from a prince, who remained the inactive and almost indifferent spectator of their ruin. Theodatus secured his person within the walls of Rome, while his cavalry advanced forty miles on the Appian way, and encamped in the Pomptine marshes; which, by a canal of nineteen miles in length, had been recently drained and converted into excellent pastures.[80](#) But the principal forces of the Goths were dispersed in Dalmatia, Venetia, and Gaul; and the feeble mind of their king was confounded by the unsuccessful event of a divination, which seemed to presage the downfall of his empire.[81](#) The most abject slaves have arraigned the guilt or weakness of an unfortunate master. The character of Theodatus was rigorously scrutinised by a free and idle camp of Barbarians, conscious of their privilege and power; he was declared unworthy of his race, his nation, and his throne; and their general Vitiges, whose valour had been signalised in the Illyrian war, was raised with unanimous applause on the bucklers of his companions. On the first rumour, the abdicated monarch fled from the justice of his country; but he was pursued by private revenge. A Goth whom he had injured in his love overtook Theodatus on the Flaminian way, and, regardless of his unmanly cries, slaughtered him as he lay prostrate on the ground, like a victim (says the historian) at the foot of the altar. The choice of the people is the best and purest title to reign over them; yet such is the prejudice of every age, that Vitiges impatiently wished to return to Ravenna, where he might seize, with the reluctant hand of the daughter of Amalasontha, some faint shadow of hereditary right. A national council was immediately held, and the new monarch reconciled the impatient spirit of the Barbarians to a measure of disgrace which the misconduct of his predecessor rendered wise and indispensable. The Goths consented to retreat in the presence of a victorious enemy; to delay till the next spring the operations of offensive war; to summon their scattered forces; to relinquish their distant possessions; and to trust even Rome itself to the faith of its inhabitants. Leuderis, an aged warrior, was left in the capital with four thousand soldiers, a feeble garrison, which might have seconded the zeal, though it was incapable of opposing the wishes, of the Romans. But a momentary enthusiasm of religion and patriotism was kindled in their minds. They furiously exclaimed that the apostolic throne should no longer be profaned by the triumph or

toleration of Arianism; that the tombs of the Cæsars should no longer be trampled by the savages of the North; and, without reflecting that Italy must sink into a province of Constantinople, they fondly hailed the restoration of a Roman emperor as a new era of freedom and prosperity. The deputies of the pope and clergy, of the senate and people, invited the lieutenant of Justinian to accept their voluntary allegiance, and to enter the city, whose gates would be thrown open for his reception. As soon as Belisarius had fortified his new conquests, Naples and Cumæ, he advanced about twenty miles to the banks of the Volturnus, contemplated the decayed grandeur of Capua, and halted at the separation of the Latin and Appian ways. The work of the censor, after the incessant use of nine centuries, still preserved its primæval beauty, and not a flaw could be discovered in the large polished stones, of which that solid though narrow road was so firmly compacted.⁸² Belisarius, however, preferred the Latin way, which, at a distance from the sea and the marshes, skirted in a space of one hundred and twenty miles along the foot of the mountains. His enemies had disappeared; when he made his entrance through the Asinarian gate, the garrison departed without molestation along the Flaminian way; and the city, after sixty years' servitude, was delivered from the yoke of the Barbarians. Leuderis alone, from a motive of pride or discontent, refused to accompany the fugitives; and the Gothic chief, himself a trophy of the victory, was sent with the keys of Rome to the throne of the emperor Justinian.⁸³

The first days, which coincided with the old Saturnalia, were devoted to mutual congratulation and the public joy; and the Catholics prepared to celebrate, without a rival, the approaching festival of the nativity of Christ. In the familiar conversation of an hero, the Romans acquired some notion of the virtues which history ascribed to their ancestors; they were edified by the apparent respect of Belisarius for the successor of St. Peter, and his rigid discipline secured in the midst of war the blessings of tranquillity and justice. They applauded the rapid success of his arms, which overran the adjacent country, as far as Narni, Perusia, and Spoleto; but they trembled, the senate, the clergy, and the unwarlike people, as soon as they understood that he had resolved, and would speedily be reduced, to sustain a siege against the powers of the Gothic monarchy. The designs of Vitiges were executed, during the winter season, with diligence and effect. From their rustic habitations, from their distant garrisons, the Goths assembled at Ravenna for the defence of their country; and such were their numbers that, after an army had been detached for the relief of Dalmatia, one hundred and fifty thousand fighting men marched under the royal standard. According to the degrees of rank or merit, the Gothic king distributed arms and horses, rich gifts, and liberal promises; he moved along the Flaminian way, declined the useless sieges of Perusia and Spoleto, respected the impregnable rock of Narni, and arrived within two miles of Rome at the foot of the Milvian bridge.⁸⁴ The narrow passage was fortified with a tower, and Belisarius had computed the value of the twenty days which must be lost in the construction of another bridge. But the consternation of the soldiers of the tower, who either fled or deserted, disappointed his hopes, and betrayed his person into the most imminent danger. At the head of one thousand horse, the Roman general

sallied from the Flaminian gate to mark the ground of an advantageous position, and to survey the camp of the Barbarians; but, while he still believed them on the other side of the Tiber, he was suddenly encompassed and assaulted by their innumerable squadrons. The fate of Italy depended on his life; and the deserters pointed to the conspicuous horse, a bay,[85](#) with a white face, which he rode on that memorable day. “Aim at the bay horse,” was the universal cry. Every bow was bent, every javelin was directed, against that fatal object, and the command was repeated and obeyed by thousands who were ignorant of its real motive. The bolder Barbarians advanced to the more honourable combat of swords and spears; and the praise of an enemy has graced the fall of Visandus, the standard-bearer,[86](#) who maintained his foremost station, till he was pierced with thirteen wounds, perhaps by the hand of Belisarius himself. The Roman general was strong, active, and dexterous; on every side he discharged his weighty and mortal strokes; his faithful guards imitated his valour and defended his person; and the Goths, after the loss of a thousand men, fled before the arms of an hero. They were rashly pursued to their camp; and the Romans, oppressed by multitudes, made a gradual, and at length a precipitate, retreat to the gates of the city; the gates were shut against the fugitives; and the public terror was increased by the report that Belisarius was slain. His countenance was indeed disfigured by sweat, dust, and blood; his voice was hoarse, his strength was almost exhausted; but his unconquerable spirit still remained; he imparted that spirit to his desponding companions; and their last desperate charge was felt by the flying Barbarians, as if a new army, vigorous and entire, had been poured from the city. The Flaminian gate was thrown open to a *real* triumph; but it was not before Belisarius had visited every post, and provided for the public safety, that he could be persuaded by his wife and friends to taste the needful refreshments of food and sleep. In the more improved state of the art of war, a general is seldom required, or even permitted, to display the personal prowess of a soldier; and the example of Belisarius may be added to the rare examples of Henry IV., of Pyrrhus, and of Alexander.

After this first and unsuccessful trial of their enemies, the whole army of the Goths passed the Tiber, and formed the siege of the city, which continued above a year, till their final departure. Whatever fancy may conceive, the severe compass of the geographer defines the circumference of Rome within a line of twelve miles and three hundred and forty-five paces; and that circumference, except in the Vatican, has invariably been the same from the triumph of Aurelian to the peaceful but obscure reign of the modern popes.[87](#) But in the day of her greatness, the space within her walls was crowded with habitations and inhabitants; and the populous suburbs, that stretched along the public roads, were darted like so many rays from one common centre. Adversity swept away these extraneous ornaments, and left naked and desolate a considerable part even of the seven hills. Yet Rome in its present state could send into the field above thirty thousand males of a military age;[88](#) and, notwithstanding the want of discipline and exercise, the far greater part, inured to the hardships of poverty,

might be capable of bearing arms for the defence of their country and religion. The prudence of Belisarius did not neglect this important resource. His soldiers were relieved by the zeal and diligence of the people, who watched while *they* slept, and laboured while *they* reposed; he accepted the voluntary service of the bravest and most indigent of the Roman youth; and the companies of townsmen sometimes represented, in a vacant post, the presence of the troops which had been drawn away to more essential duties. But his just confidence was placed in the veterans who had fought under his banner in the Persian and African wars; and, although that gallant band was reduced to five thousand men, he undertook, with such contemptible numbers, to defend a circle of twelve miles, against an army of one hundred and fifty thousand Barbarians. In the walls of Rome, which Belisarius constructed or restored, the materials of ancient architecture may be discerned;[89](#) and the whole fortification was completed, except in a chasm still extant between the Pincian and Flaminian gates, which the prejudices of the Goths and Romans left under the effectual guard of St. Peter the apostle.[90](#) The battlements or bastions were shaped in sharp angles; a ditch, broad and deep, protected the foot of the rampart; and the archers on the rampart were assisted by military engines: the *balista*, a powerful cross-bow, which darted short but massy arrows; the *onagri*, or wild asses, which, on the principle of a sling, threw stones and bullets of an enormous size.[91](#) A chain was drawn across the Tiber; the arches of the aqueducts were made impervious, and the mole or sepulchre of Hadrian[92](#) was converted, for the first time, to the uses of a citadel. That venerable structure, which contained the ashes of the Antonines, was a circular turret, rising from a quadrangular basis: it was covered with the white marble of Paros, and decorated by the statues of gods and heroes; and the lover of the arts must read with a sigh that the works of Praxiteles or Lysippus were torn from their lofty pedestals, and hurled into the ditch on the heads of the besiegers.[93](#) To each of his lieutenants Belisarius assigned the defence of a gate with the wise and peremptory instruction that, whatever might be the alarm, they should steadily adhere to their respective posts and trust their general for the safety of Rome. The formidable host of the Goths was insufficient to embrace the ample measure of the city; of the fourteen gates, seven only were invested from the Prænestine to the Flaminian way;[94](#) and Vitiges divided his troops into six camps, each of which was fortified with a ditch and rampart. On the Tuscan side of the river, a seventh encampment was formed in the field or circus of the Vatican, for the important purpose of commanding the Milvian bridge and the course of the Tiber; but they approached with devotion the adjacent church of St. Peter; and the threshold of the holy apostles was respected during the siege by a Christian enemy. In the ages of victory, as often as the senate decreed some distant conquest, the consul denounced hostilities, by unbarring in solemn pomp the gates of the temple of Janus.[95](#) Domestic war now rendered the admonition superfluous, and the ceremony was superseded by the establishment of a new religion. But the brazen temple of Janus was left standing in the forum; of a size sufficient only to contain the statue of the god, five cubits in height, of a human form, but with two faces, directed to the east and west. The double

gates were likewise of brass; and a fruitless effort to turn them on their rusty hinges revealed the scandalous secret that some Romans were still attached to the superstition of their ancestors.

Eighteen days were employed by the besiegers to provide all the instruments of attack which antiquity had invented. Fascines were prepared to fill the ditches, scaling ladders to ascend the walls. The largest trees of the forest supplied the timbers of four battering-rams; their heads were armed with iron; they were suspended by ropes, and each of them was worked by the labour of fifty men. The lofty wooden turrets moved on wheels or rollers, and formed a spacious platform of the level of the rampart. On the morning of the nineteenth day, a general attack was made from the Prænestine gate to the Vatican: seven Gothic columns, with their military engines, advanced to the assault; and the Romans who lined the ramparts listened with doubt and anxiety to the cheerful assurances of their commander. As soon as the enemy approached the ditch, Belisarius himself drew the first arrow; and such was his strength and dexterity that he transfixed the foremost of the Barbarian leaders. A shout of applause and victory was re-echoed along the wall. He drew a second arrow, and the stroke was followed with the same success and the same acclamation. The Roman general then gave the word that the archers should aim at the teams of oxen; they were instantly covered with mortal wounds; the towers which they drew remained useless and immoveable, and a single moment disconcerted the laborious projects of the king of the Goths. After this disappointment, Vitiges still continued, or feigned to continue, the assault of the Salarian gate, that he might divert the attention of his adversary, while his principal forces more strenuously attacked the Prænestine gate and the sepulchre of Hadrian, at the distance of three miles from each other. Near the former, the double walls of the Vivarium⁹⁶ were low or broken; the fortifications of the latter were feebly guarded; the vigour of the Goths was excited by the hope of victory and spoil; and, if a single post had given way, the Romans, and Rome itself, were irrecoverably lost. This perilous day was the most glorious in the life of Belisarius. Amidst tumult and dismay, the whole plan of the attack and defence was distinctly present to his mind; he observed the changes of each instant, weighed every possible advantage, transported his person to the scenes of danger, and communicated his spirit in calm and decisive orders. The contest was fiercely maintained from the morning to the evening; the Goths were repulsed on all sides, and each Roman might boast that he had vanquished thirty Barbarians, if the strange disproportion of numbers were not counterbalanced by the merit of one man. Thirty thousand Goths, according to the confession of their own chiefs, perished in this bloody action; and the multitude of the wounded was equal to that of the slain. When they advanced to the assault, their close disorder suffered not a javelin to fall without effect; and, as they retired, the populace of the city joined the pursuit, and slaughtered, with impunity, the backs of their flying enemies. Belisarius instantly sallied from the gates; and, while the soldiers chaunted his name and victory, the hostile engines of war were reduced to ashes. Such was the loss and consternation of the Goths that, from this day, the siege of Rome degenerated into a tedious and

indolent blockade; and they were incessantly harassed by the Roman general, who in frequent skirmishes destroyed above five thousand of their bravest troops. Their cavalry was unpractised in the use of the bow; their archers served on foot; and this divided force was incapable of contending with their adversaries, whose lances and arrows, at a distance or at hand, were alike formidable. The consummate skill of Belisarius embraced the favourable opportunities; and, as he chose the ground and the moment, as he pressed the charge or sounded the retreat,[97](#) the squadrons which he detached were seldom unsuccessful. These partial advantages diffused an impatient ardour among the soldiers and people, who began to feel the hardships of a siege, and to disregard the dangers of a general engagement. Each plebeian conceived himself to be an hero, and the infantry, who, since the decay of discipline, were rejected from the line of battle, aspired to the ancient honours of the Roman legion. Belisarius praised the spirit of his troops, condemned their presumption, yielded to their clamours, and prepared the remedies of a defeat, the possibility of which he alone had courage to suspect. In the quarter of the Vatican, the Romans prevailed; and, if the irreparable moments had not been wasted in the pillage of the camp, they might have occupied the Milvian bridge, and charged in the rear of the Gothic host. On the other side of the Tiber, Belisarius advanced from the Pincian[98](#) and Salarian gates. But his army, four thousand soldiers perhaps, was lost in a spacious plain; they were encompassed and oppressed by fresh multitudes, who continually relieved the broken ranks of the Barbarians. The valiant leaders of the infantry were unskilled to conquer; they died; the retreat (an hasty retreat) was covered by the prudence of the general, and the victors started back with affright from the formidable aspect of an armed rampart. The reputation of Belisarius was unsullied by a defeat; and the vain confidence of the Goths was not less serviceable to his designs than the repentance and modesty of the Roman troops.[99](#)

From the moment that Belisarius had determined to sustain a siege, his assiduous care provided Rome against the danger of famine, more dreadful than the Gothic arms. An extraordinary supply of corn was imported from Sicily; the harvests of Campania and Tuscany were forcibly swept for the use of the city; and the rights of private property were infringed by the strong plea of the public safety. It might easily be foreseen that the enemy would intercept the aqueducts; and the cessation of the water-mills was the first inconvenience, which was speedily removed by mooring large vessels, and fixing mill-stones, in the current of the river. The stream was soon embarrassed by the trunks of trees, and polluted with dead bodies; yet so effectual were the precautions of the Roman general that the waters of the Tiber still continued to give motion to the mills and drink to the inhabitants; the more distant quarters were supplied from domestic wells; and a besieged city might support, without impatience, the privation of her public baths. A large portion of Rome, from the Prænestine gate to the church of St. Paul, was never invested by the Goths; their excursions were restrained by the activity of the Moorish troops; the navigation of the Tiber, and the Latin, Appian, and Ostian ways, were left free and unmolested for the introduction of corn and cattle, or the

retreat of the inhabitants, who sought a refuge in Campania or Sicily. Anxious to relieve himself from an useless and devouring multitude, Belisarius issued his peremptory orders for the instant departure of the women, the children, and slaves; required his soldiers to dismiss their male and female attendants; and regulated their allowance, that one moiety should be given in provisions and the other in money. His foresight was justified by the increase of the public distress, as soon as the Goths had occupied two important posts in the neighbourhood of Rome. By the loss of the port, or, as it is now called, the city of Porto, he was deprived of the country on the right of the Tiber, and the best communication with the sea; and he reflected with grief and anger, that three hundred men, could he have spared such a feeble band, might have defended its impregnable works. Seven miles from the capital, between the Appian and the Latin ways, two principal aqueducts crossing, and again crossing each other, enclosed within their solid and lofty arches a fortified space,[100](#) where Vitiges established a camp of seven thousand Goths to intercept the convoys of Sicily and Campania. The granaries of Rome were insensibly exhausted, the adjacent country had been wasted with fire and sword; such scanty supplies as might yet be obtained by hasty excursions were the reward of valour and the purchase of wealth: the forage of the horses and the bread of the soldiers never failed; but in the last months of the siege the people were exposed to the miseries of scarcity, unwholesome food,[101](#) and contagious disorders. Belisarius saw and pitied their sufferings; but he had foreseen, and he watched, the decay of their loyalty and the progress of their discontent. Adversity had awakened the Romans from the dreams of grandeur and freedom, and taught them the humiliating lesson that it was of small moment to their real happiness whether the name of their master was derived from the Gothic or the Latin language. The lieutenant of Justinian listened to their just complaints, but he rejected with disdain the idea of flight or capitulation; repressed their clamorous impatience for battle; amused them with the prospect of sure and speedy relief; and secured himself and the city from the effects of their despair or treachery. Twice in each month he changed the station of the officers to whom the custody of the gates was committed; the various precautions of patrols, watch-words, lights, and music were repeatedly employed to discover whatever passed on the ramparts; out-guards were posted beyond the ditch, and the trusty vigilance of dogs supplied the more doubtful fidelity of mankind. A letter was intercepted, which assured the king of the Goths that the Asinarian gate, adjoining to the Lateran church, should be secretly opened to his troops. On the proof or suspicion of treason, several senators were banished, and the pope Sylverius was summoned to attend the representative of his sovereign, at his head-quarters in the Pincian palace.[102](#) The ecclesiastics who followed their bishop were detained in the first or second apartment,[103](#) and he alone was admitted to the presence of Belisarius. The conqueror of Rome and Carthage was modestly seated at the feet of Antonina, who reclined on a stately couch; the general was silent, but the voice of reproach and menace issued from the mouth of his imperious wife. Accused by credible witnesses, and the evidence of his own subscription, the successor of St. Peter was despoiled of his pontifical ornaments, clad in the mean habit of a monk, and

embarked without delay for a distant exile in the East. At the emperor's command, the clergy of Rome proceeded to the choice of a new bishop; and, after a solemn invocation of the Holy Ghost, elected the deacon Vigilius, who had purchased the papal throne by a bribe of two hundred pounds of gold. The profit, and consequently the guilt, of this simony was imputed to Belisarius; but the hero obeyed the orders of his wife; Antonina served the passions of the empress; and Theodora lavished her treasures, in the vain hope of obtaining a pontiff hostile or indifferent to the council of Chalcedon.[104](#)

The epistle of Belisarius to the emperor announced his victory, his danger, and his resolution. "According to your commands, we have entered the dominions of the Goths, and reduced to your obedience Sicily, Campania, and the city of Rome; but the loss of these conquests will be more disgraceful than their acquisition was glorious. Hitherto we have successfully fought against the multitude of the Barbarians, but their multitudes may finally prevail. Victory is the gift of Providence, but the reputation of kings and generals depends on the success or the failure of their designs. Permit me to speak with freedom: if you wish that we should live, send us subsistence; if you desire that we should conquer, send us arms, horses, and men. The Romans have received us as friends and deliverers; but, in our present distress, *they* will be either betrayed by their confidence or we shall be oppressed by *their* treachery and hatred. For myself, my life is consecrated to your service: it is yours to reflect, whether my death in this situation will contribute to the glory and prosperity of your reign." Perhaps that reign would have been equally prosperous, if the peaceful master of the East had abstained from the conquest of Africa and Italy; but, as Justinian was ambitious of fame, he made some efforts, they were feeble and languid, to support and rescue his victorious general. A reinforcement of sixteen hundred Sclavonians and Huns was led by Martin and Valerian; and, as they had reposed during the winter season in the harbours of Greece, the strength of the men and horses was not impaired by the fatigues of a sea-voyage; and they distinguished their valour in the first sally against the besiegers. About the time of the summer solstice, Euthalius landed at Terracina with large sums of money for the payment of the troops; he cautiously proceeded along the Appian way, and this convoy entered Rome through the gate Capena,[105](#) while Belisarius, on the other side, diverted the attention of the Goths by a vigorous and successful skirmish. These seasonable aids, the use and reputation of which were dexterously managed by the Roman general, revived the courage, or at least the hopes, of the soldiers and people. The historian Procopius was despatched with an important commission, to collect the troops and provisions which Campania could furnish or Constantinople had sent; and the secretary of Belisarius was soon followed by Antonina herself,[106](#) who boldly traversed the posts of the enemy, and returned with the Oriental succours to the relief of her husband and the besieged city. A fleet of three thousand Isaurians cast anchor in the bay of Naples, and afterwards at Ostia. Above two thousand horse, of whom a part were Thracians, landed at Tarentum; and, after the junction of five hundred soldiers of Campania, and a train of waggons laden with wine

and flour, they directed their march on the Appian way, from Capua to the neighbourhood of Rome. The forces that arrived by land and sea were united at the mouth of the Tiber. Antonina convened a council of war: it was resolved to surmount, with sails and oars, the adverse stream of the river; and the Goths were apprehensive of disturbing, by any rash hostilities, the negotiation to which Belisarius had craftily listened. They credulously believed that they saw no more than the vanguard of a fleet and army, which already covered the Ionian sea and the plains of Campania; and the illusion was supported by the haughty language of the Roman general, when he gave audience to the ambassadors of Vitiges. After a specious discourse to vindicate the justice of his cause, they declared that, for the sake of peace, they were disposed to announce the possession of Sicily. "The emperor is not less generous," replied his lieutenant, with a disdainful smile, "in return for a gift which you no longer possess; he presents you with an ancient province of the empire; he resigns to the Goths the sovereignty of the British island." Belisarius rejected with equal firmness and contempt the offer of a tribute; but he allowed the Gothic ambassadors to seek their fate from the mouth of Justinian himself; and consented, with seeming reluctance, to a truce of three months, from the winter solstice to the equinox of spring. Prudence might not safely trust either the oaths or hostages of the Barbarians, but the conscious superiority of the Roman chief was expressed in the distribution of his troops. As soon as fear or hunger compelled the Goths to evacuate Alba, Porto, and Centumcellæ, their place was instantly supplied; the garrisons of Narni, Spoleto, and Perugia were reinforced, and the seven camps of the besiegers were gradually encompassed with the calamities of a siege. The prayers and pilgrimage of Datius, bishop of Milan, were not without effect; and he obtained one thousand Thracians and Isaurians, to assist the revolt of Liguria against her Arian tyrant. At the same time, John the Sanguinary,[107](#) the nephew of Vitalian, was detached with two thousand chosen horse, first to Alba on the Fucine lake, and afterwards to the frontiers of Picenum on the Hadriatic sea. "In that province," said Belisarius, "the Goths have deposited their families and treasures, without a guard or the suspicion of danger. Doubtless they will violate the truce: let them feel your presence, before they hear of your motions. Spare the Italians; suffer not any fortified places to remain hostile in your rear; and faithfully reserve the spoil for an equal and common partition. It would not be reasonable," he added with a laugh, "that, whilst we are toiling to the destruction of the drones, our more fortunate brethren should rifle and enjoy the honey."

The whole nation of the Ostrogoths had been assembled for the attack, and was almost entirely consumed in the siege of Rome. If any credit be due to an intelligent spectator, one third at least of their enormous host was destroyed, in frequent and bloody combats under the walls of the city. The bad

THE HISTORY OF THE DECLINE AND FALL OF THE ROMAN EMPIRE

CHAPTER XLV

Reign of the Younger Justin — Embassy of the Avars — Their Settlement on the Danube — Conquest of Italy by the Lombards — Adoption and Reign of Tiberius — of Maurice — State of Italy under the Lombards and the Exarchs of Ravenna — Distress of Rome — Character and Pontificate of Gregory the First

During the last years of Justinian, his infirm mind was devoted to heavenly contemplation, and he neglected the business of the lower world. His subjects were impatient of the long continuance of his life and reign; yet all who were capable of reflection apprehended the moment of his death, which might involve the capital in tumult and the empire in civil war. Seven nephews¹ of the childless monarch, the sons or grandsons of his brother and sister, had been educated in the splendour of a princely fortune; they had been shewn in high commands to the provinces and armies; their characters were known, their followers were zealous; and, as the jealousy of age postponed the declaration of a successor, they might expect with equal hopes the inheritance of their uncle. He expired in his palace after a reign of thirty-eight years; and the decisive opportunity was embraced by the friends of Justin, the son of Vigilantia.² At the hour of midnight his domestics were awakened by an importunate crowd, who thundered at his door, and obtained admittance by revealing themselves to be the principal members of the senate. These welcome deputies announced the recent and momentous secret of the emperor's decease; reported, or perhaps invented, his dying choice of the best beloved and most deserving of his nephews; and conjured Justin to prevent the disorders of the multitude, if they should perceive, with the return of light, that they were left without a master. After composing his countenance to surprise, sorrow, and decent modesty, Justin, by the advice of his wife Sophia, submitted to the authority of the senate. He was conducted with speed and silence to the palace; the guards saluted their new sovereign; and the martial and religious rites of his coronation were diligently accomplished. By the hands of the proper officers he was invested with the Imperial garments, the red buskins, white tunic, and purple robe. A fortunate soldier, whom he instantly promoted to the rank of tribune, encircled his neck with a military collar; four robust youths exalted him on a shield; he stood firm and erect to receive the adoration of his subjects; and their choice was sanctified by the benediction of the patriarch, who imposed the diadem on the head of an orthodox prince. The hippodrome was already filled with innumerable multitudes; and no

sooner did the emperor appear on his throne than the voices of the blue and the green factions were confounded in the same loyal acclamations. In the speeches which Justin addressed to the senate and people, he promised to correct the abuses which had disgraced the age of his predecessor, displayed the maxims of a just and beneficent government, and declared that, on the approaching calends of January,³ he would revive in his own person the name and liberality of a Roman consul. The immediate discharge of his uncle's debts exhibited a solid pledge of his faith and generosity: a train of porters laden with bags of gold advanced into the midst of the hippodrome, and the hopeless creditors of Justinian accepted this equitable payment as a voluntary gift. Before the end of three years his example was imitated and surpassed by the empress Sophia, who delivered many indigent citizens from the weight of debt and usury: an act of benevolence the best entitled to gratitude, since it relieves the most intolerable distress; but in which the bounty of a prince is the most liable to be abused by the claims of prodigality and fraud.⁴

On the seventh day of his reign, Justin gave audience to the ambassadors of the Avars, and the scene was decorated to impress the Barbarians with astonishment, veneration, and terror. From the palace gate, the spacious courts and long porticos were lined with the lofty crests and gilt bucklers of the guards, who presented their spears and axes with more confidence than they would have shewn in a field of battle. The officers who exercised the power, or attended the person, of the prince were attired in their richest habits and arranged according to the military and civil order of the hierarchy. When the veil of the sanctuary was withdrawn, the ambassadors beheld the emperor of the East on his throne, beneath a canopy or dome, which was supported by four columns and crowned with a winged figure of victory. In the first emotions of surprise, they submitted to the servile adoration of the Byzantine court; but, as soon as they rose from the ground, Targetius,⁵ the chief of the embassy, expressed the freedom and pride of a Barbarian. He extolled, by the tongue of his interpreter, the greatness of the chagan, by whose clemency the kingdoms of the South were permitted to exist, whose victorious subjects had traversed the frozen rivers of Scythia, and who now covered the banks of the Danube with innumerable tents.⁶ The late emperor had cultivated, with annual and costly gifts, the friendship of a grateful monarch, and the enemies of Rome had respected the allies of the Avars. The same prudence would instruct the nephew of Justinian to imitate the liberality of his uncle, and to purchase the blessings of peace from an invincible people, who delighted and excelled in the exercise of war. The reply of the emperor was delivered in the same strain of haughty defiance, and he derived his confidence from the God of the Christians, the ancient glory of Rome, and the recent triumphs of Justinian. "The empire," said he, "abounds with men and horses, and arms sufficient to defend our frontiers and to chastise the Barbarians. You offer aid, you threaten hostilities: we despise your enmity and your aid. The conquerors of the Avars solicit our alliance: shall we dread their fugitives and exiles?"⁷ The bounty of our uncle was granted to your misery, to your humble prayers. From us

you shall receive a more important obligation, the knowledge of your own weakness. Retire from our presence; the lives of ambassadors are safe; and, if you return to implore our pardon, perhaps you will taste of our benevolence.”⁸ On the report of his ambassadors, the chagan was awed by the apparent firmness of a Roman emperor, of whose character and resources he was ignorant. Instead of executing his threats against the Eastern empire, he marched into the poor and savage countries of Germany, which were subject to the dominion of the Franks. After two doubtful battles he consented to retire, and the Austrasian king relieved the distress of his camp with an immediate supply of corn and cattle.⁹ Such repeated disappointments had chilled the spirit of the Avars, and their power would have dissolved away in the Sarmatian desert, if the alliance of Alboin, king of the Lombards, had not given a new object to their arms, and a lasting settlement to their wearied fortunes.

While Alboin served under his father’s standard, he encountered in battle, and transpierced with his lance, the rival prince of the Gepidæ. The Lombards, who applauded such early prowess, requested his father with unanimous acclamations that the heroic youth, who had shared the dangers of the field, might be admitted to the feast of victory. “You are not unmindful,” replied the inflexible Audoin, “of the wise customs of our ancestors. Whatever may be his merit, a prince is incapable of sitting at table with his father till he has received his arms from a foreign and royal hand.” Alboin bowed with reverence to the institutions of his country, selected forty companions, and boldly visited the court of Turisund king of the Gepidæ, who embraced and entertained, according to the laws of hospitality, the murderer of his son. At the banquet, whilst Alboin occupied the seat of the youth whom he had slain, a tender remembrance arose in the mind of Turisund. “How dear is that place — how hateful is that person!” were the words that escaped, with a sigh, from the indignant father. His grief exasperated the national resentment of the Gepidæ; and Cunimund, his surviving son, was provoked by wine, or fraternal affection, to the desire of vengeance. “The Lombards,” said the rude Barbarian, “resemble, in figure and in smell, the mares of our Sarmatian plains.” And this insult was a coarse allusion to the white bands which enveloped their legs. “Add another resemblance,” replied an audacious Lombard; “you have felt how strongly they kick. Visit the plain of Asfeld, and seek for the bones of thy brother; they are mingled with those of the vilest animals.” The Gepidæ, a nation of warriors, started from their seats, and the fearless Alboin, with his forty companions, laid their hands on their swords. The tumult was appeased by the venerable interposition of Turisund. He saved his own honour, and the life of his guest; and, after the solemn rites of investiture, dismissed the stranger in the bloody arms of his son, the gift of a weeping parent. Alboin returned in triumph; and the Lombards, who celebrated his matchless intrepidity, were compelled to praise the virtues of an enemy.¹⁰ In this extraordinary visit he had probably seen the daughter of Cunimund, who soon after ascended the throne of the Gepidæ. Her name was Rosamond, an appellation expressive of female beauty, and which our own history or romance has consecrated to amorous tales. The king of the Lombards (the father of

Alboin no longer lived) was contracted to the granddaughter of Clovis; but the restraints of faith and policy soon yielded to the hope of possessing the fair Rosamond, and of insulting her family and nation. The arts of persuasion were tried without success; and the impatient lover, by force and stratagem, obtained the object of his desires. War was the consequence which he foresaw and solicited; but the Lombards could not long withstand the furious assault of the Gepidæ, who were sustained by a Roman army. And, as the offer of marriage was rejected with contempt, Alboin was compelled to relinquish his prey, and to partake of the disgrace which he had inflicted on the house of Cunimund.[11](#)

When a public quarrel is envenomed by private injuries, a blow that is not mortal or decisive can be productive only of a short truce, which allows the unsuccessful combatant to sharpen his arms for a new encounter. The strength of Alboin had been found unequal to the gratification of his love, ambition, and revenge; he condescended to implore the formidable aid of the chagan; and the arguments that he employed are expressive of the art and policy of the Barbarians. In the attack of the Gepidæ he had been prompted by the just desire of extirpating a people whom their alliance with the Roman empire had rendered the common enemies of the nations and the personal adversaries of the chagan. If the forces of the Avars and the Lombards should unite in this glorious quarrel, the victory was secure, and the reward inestimable: the Danube, the Hebrus, Italy, and Constantinople would be exposed, without a barrier, to their invincible arms. But, if they hesitated or delayed to prevent the malice of the Romans, the same spirit which had insulted, would pursue the Avars to the extremity of the earth. These specious reasons were heard by the chagan with coldness and disdain; he detained the Lombard ambassadors in his camp, protracted the negotiation, and by turns alleged his want of inclination, or his want of ability, to undertake this important enterprise. At length he signified the ultimate price of his alliance, that the Lombards should immediately present him with the tithe of their cattle; that the spoils and captives should be equally divided; but that the lands of the Gepidæ should become the sole patrimony of the Avars. Such hard conditions were eagerly accepted by the passions of Alboin; and, as the Romans were dissatisfied with the ingratitude and perfidy of the Gepidæ, Justin abandoned that incorrigible people to their fate, and remained the tranquil spectator of this unequal conflict.[12](#) The despair of Cunimund was active and dangerous. He was informed that the Avars had entered his confines; but on the strong assurance that, after the defeat of the Lombards, these foreign invaders would easily be repelled, he rushed forwards to encounter the implacable enemy of his name and family. But the courage of the Gepidæ could secure them no more than an honourable death. The bravest of the nation fell in the field of battle; the king of the Lombards contemplated with delight the head of Cunimund, and his skull was fashioned into a cup to satiate the hatred of the conqueror, or, perhaps, to comply with the savage custom of his country.[13](#) After this victory no farther obstacle could impede the progress of the confederates, and they faithfully executed the terms of their

agreement.¹⁴ The fair countries of Walachia, Moldavia, Transylvania, and the parts of Hungary beyond the Danube were occupied, without resistance, by a new colony of Scythians; and the Dacian empire of the chagans subsisted with splendour above two hundred and thirty years.¹⁵ The nation of the Gepidæ was dissolved; but, in the distribution of the captives, the slaves of the Avars were less fortunate than the companions of the Lombards, whose generosity adopted a valiant foe, and whose freedom was incompatible with cool and deliberate tyranny. One moiety of the spoil introduced into the camp of Alboin more wealth than a Barbarian could readily compute. The fair Rosamond was persuaded or compelled to acknowledge the rights of her victorious lover; and the daughter of Cunimund appeared to forgive those crimes which might be imputed to her own irresistible charms.

The destruction of a mighty kingdom established the fame of Alboin. In the days of Charlemagne, the Bavarians, the Saxons, and the other tribes of the Teutonic language still repeated the songs which described the heroic virtues, the valour, liberality, and fortune of the king of the Lombards.¹⁶ But his ambition was yet unsatisfied, and the conqueror of the Gepidæ turned his eyes from the Danube to the richer banks of the Po and the Tiber. Fifteen years had not elapsed since his subjects, the confederates of Narses, had visited the pleasant climate of Italy; the mountains, the rivers, the highways, were familiar to their memory; the report of their success, perhaps the view of their spoils, had kindled in the rising generation the flame of emulation and enterprise. Their hopes were encouraged by the spirit and eloquence of Alboin; and it is affirmed that he spoke to their senses by producing, at the royal feast, the fairest and most exquisite fruits that grew spontaneously in the garden of the world. No sooner had he erected his standard than the native strength of the Lombards was multiplied by the adventurous youth of Germany and Scythia. The robust peasantry of Noricum and Pannonia had resumed the manners of Barbarians; and the names of the Gepidæ, Bulgarians, Sarmatians, and Bavarians may be distinctly traced in the provinces of Italy.¹⁷ Of the Saxons, the old allies of the Lombards, twenty thousand warriors, with their wives and children, accepted the invitation of Alboin. Their bravery contributed to his success; but the accession or the absence of their numbers was not sensibly felt in the magnitude of his host. Every mode of religion was freely practised by its respective votaries. The king of the Lombards had been educated in the Arian heresy; but the Catholics, in their public worship, were allowed to pray for his conversion; while the more stubborn Barbarians sacrificed a she-goat, or perhaps a captive, to the gods of their fathers.¹⁸ The Lombards and their confederates were united by their common attachment to a chief, who excelled in all the virtues and vices of a savage hero; and the vigilance of Alboin provided an ample magazine of offensive and defensive arms for the use of the expedition. The portable wealth of the Lombards attended the march; their lands they cheerfully relinquished to the Avars, on the solemn promise, which was made and accepted without a smile, that, if they failed in the conquest of Italy, these voluntary exiles should be reinstated in their former

possessions.

They might have failed, if Narses had been the antagonist of the Lombards; and the veteran warriors, the associates of his Gothic victory, would have encountered with reluctance an enemy whom they dreaded and esteemed. But the weakness of the Byzantine court was subservient to the Barbarian cause; and it was for the ruin of Italy that the emperor once listened to the complaints of his subjects. The virtues of Narses were stained with avarice; and in his provincial reign of fifteen years he accumulated a treasure of gold and silver which surpassed the modesty of a private fortune. His government was oppressive or unpopular, and the general discontent was expressed with freedom by the deputies of Rome. Before the throne of Justin they boldly declared that their Gothic servitude had been more tolerable than the despotism of a Greek eunuch; and that, unless their tyrant were instantly removed, they would consult their own happiness in the choice of a master. The apprehension of a revolt was urged by the voice of envy and detraction, which had so recently triumphed over the merit of Belisarius. A new exarch,^{[19](#)} Longinus, was appointed to supersede the conqueror of Italy, and the base motives of his recall were revealed in the insulting mandate of the empress Sophia, “that he should leave to *men* the exercise of arms, and return to his proper station among the maidens of the palace, where a distaff should be again placed in the hand of the eunuch.” “I will spin her such a thread, as she shall not easily unravel!” is said to have been the reply which indignation and conscious virtue extorted from the hero. Instead of attending, a slave and a victim, at the gate of the Byzantine palace, he retired to Naples, from whence (if any credit is due to the belief of the times) Narses invited the Lombards to chastise the ingratitude of the prince and people.^{[20](#)} But the passions of the people are furious and changeable, and the Romans soon recollected the merits, or dreaded the resentment, of their victorious general. By the mediation of the pope, who undertook a special pilgrimage to Naples, their repentance was accepted; and Narses, assuming a milder aspect and a more dutiful language, consented to fix his residence in the Capitol. His death,^{[21](#)} though in the extreme period of old age, was unseasonable and premature, since *his* genius alone could have repaired the last and fatal error of his life. The reality, or the suspicion, of a conspiracy disarmed and disunited the Italians. The soldiers resented the disgrace, and bewailed the loss, of their general. They were ignorant of their new exarch; and Longinus was himself ignorant of the state of the army and the province. In the preceding years Italy had been desolated by pestilence and famine, and a disaffected people ascribed the calamities of nature to the guilt or folly of their rulers.^{[22](#)}

Whatever might be the grounds of his security, Alboin neither expected nor encountered a Roman army in the field. He ascended the Julian Alps, and looked down with contempt and desire on the fruitful plains to which his victory communicated the perpetual appellation of Lombardy. A faithful chieftain and a select band were stationed at Forum Julii, the modern Friuli, to guard the passes of the mountains. The

Lombards respected the strength of Pavia, and listened to the prayers of the Trevisans; their slow and heavy multitudes proceeded to occupy the palace and city of Verona; and Milan, now rising from her ashes, was invested by the powers of Alboin five months after his departure from Pannonia. Terror preceded his march; he found everywhere, or he left, a dreary solitude; and the pusillanimous Italians presumed, without a trial, that the stranger was invincible. Escaping to lakes, or rocks, or morasses, the affrighted crowds concealed some fragments of their wealth, and delayed the moment of their servitude. Paulinus, the patriarch of Aquileia, removed his treasures, sacred and profane, to the isle of Grado,[23](#) and his successors were adopted by the infant republic of Venice, which was continually enriched by the public calamities. Honoratus, who filled the chair of St. Ambrose, had credulously accepted the faithless offers of a capitulation; and the archbishop, with the clergy and nobles of Milan, were driven by the perfidy of Alboin to seek a refuge in the less accessible ramparts of Genoa. Along the maritime coast, the courage of the inhabitants was supported by the facility of supply, the hopes of relief, and the power of escape; but, from the Trentine hills to the gates of Ravenna and Rome, the inland regions of Italy became, without a battle or a siege, the lasting patrimony of the Lombards. The submission of the people invited the Barbarian to assume the character of a lawful sovereign, and the helpless exarch was confined to the office of announcing to the emperor Justin the rapid and irretrievable loss of his provinces and cities.[24](#) One city, which had been diligently fortified by the Goths, resisted the arms of a new invader; and, while Italy was subdued by the flying detachments of the Lombards, the royal camp was fixed above three years before the western gate of Ticinum, or Pavia. The same courage which obtains the esteem of a civilised enemy provokes the fury of a savage, and the impatient besieger had bound himself by a tremendous oath that age, and sex, and dignity should be confounded in a general massacre. The aid of famine at length enabled him to execute his bloody vow; but, as Alboin entered the gate, his horse stumbled, fell, and could not be raised from the ground. One of his attendants was prompted by compassion, or piety, to interpret this miraculous sign of the wrath of Heaven; the conqueror paused and relented; he sheathed his sword, and, peacefully reposing himself in the palace of Theodoric, proclaimed to the trembling multitude that they should live and obey. Delighted with the situation of a city which was endeared to his pride by the difficulty of the purchase, the prince of the Lombards disdained the ancient glories of Milan; and Pavia, during some ages, was respected as the capital of the kingdom of Italy.[25](#)

The reign of the founder was splendid and transient; and, before he could regulate his new conquests, Alboin fell a sacrifice to domestic treason and female revenge. In a palace near Verona, which had not been erected for the Barbarians, he feasted the companions of his arms; intoxication was the reward of valour, and the king himself was tempted by appetite, or vanity, to exceed the ordinary measure of his intemperance. After draining many capacious bowls of Rhætian or Falernian wine, he called for the skull of Cunimund, the noblest and most precious ornament of his

sideboard. The cup of victory was accepted with horrid applause by the circle of the Lombard chiefs. "Fill it again with wine," exclaimed the inhuman conqueror, "fill it to the brim; carry this goblet to the queen, and request, in my name, that she would rejoice with her father." In an agony of grief and rage, Rosamond had strength to utter "Let the will of my lord be obeyed!" and, touching it with her lips, pronounced a silent imprecation, that the insult should be washed away in the blood of Alboin. Some indulgence might be due to the resentment of a daughter, if she had not already violated the duties of a wife. Implacable in her enmity, or inconstant in her love, the queen of Italy had stooped from the throne to the arms of a subject, and Helmichis, the king's armour-bearer, was the secret minister of her pleasure and revenge. Against the proposal of the murder, he could no longer urge the scruples of fidelity or gratitude; but Helmichis trembled, when he revolved the danger as well as the guilt, when he recollected the matchless strength and intrepidity of a warrior whom he had so often attended in the field of battle. He pressed, and obtained, that one of the bravest champions of the Lombards should be associated to the enterprise, but no more than a promise of secrecy could be drawn from the gallant Peredeus; and the mode of seduction employed by Rosamond betrays her shameless insensibility both to honour and love. She supplied the place of one of her female attendants who was beloved by Peredeus, and contrived some excuse for darkness and silence, till she could inform her companion that he had enjoyed the queen of the Lombards, and that his own death, or the death of Alboin, must be the consequence of such treasonable adultery. In this alternative, he chose rather to be the accomplice than the victim of Rosamond,[26](#) whose undaunted spirit was incapable of fear or remorse. She expected and soon found a favourable moment, when the king oppressed with wine had retired from the table to his afternoon slumbers. His faithless spouse was anxious for his health and repose; the gates of the palace were shut, the arms removed, the attendants dismissed; and Rosamond, after lulling him to rest by her tender caresses, unbolted the chamber-door, and urged the reluctant conspirators to the instant execution of the deed. On the first alarm, the warrior started from his couch; his sword, which he attempted to draw, had been fastened to the scabbard by the hand of Rosamond; and a small stool, his only weapon, could not long protect him from the spears of the assassins. The daughter of Cunimund smiled in his fall; his body was buried under the staircase of the palace; and the grateful posterity of the Lombards revered the tomb and the memory of their victorious leader.

The ambitious Rosamond aspired to reign in the name of her lover; the city and palace of Verona were awed by her power; and a faithful band of her native Gepidæ was prepared to applaud the revenge, and to second the wishes, of their sovereign. But the Lombard chiefs, who fled in the first moments of consternation and disorder, had resumed their courage and collected their powers; and the nation, instead of submitting to her reign, demanded, with unanimous cries, that justice should be executed on the guilty spouse and the murderers of their king. She sought a refuge among the enemies of her country, and a criminal who deserved the abhorrence of mankind was protected

by the selfish policy of the exarch. With her daughter, the heiress of the Lombard throne, her two lovers, her trusty Gepidæ, and the spoils of the palace of Verona, Rosamond descended the Adige and the Po, and was transported by a Greek vessel to the safe harbour of Ravenna. Longinus beheld with delight the charms and the treasures of the widow of Alboin; her situation and her past conduct might justify the most licentious proposals; and she readily listened to the passion of a minister, who, even in the decline of the empire, was respected as the equal of kings. The death of a jealous lover was an easy and grateful sacrifice, and, as Helmichis issued from the bath, he received the deadly potion from the hand of his mistress. The taste of the liquor, its speedy operation, and his experience of the character of Rosamond convinced him that he was poisoned: he pointed his dagger to her breast, compelled her to drain the remainder of the cup, and expired in a few minutes, with the consolation that she could not survive to enjoy the fruits of her wickedness. The daughter of Alboin and Rosamond, with the richest spoils of the Lombards, was embarked for Constantinople; the surprising strength of Peredeus amused and terrified the Imperial court; his blindness and revenge exhibited an imperfect copy of the adventures of Samson. By the free suffrage of the nation, in the assembly of Pavia, Clepho, one of their noblest chiefs, was elected as the successor of Alboin. Before the end of eighteen months, the throne was polluted by a second murder; Clepho was stabbed by the hand of a domestic; the regal office was suspended above ten years, during the minority of his son Autharis; and Italy was divided and oppressed by a ducal aristocracy of thirty tyrants.[27](#)

When the nephew of Justinian ascended the throne, he proclaimed a new era of happiness and glory. The annals of the second Justin[28](#) are marked with disgrace abroad and misery at home. In the West, the Roman empire was afflicted by the loss of Italy, the desolation of Africa, and the conquests of the Persians. Injustice prevailed both in the capital and the provinces: the rich trembled for their property, the poor for their safety, the ordinary magistrates were ignorant or venal, the occasional remedies appear to have been arbitrary and violent, and the complaints of the people could no longer be silenced by the splendid names of a legislator and a conqueror. The opinion which imputes to the prince all the calamities of his times may be countenanced by the historian as a serious truth or a salutary prejudice. Yet a candid suspicion will arise that the sentiments of Justin were pure and benevolent, and that he might have filled his station without reproach, if the faculties of his mind had not been impaired by disease, which deprived the emperor of the use of his feet and confined him to the palace, a stranger to the complaints of the people and the vices of the government. The tardy knowledge of his own impotence determined him to lay down the weight of the diadem; and in the choice of a worthy substitute he shewed some symptoms of a discerning and even magnanimous spirit. The only son of Justin and Sophia died in his infancy; their daughter Arabia was the wife of Baduarius,[29](#) superintendent of the palace, and afterwards commander of the Italian armies, who vainly aspired to confirm the rights of marriage by those of adoption. While the empire appeared an object of

desire, Justin was accustomed to behold with jealousy and hatred his brothers and cousins, the rivals of his hopes; nor could he depend on the gratitude of those who would accept the purple as a restitution rather than a gift. Of these competitors, one had been removed by exile, and afterwards by death; and the emperor himself had inflicted such cruel insults on another, that he must either dread his resentment or despise his patience. This domestic animosity was refined into a generous resolution of seeking a successor, not in his family, but in the republic; and the artful Sophia recommended Tiberius,³⁰ his faithful captain of the guards, whose virtues and fortune the emperor might cherish as the fruit of his judicious choice. The ceremony of his elevation to the rank of Cæsar, or Augustus, was performed in the portico of the palace, in the presence of the patriarch and the senate. Justin collected the remaining strength of his mind and body, but the popular belief that his speech was inspired by the Deity betrays a very humble opinion both of the man and of the times.³¹ “You behold,” said the emperor, “the ensigns of supreme power. You are about to receive them not from my hand, but from the hand of God. Honour them, and from them you will derive honour. Respect the empress your mother; you are now her son; before, you were her servant. Delight not in blood, abstain from revenge, avoid those actions by which I have incurred the public hatred, and consult the experience rather than the example of your predecessor. As a man, I have sinned; as a sinner, even in this life, I have been severely punished; but these servants (and he pointed to his ministers), who have abused my confidence and inflamed my passions, will appear with me before the tribunal of Christ. I have been dazzled by the splendour of the diadem: be thou wise and modest; remember what you have been, remember what you are. You see around us your slaves and your children; with the authority, assume the tenderness, of a parent. Love your people like yourself; cultivate the affections, maintain the discipline, of the army; protect the fortunes of the rich, relieve the necessities of the poor.”³² The assembly, in silence and in tears, applauded the counsels, and sympathised with the repentance, of their prince; the patriarch rehearsed the prayers of the church; Tiberius received the diadem on his knees, and Justin, who in his abdication appeared most worthy to reign, addressed the new monarch in the following words: “If you consent, I live; if you command, I die; may the God of heaven and earth infuse into your heart whatever I have neglected or forgotten.” The four last years of the emperor Justin were passed in tranquil obscurity; his conscience was no longer tormented by the remembrance of those duties which he was incapable of discharging; and his choice was justified by the filial reverence and gratitude of Tiberius.

Among the virtues of Tiberius,³³ his beauty (he was one of the tallest and most comely of the Romans) might introduce him to the favour of Sophia; and the widow of Justin was persuaded that she should preserve her station and influence under the reign of a second and more youthful husband. But, if the ambitious candidate had been tempted to flatter and dissemble, it was no longer in his power to fulfil her expectations or his own promise. The factions of the hippodrome demanded, with

some impatience, the name of their new empress; both the people and Sophia were astonished by the proclamation of Anastasia, the secret though lawful wife of the emperor Tiberius.³⁴ Whatever could alleviate the disappointment of Sophia, Imperial honours, a stately palace, a numerous household, was liberally bestowed by the piety of her adopted son; on solemn occasions he attended and consulted the widow of his benefactor; but her ambition disdained the vain semblance of royalty, and the respectful appellation of mother served to exasperate, rather than appease, the rage of an injured woman. While she accepted, and repaid with a courtly smile, the fair expressions of regard and confidence, a secret alliance was concluded between the dowager empress and her ancient enemies; and Justinian, the son of Germanus, was employed as the instrument of her revenge. The pride of the reigning house supported, with reluctance, the dominion of a stranger; the youth was deservedly popular; his name, after the death of Justin, had been mentioned by a tumultuous faction; and his own submissive offer of his head, with a treasure of sixty thousand pounds, might be interpreted as an evidence of guilt, or at least of fear. Justinian received a free pardon, and the command of the Eastern army. The Persian monarch fled before his arms; and the acclamations which accompanied his triumph declared him worthy of the purple. His artful patroness had chosen the month of the vintage, while the emperor, in a rural solitude, was permitted to enjoy the pleasures of a subject. On the first intelligence of her designs he returned to Constantinople, and the conspiracy was suppressed by his presence and firmness. From the pomp and honours which she had abused, Sophia was reduced to a modest allowance; Tiberius dismissed her train, intercepted her correspondence, and committed to a faithful guard the custody of her person. But the services of Justinian were not considered by that excellent prince as an aggravation of his offences; after a mild reproof, his treason and ingratitude were forgiven; and it was commonly believed that the emperor entertained some thoughts of contracting a double alliance with the rival of his throne. The voice of an angel (such a fable was propagated) might reveal to the emperor that he should always triumph over his domestic foes; but Tiberius derived a firmer assurance from the innocence and generosity of his own mind.

With the odious name of Tiberius, he assumed the more popular appellation of Constantine and imitated the purer virtues of the Antonines. After recording the vice or folly of so many Roman princes, it is pleasing to repose, for a moment, on a character conspicuous by the qualities of humanity, justice, temperance, and fortitude; to contemplate a sovereign affable in his palace, pious in the church, impartial on the seat of judgment, and victorious, at least by his generals, in the Persian war. The most glorious trophy of his victory consisted in a multitude of captives whom Tiberius entertained, redeemed, and dismissed to their native homes with the charitable spirit of a Christian hero. The merit or misfortunes of his own subjects had a dearer claim to his beneficence, and he measured his bounty not so much by their expectations as by his own dignity. This maxim, however dangerous in a trustee of the public wealth, was balanced by a principle of humanity and justice, which taught him to abhor, as of the

basest alloy, the gold that was extracted from the tears of the people. For their relief, as often as they had suffered by natural or hostile calamities, he was impatient to remit the arrears of the past, or the demands of future taxes; he sternly rejected the servile offerings of his ministers, which were compensated by tenfold oppression; and the wise and equitable laws of Tiberius excited the praise and regret of succeeding times. Constantinople believed that the emperor had discovered a treasure; but his genuine treasure consisted in the practice of liberal economy and the contempt of all vain and superfluous expense.³⁵ The Romans of the East would have been happy, if the best gift of heaven, a patriot king, had been confirmed as a proper and permanent blessing. But in less than four years after the death of Justin, his worthy successor sunk into a mortal disease, which left him only sufficient time to restore the diadem, according to the tenure by which he held it, to the most deserving of his fellow-citizens. He selected Maurice from the crowd, a judgment more precious than the purple itself; the patriarch and senate were summoned to the bed of the dying prince; he bestowed his daughter and the empire; and his last advice was solemnly delivered by the voice of the quæstor. Tiberius expressed his hope that the virtues of his son and successor would erect the noblest mausoleum to his memory. His memory was embalmed by the public affliction; but the most sincere grief evaporates in the tumult of a new reign, and the eyes and acclamations of mankind were speedily directed to the rising sun.

The emperor Maurice derived his origin from ancient Rome;³⁶ but his immediate parents were settled at Arabissus in Cappadocia, and their singular felicity preserved them alive to behold and partake the fortune of their *august* son. The youth of Maurice was spent in the profession of arms; Tiberius promoted him to the command of a new and favourite legion of twelve thousand confederates;³⁷ his valour and conduct were signalised in the Persian war; and he returned to Constantinople to accept, as his just reward, the inheritance of the empire. Maurice ascended the throne at the mature age of forty-three years; and he reigned above twenty years over the East and over himself;³⁸ expelling from his mind the wild democracy of passions, and establishing (according to the quaint expression of Evagrius) a perfect aristocracy of reason and virtue. Some suspicion will degrade the testimony of a subject, though he protests that his secret praise should never reach the ear of his sovereign,³⁹ and some failings seem to place the character of Maurice below the purer merit of his predecessor. His cold and reserved demeanour might be imputed to arrogance; his justice was not always exempt from cruelty, nor his clemency from weakness; and his rigid economy too often exposed him to the reproach of avarice. But the rational wishes of an absolute monarch must tend to the happiness of his people; Maurice was endowed with sense and courage to promote that happiness, and his administration was directed by the principles and example of Tiberius. The pusillanimity of the Greeks had introduced so complete a separation between the offices of king and of general that a private soldier who had deserved and obtained the purple seldom or never appeared at the head of his armies. Yet the emperor Maurice enjoyed the glory of restoring the Persian monarch to

his throne; his lieutenants waged a doubtful war against the Avars of the Danube; and he cast an eye of pity, of ineffectual pity, on the abject and distressful state of his Italian provinces.

From Italy the emperors were incessantly tormented by tales of misery and demands of succour, which extorted the humiliating confession of their own weakness. The expiring dignity of Rome was only marked by the freedom and energy of her complaints: "If you are incapable," she said, "of delivering us from the sword of the Lombards, save us at least from the calamity of famine." Tiberius forgave the reproach, and relieved the distress: a supply of corn was transported from Egypt to the Tiber; and the Roman people, invoking the name, not of Camillus, but of St. Peter, repulsed the Barbarians from their walls. But the relief was accidental, the danger was perpetual and pressing; and the clergy and senate, collecting the remains of their ancient opulence, a sum of three thousand pounds of gold, despatched the patrician Pamphronius to lay their gifts and their complaints at the foot of the Byzantine throne. The attention of the court, and the forces of the East, were diverted by the Persian war; but the justice of Tiberius applied the subsidy to the defence of the city; and he dismissed the patrician with his best advice, either to bribe the Lombard chiefs or to purchase the aid of the kings of France. Notwithstanding this weak invention, Italy was still afflicted, Rome was again besieged, and the suburb of Classe, only three miles from Ravenna, was pillaged and occupied by the troops of a simple duke of Spoleto. Maurice gave audience to a second deputation of priests and senators; the duties and the menaces of religion were forcibly urged in the letters of the Roman pontiff; and his nuncio, the deacon Gregory, was alike qualified to solicit the powers either of heaven or of the earth. The emperor adopted, with stronger effect, the measures of his predecessor; some formidable chiefs were persuaded to embrace the friendship of the Romans, and one of them, a mild and faithful Barbarian, lived and died in the service of the exarch; the passes of the Alps were delivered to the Franks; and the pope encouraged them to violate, without scruple, their oaths and engagements to the misbelievers. Childebert, the great-grandson of Clovis, was persuaded to invade Italy by the payment of fifty thousand pieces; but, as he had viewed with delight some Byzantine coin of the weight of one pound of gold, the king of Austrasia might stipulate that the gift should be rendered more worthy of his acceptance by a proper mixture of these respectable medals. The dukes of the Lombards had provoked by frequent inroads their powerful neighbours of Gaul. As soon as they were apprehensive of a just retaliation, they renounced their feeble and disorderly independence; the advantages of regal government, union, secrecy, and vigour were unanimously confessed; and Autharis, the son of Clepho, had already attained the strength and reputation of a warrior. Under the standard of their new king, the conquerors of Italy withstood three successive invasions, one of which was led by Childebert himself, the last of the Merovingian race who descended from the Alps. The first expedition was defeated by the jealous animosity of the Franks and Alemanni. In the second they were vanquished in a bloody battle, with more loss and

dishonour than they had sustained since the foundation of their monarchy. Impatient for revenge, they returned a third time with accumulated force, and Autharis yielded to the fury of the torrent. The troops and treasures of the Lombards were distributed in the walled towns between the Alps and the Apennine. A nation less sensible of danger than of fatigue and delay soon murmured against the folly of their twenty commanders; and the hot vapours of an Italian sun infected with disease those tramontane bodies which had already suffered the vicissitudes of intemperance and famine. The powers that were inadequate to the conquest, were more than sufficient for the desolation, of the country; nor could the trembling natives distinguish between their enemies and their deliverers. If the junction of the Merovingian and Imperial forces had been effected in the neighbourhood of Milan, perhaps they might have subverted the throne of the Lombards; but the Franks expected six days the signal of a flaming village, and the arms of the Greeks were idly employed in the reduction of Modena and Parma, which were torn from them after the retreat of their Transalpine allies. The victorious Autharis asserted his claim to the dominion of Italy. At the foot of the Rhætian Alps, he subdued the resistance, and rifled the hidden treasures, of a sequestered island in the lake of Comum. At the extreme point of Calabria, he touched with his spear a column on the sea-shore of Rhegium,[40](#) proclaiming that ancient landmark to stand the immoveable boundary of his kingdom.[41](#)

During a period of two hundred years, Italy was unequally divided between the kingdom of the Lombards and the exarchate of Ravenna. The offices and professions, which the jealousy of Constantine had separated, were united by the indulgence of Justinian; and eighteen successive exarchs were invested, in the decline of the empire, with the full remains of civil, of military, and even of ecclesiastical power. Their immediate jurisdiction, which was afterwards consecrated as the patrimony of St. Peter, extended over the modern Romagna, the marshes or valleys of Ferrara and Commachio,[42](#) five maritime cities from Rimini to Ancona, and a second, inland Pentapolis,[43](#) between the Hadriatic coast and the hills of the Apennine. Three subordinate provinces, of Rome, of Venice, and of Naples, which were divided by hostile lands from the palace of Ravenna, acknowledged, both in peace and war, the supremacy of the exarch. The duchy of Rome appears to have included the Tuscan, Sabine, and Latian conquests, of the first four hundred years of the city, and the limits may be distinctly traced along the coast, from Civita Vecchia to Terracina, and with the course of the Tiber from Ameria and Narni to the port of Ostia. The numerous islands from Grado to Chiozza composed the infant dominion of Venice; but the more accessible towns on the continent were overthrown by the Lombards, who beheld with impotent fury a new capital rising from the waves. The power of the dukes of Naples was circumscribed by the bay and the adjacent isles, by the hostile territory of Capua, and by the Roman colony of Amalphi,[44](#) whose industrious citizens, by the invention of the mariner's compass, have unveiled the face of the globe. The three islands of Sardinia, Corsica, and Sicily still adhered to the empire; and the acquisition of the

farther Calabria removed the land-mark of Autharis from the shore of Rhegium to the isthmus of Consentia. In Sardinia, the savage mountaineers preserved the liberty and religion of their ancestors; but the husbandmen of Sicily were chained to their rich and cultivated soil. Rome was oppressed by the iron sceptre of the exarchs, and a Greek, perhaps an eunuch, insulted with impunity the ruins of the Capitol. But Naples soon acquired the privilege of electing her own dukes;[45](#) the independence of Amalphi was the fruit of commerce; and the voluntary attachment of Venice was finally ennobled by an equal alliance with the Eastern empire. On the map of Italy, the measure of the exarchate occupies a very inadequate space, but it included an ample proportion of wealth, industry, and population. The most faithful and valuable subjects escaped from the Barbarian yoke; and the banners of Pavia and Verona, of Milan and Padua, were displayed in their respective quarters by the new inhabitants of Ravenna. The remainder of Italy was possessed by the Lombards; and from Pavia, the royal seat, their kingdom was extended to the east, the north, and the west, as far as the confines of the Avars, the Bavarians, and the Franks of Austrasia and Burgundy. In the language of modern geography, it is now represented by the Terra Firma of the Venetian republic, Tyrol, the Milanese, Piedmont, the coast of Genoa, Mantua, Parma, and Modena, the grand duchy of Tuscany, and a large portion of the ecclesiastical state from Perugia to the Adriatic. The dukes, and at length the princes, of Beneventum survived the monarchy, and propagated the name of the Lombards. From Capua to Tarentum, they reigned near five hundred years over the greatest part of the present kingdom of Naples.[46](#)

In comparing the proportion of the victorious and the vanquished people, the change of language will afford the most probable inference. According to this standard it will appear that the Lombards of Italy, and the Visigoths of Spain, were less numerous than the Franks or Burgundians; and the conquerors of Gaul must yield, in their turn, to the multitude of Saxons and Angles who almost eradicated the idioms of Britain. The modern Italian has been insensibly formed by the mixture of nations; the awkwardness of the Barbarians in the nice management of declensions and conjugations reduced them to the use of articles and auxiliary verbs; and many new ideas have been expressed by Teutonic appellations. Yet the principal stock of technical and familiar words is found to be of Latin derivation;[47](#) and, if we were sufficiently conversant with the obsolete, the rustic, and the municipal dialects of ancient Italy, we should trace the origin of many terms which might, perhaps, be rejected by the classic purity of Rome. A numerous army constitutes but a small nation, and the powers of the Lombards were soon diminished by the retreat of twenty thousand Saxons, who scorned a dependent situation, and returned, after many bold and perilous adventures, to their native country.[48](#) The camp of Alboin was of formidable extent, but the extent of a camp would be easily circumscribed within the limits of a city; and its martial inhabitants must be thinly scattered over the face of a large country. When Alboin descended from the Alps, he invested his nephew, the first duke of Friuli, with the command of the province and the people; but the prudent Gisulf would have declined

the dangerous office, unless he had been permitted to choose, among the nobles of the Lombards, a sufficient number of families⁴⁹ to form a perpetual colony of soldiers and subjects. In the progress of conquest, the same option could not be granted to the dukes of Brescia or Bergamo, of Pavia or Turin, of Spoleto or Beneventum; but each of these, and each of their colleagues, settled in his appointed district with a band of followers who resorted to his standard in war and his tribunal in peace. Their attachment was free and honourable: resigning the gifts and benefits which they had accepted, they might emigrate with their families into the jurisdiction of another duke; but their absence from the kingdom was punished with death, as a crime of military desertion.⁵⁰ The posterity of the first conquerors struck a deeper root into the soil, which, by every motive of interest and honour, they were bound to defend. A Lombard was born the soldier of his king and his duke; and the civil assemblies of the nation displayed the banners, and assumed the appellation, of a regular army. Of this army, the pay and the rewards were drawn from the conquered provinces; and the distribution, which was not effected till after the death of Alboin, is disgraced by the foul marks of injustice and rapine. Many of the most wealthy Italians were slain and banished; the remainder were divided among the strangers, and a tributary obligation was imposed (under the name of hospitality) of paying to the Lombards a third part of the fruits of the earth. Within less than seventy years, this artificial system was abolished by a more simple and solid tenure.⁵¹ Either the Roman landlord was expelled by his strong and insolent guest; or the annual payment, a third of the produce, was exchanged by a more equitable transaction for an adequate proportion of landed property. Under these foreign masters, the business of agriculture, in the cultivation of corn, vines, and olives, was exercised with degenerate skill and industry by the labour of the slaves and natives. But the occupations of a pastoral life were more pleasing to the idleness of the Barbarians. In the rich meadows of Venetia, they restored and improved the breed of horses for which that province had once been illustrious;⁵² and the Italians beheld with astonishment a foreign race of oxen or buffaloes.⁵³ The depopulation of Lombardy and the increase of forests afforded an ample range for the pleasures of the chase.⁵⁴ That marvellous art which teaches the birds of the air to acknowledge the voice, and execute the commands, of their master had been unknown to the ingenuity of the Greeks and Romans.⁵⁵ Scandinavia and Scythia produce the boldest and most tractable falcons;⁵⁶ they are tamed and educated by the roving inhabitants, always on horseback and in the field. This favourite amusement of our ancestors was introduced by the Barbarians into the Roman provinces; and the laws of Italy esteem the sword and the hawk as of equal dignity and importance in the hands of a noble Lombard.⁵⁷

So rapid was the influence of climate and example that the Lombards of the fourth generation surveyed with curiosity and affright the portraits of their savage forefathers.⁵⁸ Their heads were shaven behind, but the shaggy locks hung over their eyes and mouth, and a long beard represented the name and character of the nation. Their dress consisted of loose linen garments, after the fashion of the Anglo-Saxons, which were decorated, in their opinion, with broad stripes of variegated colours. The legs and feet were clothed in long hose and open sandals; and even in the security of peace a trusty sword was constantly girt to their side. Yet this strange apparel and horrid aspect often concealed a gentle and generous disposition; and, as soon as the rage of battle had subsided, the captives and subjects were sometimes surprised by the humanity of the victor. The vices of the Lombards were the effect of passion, of ignorance, of intoxication; their virtues are the more laudable, as they were not affected by the hypocrisy of social manners, nor imposed by the rigid constraint of laws and education. I should not be apprehensive of deviating from my subject if it were in my power to delineate the private life of the conquerors of Italy, and I shall relate with pleasure the adventurous gallantry of Autharis, which breathes the true spirit of chivalry and romance.⁵⁹ After the loss of his promised bride, a Merovingian princess, he sought in marriage the daughter of the king of Bavaria; and Garibald accepted the alliance of the Italian monarch. Impatient of the slow progress of negotiation, the ardent lover escaped from his palace and visited the court of Bavaria in the train of his own embassy. At the public audience, the unknown stranger advanced to the throne, and informed Garibald that the ambassador was indeed the minister of state, but that he alone was the friend of Autharis, who had trusted him with the delicate commission of making a faithful report of the charms of his spouse. Theudelinda was summoned to undergo this important examination, and, after a pause of silent rapture, he hailed her as the queen of Italy, and humbly requested that, according to the custom of the nation, she would present a cup of wine to the first of her new subjects. By the command of her father, she obeyed; Autharis received the cup in his turn, and, in restoring it to the princess, he secretly touched her hand, and drew his own finger over his face and lips. In the evening, Theudelinda imparted to her nurse the indiscreet familiarity of the stranger, and was comforted by the assurance that such boldness could proceed only from the king her husband, who, by his beauty and courage, appeared worthy of her love. The ambassadors were dismissed; no sooner did they reach the confines of Italy than Autharis, raising himself on his horse, darted his battle-axe against a tree with incomparable strength and dexterity: "Such," said he to the astonished Bavarians, "such are the strokes of the king of the Lombards." On the approach of a French army, Garibald and his daughter took refuge in the dominions of their ally; and the marriage was consummated in the palace of Verona. At the end of one year, it was dissolved by the death of Autharis; but the virtues of Theudelinda⁶⁰ had endeared her to the nation, and she was permitted to bestow, with her hand, the sceptre of the Italian kingdom.

From this fact, as well as from similar events,[61](#) it is certain that the Lombards possessed freedom to elect their sovereign, and sense to decline the frequent use of that dangerous privilege. The public revenue arose from the produce of land and the profits of justice. When the independent dukes agreed that Autharis should ascend the throne of his father, they endowed the regal office with a fair moiety of their respective domains. The proudest nobles aspired to the honours of servitude near the person of their prince; he rewarded the fidelity of his vassals by the precarious gift of pensions and *benefices*; and atoned for the injuries of war by the rich foundation of monasteries and churches. In peace a judge, a leader in war, he never usurped the powers of a sole and absolute legislator. The king of Italy convened the national assemblies in the palace, or more probably in the fields, of Pavia; his great council was composed of the persons most eminent by their birth and dignities; but the validity, as well as the execution, of their decrees depended on the approbation of the *faithful* people, the *fortunate* army of the Lombards. About fourscore years after the conquest of Italy, their traditional customs were transcribed in Teutonic Latin,[62](#) and ratified by the consent of the prince and people; some new regulations were introduced, more suitable to their present condition; the example of Rotharis was imitated by the wisest of his successors; and the laws of the Lombards have been esteemed the least imperfect of the Barbaric codes.[63](#) Secure by their courage in the possession of liberty, these rude and hasty legislators were incapable of balancing the powers of the constitution or of discussing the nice theory of political government. Such crimes as threatened the life of the sovereign or the safety of the state were adjudged worthy of death; but their attention was principally confined to the defence of the person and property of the subject. According to the strange jurisprudence of the times, the guilt of blood might be redeemed by a fine; yet the high price of nine hundred pieces of gold declares a just sense of the value of a simple citizen. Less atrocious injuries, a wound, a fracture, a blow, an opprobrious word, were measured with scrupulous and almost ridiculous diligence; and the prudence of the legislator encouraged the ignoble practice of bartering honour and revenge for a pecuniary compensation. The ignorance of the Lombards, in the state of Paganism or Christianity, gave implicit credit to the malice and mischief of witchcraft; but the judges of the seventeenth century might have been instructed and confounded by the wisdom of Rotharis, who derides the absurd superstition, and protects the wretched victims of popular or judicial cruelty.[64](#) The same spirit of a legislator, superior to his age and country, may be ascribed to Luitprand, who condemns, while he tolerates, the impious and inveterate abuse of duels,[65](#) observing from his own experience that the juster cause had often been oppressed by successful violence. Whatever merit may be discovered in the laws of the Lombards, they are the genuine fruit of the reason of the Barbarians, who never admitted the bishops of Italy to a seat in their legislative councils. But the succession of their kings is marked with virtue and ability; the troubled series of their annals is adorned with fair intervals of peace, order, and domestic happiness; and the Italians enjoyed a milder and more equitable government than any of the other kingdoms

which had been founded on the ruins of the Western empire.[66](#)

Amidst the arms of the Lombards, and under the despotism of the Greeks, we again inquire into the fate of Rome,[67](#) which had reached, about the close of the sixth century, the lowest period of her depression. By the removal of the seat of empire, and the successive loss of the provinces, the sources of public and private opulence were exhausted; the lofty tree, under whose shade the nations of the earth had reposed, was deprived of its leaves and branches, and the sapless trunk was left to wither on the ground. The ministers of command and the messengers of victory no longer met on the Appian or Flaminian way; and the hostile approach of the Lombards was often felt and continually feared. The inhabitants of a potent and peaceful capital, who visit without an anxious thought the garden of the adjacent country, will faintly picture in their fancy the distress of the Romans: they shut or opened their gates with a trembling hand, beheld from the walls the flames of their houses, and heard the lamentations of their brethren, who were coupled together like dogs and dragged away into distant slavery beyond the sea and the mountains. Such incessant alarms must annihilate the pleasures and interrupt the labours of a rural life; and the Campagna of Rome was speedily reduced to the state of a dreary wilderness, in which the land is barren, the waters are impure, and the air is infectious. Curiosity and ambition no longer attracted the nations to the capital of the world: but, if chance or necessity directed the steps of a wandering stranger, he contemplated with horror the vacancy and solitude of the city, and might be tempted to ask, where is the senate, and where are the people? In a season of excessive rains, the Tiber swelled above its banks, and rushed with irresistible violence into the valleys of the seven hills. A pestilential disease arose from the stagnation of the deluge, and so rapid was the contagion that fourscore persons expired in an hour in the midst of a solemn procession, which implored the mercy of heaven.[68](#) A society in which marriage is encouraged and industry prevails soon repairs the accidental losses of pestilence and war; but, as the far greater part of the Romans was condemned to hopeless indigence and celibacy, the depopulation was constant and visible, and the gloomy enthusiasts might expect the approaching failure of the human race.[69](#) Yet the number of citizens still exceeded the measure of subsistence; their precarious food was supplied from the harvests of Sicily or Egypt; and the frequent repetition of famine betrays the inattention of the emperor to a distant province. The edifices of Rome were exposed to the same ruin and decay; the mouldering fabrics were easily overthrown by inundations, tempests, and earthquakes; and the monks, who had occupied the most advantageous stations, exulted in their base triumph over the ruins of antiquity. It is commonly believed that Pope Gregory the First attacked the temples and mutilated the statues of the city; that, by the command of the Barbarian, the Palatine library was reduced to ashes; and that the history of Livy was the peculiar mark of his absurd and mischievous fanaticism. The writings of Gregory himself reveal his implacable aversion to the monuments of classic genius; and he points his severest censure against the profane learning of a bishop who taught the art of grammar, studied the Latin poets, and pronounced, with the same voice, the

praises of Jupiter and those of Christ.[70](#) But the evidence of his destructive rage is doubtful and recent; the Temple of Peace or the Theatre of Marcellus have been demolished by the slow operation of ages; and a formal proscription would have multiplied the copies of Virgil and Livy in the countries which were not subject to the ecclesiastical dictator.[71](#)

Like Thebes, or Babylon, or Carthage, the name of Rome might have been erased from the earth, if the city had not been animated by a vital principle, which again restored her to honour and dominion. A vague tradition was embraced, that two Jewish teachers, a tent-maker and a fisherman, had formerly been executed in the circus of Nero; and at the end of five hundred years their genuine or fictitious relics were adored as the palladium of Christian Rome. The pilgrims of the East and West resorted to the holy threshold; but the shrines of the apostles were guarded by miracles and invisible terrors; and it was not without fear that the pious Catholic approached the object of his worship. It was fatal to touch, it was dangerous to behold, the bodies of the saints; and those who from the purest motives presumed to disturb the repose of the sanctuary were affrighted by visions or punished with sudden death. The unreasonable request of an empress, who wished to deprive the Romans of their sacred treasure, the head of St. Paul, was rejected with the deepest abhorrence; and the pope asserted, most probably with truth, that a linen which had been sanctified in the neighbourhood of his body, or the filings of his chain, which it was sometimes easy and sometimes impossible to obtain, possessed an equal degree of miraculous virtue.[72](#) But the power as well as virtue of the apostles resided with living energy in the breast of their successors; and the chair of St. Peter was filled under the reign of Maurice by the first and greatest of the name of Gregory.[73](#) His grandfather Felix had himself been pope, and, as the bishops were already bound by the law of celibacy, his consecration must have been preceded by the death of his wife. The parents of Gregory, Sylvia and Gordian, were the noblest of the senate and the most pious of the church of Rome; his female relations were numbered among the saints and virgins; and his own figure with those of his father and mother were represented near three hundred years in a family portrait,[74](#) which he offered to the monastery of St. Andrew. The design and colouring of this picture afford an honourable testimony that the art of painting was cultivated by the Italians of the sixth century; but the most abject ideas must be entertained of their taste and learning, since the epistles of Gregory, his sermons, and his dialogues are the work of a man who was second in erudition to none of his contemporaries;[75](#) his birth and abilities had raised him to the office of prefect of the city, and he enjoyed the merit of renouncing the pomp and vanities of this world. His ample patrimony was dedicated to the foundation of seven monasteries,[76](#) one in Rome,[77](#) and six in Sicily; and it was the wish of Gregory that he might be unknown in this life and glorious only in the next. Yet his devotion, and it might be sincere, pursued the path which would have been chosen by a crafty and ambitious statesman. The talents of Gregory, and the splendour which accompanied his retreat, rendered him dear and useful to the church;

and implicit obedience has been always inculcated as the first duty of a monk. As soon as he had received the character of deacon, Gregory was sent to reside at the Byzantine court, the nuncio or minister of the apostolic see; and he boldly assumed, in the name of St. Peter, a tone of independent dignity, which would have been criminal and dangerous in the most illustrious layman of the empire. He returned to Rome with a just increase of reputation, and, after a short exercise of the monastic virtues, he was dragged from the cloister to the papal throne, by the unanimous voice of the clergy, the senate, and the people. He alone resisted, or seemed to resist, his own elevation; and his humble petition that Maurice would be pleased to reject the choice of the Romans could only serve to exalt his character in the eyes of the emperor and the public. When the fatal mandate was proclaimed, Gregory solicited the aid of some friendly merchants to convey him in a basket beyond the gates of Rome, and modestly concealed himself some days among the woods and mountains, till his retreat was discovered, as it is said, by a celestial light.

The pontificate of Gregory the *Great*, which lasted thirteen years six months and ten days, is one of the most edifying periods of the history of the church. His virtues, and even his faults, a singular mixture of simplicity and cunning, of pride and humility, of sense and superstition, were happily suited to his station and to the temper of the times. In his rival, the patriarch of Constantinople, he condemned the antichristian title of universal bishop, which the successor of St. Peter was too haughty to concede, and too feeble to assume; and the ecclesiastical jurisdiction of Gregory was confined to the triple character of bishop of Rome, primate of Italy, and apostle of the West. He frequently ascended the pulpit, and kindled, by his rude though pathetic eloquence, the congenial passions of his audience; the language of the Jewish prophets was interpreted and applied; and the minds of the people, depressed by their present calamities, were directed to the hopes and fears of the invisible world. His precepts and example defined the model of the Roman liturgy,⁷⁸ the distribution of the parishes, the calendar of festivals, the order of processions, the service of the priests and deacons, the variety and change of sacerdotal garments. Till the last days of his life, he officiated in the canon of the mass, which continued above three hours; the Gregorian chant⁷⁹ has preserved the vocal and instrumental music of the theatre; and the rough voices of the Barbarians attempted to imitate the melody of the Roman school.⁸⁰ Experience had shewn him the efficacy of these solemn and pompous rites, to soothe the distress, to confirm the faith, to mitigate the fierceness, and to dispel the dark enthusiasm of the vulgar, and he readily forgave their tendency to promote the reign of priesthood and superstition. The bishops of Italy and the adjacent islands acknowledged the Roman pontiff as their special metropolitan. Even the existence, the union, or the translation of episcopal seats was decided by his absolute discretion; and his successful inroads into the provinces of Greece, of Spain, and of Gaul might countenance the more lofty pretensions of succeeding popes. He interposed to prevent the abuses of popular elections; his jealous care maintained the purity of faith and discipline; and the apostolic shepherd assiduously watched over the faith and

discipline of the subordinate pastors. Under his reign, the Arians of Italy and Spain were reconciled to the Catholic church, and the conquest of Britain reflects less glory on the name of Cæsar than on that of Gregory the First. Instead of six legions, forty monks were embarked for that distant island, and the pontiff lamented the austere duties which forbade him to partake the perils of their spiritual warfare. In less than two years he could announce to the archbishop of Alexandria that they had baptised the king of Kent with ten thousand of his Anglo-Saxons, and that the Roman missionaries, like those of the primitive church, were armed only with spiritual and supernatural powers. The credulity or the prudence of Gregory was always disposed to confirm the truths of religion by the evidence of ghosts, miracles, and resurrections;[81](#) and posterity has paid to *his* memory the same tribute which he freely granted to the virtue of his own or the preceding generation. The celestial honours have been liberally bestowed by the authority of the popes, but Gregory is the last of their own order whom they have presumed to inscribe in the calendar of saints.

Pope Gregory's Monks converting the King of Kent (from a painting)

Their temporal power insensibly arose from the calamities of the times; and the Roman bishops, who have deluged Europe and Asia with blood, were compelled to reign as the ministers of charity and peace. I. The church of Rome, as it has been formerly observed, was endowed with ample possessions in Italy, Sicily, and the more distant provinces; and her agents, who were commonly subdeacons, had acquired a civil, and even criminal, jurisdiction over their tenants and husbandmen. The successor

of St. Peter administered his patrimony with the temper of a vigilant and moderate landlord;⁸² and the epistles of Gregory are filled with salutary instructions to abstain from doubtful or vexatious lawsuits, to preserve the integrity of weights and measures, to grant every reasonable delay, and to reduce the capitation of the slaves of the glebe, who purchased the right of marriage by the payment of an arbitrary fine.⁸³ The rent or the produce of these estates was transported to the mouth of the Tiber, at the risk and expense of the pope; in the use of wealth he acted like a faithful steward of the church and the poor, and liberally applied to their wants the inexhaustible resources of abstinence and order. The voluminous account of his receipts and disbursements was kept above three hundred years in the Lateran, as the model of Christian economy. On the four great festivals,⁸⁴ he divided their quarterly allowance to the clergy, to his domestics, to the monasteries, the churches, the places of burial, the alms-houses, and the hospitals of Rome, and the rest of the diocese. On the first day of every month, he distributed to the poor, according to the season, their stated portion of corn, wine, cheese, vegetables, oil, fish, fresh provisions, cloths, and money; and his treasurers were continually summoned to satisfy, in his name, the extraordinary demands of indigence and merit. The instant distress of the sick and helpless, of strangers and pilgrims, was relieved by the bounty of each day, and of every hour; nor would the pontiff indulge himself in a frugal repast, till he had sent the dishes from his own table to some objects deserving of his compassion. The misery of the times had reduced the nobles and matrons of Rome to accept, without a blush, the benevolence of the church; three thousand virgins received their food and raiment from the hand of their benefactor; and many bishops of Italy escaped from the Barbarians to the hospitable threshold of the Vatican. Gregory might justly be styled the Father of his country; and such was the extreme sensibility of his conscience that, for the death of a beggar who had perished in the streets, he interdicted himself during several days from the exercise of sacerdotal functions. II. The misfortunes of Rome involved the apostolical pastor in the business of peace and war; and it might be doubtful to himself whether piety or ambition prompted him to supply the place of his absent sovereign. Gregory awakened the emperor from a long slumber, exposed the guilt or incapacity of the exarch and his inferior ministers, complained that the veterans were withdrawn from Rome for the defence of Spoleto, encouraged the Italians to guard their cities and altars, and condescended, in the crisis of danger, to name the tribunes and to direct the operations of the provincial troops. But the martial spirit of the pope was checked by the scruples of humanity and religion; the imposition of tribute, though it was employed in the Italian war, he freely condemned as odious and oppressive; whilst he protected, against the Imperial edicts, the pious cowardice of the soldiers who deserted a military for a monastic life. If we may credit his own declarations, it would have been easy for Gregory to exterminate the Lombards by their domestic factions, without leaving a king, a duke, or a count, to save that unfortunate nation from the vengeance of their foes. As a Christian bishop, he preferred the salutary offices of peace; his mediation appeased the tumult of arms; but he was too conscious of the arts of the Greeks, and the passions of the Lombards, to engage his sacred promise for the observance of the

truce. Disappointed in the hope of a general and lasting treaty, he presumed to save his country without the consent of the emperor or the exarch. The sword of the enemy was suspended over Rome: it was averted by the mild eloquence and seasonable gifts of the pontiff, who commanded the respect of heretics and barbarians.

The merits of Gregory were treated by the Byzantine court with reproach and insult; but in the attachment of a grateful people he found the purest reward of a citizen and the best right of a sovereign.[85](#)

CHAPTER XLVI

Revolutions of Persia after the Death of Chosroes or Nushirvan — His Son Hormouz, a Tyrant, is deposed — Usurpation of Bahram — Flight and Restoration of Chosroes II. — His Gratitude to the Romans — The Chagan of the Avars — Revolt of the Army against Maurice — His Death — Tyranny of Phocas — Elevation of Heraclius — The Persian War — Chosroes subdues Syria, Egypt, and Asia Minor — Siege of Constantinople by the Persians and Avars — Persian Expeditions — Victories and Triumph of Heraclius

The conflict of Rome and Persia was prolonged from the death of Crassus to the reign of Heraclius. An experience of seven hundred years might convince the rival nations of the impossibility of maintaining their conquests beyond the fatal limits of the Tigris and Euphrates. Yet the emulation of Trajan and Julian was awakened by the trophies of Alexander, and the sovereigns of Persia indulged the ambitious hope of restoring the empire of Cyrus.[1](#) Such extraordinary efforts of power and courage will always command the attention of posterity; but the events by which the fate of nations is not materially changed leave a faint impression on the page of history, and the patience of the reader would be exhausted by the repetition of the same hostilities, undertaken without cause, prosecuted without glory, and terminated without effect. The arts of negotiation, unknown to the simple greatness of the senate and the Cæsars, were assiduously cultivated by the Byzantine princes; and the memorials of their perpetual embassies[2](#) repeat, with the same uniform prolixity, the language of falsehood and declamation, the insolence of the Barbarians, and the servile temper of the tributary Greeks. Lamenting the barren superfluity of materials, I have studied to compress the narrative of these uninteresting transactions; but the just Nushirvan is still applauded as the model of Oriental kings, and the ambition of his grandson Chosroes prepared the revolution of the East, which was speedily accomplished by the arms and the religion of the successors of Mahomet.

In the useless altercations that precede and justify the quarrels of princes, the Greeks

and the Barbarians accused each other of violating the peace which had been concluded between the two empires about four years before the death of Justinian. The sovereign of Persia and India aspired to reduce under his obedience the province of Yemen or Arabia³ Felix, the distant land of myrrh and frankincense, which had escaped, rather than opposed, the conquerors of the East. After the defeat of Abrahah under the walls of Mecca,⁴ the discord of his sons and brothers gave an easy entrance to the Persians; they chased the strangers of Abyssinia beyond the Red Sea; and a native prince of the ancient Homerites was restored to the throne as the vassal or viceroy of the great Nushirvan.⁵ But the nephew of Justinian declared his resolution to avenge the injuries of his Christian ally the prince of Abyssinia, as they suggested a decent pretence to discontinue the annual *tribute*, which was poorly disguised by the name of pension. The churches of Persarmenia were oppressed by the intolerant spirit of the Magi; they secretly invoked the protector of the Christians; and, after the pious murder of their satraps, the rebels were avowed and supported as the brethren and subjects of the Roman emperor. The complaints of Nushirvan were disregarded by the Byzantine court; Justin yielded to the importunities of the Turks, who offered an alliance against the common enemy; and the Persian monarchy was threatened at the same instant by the united forces of Europe, of Æthiopia, and of Scythia. At the age of fourscore, the sovereign of the East would perhaps have chosen the peaceful enjoyment of his glory and greatness; but, as soon as war became inevitable, he took the field with the alacrity of youth, whilst the aggressor trembled in the palace of Constantinople. Nushirvan, or Chosroes, conducted in person the siege of Dara; and, although that important fortress had been left destitute of troops and magazines, the valour of the inhabitants resisted above five months the archers, the elephants, and the military engines of the Great King. In the meanwhile his general Adarman advanced from Babylon, traversed the desert, passed the Euphrates, insulted the suburbs of Antioch, reduced to ashes the city of Apamea, and laid the spoils of Syria at the feet of his master, whose perseverance in the midst of winter at length subverted the bulwark of the East. But these losses, which astonished the provinces and the court, produced a salutary effect in the repentance and abdication of the emperor Justin; a new spirit arose in the Byzantine councils; and a truce of three years was obtained by the prudence of Tiberius.⁶ That seasonable interval was employed in the preparations of war; and the voice of rumour proclaimed to the world that from the distant countries of the Alps and the Rhine, from Scythia, Mæsia, Pannonia, Illyricum, and Isauria, the strength of the Imperial cavalry was reinforced with one hundred and fifty thousand soldiers. Yet the king of Persia, without fear or without faith, resolved to prevent the attack of the enemy; again passed the Euphrates; and, dismissing the ambassadors of Tiberius, arrogantly commanded them to await his arrival at Cæsarea, the metropolis of the Cappadocian provinces. The two armies encountered each other in the battle of Melitene: the Barbarians, who darkened the air with a cloud of arrows, prolonged their line, and extended their wings across the plain; while the Romans, in deep and solid bodies, expected to prevail in closer action, by the weight of their swords and lances. A Scythian chief, who commanded their right wing, suddenly turned the flank of the

enemy, attacked their rear-guard in the presence of Chosroes, penetrated to the midst of the camp, pillaged the royal tent, profaned the eternal fire, loaded a train of camels with the spoils of Asia, cut his way through the Persian host, and returned with songs of victory to his friends, who had consumed the day in single combats or ineffectual skirmishes. The darkness of the night and the separation of the Romans afforded the Persian monarch an opportunity of revenge; and one of their camps was swept away by a rapid and impetuous assault. But the review of his loss and the consciousness of his danger determined Chosroes to a speedy retreat; he burnt, in his passage, the vacant town of Melitene; and, without consulting the safety of his troops, boldly swam the Euphrates on the back of an elephant.⁷ After this unsuccessful campaign, the want of magazines, and perhaps some inroad of the Turks, obliged him to disband or divide his forces; the Romans were left masters of the field, and their general Justinian, advancing to the relief of the Persarmenian rebels, erected his standard on the banks of the Araxes. The great Pompey had formerly halted within three days' march of the Caspian;⁸ that inland sea was explored, for the first time, by an hostile fleet,⁹ and seventy thousand captives were transplanted from Hyrcania to the isle of Cyprus. On the return of spring, Justinian descended into the fertile plains of Assyria, the flames of war approached the residence of Nushirvan, the indignant monarch sunk into the grave, and his last edict restrained his successors from exposing their person in a battle against the Romans. Yet the memory of this transient affront was lost in the glories of a long reign; and his formidable enemies, after indulging their dream of conquest, again solicited a short respite from the calamities of war.¹⁰

The throne of Chosroes Nushirvan was filled by Hormouz, or Hormisdas, the eldest or the most favoured of his sons. With the kingdoms of Persia and India, he inherited the reputation and example of his father, the service, in every rank, of his wise and valiant officers, and a general system of administration, harmonised by time and political wisdom to promote the happiness of the prince and people. But the royal youth enjoyed a still more valuable blessing, the friendship of a sage who had presided over his education, and who always preferred the honour to the interest of his pupil, his interest to his inclination. In a dispute with the Greek and Indian philosophers, Buzurg¹¹ had once maintained that the most grievous misfortune of life is old age without the remembrance of virtue; and our candour will presume that the same principle compelled him, during three years, to direct the councils of the Persian empire. His zeal was rewarded by the gratitude and docility of Hormouz, who acknowledged himself more indebted to his preceptor than to his parent; but, when age and labour had impaired the strength and perhaps the faculties of this prudent counsellor, he retired from court, and abandoned the youthful monarch to his own passions and those of his favourites. By the fatal vicissitude of human affairs, the same scenes were renewed at Ctesiphon, which had been exhibited in Rome after the death of Marcus Antoninus. The ministers of flattery and corruption, who had been banished by the father, were recalled and cherished by the son; the disgrace and exile of the

friends of Nushirvan established their tyranny; and virtue was driven by degrees from the mind of Hormouz, from his palace, and from the government of the state.¹² The faithful agents, the eyes and ears of the king, informed him of the progress of disorder, that the provincial governors flew to their prey with the fierceness of lions and eagles, and that their rapine and injustice would teach the most loyal of his subjects to abhor the name and authority of their sovereign. The sincerity of this advice was punished with death, the murmurs of the cities were despised, their tumults were quelled by military execution; the intermediate powers between the throne and the people were abolished; and the childish vanity of Hormouz, who affected the daily use of the tiara, was fond of declaring that he alone would be the judge as well as the master of his kingdom. In every word and in every action, the son of Nushirvan degenerated from the virtues of his father. His avarice defrauded the troops; his jealous caprice degraded the satraps; the palace, the tribunals, the waters of the Tigris, were stained with the blood of the innocent; and the tyrant exulted in the sufferings and execution of thirteen thousand victims. As the excuse of his cruelty, he sometimes condescended to observe that the fears of the Persians would be productive of hatred, and that their hatred must terminate in rebellion; but he forgot that his own guilt and folly had inspired the sentiments which he deplored, and prepared the event which he so justly apprehended. Exasperated by long and hopeless oppression, the provinces of Babylon, Susa, and Carmania erected the standard of revolt; and the princes of Arabia, India, and Scythia refused the customary tribute to the unworthy successor of Nushirvan. The arms of the Romans, in slow sieges and frequent inroads, afflicted the frontiers of Mesopotamia and Assyria; one of their generals professed himself the disciple of Scipio; and the soldiers were animated by a miraculous image of Christ, whose mild aspect should never have been displayed in the front of battle.¹³ At the same time, the eastern provinces of Persia were invaded by the great khan,¹⁴ who passed the Oxus at the head of three or four hundred thousand Turks. The imprudent Hormouz accepted their perfidious and formidable aid; the cities of Khorasan or Bactriana were commanded to open their gates; the march of the barbarians towards the mountains of Hyrcania revealed the correspondence of the Turkish and Roman arms; and their union must have subverted the throne of the house of Sassan.

Persia had been lost by a king; it was saved by a hero. After his revolt, Varanes or Bahram is stigmatised by the son of Hormouz as an ungrateful slave: the proud and ambiguous reproach of despotism, since he was truly descended from the ancient princes of Rei,¹⁵ one of the seven families whose splendid as well as substantial prerogatives exalted them above the heads of the Persian nobility.¹⁶ At the siege of Dara, the valour of Bahram was signalised under the eyes of Nushirvan, and both the father and son successively promoted him to the command of armies, the government of Media, and the superintendence of the palace. The popular prediction which marked him as the deliverer of Persia might be inspired by his past victories and extraordinary figure; the epithet *Giubin* is expressive of the quality of *dry wood*; he had the strength

and stature of a giant, and his savage countenance was fancifully compared to that of a wild cat. While the nation trembled, while Hormouz disguised his terror by the name of suspicion, and his servants concealed their disloyalty under the mask of fear, Bahram alone displayed his undaunted courage and apparent fidelity; and, as soon as he found that no more than twelve thousand soldiers would follow him against the enemy, he prudently declared that to this fatal number heaven had reserved the honours of the triumph. The steep and narrow descent of the Pule Rudbar¹⁷ or Hyrcanian rock is the only pass through which an army can penetrate into the territory of Rei and the plains of Media. From the commanding heights, a band of resolute men might overwhelm with stones and darts the myriads of the Turkish host: their emperor and his son were transpierced with arrows; and the fugitives were left, without counsel or provisions, to the revenge of an injured people. The patriotism of the Persian general was stimulated by his affection for the city of his forefathers; in the hour of victory every peasant became a soldier, and every soldier an hero; and their ardour was kindled by the gorgeous spectacle of beds and thrones and tables of massy gold, the spoils of Asia, and the luxury of the hostile camp. A prince of a less malignant temper could not easily have forgiven his benefactor, and the secret hatred of Hormouz was envenomed by a malicious report that Bahram had privately retained the most precious fruits of his Turkish victory. But the approach of a Roman army on the side of the Araxes compelled the implacable tyrant to smile and to applaud; and the toils of Bahram were rewarded with the permission of encountering a new enemy, by their skill and discipline more formidable than a Scythian multitude. Elated by his recent success, he despatched an herald with a bold defiance to the camp of the Romans, requesting them to fix a day of battle, and to choose whether they would pass the river themselves or allow a free passage to the arms of the Great King. The lieutenant of the emperor Maurice preferred the safer alternative, and this local circumstance, which would have enhanced the victory of the Persians, rendered their defeat more bloody and their escape more difficult. But the loss of his subjects and the danger of his kingdom were overbalanced in the mind of Hormouz by the disgrace of his personal enemy; and no sooner had Bahram collected and reviewed his forces than he received from a royal messenger the insulting gift of a distaff, a spinning-wheel, and a complete suit of female apparel. Obedient to the will of his sovereign, he shewed himself to the soldiers in this unworthy disguise; they resented his ignominy and their own; a shout of rebellion ran through the ranks; and the general accepted their oath of fidelity and vows of revenge. A second messenger, who had been commanded to bring the rebel in chains, was trampled under the feet of an elephant, and manifestoes were diligently circulated, exhorting the Persians to assert their freedom against an odious and contemptible tyrant. The defection was rapid and universal; his loyal slaves were sacrificed to the public fury; the troops deserted to the standard of Bahram; and the provinces again saluted the deliverer of his country.

As the passes were faithfully guarded, Hormouz could only compute the number of his enemies by the testimony of a guilty conscience, and the daily defection of those who,

in the hour of his distress, avenged their wrongs or forgot their obligations. He proudly displayed the ensigns of royalty; but the city and palace of Modain had already escaped from the hand of the tyrant. Among the victims of his cruelty, Bindoes, a Sassanian prince, had been cast into a dungeon; his fetters were broken by the zeal and courage of a brother; and he stood before the king at the head of those trusty guards who had been chosen as the ministers of his confinement and perhaps of his death. Alarmed by the hasty intrusion and bold reproaches of the captive, Hormouz looked round, but in vain, for advice or assistance; discovered that his strength consisted in the obedience of others, and patiently yielded to the single arm of Bindoes, who dragged him from the throne to the same dungeon in which he himself had been so lately confined. At the first tumult, Chosroes, the eldest of the sons of Hormouz, escaped from the city; he was persuaded to return by the pressing and friendly invitation of Bindoes, who promised to seat him on his father's throne, and who expected to reign under the name of an inexperienced youth. In the just assurance that his accomplices could neither forgive nor hope to be forgiven, and that every Persian might be trusted as the judge and enemy of the tyrant, he instituted a public trial without a precedent and without a copy in the annals of the East. The son of Nushirvan, who had requested to plead in his own defence, was introduced as a criminal into the full assembly of the nobles and satraps.¹⁸ He was heard with decent attention as long as he expatiated on the advantages of order and obedience, the danger of innovation, and the inevitable discord of those who had encouraged each other to trample on their lawful and hereditary sovereign. By a pathetic appeal to their humanity, he extorted that pity which is seldom refused to the fallen fortunes of a king; and, while they beheld the abject posture and squalid appearance of the prisoner, his tears, his chains, and the marks of ignominious stripes, it was impossible to forget how recently they had adored the divine splendour of his diadem and purple. But an angry murmur arose in the assembly as soon as he presumed to vindicate his conduct and to applaud the victories of his reign. He defined the duties of a king, and the Persian nobles listened with a smile of contempt; they were fired with indignation when he dared to vilify the character of Chosroes; and by the indiscreet offer of resigning the sceptre to the second of his sons he subscribed his own condemnation and sacrificed the life of his innocent favourite. The mangled bodies of the boy and his mother were exposed to the people; the eyes of Hormouz were pierced with a hot needle; and the punishment of the father was succeeded by the coronation of his eldest son. Chosroes had ascended the throne without guilt, and his piety strove to alleviate the misery of the abdicated monarch; from the dungeon he removed Hormouz to an apartment of the palace, supplied with liberality the consolations of sensual enjoyment, and patiently endured the furious sallies of his resentment and despair. He might despise the resentment of a blind and unpopular tyrant, but the tiara was trembling on his head, till he could subvert the power, or acquire the friendship, of the great Bahram, who sternly denied the justice of a revolution in which himself and his soldiers, the true representatives of Persia, had never been consulted. The offer of a general amnesty and of the second rank in his kingdom was answered¹⁹ by an epistle from Bahram,

friend of the gods, conqueror of men, and enemy of tyrants, the satrap of satraps, general of the Persian armies, and a prince adorned with the title of eleven virtues.[20](#) He commands Chosroes, the son of Hormouz, to shun the example and fate of his father, to confine the traitors who had been released from their chains, to deposit in some holy place the diadem which he had usurped, and to accept from his gracious benefactor the pardon of his faults and the government of a province. The rebel might not be proud, and the king most assuredly was not humble; but the one was conscious of his strength, the other was sensible of his weakness; and even the modest language of his reply still left room for treaty and reconciliation. Chosroes led into the field the slaves of the palace and the populace of the capital; they beheld with terror the banners of a veteran army; they were encompassed and surprised by the evolutions of the general; and the satraps who had deposed Hormouz received the punishment of their revolt, or expiated their first treason by a second and more criminal act of disloyalty. The life and liberty of Chosroes were saved, but he was reduced to the necessity of imploring aid or refuge in some foreign land; and the implacable Bindoes, anxious to secure an unquestionable title, hastily returned to the palace, and ended, with a bow-string, the wretched existence of the son of Nushirvan.[21](#)

While Chosroes despatched the preparations of his retreat, he deliberated with his remaining friends[22](#) whether he should lurk in the valleys of Mount Caucasus, or fly to the tents of the Turks, or solicit the protection of the emperor. The long emulation of the successors of Artaxerxes and Constantine increased his reluctance to appear as a suppliant in a rival court; but he weighed the forces of the Romans, and prudently considered that the neighbourhood of Syria would render his escape more easy and their succours more effectual. Attended only by his concubines and a troop of thirty guards, he secretly departed from the capital, followed the banks of the Euphrates, traversed the desert, and halted at the distance of ten miles from Circesium. About the third watch of the night, the Roman prefect was informed of his approach, and he introduced the royal stranger to the fortress at the dawn of day. From thence the king of Persia was conducted to the more honourable residence of Hierapolis;[23](#) and Maurice dissembled his pride, and displayed his benevolence, at the reception of the letters and ambassadors of the grandson of Nushirvan. They humbly represented the vicissitudes of fortune and the common interest of princes, exaggerated the ingratitude of Bahram, the agent of the evil principle, and urged, with specious argument, that it was for the advantage of the Romans themselves to support the two monarchies which balance the world, the two great luminaries by whose salutary influence it is vivified and adorned. The anxiety of Chosroes was soon relieved by the assurance that the emperor had espoused the cause of justice and royalty; but Maurice prudently declined the expense and delay of his useless visit to Constantinople. In the name of his generous benefactor, a rich diadem was presented to the fugitive prince with an inestimable gift of jewels and gold; a powerful army was assembled on the frontiers of Syria and Armenia, under the command of the valiant and faithful Narses;[24](#) and this

general, of his own nation and his own choice, was directed to pass the Tigris, and never to sheathe his sword till he had restored Chosroes to the throne of his ancestors. The enterprise, however splendid, was less arduous than it might appear. Persia had already repented of her fatal rashness, which betrayed the heir of the house of Sassan to the ambition of a rebellious subject; and the bold refusal of the Magi to consecrate his usurpation compelled Bahram to assume the sceptre, regardless of the laws and prejudices of the nation. The palace was soon distracted with conspiracy, the city with tumult, the provinces with insurrection; and the cruel execution of the guilty and the suspected served to irritate rather than subdue the public discontent. No sooner did the grandson of Nushirvan display his own and the Roman banners beyond the Tigris than he was joined, each day, by the increasing multitudes of the nobility and people; and, as he advanced, he received from every side the grateful offerings of the keys of his cities and the heads of his enemies. As soon as Modain was freed from the presence of the usurper, the loyal inhabitants obeyed the first summons of Mebodes at the head of only two thousand horse, and Chosroes accepted the sacred and precious ornaments of the palace as the pledge of their truth and a presage of his approaching success. After the junction of the Imperial troops, which Bahram vainly struggled to prevent, the contest was decided by two battles on the banks of the Zab and the confines of Media. The Romans, with the faithful subjects of Persia, amounted to sixty thousand, while the whole force of the usurper did not exceed forty thousand men; the two generals signalised their valour and ability, but the victory was finally determined by the prevalence of numbers and discipline. With the remnant of a broken army, Bahram fled towards the eastern provinces of the Oxus;[24a](#) the enmity of Persia reconciled him to the Turks; but his days were shortened by poison, perhaps the most incurable of poisons: the stings of remorse and despair, and the bitter remembrance of lost glory. Yet the modern Persians still commemorate the exploits of Bahram; and some excellent laws have prolonged the duration of his troubled and transitory reign.

The restoration of Chosroes was celebrated with feasts and executions; and the music of the royal banquet was often disturbed by the groans of dying or mutilated criminals. A general pardon might have diffused comfort and tranquillity through a country which had been shaken by the late revolutions; yet, before the sanguinary temper of Chosroes is blamed, we should learn whether the Persians had not been accustomed either to dread the rigour, or to despise the weakness, of their sovereign. The revolt of Bahram and the conspiracy of the satraps were impartially punished by the revenge or justice of the conqueror; the merits of Bindoes himself could not purify his hand from the guilt of royal blood; and the son of Hormouz was desirous to assert his own innocence and to vindicate the sanctity of kings. During the vigour of the Roman power, several princes were seated on the throne of Persia by the arms and the authority of the first Cæsars. But their new subjects were soon disgusted with the vices or virtues which they had imbibed in a foreign land; the instability of their dominion gave birth to a vulgar observation that the choice of Rome was solicited and rejected with equal ardour by the capricious levity of Oriental slaves.[25](#) But the glory of

Maurice was conspicuous in the long and fortunate reign of his *son* and his ally. A band of a thousand Romans, who continued to guard the person of Chosroes, proclaimed his confidence in the fidelity of the strangers; his growing strength enabled him to dismiss this unpopular aid, but he steadily professed the same gratitude and reverence to his adopted father; and, till the death of Maurice, the peace and alliance of the two empires were faithfully maintained. Yet the mercenary friendship of the Roman prince had been purchased with costly and important gifts: the strong cities of Martyropolis and Dara were restored, and the Persarmenians became the willing subjects of an empire, whose eastern limit was extended, beyond the example of former times, as far as the banks of the Araxes and the neighbourhood of the Caspian. A pious hope was indulged that the church as well as the state might triumph in this revolution; but, if Chosroes had sincerely listened to the Christian bishops, the impression was erased by the zeal and eloquence of the Magi; if he was armed with philosophic indifference, he accommodated his belief, or rather his professions, to the various circumstances of an exile and a sovereign. The imaginary conversion of the king of Persia was reduced to a local and superstitious veneration for Sergius,²⁶ one of the saints of Antioch, who heard his prayers and appeared to him in dreams; he enriched the shrine with offerings of gold and silver, and ascribed to this invisible patron the success of his arms, and the pregnancy of Sira, a devout Christian and the best beloved of his wives.²⁷ The beauty of Sira, or Schirin,²⁸ her wit, her musical talents, are still famous in the history or rather in the romances of the East; her own name is expressive, in the Persian tongue, of sweetness and grace; and the epithet of *Parviz*²⁹ alludes to the charms of her royal lover. Yet Sira never shared the passion which she inspired, and the bliss of Chosroes was tortured by a jealous doubt that, while he possessed her person, she had bestowed her affections on a meaner favourite.³⁰

While the majesty of the Roman name was revived in the East, the prospect of Europe is less pleasing and less glorious. By the departure of the Lombards and the ruin of the Gepidæ, the balance of power was destroyed on the Danube; and the Avars spread their permanent dominion from the foot of the Alps to the sea-coast of the Euxine. The reign of Baian is the brightest era of their monarchy; their chagan, who occupied the rustic palace of Attila, appears to have imitated his character and policy;³¹ but, as the same scenes were repeated in a smaller circle, a minute representation of the copy would be devoid of the greatness and novelty of the original.³² The pride of the second Justin, of Tiberius, and Maurice was humbled by a proud Barbarian, more prompt to inflict, than exposed to suffer, the injuries of war; and, as often as Asia was threatened by the Persian arms, Europe was oppressed by the dangerous inroads, or costly friendship, of the Avars. When the Roman envoys approached the presence of the chagan, they were commanded to wait at the door of his tent, till, at the end perhaps of ten or twelve days, he condescended to admit them. If the substance or the style of their message was offensive to his ear, he insulted, with a real or affected fury,

their own dignity and that of their prince; their baggage was plundered, and their lives were only saved by the promise of a richer present and a more respectful address. But *his* sacred ambassadors enjoyed and abused an unbounded licence in the midst of Constantinople; they urged, with importunate clamours, the increase of tribute, or the restitution of captives and deserters; and the majesty of the empire was almost equally degraded by a base compliance or by the false and fearful excuses with which they eluded such insolent demands. The chagan had never seen an elephant; and his curiosity was excited by the strange, and perhaps fabulous, portrait of that wonderful animal. At his command, one of the largest elephants of the Imperial stables was equipped with stately caparisons, and conducted by a numerous train to the royal village in the plains of Hungary. He surveyed the enormous beast with surprise, with disgust, and possibly with terror; and smiled at the vain industry of the Romans, who, in search of such useless rarities, could explore the limits of the land and sea. He wished, at the expense of the emperor, to repose in a golden bed. The wealth of Constantinople, and the skilful diligence of her artists, were instantly devoted to the gratification of his caprice; but, when the work was finished, he rejected with scorn a present so unworthy the majesty of a great king.³³ These were the casual sallies of his pride, but the avarice of the chagan was a more steady and tractable passion: a rich and regular supply of silk apparel, furniture, and plate introduced the rudiments of art and luxury among the tents of the Scythians; their appetite was stimulated by the pepper and cinnamon of India;³⁴ the annual subsidy or tribute was raised from fourscore to one hundred and twenty thousand pieces of gold; and, after each hostile interruption, the payment of the arrears, with exorbitant interest, was always made the first condition of the new treaty. In the language of a Barbarian without guile, the prince of the Avars affected to complain of the insincerity of the Greeks,³⁵ yet he was not inferior to the most civilised nations in the refinements of dissimulation and perfidy. As the successor of the Lombards, the chagan asserted his claim to the important city of Sirmium, the ancient bulwark of the Illyrian provinces.³⁶ The plains of the Lower Hungary were covered with the Avar horse, and a fleet of large boats was built in the Hercynian wood, to descend the Danube, and to transport into the Save the materials of a bridge. But, as the strong garrison of Singidunum, which commanded the conflux of the two rivers, might have stopped their passage and baffled his designs, he dispelled their apprehensions by a solemn oath that his views were not hostile to the empire. He swore by his sword, the symbol of the god of war, that he did not, as the enemy of Rome, construct a bridge upon the Save. "If I violate my oath," pursued the intrepid Baian, "may I myself, and the last of my nation, perish by the sword! may the heavens, and fire, the deity of the heavens, fall upon our heads! may the forests and mountains bury us in their ruins! and the Save, returning, against the laws of nature, to his source, overwhelm us in his angry waters!" After this Barbarous impercation, he calmly inquired, what oath was most sacred and venerable among the Christians, what guilt of perjury it was most dangerous to incur. The bishop of Singidunum presented the gospel, which the chagan received with devout reverence. "I swear," said he, "by the God who has spoken in this holy book, that I have neither falsehood on my tongue

nor treachery in my heart.” As soon as he rose from his knees, he accelerated the labour of the bridge, and despatched an envoy to proclaim what he no longer wished to conceal. “Inform the emperor,” said the perfidious Baian, “that Sirmium is invested on every side. Advise his prudence to withdraw the citizens and their effects, and to resign a city which it is now impossible to relieve or defend.” Without the hope of relief, the defence of Sirmium was prolonged above three years; the walls were still untouched; but famine was enclosed within the walls, till a merciful capitulation allowed the escape of the naked and hungry inhabitants. Singidunum, at the distance of fifty miles, experienced a more cruel fate: the buildings were razed, and the vanquished people was condemned to servitude and exile.³⁷ Yet the ruins of Sirmium are no longer visible; the advantageous situation of Singidunum soon attracted a new colony of Sclavonians; and the conflux of the Save and Danube is still guarded by the fortifications of Belgrade, or the *White City*, so often and so obstinately disputed by the Christian and Turkish arms.³⁸ From Belgrade to the walls of Constantinople a line may be measured of six hundred miles: that line was marked with flames and with blood; the horses of the Avars were alternately bathed in the Euxine and the Adriatic; and the Roman pontiff, alarmed by the approach of a more savage enemy,³⁹ was reduced to cherish the Lombards as the protectors of Italy. The despair of a captive, whom his country refused to ransom, disclosed to the Avars the invention and practice of military engines;⁴⁰ but in the first attempts they were rudely framed and awkwardly managed; and the resistance of Diocletianopolis and Berœa, of Philippopolis and Hadrianople, soon exhausted the skill and patience of the besiegers. The warfare of Baian was that of a Tartar, yet his mind was susceptible of a humane and generous sentiment; he spared Anchialus, whose salutary waters had restored the health of the best beloved of his wives; and the Romans confess that their starving army was fed and dismissed by the liberality of a foe. His empire extended over Hungary, Poland, and Prussia, from the mouth of the Danube to that of the Oder;⁴¹ and his new subjects were divided and transplanted by the jealous policy of the conqueror.⁴² The eastern regions of Germany, which had been left vacant by the emigration of the Vandals, were replenished with Sclavonian colonists; the same tribes are discovered in the neighbourhood of the Adriatic and of the Baltic; and, with the name of Baian himself, the Illyrian cities of Neyss and Lissa are again found in the heart of Silesia. In the disposition both of his troops and provinces, the chagan exposed the vassals, whose lives he disregarded,⁴³ to the first assault; and the swords of the enemy were blunted before they encountered the native valour of the Avars.

The Persian alliance restored the troops of the East to the defence of Europe; and Maurice, who had supported ten years the insolence of the chagan, declared his resolution to march in person against the Barbarians. In the space of two centuries, none of the successors of Theodosius had appeared in the field, their lives were supinely spent in the palace of Constantinople; and the Greeks could no longer understand that the name of *emperor*, in its primitive sense, denoted the chief of the

armies of the republic. The martial ardour of Maurice was opposed by the grave flattery of the senate, the timid superstition of the patriarch, and the tears of the empress Constantina; and they all conjured him to devolve on some meaner general the fatigues and perils of a Scythian campaign. Deaf to their advice and entreaty, the emperor boldly advanced⁴⁴ seven miles from the capital; the sacred ensign of the cross was displayed in the front, and Maurice reviewed, with conscious pride, the arms and numbers of the veterans who had fought and conquered beyond the Tigris. Anchialus was the last term of his progress by sea and land; he solicited, without success, a miraculous answer to his nocturnal prayers; his mind was confounded by the death of a favourite horse, the encounter of a wild boar, a storm of wind and rain, and the birth of a monstrous child; and he forgot that the best of omens is to unsheathe our sword in the defence of our country.⁴⁵ Under the pretence of receiving the ambassadors of Persia, the emperor returned to Constantinople, exchanged the thoughts of war for those of devotion, and disappointed the public hope by his absence and the choice of his lieutenants. The blind partiality of fraternal love might excuse the promotion of his brother Peter, who fled with equal disgrace from the Barbarians, from his own soldiers, and from the inhabitants of a Roman city. That city, if we may credit the resemblance of name and character, was the famous Azimuntium,⁴⁶ which had alone repelled the tempest of Attila. The example of her warlike youth was propagated to succeeding generations; and they obtained, from the first or the second Justin, an honourable privilege, that their valour should be always reserved for the defence of their native country. The brother of Maurice attempted to violate this privilege, and to mingle a patriot band with the mercenaries of his camp; they retired to the church, he was not awed by the sanctity of the place; the people rose in their cause, the gates were shut, the ramparts were manned; and the cowardice of Peter was found equal to his arrogance and injustice. The military fame of Commentiolus⁴⁷ is the object of satire or comedy rather than of serious history, since he was even deficient in the vile and vulgar qualification of personal courage. His solemn councils, strange evolutions, and secret orders always supplied an apology for flight or delay. If he marched against the enemy, the pleasant valleys of Mount Hæmus opposed an insuperable barrier; but in his retreat he explored, with fearless curiosity, the most difficult and obsolete paths, which had almost escaped the memory of the oldest native. The only blood which he lost was drawn, in a real or affected malady, by the lancet of a surgeon; and his health, which felt with exquisite sensibility the approach of the Barbarians, was uniformly restored by the repose and safety of the winter season. A prince who could promote and support this unworthy favourite must derive no glory from the accidental merit of his colleague Priscus.⁴⁸ In five successive battles, which seem to have been conducted with skill and resolution, seventeen thousand two hundred Barbarians were made prisoners; near sixty thousand, with four sons of the chagan, were slain; the Roman general surprised a peaceful district of the Gepidæ, who slept under the protection of the Avars; and his last trophies were erected on the banks of the Danube and the Theiss. Since the death of Trajan, the arms of the empire had not penetrated so deeply into the old Dacia; yet the success of Priscus was transient and barren; and he was

soon recalled by the apprehension that Baian, with dauntless spirit and recruited forces, was preparing to avenge his defeat under the walls of Constantinople.[49](#)

The theory of war was not more familiar to the camps of Cæsar and Trajan than to those of Justinian and Maurice.[50](#) The iron of Tuscany or Pontus still received the keenest temper from the skill of the Byzantine workmen. The magazines were plentifully stored with every species of offensive and defensive arms. In the construction and use of ships, engines, and fortifications, the Barbarians admired the superior ingenuity of a people whom they so often vanquished in the field. The science of tactics, the order, evolutions, and stratagems of antiquity, was transcribed and studied in the books of the Greeks and Romans. But the solitude or degeneracy of the provinces could no longer supply a race of men to handle those weapons, to guard those walls, to navigate those ships, and to reduce the theory of war into bold and successful practice. The genius of Belisarius and Narses had been formed without a master, and expired without a disciple. Neither honour, nor patriotism, nor generous superstition could animate the lifeless bodies of slaves and strangers, who had succeeded to the honours of the legions; it was in the camp alone that the emperor should have exercised a despotic command; it was only in the camps that his authority was disobeyed and insulted; he appeased and inflamed with gold the licentiousness of the troops; but their vices were inherent, their victories were accidental, and their costly maintenance exhausted the substance of a state which they were unable to defend. After a long and pernicious indulgence, the cure of this inveterate evil was undertaken by Maurice; but the rash attempt, which drew destruction on his own head, tended only to aggravate the disease. A reformer should be exempt from the suspicion of interest, and he must possess the confidence and esteem of those whom he proposes to reclaim. The troops of Maurice might listen to the voice of a victorious leader; they disdained the admonitions of statesmen and sophists; and, when they received an edict which deducted from their pay the price of their arms and clothing, they execrated the avarice of a prince insensible of the dangers and fatigues from which he had escaped. The camps both of Asia and Europe were agitated with frequent and furious seditions;[51](#) the enraged soldiers of Edessa pursued, with reproaches, with threats, with wounds, their trembling generals; they overturned the statues of the emperor, cast stones against the miraculous image of Christ, and either rejected the yoke of all civil and military laws or instituted a dangerous model of voluntary subordination. The monarch, always distant and often deceived, was incapable of yielding or persisting according to the exigence of the moment. But the fear of a general revolt induced him too readily to accept any act of valour or any expression of loyalty as an atonement for the popular offence; the new reform was abolished as hastily as it had been announced; and the troops, instead of punishment and restraint, were agreeably surprised by a gracious proclamation of immunities and rewards. But the soldiers accepted without gratitude the tardy and reluctant gifts of the emperor; their insolence was elated by the discovery of his weakness and their own strength; and their mutual hatred was

inflamed beyond the desire of forgiveness or the hope of reconciliation. The historians of the times adopt the vulgar suspicion that Maurice conspired to destroy the troops whom he had laboured to reform; the misconduct and favour of Commentiolus are imputed to this malevolent design; and every age must condemn the inhumanity or avarice⁵² of a prince who, by the trifling ransom of six thousand pieces of gold, might have prevented the massacre of twelve thousand prisoners in the hands of the chagan. In the just fervour of indignation, an order was signified to the army of the Danube that they should spare the magazines of the province and establish their winter quarters in the hostile country of the Avars. The measure of their grievances was full: they pronounced Maurice unworthy to reign, expelled or slaughtered his faithful adherents, and under the command of Phocas, a simple centurion, returned by hasty marches to the neighbourhood of Constantinople. After a long series of legal succession, the military disorders of the third century were again revived; yet such was the novelty of the enterprise that the insurgents were awed by their own rashness. They hesitated to invest their favourite with the vacant purple,⁵³ and, while they rejected all treaty with Maurice himself, they held a friendly correspondence with his son Theodosius and with Germanus the father-in-law of the royal youth. So obscure had been the former condition of Phocas that the emperor was ignorant of the name and character of his rival; but, as soon as he learned that the centurion, though bold in sedition, was timid in the face of danger, "Alas!" cried the desponding prince, "if he is a coward, he will surely be a murderer."

Yet, if Constantinople had been firm and faithful the murderer might have spent his fury against the walls; and the rebel army would have been gradually consumed or reconciled by the prudence of the emperor. In the games of the circus, which he repeated with unusual pomp, Maurice disguised with smiles of confidence the anxiety of his heart, condescended to solicit the applause of the *factions*, and flattered their pride by accepting from their respective tribunes a list of nine hundred *blues* and fifteen hundred *greens*, whom he affected to esteem as the solid pillars of his throne. Their treacherous or languid support betrayed his weakness and hastened his fall; the green faction were the secret accomplices of the rebels, and the blues recommended lenity and moderation in a contest with their Roman brethren. The rigid and parsimonious virtues of Maurice had long since alienated the hearts of his subjects: as he walked barefoot in a religious procession, he was rudely assaulted with stones, and his guards were compelled to present their iron maces in the defence of his person. A fanatic monk ran through the streets with a drawn sword, denouncing against him the wrath and the sentence of God, and a vile plebeian, who represented his countenance and apparel, was seated on an ass and pursued by the imprecations of the multitude.⁵⁴ The emperor suspected the popularity of Germanus with the soldiers and citizens; he feared, he threatened, but he delayed to strike; the patrician fled to the sanctuary of the church; the people rose in his defence, the walls were deserted by the guards, and the lawless city was abandoned to the flames and rapine of a nocturnal tumult. In a small bark, the unfortunate Maurice, with his wife and nine children, escaped to the Asiatic

shore, but the violence of the wind compelled him to land at the church of St. Autonomus⁵⁵ near Chalcedon, from whence he despatched Theodosius, his eldest son, to implore the gratitude and friendship of the Persian monarch. For himself, he refused to fly: his body was tortured with sciatic pains,⁵⁶ his mind was enfeebled by superstition; he patiently awaited the event of the revolution, and addressed a fervent and public prayer to the Almighty, that the punishment of his sins might be inflicted in this world rather than in a future life. After the abdication of Maurice, the two factions disputed the choice of an emperor; but the favourite of the blues was rejected by the jealousy of their antagonists, and Germanus himself was hurried along by the crowds, who rushed to the palace of Hebdomon,⁵⁷ seven miles from the city, to adore the majesty of Phocas the centurion. A modest wish of resigning the purple to the rank and merit of Germanus was opposed by *his* resolution, more obstinate and equally sincere; the senate and clergy obeyed his summons, and, as soon as the patriarch was assured of his orthodox belief, he consecrated the successful usurper in the church of St. John the Baptist. On the third day,⁵⁸ amidst the acclamations of a thoughtless people, Phocas made his public entry in a chariot drawn by four white horses; the revolt of the troops was rewarded by a lavish donative; and the new sovereign, after visiting the palace, beheld from his throne the games of the hippodrome. In a dispute of precedence between the two factions, his partial judgment inclined in favour of the greens. “Remember that Maurice is still alive!” resounded from the opposite side; and the indiscreet clamour of the blues admonished and stimulated the cruelty of the tyrant. The ministers of death were despatched to Chalcedon; they dragged the emperor from his sanctuary; and the five sons of Maurice were successively murdered before the eyes of their agonising parent. At each stroke which he felt in his heart, he found strength to rehearse a pious ejaculation: “Thou art just, O Lord: and thy judgments are righteous.” And such, in the last moments, was his rigid attachment to truth and justice that he revealed to the soldiers the pious falsehood of a nurse who presented her own child in the place of a royal infant.⁵⁹ The tragic scene was finally closed by the execution of the emperor himself, in the twentieth year of his reign, and the sixty-third of his age. The bodies of the father and his five sons were cast into the sea, their heads were exposed at Constantinople to the insults or pity of the multitude, and it was not till some signs of putrefaction had appeared, that Phocas connived at the private burial of these venerable remains. In that grave, the faults and errors of Maurice were kindly interred. His fate alone was remembered; and at the end of twenty years, in the recital of the history of Theophylact, the mournful tale was interrupted by the tears of the audience.⁶⁰

Such tears must have flowed in secret, and such compassion would have been criminal, under the reign of Phocas, who was peaceably acknowledged in the provinces of the East and West. The images of the emperor and his wife Leontia were exposed in the Lateran to the veneration of the clergy and senate of Rome, and afterwards deposited in the palace of the Cæsars, between those of Constantine and

Theodosius. As a subject and a Christian, it was the duty of Gregory to acquiesce in the established government, but the joyful applause with which he salutes the fortune of the assassin has sullied with indelible disgrace the character of the saint. The successor of the apostles might have inculcated with decent firmness the guilt of blood, and the necessity of repentance: he is content to celebrate the deliverance of the people and the fall of the oppressor; to rejoice that the piety and benignity of Phocas have been raised by Providence to the Imperial throne; to pray that his hands may be strengthened against all his enemies; and to express a wish, perhaps a prophecy, that, after a long and triumphant reign, he may be transferred from a temporal to an everlasting kingdom.⁶¹ I have already traced the steps of a revolution so pleasing, in Gregory's opinion, both to heaven and earth; and Phocas does not appear less hateful in the exercise than in the acquisition of power. The pencil of an impartial historian has delineated the portrait of a monster:⁶² his diminutive and deformed person, the closeness of his shaggy eye-brows, his red hair, his beardless chin, and his cheek disfigured and discoloured by a formidable scar. Ignorant of letters, of laws, and even of arms, he indulged in the supreme rank a more ample privilege of lust and drunkenness, and his brutal pleasures were either injurious to his subjects or disgraceful to himself. Without assuming the office of a prince, he renounced the profession of a soldier; and the reign of Phocas afflicted Europe with ignominious peace, and Asia with desolating war. His savage temper was inflamed by passion, hardened by fear, exasperated by resistance or reproach. The flight of Theodosius to the Persian court had been intercepted by a rapid pursuit or a deceitful message: he was beheaded at Nice, and the last hours of the young prince were soothed by the comforts of religion and the consciousness of innocence. Yet his phantom disturbed the repose of the usurper; a whisper was circulated through the East, that the son of Maurice was still alive; the people expected their avenger, and the widow and daughters of the late emperor would have adopted as their son and brother the vilest of mankind. In the massacre of the Imperial family,⁶³ the mercy, or rather the discretion, of Phocas had spared these unhappy females, and they were decently confined to a private house. But the spirit of the empress Constantina, still mindful of her father, her husband, and her sons, aspired to freedom and revenge. At the dead of night, she escaped to the sanctuary of St. Sophia; but her tears, and the gold of her associate Germanus, were insufficient to provoke an insurrection. Her life was forfeited to revenge, and even to justice; but the patriarch obtained and pledged an oath for her safety; a monastery was allotted for her prison, and the widow of Maurice accepted and abused the lenity of his assassin. The discovery or the suspicion of a second conspiracy dissolved the engagements and rekindled the fury of Phocas. A matron who commanded the respect and pity of mankind, the daughter, wife, and mother of emperors, was tortured like the vilest malefactor, to force a confession of her designs and associates; and the empress Constantina, with her three innocent daughters, was beheaded at Chalcedon, on the same ground which had been stained with the blood of her husband and five sons. After such an example, it would be superfluous to enumerate the names and sufferings of meaner victims. Their condemnation was

seldom preceded by the forms of trial, and their punishment was embittered by the refinements of cruelty: their eyes were pierced, their tongues were torn from the root, the hands and feet were amputated; some expired under the lash, others in the flames, others again were transfixed with arrows; and a simple speedy death was mercy which they could rarely obtain. The hippodrome, the sacred asylum of the pleasures and the liberty of the Romans, was polluted with heads and limbs and mangled bodies; and the companions of Phocas were the most sensible that neither his favour nor their services could protect them from a tyrant, the worthy rival of the Caligulas and Domitians of the first age of the empire.[64](#)

A daughter of Phocas, his only child, was given in marriage to the patrician Crispus,[65](#) and the *royal* images of the bride and bridegroom were indiscreetly placed in the circus, by the side of the emperor. The father must desire that his posterity should inherit the fruit of his crimes, but the monarch was offended by this premature and popular association; the tribunes of the green faction, who accused the officious error of their sculptors, were condemned to instant death; their lives were granted to the prayers of the people; but Crispus might reasonably doubt whether a jealous usurper could forget and pardon his involuntary competition. The green faction was alienated by the ingratitude of Phocas and the loss of their privileges; every province of the empire was ripe for rebellion; and Heraclius, exarch of Africa, persisted above two years in refusing all tribute and obedience to the centurion who disgraced the throne of Constantinople. By the secret emissaries of Crispus and the senate, the independent exarch was solicited to save and to govern his country; but his ambition was chilled by age, and he resigned the dangerous enterprise to his son Heraclius, and to Nicetas, the son of Gregory his friend and lieutenant. The powers of Africa were armed by the two adventurous youths; they agreed that the one should navigate the fleet from Carthage to Constantinople, that the other should lead an army through Egypt and Asia, and that the Imperial purple should be the reward of diligence and success. A faint rumour of their undertaking was conveyed to the ears of Phocas, and the wife and mother of the younger Heraclius were secured as the hostages of his faith; but the treacherous art of Crispus extenuated the distant peril, the means of defence were neglected or delayed, and the tyrant supinely slept till the African navy cast anchor in the Hellespont. Their standard was joined at Abydus by the fugitives and exiles who thirsted for revenge; the ships of Heraclius, whose lofty masts were adorned with the holy symbols of religion,[66](#) steered their triumphant course through the Propontis; and Phocas beheld from the windows of the palace his approaching and inevitable fate. The green faction was tempted, by gifts and promises, to oppose a feeble and fruitless resistance to the landing of the Africans; but the people, and even the guards, were determined by the well-timed defection of Crispus; and the tyrant was seized by a private enemy, who boldly invaded the solitude of the palace. Stripped of the diadem and purple, clothed in a vile habit, and loaded with chains, he was transported in a small boat to the Imperial galley of Heraclius, who reproached him with the crimes of his abominable reign. “Wilt thou govern better?” were the last words of the despair of Phocas. After

suffering each variety of insult and torture, his head was severed from his body, the mangled trunk was cast into the flames, and the same treatment was inflicted on the statues of the vain usurper and the seditious banner of the green faction. The voice of the clergy, the senate, and the people invited Heraclius to ascend the throne which he had purified from guilt and ignominy; after some graceful hesitation, he yielded to their entreaties. His coronation was accompanied by that of his wife Eudoxia; and their posterity, till the fourth generation, continued to reign over the empire of the East. The voyage of Heraclius had been easy and prosperous; the tedious march of Nicetas was not accomplished before the decision of the contest; but he submitted without a murmur to the fortune of his friend, and his laudable intentions were rewarded with an equestrian statue and a daughter of the emperor. It was more difficult to trust the fidelity of Crispus, whose recent services were recompensed by the command of the Cappadocian army. His arrogance soon provoked, and seemed to excuse, the ingratitude of his new sovereign. In the presence of the senate, the son-in-law of Phocas was condemned to embrace the monastic life; and the sentence was justified by the weighty observation of Heraclius that the man who had betrayed his father could never be faithful to his friend.[67](#)

Even after his death the republic was afflicted by the crimes of Phocas, which armed with a pious cause the most formidable of her enemies. According to the friendly and equal forms of the Byzantine and Persian courts, he announced his exaltation to the throne; and his ambassador Lilius, who had presented him with the heads of Maurice and his sons, was the best qualified to describe the circumstances of the tragic scene.[68](#) However it might be varnished by fiction or sophistry, Chosroes turned with horror from the assassin, imprisoned the pretended envoy, disclaimed the usurper, and declared himself the avenger of his father and benefactor. The sentiments of grief and resentment which humanity would feel, and honour would dictate, promoted, on this occasion, the interest of the Persian king; and his interest was powerfully magnified by the national and religious prejudices of the Magi and satraps. In a strain of artful adulation, which assumed the language of freedom, they presumed to censure the excess of his gratitude and friendship for the Greeks: a nation with whom it was dangerous to conclude either peace or alliance; whose superstition was devoid of truth and justice; and who must be incapable of any virtue, since they could perpetrate the most atrocious of crimes, the impious murder of their sovereign.[69](#) For the crime of an ambitious centurion, the nation which he oppressed was chastised with the calamities of war; and the same calamities, at the end of twenty years, were retaliated and redoubled on the heads of the Persians.[70](#) The general who had restored Chosroes to the throne still commanded in the East; and the name of Narses was the formidable sound with which the Assyrian mothers were accustomed to terrify their infants. It is not improbable that a native subject of Persia should encourage his master and his friend to deliver and possess the provinces of Asia. It is still more probable that Chosroes should animate his troops by the assurance that the sword which they

dreaded the most would remain in its scabbard or be drawn in their favour. The hero could not depend on the faith of a tyrant, and the tyrant was conscious how little he deserved the obedience of an hero. Narses was removed from his military command; he reared an independent standard at Hierapolis in Syria; he was betrayed by fallacious promises, and burnt alive in the market-place of Constantinople. Deprived of the only chief whom they could fear or esteem, the bands which he had led to victory were twice broken by the cavalry, trampled by the elephants, and pierced by the arrows of the Barbarians; and a great number of the captives were beheaded on the field of battle by the sentence of the victor, who might justly condemn these seditious mercenaries as the authors or accomplices of the death of Maurice. Under the reign of Phocas, the fortifications of Merdin, Dara, Amida, and Edessa were successively besieged, reduced, and destroyed by the Persian monarch; he passed the Euphrates, occupied the Syrian cities, Hierapolis, Chalcis, and Berœa or Aleppo, and soon encompassed the walls of Antioch with his irresistible arms. The rapid tide of success discloses the decay of the empire, the incapacity of Phocas, and the disaffection of his subjects; and Chosroes provided a decent apology for their submission or revolt, by an impostor who attended his camp as the son of Maurice⁷¹ and the lawful heir of the monarchy.

The first intelligence from the East which Heraclius received⁷² was that of the loss of Antioch; but the aged metropolis, so often overturned by earthquakes and pillaged by the enemy, could supply but a small and languid stream of treasure and blood. The Persians were equally successful and more fortunate in the sack of Cæsarea, the capital of Cappadocia; and, as they advanced beyond the ramparts of the frontier, the boundary of ancient war, they found a less obstinate resistance and a more plentiful harvest. The pleasant vale of Damascus has been adorned in every age with a royal city; her obscure felicity has hitherto escaped the historian of the Roman empire; but Chosroes reposed his troops in the paradise of Damascus before he ascended the hills of Libanus or invaded the cities of the Phœnician coast. The conquest of Jerusalem,⁷³ which had been meditated by Nushirvan, was achieved by the zeal and avarice of his grandson; the ruin of the proudest monument of Christianity was vehemently urged by the intolerant spirit of the Magi; and he could enlist, for this holy warfare, an army of six-and-twenty thousand Jews, whose furious bigotry might compensate, in some degree, for the want of valour and discipline. After the reduction of Galilee and the region beyond the Jordan, whose resistance appears to have delayed the fate of the capital, Jerusalem itself was taken by assault; the sepulchre of Christ, and the stately churches of Helena and Constantine, were consumed, or at least damaged, by the flames; the devout offerings of three hundred years were rifled in one sacrilegious day; the patriarch Zachariah, and the *true cross*, were transported into Persia; and the massacre of ninety thousand Christians is imputed to the Jews and Arabs who swelled the disorder of the Persian march. The fugitives of Palestine were entertained at Alexandria by the charity of John the archbishop, who is distinguished among a crowd of saints by the epithet of *alms-giver*; ⁷⁴ and the revenues of the church, with a treasure of three hundred thousand pounds, were restored to the true proprietors, the poor of

every country and every denomination. But Egypt itself, the only province which had been exempt since the time of Diocletian from foreign and domestic war, was again subdued by the successors of Cyrus.⁷⁵ Pelusium, the key of that impervious country, was surprised by the cavalry of the Persians: they passed with impunity the innumerable channels of the Delta, and explored the long valley of the Nile, from the pyramids of Memphis to the confines of Æthiopia. Alexandria might have been relieved by a naval force, but the archbishop and the prefect embarked for Cyprus; and Chosroes entered the second city of the empire, which still preserved a wealthy remnant of industry and commerce. His western trophy was erected, not on the walls of Carthage,⁷⁶ but in the neighbourhood of Tripoli; the Greek colonies of Cyrene were finally extirpated; and the conqueror, treading in the footsteps of Alexander, returned in triumph through the sands of the Libyan desert. In the same campaign, another army advanced from the Euphrates to the Thracian Bosphorus; Chalcedon surrendered after a long siege, and a Persian camp was maintained above ten years in the presence of Constantinople. The sea-coast of Pontus, the city of Ancyra, and the isle of Rhodes are enumerated among the last conquests of the Great King; and, if Chosroes had possessed any maritime power, his boundless ambition would have spread slavery and desolation over the provinces of Europe.

From the long-disputed banks of the Tigris and Euphrates, the reign of the grandson of Nushirvan was suddenly extended to the Hellespont and the Nile, the ancient limits of the Persian monarchy. But the provinces, which had been fashioned by the habits of six hundred years to the virtues and vices of the Roman government, supported with reluctance the yoke of the Barbarians. The idea of a republic was kept alive by the institutions, or at least by the writings, of the Greeks and Romans, and the subjects of Heraclius had been educated to pronounce the words of liberty and law. But it has always been the pride and policy of Oriental princes to display the titles and attributes of their omnipotence; to upbraid a nation of slaves with their true name and abject condition; and to enforce, by cruel and insolent threats, the rigour of their absolute commands. The Christians of the East were scandalised by the worship of fire and the impious doctrine of the two principles; the Magi were not less intolerant than the bishops; and the martyrdom of some native Persians, who had deserted the religion of Zoroaster,⁷⁷ was conceived to be the prelude of a fierce and general persecution. By the oppressive laws of Justinian, the adversaries of the church were made the enemies of the state; the alliance of the Jews, Nestorians, and Jacobites had contributed to the success of Chosroes, and his partial favour to the sectaries provoked the hatred and fears of the Catholic clergy. Conscious of their fear and hatred, the Persian conqueror governed his new subjects with an iron sceptre; and, as if he suspected the stability of his dominion, he exhausted their wealth by exorbitant tributes and licentious rapine, despoiled or demolished the temples of the East, and transported to his hereditary realms the gold, the silver, the precious marbles, the arts, and the artists of the Asiatic cities. In the obscure picture of the calamities of the empire,⁷⁸ it is not easy to discern

the figure of Chosroes himself, to separate his actions from those of his lieutenants, or to ascertain his personal merit in the general blaze of glory and magnificence. He enjoyed with ostentation the fruits of victory, and frequently retired from the hardships of war to the luxury of the palace. But in the space of twenty-four years, he was deterred by superstition or resentment from approaching the gates of Ctesiphon; and his favourite residence of Artemita, or Dastagerd,⁷⁹ was situate beyond the Tigris, about sixty miles to the north of the capital.⁸⁰ The adjacent pastures were covered with flocks and herds; the paradise or park was replenished with pheasants, peacocks, ostriches, roebucks, and wild boars; and the noble game of lions and tigers was sometimes turned loose for the bolder pleasures of the chase. Nine hundred and sixty elephants were maintained for the use or splendour of the Great King; his tents and baggage were carried into the field by twelve thousand great camels and eight thousand of a smaller size;⁸¹ and the royal stables were filled with six thousand mules and horses, among whom the names of Shebdiz and Barid are renowned for their speed or beauty. Six thousand guards successively mounted before the palace gate; the service of the interior apartments was performed by twelve thousand slaves; and in the number of three thousand virgins, the fairest of Asia, some happy concubine might console her master for the age or the indifference of Sira. The various treasures of gold, silver, gems, silk, and aromatics were deposited in an hundred subterraneous vaults; and the chamber *Badaverd* denoted the accidental gift of the winds which had wafted the spoils of Heraclius into one of the Syrian harbours of his rival. The voice of flattery, and perhaps of fiction, is not ashamed to compute the thirty thousand rich hangings that adorned the walls, the forty thousand columns of silver, or more probably of marble and plated wood, that supported the roof; and the thousand globes of gold suspended in the dome, to imitate the motions of the planets and the constellations of the zodiac.⁸² While the Persian monarch contemplated the wonders of his art and power, he received an epistle from an obscure citizen of Mecca, inviting him to acknowledge Mahomet as the apostle of God. He rejected the invitation, and tore the epistle. "It is thus," exclaimed the Arabian prophet, "that God will tear the kingdom, and reject the supplications, of Chosroes."⁸³ Placed on the verge of the two great empires of the East, Mahomet observed with secret joy the progress of their mutual destruction; and, in the midst of the Persian triumphs, he ventured to foretell that, before many years should elapse, victory would again return to the banners of the Romans.⁸⁴

At the time when this prediction is said to have been delivered, no prophecy could be more distant from its accomplishment, since the first twelve years of Heraclius announced the approaching dissolution of the empire. If the motives of Chosroes had been pure and honourable, he must have ended the quarrel with the death of Phocas, and he would have embraced, as his best ally, the fortunate African who had so generously avenged the injuries of his benefactor Maurice. The prosecution of the war revealed the true character of the Barbarian; and the suppliant embassies of Heraclius

to beseech his clemency, that he would spare the innocent, accept a tribute, and give peace to the world, were rejected with contemptuous silence or insolent menace. Syria, Egypt, and the provinces of Asia were subdued by the Persian arms, while Europe, from the confines of Istria to the long wall of Thrace, was oppressed by the Avars, unsatiated with the blood and rapine of the Italian war. They had coolly massacred their male captives in the sacred field of Pannonia; the women and children were reduced to servitude; and the noblest virgins were abandoned to the promiscuous lust of the Barbarians. The amorous matron who opened the gates of Friuli passed a short night in the arms of her royal lover; the next evening, Romilda was condemned to the embraces of twelve Avars; and the third day the Lombard princess was impaled in the sight of the camp, while the chagan observed, with a cruel smile, that such a husband was the fit recompense of her lewdness and perfidy.⁸⁵ By these implacable enemies Heraclius, on either side, was insulted and besieged; and the Roman empire was reduced to the walls of Constantinople, with the remnant of Greece, Italy, and Africa, and some maritime cities, from Tyre to Trebizond, of the Asiatic coast. After the loss of Egypt, the capital was afflicted by famine and pestilence; and the emperor, incapable of resistance and hopeless of relief, had resolved to transfer his person and government to the more secure residence of Carthage.⁸⁶ His ships were already laden with the treasures of the palace; but his flight was arrested by the patriarch, who armed the powers of religion in the defence of his country, led Heraclius to the altar of St. Sophia, and extorted a solemn oath that he would live and die with the people whom God had entrusted to his care. The chagan was encamped in the plains of Thrace, but he dissembled his perfidious designs, and solicited an interview with the emperor near the town of Heraclea. Their reconciliation was celebrated with equestrian games, the senate and people in their gayest apparel resorted to the festival of peace, and the Avars beheld, with envy and desire, the spectacle of Roman luxury. On a sudden, the hippodrome was encompassed by the Scythian cavalry, who had pressed their secret and nocturnal march; the tremendous sound of the chagan's whip gave the signal of the assault; and Heraclius, wrapping his diadem round his arm, was saved, with extreme hazard, by the fleetness of his horse. So rapid was the pursuit that the Avars almost entered the golden gate of Constantinople with the flying crowds;⁸⁷ but the plunder of the suburbs rewarded their treason, and they transported beyond the Danube two hundred and seventy thousand captives. On the shore of Chalcedon, the emperor held a safer conference with a more honourable foe, who, before Heraclius descended from his galley, saluted with reverence and pity the majesty of the purple. The friendly offer of Sain the Persian general, to conduct an embassy to the presence of the Great King, was accepted with the warmest gratitude, and the prayer for pardon and peace was humbly presented by the prætorian prefect, the prefect of the city, and one of the first ecclesiastics of the patriarchal church.⁸⁸ But the lieutenant of Chosroes had fatally mistaken the intentions of his master. "It was not an embassy," said the tyrant of Asia, "it was the person of Heraclius, bound in chains, that he should have brought to the foot of my throne. I will never give peace to the emperor of Rome till he has abjured his crucified God and embraced the worship of the sun." Sain was flayed alive,

according to the inhuman practice of his country; and the separate and rigorous confinement of the ambassadors violated the law of nations and the faith of an express stipulation. Yet the experience of six years at length persuaded the Persian monarch to renounce the conquest of Constantinople and to specify the annual tribute or ransom of the Roman empire: a thousand talents of gold, a thousand talents of silver, a thousand silk robes, a thousand horses, and a thousand virgins. Heraclius subscribed these ignominious terms, but the time and space which he obtained to collect such treasures from the poverty of the East was industriously employed in the preparations of a bold and desperate attack.

Of the characters conspicuous in history, that of Heraclius is one of the most extraordinary and inconsistent. In the first and last years of a long reign, the emperor appears to be the slave of sloth, of pleasure, or of superstition, the careless and impotent spectator of the public calamities. But the languid mists of the morning and evening are separated by the brightness of the meridian sun: the Arcadius of the palace arose the Cæsar of the camp; and the honour of Rome and Heraclius was gloriously retrieved by the exploits and trophies of six adventurous campaigns. It was the duty of the Byzantine historians to have revealed the causes of his slumber and vigilance. At this distance we can only conjecture that he was endowed with more personal courage than political resolution; that he was detained by the charms, and perhaps the arts, of his niece Martina, with whom, after the death of Eudocia, he contracted an incestuous marriage;[89](#) and that he yielded to the base advice of the counsellors, who urged, as a fundamental law, that the life of the emperor should never be exposed in the field.[90](#) Perhaps he was awakened by the last insolent demand of the Persian conqueror; but, at the moment when Heraclius assumed the spirit of a hero, the only hopes of the Romans were drawn from the vicissitudes of fortune, which might threaten the proud prosperity of Chosroes and must be favourable to those who had attained the lowest period of depression.[91](#) To provide for the expenses of war was the first care of the emperor; and, for the purpose of collecting the tribute, he was allowed to solicit the benevolence of the Eastern provinces. But the revenue no longer flowed in the usual channels; the credit of an arbitrary prince is annihilated by his power; and the courage of Heraclius was first displayed in daring to borrow the consecrated wealth of churches under the solemn vow of restoring, with usury, whatever he had been compelled to employ in the service of religion and of the empire. The clergy themselves appear to have sympathised with the public distress, and the discreet patriarch of Alexandria, without admitting the precedent of sacrilege, assisted his sovereign by the miraculous or seasonable revelation of a secret treasure.[92](#) Of the soldiers who had conspired with Phocas, only two were found to have survived the stroke of time and of the Barbarians;[93](#) the loss, even of these seditious veterans, was imperfectly supplied by the new levies of Heraclius, and the gold of the sanctuary united, in the same camp, the names, and arms, and languages of the East and West. He would have been content with the neutrality of the Avars; and his friendly entreaty

that the chagan would act not as the enemy but as the guardian of the empire was accompanied with a more persuasive donative of two hundred thousand pieces of gold. Two days after the festival of Easter,⁹⁴ the emperor, exchanging his purple for the simple garb of a penitent and warrior,⁹⁵ gave the signal of his departure. To the faith of the people Heraclius recommended his children; the civil and military powers were vested in the most deserving hands; and the discretion of the patriarch and senate was authorised to save or surrender the city, if they should be oppressed in his absence by the superior forces of the enemy.

The neighbouring heights of Chalcedon were covered with tents and arms; but, if the new levies of Heraclius had been rashly led to the attack, the victory of the Persians in the sight of Constantinople might have been the last day of the Roman empire. As imprudent would it have been to advance into the provinces of Asia, leaving their innumerable cavalry to intercept his convoys, and continually to hang on the lassitude and disorder of his rear.⁹⁶ But the Greeks were still masters of the sea; a fleet of galleys, transports and storeships, was assembled in the harbour; the Barbarians consented to embark; a steady wind carried them through the Hellespont; the western and southern coast of Asia Minor lay on their left hand; the spirit of their chief was first displayed in a storm; and even the eunuchs of his train were excited to suffer and to work by the example of their master. He landed his troops on the confines of Syria and Cilicia, in the gulf of Scanderoon, where the coast suddenly turns to the south; and his discernment was expressed in the choice of this important post.⁹⁷ From all sides, the scattered garrisons of the maritime cities and the mountains might repair with speed and safety to his Imperial standard. The natural fortifications of Cilicia protected, and even concealed, the camp of Heraclius,⁹⁸ which was pitched near Issus, on the same ground where Alexander had vanquished the host of Darius. The angle which the emperor occupied was deeply indented into a vast semicircle of the Asiatic, Armenian, and Syrian provinces; and, to whatsoever point of the circumference he should direct his attack, it was easy for him to dissemble his own motions and to prevent those of the enemy. In the camp of Issus the Roman general reformed the sloth and disorder of the veterans, and educated the new recruits in the knowledge and practice of military virtue. Unfolding the miraculous image of Christ, he urged them to *revenge* the holy altars which had been profaned by the worshippers of fire; addressing them by the endearing appellations of sons and brethren, he deplored the public and private wrongs of the republic. The subjects of a monarch were persuaded that they fought in the cause of freedom; and a similar enthusiasm was communicated to the foreign mercenaries, who must have viewed with equal indifference the interest of Rome and of Persia. Heraclius himself, with the skill and patience of a centurion, inculcated the lessons of the school of tactics, and the soldiers were assiduously trained in the use of their weapons and the exercises and evolutions of the field. The cavalry and infantry in light or heavy armour were divided into two parties; the trumpets were fixed in the centre, and their signals directed the march, the charge, the

retreat, or pursuit; the direct or oblique order, the deep or extended phalanx; to represent in fictitious combat the operations of genuine war. Whatever hardship the emperor imposed on the troops, he inflicted with equal severity on himself; their labour, their diet, their sleep, were measured by the inflexible rules of discipline; and, without despising the enemy, they were taught to repose an implicit confidence in their own valour and the wisdom of their leader. Cilicia was soon encompassed with the Persian arms; but their cavalry hesitated to enter the defiles of Mount Taurus, till they were circumvented by the evolutions of Heraclius, who insensibly gained their rear, whilst he appeared to present his front in order of battle. By a false motion, which seemed to threaten Armenia, he drew them against their wishes to a general action. They were tempted by the artful disorder of his camp; but, when they advanced to combat, the ground, the sun, and the expectation of both armies were unpropitious to the Barbarians; the Romans successfully repeated their tactics in a field of battle;[99](#) and the event of the day declared to the world that the Persians were not invincible and that an hero was invested with the purple. Strong in victory and fame, Heraclius boldly ascended the heights of Mount Taurus, directed his march through the plains of Cappadocia, and established his troops for the winter season in safe and plentiful quarters on the banks of the river Halys.[100](#) His soul was superior to the vanity of entertaining Constantinople with an imperfect triumph; but the presence of the emperor was indispensably required to soothe the restless and rapacious spirit of the Avars.

Since the days of Scipio and Hannibal, no bolder enterprise has been attempted than that which Heraclius achieved for the deliverance of the empire.[101](#) He permitted the Persians to oppress for a while the provinces, and to insult with impunity the capital, of the East; while the Roman emperor explored his perilous way through the Black Sea[102](#) and the mountains of Armenia, penetrated into the heart of Persia,[103](#) and recalled the armies of the Great King to the defence of their bleeding country. With a select band of five thousand soldiers, Heraclius sailed from Constantinople to Trebizond; assembled his forces which had wintered in the Pontic regions; and, from the mouth of the Phasis to the Caspian sea, encouraged his subjects and allies to march with the successor of Constantine under the faithful and victorious banner of the cross. When the legions of Lucullus and Pompey first passed the Euphrates, they blushed at their easy victory over the natives of Armenia. But the long experience of war had hardened the minds and bodies of that effeminate people; their zeal and bravery were approved in the service of a declining empire; they abhorred and feared the usurpation of the house of Sassan, and the memory of persecution envenomed their pious hatred of the enemies of Christ. The limits of Armenia, as it had been ceded to the emperor Maurice, extended as far as the Araxes; the river submitted to the indignity of a bridge;[104](#) and Heraclius, in the footsteps of Mark Antony, advanced towards the city of Tauris or Gandzaca,[105](#) the ancient and modern capital of one of the provinces of Media. At the head of forty thousand men, Chosroes himself had returned from some

distant expedition to oppose the progress of the Roman arms; but he retreated on the approach of Heraclius, declining the generous alternative of peace or of battle. Instead of half a million of inhabitants, which have been ascribed to Tauris under the reign of the Sophys, the city contained no more than three thousand houses; but the value of the royal treasures was enhanced by a tradition that they were the spoils of Cræsus, which had been transported by Cyrus from the citadel of Sardes. The rapid conquests of Heraclius were suspended only by the winter season; a motive of prudence, or superstition,[106](#) determined his retreat into the province of Albania, along the shores of the Caspian; and his tents were most probably pitched in the plains of Mogan,[107](#) the favourite encampment of Oriental princes. In the course of this successful inroad, he signalled the zeal and revenge of a Christian emperor: at his command, the soldiers extinguished the fire, and destroyed the temples, of the Magi; the statues of Chosroes, who aspired to divine honours, were abandoned to the flames; and the ruins of Thebarma or Ormia,[108](#) which had given birth to Zoroaster himself, made some atonement for the injuries of the holy sepulchre. A purer spirit of religion was shewn in the relief and deliverance of fifty thousand captives. Heraclius was rewarded by their tears and grateful acclamations; but this wise measure, which spread the fame of his benevolence, diffused the murmurs of the Persians against the pride and obstinacy of their own sovereign.

Amidst the glories of the succeeding campaign, Heraclius is almost lost to our eyes and to those of the Byzantine historians.[109](#) From the spacious and fruitful plains of Albania, the emperor appears to follow the chain of Hyrcanian mountains, to descend into the province of Media or Irak, and to carry his victorious arms as far as the royal cities of Casbin and Ispahan, which had never been approached by a Roman conqueror. Alarmed by the danger of his kingdom, the powers of Chosroes were already recalled from the Nile and the Bosphorus, and three formidable armies[110](#) surrounded, in a distant and hostile land, the camp of the emperor. The Colchian allies prepared to desert his standard; and the fears of the bravest veterans were expressed, rather than concealed, by their desponding silence. “Be not terrified,” said the intrepid Heraclius, “by the multitude of your foes. With the aid of Heaven, one Roman may triumph over a thousand Barbarians. But, if we devote our lives for the salvation of our brethren, we shall obtain the crown of martyrdom, and our immortal reward will be liberally paid by God and posterity.” These magnanimous sentiments were supported by the vigour of his actions. He repelled the threefold attack of the Persians, improved the divisions of their chiefs, and, by a well-concerted train of marches, retreats, and successful actions, finally chased them from the field into the fortified cities of Media and Assyria. In the severity of the winter season, Sarbaraza deemed himself secure in the walls of Salban; he was surprised by the activity of Heraclius, who divided his troops and performed a laborious march in the silence of the night. The flat roofs of the houses were defended with useless valour against the darts and torches of the Romans; the satraps and nobles of Persia, with their wives and children, and the flower

of their martial youth, were either slain or made prisoners. The general escaped by a precipitate flight, but his golden armour was the prize of the conqueror; and the soldiers of Heraclius enjoyed the wealth and repose which they had so nobly deserved. On the return of spring, the emperor traversed in seven days the mountains of Curdistan, and passed without resistance the rapid stream of the Tigris. Oppressed by the weight of their spoils and captives, the Roman army halted under the walls of Amida; and Heraclius informed the senate of Constantinople of his safety and success, which they had already felt by the retreat of the besiegers. The bridges of the Euphrates were destroyed by the Persians; but, as soon as the emperor had discovered a ford, they hastily retired to defend the banks of the Sarus,[111](#) in Cilicia. That river, an impetuous torrent, was about three hundred feet broad; the bridge was fortified with strong turrets; and the banks were lined with Barbarian archers. After a bloody conflict, which continued till the evening, the Romans prevailed in the assault, and a Persian of gigantic size was slain and thrown into the Sarus by the hand of the emperor himself. The enemies were dispersed and dismayed; Heraclius pursued his march to Sebaste in Cappadocia; and, at the expiration of three years, the same coast of the Euxine applauded his return from a long and victorious expedition.[112](#)

Instead of skirmishing on the frontier, the two monarchs who disputed the empire of the East aimed their desperate strokes at the heart of their rival. The military force of Persia was wasted by the marches and combats of twenty years, and many of the veterans, who had survived the perils of the sword and the climate, were still detained in the fortresses of Egypt and Syria. But the revenge and ambition of Chosroes exhausted his kingdom; and the new levies of subjects, strangers, and slaves were divided into three formidable bodies.[113](#) The first army of fifty thousand men, illustrious by the ornament and title of the *golden spears*, was destined to march against Heraclius; the second was stationed to prevent his junction with the troops of his brother Theodorus; and the third was commanded to besiege Constantinople, and to second the operations of the chagan, with whom the Persian king had ratified a treaty of alliance and partition. Sarbar, the general of the third army, penetrated through the provinces of Asia to the well-known camp of Chalcedon, and amused himself with the destruction of the sacred and profane buildings of the Asiatic suburbs, while he impatiently waited the arrival of his Scythian friends on the opposite side of the Bosphorus. On the twenty-ninth of June, thirty thousand Barbarians, the vanguard of the Avars, forced the long wall, and drove into the capital a promiscuous crowd of peasants, citizens, and soldiers. Fourscore thousand[114](#) of his native subjects, and of the vassal tribes of Gepidæ, Russians, Bulgarians, and Sclavonians, advanced under the standard of the chagan; a month was spent in marches and negotiations; but the whole city was invested on the thirty-first of July, from the suburbs of Pera and Galata to the Blachernæ and seven towers; and the inhabitants descried with terror the flaming signals of the European and Asiatic shores. In the meanwhile the magistrates of Constantinople repeatedly strove to purchase the retreat of the chagan; but their deputies were rejected and insulted; and he suffered the patricians to stand before his

throne, while the Persian envoys, in silk robes, were seated by his side. "You see," said the haughty Barbarian, "the proofs of my perfect union with the Great King; and his lieutenant is ready to send into my camp a select band of three thousand warriors. Presume no longer to tempt your master with a partial and inadequate ransom; your wealth and your city are the only presents worthy of my acceptance. For yourselves, I shall permit you to depart, each with an undergarment and a shirt; and, at my entreaty, my friend Sarbar will not refuse a passage through his lines. Your absent prince, even now a captive or a fugitive, has left Constantinople to its fate; nor can you escape the arms of the Avars and Persians, unless you could soar into air like birds, unless like fishes you could dive into the waves."[115](#) During ten successive days the capital was assaulted by the Avars, who had made some progress in the science of attack; they advanced to sap or batter the wall, under the cover of the impenetrable tortoise; their engines discharged a perpetual volley of stones and darts; and twelve lofty towers of wood exalted the combatants to the height of the neighbouring ramparts. But the senate and people were animated by the spirit of Heraclius, who had detached to their relief a body of twelve thousand cuirassiers; the powers of fire and mechanics were used with superior art and success in the defence of Constantinople; and the galleys, with two and three ranks of oars, commanded the Bosphorus, and rendered the Persians the idle spectators of the defeat of their allies. The Avars were repulsed; a fleet of Sclavonian canoes was destroyed in the harbour; the vassals of the chagan threatened to desert, his provisions were exhausted, and, after burning his engines, he gave the signal of a slow and formidable retreat. The devotion of the Romans ascribed this signal deliverance to the virgin Mary; but the mother of Christ would surely have condemned their inhuman murder of the Persian envoys, who were entitled to the rights of humanity, if they were not protected by the laws of nations.[116](#)

After the division of his army, Heraclius prudently retired to the banks of the Phasis, from whence he maintained a defensive war against the fifty thousand gold spears of Persia. His anxiety was relieved by the deliverance of Constantinople; his hopes were confirmed by a victory of his brother Theodorus;[117](#) and to the hostile league of Chosroes with the Avars the Roman emperor opposed the useful and honourable alliance of the Turks. At his liberal invitation, the horde of Chozars[118](#) transported their tents from the plains of the Volga to the mountains of Georgia; Heraclius received them in the neighbourhood of Teflis,[119](#) and the khan with his nobles dismounted from their horses, if we may credit the Greeks, and fell prostrate on the ground, to adore the purple of the Cæsar. Such voluntary homage and important aid were entitled to the warmest acknowledgments; and the emperor, taking off his own diadem, placed it on the head of the Turkish prince, whom he saluted with a tender embrace and the appellation of son. After a sumptuous banquet, he presented Ziebel with the plate and ornaments, the gold, the gems, and the silk, which had been used at the Imperial table, and, with his own hand, distributed rich jewels and earrings to his new allies. In a secret interview, he produced the portrait of his daughter Eudocia,[120](#)

condescended to flatter the Barbarian with the promise of a fair and *august* bride, obtained an immediate succour of forty thousand horse, and negotiated a strong diversion of the Turkish arms on the side of the Oxus.^{[121](#)} The Persians, in their turn, retreated with precipitation; in the camp of Edessa, Heraclius reviewed an army of seventy thousand Romans and strangers; and some months were successfully employed in the recovery of the cities of Syria, Mesopotamia, and Armenia, whose fortifications had been imperfectly restored. Sarbar still maintained the important station of Chalcedon; but the jealousy of Chosroes, or the artifice of Heraclius, soon alienated the mind of that powerful satrap from the service of his king and country. A messenger was intercepted with a real or fictitious mandate to the *cadarigan*, or second in command, directing him to send, without delay, to the throne the head of a guilty or unfortunate general. The despatches were transmitted to Sarbar himself; and, as soon as he read the sentence of his own death, he deterousxly inserted the names of four hundred officers, assembled a military council, and asked the *cadarigan*, whether he was prepared to execute the commands of their tyrant? The Persians unanimously declared that Chosroes had forfeited the sceptre; a separate treaty was concluded with the government of Constantinople; and, if some considerations of honour or policy restrained Sarbar from joining the standard of Heraclius, the emperor was assured that he might prosecute, without interruption, his designs of victory and peace.

Deprived of his firmest support, and doubtful of the fidelity of his subjects, the greatness of Chosroes was still conspicuous in its ruins. The number of five hundred thousand may be interpreted as an Oriental metaphor, to describe the men and arms, the horses and elephants, that covered Media and Assyria against the invasion of Heraclius. Yet the Romans boldly advanced from the Araxes to the Tigris, and the timid prudence of Rhazates was content to follow them by forced marches through a desolate country, till he received a peremptory mandate to risk the fate of Persia in a decisive battle. Eastward of the Tigris, at the end of the bridge of Mosul, the great Nineveh had formerly been erected;^{[122](#)} the city, and even the ruins of the city, had long since disappeared;^{[123](#)} the vacant space afforded a spacious field for the operations of the two armies. But these operations are neglected by the Byzantine historians, and, like the authors of epic poetry and romance, they ascribe the victory not to the military conduct, but to the personal valour, of their favourite hero. On this memorable day, Heraclius, on his horse Phallas,^{[124](#)} surpassed the bravest of his warriors: his lip was pierced with a spear, the steed was wounded in the thigh, but he carried his master safe and victorious through the triple phalanx of the Barbarians. In the heat of the action, three valiant chiefs were successively slain by the sword and lance of the emperor; among these was Rhazates himself; he fell like a soldier, but the sight of his head scattered grief and despair through the fainting ranks of the Persians. His armour of pure and massy gold, the shield of one hundred and twenty plates, the sword and belt, the saddle and cuirass, adorned the triumph of Heraclius, and, if he had not been faithful to Christ and his mother, the champion of Rome might have offered

the fourth *opime* spoils to the Jupiter of the Capitol.[125](#) In the battle of Nineveh, which was fiercely fought from daybreak to the eleventh hour, twenty-eight standards, beside those which might be broken or torn, were taken from the Persians; the greatest part of their army was cut in pieces, and the victors, concealing their own loss, passed the night on the field. They acknowledged that on this occasion it was less difficult to kill than to discomfit the soldiers of Chosroes; amidst the bodies of their friends, no more than two bow-shot from the enemy, the remnant of the Persian cavalry stood firm till the seventh hour of the night; about the eighth hour they retired to their unrifled camp, collected their baggage, and dispersed on all sides, from the want of orders rather than of resolution. The diligence of Heraclius was not less admirable in the use of victory; by a march of forty-eight miles in four-and-twenty hours, his vanguard occupied the bridges of the great and the lesser Zab; and the cities and palaces of Assyria were open for the first time to the Romans. By a just gradation of magnificent scenes, they penetrated to the royal seat of Dastagerd, and, though much of the treasure had been removed, and much had been expended, the remaining wealth appears to have exceeded their hopes, and even to have satiated their avarice. Whatever could not be easily transported they consumed with fire, that Chosroes might feel the anguish of those wounds which he had so often inflicted on the provinces of the empire; and justice might allow the excuse, if the desolation had been confined to the works of regal luxury, if national hatred, military licence, and religious zeal had not wasted with equal rage the habitations and the temples of the guiltless subject. The recovery of three hundred Roman standards, and the deliverance of the numerous captives of Edessa and Alexandria, reflect a purer glory on the arms of Heraclius. From the palace of Dastagerd,[126](#) he pursued his march within a few miles of Modain or Ctesiphon, till he was stopped, on the banks of the Arba, by the difficulty of the passage, the rigour of the season, and perhaps the fame of an impregnable capital.[126a](#) The return of the emperor is marked by the modern name of the city of Sherhzour; he fortunately passed Mount Zara before the snow, which fell incessantly thirty-four days; and the citizens of Gandzaca, or Tauris, were compelled to entertain his soldiers and their horses with an hospitable reception.[127](#)

When the ambition of Chosroes was reduced to the defence of his hereditary kingdom, the love of glory, or even the sense of shame, should have urged him to meet his rival in the field. In the battle of Nineveh, his courage might have taught the Persians to vanquish, or he might have fallen with honour by the lance of a Roman emperor. The successor of Cyrus chose rather, at a secure distance, to expect the event, to assemble the relics of the defeat, and to retire by measured steps before the march of Heraclius, till he beheld with a sigh the once loved mansions of Dastagerd. Both his friends and enemies were persuaded that it was the intention of Chosroes to bury himself under the ruins of the city and palace; and, as both might have been equally adverse to his flight, the monarch of Asia, with Sira and three concubines, escaped through an hole in the wall nine days before the arrival of the Romans. The slow and stately procession in which he shewed himself to the prostrate crowd was changed to a rapid and secret

journey; and the first evening he lodged in the cottage of a peasant, whose humble door would scarcely give admittance to the Great King.¹²⁸ His superstition was subdued by fear; on the third day, he entered with joy the fortifications of Ctesiphon; yet he still doubted of his safety till he had opposed the river Tigris to the pursuit of the Romans. The discovery of his flight agitated with terror and tumult the palace, the city, and the camp of Dastagerd; the satraps hesitated whether they had most to fear from their sovereign or the enemy; and the females of the harem were astonished and pleased by the sight of mankind, till the jealous husbands of three thousand wives again confined them to a more distant castle. At his command the army of Dastagerd retreated to a new camp: the front was covered by the Arba, and a line of two hundred elephants; the troops of the more distant provinces successively arrived; and the vilest domestics of the king nad satraps were enrolled for the last defence of the throne. It was still in the power of Chosroes to obtain a reasonable peace; and he was repeatedly pressed by the messengers of Heraclius to spare the blood of his subjects, and to relieve an humane conqueror from the painful duty of carrying fire and sword through the fairest countries of Asia. But the pride of the Persian had not yet sunk to the level of his fortune; he derived a momentary confidence from the retreat of the emperor; he wept with impotent rage over the ruins of his Assyrian palaces; and disregarded too long the rising murmurs of the nation, who complained that their lives and fortunes were sacrificed to the obstinacy of an old man. That unhappy old man was himself tortured with the sharpest pains both of mind and body; and, in the consciousness of his approaching end, he resolved to fix a tiara on the head of Merdaza, the most favoured of his sons. But the will of Chosroes was no longer revered, and Siroes, who gloried in the rank and merit of his mother Sira, had conspired with the malecontents to assert and anticipate the rights of primogeniture.¹²⁹ Twenty-two satraps, they styled themselves patriots, were tempted by the wealth and honours of a new reign: to the soldiers, the heir of Chosroes promised an increase of pay; to the Christians the free exercise of their religion; to the captives liberty and rewards; and to the nation instant peace and the reduction of taxes. It was determined by the conspirators that Siroes, with the ensigns of royalty, should appear in the camp; and, if the enterprise should fail, his escape was contrived to the Imperial court. But the new monarch was saluted with unanimous acclamations; the flight of Chosroes (yet where could he have fled?) was rudely arrested, eighteen sons were massacred before his face, and he was thrown into a dungeon, where he expired on the fifth day. The Greeks and modern Persians minutely describe how Chosroes was insulted, and famished, and tortured, by the command of an inhuman son, who so far surpassed the example of his father; but at the time of his death, what tongue could relate the story of the parricide? what eye could penetrate into the *tower of darkness*? According to the faith and mercy of his Christian enemies, he sunk without hope into a still deeper abyss;¹³⁰ and it will not be denied that tyrants of every age and sect are the best entitled to such infernal abodes. The glory of the house of Sassan ended with the life of Chosroes; his unnatural son enjoyed only eight months the fruit of his crimes; and in the space of four years the regal title was assumed by nine candidates, who disputed, with the sword or dagger,

the fragments of an exhausted monarchy. Every province and each city of Persia was the scene of independence, of discord, and of blood, and the state of anarchy prevailed about eight years longer, till the factions were silenced and united under the common yoke of the Arabian caliphs.[131](#)

As soon as the mountains became passable, the emperor received the welcome news of the success of the conspiracy, the death of Chosroes, and the elevation of his eldest son to the throne of Persia. The authors of the revolution, eager to display their merits in the court or camp of Tauris, preceded the ambassadors of Siroes, who delivered the letters of their master to his *brother* the emperor of the Romans.[132](#) In the language of the usurpers of every age, he imputes his own crimes to the Deity, and, without degrading his equal majesty, he offers to reconcile the long discord of the two nations, by a treaty of peace and alliance more durable than brass or iron. The conditions of the treaty were easily defined and faithfully executed. In the recovery of the standards and prisoners which had fallen into the hands of the Persians, the emperor imitated the example of Augustus: their care of the national dignity was celebrated by the poets of the times; but the decay of genius may be measured by the distance between Horace and George of Pisidia: the subjects and brethren of Heraclius were redeemed from persecution, slavery, and exile; but, instead of the Roman eagles, the true wood of the holy cross was restored to the importunate demands of the successor of Constantine. The victor was not ambitious of enlarging the weakness of the empire; the son of Chosroes abandoned without regret the conquests of his father; the Persians who evacuated the cities of Syria and Egypt were honourably conducted to the frontier; and a war which had wounded the vitals of the two monarchies produced no change in their external and relative situation. The return of Heraclius from Tauris to Constantinople was a perpetual triumph; and, after the exploits of six glorious campaigns, he peaceably enjoyed the sabbath of his toils. After a long impatience, the senate, the clergy, and the people went forth to meet their hero, with tears and acclamations, with olive branches and innumerable lamps; he entered the capital in a chariot drawn by four elephants; and, as soon as the emperor could disengage himself from the tumult of public joy, he tasted more genuine satisfaction in the embraces of his mother and his son.[133](#)

The succeeding year was illustrated by a triumph of a very different kind, the restitution of the true cross to the holy sepulchre. Heraclius performed in person the pilgrimage of Jerusalem, the identity of the relic was verified by the discreet patriarch,[134](#) and this august ceremony has been commemorated by the annual festival of the exaltation of the cross. Before the emperor presumed to tread the consecrated ground, he was instructed to strip himself of the diadem and purple, the pomp and vanity of the world; but in the judgment of his clergy the persecution of the Jews was more easily reconciled with the precepts of the gospel. He again ascended his throne to receive the congratulations of the ambassadors of France and India; and the fame of

Moses, Alexander, and Hercules¹³⁵ was eclipsed, in the popular estimation, by the superior merit and glory of the great Heraclius. Yet the deliverer of the East was indigent and feeble. Of the Persian spoils the most valuable portion had been expended in the war, distributed to the soldiers, or buried, by an unlucky tempest, in the waves of the Euxine. The conscience of the emperor was oppressed by the obligation of restoring the wealth of the clergy, which he had borrowed for their own defence; a perpetual fund was required to satisfy these inexorable creditors; the provinces, already wasted by the arms and avarice of the Persians, were compelled to a second payment of the same taxes; and the arrears of a simple citizen, the treasurer of Damascus, were commuted to a fine of one hundred thousand pieces of gold. The loss of two hundred thousand soldiers¹³⁶ who had fallen by the sword was of less fatal importance than the decay of arts, agriculture, and population, in this long and destructive war; and, although a victorious army had been formed under the standard of Heraclius, the unnatural effort appears to have exhausted rather than exercised their strength. While the emperor triumphed at Constantinople or Jerusalem, an obscure town on the confines of Syria was pillaged by the Saracens, and they cut in pieces some troops who advanced to its relief: an ordinary and trifling occurrence, had it not been the prelude of a mighty revolution. These robbers were the apostles of Mahomet; their fanatic valour had emerged from the desert; and in the last eight years of his reign Heraclius lost to the Arabs the same provinces which he had rescued from the Persians.

CHAPTER XLVII

Theological History of the Doctrine of the Incarnation — The Human and Divine Nature of Christ — Enmity of the Patriarchs of Alexandria and Constantinople — St. Cyril and Nestorius — Third General Council of Ephesus — Heresy of Eutyches — Fourth General Council of Chalcedon — Civil and Ecclesiastical Discord — Intolerance of Justinian — The Three Chapters — The Monothelite Controversy — State of the Oriental Sects — I. The Nestorians — II. The Jacobites — III. The Maronites — IV. The Armenians — V. The Copts and Abyssinians

After the extinction of paganism, the Christians in peace and piety might have enjoyed their solitary triumph. But the principle of discord was alive in their bosom, and they were more solicitous to explore the nature, than to practise the laws, of their founder. I have already observed that the disputes of the Trinity were succeeded by those of the Incarnation: alike scandalous to the church, alike pernicious to the state, still more minute in their origin, still more durable in their effects. It is my design to comprise in the present chapter a religious war of two hundred and fifty years, to represent the ecclesiastical and political schism of the Oriental sects, and to introduce their clamorous or sanguinary contests by a modest inquiry into the doctrines of the

primitive church.[1](#)

I. A laudable regard for the honour of the first proselytes has countenanced the belief, the hope, the wish, that the Ebionites, or at least the Nazarenes, were distinguished only by their obstinate perseverance in the practice of the Mosaic rites. Their churches have disappeared, their books are obliterated; their obscure freedom might allow a latitude of faith, and the softness of their infant creed would be variously moulded by the zeal or prudence of three hundred years. Yet the most charitable criticism must refuse these sectaries any knowledge of the pure and proper divinity of Christ. Educated in the school of Jewish prophecy and prejudice, they had never been taught to elevate their hopes above an human and temporal Messiah.[2](#) If they had courage to hail their king when he appeared in a plebeian garb, their grosser apprehensions were incapable of discerning their God, who had studiously disguised his celestial character under the name and person of a mortal.[3](#) The familiar companions of Jesus of Nazareth conversed with their friend and countryman, who, in all the actions of rational and animal life, appeared of the same species with themselves. His progress from infancy to youth and manhood was marked by a regular increase in stature and wisdom; and, after a painful agony of mind and body, he expired on the cross. He lived and died for the service of mankind; but the life and death of Socrates had likewise been devoted to the cause of religion and justice; and, although the stoic or the hero may disdain the humble virtues of Jesus, the tears which he shed over his friend and country may be esteemed the purest evidence of his humanity. The miracles of the gospel could not astonish a people who held, with intrepid faith, the more splendid prodigies of the Mosaic law. The prophets of ancient days had cured diseases, raised the dead, divided the sea, stopped the sun, and ascended to heaven in a fiery chariot. And the metaphorical style of the Hebrews might ascribe to a saint and martyr the adoptive title of Son of God.

Yet, in the insufficient creed of the Nazarenes and the Ebionites, a distinction is faintly noticed between the heretics, who confounded the generation of Christ in the common order of nature, and the less guilty schismatics, who revered the virginity of his mother and excluded the aid of an earthly father. The incredulity of the former was countenanced by the visible circumstances of his birth, the legal marriage of his reputed parents, Joseph and Mary, and his lineal claim to the kingdom of David and the inheritance of Judah. But the secret and authentic history has been recorded in several copies of the gospel according to St. Matthew,[4](#) which these sectaries long preserved in the original Hebrew,[5](#) as the sole evidence of their faith. The natural suspicions of the husband, conscious of his own chastity, were dispelled by the assurance (in a dream) that his wife was pregnant of the Holy Ghost; and, as this distant and domestic prodigy could not fall under the personal observation of the historian, he must have listened to the same voice which dictated to Isaiah the future conception of a virgin. The son of a virgin, generated by the ineffable operation of the

Holy Spirit, was a creature without example or resemblance, superior in every attribute of mind and body to the children of Adam. Since the introduction of the Greek or Chaldean philosophy,⁶ the Jews⁷ were persuaded of the pre-existence, transmigration, and immortality of souls; and Providence was justified by a supposition that they were confined in their earthly prisons to expiate the stains which they had contracted in a former state.⁸ But the degrees of purity and corruption are almost immeasurable. It may be fairly presumed that the most sublime and virtuous of human spirits was infused into the offspring of Mary and the Holy Ghost;⁹ that his abasement was the result of his voluntary choice; and that the object of his mission was to purify, not his own, but the sins of the world. On his return to his native skies, he received the immense reward of his obedience: the everlasting kingdom of the Messiah, which had been darkly foretold by the prophets, under the carnal images of peace, of conquest, and of dominion. Omnipotence could enlarge the human faculties of Christ to the extent of his celestial office. In the language of antiquity, the title of God has not been severely confined to the first parent, and his incomparable minister, his only begotten Son, might claim, without presumption, the religious, though secondary, worship of a subject world.

II. The seeds of the faith, which had slowly arisen in the rocky and ungrateful soil of Judea, were transplanted, in full maturity, to the happier climes of the Gentiles; and the strangers of Rome or Asia, who never beheld the manhood, were the more readily disposed to embrace the divinity, of Christ. The polytheist and the philosopher, the Greek and the Barbarian, were alike accustomed to conceive a long succession, an infinite chain of angels, or dæmons, or deities, or æons, or emanations, issuing from the throne of light. Nor could it seem strange or incredible that the first of these æons, the *Logos*, or Word of God, of the same substance with the Father, should descend upon earth to deliver the human race from vice and error and to conduct them in the paths of life and immortality. But the prevailing doctrine of the eternity and inherent pravity of matter infected the primitive churches of the East. Many among the Gentile proselytes refused to believe that a celestial spirit, an undivided portion of the first essence, had been personally united with a mass of impure and contaminated flesh; and, in their zeal for the divinity, they piously abjured the humanity, of Christ. While his blood was still recent on Mount Calvary,¹⁰ the *Docetes*, a numerous and learned sect of Asiatics, invented the *phantastic* system, which was afterwards propagated by the Marcionites, the Manichæans, and the various names of the Gnostic heresy.¹¹ They denied the truth and authenticity of the gospels, as far as they relate the conception of Mary, the birth of Christ, and the thirty years that preceded the exercise of his ministry. He first appeared on the banks of the Jordan in the form of perfect manhood; but it was a form only, and not a substance: an human figure created by the hand of Omnipotence to imitate the faculties and actions of a man and to impose a perpetual illusion on the senses of his friends and enemies. Articulate sounds vibrated on the ears of the disciples; but the image which was impressed on their optic nerve

eluded the more stubborn evidence of the touch, and they enjoyed the spiritual, not the corporeal, presence of the Son of God. The rage of the Jews was idly wasted against an impassive phantom; and the mystic scenes of the passion and death, the resurrection and ascension of Christ, were represented on the theatre of Jerusalem for the benefit of mankind. If it were urged that such ideal mimicry, such incessant deception, was unworthy of the God of truth, the Docetes agreed with too many of their orthodox brethren in the justification of pious falsehood. In the system of the Gnostics, the Jehovah of Israel, the creator of this lower world, was a rebellious, or at least an ignorant, spirit. The Son of God descended upon earth to abolish his temple and his law; and, for the accomplishment of this salutary end, he dexterously transferred to his own person the hope and prediction of a temporal Messiah.

One of the most subtle disputants of the Manichæan school has pressed the danger and indecency of supposing that the God of the Christians, in the state of an human fœtus, emerged at the end of nine months from a female womb. The pious horror of his antagonists provoked them to disclaim all sensual circumstances of conception and delivery; to maintain that the divinity passed through Mary like a sun-beam through a plate of glass; and to assert that the seal of her virginity remained unbroken even at the moment when she became the mother of Christ. But the rashness of these concessions has encouraged a milder sentiment of those of the Docetes, who taught, not that Christ was a phantom, but that he was clothed with an impassible and incorruptible body. Such, indeed, in the more orthodox system, he has acquired since his resurrection, and such he must have always possessed, if it were capable of pervading, without resistance or injury, the density of intermediate matter. Devoid of its most essential properties, it might be exempt from the attributes and infirmities of the flesh. A fœtus that could increase from an invisible point to its full maturity, a child that could attain the stature of perfect manhood, without deriving any nourishment from the ordinary sources, might continue to exist without repairing a daily waste by a daily supply of external matter. Jesus might share the repasts of his disciples without being subject to the calls of thirst or hunger; and his virgin purity was never sullied by the involuntary stains of sensual concupiscence. Of a body thus singularly constituted, a question would arise, by what means, and of what materials, it was originally framed; and our sounder theology is startled by an answer which was not peculiar to the Gnostics, that both the form and the substance proceeded from the divine essence. The idea of pure and absolute spirit is a refinement of modern philosophy; the incorporeal essence, ascribed by the ancients to human souls, celestial beings, and even the Deity himself, does not exclude the notion of extended space; and their imagination was satisfied with a subtle nature of air, or fire, or æther, incomparably more perfect than the grossness of the material world. If we define the place, we must describe the figure, of the Deity. Our experience, perhaps our vanity, represents the powers of reason and virtue under an human form. The Anthropomorphites, who swarmed among the monks of Egypt and the Catholics of Africa, could produce the express declaration of Scripture that man was made after the image of his Creator.¹² The venerable Serapion,

one of the saints of the Nitrian desert, relinquished, with many a tear, his darling prejudice; and bewailed, like an infant, his unlucky conversion, which had stolen away his God and left his mind without any visible object of faith or devotion.[13](#)

III. Such were the fleeting shadows of the Docetes. A more substantial, though less simple, hypothesis was contrived by Cerinthus of Asia,[14](#) who dared to oppose the last of the apostles. Placed on the confines of the Jewish and Gentile world, he laboured to reconcile the Gnostic with the Ebionite, by confessing in the same Messiah the supernatural union of a man and a God; and this mystic doctrine was adopted with many fanciful improvements by Carpocrates, Basilides, and Valentine,[15](#) the heretics of the Egyptian school. In their eyes, Jesus of Nazareth was a mere mortal, the legitimate son of Joseph and Mary; but he was the best and wisest of the human race, selected as the worthy instrument to restore upon earth the worship of the true and supreme Deity. When he was baptised in the Jordan, the Christ, the first of the æons, the Son of God himself, descended on Jesus in the form of a dove, to inhabit his mind and direct his actions during the allotted period of his ministry. When the Messiah was delivered into the hands of the Jews, the Christ, an immortal and impassible being, forsook his earthly tabernacle, flew back to the *pleroma* or world of spirits, and left the solitary Jesus to suffer, to complain, and to expire. But the justice and generosity of such a desertion are strongly questionable; and the fate of an innocent martyr, at first impelled, and at length abandoned, by his divine companion, might provoke the pity and indignation of the profane. Their murmurs were variously silenced by the sectaries who espoused and modified the double system of Cerinthus. It was alleged that, when Jesus was nailed to the cross, he was endowed with a miraculous apathy of mind and body, which rendered him insensible of his apparent sufferings. It was affirmed that these momentary though real pangs would be abundantly repaid by the temporal reign of a thousand years reserved for the Messiah in his kingdom of the new Jerusalem. It was insinuated that, if he suffered, he deserved to suffer; that human nature is never absolutely perfect; and that the cross and passion might serve to expiate the venial transgressions of the son of Joseph, before his mysterious union with the Son of God.[16](#)

IV. All those who believe the immateriality of the soul, a specious and noble tenet, must confess, from their present experience, the incomprehensible union of mind and matter. A similar union is not inconsistent with a much higher, or even with the highest degree, of mental faculties; and the incarnation of an æon or archangel, the most perfect of created spirits, does not involve any positive contradiction or absurdity. In the age of religious freedom, which was determined by the council of Nice, the dignity of Christ was measured by private judgment according to the indefinite rule of scripture, or reason, or tradition. But, when his pure and proper divinity had been established on the ruins of Arianism, the faith of the Catholics trembled on the edge of a precipice where it was impossible to recede, dangerous to

stand, dreadful to fall; and the manifold inconveniences of their creed were aggravated by the sublime character of their theology. They hesitated to pronounce *that* God himself, the second person of an equal and consubstantial trinity, was manifested in the flesh;¹⁷ *that* a being who pervades the universe had been confined in the womb of Mary; *that* his eternal duration had been marked by the days and months and years of human existence; *that* the Almighty had been scourged and crucified; *that* his impassible essence had felt pain and anguish; *that* his omniscience was not exempt from ignorance; and *that* the source of life and immortality expired on Mount Calvary. These alarming consequences were affirmed with unblushing simplicity by Apollinaris,¹⁸ bishop of Laodicea, and one of the luminaries of the church. The son of a learned grammarian, he was skilled in all the sciences of Greece; eloquence, erudition, and philosophy, conspicuous in the volumes of Apollinaris, were humbly devoted to the service of religion. The worthy friend of Athanasius, the worthy antagonist of Julian, he bravely wrestled with the Arians and Polytheists, and, though he affected the rigour of geometrical demonstration, his commentaries revealed the literal and allegorical sense of the scriptures. A mystery which had long floated in the looseness of popular belief was defined by his perverse diligence in a technical form; and he first proclaimed the memorable words, "One incarnate nature of Christ," which are still re-echoed with hostile clamours in the churches of Asia, Egypt, and Æthiopia. He taught that the Godhead was united or mingled with the body of a man; and that the *Logos*, the eternal wisdom, supplied in the flesh the place and office of an human soul. Yet, as the profound doctor had been terrified at his own rashness, Apollinaris was heard to mutter some faint accents of excuse and explanation. He acquiesced in the old distinction of the Greek philosophers between the rational and sensitive soul of man; that he might reserve the *Logos* for intellectual functions, and employ the subordinate human principle in the meaner actions of animal life. With the moderate Docetes, he revered Mary as the spiritual, rather than as the carnal, mother of Christ, whose body either came from heaven, impassible and incorruptible, or was absorbed, and as it were transformed, into the essence of the Deity. The system of Apollinaris was strenuously encountered by the Asiatic and Syrian divines, whose schools are honoured by the names of Basil, Gregory, and Chrysostom, and tainted by those of Diodorus, Theodore, and Nestorius. But the person of the aged bishop of Laodicea, his character and dignity, remained inviolate; and his rivals, since we may not suspect them of the weakness of toleration, were astonished, perhaps, by the novelty of the argument, and diffident of the final sentence of the Catholic church. Her judgment at length inclined in their favour; the heresy of Apollinaris was condemned, and the separate congregations of his disciples were proscribed by the Imperial laws. But his principles were secretly entertained in the monasteries of Egypt, and his enemies felt the hatred of Theophilus and Cyril, the successive patriarchs of Alexandria.

V. The grovelling Ebionite and the fantastic Docetes were rejected and forgotten; the recent zeal against the errors of Apollinaris reduced the Catholics to a seeming agreement with the double nature of Cerinthus. But, instead of a temporary and

occasional alliance, *they* established, and *we* still embrace, the substantial, indissoluble, and everlasting union of a perfect God with a perfect man, of the second person of the trinity with a reasonable soul and human flesh. In the beginning of the fifth century, the *unity of the two natures* was the prevailing doctrine of the church. On all sides it was confessed that the mode of their co-existence could neither be represented by our ideas nor expressed by our language. Yet a secret and incurable discord was cherished between those who were most apprehensive of confounding, and those who were most fearful of separating, the divinity and the humanity of Christ. Impelled by religious frenzy, they fled with adverse haste from the error which they mutually deemed most destructive of truth and salvation. On either hand they were anxious to guard, they were jealous to defend, the union and the distinction of the two natures, and to invent such forms of speech, such symbols of doctrine, as were least susceptible of doubt or ambiguity. The poverty of ideas and language tempted them to ransack art and nature for every possible comparison, and each comparison misled their fancy in the explanation of an incomparable mystery. In the polemic microscope an atom is enlarged to a monster, and each party was skilful to exaggerate the absurd or impious conclusions that might be extorted from the principles of their adversaries. To escape from each other, they wandered through many a dark and devious thicket, till they were astonished by the horrid phantoms of Cerinthus and Apollinaris, who guarded the opposite issues of the theological labyrinth. As soon as they beheld the twilight of sense and heresy, they started, measured back their steps, and were again involved in the gloom of impenetrable orthodoxy. To purge themselves from the guilt or reproach of damnable error, they disavowed their consequences, explained their principles, excused their indiscretions, and unanimously pronounced the sounds of concord and faith. Yet a latent and almost invisible spark still lurked among the embers of controversy: by the breath of prejudice and passion, it was quickly kindled to a mighty flame, and the verbal disputes¹⁹ of the Oriental sects have shaken the pillars of the church and state.

The name of Cyril of Alexandria is famous in controversial story, and the title of *saint* is a mark that his opinions and his party have finally prevailed. In the house of his uncle, the archbishop Theophilus, he imbibed the orthodox lessons of zeal and dominion, and five years of his youth were profitably spent in the adjacent monasteries of Nitria. Under the tuition of the abbot Serapion, he applied himself to ecclesiastical studies with such indefatigable ardour, that in the course of *one* sleepless night he has perused the four gospels, the catholic epistles, and the epistle to the Romans. Origen he detested; but the writings of Clemens and Dionysius, of Athanasius and Basil, were continually in his hands; by the theory and practice of dispute, his faith was confirmed and his wit was sharpened; he extended round his cell the cobwebs of scholastic theology, and meditated the works of allegory and metaphysics, whose remains, in seven verbose folios, now peaceably slumber by the side of their rivals.²⁰ Cyril prayed and fasted in the desert, but his thoughts (it is the reproach of a friend²¹) were still fixed on the world; and the call of Theophilus, who summoned him to the tumult of

cities and synods, was too readily obeyed by the aspiring hermit. With the approbation of his uncle, he assumed the office, and acquired the fame, of a popular preacher. His comely person adorned the pulpit, the harmony of his voice resounded in the cathedral, his friends were stationed to lead or second the applause of the congregation,[22](#) and the hasty notes of the scribes preserved his discourses, which in their effect, though not in their composition, might be compared with those of the Athenian orators. The death of Theophilus expanded and realised the hopes of his nephew. The clergy of Alexandria was divided; the soldiers and their general supported the claims of the archdeacon; but a resistless multitude, with voices and with hands, asserted the cause of their favourite; and, after a period of thirty-nine years, Cyril was seated on the throne of Athanasius.[23](#)

The prize was not unworthy of his ambition. At a distance from the court, and at the head of an immense capital, the patriarch, as he was now styled, of Alexandria had gradually usurped the state and authority of a civil magistrate. The public and private charities of the city were managed by his discretion; his voice inflamed or appeased the passions of the multitude; his commands were blindly obeyed by his numerous and fanatic *parabolani*,[24](#) familiarised in their daily office with scenes of death; and the prefects of Egypt were awed or provoked by the temporal power of these Christian pontiffs. Ardent in the prosecution of heresy, Cyril auspiciously opened his reign by oppressing the Novatians, the most innocent and harmless of the sectaries. The interdiction of their religious worship appeared in his eyes a just and meritorious act; and he confiscated their holy vessels, without apprehending the guilt of sacrilege. The toleration and even the privileges of the Jews, who had multiplied to the number of forty thousand, were secured by the laws of the Cæsars and Ptolemies and a long prescription of seven hundred years since the foundation of Alexandria. Without any legal sentence, without any royal mandate, the patriarch, at the dawn of day, led a seditious multitude to the attack of the synagogues. Unarmed and unprepared, the Jews were incapable of resistance; their houses of prayer were levelled with the ground; and the episcopal warrior, after rewarding his troops with the plunder of their goods, expelled from the city the remnant of the unbelieving nation. Perhaps he might plead the insolence of their prosperity, and their deadly hatred of the Christians, whose blood they had recently shed in a malicious or accidental tumult. Such crimes would have deserved the animadversion of the magistrate; but in this promiscuous outrage, the innocent were confounded with the guilty, and Alexandria was impoverished by the loss of a wealthy and industrious colony. The zeal of Cyril exposed him to the penalties of the Julian law; but in a feeble government and a superstitious age he was secure of impunity, and even of praise. Orestes complained; but his just complaints were too quickly forgotten by the ministers of Theodosius, and too deeply remembered by a priest who affected to pardon, and continued to hate, the prefect of Egypt. As he passed through the streets, his chariot was assaulted by a band of five hundred of the Nitrian monks; his guards fled from the wild beasts of the desert; his protestations that he was a Christian and a Catholic were answered by a volley of stones, and the face of

Orestes was covered with blood. The loyal citizens of Alexandria hastened to his rescue; he instantly satisfied his justice and revenge against the monk by whose hand he had been wounded, and Ammonius expired under the rod of the lictor. At the command of Cyril, his body was raised from the ground and transported in solemn procession to the cathedral; the name of Ammonius was changed to that of Thaumasius the *wonderful*; his tomb was decorated with the trophies of martyrdom; and the patriarch ascended the pulpit to celebrate the magnanimity of an assassin and a rebel. Such honours might incite the faithful to combat and die under the banners of the saint; and he soon prompted, or accepted, the sacrifice of a virgin, who professed the religion of the Greeks, and cultivated the friendship of Orestes. Hypatia, the daughter of Theon the mathematician,[25](#) was initiated in her father's studies; her learned comments have elucidated the geometry of Apollonius and Diophantus, and she publicly taught, both at Athens and Alexandria, the philosophy of Plato and Aristotle. In the bloom of beauty and in the maturity of wisdom, the modest maid refused her lovers and instructed her disciples; the persons most illustrious for their rank or merit were impatient to visit the female philosopher; and Cyril beheld, with a jealous eye, the gorgeous train of horses and slaves who crowded the door of her academy. A rumour was spread among the Christians that the daughter of Theon was the only obstacle to the reconciliation of the prefect and the archbishop; and that obstacle was speedily removed. On a fatal day, in the holy season of Lent, Hypatia was torn from her chariot, stripped naked, dragged to the church, and inhumanly butchered by the hands of Peter the reader and a troop of savage and merciless fanatics; her flesh was scraped from her bones with sharp oyster shells,[26](#) and her quivering limbs were delivered to the flames. The just progress of inquiry and punishment was stopped by seasonable gifts; but the murder of Hypatia has imprinted an indelible stain on the character and religion of Cyril of Alexandria.[27](#)

Superstition, perhaps, would more gently expiate the blood of a virgin than the banishment of a saint; and Cyril had accompanied his uncle to the iniquitous synod of the Oak. When the memory of Chrysostom was restored and consecrated, the nephew of Theophilus, at the head of a dying faction, still maintained the justice of his sentence; nor was it till after a tedious delay and an obstinate resistance that he yielded to the consent of the Catholic world.[28](#) His enmity to the Byzantine pontiffs[29](#) was a sense of interest, not a sally of passion; he envied their fortunate station in the sunshine of the Imperial court; and he dreaded their upstart ambition, which oppressed the metropolitans of Europe and Asia, invaded the provinces of Antioch and Alexandria, and measured their diocese by the limits of the empire. The long moderation of Atticus, the mild usurper of the throne of Chrysostom, suspended the animosities of the Eastern patriarchs; but Cyril was at length awakened by the exaltation of a rival more worthy of his esteem and hatred. After the short and troubled reign of Sisinnius bishop of Constantinople, the factions of the clergy and people were appeased by the choice of the emperor, who, on this occasion, consulted the voice of fame, and invited

the merit of a stranger. Nestorius,^{[30](#)} a native of Germanicia and a monk of Antioch, was recommended by the austerity of his life and the eloquence of his sermons; but the first homily which he preached before the devout Theodosius betrayed the acrimony and impatience of his zeal. "Give me, O Cæsar!" he exclaimed, "give me the earth purged of heretics, and I will give you in exchange the kingdom of heaven. Exterminate with me, the heretics; and with you, I will exterminate the Persians." On the fifth day, as if the treaty had been already signed, the patriarch of Constantinople discovered, surprised, and attacked a secret conventicle of the Arians; they preferred death to submission; the flames that were kindled by their despair soon spread to the neighbouring houses, and the triumph of Nestorius was clouded by the name of *incendiary*. On either side of the Hellespont, his episcopal vigour imposed a rigid formulary of faith and discipline; a chronological error concerning the festival of Easter was punished as an offence against the church and state. Lydia and Caria, Sardes and Miletus, were purified with the blood of the obstinate Quartodecimans; and the edict of the emperor, or rather of the patriarch, enumerates three and twenty degrees and denominations in the guilt and punishment of heresy.^{[31](#)} But the sword of persecution, which Nestorius so furiously wielded, was soon turned against his own breast. Religion was the pretence; but, in the judgment of a contemporary saint, ambition was the genuine motive of episcopal warfare.^{[32](#)}

Cathedral of St. Sophia, Constantinople (from a photograph)

In the Syrian school, Nestorius had been taught to abhor the confusion of the two

natures, and nicely to discriminate the humanity of his *master* Christ from the divinity of the *Lord* Jesus.^{[33](#)} The Blessed Virgin he revered as the mother of Christ, but his ears were offended with the rash and recent title of mother of God,^{[34](#)} which had been insensibly adopted since the origin of the Arian controversy. From the pulpit of Constantinople, a friend of the patriarch, and afterwards the patriarch himself, repeatedly preached against the use, or the abuse, of a word^{[35](#)} unknown to the apostles, unauthorised by the church, and which could only tend to alarm the timorous, to mislead the simple, to amuse the profane, and to justify, by a seeming resemblance, the old genealogy of Olympus.^{[36](#)} In his calmer moments Nestorius confessed that it might be tolerated or excused by the union of the two natures and the communication of their *idioms*;^{[37](#)} but he was exasperated, by contradiction, to disclaim the worship of a new-born, an infant Deity, to draw his inadequate similes from the conjugal or civil partnerships of life, and to describe the manhood of Christ as the robe, the instrument, the tabernacle of his Godhead. At these blasphemous sounds, the pillars of the sanctuary were shaken. The unsuccessful competitors of Nestorius indulged their pious or personal resentments; the Byzantine clergy was secretly displeased with the intrusion of a stranger; whatever is superstitious or absurd, might claim the protection of the monks; and the people were interested in the glory of their virgin patroness.^{[38](#)} The sermons of the archbishop and the service of the altar were disturbed by seditious clamour; his authority and doctrine were renounced by separate congregations; every wind scattered round the empire the leaves of controversy; and the voice of the combatants on a sonorous theatre re-echoed in the cells of Palestine and Egypt. It was the duty of Cyril to enlighten the zeal and ignorance of his innumerable monks: in the school of Alexandria, he had imbibed and professed the incarnation of one nature; and the successor of Athanasius consulted his pride and ambition when he rose in arms against another Arius, more formidable and more guilty, on the second throne of the hierarchy. After a short correspondence, in which the rival prelates disguised their hatred in the hollow language of respect and charity, the patriarch of Alexandria denounced to the prince and people, to the East and to the West, the damnable errors of the Byzantine pontiff. From the East, more especially from Antioch, he obtained the ambiguous counsels of toleration and silence, which were addressed to both parties while they favoured the cause of Nestorius. But the Vatican received with open arms the messengers of Egypt. The vanity of Celestine was flattered by the appeal; and the partial version of a monk decided the faith of the pope, who, with his Latin clergy, was ignorant of the language, the arts, and the theology of the Greeks. At the head of an Italian synod, Celestine weighed the merits of the cause, approved the creed of Cyril, condemned the sentiments and person of Nestorius, degraded the heretic from his episcopal dignity, allowed a respite of ten days for recantation and penance, and delegated to his enemy the execution of this rash and illegal sentence. But the patriarch of Alexandria, whilst he darted the thunders of a god, exposed the errors and passions of a mortal; and his twelve anathemas^{[39](#)} still torture the orthodox slaves who adore the memory of a saint, without forfeiting their allegiance to the synod of Chalcedon. These

bold assertions are indelibly tinged with the colours of the Apollinarian heresy; but the serious, and perhaps the sincere, professions of Nestorius have satisfied the wiser and less partial theologians of the present times.[40](#)

Yet neither the emperor nor the primate of the East were disposed to obey the mandate of an Italian priest; and a synod of the Catholic, or rather of the Greek, church was unanimously demanded as the sole remedy that could appease or decide this ecclesiastical quarrel.[41](#) Ephesus, on all sides accessible by sea and land, was chosen for the place, the festival of Pentecost for the day, of the meeting; a writ of summons was despatched to each metropolitan, and a guard was stationed to protect and confine the fathers till they should settle the mysteries of heaven and the faith of the earth. Nestorius appeared, not as a criminal, but as a judge; he depended on the weight rather than the number of his prelates; and his sturdy slaves from the baths of Zeuxippus were armed for every service of injury or defence. But his adversary Cyril was more powerful in the weapons both of the flesh and of the spirit. Disobedient to the letter, or at least to the meaning, of the royal summons, he was attended by fifty Egyptian bishops, who expected from their patriarch's nod the inspiration of the Holy Ghost. He had contracted an intimate alliance with Memnon bishop of Ephesus. The despotic primate of Asia disposed of the ready succours of thirty or forty episcopal votes; a crowd of peasants, the slaves of the church, was poured into the city to support with blows and clamours a metaphysical argument; and the people zealously asserted the honour of the virgin, whose body reposed within the walls of Ephesus.[42](#) The fleet which had transported Cyril from Alexandria was laden with the riches of Egypt; and he disembarked a numerous body of mariners, slaves, and fanatics, enlisted with blind obedience under the banner of St. Mark and the mother of God. The fathers, and even the guards, of the council were awed by this martial array; the adversaries of Cyril and Mary were insulted in the streets or threatened in their houses; his eloquence and liberality made a daily increase in the number of his adherents; and the Egyptian soon computed that he might command the attendance and the voices of two hundred bishops.[43](#) But the author of the twelve anathemas foresaw and dreaded the opposition of John of Antioch, who with a small, though respectable, train of metropolitans and divines was advancing by slow journeys from the distant capital of the East. Impatient of a delay which he stigmatised as voluntary and culpable,[44](#) Cyril announced the opening of the synod sixteen days after the festival of Pentecost. Nestorius, who depended on the near approach of his Eastern friends, persisted, like his predecessor Chrysostom, to disclaim the jurisdiction and to disobey the summons of his enemies; they hastened his trial, and his accuser presided in the seat of judgment. Sixty-eight bishops, twenty-two of metropolitan rank, defended his cause by a modest and temperate protest; they were excluded from the counsels of their brethren. Candidian, in the emperor's name, requested a delay of four days; the profane magistrate was driven with outrage and insult from the assembly of the saints. The whole of this momentous transaction was crowded into the compass of a summer's day; the bishops

delivered their separate opinions; but the uniformity of style reveals the influence or the hand of a master, who had been accused of corrupting the public evidence of their acts and subscriptions.⁴⁵ Without a dissenting voice, they recognised in the epistles of Cyril the Nicene creed and the doctrine of the fathers: but the partial extracts from the letters and homilies of Nestorius were interrupted by curses and anathemas; and the heretic was degraded from his episcopal and ecclesiastical dignity. The sentence, maliciously inscribed to the new Judas, was affixed and proclaimed in the streets of Ephesus; the weary prelates, as they issued from the church of the mother of God, were saluted as her champions; and her victory was celebrated by the illuminations, the songs, and the tumult of the night.

On the fifth day, the triumph was clouded by the arrival and indignation of the Eastern bishops. In a chamber of the inn, before he had wiped the dust from his shoes, John of Antioch gave audience to Candidian the Imperial minister; who related his ineffectual efforts to prevent or to annul the hasty violence of the Egyptian. With equal haste and violence, the Oriental synod of fifty bishops degraded Cyril and Memnon from their episcopal honours, condemned, in the twelve anathemas, the purest venom of the Apollinarian heresy, and described the Alexandrian primate as a monster, born and educated for the destruction of the church.⁴⁶ His throne was distant and inaccessible; but they instantly resolved to bestow on the flock of Ephesus the blessing of a faithful shepherd. By the vigilance of Memnon, the churches were shut against them, and a strong garrison was thrown into the cathedral. The troops, under the command of Candidian, advanced to the assault; the outguards were routed and put to the sword; but the place was impregnable: the besiegers retired; their retreat was pursued by a vigorous sally; they lost their horses, and many of the soldiers were dangerously wounded with clubs and stones. Ephesus, the city of the Virgin, was defiled with rage and clamour, with sedition and blood; the rival synods darted anathemas and excommunications from their spiritual engines; and the court of Theodosius was perplexed by the adverse and contradictory narratives of the Syrian and Egyptian factions. During a busy period of three months, the emperor tried every method, except the most effectual means of indifference and contempt, to reconcile this theological quarrel. He attempted to remove or intimidate the leaders by a common sentence of acquittal or condemnation; he invested his representatives at Ephesus with ample power and military force; he summoned from either party eight chosen deputies to a free and candid conference in the neighbourhood of the capital, far from the contagion of popular frenzy. But the Orientals refused to yield, and the Catholics, proud of their numbers and of their Latin allies, rejected all terms of union or toleration. The patience of the meek Theodosius was provoked, and he dissolved, in anger, this episcopal tumult, which at the distance of thirteen centuries assumes the venerable aspect of the third œcumenical council.⁴⁷ “God is my witness,” said the pious prince, “that I am not the author of this confusion. His providence will discern and punish the guilty. Return to your provinces, and may your private virtues repair the mischief and scandal of your meeting.” They returned to their provinces; but the same passions which had distracted

the synod of Ephesus were diffused over the Eastern world. After three obstinate and equal campaigns, John of Antioch and Cyril of Alexandria condescended to explain and embrace; but their seeming re-union must be imputed rather to prudence than to reason, to the mutual lassitude rather than to the Christian charity of the patriarchs.

The Byzantine pontiff had instilled into the royal ear a baleful prejudice against the character and conduct of his Egyptian rival. An epistle of menace and invective,[48](#) which accompanied the summons, accused him as a busy, insolent, and envious priest, who perplexed the simplicity of the faith, violated the peace of the church and state, and, by his artful and separate addresses to the wife and sister of Theodosius, presumed to suppose, or to scatter, the seeds of discord in the Imperial family. At the stern command of his sovereign, Cyril had repaired to Ephesus, where he was resisted, threatened, and confined by the magistrates in the interest of Nestorius and the Orientals; who assembled the troops of Lydia and Ionia to suppress the fanatic and disorderly train of the patriarch. Without expecting the royal licence, he escaped from his guards, precipitately embarked, deserted the imperfect synod, and retired to his episcopal fortress of safety and independence. But his artful emissaries, both in the court and city, successfully laboured to appease the resentment, and to conciliate the favour, of the emperor. The feeble son of Arcadius was alternately swayed by his wife and sister, by the eunuchs and women of the palace; superstition and avarice were their ruling passions; and the orthodox chiefs were assiduous in their endeavours to alarm the former and to gratify the latter. Constantinople and the suburbs were sanctified with frequent monasteries, and the holy abbots, Dalmatius and Eutyches,[49](#) had devoted their zeal and fidelity to the cause of Cyril, the worship of Mary, and the unity of Christ. From the first moment of their monastic life, they had never mingled with the world, or trod the profane ground of the city. But in this awful moment of the danger of the church, their vow was superseded by a more sublime and indispensable duty. At the head of a long order of monks and hermits, who carried burning tapers in their hands and chaunted litanies to the mother of God, they proceeded from their monasteries to the palace. The people was edified and inflamed by this extraordinary spectacle, and the trembling monarch listened to the prayers and adjurations of the saints, who boldly pronounced that none could hope for salvation unless they embraced the person and the creed of the orthodox successor of Athanasius. At the same time every avenue of the throne was assaulted with gold. Under the decent names of *eulogies* and *benedictions*, the courtiers of both sexes were bribed according to the measure of their power and rapaciousness. But their incessant demands despoiled the sanctuaries of Constantinople and Alexandria; and the authority of the patriarch was unable to silence the just murmur of his clergy, that a debt of sixty thousand pounds had already been contracted to support the expense of this scandalous corruption.[50](#) Pulcheria, who relieved her brother from the weight of an empire, was the firmest pillar of orthodoxy; and so intimate was the alliance between the thunders of the synod and the whispers of the court that Cyril was assured of success if he could displace one eunuch and substitute another in the favour of Theodosius. Yet the

Egyptian could not boast of a glorious or decisive victory. The Emperor, with unaccustomed firmness, adhered to his promise of protecting the innocence of the Oriental bishops; and Cyril softened his anathemas, and confessed, with ambiguity and reluctance, a twofold nature of Christ, before he was permitted to satiate his revenge against the unfortunate Nestorius.[51](#)

The rash and obstinate Nestorius, before the end of the synod, was oppressed by Cyril, betrayed by the court, and faintly supported by his Eastern friends. A sentiment of fear or indignation prompted him, while it was yet time, to affect the glory of a voluntary abdication;[52](#) his wish, or at least his request, was readily granted; he was conducted with honour from Ephesus to his old monastery of Antioch; and, after a short pause, his successors, Maximian and Proclus, were acknowledged as the lawful bishops of Constantinople. But in the silence of his cell the degraded patriarch could no longer resume the innocence and security of a private monk. The past he regretted, he was discontented with the present, and the future he had reason to dread; the Oriental bishops successively disengaged their cause from his unpopular name; and each day decreased the number of the schismatics who revered Nestorius as the confessor of the faith. After a residence at Antioch of four years, the hand of Theodosius subscribed an edict,[53](#) which ranked him with Simon the magician, proscribed his opinions and followers, condemned his writings to the flames, and banished his person first to Petra in Arabia, and at length to Oasis, one of the *islands* of the Libyan desert.[54](#) Secluded from the church and from the world, the exile was still pursued by the rage of bigotry and war. A wandering tribe of the Blemmyes, or Nubians, invaded his solitary prison; in their retreat they dismissed a crowd of useless captives; but no sooner had Nestorius reached the banks of the Nile than he would gladly have escaped from a Roman and orthodox city to the milder servitude of the savages. His flight was punished as a new crime; the soul of the patriarch inspired the civil and ecclesiastical powers of Egypt; the magistrates, the soldiers, the monks, devoutly tortured the enemy of Christ and St. Cyril; and, as far as the confines of Æthiopia, the heretic was alternately dragged and recalled, till his aged body was broken by the hardships and accidents of these reiterated journeys. Yet his mind was still independent and erect; the president of Thebais was awed by his pastoral letters; he survived the Catholic tyrant of Alexandria, and, after sixteen years' banishment, the synod of Chalcedon would perhaps have restored him to the honours, or at least to the communion, of the church. The death of Nestorius prevented his obedience to their welcome summons;[55](#) and his disease might afford some colour to the scandalous report that his tongue, the organ of blasphemy, had been eaten by the worms. He was buried in a city of Upper Egypt, known by the names of Chemnis, or Panopolis, or Akmim;[56](#) but the immortal malice of the Jacobites has persevered for ages to cast stones against his sepulchre, and to propagate the foolish tradition that it was never watered by the rain of heaven, which equally descends on the righteous and the ungodly.[57](#) Humanity may drop a tear on the fate of Nestorius; yet justice must observe that he suffered the persecution which

he had approved and inflicted.[58](#)

The death of the Alexandrian primate, after a reign of thirty-two years, abandoned the Catholics to the intemperance of zeal and the abuse of victory.[59](#) The *monophysite* doctrine (one incarnate nature) was rigorously preached in the churches of Egypt and the monasteries of the East; the primitive creed of Apollinaris was protected by the sanctity of Cyril; and the name of Eutyches, his venerable friend, has been applied to the sect most adverse to the Syrian heresy of Nestorius. His rival, Eutyches, was the abbot, or archimandrite, or superior of three hundred monks, but the opinions of a simple and illiterate recluse might have expired in the cell, where he had slept above seventy years, if the resentment or indiscretion of Flavian, the Byzantine pontiff, had not exposed the scandal to the eyes of the Christian world. His domestic synod was instantly convened, their proceedings were sullied with clamour and artifice, and the aged heretic was surprised into a seeming confession that Christ had not derived his body from the substance of the Virgin Mary. From their partial decree, Eutyches appealed to a general council; and his cause was vigorously asserted by his godson Chrysaphius, the reigning eunuch of the palace, and his accomplice Dioscorus, who had succeeded to the throne, the creed, the talents, and the vices of the nephew of Theophilus. By the special summons of Theodosius, the second synod of Ephesus was judiciously composed of ten metropolitans and ten bishops from each of the six dioceses of the Eastern empire; some exceptions of favour or merit enlarged the number to one hundred and thirty-five; and the Syrian Barsumas, as the chief and representative of the monks, was invited to sit and vote with the successors of the apostles. But the despotism of the Alexandrian patriarch again oppressed the freedom of debate; the same spiritual and carnal weapons were again drawn from the arsenals of Egypt; the Asiatic veterans, a band of archers, served under the orders of Dioscorus; and the more formidable monks, whose minds were inaccessible to reason or mercy, besieged the doors of the cathedral. The general and, as it should seem, the unconstrained voice of the fathers accepted the faith and even the anathemas of Cyril; and the heresy of the two natures was formally condemned in the persons and writings of the most learned Orientals. “May those who divide Christ be divided with the sword, may they be hewn in pieces, may they be burnt alive!” were the charitable wishes of a Christian synod.[60](#) The innocence and sanctity of Eutyches were acknowledged without hesitation; but the prelates, more especially those of Thrace and Asia, were unwilling to depose their patriarch for the use or even the abuse of his lawful jurisdiction. They embraced the knees of Dioscorus, as he stood with a threatening aspect on the footstool of his throne, and conjured him to forgive the offences, and to respect the dignity, of his brother. “Do you mean to raise a sedition?” exclaimed the relentless tyrant. “Where are the officers?” At these words a furious multitude of monks and soldiers, with staves, and swords, and chains, burst into the church; the trembling bishops hid themselves behind the altar, or under the benches; and, as they were not inspired with the zeal of martyrdom, they successively subscribed a blank paper, which was afterwards filled with the condemnation of the

Byzantine pontiff. Flavian was instantly delivered to the wild beasts of this spiritual amphitheatre; the monks were stimulated by the voice and example of Barsumas to avenge the injuries of Christ; it is said that the patriarch of Alexandria reviled, and buffeted, and kicked, and trampled his brother of Constantinople:[61](#) it is certain that the victim, before he could reach the place of his exile, expired on the third day, of the wounds and bruises which he had received at Ephesus. This second synod has been justly branded as a gang of robbers and assassins;[62](#) yet the accusers of Dioscorus would magnify his violence, to alleviate the cowardice and inconstancy of their own behaviour.

The faith of Egypt had prevailed; but the vanquished party was supported by the same pope who encountered without fear the hostile rage of Attila and Genseric. The theology of Leo, his famous *tome* or epistle on the mystery of the incarnation, had been disregarded by the synod of Ephesus; his authority, and that of the Latin church, was insulted in his legates, who escaped from slavery and death to relate the melancholy tale of the tyranny of Dioscorus and the martyrdom of Flavian. His provincial synod annulled the irregular proceedings of Ephesus; but, as this step was itself irregular, he solicited the convocation of a general council in the free and orthodox provinces of Italy. From his independent throne the Roman bishop spoke and acted without danger, as the head of the Christians, and his dictates were obsequiously transcribed by Placidia and her son Valentinian, who addressed their Eastern colleague to restore the peace and unity of the church. But the pageant of Oriental royalty was moved with equal dexterity by the hand of the eunuch; and Theodosius could pronounce, without hesitation, that the church was already peaceful and triumphant, and that the recent flame had been extinguished by the just punishment of the Nestorians. Perhaps the Greeks would be still involved in the heresy of the Monophysites, if the emperor's horse had not fortunately stumbled; Theodosius expired; his orthodox sister, Pulcheria, with a nominal husband, succeeded to the throne; Chrysaphius was burnt, Dioscorus was disgraced, the exiles were recalled, and the *tome* of Leo was subscribed by the Oriental bishops. Yet the pope was disappointed in his favourite project of a Latin council; he disdained to preside in the Greek synod which was speedily assembled at Nice in Bithynia; his legates required in a peremptory tone the presence of the emperor; and the weary fathers were transported to Chalcedon under the immediate eye of Marcian and the senate of Constantinople. A quarter of a mile from the Thracian Bosphorus, the church of St. Euphemia was built on the summit of a gentle though lofty ascent; the triple structure was celebrated as a prodigy of art, and the boundless prospect of the land and sea might have raised the mind of a sectary to the contemplation of the God of the universe. Six hundred and thirty bishops were ranged in order in the nave of the church; but the patriarchs of the East were preceded by the legates, of whom the third was a simple priest; and the place of honour was reserved for twenty laymen of consular or senatorian rank. The gospel was ostentatiously displayed in the centre, but the rule of faith was defined by the papal and Imperial ministers, who moderated the thirteen sessions of the council of

Chalcedon.[63](#) Their partial interposition silenced the intemperate shouts and execrations which degraded the episcopal gravity; but, on the formal accusation of the legates, Dioscorus was compelled to descend from his throne to the rank of a criminal, already condemned in the opinion of his judges. The Orientals, less adverse to Nestorius than to Cyril, accepted the Romans as their deliverers: Thrace, and Pontus, and Asia were exasperated against the murderer of Flavian, and the new patriarchs of Constantinople and Antioch secured their places by the sacrifice of their benefactor. The bishops of Palestine, Macedonia, and Greece were attached to the faith of Cyril; but in the face of the synod, in the heat of the battle, the leaders, with their obsequious train, passed from the right to the left wing, and decided the victory by this seasonable desertion. Of the seventeen suffragans who sailed from Alexandria, four were tempted from their allegiance, and the thirteen, falling prostrate on the ground, implored the mercy of the council, with sighs and tears and a pathetic declaration that, if they yielded, they should be massacred, on their return to Egypt, by the indignant people. A tardy repentance was allowed to expiate the guilt or error of the accomplices of Dioscorus; but their sins were accumulated on his head; he neither asked nor hoped for pardon, and the moderation of those who pleaded for a general amnesty was drowned in the prevailing cry of victory and revenge. To save the reputation of his late adherents, some *personal* offences were skilfully detected: his rash and illegal excommunication of the pope, and his contumacious refusal (while he was detained a prisoner) to attend the summons of the synod. Witnesses were introduced to prove the special facts of his pride, avarice, and cruelty; and the fathers heard with abhorrence that the alms of the church were lavished on the female dancers, that his palace, and even his bath, was open to the prostitutes of Alexandria, and that the infamous Pansophia, or Irene, was publicly entertained as the concubine of the patriarch.[64](#)

For these scandalous offences Dioscorus was deposed by the synod and banished by the emperor; but the purity of his faith was declared in the presence, and with the tacit approbation, of the fathers. Their prudence supposed rather than pronounced the heresy of Eutyches, who was never summoned before their tribunal; and they sat silent and abashed, when a bold Monophysite, casting at their feet a volume of Cyril, challenged them to anathematise in his person the doctrine of a saint. If we fairly peruse the acts of Chalcedon as they are recorded by the orthodox party,[65](#) we shall find that a great majority of the bishops embraced the simple unity of Christ; and the ambiguous concession, that he was formed of or from two natures, might imply either their previous existence, or their subsequent confusion, or some dangerous interval between the conception of the man and the assumption of the God. The Roman theology, more positive and precise, adopted the term most offensive to the ears of the Egyptians, that Christ existed in two natures; and this momentous particle[66](#) (which the memory, rather than the understanding, must retain) had almost produced a schism among the Catholic bishops. The *tome* of Leo had been respectfully, perhaps sincerely, subscribed; but they protested, in two successive debates, that it was neither expedient nor lawful to transgress the sacred landmarks which had been fixed at Nice,

Constantinople, and Ephesus, according to the rule of scripture and tradition. At length they yielded to the importunities of their masters, but their infallible decree, after it had been ratified with deliberate votes and vehement acclamations, was overturned in the next session by the opposition of the legates and their Oriental friends. It was in vain that a multitude of episcopal voices repeated in chorus, “The definition of the fathers is orthodox and immutable! The heretics are now discovered! Anathema to the Nestorians! Let them depart from the synod! Let them repair to Rome!”⁶⁷ The legates threatened, the emperor was absolute, and a committee of eighteen bishops prepared a new decree, which was imposed on the reluctant assembly. In the name of the fourth general council, the Christ in one person, but *in* two natures, was announced to the Catholic world; an invisible line was drawn between the heresy of Apollinaris and the faith of St. Cyril; and the road to paradise, a bridge as sharp as a razor, was suspended over the abyss by the master-hand of the theological artist. During ten centuries of blindness and servitude, Europe received her religious opinions from the oracle of the Vatican; and the same doctrine, already varnished with the rust of antiquity, was admitted without dispute into the creed of the reformers, who disclaimed the supremacy of the Roman pontiff. The synod of Chalcedon still triumphs in the Protestant churches; but the ferment of controversy has subsided, and the most pious Christians of the present day are ignorant or careless of their own belief concerning the mystery of the incarnation.

Far different was the temper of the Greeks and Egyptians under the orthodox reigns of Leo and Marcian. Those pious emperors enforced with arms and edicts the symbol of their faith;⁶⁸ and it was declared by the conscience or honour of five hundred bishops that the decrees of the synod of Chalcedon might be lawfully supported, even with blood. The Catholics observed with satisfaction that the same synod was odious both to the Nestorians and the Monophysites;⁶⁹ but the Nestorians were less angry, or less powerful, and the East was distracted by the obstinate and sanguinary zeal of the Monophysites. Jerusalem was occupied by an army of monks; in the name of the one incarnate nature, they pillaged, they burnt, they murdered; the sepulchre of Christ was defiled with blood; and the gates of the city were guarded in tumultuous rebellion against the troops of the emperor. After the disgrace and exile of Dioscorus, the Egyptians still regretted their spiritual father, and detested the usurpation of his successor, who was introduced by the fathers of Chalcedon. The throne of Proterius was supported by a guard of two thousand soldiers; he waged a five years’ war against the people of Alexandria; and, on the first intelligence of the death of Marcian, he became the victim of their zeal. On the third day before the festival of Easter, the patriarch was besieged in the cathedral and murdered in the baptistery. The remains of his mangled corpse were delivered to the flames, and his ashes to the wind; and the deed was inspired by the vision of a pretended angel: an ambitious monk, who, under the name of Timothy the Cat,⁷⁰ succeeded to the place and opinions of Dioscorus. This deadly superstition was inflamed, on either side, by the principle and the practice

of retaliation: in the pursuit of a metaphysical quarrel, many thousands⁷¹ were slain, and the Christians of every degree were deprived of the substantial enjoyments of social life and of the invisible gifts of baptism and the holy communion. Perhaps an extravagant fable of the times may conceal an allegorical picture of these fanatics, who tortured each other and themselves. “Under the consulship of Venantius and Celer,” says a grave bishop, “the people of Alexandria, and all Egypt, were seized with a strange and diabolical frenzy: great and small, slaves and freedmen, monks and clergy, the natives of the land, who opposed the synod of Chalcedon, lost their speech and reason, barked like dogs, and tore, with their own teeth, the flesh from their hands and arms.”⁷²

The disorders of thirty years at length produced the famous Henoticon⁷³ of the emperor Zeno, which in his reign, and in that of Anastasius, was signed by all the bishops of the East, under the penalty of degradation and exile, if they rejected or infringed this salutary and fundamental law. The clergy may smile or groan at the presumption of a layman who defines the articles of faith;⁷⁴ yet, if he stoops to the humiliating task, his mind is less infected by prejudice or interest, and the authority of the magistrate can only be maintained by the concord of the people. It is in ecclesiastical story that Zeno appears least contemptible; and I am not able to discern any Manichæan or Eutychian guilt in the generous saying of Anastasius, That it was unworthy of an emperor to persecute the worshippers of Christ and the citizens of Rome. The Henoticon was most pleasing to the Egyptians; yet the smallest blemish has not been described by the jealous and even jaundiced eyes of our orthodox schoolmen, and it accurately represents the Catholic faith of the incarnation, without adopting or disclaiming the peculiar terms or tenets of the hostile sects. A solemn anathema is pronounced against Nestorius and Eutyches; against all heretics by whom Christ is divided, or confounded, or reduced to a phantom. Without defining the number or the article of the word *nature*, the pure system of St. Cyril, the faith of Nice, Constantinople, and Ephesus, is respectfully confirmed; but, instead of bowing at the name of the fourth council, the subject is dismissed by the censure of all contrary doctrines, *if any such have been taught either elsewhere or at Chalcedon*. Under this ambiguous expression the friends and the enemies of the last synod might unite in a silent embrace. The most reasonable Christians acquiesced in this mode of toleration; but their reason was feeble and inconstant, and their obedience was despised as timid and servile by the vehement spirit of their brethren. On a subject which engrossed the thoughts and discourses of men, it was difficult to preserve an exact neutrality; a book, a sermon, a prayer, rekindled the flame of controversy; and the bonds of communion were alternately broken and renewed by the private animosity of the bishops. The space between Nestorius and Eutyches was filled by a thousand shades of language and opinion; the *acephali*⁷⁵ of Egypt and the Roman pontiffs, of equal valour though of unequal strength, may be found at the two extremities of the theological scale. The *acephali*, without a king or a bishop, were separated above three hundred years from

the patriarchs of Alexandria, who had accepted the communion of Constantinople, without exacting a formal condemnation of the synod of Chalcedon. For accepting the communion of Alexandria, without a formal approbation of the same synod, the patriarchs of Constantinople were anathematised by the popes. Their inflexible despotism involved the most orthodox of the Greek churches in this spiritual contagion, denied or doubted the validity of their sacraments,⁷⁶ and fomented, thirty-five years, the schism of the East and West, till they finally abolished the memory of four Byzantine pontiffs, who had dared to oppose the supremacy of St. Peter.⁷⁷ Before that period, the precarious truce of Constantinople and Egypt had been violated by the zeal of the rival prelates. Macedonius, who was suspected of the Nestorian heresy, asserted, in disgrace and exile, the synod of Chalcedon, while the successor of Cyril would have purchased its overthrow with a bribe of two thousand pounds of gold.

In the fever of the times, the sense, or rather the sound, of a syllable was sufficient to disturb the peace of an empire. The Trisagion⁷⁸ (thrice holy), “Holy, holy, holy, Lord God of Hosts!” is supposed by the Greeks to be the identical hymn which the angels and cherubim eternally repeat before the throne of God, and which, about the middle of the fifth century, was miraculously revealed to the church of Constantinople. The devotion of Antioch soon added “who was crucified for us!” and this grateful address, either to Christ alone or to the whole Trinity, may be justified by the rules of theology, and has been gradually adopted by the Catholics of the East and West. But it had been imagined by a Monophysite bishop;⁷⁹ the gift of an enemy was at first rejected as a dire and dangerous blasphemy, and the rash innovation had nearly cost the emperor Anastasius his throne and his life.⁸⁰ The people of Constantinople was devoid of any rational principles of freedom; but they held, as a lawful cause of rebellion, the colour of a livery in the races, or the colour of a mystery in the schools. This Trisagion, with and without this obnoxious addition, was chanted in the cathedral by two adverse choirs, and, when their lungs were exhausted, they had recourse to the more solid arguments of sticks and stones; the aggressors were punished by the emperor, and defended by the patriarch; and the crown and mitre were staked on the event of this momentous quarrel. The streets were instantly crowded with innumerable swarms of men, women, and children; the legions of monks, in regular array, marched and shouted, and fought at their head. “Christians! this is the day of martyrdom; let us not desert our spiritual father; anathema to the Manichæan tyrant! he is unworthy to reign.” Such was the Catholic cry; and the galleys of Anastasius lay upon their oars before the palace, till the patriarch had pardoned his penitent and hushed the waves of the troubled multitude. The triumph of Macedonius was checked by a speedy exile; but the zeal of his flock was again exasperated by the same question, “Whether one of the Trinity had been crucified?” On this momentous occasion the blue and green factions of Constantinople suspended their discord, and the civil and military powers were annihilated in their presence. The keys of the city and the standards of the guards were deposited in the forum of Constantine, the principal station and camp of the faithful.

Day and night they were incessantly busied either in singing hymns to the honour of their God or in pillaging and murdering the servants of their prince. The head of his favourite monk, the friend, as they styled him, of the enemy of the Holy Trinity, was borne aloft on a spear; and the firebrands, which had been darted against heretical structures, diffused the undistinguishing flames over the most orthodox buildings. The statues of the emperor were broken, and his person was concealed in a suburb, till, at the end of three days, he dared to implore the mercy of his subjects. Without his diadem and in the posture of a suppliant, Anastasius appeared on the throne of the circus. The Catholics, before his face, rehearsed their genuine Trisagion; they exulted in the offer which he proclaimed by the voice of a herald of abdicating the purple; they listened to the admonition that, since *all* could not reign, they should previously agree in the choice of a sovereign; and they accepted the blood of two unpopular ministers, whom their master, without hesitation, condemned to the lions. These furious but transient seditions were encouraged by the success of Vitalian, who, with an army of Huns and Bulgarians, for the most part idolaters, declared himself the champion of the Catholic faith. In this pious rebellion he depopulated Thrace, besieged Constantinople, exterminated sixty-five thousand of his fellow-Christians, till he obtained the recall of the bishops, the satisfaction of the pope, and the establishment of the council of Chalcedon, an orthodox treaty, reluctantly signed by the dying Anastasius, and more faithfully performed by the uncle of Justinian. And such was the event of the *first* of the religious wars which have been waged in the name, and by the disciples, of the God of peace.[81](#)

Justinian has been already seen in the various lights of a prince, a conqueror, and a lawgiver: the theologian[82](#) still remains, and it affords an unfavourable prejudice that his theology should form a very prominent feature of his portrait. The sovereign sympathised with his subjects in their superstitious reverence for living and departed saints; his Code, and more especially his Novels, confirm and enlarge the privileges of the clergy; and, in every dispute between a monk and a layman, the partial judge was inclined to pronounce that truth and innocence and justice were always on the side of the church. In his public and private devotions the emperor was assiduous and exemplary; his prayers, vigils, and fasts displayed the austere penance of a monk; his fancy was amused by the hope or belief of personal inspiration; he had secured the patronage of the Virgin and St. Michael the archangel; and his recovery from a dangerous disease was ascribed to the miraculous succour of the holy martyrs Cosmas and Damian. The capital and the provinces of the East were decorated with the monuments of his religion;[83](#) and, though the far greater part of these costly structures may be attributed to his taste or ostentation, the zeal of the royal architect was probably quickened by a genuine sense of love and gratitude towards his invisible benefactors. Among the titles of Imperial greatness, the name of *Pious* was most pleasing to his ear; to promote the temporal and spiritual interest of the church was the serious business of his life; and the duty of father of his country was often sacrificed to that of defender of the faith. The controversies of the times were congenial to his

temper and understanding; and the theological professors must inwardly deride the diligence of a stranger, who cultivated their art and neglected his own. "What can ye fear," said a bold conspirator to his associates, "from your bigoted tyrant? Sleepless and unarmed he sits whole nights in his closet, debating with reverend grey-beards, and turning over the pages of ecclesiastical volumes."⁸⁴ The fruits of these lucubrations were displayed in many a conference, where Justinian might shine as the loudest and most subtle of the disputants; in many a sermon, which, under the name of edicts and epistles, proclaimed to the empire the theology of their master. While the Barbarians invaded the provinces, while the victorious legions marched under the banners of Belisarius and Narses, the successor of Trajan, unknown to the camp, was content to vanquish at the head of a synod. Had he invited to these synods a disinterested and rational spectator, Justinian might have learned "*that* religious controversy is the offspring of arrogance and folly; *that* true piety is most laudably expressed by silence and submission; *that* man, ignorant of his own nature, should not presume to scrutinise the nature of his God; and *that* it is sufficient for us to know that power and benevolence are the perfect attributes of the Deity."⁸⁵

Toleration was not the virtue of the times, and indulgence to rebels has seldom been the virtue of princes. But, when the prince descends to the narrow and peevish character of a disputant, he is easily provoked to supply the defect of argument by the plenitude of power, and to chastise without mercy the perverse blindness of those who wilfully shut their eyes against the light of demonstration. The reign of Justinian was an uniform yet various scene of persecution; and he appears to have surpassed his indolent predecessors both in the contrivance of his laws and the rigour of their execution. The insufficient term of three months was assigned for the conversion or exile of all heretics;⁸⁶ and, if he still connived at their precarious stay, they were deprived, under his iron yoke, not only of the benefits of society, but of the common birth-right of men and Christians. At the end of four hundred years, the Montanists of Phrygia⁸⁷ still breathed the wild enthusiasm of perfection and prophecy which they had imbibed from their male and female apostles, the special organs of the Paraclete. On the approach of the Catholic priests and soldiers, they grasped with alacrity the crown of martyrdom; the conventicle and the congregation perished in the flames, but these primitive fanatics were not extinguished three hundred years after the death of their tyrant. Under the protection of the Gothic confederates, the church of the Arians at Constantinople had braved the severity of the laws; their clergy equalled the wealth and magnificence of the senate; and the gold and silver which were seized by the rapacious hand of Justinian might perhaps be claimed as the spoils of the provinces and the trophies of the Barbarians. A secret remnant of pagans, who still lurked in the most refined and most rustic conditions of mankind, excited the indignation of the Christians, who were, perhaps, unwilling that any strangers should be the witnesses of their intestine quarrels. A bishop was named as the inquisitor of the faith, and his diligence soon discovered, in the court and city, the magistrates, lawyers, physicians,

and sophists, who still cherished the superstition of the Greeks. They were sternly informed that they must choose without delay between the displeasure of Jupiter or Justinian, and that their aversion to the gospel could no longer be disguised under the scandalous mask of indifference or impiety. The patrician Photius perhaps alone was resolved to live and to die like his ancestors; he enfranchised himself with the stroke of a dagger, and left his tyrant the poor consolation of exposing with ignominy the lifeless corpse of the fugitive. His weaker brethren submitted to their earthly monarch, underwent the ceremony of baptism, and laboured, by their extraordinary zeal, to erase the suspicion, or to expiate the guilt, of idolatry. The native country of Homer, and the theatre of the Trojan war, still retained the last sparks of his mythology: by the care of the same bishop, seventy thousand Pagans were detected and converted in Asia, Phrygia, Lydia, and Caria; ninety-six churches were built for the new proselytes; and linen vestments, bibles and liturgies, and vases of gold and silver were supplied by the pious munificence of Justinian.⁸⁸ The Jews, who had been gradually stripped of their immunities, were oppressed by a vexatious law, which compelled them to observe the festival of Easter the same day on which it was celebrated by the Christians.⁸⁹ And they might complain with the more reason, since the Catholics themselves did not agree with the astronomical calculations of their sovereign; the people of Constantinople delayed the beginning of their Lent a whole week after it had been ordained by authority; and they had the pleasure of fasting seven days, while meat was exposed for sale by the command of the emperor. The Samaritans of Palestine⁹⁰ were a motley race, an ambiguous sect, rejected as Jews by the pagans, by the Jews as schismatics, and by the Christians as idolaters. The abomination of the cross had already been planted on their holy mount of Garizim,⁹¹ but the persecution of Justinian offered only the alternative of baptism or rebellion. They chose the latter; under the standard of a desperate leader, they rose in arms, and retaliated their wrongs on the lives, the property, and the temples of a defenceless people. The Samaritans were finally subdued by the regular forces of the East: twenty thousand were slain, twenty thousand were sold by the Arabs to the infidels of Persia and India, and the remains of that unhappy nation atoned for the crime of treason by the sin of hypocrisy. It has been computed that one hundred thousand Roman subjects were extirpated in the Samaritan war,⁹² which converted the once fruitful province into a desolate and smoking wilderness. But in the creed of Justinian the guilt of murder could not be applied to the slaughter of unbelievers; and he piously laboured to establish with fire and sword the unity of the Christian faith.⁹³

With these sentiments, it was incumbent on him, at least, to be always in the right. In the first years of his administration, he signalled his zeal as the disciple and patron of orthodoxy; the reconciliation of the Greeks and Latins established the *tome* of St. Leo as the creed of the emperor and the empire; the Nestorians and Eutychians were exposed, on either side, to the double edge of persecution; and the four synods of Nice, Constantinople, Ephesus, and *Chalcedon* were ratified by the code of a Catholic

lawgiver.⁹⁴ But, while Justinian strove to maintain the uniformity of faith and worship, his wife Theodora, whose vices were not incompatible with devotion, had listened to the Monophysite teachers; and the open or clandestine enemies of the church revived and multiplied at the smile of their gracious patroness. The capital, the palace, the nuptial bed, were torn by spiritual discord; yet so doubtful was the sincerity of the royal consorts that their seeming disagreement was imputed by many to a secret and mischievous confederacy against the religion and happiness of their people.⁹⁵ The famous dispute of the three chapters,⁹⁶ which has filled more volumes than it deserves lines, is deeply marked with this subtle and disingenuous spirit. It was now three hundred years since the body of Origen⁹⁷ had been eaten by the worms: his soul, of which he held the pre-existence, was in the hands of its Creator, but his writings were eagerly perused by the monks of Palestine. In these writings the piercing eye of Justinian descried more than ten metaphysical errors; and the primitive doctor, in the company of Pythagoras and Plato, was devoted by the clergy to the *eternity* of hell-fire, which he had presumed to deny. Under the cover of this precedent, a treacherous blow was aimed at the council of Chalcedon. The fathers had listened without impatience to the praise of Theodore of Mopsuestia;⁹⁸ and their justice or indulgence had restored both Theodoret of Cyrrhus and Ibas of Edessa to the communion of the church. But the characters of these Oriental bishops were tainted with the reproach of heresy; the first had been the master, the two others were the friends, of Nestorius; their most suspicious passages were accused under the title of the *three chapters*; and the condemnation of their memory must involve the honour of a synod whose name was pronounced with sincere or affected reverence by the Catholic world. If these bishops, whether innocent or guilty, were annihilated in the sleep of death, they would not probably be awakened by the clamour which, after an hundred years, was raised over their grave. If they were already in the fangs of the demon, their torments could neither be aggravated nor assuaged by human industry. If in the company of saints and angels they enjoyed the rewards of piety, they must have smiled at the idle fury of the theological insects who still crawled on the surface of the earth. The foremost of these insects, the emperor of the Romans, darted his sting, and distilled his venom, perhaps without discerning the true motives of Theodora and her ecclesiastical faction. The victims were no longer subject to his power, and the vehement style of his edicts could only proclaim their damnation and invite the clergy of the East to join in a full chorus of curses and anathemas. The East, with some hesitation, consented to the voice of her sovereign: the fifth general council, of three patriarchs and one hundred and sixty-five bishops, was held at Constantinople; and the authors, as well as the defenders, of the three chapters were separated from the communion of the saints and solemnly delivered to the prince of darkness. But the Latin churches were more jealous of the honour of Leo and the synod of Chalcedon; and, if they had fought as they usually did under the standard of Rome, they might have prevailed in the cause of reason and humanity. But their chief was a prisoner in the hands of the enemy; the throne of St. Peter, which had been disgraced by the simony, was betrayed by the cowardice, of Vigilius, who yielded, after a long and inconsistent struggle, to the despotism of

Justinian and the sophistry of the Greeks. His apostacy provoked the indignation of the Latins, and no more than two bishops could be found who would impose their hands on his deacon and successor Pelagius. Yet the perseverance of the popes insensibly transferred to their adversaries the appellation of schismatics: the Illyrian, African, and Italian churches were oppressed by the civil and ecclesiastical powers, not without some effort of military force;[99](#) the distant Barbarians transcribed the creed of the Vatican; and, in the period of a century, the schism of the three chapters expired in an obscure angle of the Venetian province.[100](#) But the religious discontent of the Italians had already promoted the conquests of the Lombards, and the Romans themselves were accustomed to suspect the faith, and to detest the government, of their Byzantine tyrant.

Justinian was neither steady nor consistent in the nice process of fixing his volatile opinions and those of his subjects. In his youth, he was offended by the slightest deviation from the orthodox line; in his old age, he transgressed the measure of temperate heresy, and the Jacobites, not less than the Catholics, were scandalised by his declaration that the body of Christ was incorruptible, and that his manhood was never subject to any wants and infirmities, the inheritance of our mortal flesh. This *phantastic* opinion was announced in the last edicts of Justinian; and at the moment of his seasonable departure the clergy had refused to subscribe, the prince was prepared to persecute, and the people were resolved to suffer or resist. A bishop of Treves, secure beyond the limits of his power, addressed the monarch of the East in the language of authority and affection. “Most gracious Justinian, remember your baptism and your creed! Let not your grey hairs be defiled with heresy. Recall your fathers from exile, and your followers from perdition. You cannot be ignorant that Italy and Gaul, Spain and Africa, already deplore your fall, and anathematise your name. Unless, without delay, you destroy what you have taught; unless you exclaim with a loud voice, I have erred, I have sinned, anathema to Nestorius, anathema to Eutyches, you deliver your soul to the same flames in which *they* will eternally burn.” He died and made no sign.[101](#) His death restored in some degree the peace of the church, and the reigns of his four successors, Justin, Tiberius, Maurice, and Phocas, are distinguished by a rare, though fortunate, vacancy in the ecclesiastical history of the East.[102](#)

The faculties of sense and reason are least capable of acting on themselves; the eye is most inaccessible to the sight, the soul to the thought; yet we think, and even feel, that *one will*, a sole principle of action, is essential to a rational and conscious being. When Heraclius returned from the Persian war, the orthodox hero consulted his bishops, whether the Christ whom he adored, of one person but of two natures, was actuated by a single or a double will. They replied in the singular, and the emperor was encouraged to hope that the Jacobites of Egypt and Syria might be reconciled by the profession of a doctrine, most certainly harmless, and most probably true, since it was taught even

by the Nestorians themselves.[103](#) The experiment was tried without effect, and the timid or vehement Catholics condemned even the semblance of a retreat in the presence of a subtle and audacious enemy. The orthodox (the prevailing) party devised new modes of speech, and argument, and interpretation; to either nature of Christ they speciously applied a proper and distinct energy; but the difference was no longer visible when they allowed that the human and the divine will were invariably the same.[104](#) The disease was attended with the customary symptoms; but the Greek clergy, as if satiate with the endless controversy of the incarnation, instilled a healing counsel into the ear of the prince and people. They declared themselves monothelites (asserters of the unity of will); but they treated the words as new, the questions as superfluous, and recommended a religious silence as the most agreeable to the prudence and charity of the gospel. This law of silence was successively imposed by the *ecthesis* or exposition of Heraclius, the *type* or model of his grandson Constans;[105](#) and the Imperial edicts were subscribed with alacrity or reluctance by the four patriarchs of Rome, Constantinople, Alexandria, and Antioch. But the bishop and monks of Jerusalem sounded the alarm; in the language, or even in the silence, of the Greeks, the Latin churches detected a latent heresy; and the obedience of Pope Honorius to the commands of his sovereign was retracted and censured by the bolder ignorance of his successors. They condemned the execrable and abominable heresy of the Monothelites, who revived the errors of Manes, Apollinaris, Eutyches, &c.; they signed the sentence of excommunication on the tomb of St. Peter; the ink was mingled with the sacramental wine, the blood of Christ; and no ceremony was omitted that could fill the superstitious minds with horror and affright. As the representative of the Western church, Pope Martin and his Lateran synod anathematised the perfidious and guilty silence of the Greeks. One hundred and five bishops of Italy, for the most part the subjects of Constans, presumed to reprobate his wicked *type* and the impious *ecthesis* of his grandfather, and to confound the authors and their adherents with the twenty-one notorious heretics, the apostates from the church, and the organs of the devil. Such an insult under the tamest reign could not pass with impunity. Pope Martin ended his days on the inhospitable shore of the Tauric Chersonesus, and his oracle, the abbot Maximus, was inhumanly chastised by the amputation of his tongue and his right hand.[106](#) But the same invincible spirit survived in their successors, and the triumph of the Latins avenged their recent defeat and obliterated the disgrace of the three chapters. The synods of Rome were confirmed by the sixth general council of Constantinople, in the palace and the presence of a new Constantine, a descendant of Heraclius. The royal convert converted the Byzantine pontiff and a majority of the bishops;[107](#) the dissenters, with their chief, Macarius of Antioch, were condemned to the spiritual and temporal pains of heresy;[108](#) the East condescended to accept the lessons of the West; and the creed was finally settled which teaches the Catholics of every age that two wills or energies are harmonised in the person of Christ. The majesty of the pope and the Roman synod was represented by two priests, one deacon, and three bishops; but these obscure Latins had neither arms to compel, nor treasures

to bribe, nor language to persuade; and I am ignorant by what arts they could determine the lofty emperor of the Greeks to abjure the catechism of his infancy and to persecute the religion of his fathers. Perhaps the monks and people of Constantinople¹⁰⁹ were favourable to the Lateran creed, which is indeed the least favourable of the two; and the suspicion is countenanced by the unnatural moderation of the Greek clergy, who appear in this quarrel to be conscious of their weakness. While the synod debated, a fanatic proposed a more summary decision, by raising a dead man to life; the prelates assisted at the trial; but the acknowledged failure may serve to indicate that the passions and prejudices of the multitude were not enlisted on the side of the Monothelites. In the next generation, when the son of Constantine was deposed and slain by the disciple of Macarius, they tasted the feast of revenge and dominion; the image or monument of the sixth council was defaced, and the original acts were committed to the flames. But in the second year their patron was cast headlong from the throne, the bishops of the East were released from their occasional conformity, the Roman faith was more firmly replanted by the orthodox successors of Bardanes, and the fine problems of the incarnation were forgotten in the more popular and visible quarrel of the worship of images.¹¹⁰

Before the end of the seventh century, the creed of the incarnation, which had been defined at Rome and Constantinople, was uniformly preached in the remote islands of Britain and Ireland;¹¹¹ the same ideas were entertained, or rather the same words were repeated, by all the Christians whose liturgy was performed in the Greek or the Latin tongue. Their numbers and visible splendour bestowed an imperfect claim to the appellation of Catholics; but in the East they were marked with the less honourable name of *Melchites* or Royalists;¹¹² of men whose faith, instead of resting on the basis of scripture, reason, or tradition, had been established, and was still maintained, by the arbitrary power of a temporal monarch. Their adversaries might allege the words of the fathers of Constantinople, who profess themselves the slaves of the king; and they might relate, with malicious joy, how the decrees of Chalcedon had been inspired and reformed by the emperor Marcian and his virgin bride. The prevailing faction will naturally inculcate the duty of submission, nor is it less natural that dissenters should feel and assert the principles of freedom. Under the rod of persecution, the Nestorians and Monophysites degenerated into rebels and fugitives; and the most ancient and useful allies of Rome were taught to consider the emperor not as the chief, but as the enemy, of the Christians. Language, the leading principle which unites or separates the tribes of mankind, soon discriminated the sectaries of the East by a peculiar and perpetual badge, which abolished the means of intercourse and the hope of reconciliation. The long dominion of the Greeks, their colonies, and, above all, their eloquence had propagated a language doubtless the most perfect that has been contrived by the art of man. Yet the body of the people, both in Syria and Egypt, still persevered in the use of their national idioms; with this difference, however, that the Coptic was confined to the rude and illiterate peasants of the Nile, while the

Syriac,[113](#) from the mountains of Assyria to the Red Sea, was adapted to the higher topics of poetry and argument. Armenia and Abyssinia were infected by the speech and learning of the Greeks; and their barbaric tongues, which have been revived in the studies of modern Europe, were unintelligible to the inhabitants of the Roman empire. The Syriac and the Coptic, the Armenian and the Æthiopic, are consecrated in the service of their respective churches; and their theology is enriched by domestic versions[114](#) both of the scriptures and of the most popular fathers. After a period of thirteen hundred and sixty years, the spark of controversy, first kindled by a sermon of Nestorius, still burns in the bosom of the East, and the hostile communions still maintain the faith and discipline of their founders. In the most abject state of ignorance, poverty, and servitude, the Nestorians and Monophysites reject the spiritual supremacy of Rome, and cherish the toleration of their Turkish masters, which allows them to anathematise, on one hand, St. Cyril and the synod of Ephesus, on the other, Pope Leo and the council of Chalcedon. The weight which they cast into the downfall of the Eastern empire demands our notice, and the reader may be amused with the various prospects of I. The Nestorians; II. The Jacobites;[115](#) III. The Maronites; IV. The Armenians; V. The Copts; and VI. The Abyssinians. To the three former, the Syriac is common; but of the latter, each is discriminated by the use of a national idiom. Yet the modern natives of Armenia and Abyssinia would be incapable of conversing with their ancestors; and the Christians of Egypt and Syria, who reject the religion, have adopted the language, of the Arabians. The lapse of time has seconded the sacerdotal arts; and in the East, as well as in the West, the Deity is addressed in an obsolete tongue, unknown to the majority of the congregation.

I. Both in his native and his episcopal province, the heresy of the unfortunate Nestorius was speedily obliterated. The Oriental bishops, who at Ephesus had resisted to his face the arrogance of Cyril, were mollified by his tardy concessions. The same prelates, or their successors, subscribed, not without a murmur, the decrees of Chalcedon; the power of the Monophysites reconciled them with the Catholics in the conformity of passion, of interest, and insensibly of belief; and their last reluctant sigh was breathed in the defence of the three chapters. Their dissenting brethren, less moderate, or more sincere, were crushed by the penal laws; and as early as the reign of Justinian it became difficult to find a church of Nestorians within the limits of the Roman empire. Beyond those limits they had discovered a new world, in which they might hope for liberty and aspire to conquest. In Persia, notwithstanding the resistance of the Magi, Christianity had struck a deep root, and the nations of the East reposed under its salutary shade. The *catholic*, or primate, resided in the capital; in *his* synods, and in *their* dioceses, his metropolitans, bishops, and clergy represented the pomp and honour of a regular hierarchy; they rejoiced in the increase of proselytes, who were converted from the Zendavesta to the Gospel, from the secular to the monastic life; and their zeal was stimulated by the presence of an artful and formidable enemy. The Persian church had been founded by the missionaries of Syria; and their language, discipline, and doctrine were closely interwoven with its original frame. The *catholics* were elected

and ordained by their own suffragans; but their filial dependence on the patriarchs of Antioch is attested by the canons of the Oriental church.[116](#) In the Persian school of Edessa,[117](#) the rising generations of the faithful imbibed their theological idiom; they studied in the Syriac version the ten thousand volumes of Theodore of Mopsuestia; and they revered the apostolic faith and holy martyrdom of his disciple Nestorius, whose person and language were equally unknown to the nations beyond the Tigris. The first indelible lesson of Ibas, bishop of Edessa, taught them to execrate the *Egyptians*, who, in the synod of Ephesus, had impiously confounded the two natures of Christ. The flight of the masters and scholars, who were twice expelled from the Athens of Syria, dispersed a crowd of missionaries, inflamed by the double zeal of religion and revenge. And the rigid unity of the Monophysites, who, under the reigns of Zeno and Anastasius, had invaded the thrones of the East, provoked their antagonists, in a land of freedom, to avow a moral, rather than a physical, union of the two persons of Christ. Since the first preaching of the gospel, the Sassanian kings beheld with an eye of suspicion a race of aliens and apostates, who had embraced the religion, and who might favour the cause, of the hereditary foes of their country. The royal edicts had often prohibited their dangerous correspondence with the Syrian clergy; the progress of the schism was grateful to the jealous pride of Perozes, and he listened to the eloquence of an artful prelate, who painted Nestorius as the friend of Persia, and urged him to secure the fidelity of his Christian subjects by granting a just preference to the victims and enemies of the Roman tyrant. The Nestorians composed a large majority of the clergy and people; they were encouraged by the smile, and armed with the sword, of despotism; yet many of their weaker brethren were startled at the thought of breaking loose from the communion of the Christian world, and the blood of seven thousand seven hundred Monophysites, or Catholics, confirmed the uniformity of faith and discipline in the churches of Persia.[118](#) Their ecclesiastical institutions are distinguished by a liberal principle of reason, or at least of policy; the austerity of the cloister was relaxed and gradually forgotten; houses of charity were endowed for the education of orphans and foundlings; the law of celibacy, so forcibly recommended to the Greeks and Latins, was disregarded by the Persian clergy; and the number of the elect was multiplied by the public and reiterated nuptials of the priests, the bishops, and even the patriarch himself. To this standard of natural and religious freedom myriads of fugitives resorted from all the provinces of the Eastern empire; the narrow bigotry of Justinian was punished by the emigration of his most industrious subjects; they transported into Persia the arts both of peace and war; and those who deserved the favour, were promoted in the service, of a discerning monarch. The arms of Nushirvan, and his fiercer grandson, were assisted with advice, and money, and troops, by the desperate sectaries who still lurked in their native cities of the East; their zeal was rewarded with the gift of the Catholic churches; but, when those cities and churches were recovered by Heraclius, their open profession of treason and heresy compelled them to seek a refuge in the realm of their foreign ally. But the seeming tranquillity of the Nestorians was often endangered, and sometimes overthrown. They were involved in the common evils of Oriental despotism; their enmity to Rome could

not always atone for their attachment to the gospel; and a colony of three hundred thousand Jacobites, the captives of Apamea and Antioch, was permitted to erect an hostile altar in the face of the *catholic* and in the sunshine of the court. In his last treaty, Justinian introduced some conditions which tended to enlarge and fortify the toleration of Christianity in Persia. The emperor, ignorant of the rights of conscience, was incapable of pity or esteem for the heretics who denied the authority of the holy synods; but he flattered himself that they would gradually perceive the temporal benefits of union with the empire and the church of Rome; and, if he failed in exciting their gratitude, he might hope to provoke the jealousy of their sovereign. In a later age, the Lutherans have been burnt at Paris, and protected in Germany, by the superstition and policy of the most Christian king.

The desire of gaining souls for God, and subjects for the church, has excited in every age the diligence of the Christian priests. From the conquest of Persia they carried their spiritual arms to the north, the east, and the south; and the simplicity of the gospel was fashioned and painted with the colours of the Syriac theology. In the sixth century, according to the report of a Nestorian traveller,[119](#) Christianity was successfully preached to the Bactrians, the Huns, the Persians, the Indians, the Persarmenians, the Medes, and the Elamites; the Barbaric churches, from the gulf of Persia to the Caspian sea, were almost infinite; and their recent faith was conspicuous in the number and sanctity of their monks and martyrs. The pepper coast of Malabar, and the isles of the ocean, Socotora and Ceylon, were peopled with an increasing multitude of Christians; and the bishops and clergy of those sequestered regions derived their ordination from the catholic of Babylon. In a subsequent age, the zeal of the Nestorians overleaped the limits which had confined the ambition and curiosity both of the Greeks and Persians. The missionaries of Balch and Samarcand pursued without fear the footsteps of the roving Tartar, and insinuated themselves into the camps of the valleys of Imaus and the banks of the Selinga. They exposed a metaphysical creed to those illiterate shepherds; to those sanguinary warriors they recommended humanity and repose. Yet a khan, whose power they vainly magnified, is said to have received at their hands the rites of baptism, and even of ordination; and the fame of *Prester* or *Presbyter* John[120](#) has long amused the credulity of Europe. The royal convert was indulged in the use of a portable altar; but he despatched an embassy to the patriarch, to inquire how, in the season of Lent, he should abstain from animal food, and how he might celebrate the Eucharist in a desert that produced neither corn nor wine. In their progress by sea and land, the Nestorians entered China by the port of Canton and the northern residence of Sigan. Unlike the senators of Rome, who assumed with a smile the characters of priests and augurs, the mandarins, who affect in public the reason of philosophers, are devoted in private to every mode of popular superstition. They cherished and they confounded the gods of Palestine and of India; but the propagation of Christianity awakened the jealousy of the state, and, after a short vicissitude of favour and persecution, the foreign sect expired in ignorance and oblivion.[121](#) Under the reign of the caliphs, the Nestorian church was diffused from China to Jerusalem and Cyprus;

and their numbers, with those of the Jacobites, were computed to surpass the Greek and Latin communions.¹²² Twenty-five metropolitans or archbishops composed their hierarchy, but several of these were dispensed, by the distance and danger of the way, from the duty of personal attendance, on the easy condition that every six years they should testify their faith and obedience to the *catholic* or patriarch of Babylon: a vague appellation, which has been successively applied to the royal seats of Seleucia, Ctesiphon, and Bagdad. These remote branches are long since withered, and the old patriarchal trunk¹²³ is now divided by the *Elijahs* of Mosul, the representatives, almost in lineal descent, of the genuine and primitive succession, the *Josephs* of Amida, who are reconciled to the church of Rome,¹²⁴ and the *Simeons* of Van or Ormia, whose revolt, at the head of forty thousand families, was promoted in the sixteenth century by the Sophis of Persia. The number of three hundred thousand is allowed for the whole body of the Nestorians, who, under the name of Chaldæans or Assyrians, are confounded with the most learned or the most powerful nation of Eastern antiquity.

According to the legend of antiquity, the gospel was preached in India by St. Thomas.¹²⁵ At the end of the ninth century, his shrine, perhaps in the neighbourhood of Madras, was devoutly visited by the ambassadors of Alfred, and their return with a cargo of pearls and spices rewarded the zeal of the English monarch, who entertained the largest projects of trade and discovery.¹²⁶ When the Portuguese first opened the navigation of India, the Christians of St. Thomas had been seated for ages on the coast of Malabar, and the difference of their character and colour attested the mixture of a foreign race. In arms, in arts, and possibly in virtue, they excelled the natives of Hindostan; the husbandmen cultivated the palm-tree, the merchants were enriched by the pepper-trade, the soldiers preceded the *nairs* or nobles of Malabar, and their hereditary privileges were respected by the gratitude or the fear of the king of Cochin and the Zamorin himself. They acknowledged a Gentoo sovereign, but they were governed, even in temporal concerns, by the bishop of Angamala. He still asserted his ancient title of metropolitan of India, but his real jurisdiction was exercised in fourteen hundred churches, and he was entrusted with the care of two hundred thousand souls. Their religion would have rendered them the firmest and most cordial allies of the Portuguese, but the inquisitors soon discerned in the Christians of St. Thomas the unpardonable guilt of heresy and schism. Instead of owning themselves the subjects of the Roman pontiff, the spiritual and temporal monarch of the globe, they adhered, like their ancestors, to the communion of the Nestorian patriarch; and the bishops whom he ordained at Mosul traversed the dangers of the sea and land to reach their diocese on the coast of Malabar. In their Syriac liturgy, the names of Theodore and Nestorius were piously commemorated; they united their adoration of the two persons of Christ; the title of Mother of God was offensive to their ear, and they measured with scrupulous avarice the honours of the Virgin Mary, whom the superstition of the Latins had *almost* exalted to the rank of a goddess. When her image was first presented

to the disciples of St. Thomas, they indignantly exclaimed, "We are Christians, not idolaters!" and their simple devotion was content with the veneration of the cross. Their separation from the Western world had left them in ignorance of the improvements, or corruptions, of a thousand years; and their conformity with the faith and practice of the fifth century would equally disappoint the prejudices of a Papist or a Protestant. It was the first care of the ministers of Rome to intercept all correspondence with the Nestorian patriarch, and several of his bishops expired in the prisons of the holy office. The flock, without a shepherd, was assaulted by the power of the Portuguese, the arts of the Jesuits, and the zeal of Alexis de Menezes, archbishop of Goa, in his personal visitation of the coast of Malabar. The synod of Diamper, at which he presided, consummated the pious work of the reunion, and rigorously imposed the doctrine and discipline of the Roman church, without forgetting auricular confession, the strongest engine of ecclesiastical torture. The memory of Theodore and Nestorius was condemned, and Malabar was reduced under the dominion of the pope, of the primate, and of the Jesuits who invaded the see of Angamala or Cranganor. Sixty years of servitude and hypocrisy were patiently endured; but, as soon as the Portuguese empire was shaken by the courage and industry of the Dutch, the Nestorians asserted, with vigour and effect, the religion of their fathers. The Jesuits were incapable of defending the power which they had abused; the arms of forty thousand Christians were pointed against their falling tyrants; and the Indian archdeacon assumed the character of bishop, till a fresh supply of episcopal gifts and Syriac missionaries could be obtained from the patriarch of Babylon. Since the expulsion of the Portuguese, the Nestorian creed is freely professed on the coast of Malabar. The trading companies of Holland and England are the friends of toleration; but, if oppression be less mortifying than contempt, the Christians of St. Thomas have reason to complain of the cold and silent indifference of their brethren of Europe.[127](#)

II. The history of the Monophysites is less copious and interesting than that of the Nestorians. Under the reigns of Zeno and Anastasius, their artful leaders surprised the ear of the prince, usurped the thrones of the East, and crushed on its native soil the school of the Syrians. The rule of the Monophysite faith was defined with exquisite discretion by Severus, patriarch of Antioch: he condemned, in the style of the Henoticon, the adverse heresies of Nestorius and Eutyches, maintained against the latter the reality of the body of Christ, and constrained the Greeks to allow that he was a liar who spoke truth.[128](#) But the approximation of ideas could not abate the vehemence of passion; each party was the more astonished that their blind antagonist could dispute on so trifling a difference; the tyrant of Syria enforced the belief of his creed, and his reign was polluted with the blood of three hundred and fifty monks, who were slain, not perhaps without provocation or resistance, under the walls of Apamea.[129](#) The successor of Anastasius replanted the orthodox standard in the East; Severus fled into Egypt; and his friend, the eloquent Xenaïas,[130](#) who had escaped from the Nestorians of Persia, was suffocated in his exile by the Melchites of

Paphlagonia. Fifty-four bishops were swept from their thrones, eight hundred ecclesiastics were cast into prison,[131](#) and, notwithstanding the ambiguous favour of Theodora, the Oriental flocks, deprived of their shepherds, must insensibly have been either famished or poisoned. In this spiritual distress, the expiring faction was revived, and united, and perpetuated by the labours of a monk; and the name of James Baradaëus[132](#) has been preserved in the appellation of *Jacobites*, a familiar sound which may startle the ear of an English reader. From the holy confessors in their prison of Constantinople he received the powers of bishop of Edessa and apostle of the East, and the ordination of fourscore thousand bishops, priests, and deacons is derived from the same inexhaustible source. The speed of the zealous missionary was promoted by the fleetest dromedaries of a devout chief of the Arabs; the doctrine and discipline of the Jacobites were secretly established in the dominions of Justinian; and each Jacobite was compelled to violate the laws and to hate the Roman legislator. The successors of Severus, while they lurked in convents or villages, while they sheltered their proscribed heads in the caverns of hermits or the tents of the Saracens, still asserted, as they now assert, their indefeasible right to the title, the rank, and the prerogatives of patriarch of Antioch; under the milder yoke of the infidels they reside about a league from Merdin, in the pleasant monastery of Zapharan, which they have embellished with cells, aqueducts, and plantations. The secondary, though honourable, place is filled by the *maphrian*, who, in his station at Mosul itself, defies the Nestorian *catholic*, with whom he contests the supremacy of the East. Under the patriarch and the maphrian, one hundred and fifty archbishops and bishops have been counted in the different ages of the Jacobite church; but the order of the hierarchy is relaxed or dissolved, and the greater part of their dioceses is confined to the neighbourhood of the Euphrates and the Tigris. The cities of Aleppo and Amida, which are often visited by the patriarch, contain some wealthy merchants and industrious mechanics, but the multitude derive their scanty sustenance from their daily labour; and poverty, as well as superstition, may impose their excessive fasts: five annual lents, during which both the clergy and laity abstain not only from flesh or eggs, but even from the taste of wine, of oil, and of fish. Their present numbers are esteemed from fifty to fourscore thousand souls, the remnant of a populous church, which has gradually decreased under the oppression of twelve centuries. Yet in that long period some strangers of merit have been converted to the Monophysite faith, and a Jew was the father of Abulpharagius,[133](#) primate of the East, so truly eminent both in his life and death. In his life, he was an elegant writer of the Syriac and Arabic tongues, a poet, physician, and historian, a subtle philosopher, and a moderate divine. In his death, his funeral was attended by his rival the Nestorian patriarch, with a train of Greeks and Armenians, who forgot their disputes and mingled their tears over the grave of an enemy. The sect which was honoured by the virtues of Abulpharagius appears, however, to sink below the level of their Nestorian brethren. The superstition of the Jacobites is more abject, their fasts more rigid,[134](#) their intestine divisions are more numerous, and their doctors (as far as I can measure the degrees of nonsense) are more remote from the precincts

of reason. Something may possibly be allowed for the rigour of the Monophysite theology; much more for the superior influence of the monastic order. In Syria, in Egypt, in Æthiopia, the Jacobite monks have ever been distinguished by the austerity of their penance and the absurdity of their legends. Alive or dead, they are worshipped as the favourites of the Deity; the crosier of bishop and patriarch is reserved for their venerable hands; and they assume the government of men, while they are yet reeking with the habits and prejudices of the cloister.[135](#)

III. In the style of the Oriental Christians, the Monothelites of every age are described under the appellation of *Maronites*,[136](#) a name which has been insensibly transferred from an hermit to a monastery, from a monastery to a nation. Maron, a saint or savage of the fifth century, displayed his religious madness in Syria; the rival cities of Apamea and Emesa disputed his relics, a stately church was erected on his tomb, and six hundred of his disciples united their solitary cells on the banks of the Orontes. In the controversies of the incarnation, they nicely threaded the orthodox line between the sects of Nestorius and Eutyches; but the unfortunate question of *one will* or operation in the two natures of Christ was generated by their curious leisure. Their proselyte, the emperor Heraclius, was rejected as a Maronite from the walls of Emesa; he found a refuge in the monastery of his brethren; and their theological lessons were repaid with the gift of a spacious and wealthy domain. The name and doctrine of this venerable school were propagated among the Greeks and Syrians, and their zeal is expressed by Macarius, patriarch of Antioch, who declared before the synod of Constantinople that, sooner than subscribe the *two wills* of Christ, he would submit to be hewn piece-meal and cast into the sea.[137](#) A similar or a less cruel mode of persecution soon converted the unresisting subjects of the plain, while the glorious title of *Mardaites*,[138](#) or rebels, was bravely maintained by the hardy natives of Mount Libanus. John Maron, one of the most learned and popular of the monks, assumed the character of patriarch of Antioch; his nephew Abraham, at the head of the Maronites, defended their civil and religious freedom against the tyrants of the East. The son of the orthodox Constantine pursued, with pious hatred, a people of soldiers, who might have stood the bulwark of his empire against the common foes of Christ and of Rome. An army of Greeks invaded Syria; the monastery of St. Maron was destroyed with fire; the bravest chieftains were betrayed and murdered; and twelve thousand of their followers were transplanted to the distant frontiers of Armenia and Thrace. Yet the humble nation of the Maronites has survived the empire of Constantinople, and they still enjoy, under their Turkish masters, a free religion and a mitigated servitude. Their domestic governors are chosen among the ancient nobility; the patriarch, in his monastery of Canobin, still fancies himself on the throne of Antioch; nine bishops compose his synod, and one hundred and fifty priests, who retain the liberty of marriage, are entrusted with the care of one hundred thousand souls. Their country extends from the ridge of Mount Libanus to the shores of Tripoli; and the gradual descent affords, in a narrow space, each variety of soil and climate, from the Holy Cedars, erect under the

weight of snow,[139](#) to the vine, the mulberry, and the olive trees of the fruitful valley. In the twelfth century, the Maronites, abjuring the Monothelite error, were reconciled to the Latin churches of Antioch and Rome,[140](#) and the same alliance has been frequently renewed by the ambition of the popes and the distress of the Syrians. But it may reasonably be questioned whether their union has ever been perfect or sincere; and the learned Maronites of the college of Rome have vainly laboured to absolve their ancestors from the guilt of heresy and schism.[141](#)

IV. Since the age of Constantine, the Armenians[142](#) had signalised their attachment to the religion and empire of the Christians. The disorders of their country, and their ignorance of the Greek tongue, prevented their clergy from assisting at the synod of Chalcedon, and they floated eighty-four years[143](#) in a state of indifference or suspense, till their vacant faith was finally occupied by the missionaries of Julian of Halicarnassus,[144](#) who in Egypt, their common exile, had been vanquished by the arguments or the influence of his rival Severus, the Monophysite patriarch of Antioch. The Armenians alone are the pure disciples of Eutyches, an unfortunate parent, who has been renounced by the greater part of his spiritual progeny. They alone persevere in the opinion that the manhood of Christ was created, or existed without creation, of a divine and incorruptible substance. Their adversaries reproach them with the adoration of a phantom; and they retort the accusation, by deriding or execrating the blasphemy of the Jacobites, who impute to the Godhead the vile infirmities of the flesh, even the natural effects of nutrition and digestion. The religion of Armenia could not derive much glory from the learning or the power of its inhabitants. The royalty expired with the origin of their schism, and their Christian kings, who arose and fell in the thirteenth century on the confines of Cilicia, were the clients of the Latins, and the vassals of the Turkish sultan of Iconium. The helpless nation has seldom been permitted to enjoy the tranquillity of servitude. From the earliest period to the present hour, Armenia has been the theatre of perpetual war; the lands between Tauris and Erivan were dispeopled by the cruel policy of the Sophis; and myriads of Christian families were transplanted, to perish or to propagate in the distant provinces of Persia. Under the rod of oppression, the zeal of the Armenians is fervid and intrepid; they have often preferred the crown of martyrdom to the white turban of Mahomet; they devoutly hate the error and idolatry of the Greeks; and their transient union with the Latins is not less devoid of truth than the thousand bishops whom their patriarch offered at the feet of the Roman pontiff.[145](#) The *catholic*, or patriarch of the Armenians, resides in the monastery of Ekmiasin, three leagues from Erivan. Forty-seven archbishops, each of whom may claim the obedience of four or five suffragans, are consecrated by his hand; but the far greater part are only titular prelates, who dignify with their presence and service the simplicity of his court. As soon as they have performed the liturgy, they cultivate the garden; and our bishops will hear with surprise that the austerity of their life increases in just proportion to the elevation of their rank. In the fourscore thousand towns or villages of his spiritual empire, the patriarch receives a small and voluntary

tax from each person above the age of fifteen; but the annual amount of six hundred thousand crowns is insufficient to supply the incessant demands of charity and tribute. Since the beginning of the last century, the Armenians have obtained a large and lucrative share of the commerce of the East; in their return from Europe, the caravan usually halts in the neighbourhood of Erivan, the altars are enriched with the fruits of their patient industry; and the faith of Eutyches is preached in their recent congregations of Barbary and Poland.[146](#)

V. In the rest of the Roman empire, the despotism of the prince might eradicate or silence the sectaries of an obnoxious creed. But the stubborn temper of the Egyptians maintained their opposition to the synod of Chalcedon, and the policy of Justinian condescended to expect and to seize the opportunity of discord. The Monophysite church of Alexandria[147](#) was torn by the disputes of the *corruptibles* and *incorruptibles*, and, on the death of the patriarch, the two factions upheld their respective candidates.[148](#) Gaian was the disciple of Julian, Theodosius had been the pupil of Severus. The claims of the former were supported by the consent of the monks and senators, the city and the province; the latter depended on the priority of his ordination, the favour of the empress Theodora, and the arms of the eunuch Narses, which might have been used in more honourable warfare. The exile of the popular candidate to Carthage and Sardinia inflamed the ferment of Alexandria; and, after a schism of one hundred and seventy years, the *Gaianites* still revered the memory and doctrine of their founder. The strength of numbers and of discipline was tried in a desperate and bloody conflict; the streets were filled with the dead bodies of citizens and soldiers; the pious women, ascending the roofs of their houses, showered down every sharp or ponderous utensil on the heads of the enemy; and the final victory of Narses was owing to the flames with which he wasted the third capital of the Roman world. But the lieutenant of Justinian had not conquered in the cause of an heretic; Theodosius himself was speedily, though gently, removed; and Paul of Tanis, an orthodox monk, was raised to the throne of Athanasius. The powers of government were strained in his support; he might appoint or displace the dukes and tribunes of Egypt; the allowance of bread which Diocletian had granted was suppressed, the churches were shut, and a nation of schismatics was deprived at once of their spiritual and carnal food. In his turn, the tyrant was excommunicated by the zeal and revenge of the people; and none except his servile Melchites would salute him as a man, a Christian, or a bishop. Yet such is the blindness of ambition that, when Paul was expelled on a charge of murder, he solicited, with a bribe of seven hundred pounds of gold, his restoration to the same station of hatred and ignominy. His successor Apollinaris entered the hostile city in military array, alike qualified for prayer or for battle. His troops, under arms, were distributed through the streets; the gates of the cathedral were guarded; and a chosen band was stationed in the choir, to defend the person of their chief. He stood erect on his throne, and, throwing aside the upper garment of a warrior, suddenly appeared before the eyes of the multitude in the robes of patriarch of Alexandria. Astonishment held them mute; but no sooner had

Apollinaris begun to read the tome of St. Leo than a volley of curses, and invectives, and stones assaulted the odious minister of the emperor and the synod. A charge was instantly sounded by the successor of the apostles; the soldiers waded to their knees in blood; and two hundred thousand Christians are said to have fallen by the sword: an incredible account, even if it be extended from the slaughter of a day to the eighteen years of the reign of Apollinaris. Two succeeding patriarchs, Eulogius¹⁴⁹ and John,¹⁵⁰ laboured in the conversion of heretics, with arms and arguments more worthy of their evangelical profession. The theological knowledge of Eulogius was displayed in many a volume, which magnified the errors of Eutyches and Severus, and attempted to reconcile the ambiguous language of St. Cyril with the orthodox creed of Pope Leo and the fathers of Chalcedon. The bounteous alms of John the Eleemosynary were dictated by superstition, or benevolence, or policy. Seven thousand five hundred poor were maintained at his expense; on his accession, he found eight thousand pounds of gold in the treasury of the church; he collected ten thousand from the liberality of the faithful; yet the primate could boast in his testament that he left behind him no more than the third part of the smallest of the silver coins. The churches of Alexandria were delivered to the Catholics, the religion of the Monophysites was proscribed in Egypt, and a law was revived which excluded the natives from the honours and emoluments of the state.

A more important conquest still remained, of the patriarch, the oracle and leader of the Egyptian church. Theodosius had resisted the threats and promises of Justinian with the spirit of an apostle or an enthusiast. "Such," replied the patriarch, "were the offers of the tempter, when he shewed the kingdoms of the earth. But my soul is far dearer to me than life or dominion. The churches are in the hands of a prince who can kill the body; but my conscience is my own; and in exile, poverty, or chains, I will stedfastly adhere to the faith of my holy predecessors, Athanasius, Cyril, and Dioscorus. Anathema to the tome of Leo and the synod of Chalcedon! Anathema to all who embrace their creed! Anathema to them now and for evermore! Naked came I out of my mother's womb; naked shall I descend into the grave. Let those who love God follow me, and seek their salvation." After comforting his brethren, he embarked for Constantinople, and sustained in six successive interviews the almost irresistible weight of the royal presence. His opinions were favourably entertained in the palace and the city; the influence of Theodora assured him a safe-conduct and honourable dismissal; and he ended his days, though not on the throne, yet in the bosom, of his native country. On the news of his death, Apollinaris indecently feasted the nobles and the clergy; but his joy was checked by the intelligence of a new election; and, while he enjoyed the wealth of Alexandria, his rivals reigned in the monasteries of Thebais, and were maintained by the voluntary oblations of the people. A perpetual succession of patriarchs arose from the ashes of Theodosius; and the Monophysite churches of Syria and Egypt were united by the name of Jacobites and the communion of the faith. But the same faith, which has been confined to a narrow sect of the Syrians, was diffused over the mass of the Egyptian or Coptic nation, who, almost unanimously, rejected the

decrees of the synod of Chalcedon. A thousand years were now elapsed since Egypt had ceased to be a kingdom, since the conquerors of Asia and Europe had trampled on the ready necks of a people whose ancient wisdom and power ascends beyond the records of history. The conflict of zeal and persecution rekindled some sparks of their national spirit. They abjured, with a foreign heresy, the manners and language of the Greeks: every Melchite, in their eyes, was a stranger, every Jacobite a citizen; the alliance of marriage, the offices of humanity, were condemned as a deadly sin; the natives renounced all allegiance to the emperor; and his orders, at a distance from Alexandria, were obeyed only under the pressure of military force. A generous effort might have redeemed the religion and liberty of Egypt, and her six hundred monasteries might have poured forth their myriads of holy warriors, for whom death should have no terrors, since life had no comfort or delight. But experience has proved the distinction of active and passive courage; the fanatic who endures without a groan the torture of the rack or the stake would tremble and fly before the face of an armed enemy. The pusillanimous temper of the Egyptians could only hope for a change of masters; the arms of Chosroes depopulated the land, yet under his reign the Jacobites enjoyed a short and precarious respite. The victory of Heraclius renewed and aggravated the persecution, and the patriarch again escaped from Alexandria to the desert. In his flight, Benjamin was encouraged by a voice which bade him expect, at the end of ten years, the aid of a foreign nation, marked like the Egyptians themselves with the ancient right of circumcision. The character of these deliverers and the nature of the deliverance will be hereafter explained; and I shall step over the interval of eleven centuries, to observe the present misery of the Jacobites of Egypt. The populous city of Cairo affords a residence, or rather a shelter, for their indigent patriarch and a remnant of ten bishops; forty monasteries have survived the inroads of the Arabs; and the progress of servitude and apostacy has reduced the Coptic nation to the despicable number of twenty-five or thirty thousand families:[151](#) a race of illiterate beggars, whose only consolation is derived from the superior wretchedness of the Greek patriarch and his diminutive congregation.[152](#)

VI. The Coptic patriarch, a rebel to the Cæsars, or a slave to the caliphs, still gloried in the filial obedience of the kings of Nubia and Æthiopia. He repaid their homage by magnifying their greatness; and it was boldly asserted that they could bring into the field an hundred thousand horse, with an equal number of camels;[153](#) that their hand could pour or restrain the waters of the Nile;[154](#) and the peace and plenty of Egypt was obtained, even in this world, by the intercession of the patriarch. In exile at Constantinople, Theodosius recommended to his patroness the conversion of the black nations of Nubia,[155](#) from the tropic of Cancer to the confines of Abyssinia. Her design was suspected, and emulated, by the more orthodox emperor. The rival missionaries, a Melchite and a Jacobite, embarked at the same time; but the empress, from a motive of love or fear, was more effectually obeyed; and the Catholic priest was detained by the president of Thebais while the king of Nubia and his court were

hastily baptised in the faith of Dioscorus. The tardy envoy of Justinian was received and dismissed with honour; but, when he accused the heresy and treason of the Egyptians, the negro convert was instructed to reply that he would never abandon his brethren, the true believers, to the persecuting ministers of the synod of Chalcedon.[156](#) During several ages the bishops of Nubia were named and consecrated by the Jacobite patriarch of Alexandria; as late as the twelfth century, Christianity prevailed; and some rites, some ruins, are still visible in the savage towns of Sennaar and Dongola.[157](#) But the Nubians at length executed their threats of returning to the worship of idols; the climate required the indulgence of polygamy; and they have finally preferred the triumph of the Koran to the abasement of the Cross. A metaphysical religion may appear too refined for the capacity of the negro race; yet a black or a parrot might be taught to repeat the *words* of the Chalcedonian or Monophysite creed.

Christianity was more deeply rooted in the Abyssinian empire; and, although the correspondence has been sometime interrupted above seventy or an hundred years, the mother-church of Alexandria retains her colony in a state of perpetual pupilage. Seven bishops once composed the Æthiopic synod: had their number amounted to ten, they might have elected an independent primate; and one of their kings was ambitious of promoting his brother to the ecclesiastical throne. But the event was foreseen, the increase was denied; the episcopal office has been gradually confined to the *abuna*,[158](#) the head and author of the Abyssinian priesthood; the patriarch supplies each vacancy with an Egyptian monk; and the character of a stranger appears more venerable in the eyes of the people, less dangerous in those of the monarch. In the sixth century, when the schism of Egypt was confirmed, the rival chiefs, with their patrons Justinian and Theodora, strove to outstrip each other in the conquest of a remote and independent province. The industry of the empress was again victorious, and the pious Theodora has established in that sequestered church the faith and discipline of the Jacobites.[159](#) Encompassed on all sides by the enemies of their religion, the Æthiopians slept near a thousand years, forgetful of the world, by whom they were forgotten. They were awakened by the Portuguese, who, turning the southern promontory of Africa, appeared in India and the Red Sea, as if they had descended through the air from a distant planet. In the first moments of their interview, the subjects of Rome and Alexandria observed the resemblance, rather than the difference, of their faith; and each nation expected the most important benefits from an alliance with their Christian brethren. In their lonely situation, the Æthiopians had almost relapsed into the savage life. Their vessels, which had traded to Ceylon, scarcely presumed to navigate the rivers of Africa; the ruins of Axume were deserted, the nation was scattered in villages, and the emperor (a pompous name) was content, both in peace and war, with the immoveable residence of a camp. Conscious of their own indigence, the Abyssinians had formed the rational project of importing the arts and ingenuity of Europe;[160](#) and their ambassadors at Rome and Lisbon were instructed to solicit a colony of smiths, carpenters, tilers, masons, printers, surgeons, and physicians, for the

use of their country. But the public danger soon called for the instant and effectual aid of arms and soldiers to defend an unwarlike people from the Barbarians who ravaged the inland country, and the Turks and Arabs who advanced from the sea-coast in more formidable array. Æthiopia was saved by four hundred and fifty Portuguese, who displayed in the field the native valour of Europeans and the artificial powers of the musket and cannon. In a moment of terror, the emperor had promised to reconcile himself and his subjects to the Catholic faith; a Latin patriarch represented the supremacy of the pope;[161](#) the empire, enlarged in a tenfold proportion, was supposed to contain more gold than the mines of America; and the wildest hopes of avarice and zeal were built on the willing submission of the Christians of Africa.

But the vows which pain had extorted were forsworn on the return of health. The Abyssinians still adhered with unshaken constancy to the Monophysite faith; their languid belief was inflamed by the exercise of dispute; they branded the Latins with the names of Arians and Nestorians, and imputed the adoration of *four* gods to those who separated the two natures of Christ. Fremona, a place of worship, or rather of exile, was assigned to the Jesuit missionaries. Their skill in the liberal and mechanic arts, their theological learning, and the decency of their manners inspired a barren esteem; but they were not endowed with the gift of miracles,[162](#) and they vainly solicited a reinforcement of European troops. The patience and dexterity of forty years at length obtained a more favourable audience, and two emperors of Abyssinia were persuaded that Rome could ensure the temporal and everlasting happiness of her votaries. The first of these royal converts lost his crown and his life; and the rebel army was sanctified by the *abuna*, who hurled an anathema at the apostate, and absolved his subjects from their oath of fidelity. The fate of Zadenghel was revenged by the courage and fortune of Susneus, who ascended the throne under the name of Segued, and more vigorously prosecuted the pious enterprise of his kinsman. After the amusement of some unequal combats between the Jesuits and his illiterate priests, the emperor declared himself a proselyte to the synod of Chalcedon, presuming that his clergy and people would embrace without delay the religion of their prince. The liberty of choice was succeeded by a law which imposed, under pain of death, the belief of the two natures of Christ: the Abyssinians were enjoined to work and to play on the Sabbath; and Segued, in the face of Europe and Africa, renounced his connection with the Alexandrian church. A Jesuit, Alphonso Mendez, the Catholic patriarch of Æthiopia, accepted in the name of Urban VIII. the homage and abjuration of his penitent. “I confess,” said the emperor on his knees, “I confess that the pope is the vicar of Christ, the successor of St. Peter, and the sovereign of the world. To him I swear true obedience, and at his feet I offer my person and kingdom.” A similar oath was repeated by his son, his brother, the clergy, the nobles, and even the ladies of the court; the Latin patriarch was invested with honours and wealth; and his missionaries erected their churches or citadels in the most convenient stations of the empire. The Jesuits themselves deplore the fatal indiscretion of their chief, who forgot the mildness of the gospel and the policy of his order, to introduce with hasty violence the liturgy of

Rome and the inquisition of Portugal. He condemned the ancient practice of circumcision, which health rather than superstition had first invented in the climate of Æthiopia.¹⁶³ A new baptism, a new ordination, was inflicted on the natives; and they trembled with horror when the most holy of the dead were torn from their graves, when the most illustrious of the living were excommunicated by a foreign priest. In the defence of their religion and liberty, the Abyssinians rose in arms, with desperate but unsuccessful zeal. Five rebellions were extinguished in the blood of the insurgents; two abunas were slain in battle, whole legions were slaughtered in the field, or suffocated in their caverns: and neither merit nor rank nor sex could save from an ignominious death the enemies of Rome. But the victorious monarch was finally subdued by the constancy of the nation, of his mother, of his son, and of his most faithful friends. Segued listened to the voice of pity, of reason, perhaps of fear; and his edict of liberty of conscience instantly revealed the tyranny and weakness of the Jesuits. On the death of his father, Basilides expelled the Latin patriarch, and restored to the wishes of the nation the faith and the discipline of Egypt. The Monophysite churches resounded with a song of triumph, “that the sheep of Æthiopia were now delivered from the hyenas of the West;” and the gates of that solitary realm were for ever shut against the arts, the science, and the fanaticism of Europe.¹⁶⁴

CHAPTER XLVIII

Plan of the last two [quarto] Volumes — Succession and Characters of the Greek Emperors of Constantinople, from the Time of Heraclius to the Latin Conquest

I have now deduced from Trajan to Constantine, from Constantine to Heraclius, the regular series of the Roman emperors; and faithfully exposed the prosperous and adverse fortunes of their reigns. Five centuries of the decline and fall of the empire have already elapsed; but a period of more than eight hundred years still separates me from the term of my labours, the taking of Constantinople by the Turks. Should I persevere in the same course, should I observe the same measure, a prolix and slender thread would be spun through many a volume, nor would the patient reader find an adequate reward of instruction or amusement. At every step, as we sink deeper in the decline and fall of the Eastern empire, the annals of each succeeding reign would impose a more ungrateful and melancholy task. These annals must continue to repeat a tedious and uniform tale of weakness and misery; the natural connection of causes and events would be broken by frequent and hasty transitions, and a minute accumulation of circumstances must destroy the light and effect of those general pictures which compose the use and ornament of a remote history. From the time of Heraclius, the Byzantine theatre is contracted and darkened; the line of empire, which had been defined by the laws of Justinian and the arms of Belisarius, recedes on all sides from

our view; the Roman name, the proper subject of our inquiries, is reduced to a narrow corner of Europe, to the lonely suburbs of Constantinople; and the fate of the Greek empire has been compared to that of the Rhine, which loses itself in the sands before its waters can mingle with the ocean. The scale of dominion is diminished to our view by the distance of time and place; nor is the loss of external splendour compensated by the nobler gifts of virtue and genius. In the last moments of her decay, Constantinople was doubtless more opulent and populous than Athens at her most flourishing era, when a scanty sum of six thousand talents, or twelve hundred thousand pounds sterling, was possessed by twenty-one thousand male citizens of an adult age. But each of these citizens was a freeman, who dared to assert the liberty of his thoughts, words, and actions; whose person and property were guarded by equal law; and who exercised his independent vote in the government of the republic. Their numbers seem to be multiplied by the strong and various discriminations of character: under the shield of freedom, on the wings of emulation and vanity, each Athenian aspired to the level of the national dignity; from this commanding eminence some chosen spirits soared beyond the reach of a vulgar eye; and the chances of superior merit in a great and populous kingdom, as they are proved by experience, would excuse the computation of imaginary millions. The territories of Athens, Sparta, and their allies do not exceed a moderate province of France or England; but, after the trophies of Salamis and Plataea, they expand in our fancy to the gigantic size of Asia, which had been trampled under the feet of the victorious Greeks. But the subjects of the Byzantine empire, who assume and dishonour the names both of Greeks and Romans, present a dead uniformity of abject vices, which are neither softened by the weakness of humanity nor animated by the vigour of memorable crimes. The freemen of antiquity might repeat, with generous enthusiasm, the sentence of Homer, "that, on the first day of his servitude, the captive is deprived of one half of his manly virtue." But the poet had only seen the effects of civil or domestic slavery, nor could he foretell that the second moiety of manhood must be annihilated by the spiritual despotism which shackles not only the actions but even the thoughts of the prostrate votary. By this double yoke, the Greeks were oppressed under the successors of Heraclius; the tyrant, a law of eternal justice, was degraded by the vices of his subjects; and on the throne, in the camp, in the schools, we search, perhaps with fruitless diligence, the names and characters that may deserve to be rescued from oblivion. Nor are the defects of the subject compensated by the skill and variety of the painters. Of a space of eight hundred years, the four first centuries are overspread with a cloud, interrupted by some faint and broken rays of historic light; in the lives of the emperors, from Maurice to Alexius, Basil the Macedonian has alone been the theme of a separate work; and the absence, or loss, or imperfection of contemporary evidence must be poorly supplied by the doubtful authority of more recent compilers. The four last centuries are exempt from the reproach of penury; and with the Comnenian family the historic muse of Constantinople again revives, but her apparel is gaudy, her motions are without elegance or grace. A succession of priests, or courtiers, treads in each other's footsteps in the same path of servitude and superstition: their views are narrow, their judgment

is feeble or corrupt; and we close the volume of copious barrenness, still ignorant of the causes of events, the characters of the actors, and the manners of the times, which they celebrate or deplore. The observation which has been applied to a man may be extended to a whole people, that the energy of the sword is communicated to the pen; and it will be found, by experience, that the tone of history will rise or fall with the spirit of the age.

From these considerations, I should have abandoned, without regret, the Greek slaves and their servile historians, had I not reflected that the fate of the Byzantine monarchy is *passively* connected with the most splendid and important revolutions which have changed the state of the world. The space of the lost provinces was immediately replenished with new colonies and rising kingdoms; the active virtues of peace and war deserted from the vanquished to the victorious nations; and it is in their origin and conquests, in their religion and government, that we must explore the causes and effects of the decline and fall of the Eastern empire. Nor will this scope of narrative, the riches and variety of these materials, be incompatible with the unity of design and composition. As, in his daily prayers, the Musulman of Fez or Delhi still turns his face towards the temple of Mecca, the historian's eye shall be always fixed on the city of Constantinople. The excursive line may embrace the wilds of Arabia and Tartary, but the circle will be ultimately reduced to the decreasing limit of the Roman monarchy.

On this principle, I shall now establish the plan of the last two volumes of the present work. The first chapter will contain, in a regular series, the emperors who reigned at Constantinople during a period of six hundred years, from the days of Heraclius to the Latin conquest: a rapid abstract, which may be supported by a *general* appeal to the order and text of the original historians. In this introduction, I shall confine myself to the revolutions of the throne, the successions of families, the personal characters of the Greek princes, the mode of their life and death, the maxims and influence of their domestic government, and the tendency of their reign to accelerate or suspend the downfall of the Eastern empire. Such a chronological review will serve to illustrate the various argument of the subsequent chapters; and each circumstance of the eventful story of the Barbarians will adapt itself in a proper place to the Byzantine annals. The internal state of the empire, and the dangerous heresy of the Paulicians, which shook the East and enlightened the West, will be the subject of two separate chapters; but these inquiries must be postponed till our further progress shall have opened the view of the world in the ninth and tenth centuries of the Christian era. After this foundation of Byzantine history, the following nations will pass before our eyes, and each will occupy the space to which it may be entitled by greatness or merit, or the degree of connection with the Roman world and the present age. I. The Franks: a general appellation which includes all the Barbarians of France, Italy, and Germany, who were united by the sword and sceptre of Charlemagne. The persecution of images and their votaries separated Rome and Italy from the Byzantine throne, and prepared the restoration of the Roman empire in the West. II. The Arabs or Saracens. Three ample

chapters will be devoted to this curious and interesting object. In the first, after a picture of the country and its inhabitants, I shall investigate the character of Mahomet; the character, religion, and success of the prophet. In the second, I shall lead the Arabs to the conquest of Syria, Egypt, and Africa, the provinces of the Roman empire; nor can I check their victorious career till they have overthrown the monarchies of Persia and Spain. In the third, I shall inquire how Constantinople and Europe were saved by the luxury and arts, the division and decay, of the empire of the caliphs. A single chapter will include, III. The Bulgarians, IV. Hungarians, and V. Russians, who assaulted by sea or by land the provinces and the capital; but the last of these, so important in their present greatness, will excite some curiosity in their origin and infancy. VI. The Normans; or rather the private adventurers of that warlike people, who founded a powerful kingdom in Apulia and Sicily, shook the throne of Constantinople, displayed the trophies of chivalry, and almost realised the wonders of romance. VII. The Latins; the subjects of the pope, the nations of the West, who enlisted under the banner of the Cross, for the recovery or relief of the holy sepulchre. The Greek emperors were terrified and preserved by the myriads of pilgrims who marched to Jerusalem with Godfrey of Bouillon and the peers of Christendom. The second and third crusades trod in the footsteps of the first: Asia and Europe were mingled in a sacred war of two hundred years; and the Christian powers were bravely resisted, and finally expelled, by Saladin and the Mamalukes of Egypt. In these memorable crusades, a fleet and army of French and Venetians were diverted from Syria to the Thracian Bosphorus; they assaulted the capital, they subverted the Greek monarchy; and a dynasty of Latin princes was seated near threescore years on the throne of Constantine. VIII. The Greeks themselves, during this period of captivity and exile, must be considered as a foreign nation, the enemies, and again the sovereigns, of Constantinople. Misfortune had rekindled a spark of national virtue; and the Imperial series may be continued, with some dignity, from their restoration to the Turkish conquest. IX. The Moguls and Tartars. By the arms of Zingis and his descendants the globe was shaken from China to Poland and Greece; the Sultans were overthrown; the caliphs fell; and the Cæsars trembled on their throne. The victories of Timour suspended, above fifty years, the final ruin of the Byzantine empire. X. I have already noticed the first appearance of the Turks; and the names of the fathers, of *Seljuk* and *Othman*, discriminate the two successive dynasties of the nation which emerged in the eleventh century from the Scythian wilderness. The former established a potent and splendid kingdom from the banks of the Oxus to Antioch and Nice; and the first crusade was provoked by the violation of Jerusalem and the danger of Constantinople. From an humble origin, the *Ottomans* arose, the scourge and terror of Christendom. Constantinople was besieged and taken by Mahomet II., and his triumph annihilates the remnant, the image, the title, of the Roman empire in the East. The schism of the Greeks will be connected with their last calamities, and the restoration of learning in the Western world. I shall return from the captivity of the new, to the ruins of ancient, Rome; and the venerable name, the interesting theme, will shed a ray of glory on the conclusion of my labours.[1](#)

The emperor Heraclius had punished a tyrant and ascended his throne; and the memory of his reign is perpetuated by the transient conquest, and irreparable loss, of the Eastern provinces. After the death of Eudocia, his first wife, he disobeyed the patriarch, and violated the laws, by his second marriage with his niece Martina; and the superstition of the Greeks beheld the judgment of heaven in the diseases of the father and the deformity of his offspring.¹ But the opinion of an illegitimate birth is sufficient to distract the choice, and loosen the obedience, of the people; the ambition of Martina was quickened by maternal love, and perhaps by the envy of a step-mother; and the aged husband was too feeble to withstand the arts of conjugal allurements. Constantine, his eldest son, enjoyed in a mature age the title of Augustus; but the weakness of his constitution required a colleague and a guardian, and he yielded with secret reluctance to the partition of the empire. The senate was summoned to the palace to ratify or attest the association of Heracleonas, the son of Martina;² the imposition of the diadem was consecrated by the prayer and blessing of the patriarch; the senators and patricians adored the majesty of the great emperor and the partners of his reign; and, as soon as the doors were thrown open, they were hailed by the tumultuary but important voice of the soldiers. After an interval of five months, the pompous ceremonies which formed the essence of the Byzantine state were celebrated in the cathedral and hippodrome; the concord of the royal brothers was affectingly displayed by the younger leaning on the arm of the elder; and the name of Martina was mingled in the reluctant or venal acclamations of the people. Heraclius survived this association about two years; his last testimony declared his two sons the equal heirs of the Eastern empire, and commanded them to honour his widow Martina as their mother and their sovereign.

When Martina first appeared on the throne with the name and attributes of royalty, she was checked by a firm, though respectful, opposition; and the dying embers of freedom were kindled by the breath of superstitious prejudice. “We reverence,” exclaimed the voice of a citizen, “we reverence the mother of our princes; but to those princes alone our obedience is due; and Constantine, the elder emperor, is of an age to sustain, in his own hands, the weight of the sceptre. Your sex is excluded by nature from the toils of government. How could you combat, how could you answer, the Barbarians, who, with hostile or friendly intentions, may approach the royal city? May heaven avert from the Roman republic this national disgrace, which would provoke the patience of the slaves of Persia!” Martina descended from the throne with indignation, and sought a refuge in the female apartment of the palace. The reign of Constantine the Third lasted only one hundred and three days; he expired in the thirtieth year of his age, and, although his life had been a long malady, a belief was entertained that poison had been the means, and his cruel step-mother the author, of his untimely fate. Martina reaped, indeed, the harvest of his death, and assumed the government in the name of the surviving emperor; but the incestuous widow of Heraclius was universally abhorred; the jealousy of the people was awakened; and the two orphans, whom

Constantine had left, became the objects of the public care. It was in vain that the son of Martina, who was no more than fifteen years of age, was taught to declare himself the guardian of his nephews, one of whom he had presented at the baptismal font; it was in vain that he swore on the wood of the true cross to defend them against all their enemies. On his death-bed, the late emperor despatched a trusty servant to arm the troops and provinces of the East in the defence of his helpless children; the eloquence and liberality of Valentin had been successful, and from his camp of Chalcedon he boldly demanded the punishment of the assassins and the restoration of the lawful heir. The licence of the soldiers, who devoured the grapes and drank the wine of their Asiatic vineyards, provoked the citizens of Constantinople against the domestic authors of their calamities, and the dome of St. Sophia re-echoed, not with prayers and hymns, but with the clamours and imprecations of an enraged multitude. At their imperious command, Heracleonas appeared in the pulpit with the eldest of the royal orphans; Constans alone was saluted as emperor of the Romans; and a crown of gold, which had been taken from the tomb of Heraclius, was placed on his head, with the solemn benediction of the patriarch. But in the tumult of joy and indignation the church was pillaged, the sanctuary was polluted by a promiscuous crowd of Jews and Barbarians; and the Monothelite Pyrrhus, a creature of the empress, after dropping a protestation on the altar, escaped by a prudent flight from the zeal of the Catholics. A more serious and bloody task was reserved for the senate, who derived a temporary strength from the consent of the soldiers and people. The spirit of Roman freedom revived the ancient and awful examples of the judgment of tyrants, and the Imperial culprits were deposed and condemned as the authors of the death of Constantine. But the severity of the conscript fathers was stained by the indiscriminate punishment of the innocent and the guilty: Martina and Heracleonas were sentenced to the amputation, the former of her tongue, the latter of his nose; and after this cruel execution they consumed the remainder of their days in exile and oblivion. The Greeks who were capable of reflection might find some consolation for their servitude, by observing the abuse of power when it was lodged for a moment in the hands of an aristocracy.

We shall imagine ourselves transported five hundred years backwards to the age of the Antonines, if we listen to the oration which Constans II.³ pronounced in the twelfth year of his age before the Byzantine senate. After returning his thanks for the just punishment of the assassins who had intercepted the fairest hopes of his father's reign, "By the divine providence," said the young emperor, "and by your righteous decree, Martina and her incestuous progeny have been cast headlong from the throne. Your majesty and wisdom have prevented the Roman state from degenerating into lawless tyranny. I therefore exhort and beseech you to stand forth as the counsellors and judges of the common safety." The senators were gratified by the respectful address and liberal donative of their sovereign; but these servile Greeks were unworthy and regardless of freedom; and, in his mind, the lesson of an hour was quickly erased by the prejudices of the age and the habits of despotism. He retained only a jealous fear

lest the senate or people should one day invade the right of primogeniture and seat his brother Theodosius on an equal throne. By the imposition of holy orders, the grandson of Heraclius was disqualified for the purple; but this ceremony, which seemed to profane the sacraments of the church, was insufficient to appease the suspicions of the tyrant, and the death of the deacon Theodosius could alone expiate the crime of his royal birth. His murder was avenged by the imprecations of the people, and the assassin, in the fulness of power, was driven from his capital into voluntary and perpetual exile. Constans embarked for Greece; and, as if he meant to retort the abhorrence which he deserved, he is said, from the Imperial galley, to have spit against the walls of his native city. After passing the winter at Athens, he sailed to Tarentum in Italy, visited Rome, and concluded a long pilgrimage of disgrace and sacrilegious rapine, by fixing his residence at Syracuse.⁴ But, if Constans could fly from his people, he could not fly from himself. The remorse of his conscience created a phantom who pursued him by land and sea, by day and by night; and the visionary Theodosius, presenting to his lips a cup of blood, said, or seemed to say, "Drink, brother, drink:" a sure emblem of the aggravation of his guilt, since he had received from the hands of the deacon the mystic cup of the blood of Christ.⁵ Odious to himself and to mankind, Constans perished by domestic, perhaps by episcopal, treason in the capital of Sicily. A servant who waited in the bath, after pouring warm water on his head, struck him violently with the vase. He fell, stunned by the blow and suffocated by the water; and his attendants, who wondered at the tedious delay, beheld with indifference the corpse of their lifeless emperor. The troops of Sicily invested with the purple an obscure youth, whose inimitable beauty eluded, and it might easily elude, the declining art of the painters and sculptors of the age.

Constans had left in the Byzantine palace three sons, the eldest of whom had been clothed in his infancy with the purple. When the father summoned them to attend his person in Sicily, these precious hostages were detained by the Greeks, and a firm refusal informed him that they were the children of the state. The news of his murder was conveyed with almost supernatural speed from Syracuse to Constantinople; and Constantine, the eldest of his sons, inherited his throne without being the heir of the public hatred.⁶ His subjects contributed with zeal and alacrity, to chastise the guilt and presumption of a province which had usurped the rights of the senate and people; the young emperor sailed from the Hellespont with a powerful fleet; and the legions of Rome and Carthage were assembled under his standard in the harbour of Syracuse. The defeat of the Sicilian tyrant was easy, his punishment just, and his beauteous head was exposed in the hippodrome; but I cannot applaud the clemency of a prince who, among a crowd of victors, condemned the son of a patrician for deploring with some bitterness the execution of a virtuous father. The youth was castrated; he survived the operation; and the memory of this indecent cruelty is preserved by the elevation of Germanus to the rank of a patriarch and saint. After pouring this bloody libation on his father's tomb, Constantine returned to his capital, and the growth of his young beard during the Sicilian voyage was announced, by the familiar surname of Pogonatus, to

the Grecian world. But his reign, like that of his predecessor, was stained with fraternal discord. On his two brothers, Heraclius and Tiberius, he had bestowed the title of Augustus: an empty title, for they continued to languish, without trust or power, in the solitude of the palace. At their secret instigation, the troops of the Anatolian *theme*⁷ or province approached the city on the Asiatic side, demanded for the royal brothers the partition or exercise of sovereignty, and supported their seditious claim by a theological argument. They were Christians (they cried) and orthodox Catholics; the sincere votaries of the holy and undivided Trinity. Since there are three equal persons in heaven, it is reasonable there should be three equal persons upon earth. The emperor invited these learned divines to a friendly conference, in which they might propose their arguments to the senate; they obeyed the summons; but the prospect of their bodies hanging on the gibbet in the suburb of Galata reconciled their companions to the unity of the reign of Constantine. He pardoned his brothers, and their names were still pronounced in the public acclamations; but, on the repetition or suspicion of a similar offence, the obnoxious princes were deprived of their titles and noses, in the presence of the Catholic bishops who were assembled at Constantinople in the sixth general synod. In the close of his life, Pogonatus was anxious only to establish the right of primogeniture; the hair of his two sons, Justinian and Heraclius, was offered on the shrine of St. Peter, as a symbol of their spiritual adoption by the pope; but the elder was alone exalted to the rank of Augustus and the assurance of the empire.

After the decease of his father, the inheritance of the Roman world devolved to Justinian II.; and the name of a triumphant lawgiver was dishonoured by the vices of a boy, who imitated his namesake only in the expensive luxury of building. His passions were strong; his understanding was feeble; and he was intoxicated with a foolish pride that his birth had given him the command of millions, of whom the smallest community would not have chosen him for their local magistrate. His favourite ministers were two beings the least susceptible of human sympathy, an eunuch and a monk; to the one he abandoned the palace, to the other the finances; the former corrected the emperor's mother with a scourge, the latter suspended the insolvent tributaries, with their heads downwards, over a slow and smoky fire. Since the days of Commodus and Caracalla, the cruelty of the Roman princes had most commonly been the effect of their fear; but Justinian, who possessed some vigour of character, enjoyed the sufferings, and braved the revenge, of his subjects about ten years, till the measure was full, of his crimes and of their patience. In a dark dungeon, Leontius, a general of reputation, had groaned above three years with some of the noblest and most deserving of the patricians; he was suddenly drawn forth to assume the government of Greece; and this promotion of an injured man was a mark of the contempt rather than of the confidence of his prince. As he was followed to the port by the kind offices of his friends, Leontius observed, with a sigh, that he was a victim adorned for sacrifice and that inevitable death would pursue his footsteps. They ventured to reply that glory and empire might be the recompense of a generous resolution; that every order of men abhorred the reign of a monster; and that the hands of two hundred thousand patriots

expected only the voice of a leader. The night was chosen for their deliverance; and, in the first effort of the conspirators, the prefect was slain and the prisons were forced open; the emissaries of Leontius proclaimed in every street, “Christians, to St. Sophia!”; and the seasonable text of the patriarch, “this is the day of the Lord!” was the prelude of an inflammatory sermon. From the church the people adjourned to the hippodrome; Justinian, in whose cause not a sword had been drawn, was dragged before these tumultuary judges, and their clamours demanded the instant death of the tyrant. But Leontius, who was already clothed with the purple, cast an eye of pity on the prostrate son of his own benefactor, and of so many emperors. The life of Justinian was spared; the amputation of his nose, perhaps of his tongue, was imperfectly performed; the happy flexibility of the Greek language could impose the name of Rhinotmetus; and the mutilated tyrant was banished to Chersonæ in Crim-Tartary, a lonely settlement, where corn, wine, and oil were imported as foreign luxuries.

On the edge of the Scythian wilderness, Justinian still cherished the pride of his birth and the hope of his restoration. After three years’ exile, he received the pleasing intelligence that his injury was avenged by a second revolution, and that Leontius⁸ in his turn had been dethroned and mutilated by the rebel Apsimar, who assumed the more respectable name of Tiberius. But the claim of lineal succession was still formidable to a plebeian usurper; and his jealousy was stimulated by the complaints and charges of the Chersonites, who beheld the vices of the tyrant in the spirit of the exile. With a band of followers, attached to his person by common hope or common despair, Justinian fled from the inhospitable shore to the horde of the Chozars, who pitched their tents between the Tanais and Borysthenes. The khan entertained with pity and respect the royal suppliant; Phanagoria, once an opulent city, on the Asiatic side of the lake Mæotis, was assigned for his residence; and every Roman prejudice was stifled in his marriage with the sister of the Barbarian, who seems, however, from the name of Theodora, to have received the sacrament of baptism.⁹ But the faithless Chozar was soon tempted by the gold of Constantinople; and, had not the design been revealed by the conjugal love of Theodora, her husband must have been assassinated or betrayed into the power of his enemies. After strangling, with his own hands, the two emissaries of the khan, Justinian sent back his wife to her brother, and embarked on the Euxine in search of new and more faithful allies. His vessel was assaulted by a violent tempest; and one of his pious companions advised him to deserve the mercy of God by a vow of general forgiveness, if he should be restored to the throne. “Of forgiveness?” replied the intrepid tyrant; “may I perish this instant — may the Almighty overwhelm me in the waves — if I consent to spare a single head of my enemies!” He survived this impious menace, sailed into the mouth of the Danube, trusted his person in the royal village of the Bulgarians, and purchased the aid of Terbelis, a Pagan conqueror, by the promise of his daughter and a fair partition of the treasures of the empire. The Bulgarian kingdom¹⁰ extended to the confines of Thrace; and the two princes besieged Constantinople at the head of fifteen thousand horse. Apsimar was dismayed by the sudden and hostile apparition of his rival, whose head

had been promised by the Chozar, and of whose evasion he was yet ignorant. After an absence of ten years, the crimes of Justinian were faintly remembered, and the birth and misfortunes of their hereditary sovereign excited the pity of the multitude, ever discontented with the ruling powers; and by the active diligence of his adherents he was introduced into the city and palace of Constantine.

In rewarding his allies and recalling his wife, Justinian displayed some sense of honour and gratitude; and Terbelis retired, after sweeping away an heap of gold coin, which he measured with his Scythian whip. But never was vow more religiously performed than the sacred oath of revenge which he had sworn amidst the storms of the Euxine. The two usurpers, for I must reserve the name of tyrant for the conqueror, were dragged into the hippodrome, the one from his prison, the other from his palace. Before their execution, Leontius and Apsimar were cast prostrate in chains beneath the throne of the emperor; and Justinian, planting a foot on each of their necks, contemplated above an hour the chariotrace, while the inconstant people shouted, in the words of the Psalmist, “Thou shalt trample on the asp and basilisk, and on the lion and dragon shalt thou set thy foot!”¹¹ The universal defection which he had once experienced might provoke him to repeat the wish of Caligula, that the Roman people had but one head. Yet I shall presume to observe that such a wish is unworthy of an ingenious tyrant, since his revenge and cruelty would have been extinguished by a single blow, instead of the slow variety of tortures which Justinian inflicted on the victims of his anger. His pleasures were inexhaustible; neither private virtue nor public service could expiate the guilt of active or even passive obedience to an established government; and, during the six years of his new reign, he considered the axe, the cord, and the rack as the only instruments of royalty.¹² But his most implacable hatred was pointed against the Chersonites, who had insulted his exile and violated the laws of hospitality. Their remote situation afforded some means of defence, or at least of escape; and a grievous tax was imposed on Constantinople, to supply the preparations of a fleet and army. “All are guilty, and all must perish,” was the mandate of Justinian; and the bloody execution was entrusted to his favourite Stephen, who was recommended by the epithet of the Savage. Yet even the savage Stephen imperfectly accomplished the intentions of his sovereign. The slowness of his attack allowed the greater part of the inhabitants to withdraw into the country; and the minister of vengeance contented himself with reducing the youth of both sexes to a state of servitude, with roasting alive seven of the principal citizens, with drowning twenty in the sea, and with reserving forty-two in chains to receive their doom from the mouth of the emperor. In their return, the fleet was driven on the rocky shores of Anatolia, and Justinian applauded the obedience of the Euxine, which had involved so many thousands of his subjects and enemies in a common shipwreck; but the tyrant was still insatiate of blood, and a second expedition was commanded to extirpate the remains of the proscribed colony. In the short interval, the Chersonites had returned to their city, and were prepared to die in arms; the khan of the Chozars had renounced the cause of his odious brother; the exiles of every province were assembled in Tauris; and Bardanes,

under the name of Philippicus, was invested with the purple. The Imperial troops, unwilling and unable to perpetrate the revenge of Justinian, escaped his displeasure by abjuring his allegiance; the fleet, under their new sovereign, steered back a more auspicious course to the harbours of Sinope and Constantinople; and every tongue was prompt to pronounce, every hand to execute, the death of the tyrant.¹³ Destitute of friends, he was deserted by his Barbarian guards; and the stroke of the assassin was praised as an act of patriotism and Roman virtue. His son Tiberius had taken refuge in a church; his aged grandmother guarded the door; and the innocent youth, suspending round his neck the most formidable relics, embraced with one hand the altar, with the other the wood of the true cross. But the popular fury that dares to trample on superstition is deaf to the cries of humanity; and the race of Heraclius was extinguished after a reign of one hundred years.

Between the fall of the Heraclian and the rise of the Isaurian dynasty, a short interval of six years is divided into three reigns. Bardanes,¹⁴ or Philippicus, was hailed at Constantinople as an hero who had delivered his country from a tyrant; and he might taste some moments of happiness in the first transports of sincere and universal joy. Justinian had left behind him an ample treasure, the fruit of cruelty and rapine; but this useful fund was soon and idly dissipated by his successor. On the festival of his birthday, Philippicus entertained the multitude with the games of the hippodrome; from thence he paraded through the streets with a thousand banners and a thousand trumpets; refreshed himself in the baths of Zeuxippus; and, returning to the palace, entertained his nobles with a sumptuous banquet. At the meridian hour he withdrew to his chamber, intoxicated with flattery and wine, and forgetful that his example had made every subject ambitious and that every ambitious subject was his secret enemy. Some bold conspirators introduced themselves in the disorder of the feast; and the slumbering monarch was surprised, bound, blinded, and deposed, before he was sensible of his danger. Yet the traitors were deprived of their reward; and the free voice of the senate and people promoted Artemius from the office of secretary to that of emperor: he assumed the title of Anastasius the Second, and displayed in a short and troubled reign the virtues both of peace and war. But, after the extinction of the Imperial line, the rule of obedience was violated, and every change diffused the seeds of new revolutions. In a mutiny of the fleet, an obscure and reluctant officer of the revenue was forcibly invested with the purple; after some months of a naval war, Anastasius resigned the sceptre;¹⁵ and the conqueror, Theodosius the Third, submitted in his turn to the superior ascendant of Leo, the general and emperor of the Oriental troops. His two predecessors were permitted to embrace the ecclesiastical profession; the restless impatience of Anastasius tempted him to risk and to lose his life in a treasonable enterprise; but the last days of Theodosius were honourable and secure. The single sublime word, “health,” which he inscribed on his tomb, expresses the confidence of philosophy or religion; and the fame of his miracles was long preserved among the people of Ephesus. This convenient shelter of the church might sometimes impose a lesson of clemency; but it may be questioned whether it is for the public

interest to diminish the perils of unsuccessful ambition.

I have dwelt on the fall of a tyrant; I shall briefly represent the founder of a new dynasty, who is known to posterity by the invectives of his enemies, and whose public and private life is involved in the ecclesiastical story of the Iconoclasts. Yet in spite of the clamours of superstition, a favourable prejudice for the character of Leo the Isaurian may be reasonably drawn from the obscurity of his birth and the duration of his reign.[16](#) — I. In an age of manly spirit, the prospect of an Imperial reward would have kindled every energy of the mind, and produced a crowd of competitors as deserving as they were desirous to reign. Even in the corruption and debility of the modern Greeks, the elevation of a plebeian from the last to the first rank of society supposes some qualifications above the level of the multitude. He would probably be ignorant and disdainful of speculative science; and in the pursuit of fortune he might absolve himself from the obligations of benevolence and justice; but to his character we may ascribe the useful virtues of prudence and fortitude, the knowledge of mankind, and the important art of gaining their confidence and directing their passions. It is agreed that Leo was a native of Isauria,[17](#) and that Conon was his primitive name. The writers, whose awkward satire is praise, describe him as an itinerant pedlar, who drove an ass with some paltry merchandise to the country fairs; and foolishly relate that he met on the road some Jewish fortunetellers, who promised him the Roman empire on condition that he should abolish the worship of idols. A more probable account relates the migration of his father from Asia Minor to Thrace, where he exercised the lucrative trade of a grazier; and he must have acquired considerable wealth, since the first introduction of his son was procured by a supply of five hundred sheep to the Imperial camp. His first service was in the guards of Justinian, where he soon attracted the notice, and by degrees the jealousy, of the tyrant. His valour and dexterity were conspicuous in the Colchian war;[18](#) from Anastasius he received the command of the Anatolian legions; and by the suffrage of the soldiers he was raised to the empire, with the general applause of the Roman world. — II. In this dangerous elevation, Leo the Third supported himself against the envy of his equals, the discontent of a powerful faction, and the assaults of his foreign and domestic enemies. The Catholics, who accuse his religious innovations, are obliged to confess that they were undertaken with temper and conducted with firmness. Their silence respects the wisdom of his administration and the purity of his manners. After a reign of twenty-four years, he peaceably expired in the palace of Constantinople; and the purple which he had acquired was transmitted, by the right of inheritance, to the third generation.

In a long reign of thirty-four years, the son and successor of Leo, Constantine the Fifth, surnamed Copronymus,[19](#) attacked, with less temperate zeal, the images or idols of the church. Their votaries have exhausted the bitterness of religious gall in their portrait of this spotted panther, this antichrist, this flying dragon of the serpent's seed, who surpassed the vices of Elagabalus and Nero. His reign was a long butchery of

whatever was most noble, or holy, or innocent in his empire. In person, the emperor assisted at the execution of his victims, surveyed their agonies, listened to their groans, and indulged, without satiating, his appetite for blood; a plate of noses was accepted as a grateful offering, and his domestics were often scourged or mutilated by the royal hand. His surname was derived from his pollution of his baptismal font.[19a](#) The infant might be excused; but the manly pleasures of Copronymus degraded him below the level of a brute; his lust confounded the eternal distinctions of sex and species; and he seemed to extract some unnatural delight from the objects most offensive to human sense. In his religion, the Iconoclast was an Heretic, a Jew, a Mahometan, a Pagan, and an Atheist; and his belief of an invisible power could be discovered only in his magic rites, human victims, and nocturnal sacrifices to Venus and the demons of antiquity. His life was stained with the most opposite vices, and the ulcers which covered his body anticipated before his death the sentiment of hell-tortures. Of these accusations, which I have so patiently copied, a part is refuted by its own absurdity; and, in the private anecdotes of the life of princes, the lie is more easy as the detection is more difficult. Without adopting the pernicious maxim that, where much is alleged, something must be true, I can however discern that Constantine the Fifth was dissolute and cruel. Calumny is more prone to exaggerate than to invent; and her licentious tongue is checked in some measure by the experience of the age and country to which she appeals. Of the bishops and monks, the generals and magistrates, who are said to have suffered under his reign, the numbers are recorded, the names were conspicuous, the execution was public, the mutilation visible and permanent. The Catholics hated the person and government of Copronymus; but even their hatred is a proof of their oppression. They dissemble the provocations which might excuse or justify his rigour, but even these provocations must gradually inflame his resentment and harden his temper in the use or the abuse of despotism. Yet the character of the fifth Constantine was not devoid of merit, nor did his government always deserve the curses or the contempt of the Greeks.[20](#) From the confession of his enemies, I am informed of the restoration of an ancient aqueduct, of the redemption of two thousand five hundred captives, of the uncommon plenty of the times, and of the new colonies with which he repopled Constantinople and the Thracian cities. They reluctantly praise his activity and courage; he was on horseback in the field at the head of his legions; and, although the fortune of his arms was various, he triumphed by sea and land, on the Euphrates and the Danube, in civil and barbarian war. Heretical praise must be cast into the scale, to counterbalance the weight of orthodox invective. The Iconoclasts revered the virtues of the prince: forty years after his death, they still prayed before the tomb of the saint. A miraculous vision was propagated by fanaticism or fraud; and the Christian hero appeared on a milk-white steed, brandishing his lance against the Pagans of Bulgaria: “An absurd fable,” says the Catholic historian, “since Copronymus is chained with the demons in the abyss of hell.”

Leo the Fourth, the son of the fifth, and the father of the sixth, Constantine, was of a feeble constitution both of mind and body, and the principal care of his reign was the
